Order thereon.

Ordered to be circulated for the information of the Collectors.

No. 71

To W. H. Bayley Esqr.
Secretary to the
Board of Revenue
Fort St. George.

225

Bd. No. 2481

From the Collector of North Arcot

Sir,

Para 1. A petition from Narainah Seigh late Monigar of Achamungolum in Wandiwash Taluk has drawn my attention to

to the order of the Board of Revenue in their letter to the late Acting Collector of the 2nd December 1852 directing this Petitioner's removal from that Office, on the ground that the sale and purchase of Village and Meeras is illegal, and to their Circular order of the 17th October 1850 quoted in the former order. I believing those orders, especially the first mentioned, to be not only erroneous in policy, but also to be founded on a mistaken view of the existing Law, I am induced to offer some observations on the Subject, in the hopes of leading to a reconsideration of them.

2 I would first beg to point out, however, that the Board's order of the 2nd December 1852 in the case of Narain Singh, goes a great deal beyond the Circular of the 17th October 1850 on which it purports to be based, and which was itself founded on an order of this Government. The Circular declares, perhaps using the words of Government, though the Government order itself is not given.

given, that "a Collector would be fully warranted "in rejecting any claim to the profession of a "Village Office and its' emoluments, founded "on a private transfer by sale or otherwise, "on the ground that the Ruling Power does "not sanction such alienations". This order makes the transaction voidable, but leaves the Collector a discretion to admit the party or to reject him. But in their later orders the Board have gone much further; they have made the sale *ipso facto* void and have absolutely directed that a man shall be removed from the Office of Monigar without any reference to his qualifications, and do simply because he had purchased the Meeras.

3 Both the orders above quoted purport to be based on Section II. Regulation VI of 1831, the only enactment bearing on the Subject. That Section simply declares that all emoluments annexed to hereditary village and other Offices, are inalienable from such Offices in any manner whatever —

St.

It was formerly the practice with the holders of such Offices and Emoluments, and to some extent it is so still, to deal with the latter, especially the Manniem lands as if they were an unconditional property; the land was Mortgaged, sold or attached in satisfaction of decrees of Court, and so dissevered from the Office to which it properly belonged; and thus the object of the grant of such Emoluments was frustrated, and the holders of the Offices were left without fit remuneration. The enactment above quoted appears manifestly to have been designed to meet this great abuse.

4 Another practice prevailed, which was and is interwoven with the whole system of that tenure of landed property termed Meeras, Viz. that the proprietor of a Meeras Office may alienate his property and Emoluments, transferring with them the conditions on which they are held; thus conveying to another both the emoluments, and the obligation to

to perform the duties annexed to them. This institution is of very ancient existence, coeval indeed with the institution of Meeras itself, and is recognized and asserted by writers on Meeras. and the wording of the law above referred to (Section II Regulation VI of 1831,) seems to have been carefully and skilfully adapted to meet it and to preserve it, to prohibit the alienation of the Emoluments from the duties, but not to interfere with the transfer of both together; for the simple and sufficient reason that such united transfer does not separate the Emoluments from the Office, or hinder the due performance of the duties.

5 Such, I say appears to me to be the plain and obvious meaning of the law in question; and in my opinion it is as wise and judicious in what it omits, as in what it includes. I think it as just and as politic to permit the free transfer of

Offices

Offices and Emoluments together, as I consider it to be just and necessary to prohibit that of the Emoluments alone, without the obligation to perform the duties of the Office and it appears clear to me that this construction is necessary to make the enactment consistent and effectual, and that under the interpretations declared by the Board, it would not merely fail to secure its declared object, but would actually operate to defeat it. This I will now briefly shew. —

It is the declared intention of the enactment (See the preamble) to prevent the separation of the emoluments from the Offices, in other words to avoid having a class of pauper Office bearers. But its certain tendency as interpreted by the Board is to produce this very result. Among the Meerasdars as in all other classes of mankind are found men of spendthrift and extravagant dispositions; such men

men when brought into difficulties will part with their personal property by little and little to satisfy their creditors, and of them their land will go; or more commonly in a strictly Meerasi village will be deeply mortgaged. The Mamiemmud only remains, and even that is not really enjoyed by the nominal holder, for though the Government can prevent the creditors from seizing the lands, they cannot prevent them from obtaining a share of its produce by harrassing the debtor. In the natural course of things and under the antient constitution of the Country, the whole Meerasi would now be sold, or perhaps would be transferred to the creditor in satisfaction of his claim; and instead of a spendthrift pauper for Mamiemmud, the Government would have a man of frugality and prudence, and of steady business habits. This consummation however is prevented by the law as now interpreted by the Board; and the pauper retains his

his Office, though it is often found unsafe to allow him to have any thing to do with the villages collections.

7 The Board must not consider the sketch as imaginary; it presents a class of cases of frequent occurrence, though not always in the same degree. To illustrate the working of the rules as laid down by the Board I will state a few actual cases which have recently came under my notice. Saladauly is a village of Wandiwash Taloob yielding a Revenue of about 120 Pagodas yearly. The Meerasy which is divided into twelve shares, was formerly held by persons of the Vellaulor caste, but has now passed entirely into other hands. Of the whole twelve shares eight and a half have been purchased in the course of the last twelve or fifteen years, by Vadoor Venkatasooba Reddy, who lives in the village and cultivates the land belonging to his shares. One share (and a half

are

are held by Venkatachella Naick whose father bought it, and who is also resident. The remaining two shares are owned by two other persons. Up to the present year the Office of Monigar was held by Valayuda Moodelly, formerly possessing a portion of the Meeras, but now literally a pauper having long since been obliged to part with that property, and having no ostensible means of subsistence. As a matter of course he was as a matter of course no influence, and the Collections did not pass through his hands. The case came under my notice during the Jummahbundy of the present year, and I removed Valayooda Moodelly, and appointed Venkatasooba Reddy and Venkatachella Naick to be joint Monigars.

8 The following is another case. In the year Sowmiah (A.D. 1849/50) Raja Gopaulsingar sold one Meerasdar

Meirasdar of Mannyaranay in Wandiwash Taloob, sold the Meeras of the Village — with all his Puttah and Kiejust land in it, to Mootoo Reddy of Doonnatoor — It is a small village, and at that time had been beychareng, or uninhabited, for many years, excepting by two poor men of the hunter tribe. Mootoo Reddy's object was to settle in the village with a sufficient — Number of Ryots and labourers, and extend the Cultivation, to the advantage of both — himself and the Government. The seller gave a Razinamah resigning both his Puttah and his Office of Monigar, and in favour of Mootoo Reddy; the — Puttah was transferred accordingly, but the Sub Collector declined to appoint Mootoo Reddy Monigar, on the ground that the Sale of Meeras Office was illegal. — Rajagopaulcingar then applied to be reappointed Monigar, and a relation of his, one Seenavarsingar also applied to be

appointed; and both were nominated, though both without any property or — interest in the village, and neither — resident nor likely to be resident in it. Rajagopaulcingar has now again — given a Razinamah resigning the Office of Monigar in Mootoo Reddy's favour, and I have appointed the — latter, and removed both the men who stood appointed. I may add that I should have done the same, even without this second Razinamah; because Mootoo Reddy's title was com- plete without it, and because his nomi- nation is not only his due, but is — certainly for the interest of the Govern- ment. The latter I think the — Board will fully admit, under the circumstances. I may add that Mootoo Reddy is now resident in the village, and that the Bering — has

has risen every year since he got the
7 July 1262 property and was highest last year
than in any of the last ten
years.

9 Another case I may
mention is that of Covil Ampoondy
also in Wandiwash Taluk and
also a small uninhabited Village.
In 1850 Vyty Iyen sold his Moiety
of the Meeras of this village for 70
Rupees to Runga Pillay a shopkeeper
of Wandiwash, and gave a
Razinamah both for his
Puttah land and the
Mannium Office as in the
former case, the Sub Collector
declined.

L.B.S.

declined to accept it for the Office, and
also objected to the Monigar divesting himself
of his land in the Village. Vyty Iyen
then professed his willingness to repay the
purchase money and keep the Meeras. But
he was unable to repay the Money, and
land was going out of cultivation from
his want of means. He accordingly again
tendered a Razinamah for the land, which
was accepted; and he has now given a
Razinamah for the Monigar office also,
and I have accepted it and appointed Runga
Pillay Monigar. I beg the Board to con-
sider what advantage would have accrued
to Government in any of these three cases,
by retaining the Meerassidar in posses-
sion of the Monigar Office.-

10. The only other instance
which I will here adduce illustrates a some-
what different class of cases, in as
much as the sellers were not paupers.-

Three

Three Brothers, by name Anuntachary Vurdacharry and Gopaulacharry were joint proprietors of the Meeras of Pinnaveram in Canveripauk Talooke. Having Meeras property also in the Chingleput District, they lived there and they had bestowed one eighth share of the Meeras of Pinnaveram on a relation, one Tiroovengadacharry, who lived there and managed the property, & also acted as their agent or Gomastah in the Monigam Office. In 1850 they sold the remaining seven eighths of the Meeras, their Puttah land, and all other their rights and immunities in the Village, for 1,500 Rupees to Attoopaukum Rattna Reddy and his brother Annachella Reddy. In virtue of this purchase, the ten persons obtained puttah in Jan 1862 for all the lands of the Village

They applied at the same time to be appointed to the Monigam Office; but in deference to the Circular order of the Board above quoted, the late Acting Collector demurred to grant this request, and the nomination was not made. Subsequently the applicants renewed their request to me, and I had no hesitation whatever in acceding to it.

11. In this case as already said the venders were not paupers; their reason for selling this property was that they had other Meeras property; and they found it convenient, being probably also in want of cash, to part with the whole of their interest in Pinnaveram and withdraw entirely from the neighbourhood. The purchasers came then into the position in the Village which fitted them to hold the Monigam Office in it; they, or one of them at least, were resident in it, they had an interest in

in its welfare from holding the greater
part of its lands and they had the influ-
ence which that property must give. Yet under
the Boards' order they could not hold
the Office, but its duties must continue
to be discharged by the agent of the
late proprietors of the Meeras, who is
certainly not in a position to perform
them with the same efficiency.

12. I will not trouble the Board
with any more instances and in refer-
ence to the policy of the course in
which I am advocating I will only
further observe that it appears to me
that in every case there is a presump-
tion that the purchaser of a Mee-
ras will be better fitted for the
discharge of the duties of the annex-
ed Office than the seller. For in
the first place as the holders of Mee-
clung

cling to its possession so tenaciously,
a party selling that will generally have
nothing else left; and that is very
rarely sufficient to maintain a man de-
cently in the position of the head of
a Village. But, further in part of
character also, it seems clear that the
advantage is on the side of the buyer.
as a general rule those who get rich are
certainly more valuable Members of
Society and better fitted for all the duties
of the Office in question than those who be-
come poor. I mean that entirely apart
from the independence given by the possession
of a measure of wealth, the acquisition
of it indicates the possession of valu-
able qualities, intelligence, industry
frugality, and selfrestraint, which are
generally wanting in those who become
poor, but which are certainly necessary
to the efficiency of a head of a
Village

Village

13. For the foregoing reasons I am firmly persuaded that the prohibition of the sale of Inecras Emoluments jointly with the Offices to which they are attached, is decidedly impolitic and unwise, and if impolitic it is also unnecessarily unjust; for any restraint upon the ordinary rights and privileges of property, not required by the general interest, must be unjust. But further it is certainly unjust, if it is unauthorized by the law, and I cannot but maintain that it is. This after all is the criterion to be appealed to; if the prohibition is contained in the Regulation it is lawful and may legally be enforced but if not it is illegal and ought to be abandoned. It may be argued by some that the Government was the maker of the Regulation, and may therefore obey it or not

not as it thinks proper. But this position is untenable. It is true that at the time when Regulation VI of 1831 was passed, the Legislative and executive functions were in the same hands; but a Regulation was a deliberate act in which the ruling Power declared its pleasure, for two reasons, 1st to make its subjects acquainted with it as a rule of conduct; and 2nd to guarantee them against any sudden or capricious change of it. The course of action may undoubtedly be changed; but it can only be so properly by another equally deliberate and formal act. I would beg to suggest then, that if the Board are still of opinion that the prohibition in question is lawful and that it ought to be maintained, an application may be made to the Court of Sudder Adawlut, the Official and responsible interpretors of the law to declare whether the Regulation warrants such

such prohibition.-

14. Before closing this letter I beg to explain the footing on which it appears to me the Meeras interest in Offices and Emoluments might properly be placed. and I may briefly say that I think it might fairly be regarded as a property, and be made subject to all the incidents and liabilities of property generally, with reservation only of those conditions which peculiarly belong to it. Thus I think it might not only be transferred by private bargain, whether of mortgage, sale, or otherwise, but that it might also very properly also be made liable to attachment and sale of the Courts in satisfaction of decrees, and by the Revenue authorities in liquidation of balances. and further I think that this species of

of property might properly be put on the same footing as other property and and be made subject to the jurisdiction of the ordinary Courts But the thing transferred or litigated in every case should not be any particular piece of land, but a certain share in the Meeras, a half a third, or eighth &c. This is the way in which Meeras is now invariably sold (for such transactions do continually take place) and the transfer conveys the actual rights of the sellers and no more.

15 Again such transfers whether voluntary or made compulsorily by authority would only convey the precise rights and immunities which the previous holder possessed. Thus in some Villages the Mannum is divided among a number of shares in the Meeras but this is only on sufferance and it is within the power of the Board of Revenue to unite the whole Mannium to the Mannium office. In such a case a purchaser of a portion of the Meeras, whether by private sale Court sale or

otherwise

That which is forbidden there I must again repeat is the separation of the Emoluments from the Office, but the transfers of which I am speaking do not at all operate to make such a separation.

15 I have here stated my views as to the mode in which Inams might be safely and properly treated. The extent to which it might be freed from restriction without compromising the interests of the Government or impeding the due performance of the duties annexed to it. It is certainly right to abstain from imposing wanton or unnecessary restrictions, and I have endeavoured to define the limits of what are necessary and therefore proper. I cannot but think it very desirable that the subject should be carefully and dispassionately examined that the present state of the law the actual practice and the feeling of the people, and the true bearing of the matters on the interests of the Government should be investigated and some definite rules then laid down and made as generally

otherwise would take it under the liability to be deprived of the portion of Mannium in common with the other unofficial holders again when there are several sharers of the Inam one or more are selected for the Inam Office or in particular cases, the whole of them are set aside and a non Inamdar is nominated, and a portion or the whole of the Mannium is assigned to him. A purchaser from one of the sharers would hold on precisely the same terms he may be set aside by the Collector in Common with the other Inamdars, if incompetent for the office. It does not appear to me that under such conditions the transfer of Inams would in any degree compromise the efficiency of the office because the Executive would have precisely the same freedom as they have now in selecting the individuals to hold it, and of precisely the same power to dispose of the emoluments attached to it.

Further it does not appear to me that such transfers are forbidden or even touched on by the Regulation

generally known.-

17 This is certainly required, for at present the practice is at variance with the law as declared by the Board and the consequence is frequent loss of property. The custom of selling Meerasses is deeply engraved in all the thoughts of such transactions are of Constant occurrence without the participators in them having the least idea that they are breaking any law, or the buyers that they are risking their money. and their notions of the justice of their rulers must be strongly shocked by such an order as that passed in Narama Singh's case. It is surely most undesirable to wage war against the habits and feelings of a Nation without a real necessity - I must beg to urge again therefore, that the present prohibition should not be persisted in, till after full enquiry and consideration; and that if there it be pronounced to be lawful and if it be deemed right and expedient to continue it this resolution should be declared so clearly as to admit of no misapprehension or doubt, and so publicly

to leave none in ignorance of it and should then be rigidly enforced.-

18 The greater part of the remarks in this letter refer primarily to Village or Reddy Meerasy but they apply equally to the other Meerasy Officers. The first mentioned indeed is more commonly matter of transfer than any of the rest; ~~~~ but transfers of Curnum Meerasy are also frequent though almost invariably to Curnums only. That of the Nolayar (or Village Shroff) Meerasy is less so and of the Talliary and Toty less frequent still all of such Meerasies might as it seems to me be treated in the same method as I have recommended for the Village Meerasy I. E. their transfer might be declared legal, the same power of selection for the office and the same control over the Emoluments, as they possess at present being still reserved to the Revenue authorities.-

19 Before closing this letter I beg to observe that the opinion urged above, that the transfer of the various

Fort St George 7 January 1857.

various kinds of Village Meerass may safely be permitted provided the obligation to perform the duties be invariably transferred with the emoluments appears to be in harmony with that of the Board and if Government in the case of "Service agrahurams and similar alienations for service" In Extract Minutes of Consultation May 9 1848 Para 18† the Government declare in accordance with a recommendation from the Board that the transfer of such Enams by sale or otherwise is unobjectionable, so long as the transfer carries with it the obligation of service to be rendered. This order fully affirms the Principle for which I am contending and my proposition is only to extend it to a new class of service Enams I submit that it is no less applicable to these than to the other and that the guarantees and safeguards to which I have referred and which are fully available would be quite sufficient to prevent any probable decrease in the efficiency of the various offices, and that on the contrary as shown in the early part of this letter, that efficiency would in many cases be increased.

† Printed at Page 456 of the Book of Circular orders of the Board of Revenue; and repealed and explained by the Board at Page 451 Para 8.

Br. No 2386
From the Collector
of Bellary.

Sir

In acknowledging the receipt of the Extract from the Proceedings of the Board of Revenue dated 5th May last, requesting me to state if any strong reasons exist for departing from the usual course noticed in para 1 of the above Proceedings and to report on the circumstances of the family of Cooroo Doogudda Chintapah, Sahagredar, in order that the case may be fully laid before Government. I have the honor to state as follows:

Mahdavapah is a cousin / in the 3d degree / to the deceased Chintapah being the great grandson of Ramapah brother of Chintapah the original grantee who was grand father of the deceased Chintapah. The annexed Table shows the relationship particularly

particularly

Adopted by the deceased

2 There is no documentary evedence to shew that the origenal grantee obtained the Office of Foujdar by hereditary right. Though from an historical document in possession of the family it is observed that Narasapah the father of the first Chintapah /see above/ followed the fortunes of the Jahageerdar Somasaker Naik was wounded when in his service /but in what capacity does not appear/ and died some years before the Jahageerdar [illegible] at the

of Seerungapatam, from exile to regain possession of his Samstanum. On his submission to General Harris at Murryhur in 1881 the Jahageer was obtained by Somasaker Naik, and the Foujdarship conferred by the Jahageerdar on Chintapah. It would appear therefore that Chintapah obtained the Office on personal grounds rather than that he succeeded to it by hereditary right.

3 I know of no strong reasons beyond those above stated for departing from the usual course noticed by the Board, in favor of the adopted son of the late Jahageerdar the present Claimant

4 The Circumstances of the family have already been noticed in my former Report /para 4/

Bellary Collectors Office
23d June 1856.

/Signed/ C. Pelly
Collector

Resolution.

Fort Saint George 7th January 1857

B. No. 90

Resolution thereon -

228

Resolved that the above recorded letters together with their enclosures be forwarded for the consideration and orders of the Right Honorable the Governor in Council -

2 In these communications the Collector of Bellary reports the death of Jaghiredar Chenthapah, grand son of the original grantee who was the Foujdar of the Polegar of Burpanhilly -

3 The lands enjoyed by deceased are the Village of Roodhoguddu in the Roodlog Talook measuring according to the survey 1376 G 5 a 10 and bearing an assessment of Rupees 1057 " " a Semeedary Enam in Mospelt of the same Talook, measuring 154 G An 29 - 6 assessed at Rupees 354 - 2 - 2 and four Bhutwurty Enams of the aggregate extent of acres 56 — 0 — 5 assessed at Rupees 100 - 15 - besides other Potail and Curnum Enams bearing an assessment of Rupees 727 - 13 - and paying a Jodee of 362 Rupees

Fort Saint George 7th January 1857

Remarks to Govt. 5 January 1857

4 The following remarks will be confined to the Jaghire and Jameedary Enam as they call for some special notice, and recommendation of the Board as to the disposal of the Bhutwarty Enams will be found in the usual column in the Tabular Statement accompanying the first of the above recorded letters -

5 The original Jaghire valued at 20,000 Canteroy Pagodas equivalent to 58,000 Rupees was granted by the Bengal Government to Somasarka Naik the Minor Polegar of Harpenhully to his hereditary Dewan who was mainly instrumental in the peaceful surrender of the District to the British arms and to the other principal officers of the Polegars retinue -

20,000 X 2 - 9 X : 58,000

6 A disagreement having subsequently arisen between the Polegar and his officers, Government on the recommendation of Colonel Munro, authorised a subdivision of

of the lands to each of the officers, and the Sayb
and Sameedary Enam particularised in para
were allotted to the Polygars Foujdar Chinthap
grandfather of the last incumbent under a
sunnud of the British Govt. dated 21st
October 1806. The deceased has left no
but two widows surviving him and a cousin in
3d degree Mahadasapah about 6 years of a
who Mr. Pelly states was fostered from h
infancy by the deceased and would have be
adopted by him but for a hope that he wo
yet have a son of his own to succeed to t
Estate - a wish was however expressed by the d
that this cousin should be considered as his heir

7 The Board observe that the wi
to adopt the present claimant has no legal
validity and they consider that the widow
under any circumstances have a preferable
claim to so distant a Kinsman - They there
recommend that the Jaghire and Enam
jointly assessed at Rupees 1411 - 2 - 1

may be continued to the two widows of deceased

8 It will be seen from the Memo-
furnished by the Collector of the present state
of the entire Jaghire of 20,000 Canteroy Pagodas
that almost the whole * has reverted to
Government by a failure of heirs to the

R. № 3843

From the Collector of Tinnevelly

With reference to Extract from
Proceedings of the Board of Revenue dated
July 1856 № 2204, requesting to report on
-sult of the attempts made to introduce
new forms of Village accounts during the
Fusly I have the honor to inform you
the papers relating to the revision of the
Village accounts with the Memo. of
Secretary to Government dated 11th Septem
1855 were received on the 17th Idem, and
the printed forms of the accounts with
lations in Tamil and Telugoo of the
for the guedance of Curnoms in the prepa
of the accounts were received in Novemb
following. As the Curnoms were all

fully engaged in the collection of Revenue,
and the accounts of Fusly 1265 were all in too
advanced a state to introduce any change in
them, and above all, as it required some time
for the Curnoms to become familiar with the form
and to be acquainted with the mode of preparation
of accounts, nothing was done regarding their
introduction in the past Fusly.—

2 The forms and the books of
instructions intended for the Curnoms were dis=
tributed, and strict injunctions issued to the
Tahsildars early this year to have the accounts
of Cultivation (which are the first to be
prepared in the Fusly) prepared agreeably
to the new form, and verbal Instructions were
also given to the Tahsildars and Curnoms
on the subject during the distribution of
Puttahs for the past Fusly. Several particulars
were since asked by the Tahsildars all
which were fully explained to them, and
the new forms with certain alterations and
additions as shown below, have been
introduced in all the Talooks.—

In

3 In order to see which of the forms given for Oloongoo and Ryatwar Villages are not applicable & what alterations and additions would be required to make them suit the System in this District, the accounts for a few Villages in some of the Talooks were prepared exhibiting the results of the past year; and after having them carefully looked into, the additions and alterations that seemed absolutely necessary were made.—

4 Orders have been issued to the several Tahsildars to supply the Curnums with the required quantity of paper the exact amount of which cannot as yet be estimated.—

Sir

Para 1 As it is now nearly 2 months
since the receipt of Extract Minutes of Consul-
-tation dated the 15th July last, in the con-
-cluding para of which Government express the
hope that the revised scheme for the Northern
Talook will be laid before them at an early
date, and as in consequence of the time and
attention which have been of necessity given
to the Camabundy settlement and the co
collections, the realization of which last
is now a matter of difficulty, I have been
unable to complete the revision of the new
rates so speedily as anticipated, I have
the honor to submit for the information
of the Board and of Government the pro-
gress made up to this date.—

2 The directions contained in para
7 of the Extract Minutes of Consultation that

the

the maximum rates were not to be so exclusively applied that the reductions on the lower lands were not to be carried so far, that the Punjah rates below 4 Rupees should descend by gradations of a quarter rupee or 4 annas and that the gradations in Poonjah should be two under two Rupees or 4 annas have manifestated an entire reconstruction of the scheme of revision.

Three applications of the maximum to the Poonjah lands have been made in succession, and rejected. The fourth has been adopted and the subjoined is an outline of the plan. In the scheme submitted to the Board the old net rates of Poonjah from Rs. 11-13-11 to Rs. 6-14-3 were to be reduced to 4 Rupees in the plan now sanctioned the former rate of Rs. 11-13-11 is now assessed at 4 Rupees; the other old rates of Rs. 8-6-9 to Rs. 6-14-3 were to be reduced to 3-12-0. The extent of land included in the above changes is not considerable being in cultivation to C. as. 287-8-12 and waste to C. as. 203-3-4. The other rates

have been modified in a similar manner, and the result is a reduction on the whole cultivated area of Poonjah land in the Northern Talooks of Rs. a. p. 20-6-7 per cent, on the waste of Rs. a. p. 17-15-9 and on the total ayacut of Rs. a. p. 18-14-8 per cent. The addition of garden lands assessed from 6 to 3 Rupees increases the above percentage to Rs. a. p. 21-0-2 on cultivation to Rs. a. p. 18-8-11 on waste, and to Rs. a. p. 19-8-0 on total ayacut.

3 The average rate per Cawny on Poonjah land is on cultivation Rs. a. p. 1-13-10 on waste Rs. a. p. 1-10-6, and on the total ayacut Rs. a. p. 1-11-8 exclusive of totacal it is on cultivation Rs. a. p. 1-13-4 on waste Rs. a. p. 1-10-2, and on the ayacut Rs. a. p. 1-11-4.

In para 6 of my predecessor's letter to the Board dated 23rd October 1854, he states his opinion that the average should be reduced to Rupees 1-14-0 per cawny on the cultivation of Fusly 1263, which is the basis of the present calculation and to about Rs. a. p. 1-13-6 on the total ayacut.

The

4 The Punjab lands assessed at the old rates from 2-4-9 to -0-9-6 constitute including cultivation and waste 41 per Cent of the whole - The waste assessed at these amounting to 1,46,464 - 0 - 0 Cawnies or 75 per Cent of the entire waste in the Northern

It was deemed necessary therefore that some reduction should take place in the lower rates tho' not to the extent proposed in my former scheme - In one of the assess= tions of the rates above noticed a much smaller reduction was made & the lower and in consequence the total percentage reduction was only 13 per cent on the area - The plan was therefore rejected -

5 Three new applications of the proposed have been made in Punjab the last of which has been adopted -

In the scheme formerly submitted to the Board the old net rates from Rs. A. P. to Rs. A. P. 16-6-8 were brought to Rs. A. P.

In the scheme now prepared the former rates from Rs. A. P. to Rs. A. P. 19-11-6 to Rs. A. P.

only are assessed at 10 Rupees, and those from Rs. A. P. 17-6-9 to Rs. Rs. 16-6-8 are reduced to Rs. A. P. 9-8-0 a similar modification has been carried thro the rates -

The result is a reduction on the total punjab including garden 9 1/2 Cs. of Rs. A. P. 26-7-0 on cultivation of Rs. A. P. 27-9-0 on waste and of Rs. A. P. 26-14-0 on the total ayacut -

The Margin left for the Southern Taloks is thus more considerable than in the scheme submitted to the Board -

6 The rates per Cawny is on cul= tivation Rs. A. P. 7-6-10 on waste Rs. A. P. 7-4-6 and on the total ayacut Rs. A. P. 7-5-11

This average includes two crop land, the average on one crop land cannot be ascertained as the necessary account has not been pre= pared, and is not required according to the forms received from Government, to be submitted -

7 Altho the total per centage of re= duction in the scheme now under preparation is greater than in that lately submitted the

the rate per Cawny is higher.—

This result arises from the c-
cumstances, that altho' an increased rate
has been granted to the higher assessed
lands, the reduction on the lands assess-
at the lower rate has been contracted
these lands constitute the greater por-
of the whole. The rates having been set
the calculations for the Taloks stat-
ments are in course of preparation
will be completed as soon as possi-

8 The material variations in
rates per Cawny found, as adverted
in para 4 Extract Minutes of Consu-
tation, between one Taluk and anot
are, as regards Punjah, partly to
attributed to the fact that there
many 2 crop land is now taluk the
in another, but they are in a great
measure inherent in the scheme of
ing one set of rates to every Taluk

Some inequalities will I believe
be removed by the application of the
rates now in progress but their complete
removal can only be effected by a new
classification of the lands, a process that
usually accompanies a survey and which
can be most effectually performed in
connection with it, as it gives an
opportunity for ascertaining correctly
and with but little additional cost of
time and labour, the relative fertility
and other advantages of the several

several tracts of land.—

9 A Statement has been prepared showing in detail how those inequalities in the several talooks produced which I propose to submit in a few days.—

The revised scheme will be forwarded as soon as the necessary statements and calculations can be prepared.—

No. 231.

To
J. D. Sim Esqre
Acting Secretary to the
Board of Revenue
Fort St. George.

232

B/ No. 1,356
From the Collector of North Arcot
Submitting the Modified scheme of the revision of assessment called for by Government.

Sir

Para 1 I have the honor, with reference to Board's Proceedings of the 29th June No. 1909 and Extract Minutes of Consultation, dated 15th July last, to submit the Modified scheme for the revision of the assessment which I am required to lay before Government.

2 The Statements Nos. 1 to 13 which accompany are similar to those submitted with my letter of the 9th June last. Statements Nos. 14 to 17 have been prepared in conformity with the forms transmitted by Government in pursuance of para 11 of Extract Minutes of Consultations, above referred to. Statements 18 to 27 have been added to show the manner in which the material variations existing between ours Taloks and another, as noticed in para 4 of the Extract Minutes of Consultations, are produced.

The

The same objection as that noticed by Government, is stated in para 12 of the Board's Proceedings, and those statements are forwarded in explanation.

3 In my letter to the Board of the 9th June last I explained the principles which it was proposed to apply the rates, but as some of the remarks made both by the Government and by the Board upon the Scheme, then proposed, shew that the explanations before given were not sufficient I propose briefly to recapitulate the principles on which it has been proposed to carry out the revision.

4 In para 3 of my letter above quoted I noticed that my Predecessor Mr Bourdillon have stated his inability to say whether or not it was practicable to have one set of rates for the whole District of the Northern Talooks, and in the same para I proceeded to show the advantages that would result from our having but one set of rates, at least in the Northern Talooks.

5 It was then found the

besides the possibility of having but one set of rates, the same application of them in all the Northern Talooks was practicable, and that by applying them in a precisely similar manner in each Talook the "present classification would be meddled with" as little as possible and that nevertheless this mode of applying the rates would apparently fulfil the required conditions of affording the greatest proportion of relief to the most highly assessed land, and of granting to certain Talooks a greater percentage of reductions than to others.

Para 38 Mr Bourdillons Letter to Board 23d October 1854.

6 This plan was therefore adopted, and has been retained in the scheme now submitted. all Punjah lands, in whatever Talooks situated, which, under the old rates, were assessed at from 19 - 11 - 5 - to 17 - 9 - 9 - for one crop are now brought to 16 Rupees, and all assessed at from 17 - 0 - 9 - to 16 - 6 - 8 - are now proposed to be rated at 9 - 8 - . The same course has been adopted with regard to Poonjahs.

7 By adopting this course there was the least possible interference with the present classifications, no excess in

in fact than in that resulted from merging in one moderate rate several old exorbitant ones. The relative classification in the several Talooks was left untouched, Manjah lands, for instance formerly assessed at from 11-10-10 to 11-1-8, whether situated in the Talooks of Chittoor Chendragherry Caiveri pauk or Sholinghur are all equally brought to the new rates of 8.

8 So have adopted any other plan and to have brought to lower classes lands considered to be too highly assessed even under the present reduced rates, would have been to have attempted a re-classification without that reliable information as to the relative fertility and other advantages of the several tracts of land, which could alone render an equitable classification possible.

9 It will be seen by the above explanation that whatever variations between Talooks existed under the former plan of assessment, were not removed by the mode adopted of applying the new rates. The considerable variations however noticed by Government and the Board are in part, at least, to be explained by the fact that the averages per Cawney

Cawney, quoted in para 4 Extract Minutes of Consultation, include the rate on the 2nd Crop in two Crop land - a greater or proportion therefore of 2 Crop to 1 Crop in one Talook than in another would of course raise the average rate per Cawney of that Talook, if taken as those quoted were on both Crops.

10 The annexed Statement shows the proportion that two Crop bears to one Crop land in each Talook. It will be seen that generally the rate per Cawney is high according as the proportional extent of 2 Crop land is considerable. In those instances in which this is not the case the cause of variation in the rate per Cawney will be found in the original classifications of the lands, as will be noticed in a subsequent para - as stated in my letter of the 19th Ultimo all Mr. Bourdillon's calculations were based on

Fort St. George, 7th January 1857

ous accounts which included both Crops in two crop land. To have distinguished, in all the Statements now submitted, 2 Crop from 1 Crop land shewing the average per Cawney and per centage of each, would have entailed a greater expenditure of time and labour than it was considered expedient to undergo, with reference to the necessity of introducing at the new rates at an early period.

Arrajah.

Avilcondah in Satghur	185	125	86	9	3	2

In

Fort St. George, 7th January 1857

11 In the Statements Nos. 19, 21, 23, 25 and 27 however which as before stated I have had prepared in order to explain the variations noticed in the different Taloks the extent of two crops has been distinguished from one crop land. From the abstract previously given it has been seen how the total average rate per Cawney has been influenced by the comparative extent of 2 to 1 Crop land. For the reasons given in the preceding para, the average rate per Cawney on one Crop only has not been given in the Statements.

12 Statements 19, 21, 23, 25 and 27 also show how the variations in the rate per Cawney are caused in those instances in which they cannot be accounted for by a greater proportional extent of 2 Crops to 1 Crop land. Some Taloks a greater proportional extent of the land is assessed at the higher rates, and a smaller extent classed at low rates. In others, little or no land is assessed at the higher rate and the greater part is entered in the lower classes.

340 Fort St. George, 7th January 1857

In the Taloks of Palmanair and Venkatagherry Cottah although the proportion of two Crops to one Crop as shewn in the abstract Statement para 10, is 63 and 90 per Cent respectively, yet the average per Cawney is only 6-2-9 and 6-10-10. The reason is found in Statement No. 19 which shows that in these Taloks there is not found whatever bearing the higher rates of assessment.

13 In Poonjahs the last mentioned cause viz. the original classification, has created the variations noticed between the taloks. for as before stated the former classification has been interfered with no more than by merging in one of the classes, now proposed a certain number of the old rates in each Talook in which such old rates were found.

Annexed is a Statement Shewing the average rate per Cawney in each talook according to the present & proposed.

Poonjah

Fort St. George, 7th January 1857

Maunnadoor Poleims in Chandraghurry	2	10	1	"	14	3

Fort St. George, 7th January 1857

The highest rate per Cawney — is in the villages situated in the Wunderwash Taloob, which were transferred from the Chinglepute District.

A reference to Statement No. 22 shows that there are but 4 Sets of Poonjah land in these Villages assessed at from 3-8- to 2-10- and that there is no Poonjah land whatever assessed at the lower rates. The average per Cawney is consequently very high.

The next highest rate per Cawney occurs in the Tirvallum Taloob. The Statement No. 18 shows that in that Taloob the extent of land assessed at the 2d rates at from -8-6-9- to 2-4-9- per Cawney is 131,35 being 78 per cent of the whole poonjah cultivation of the Taloob, and that in the Taloob of Chittoor the extent of poonjah lands assessed at those rates is only 64,63 being not more than 38 per cent of the total poonjah cultivation in that Taloob.

Having

11. Having thus shown that in the plan submitted by the variations of rates per Cawney in the different Talooks prior to the year are caused in principle by comparatively greater extent of Crop land in the manner in which the former classification was made I beg to submit my opinion that this inequality cannot be effectually remedied without a due

P.S.B.

observance of the rights of Government as well as of those of the Ryots without a reclassification of the land not arbitrarily made but founded on an accurate knowledge of all those local circumstances that justly influence a classification of soils This reclassification could be most effectively performed in conjunction with the contemplated scientific survey referred to in para 6 of Bourdillon's Proceedings dated 21st June 1856 No 1909.

In the mean time the most highly assessed talooks have by the operation of the mode of applying the proposed rates explained in the preceding paras. shared most largely in the reductions as is seen in statements No. 14 and 15 In Poonjah, for instance, the talook of Trivellum in which the rate per Cawney in Poonjah is so high the percentage of reduction is 24-10-3. while in Chittoor it is only 20147-15

Further relief could be granted in those Talooks in which the average rate per

per cawny is considered too high whether in
or in poonjah by bringing such clafs to a low
clafs than that proposed. In Trivellum Tal
for instance were the average rate per cawny
according to the plan submitted, is in fasly
2-5-2 75 Cawnies of land formerly afsefs
at from 6-5-1 to 5-11-11 which are now
at 3-8 might be afsefsed at the mod
rate viz 3-4- but 22 cawnies in the
Taloob and the 49 cawnies in Salghur
same clafs / vide Statement A° 18/ are
the same position and if a reduction fro
6th to the 7th clafs is to be made in one ca
seems in justice to be required that it sh
made in
The fact that the total average rate per
is higher in the Trivellum Taloob than
in Chittoor and Salghur cannot be regard
a sufficient proof in the absence of all
of the comparative local advantages of

of the several lands. that the 72 cawnies in Trivellum
are not as justly rated at 3-8- as the 22 Cawnies
in Chittoor. or the 49 cawnies in Salghur. But it
does not seem unreasonable to suppose that if
the poonjah afsefsment in the Trivellum Taloob
is comparatively high it is so, not without
cause. and that the officers who classified the
lands considered themselves justified in placing
the several lands in the clafses they occupy in
that Taloob.—

I will now proceed to state in what
manner I have endeavoured to carry out the
instructions of Government contained in paras.
7-8 of Extract Minutes of Consultation dated
15th July 1856 My letter to the Board of the 19th Octbr
contains some information on this point, and shews
the general result that has attended a compliance
with what was believed to be the intention of those
orders.—

As explained in para 7 of that
letter and for the reason therein stated, the
general effect has been to raise the average
rate

rate per Cawny. For while the further relief which has been given the highest classes of land would have the effect of lowering the average rate per Cawny this has been more than counterbalanced by restricting the narrower limits the reductions on the lower lands. —

Paras 7-9-8 Extract Minutes of Consultation

17 The Poonjah lands, assessed at from 2-4-9 to 0-9-6 at the old rates constitute, including cultivation and waste 71 per Cent of the whole poonjah lands in the Northern Talooks These classes of poonjah land it is now proposed to assess at rates varying from 1-14-6 to -9-. This would give them a reduction of 15-11-3 per Cent. The amount of per centage of reduction in these same classes was in the scheme before Submitted 10-15 per Cent. But tho' in obedience to the orders of Government the reductions on the lower Poonjah lands have not been carried so far as before, it was not deemed

advisable to exclude even the lowest from all participation in the reduction of assessment Independently of the great proportion these lower assessed Punjah lands bear to the total poonjah land, the extent of waste in proportion to cultivation in some of the lowest classes seems to shew the necessity of a reduction. —

In the Poonjah lands, assessed at the old rates from 0-12-3 to 0-9-6 the extent of waste is 20937 Cawnies being 24.5.13 per Cent in excess of the cultivation marking allowances for much land, that is in fact uncultivable having been included in these classes, still much cultivable land must remain which is thrown out of cultivation and to which the general argument of too high a rate causing land to be left waste must apply. —

18 A comparison of Statement Nos 2 and 3 will shew that the same reasons do not exist for the lowest Punjah land sharing in the general reduction and consequently all Punjah lands assessed at the old rates from 4-6-5 to -1-10-10 have had no further relief than was unavoidable in bringing

bringing each of the old rates to the nearest proposed

19 Statement 8A shows that the gradation of the rates has been modified in the manner directed Government in Para 12 of the Extract Minutes Consn

In making the application of these modified rates it was found that the addition of two or three more rates would greatly facilitate the even progression of the reductions, and as so many rates has been added to those formerly proposed, it was hoped that it would not be considered objectionable thus slightly to increase their number with these additions the proposed rates amount in Tunjah to 35 and in Poyal to 37 in number.—

In Tunjah		In Poyah

"	"	2	2

20 In carrying out the instructions of Government with regard to the Avvelcondah Villages and Nammondoo Poliem, it has been considered necessary to deviate from the plan adopted in the Northern Saloots. Vide para 8 Extract Minutes of Consultation

it is remarked that "the assessments of these Villages are high compared with the standard rates approved, tho' moderate compared with old rates" An application therefore of the proposed rates somewhat different from that made in the Saloots assessed at the old high rates seemed here necessary - Each of the present rates in these villages has not therefore been brought to what is the equivalent proposed rate in the other Saloots but to that next highest for instance it is proposed to bring Tunjah Land in Avilcondah Villages now assessed at from 10-8 to 10-1 per Cawny to 8 Rupees i.e. to the 5th Class instead of to 7 Rs. 8. i.e. the 6th Class which last is the rate to which all Lands similarly assessed in the other Saloots, are now brought - The Poonjah

poinjah rates in the Avilcondah Villages, and the Nunjah and Poonjah rates in Manamedoor poliem have been similarly dealt with.

21 The Inamavary Nunjah lands in the saluaid Taluk, in the Avilcondah Jaghire, in the village transferred from the Chingleput District, and the small extent of this description of land in the Converipank Taluk, which in the former scheme were treated as garden land, and brought to the highest poonjah rate have all as directed in para 20 Coloa Minutes of Consultation been now treated as poonjah, and have been assessed at rates varying from 4 Rupee to 1—2—0 per Cawny. In applying the poonjah rates to this description of land a considerable per centage of reduction

reduction has been granted to the highest classes but the lower classes of Inamavary have only obtained such reduction as was occasioned by bringing them to the nearest proposed poonjah rates.

The Nunjah and poonjah lands of the saluaid Taluk have as was intended received no further reduction than was caused by bringing the 99 classes of Nunjah and the 50 Classes of Poonjah in that Taluk to the nearest new rates.

Para 11 Extract Minutes of Consultation 23 April 1853.

22 In para 9 Extract Minutes of Consultation 15th July 1856 it is observed that no reason appears why villages transferred from Chingleput should share in the reductions except where it shall clearly appear that the present rates are high. It has been shown in the statement annexed to

to para 13 that the highest rate per Cawny in Poonjah is found in these villages, but it has been explained in that para that this has been caused by the absence in them of inferior land. The Poonjah rates existing in the Villages transferred from the Chingleput District to the Wandewash Taluk cannot be considered positively high without a knowledge of the nature of the soil as there is much land so classified in the other Taluks.

The Poonjah average rate per Cawny is comparatively easy in these same Villages.

The lands therefore in the Villages transferred from Chingleput have not shared in the general reduction but the former classes have been merely

brought to the nearest new classes.

23 A circumstance connected with the application of the rates not yet adverted to has in addition to the reasons stated in para 9 & 10 had the effect of raising the rates per Cawny in the 3 Villages of the Vellore Taluk altho these Villages were originally assessed on the same principle as those in the Northern Taluks, the reduction of 12½ per Cent granted in the year 1823 did not extend to these Villages. The rates therefore were in the first scheme applied to the Original assessment in these villages of Vellore to an equality with those of the Northern Taluks a reduction of 12½ per Cent has in the present proposal been made on the Original assessment,

and

and the rates have then been applied to the remainning net assessment exactly as was done in the other Talooks.

24 I trust that the explanations given in this letter will be considered to meet the objections taken by the Board and Government to some parts of the proposed plan of revision, and that it will be found that the instructions of Government have been attended to. And if it should be found that the scheme, as now submitted is such as to merit the support of the Board and the Government I would beg most respectfully but most earnestly to solicit in order to obviate the delay that must result from repeated references, that the course recommended by Government in para 9 Extract Minutes of Consultation 23d April 1855 and referred to by the Board

in para 12 of their proceedings of the 21st June 56 be adopted and that "when the scale of rates is once settled, I may be left free and unfettered in applying it."

25 No reference has been made in this letter to the Southern Talooks The accounts however connected with them which have been commenced will now diligently be proceeded with.

The necessity however of distinguishing two crop from one crop land will I fear be attended with such an amount of labour as will involve very considerable delay in completing the revision in the Southern Talooks.

26 The Board are aware that in general the assessment hitherto in force makes no distinction between one and two crop land in those Talooks

M.

Fort St George 7 January 1857.

Mr Nisbetts assessment is believed to supply this information in regard to those Villages which be completed. But it will be a work of much time to prepare accounts framed on this information. and if that classification into 2 and 1 Crop land should after all be found defective, further delay will ensue.

27. In para 26 of Mr Bourdillons letter to Board 23d October 1854 it is stated that there is no record or register in the Southern Talooks showing the lands which do and which do not bear two crops which have and have not irrigation for a seconds and that it requires local enquiry to decide as to the bearing of the present rates and therefore as to the proper and just reduction to be made in that part of the District.

Fort St George 7 January 1857.

This local enquiry however must be a work of time, and will create greater delay than is, I fear, anticipated.

28 In conclusion I would beg to offer the following explanation with reference to the remarks contained in the concluding para of Extract Minutes of Consultation 15 July 1856.

Although sanction for the extra assistance required to carry out the revision of the assessment was received in my Office on the 26 January 1856 it was not till the end of March that the accounts connected with it which had been by my direction under preparation for many preceding Months were in such a state of completion as to render it necessary for me to give my undivided attention to the work of revision and

o.

Fort St. George 7th January 1857.

I purposely therefore deferred till that period, application for assistance that was to be limited to a period of 2 years.

On the 2d April I applied for that assistance, and on the 31st May the Additional Sub Collector joined the District.

On obtaining this relief my whole time was devoted to the work, and within a very short period the proposed rules were submitted.

In the interval between my application for assistance and the arrival of the Acting Additional Sub Collector, I had severall and magisterial charge of 6 Talooks, besides the police of the great zemindaree with the aid only of an Assistant who possessed the disqualification of not having completed

9 June

J.C.B.

Fort St. George 7th January 1857.

a twelve months residence in the provinces.

I trust this explanation will not be deemed unsatisfactory, indeed it seems to be allowed in the above quoted para of Extract Minutes of Consultation in that "the submission of a detailed Scheme at an earlier "date might have been for some "reason impracticable."

Fort Saint George 7th January 1856

para 12 of my letter of the 23d Ultimo, yet the
are by no means so great as would appear
by the Marginal Statement in para 4 of the
above Extract Minutes of Consultation

Talooks	Proposed rate including 2 Crops			Proposed rate on one crop only		
	Rs	A	P	Rs	A	P
Chittoor	9	2	1	7	6	3
Chendragherry	9	3	4	7	9	1
Cauveripank	6	11	6	6	4	9
Sholinghur	6	4	2	5	13	2
Trivallum	8	4	8	7	4	2
Soutghur	8	7	4	7	3	7
Polmanair	5	11	10	4	14	3
Vincatgery Cottah	6	3	7	5	2	4

3 The statement in the Margin shows the proposed rate per Cawny both inclusive and exclusive of the second crop. It will be seen that the percentage of variation between the highest rate which is in Chendragerry, and the rates in the other Talooks is considerably less, when the rates on a single crop are compared than it is when the Comparison is instituted, as was done in para 4 Extract Minutes of Consultation 15th July between the average rates per Cawny when two Crops are included.

The proposed average rate per Cawny in Chendraghurry is, on 2 Crop 9. 3. 4 and that in Cauveripank is 6_11_6 the difference between them being 26_13_11 percent. Whereas the rate per Cawny on a Single Crop, as shown in the Statement, now forwarded is on two

Fort Saint George 7th January 1857

Chendraghurry 7. 9. 1 and in Cauveripank
6. 4. 5 the difference being only 17. 1. 4 per
cent. The Marginal statement shows that
in the other Talooks the percentage of
variation between the rates per Cawny
in those Talooks and in Chendra-
gherry in which the rate is highest
is not so great as was supposed when
the Comparison was instituted on
the rates which included the assess-
ment on the second crop. Exceptions
occur in the Talooks of Palmanair and

Talooks	average rate per Cawny on one crop in Chendragherry			average rate per Cawny on one crop in the other Talooks			Difference			Percentage		
	Rs	A	P	Rs	A	P	Rs	A	P	Rs	A	P
Chendragherry	7	9	1									
Chittoor				7	6	3	4	2	10	2	5	5
Cauvery pank				6	4	5	1	4	8	17	1	4
Sholingur				5	13	2	1	11	11	23	4	11
Trivallum				7	4	2	4	8	11	7	5	10
Sautghur				7	3	7	4	5	6	4	8	7
Poloor				4	14	3	2	10	10	25	6	4
Vencatgherry Cotah				5	2	4	2	6	9	32	4	4

Talooks	average rate per Cawny on two crops in chendragherry			average rate per Cawny on two crops in the other Talooks			Difference			Percentage		
	Rs	A	P	Rs	A	P	Rs	A	P	Rs	A	P
Chendragherry	9	3	4									
Chittoor				9	2	1	4	4	11	4	10	4
Cauvery pank				6	11	6	2	7	6	26	13	11
Sholinghur				6	4	2	3	2	10	34	9	3
Trivallum				8	4	8	1	2	4	12	7	7
Soutghur				8	7	4	4	11	8	7	15	4
Poloor				5	11	10	3	7	2	37	8	6
Vencatgherry Cotah				6	3	7	2	15	5	32	4	1

Vencatgherry cottah in which the assessment is so very low that a Comparison with the other Talooks cannot be fairly instituted.

4 The average rate per Cawny on a

Single

Single Crop in the Vellore Taluck is on the
ayacut 7. 1 4 and on the Cultivation 7. 4 —
The remark in para 6 Extract Minutes of
Consultation, that the rate of 9. 10 — was
exhorbitant, was made under the supposition
that that was the rate on a Single crop. The
Board are aware that the proposed rate
per Cawny on two Crops is even higher in
the Vellore Villages than the rate goaded
being 9. 12 - 2 on the Cultivation. The
as was explained in my letter of the 22d
Ultimo, is owing to the great proportion of
two crop land in these Villages.—

5 In the above paras and the
Statements, the average rate per Cawny
according to the Ayacut has been goaded for
the sake of Comparison, as the same
course was adopted in Extract Minutes of Consultation above
goaded. but the Statement exhibits the

the rate on Cultivation, on waste
and on the Ayacut.—

6 On Comparing Columns 6 and
7 of the Statement now submitted the
equalizing effects of the mode adopted
of applying the rates is apparent for
the variations in the proposed
rates are not so great as in those
now existing.—

North Arcot Collector's Cutcherry Chittoor 22 Nov. 1856

(Signed) C. Whittingham
Coll. &c

Read

B.d. No. 67
Resolution thereon
230-31

Resolved that the foregoing letters be submitted for the orders of the Right Honorable the Governor in Council with reference to Extract Minutes Consultation 15th July 1856 No. 731. —

The second of the letters recorded 2 above shews the final arrangement for the revision of the assessment which the Collector proposes to adopt. His first plan submitted to Government with the Proceedings of the Board 21st June 1856 No. 1909, required the Government thought modification in certain particulars: on some points also the information contained in the Collectors' letter was considered defective. The remarks of Government were to the following effect: —

That material variations were found — between one Taloork and another, for which no satisfactory reason was apparent that, though the existing high Runjah rates in Chittoor and Chandragherry Talooks had been properly reduced in a larger degree than in any other Taloork. Still the proposed rates there were higher than the old rates in some other Talooks, and that it was not evident why the proposed rates

rates in Cauveripauk and Sholinghur shou
be so low.—

That the proposed Nunjah
rates for the Villages in the Vellore Talook wer
high and that inequalities were strikingly appar
between the rates in the Villages transferred to Ar
Arcot from Chingleput, and also those of the late Ar
Jaghire.—

That similar remarks were
applicable to the Poonjah rates.—

That on the whole the Collector has
apparently reduced too much on the low class lands
and not enough on the high the maximum rates for
both Nunjah and Poonjah approved by Government
having been too extensively applied.—

That the proposed rates descended
very low which required correction and that the benefit
of the reduction should be enjoyed by the Ambomahs
Villages and Manmundoor Pollium equally with the
other parts of the District.—

That the Villages transferred from Chingle

were not entitled to reduction except where the
existing rate was found too high.—

That the proposed rates for Manavary
were too high which according to a fundamental rule
should be brought strictly within the Poonjah standard
as Manavary is in fact Poonjah.—

That with reference to the very low
point to which the new rates descended both in
Nunjah and Poonjah, a remedy might be applied by
lessening the gradation of the rates towards the bottom
of the scale, thus in Nunjah; the rates below
4 Rupees should descend by gradations of a
quarter Rupee; under two Rupees of two Annas
and under one Rupee of one Anna, and in Poonjah
the gradations might be 2 Annas under 2 Rupees
and One Anna under 1 Rupee.

Lastly that Nunjah, with very low rates
might perhaps be transferred to Poonjah as these
low rates do not pay for the cost of a supply
of water and the land is probably so situated
as

as not now to possess Government irrigation. —

3 With his modified scheme, now to be considered, the Collector repeats the fundamental principle on which the revision is based, there are chiefly two, viz. the application of one scale of rates to the whole of the Taloks North of the Palar, the adaptation of the scale or otherwise to those South of that River to be divided on hereafter, and the adoption of the present classification of the lands as represented by the existing rates of assessment. Mr Whittingham notices premonitorily the variations in the average rate per acre between Taluk and Taluk, to which both Government and the Board adverted in the former Consideration of the subject and points out that such must exist owing to the varying quantities of high and low class lands in the different Taloks and to the varying proportions of one and two crop lands. As respects errors in the original rates, these it is stated were recommended as means of adjusting the rates to the power of the land and its extrinsic circumstances were not immediately at hand, and to have attempted them

an adjustment would have put off the introduction of the reduced assessment longer than was desirable The verification of the new rates in communication with the Ryots themselves might have been effected perhaps without much delay, but the Board do not wish to attach importance to such a test on the present occasion as the existing rates though not free from error have been pronounced to be sufficiently true on the whole to form a basis of revision. —

4 In the former scheme the Government thought that the Maximum Rates for both Punjah and Poonjah had been too extensively applied, while on the other hand the lower rates had been unnecessarily reduced. In the present plan these errors have been corrected, but as regards the Poonjah Assessment at the low rates of from Rupees 12 3 to Rupees 9 6 some abatement has been made the Waste in these classes is very large and was thought that much of it must arise from a burdensome demand. In the Punjah lands all Assessment below

below Rupees 4—6—8 per Cawny has been merely brought to the nearest proposed rates but as the next lowest rate has been taken Some reduction ensues

5 The application of the new rates in the different Villages reported on has been carried out in the following manner.—

They are applied on an uniform principle in the 8 Northern Talooks and in the Villages transferred from the Cauvery South Talooks to that of Arcot.—

In the 3 Villages of the Vellore Taluk which did not participate in the general remission of 12½ per Cent given some years ago reduction of 12½ per cent has been made in the first place, and the remaining amount has been afterwards revised in the same way as in the 8 Northern Talooks.—

Para 23

In the Villages transferred from Chingleput no reduction has been given the existing rates being simply brought to the nearest revised rates.—

Para 20

The Villages of the late zemindari Sughire

Sughire and of the Mannindoor Pollium have received an adjustment suited to the character of their present assessment as this in reference to the quality of the land was moderate compared with the old rates in other parts of the District, though higher than that now in other parts of the District, though higher than that now approved each rate in these Villages has been brought not to the equivalent proposed rate in the Northern Talooks but to that next highest in the scale, Thus Punjah land assessed at from Rupees 10—8 to Rupees 10—1 per Cawny instead of being reduced to Rupees 7—8 as elsewhere has been assessed at the gradation above it, Viz Rupees 8. The Poonjah rates have been settled in a similar manner.—

All Monavary land being strictly Poonjah as observed by Government has been assessed at Poonjahs rates, the highest not exceeding Rupees 4 per Cawny.—

6 In the rates themselves there is some change in the gradations in the lower part of the scale for Punjah but the rates are increased in number from 20 of the former scheme to 35 in the present. For the Poonjah lands the increase is from 19 to 37 and the gradations differ throughout, Rupees 6 and Rupees 5 being still retained

returned as the maximum rates, but applied only to Garden lands irrigated by wells. The following Table exhibits the rates of the former and present schemes in comparison.—

7

General result

The general result of the revised rates under consideration is a diminution of Rupees 128003 on Poonjah on the original assessment or about 6¾ per Cent. On Runjah the reduction on the Original assessment amounts to Rupees 25,554 or 2½ per Cent. The Collector has shewn the financial result of his former and present Schemes in comparison, but it is seen that there is a difference of Rupees 24,668 in favor of the present one, of which Rupees 6920 appertains to Poonjah and Rupees 17748 to

Runjah. viewed in a general way the former Scheme allowed a larger reduction on waste both Poonjah and Runjah, also on Runjah Cultivation.

8. The foregoing particulars are brought together in one view in the following Statement

Passing

8 Northern Talooks and 4 Villages transferred to Arcot

Poonjah lands

9 Passing to details it will be seen that the Poonjah lands cultivated and waste in the Northern Talooks and in the transferred villages will receive a reduction of 19½ per cent according to the present Scheme. The entire relief proposed for the Poonjah lands of the whole district was 25 per Cent so that a considerable margin is left to cover the wants of the superior Soils in the Northern Talooks which are to a greater extent pun Cultivated. The waste on waste in the villages immediately under consideration is 18½ per cent and that on Cultivation is about 21 per Cent, giving an average of 19½ per Cent on the whole Poonjah Area as above stated. The Talooks of Chittoor Chendragherry Trivellum and Sautgherry

From Collector 23d Oct/54 para 156 In Cons 11th January 1855

	Cultivation of Fasly 1262 per centage of reduction			Waste of 1262 per centage of reduction			Total per centage of reduction		
	R	A	P	R	A	P	R	A	P
Chittoor	20	14	7	17	5	"	19	3	2
Chendragherry	24	6	1	18	11	5	19	13	11
Trivellum	24	10	3	22	2	11	23	3	6
Sautgherry	20	5	"	19	8	4	19	14	4

where the old rates were highest participated more largely in the reduction than the other Talooks, notwithstanding this the Talook average per Cawny is still high, and higher than the average according to the former scheme, except in Sautgherry where it has been reduced from Rupees 2-7-8 to

the former scheme to Rupees 1-15-10 in the present. Trivellum which was particularly noticed by Government (para 6) as having an excessive rate at Rupees 2-0-2 as proposed at first bears according to the present revised Scheme an averages rate of Rupees 2-3-8. These averages are formed on the entire Ayacut, but rose if the extent under cultivation alone is considered. The averages on the Cultivation according to the old rates and those now proposed with the percentage of reduction which each Talook is to receive are brought to view in the following table drawn from Statement the 15th received with the latter from the Collector under Consideration.—

	Old rates			Proposed rates			Per Centages of reduction			Per Centage of Cultivation to Ayacut		
	Rs	A	P	Rs	A	P	Rs	A	P	Rs	A	P

Viewed

10 Viewed with reference to the averages as above shewn the Assessment appears too high in Chandragherry Trivelum and Santyhur, but Talook averages vary according to the proportion of high and low lands which enter into the calculation. The Collector has pointed out this and submits a Statement No 18 in illustration from which it will be seen that the extent of land bearing the higher rates of Assessment is greater in the three localities abovementioned than in the others Talooks. The tabular view of the Talook rates and percentages of reduction shewn in the preceding para, apportions it will be observed to the three Talooks in question a larger share of the general reduction than has been given in the other Talooks; indeed in both Trivellum and Chendragherry receive each nearly 25 per Cent the limit within which the reduction on the entire Poonjah Area of the District is to be kept

11 Statement No 16 prepared according to form B received from Government exhibits the amount of the former and proposed

proposed assessments under each new rate. The main object of the revision of assessment that of reducing the standard of demand generally, particularly in its relation to the rich soils of the District, seems from this document to have been attained and adverting to the explanation afforded generally of the details of the operation with the causes which influence the averages between Talook and Talook the Board are of opinion that the Collector has on the whole fulfilled, in the case of the Poonjah lands of the Northern Talooks and transferred villages what was required of him. Looking at the large quantity of waste where the reductions fall below 20 per cent it might at first sight appear that the relief given in these lands is insufficient to promote

Statement No 2	No of old rates	No of new rate	Fusly 1262 Cultivation	Waste

Grand Total			104225	193189

promote extension of cultivation but the Board do not incline to this view. They observe that the extent of land where the reduction is within 20 per Cent, is very considerable compared with that in the classes above it that such lands are already extensively and profitably occupied and that as a general rule it is not desirable that inferior soils should be cultivated so long as lands yielding a higher produce are to be had. They entertain no doubt that capital will readily flow to the waste under consideration at the revised rates when a larger production is called for. The only case in which the expressed intentions of revisions of assessment generally have not been fulfilled is perhaps the retention of specific rates for garden land irrigated by Wells. The Rates are Rupees 6 and Rupees 4 .. 8 The substitution of the highest Poonjah rate of Rupees 4 for those rates would appear to be in unison with the recommendation of the late Collector, but the proposed rate

Statement 7th 185-

From Collr 23d Octr 1st para 6 to 12

rates have been introduced by the present Collector in connection with the remarks of Government in para 10 of Extract from Minutes Consultation 23d April 1855 No 460

12 The particulars of the arrangement in the other Poonjah lands brought under revision do not call for notice The general result is shewn in the following abstract-

Nunjah lands

13 In the Nunjah lands the reductions Amount to Rupees 2,55,553 or 25 1/2 per cent on the old Assessment, but Rupees 1623 20 only is Revenue given

given up. The extent of relief is proportioned to the exegencies of the several Talooks In Chandragherry it is nearly 37 per cent. In Chittoor 33½ and rather above 30 in Trivillum and Sautghur. In the other Northern Talooks the reduction ranges between 13 and 21 per Cent. The 3 Villages of the Vellore Talook are allowed in the first instance a remission of 12½ per Cent to bring them to the standard of other assessment which has already received that remission after which the rates are adjusted in the same way as such assessment. In the Sutteraid Talook no relaxation of the present demand is given beyond bringing the present classes to the nearest new rates. A similar remark applies to the villages transferred from Chingleput. In the Manoendoor Tallom the reduction is 13½ per Cent. It is about the same in the villages of the late Arcot cession but varies with the Talooks in which they are situated.

16 The new Punjah rates range from

from Rupees 10 to 11 Annas but the old rates below Rupees 4 Annas 6 are simply brought to the nearest below them on the scale. It does not appear with reference to the remarks of Government on the subject that any of these lands have been transferred to the Poonjah class to do this local inquiry and inspection of the lands will the Board presume be necessary. The arrangement is desirable and the attention of the Collector will be called to it again.

15 Referring to Statement No. 3. it will be seen that certain Well Punjah has received no further indulgence than is accorded to Punjah lands generally. The escent is 1749 Cawnies cultivated and 6068 Cawnies waste. It is not explained why the proportion of waste is so large or indeed why any land of this description should be abandoned if the Wells are in good order or can be easily repaired. It is very probable that the old rates of assessment which go as high as Rupees 16-13-8 per Cawny cause this

this relinquishment of land and. should this be the case it will perhaps be found that the substitution of the new Punjah rates will not meet the out Private outlay has been incurred in the construction of these Wells and there must be an Annual charge for working them besides an expence in repairs. The profit in some cases may be enough to maintain the cultivation but as a general rule the Government are aware that lands with well irrigation cannot be profitably retained except at moderate rates of assessment under these circumstances the Board beg to suggest for consideration whether it would not be better to reduce all well Punjah under notice to Punjah rates like Well Tolacal. In this suggestion the Board assume the well Punjah to be strictly such, and not Punjah irrigated partly by wells and partly by Government works.

To Govt 20th Jany 1857
Rt. Do 21st Octo 1852
wo Cons 27th Sept
No 1046.—

16 The Statements received from the Collector with his letter of the 23d October last include the Assessment for both crops and are of little use in that form but in a subsequent letter from that Officer 22d November 1856 No 273 the account is drawn up for a single crop the difference between the two sets of Statements is as follows

	As per Statement accompanying the Collr's Letter of 23d Octr last		As per Statement accompanying the Collr's Letter 22d November		Difference between Columns 3 & 4	Difference between Columns 6 & 7		
	Land.	Existing Assessment	Proposed Assessment	Land	Existing Assessment	Proposed Assessment		
1	2	3	4	5	6	7	8	9

18 As verification in communication with the Ryots and actual inspection where necessary differ form a part of the plan of revision the Board think that the Collector has sufficiently performed the task assigned to him and would solicit the orders of Government for giving effect to the arrangements reported. In the Southern Talooks of North Arcot the rate of reduction at the Government observe will vary much more between

From Jt. 28th Ap. 53 Pt. 460 para 18

Madras Govt. Selections No 12

between Village and Village than in the Northern in consequence of the more unequal distribution of the burden of the Assessment and the Board do not think that the necessary adjustment of the several rates there can be made except on local enquiry

19 In conclusion — the Board would wish to call again the special attention of the Collector to the important remarks of Government regarding the best mode of assessing the second Punjah crop when it is grown and regarding Ryotwar holdings in which the interference of the public servants can be withdrawn altogether. These questions will be kept distinct from that of the revision of the Assessment the introduction of which should not be impeded by any enquiries which

From Govt. D. 29th paras 8 & 12

Fort St. George 7th January 183

which the Collector may find it necessary to make the subject. The Board trust when the Ryots really understand that a simple administration of Justice is desired such as is calculated to relieve them from the interference of the public Establishments they will not be backward in suggesting a plan by which the objects in view may be attained.

Bd No 1,153

From the Collector of Rajahmundry

Sir,

With reference to the Circular No. 1451 dated 13 May last received from your Office, I have the honor to submit a list of Hindoo and Mohamedan female prisoners in this District to whom the privilege of exemption from personal appearance for identification should I think be accorded.—

2. Of the female Prisoners receiving their stipends from this Treasury

Treasury there are 8 who have hitherto
enjoyed the privilege of exemption
from personal appearance for
identification Seven are entered
Now submitted in the list The eighth is a Brah-
=min female of 60 years of age
widow of an Assistant accountant
formerly in the Masulipatam
Collectors Office, and for whom
exemption from personal ap-
=pearance I see no sufficient
grounds, Note in the Statement
is usually examined by the
Amildar of the Rajahmundry
Talook Nos 2, 3 and 4 are
examined annually by Nos 1
the identity of the females from
5 to 7 is certified by certain
of

of the Cutchery servants who visit and
examine them.

3. No 8 in the Statement is the
party whose own allowance as well as
that portion enjoyed by her sister Gourin
Nissa begum which reverted to her under
the sanction of Government dated
5th January 1855 remains undrawn the
former from 12 July 1849 and the latter
from the date of sanction in consequence
of her declining to appear to establish
her identity or to allow a descriptive roll
to be taken. Her Uncle a man of respectabi-
lity, and the holder of a Moccasa Village,
in this district offers to be responsible
that the present claimant is in truth
Dildar Begum. Two females both drawing
pensions also certify to the same effect,
and I have no doubt of the identity of the party.
Under these circumstances I beg to recommend
that I may receive authority to disburse the
allowance.

Rajahmundry District
Collectors Office
Cocanada 4th October 1856.

N° 224.

To J. D. Sim Esquire

Acting Secretary to the

Board of Revenue

Fort St George.

236

Bd N° 1229

From the Coll.r of North Arcot

Forwards a Statement of land taken up in the Cullum Poliem for the construction of the Western Trunk road N° 11 and requests to obtain sanction for paying the tenwah of the lands as compensation to the Poligar for fusly 1266 and for deducting the same from the peishcush payable by him from fusly 1266.

Sir.

Para 1. I have the honor to forward a Statement shewing the extent of Sirvaram and Inam land, taken up in the Cullum Poliem in this District for the construction of the Western Trunk road N° 11 for which the Poligar requests that compensation may be awarded him. He also requests that the tenwah of the land may be deducted from the Peishcush payable by him from the current fusly.

2 From the above statement it would appear that 36 5/16 cawnies of cultivated and waste Poonjah land assessed at Rupees 78-9-9- have been appropriated for the road in question in the said Poliem. This land was taken up in fusly 1264 immediately after the crop on the ground had been cut, and compensation therefore can be claimed only for fusly 1265.

In

In this instance there was an old road which the Poligar could take possession of in lieu of the land required for the new road.

3 I have the honor accordingly to request that sanction may be given for paying the abonement mentioned of Rupees 78-9-9 as compensation to the Poligar for fusly 1265 and for deducting that sum from the Peishcush payable by him from the Curreut Fusly 1266

4 The Poligar will be directed to the Inamdars, whose lands have been taken up other lands in lieu.

North Arcot

Collector

Order thereon.

Ordered that the following letter be sent in reply.

(236-37)

To, The Collector of North arcot.

Br. No. 77
To the Collr of North arcot } Sir.

I am directed by the Board of Revenue to return the Statement accompanying your letter dated 16th [illegible]

and to request that you will furnish a revised Return, prepared in conformity with the instructions contained in Extract Minutes of Consultation dated 27th August 1855, Copy of which was forwarded for your information with the Board's Proceedings of 15th December last No 1,239.

2 You will be so good as to return the Statement herein enclosed with your reply to this communication.

3 The Board wish to know what portion of the land is held, as Inam and for what purpose. You will also state whether this portion was excluded from the assets of the Estate and specially reserved as Inam and give the amount of Quit rent if any be paid to the proprietor.

No 233.

To J. D. Sim Esqre
Acting Secretary to the
Board of Revenue
Fort St George.

(238)

Br. No 2370 Sir.
From the Collr of North Arcot } 1- With reference to the Endorsement on the accompanying Petition

Petition No 2205 of 1856 I have the honor to forward for the information of the Board of Revenue Copy of a Communication received with a Statement showing the particulars of the Shanay examination in the Outward Talook in Fasly 1265 in the Villages in which Petitioners reside.

2 The principle on which the remission for Shanay is now granted in this District is laid down in para 5 of Extract from the Proceedings of the Board of Revenue dated 3d May 1855 received in reply to a letter from me on the subject dated 10th April 1855.

3 When I first joined this District I found that usually no report of failure of crops was sent from the Talooks at the time of its occurance but that the fact of the Crops had

withered was entered in the account kept by the persons who made the Aymaish of the cultivation of the Villages often long after all traces of Cultivation had disappeared from the ground.

I therefore introduced the practice prevailing in Tinnevelly and directed that the occurrence of failure of Crops should be at once reported to the Tahsildar by the Village Officers and that the Crops should be immediately examined, and the result reported to me in a Statement exhibiting dates of information by Village Officers, and of examination by Talook Servants, and as I found that the Aymaish had very often been left to inferior Servants I directed that the examination of failure Crops should always be made by the

Fort St George 7th January 1857

the Talukdar or the Servistadar or Peish-
-car. In the event of a very extensive
failure of Crops this rule would
of course be relaxed.

4 The Statement now sub-
-mitted has been drawn up by the Acting
Additional Sub Collector who is
now in charge of the Outward
Talook from the above mentioned
returns. Fines were inflicted for
delaying to examine withered crops
after the Village peons had been
recalled, and every means taken
to enforce the early, and efficient
performance of this important duty.

5 In the Samil petition
presented to and endorsed by the
Acting additional Sub Collector
which accompanied the endorse-
-ment of the Board under reply
the Petitioners admit that there
was no delay on the part of the
Village Officers in reporting

Fort St George 7th January 1857

to the Talook authorities the oc-
-currence of withered Crops.

-tember 1856 forwarding an Endorse-
-ment from the Board of Revenue
on Petition No 2205 of 1856 regard-
-ing the non remissions for Shavy
in the Outward Talook, I have the honor
to enclose, a Statement shewing the
dates, on which the Officers
of the Villages in question com-
-municated to the Tahsildars
that portions of the Crops had
withered, and the dates on which
the examinations of the several
Villages took place orders were

+ 4 Enclosures herewith returned

passed

Ordered that the 3 Head Revenue Servants in the Taluk namely the Tahsildar Sheristadar and Peishkar should alone make Examinations of this Kind; so that as the applications throughout the Taluk were numerous, and the different Villages for a part some delay must necessarily have taken place in visiting each locality.

2 The principle upon which the remissions for Shrawy is granted in this District is framed in accordance with the rules laid down in Para 5 of Extract of Proceedings from Board of Revenue dated 3d May 1855. No claims to Shrawy remission are allowed to be entertained unless the Teerwah of the Crops without exceeds ten per Cent of the Ryotwar Puttah Beriz i.e the actual amount that he has to pay to Government

including the Teerwah of the land for which he urges remission should the assessment on the dried crop exceed the fixed Standard the gain to the Ryot arising from high prices is taken into account and a Scale is formed shewing how much the selling prices of the year have enabled the Ryot to realize above the original Commutation rates of the District.

3 At the Jummabundy Settlement of Outwards ascertained and fixed the profit to the Ryot for the year in question at 20 per Cent per Garce over the Commutation price and to this agreeably to the existing practice was added the ten per Cent limit previously mentioned therefore if the amount of loss sustained by the Ryot did not exceed 30 per Cent

Fort St George 7th January 1857

Cent of his Puttah Berij he obtained no remission.

4 The above practice similarly prevails throughout the District but the rate of gain over the Commutation price will be found to vary more or less in each Talook. I may mention that after fixing the Standard for the Outward Talook at 30 per Cent for last fusly as above shewn the remissions under the head of Shavy amounted to Rupees 31,68-8-6 the cultivation of the Talook being inclusive of the above Rupees 51,925.—

Fort St. George

240
Bd. No. 4733
From the Collector of North Arcot

Sir I have the honor with reference to endorsement of the Board of Revenue dated 15th Instant on Petition No. 321 of 1855 to explain that the unassessed land was also given for Cultivation and that it will as usual be assessed when Cultivated according to the rates of the nearest assessed land.

In the event of Ramasawmy Moodely failing to cultivate the Poramboke land the Durkhast will be cancelled.

Before I accepted the durkhast of the person named the Tahsildar of the Taluk was called upon in the usual manner to report on the Capability of the durkhastdar to take up so much land and he reported that the durkhastdar and his people had among them 46 ploughs and professed means of Cultivating the whole extent of land applied

applied for.

North Arcot

Collector

Bd Nº 64
Proceedings thereon

240-41

The Collector states that the unassessed land was given for Cultivation and that it will as usual be assessed when cultivated accordingly to the rates of the nearest assessed land; and that in the event of Ramasawmy Moodelly failing to Cultivate the Porumbokke land the Durkhast will be cancelled.

The Board do not clearly comprehend from this explanation, on what terms the land in question is held — they infer that Ramsawmy Moodelly has received a cowle. If such is the case the Collector will be so good as to forward a translation — If not he is requested to describe more particularly the conditions on which the unassessed land has been made over to the Durkhastdar and the length of time he will be allowed to retain it uncultivated without payment.

Bd. No. 105

From the Collector of Bellary

Sir

I have the honor to submit a tabular report in the prescribed form of a lapsed Enam of that part of the Hayem Jodee Village Mullekarjoonahall, in the Goodlem Talook which was held by Syed Casim who died on the 11th June 1835.

2 The deceased Syed casim was a shareholder with Abootharauj whose death I reported on in my 1st Quarterly statement of the present year bearing date the 5th June last and in the same report the name of the deceased Syed casim is also mentioned. The Government in the concluding part of para 3 of the Minutes Consultation under date the 8th August last have observed that this share of the grant will be considered on the occurrence of a lapse.

3 The nature, terms &c. of the grant have been fully reported to the Board on the former occasion and I need not again enter into any details on that point. The same summuds which were produced

Fort St. George 7th January 1837

produced in support of the other share of the grant stand for this also.

4 The deceased left no issue but he has left a widow Chansaheb and a Mother Hazarath bee bee. the Government were pleased on the former lapse to obtain the sanction of Government of India for the grant of an allowance of 25 Rupees per Mensem or 300 Rupees per annum in lieu of the land which was resumed to Syed Kadaree son of late Abootharauj above referred to. The two surviving widows above referred to pray that the land itself may be allowed to continue in their enjoyment but there does not appear any thing to render their case different from that of Abootharaboo, and I therefore beg to submit that the land (as in the former case) be resumed and that a similar allowance of Rupees 300 per annum (Rs 25 per Month) be granted in lieu thereof to the widow of the deceased for life for the support of herself and her mother in law.

5

confined to the Hills. However there are extensive tracts of sandy soils bordering on the Sea covered by Thorn bushes useful only for fuel.

3. These Thorn Bushes grow spontaneously to a great extent on the sandy tracts chiefly bordering on the Sea in the limits of Pumchamahl Vellyoor, Oottapedarum and Streeveycoontum Talooks and are enclosed and preserved by their owners for the Space of 6 or 7 years or until they are rendered fit for cutting for firewood. During the course of these years the proprietors of the trees continue to pay to Government every year the Jarum assessment on the land occupied by these trees.

4 At every 6th or 7th year the Thorn Jungles are cut for fuel and the roots burnt the falling leaves and decaying vegetation together with the manure by

by the flocks of sheep and goats yearly frequenting them forms a top dressing or artificial soil which will yield a grain crop for 1 or 2 years when the upper soil being exhausted the land reverts to Thorn Jungle whether this description of land is occupied by Thorn Jungles or taken up for dry cultivation the assessment thereon is the same.

5 The regular forests or Government Jungles are as alluded to in the Second para confined to the Hills forming the western boundary of this district with Travancore.

6. Up to September 1854 when the Hills farms of the District were ordered to be discontinued, the Hill renters were allowed by the terms Puttah granted to them to permit on their own authority, the felling trees other than "Coolu marams" or valuable trees for stakes laths Vourees or Jungle wood rafters

Fort St.a George 7.th January 1857

rafters, door frames, pillars, Vaughy wood exclusively made use of for making carts. firewood taken on Carts and Bamboos. The Ryots also were allowed to cut and bring wood other than "Coolu Marums" for agricultural implements and burdles of firewood to the amount of a mans load at a time without previously obtaining the permission of either the Talook authorities or the Renter. But both the renter and the Ryots were strictly forbidden from cutting any trees either belonging to the valuable or the other class for timber intended for building purposes since the abolition of the Hill rents the privilege of cutting (free of any fee or duty) from trees other than "Coolu marums" materials such as that above refferred to without previously obtaining the permission of the authorities has been extended to all the people.

Fort St.a George 7.th January 1857

7. A Statement shewing the description of the forest trees and the duty (or rather the price of the timber Government being the proprietor of the woods) leviable thereon per cubic yard distinguishing "Coolu marums" or valuable trees from the other class is herewith sent.

8. When Ryots or others require timber either for traffic or for their own use they in conformity with the instructions contained in a proclamation issued by a late Collector Mr.r Thomas under date the 10.th July 1848, of which a translation was forwarded to the Board with my Predecessor Mr.r Birds' letter of 16.th August 1849 prefer to the Collector Durkhasts containing the following particulars Viz.t The description and quantity of timber required

Fort St. George 7th January 1857

required the purpose for which it is wanted the name of the place and Hill where the Durkastdar proposes to fell the trees and the route through which he intends conveying the same Viz. Viz.

9. Upon these Durkhasts orders are sent to the several Tahsildars of the Talooks in which the Hills specified in the Durkasts are severally situated to collect at once the duty or rather the price of the quantity of timber which varrious from Rupees two to one eighth of a Rupee per cubic yard according to the description of timber required and to allow the Durkhastdar to fell the trees and bring them down within a specified time which is determined with reference to the quantity wanted. For further particulars of the rules under which the felling of timber in the Government Forests is now carried on, I beg to refer to the Proclamation transmitted to the Board as abovementioned The

Fort St. George 7th January 1857

10. The Rules and Regulations contained in the Proclamation under notice as regards the felling of timber and the duty leviable thereon appear in my opinion to be sufficient for all purposes of of preventing wanton destruction of timber trees and of securing to the state a suitable revenue from the forest lands.

11 The practice now prevalent as to trees on tank and channel banks and trees growing wild in unoccupied and waste lands in Villages with the necessary arrangement for preserving them will be reported upon separately when replying to the Marginal remarks of the Board on Paras 22 & 23 of Extract from Minutes of Consultation of 31st May 1855 subjoined to Proceedings of the Board of Revenue dated the 29th October following.-

Brd No. 5141.
From the Collr of Tinnevelly

Offering explanation for his protracted stay at Trichendoor—

Sir,

I have the honor to acknowledge Extract from the Proceedings of the Board of Revenue under date the 2d Instant, and in reply to state, that I was at Trichindoor in the Punjamaul Talook for twenty days in the Month of March, having been during the rest of that month partly at Tinnevelly and on Circuit in the Shreevygoonteum, and Pota-
-padasum Talooks.-

I had just before been on Circuit in the Southern Talooks Nanguonary and Vullyoor and desired to see the Eastern Talooks of the District.

2 In the beginning of April I was at Tri-
-nevelly, and from 10th April to 17th May at Tri-
-chendoor in the Punjamaul Talook, when the settlement of that Talook the first that was made was completed.-

3 The actual distribution of the Puttahs only occupied a few days but the Board will have seen from the reports I have made on various petitions addressed to them, by parties in that Talook, appealing against my carrying out the orders of the Board and Government.

in

in the modifications of the tree tax, the difficulties I had to contend with in the settlement of Punjaunaul.

4. From the time I proceeded to the Punjaunaul Talook in April till I left it on completion of the Jumma bundy a period of 38 days, the Talookdar of the Talook was in constant communication either with myself personally or with the Shanistadar's Cutcherry regarding the measures to be adopted in carrying out the orders of Government on the modification of the tree Tax.

5. Palmirahs are more numerous in the Punjaunaul Talook than in any other Talook of the District. A very large revenue depends on the consideration of what trees were to be exempted, and what were to be considered still liable to taxation, raised numerous questions, often difficult to be decided, and which fact was abundantly borne out, when the Ryots were finally assembled. My stay of 38 days enabled me to instruct the Talookdar on many of these questions, and to explain personally the orders of Government to the Ryots, and had I been at a distance I have no doubt I should have found the settlement present more difficulties than it did, some notice of this should have been entered in the Column of Remarks appended to the statement of Exctra Sentage; but it appears to have been omitted through oversight.

I have &c.

No 244.

To

C. Whittingham Esquire

Collector of North Arcot

Sir,

In reply to your letter No 62 dated November 26th 1856. I have the honor to inform that Ramasett and 4 others of the Villages of Mottallum in Sautghur were fined 40 Rupees for the concealment of cultivation under the provisions of Regulations IX of 1822

2. Peroomaul Goundan Monegar of Malyampet in the Trivellum Taluk was suspended by me at the distributing of the Puttahs for fusly 1265 in consequence of his not bring in the first place present at the same - kundy 2nd for having been absent from the Village without leave for 2 months, and more up to that period, and 3rd that he evidently was not a proper character to be retained as a Monegar, as a warrant from the Civil Courts had been issued against him, and which was clearly the cause of his leaving his Village without permission as he did - The period of suspension was not mentioned in the Yadast as his reappearance at his Village seemed to doubtful -

Order thereon —

Ordered to be recorded

Fort St. George, 8th January 1857

No 301.

To,

J. D. Sim Esqre

Actng Secretary to the
Board of Revenue
Fort St. George.

Sir,

280

B.d No 3130

From the Collector of North Arcot

Paral.

As it will be quite impossible to introduce the revised rates into the Southern Talooks during the current fusly, I consider it proper to bring this fact thus early to the notice of the Board, and to lay before them generally the causes which must retard their introduction.

The Board are aware that although the survey of Mr. Nisbett superseded in fusly 1264, the old Mamool Measurements, his rates were not introduced, and the Collections are still made at the old Mamool rates. In calculating therefore the amount of reduction that will follow on the introduction of the new rates, it will be necessary to take the old rates as the standard of Comparison,

but

From Sir George, 8th January 1857

but at the same time as Mr. Nisbett's classification alone distinguishes 1 from 2 Crop land, it will also be necessary to ascertain, what extent of land in each class he has so classified.

3 For instance in the Village of Vuyyoor in the Arcot Taloko the old or Manool assessment of the 19½ Cawnies of the 3rd Class is Rs. 12. 12. 9 per Cawny. This is the rate now paid. Of these 19½ Cawnies Mr. Nisbett classified 1½ Cawny as 2 Crop first class land; assessing it at 11 Rupees per Cawny for the first crop, and at Rs. 10½ for the second crop, making a total of 21½ Rupees per Cawny. 13¼ (Smaller fractions are omitted) Cawnies, Mr. Nisbett entered as 2 Crop, 2nd class, at 12 Rupees per Cawny for first crop, and 9 " " for second crop making a total of 21 Rupees per Cawny. 5 Cawnies Mr. Nisbett classed as 2 crop 3rd class, with a tax of 11 Rupees for the first crop and 7. 8. for the second.

The remaining 10¾ Cawnies were classed as 1 Crop, third class, at 10 Rupees per Cawny

From Sir George, 8th January 1857

4 In adopting the classification of Mr. Nisbett of the above 19½ Cawnies for the new rates it will be necessary to ascertain how the old rate will be affected by it in order to obtain the financial results of the reduction in that case; and in order to ascertain its effects on each present rate in each Village, for each Village has its own rates it will be necessary to prepare Statements similar to the one now submitted for each Village in each of the Southern Talooks.

5 In order to facilitate their preparation I propose early in the next Month to visit these Talooks, and to reside in them for some period. But the preparation of these accounts must be the work of time, and when they are completed the principle upon which the revision in that part of the District is to be conducted will have to be considered.

North Arcot
Collector's Cutcherry,
Chittoor
11th December 1856.

Order

S.G.B.

569 Fort St. George 8th January 1857.

B. No. 68.

Order thereon (280-81)

Ordered to be submitted for the information of the Right Honorable the Governor in Council.

Pro: to Govt. 7th January 1857 Para 18

Enc from Pro 1st December 1856 No. 4034

2. The Board have already expressed an opinion that local enquiry would be necessary in carrying out the revision of the assessment in the southern Talooks and as in the case of South Arcot they are disposed to think that the work will be more effectually performed, if made the inclusive occupation of one of the Sub Collectors than if undertaken by the Collector who however assisted cannot divest himself of heavy duties connected with English correspondence, accounts, appeals, and the general superintendence of the District. If his Lordship in Council should concur in this opinion he may think proper to direct the adoption of the same arrangement in this District and in this case Mr. Whittingham will

will relieve the Sub Collector select-
ed, of all Revenue and Police charges
and furnish him with general instruc-
tions for his guidance. The general
Reports of the revising Officer should
be full and complete but made to
the Collector who will submit them
with his own observations. The Collector
should also be kept informed from
time to time of the methods pursued
in the operation and exercise of a
General control
3.
in regard to them.

As the matter is one of the
highest importance to the District the
Board are of opinion that the revising
Officer should have the assistance of the
Head Sheristadar the ordinary duties
of the duftar being left to the Superint-
endence of the Sub.

Resolution thereon.

In Cons 31st July 1856.

(282-85)

Fort St. George 8th January 1857.

Read again letter from the Military Board dated 3d October 1856 stating that Buff Leather Belts cannot be supplied for Peons of the Malabar District.

Resolved that the letter above recorded be submitted for the orders of the Right Honorable the Governor in Council with reference to Extract Minutes Consultation dated 28th July 1856 No. 2412 and the Board's remarks on the Indent dated 22d August 1856.

2. Under the circumstances stated by the acting Collector the Board recommend that he may be authorized to purchase from the Arsenal at Bombay 550 Buff Leather Bayonet Belts at a cost of Rupees 74-7-8 or annas 2-2 each for the Police Peons of his district. if on inspection of the Musters applied for, they are considered to the purpose required. if not that he may be permitted to purchase the Material and have the Belts made up in the district. In case it be found necessary to adopt the latter recommending the acting Collector will be requested to submit an Estimate of the probable cost of the Belts for the sanction of Government.

No. 212.

To J. D. Sim Esqre
Acting Secretary to the
Board of Revenue

Sir

In reply to the Extract from the Proceedings of the Board of Revenue dated 4th Instant No. 4092 I beg to enclose a letter from Mr. W. J. McIvor to whom I referred to learn if he could fully and conscientiously discharge this Extra duty if devolved upon him.

On

(286)

B. No. 5323

From the Collector of Coimbatore

Forwards Mr. W. McIvor's letter and recommends that he may be appointed as Forest Superviser on a salary of 100 Rupees a month.

Fort St. George 8th January 1857.

2 On mature consideration of the subject I consider the object so important and Mr. McIvor's practical knowledge so valuable that I think his services would be the best procurable and from some years observation and knowledge of Mr. McIvor's character and active habits I feel considerable confidence that he would not undertake it unless he could fully and conscientiously discharge the duty.

3. I would therefore strongly recommend that Mr. McIvor should be nominated superviser of the Neilgherry Forests attached to my office on any Salary Government may deem fit. but as he must keep an Extra horse or Poney I should say not less than 100 Rupees will suffice.

4. I would also recommend one more Forest Serjeant with 6 Peons should be entertained on some pay as the one now sanctioned both to be under

For Ft St. George 8th January 1857.

under Mr Mc Ivor's orders.

5.

Mr Mc Ivor's practical knowledge will avail not only to preserve the still remaining Forests (greatly reduced) but to plant and renew them where practicable, to best advantage.

6.

In reply to para 3 of the Board's Proceedings no tax or license is given to wood cutters they are restricted to certain woods at a distance from the station but with the present limited means of Surveillance, and the great demand for fuel in every house it is impossible to prevent sad depredation on every wood near the stations.

7

I proposed a slight tax in my letter of 18th February 1850. No 15 but it was not then approved of. I would again recommend it. It would of course fall eventually on the consumers who can afford to pay it, and the easiest mode of collection would be perhaps a light payment (say one Rupee per month) for the right to

Para 5 & 6 to the Board 27th May 1856

For Ft St. George 8th January 1857.

to cut in the allotted Government Forest or 1/4 Rupee per bandy load 1/2 anna per Cooly load. as before proposed the community will and must have fuel and the wood cutters evade all but the simplest rules.

Coimbatore, 18th December 1856.

No 1.

To E. B. Thomas Esqr Collector of Coimbatore.

Sir.

I have the honor to acknowledge the receipt of your letter of the 10th Instant, enclosing a copy of Para 1 and 2 of Extract from the Proceedings of the Board of Revenue dated 4th December 1856.

With reference to your enquiries I beg to state that I have not any farm or farms nor any interest or share in such or in their Manage-ment I however hold a little private property on these Hills, namely one dwelling House (at present occupied by

Fort St. George 8th January 1857.

by Dr. Lloyd / which I generally rent on long leases of from 2 to 4 years. consequently it requires but little attention.

If required to do so I believe that I could conscientiously perform the duty of Superintending the forests on the Neilgherries without in any way neglecting my present duties. This opinion is formed on the fact of my now having under me, in these Gardens a much more efficient establishment than I have hitherto had, the gardeners now understand how to perform many operations which heretofore I had to do with my own hands, and in this respect they are daily improving.

The object is one in which I take much interest, and I trust that I would be able to apply the local knowledge which I have obtained of the subject to some advantage.

B. No. 38.

From the Collector of Canara ... Reports on the points noticed by the Board's Proceedings of 9th Instant with reference to the Supply of Timber to the Bombay Dockyard.

Sir.

I have the honor to acknowledge the receipt of Extract from proceedings of the Board dated 9th Instant forwarding Extract Minutes of Consultation under date 28th November 1856.

2. The points to be reported on are the alleged defective working of the Forest in supplying the Bombay Dockyard the principles on which the value of Timber supplied to the Bombay Government is fixed and the propriety of consulting the Agent of that Government in settling the price of Timber received

received by him.

3. Mr. Smith objects to sound and rejected logs being brought out of the Forest together, and considers the practice conducive of much Extra labor and inconvenience and may be of deception but in what way he fails to tell us.—

4. On receipt of the letter to my address containing the above passage I asked for an explanation but only received a reply referring me to what had been already said. The Agents opinion is unsupported by argument and not borne out by facts.

5. When a man undertakes to bring out certain first class timber from any particular tract of Forest it is both advantageous to his own interests and those of Government if his people are allowed at the same time to remove butts and ends and other Timber that may have been left in the jungle exposed to annual fires and

and certain to be eventually destroyed if not brought out. This dry and comparatively light wood is not only very useful in rafting the heavier and more recently cut logs but also enables the people to work up the rafts securely.

6. I am not aware that frauds consequent on this system of clearing each Forest tract worked, year by year, have been detected, and I look upon the arrangement as a good one.—

7. Teak Timber is supplied to the Bombay Dockyard at the market rates, or at prices as near those rates as possible; The mode of ascertaining the market value of the Timber is by reference to the prices obtained at the periodical auctions held in this District. The value of Teak timber and indeed of timber of all kinds has risen greatly within the last few years and the Agent for the Bombay Government has, it must be remembered, the choice of all Timber brought down to the coast

and

and such as he selects having been set apart, the rest is sold by public auction

8. The prices charged in the account bearing my signature were fixed by my Forest Assistant on a consideration of the value of Timber at the time, as apparent from our own sales- Third class Timber, under 3 Candies per log, sold at auction at 20 Rupees per Candy. This rate only (it will be observed) is charged for picked wood of the same description the charges for superior timber being again arranged with reference to the prices obtained for the wood auctioned, compared with rates of former years.-

9. I beg to state below the prices charged to the Bombay Government during the last 3 years.-

	1263	1264	1265
	Rs	Rs	Rs
Logs above 6 Candies per Candy	"	26	30
Do 3 Do	Do	18	20 25
Do under 3 Do	Do	12	15 20

Those

Those of Fasly 1263 and 10 1264, were fixed by the late Mr Poulten and I am not aware that any objection has ever been made to consulting the present agent, whose absence in Malabar sufficiently accounts for his not having had any voice in the matter last year though at the same time the auction prices obtained on the spot afford the best data for fixing rates to be charged to Government.

11. There can be no object whatever in charging the Bombay Government more than the fair Market value of the Timber selected by their Agents and I will venture to assert that if the latter entered the Market really instead of nominally and bid for employed others to bid at the annual sales it would be found that higher prices than have ever yet been charged would be readily paid by private individuals and that the Government would only become purchasers

purchasers at rates considerably in advance of those objected to.

12. In a letter lately received from Mr. Smith the Bombay Timber Agent it is stated that most of the Teak Timber in Malabar is in the hands of a few Merchants "who are endeavouring to raise the prices to an unprecedented amount" and it is much more probable that the Canara sales may influence Malabar prices than that those charged for Timber delivered to the Agent here would be modified by the application of the Malabar rates as they stand at present.

Br. No. 54

From the Collector South Arcot

Brings to notice that one Madoovarayacharry and others are in the enjoyment of certain land in Triccallore Talook for which they pay an annual rent of Rupees 52-8- and requests authority to impose the modified assessment now in force

Sir

I have the honor to bring to the notice of the Board of Revenue that while carrying out the revision of the land assessment in the 10 Hooloos Talooks of this District, I have found that one Madoova Rayacharry and others are in the enjoyment

cawnies	annas				
of 39 Poonyah	10¼	of land as specified in the Margin assessment			
C	a	Rs.	a	p	situated in the Village of
15	3¾	28	5	5	
24	6½	170	13	6	Murrumpoondy in the
39	10¼	199	2	11	Trecollore Talook for

which they have been in the habit of only paying annually Rupees 52-8- as a fixed easy rent, the full assessment on the land according to the old rates being Rupees 199-2-11.

2 Having reason to belive that these parties have no just right to hold this land on such favorable terms, I called upon them to produce any grant or deeds they might possess to shew that they were entitled to it.

3 The Chief document produced

for

for this purpose was a Persian Cowl Namah purporting to have been given by the Nabob of the Carnatic in Fusly 1198 conferring upon one Madanna Chary the right to enjoy the lands in question for five years upon a favorable division of the produce from the Nunjah and on payment of an easy rent on the Poonjah at the same time declaring that after the five years were espired the usual proportion of the produce of the Nunjah and the full teerwah as settled by Royajee for the Poonjah was to be levied.

4 I beg to submit this document with a translation for the information of the Board and to observe that it appears to me that no just claim can be founded upon it to an exemption to pay the full assessment on the land alluded to.—

5 The present holders of it are the Grand Sons of the original grantee, to whom the land, as far as I can form an opinion, must have been given when waste on Cowl for the purpose of being cleared and brought under cultivation and not in the shape of a grant in perpetuity.—

6 The next document filed was original Taheed dated 12th April 1804 issued by Major

+ 1213 Major Macleod when Collector of the District directing the Tahsildar to continue upon that Fusly to collect only what had been up to that time paid by the holders of the land.

7 The third document produced was an original Pottah by Mr. French Assistant Collector, dated 12th July 1821 in which the rent to be paid for that Fusly (1231) is entered as Rupees 52-8-0 and in which it is stated that the full assessment was Rupees 202-10-8.

8 These are the three documents upon which the parties assert their claim to hold the land in question on an easy rent.—

9 I find upon referring to the Records of the Office that the same sum Viz. Rupees 52-8-0 was collected from the land from Fusly 1218 to 1230 thus bringing it down to the period of Mr. French's Pottah.—

10 The Pottah is however only for that particular Fusly Viz. 1231, and cannot therefore be regarded as confirming any previous grant.—

11 The Office copy of a Taheed has been also discovered dated 22d September 1821 by which it appears that Mr. Hyde when

when Collector of the District agreed to permit the people to hold the land on the easy rent. The original of this copy, which must have been addressed to the Tahseldar of Trecoloor can not however be found in the Records of that Taluk which have been searched for it—

12 From the wording of Major Macleods Cowle Namah already quoted it appears that the Persian Cowl Namah was fraudulently put forward as a Sunnud or Purwanah to induce the belief that the land in question had been given on grant to Madoonacharry.—

13 I have personally examined Madoona Ragacharry and Poornacharry, the two principal holders of the land, and I have also taken depositions from the Curnum, but have elicited nothing which affords grounds to conclude that the land was ever so really given as a permanent grant—

14 The land is of good quality and well supplied with water that it can easily afford to pay the Modified

	Jarum	Extent of land	Rate of Teermah	Amount of Assessment	
Nunjah	13	24 6½	5 11 "	138 13 "	Modified rates of assessment at present in force which would come to Rupees 161-4-3 upon the whole extent and under the circumstances of the case I beg to recommend that the Board of Revenue should give me authority to impose the modified assessment and to require the holders to take out the usual Pottahs.—
Poonjah	10	5 "	2 3 "	10 15 "	
	12	10 5¾	1 2 "	11 8 3

The total Land including both
Poonjah and Nunjah amounts to 39 — 10 — 3
and the Mooloofs Teervah for the same
is Rupees 202 — 10 — 8. The land in question has
been held on easy rent of 52 — 8 — ". As
the same amount of rent has been fixed
on the said land for the Current fusly
1231 you are to cultivate it accordingly and pay
the teervah to the Sircar according to the Kistbundy
obtaining receipts for the same and enjoying the produce
thereof.

No. 2

Abstract Translation of a Cowl Namah given by the Nabab Wallajah to Madowarayo Charry of Nanumpoody Village attached to the Jalook of arcot—

The Cowl namah which was passed in Fusly 1198 granting 25 cawnies of Nunjah and 15 Cawnies of Poonjah waste land in the said Village having been lost, this is given to confirm it the last one agreeably to the request of the Petitioner Jeermah should be paid to the Sirkar according to the terms provided in the said Cowlnamah. This Cowl namah should be considered as a Valid one

The following are the particulars of the above mentioned waste land as measured by a Pole of 24 feet long (each square being a Goontah and 100 Goontahs being a cawny) making altogether 25 Cawnies of Nunjah and 15 Cawnies of Poonjah—

The share of Jeermah due to Sircar per cawney from fusly 1198 down to Fusly 1202 should be paid exclusive of the Sadeemared &c. at the following rates viz.

Fort St. George 8th January 1857

Viz. for Nunjah land—

2	Cullums	for fusly	1198	Per Cawny		
3	Do.	for	Do. 1199	Do.	Do.	
4	Do.	for	Do. 1200	"	Do.	
5	Do.	for	Do. 1201	"	Do.	
6	Do.	for	Do. 1202	"	Do.	

In fusly 1203 to pay the usual expenses and to give 5 Cullums of produce to Sircar and to take the other 5 Cullums for the Ryots, being one half of the produce for the circar and the other half for the Ryots exclusive of all the expenses—

For Poonjah

Jeermah should be paid as specified below viz. for Cholum Cumboo Horse Gram Thovoray &c. produce agreeably to the Soogasosee Jeermah fixed by Rajah Beerbar. The expense of Saudemared &c. will not undergo any change—

		Fusly	Per Cawny		
1st Year		1198	1	One third of the share

From the Ag. Coll.
of Madura

Sir

With reference to the Proceedings of the Board of Revenue dated 24th November 1856 I have the honor to report no "amanut Fund" exists in this District.

I take this opportunity to state that money belonging to Precepts and Securities &c. remitted by the Courts which were included in the Ayin Fund prior to the instructions of the Accountant General of the 1st July 1844 were subsequently excluded, as required by that Circular and kept distinct from the Government

Fort St. George 8th January 1857

Government cash and the same entered in the periodical Reports of Balance of cash furnished to the Accountant General as the amount of Court Deposits held at its disposal.
