Sir.

B. Rs. 3393
From the Collr of
Rajahmundry —

I have the honor to forward a petition presented by Sreepally Venctramanah late Curnum of the Village of Paumurroo in the Cotaramachem-drapoor Talook of this District appealing against a decision passed by me against him under Regulation IX of 1822 The record of the case is transmitted herewith —

2 — The Defendant as appellant was charged with having embazzled the sum of Rs. 88 which had been paid by Certain Ryots on different occasions He was Convicted of having taken the sum of Rs. 59 and sentenced to pay a fine of 89 Rs. but as he had been allowed by the Tahsildar previous to the matter coming to my knowledge to pay the mis appropriated amount the actual penalty imposed on him was a fine of 30 Rs. and dismissal from office —

3 There is nothing in the appeal Petition calling for lengthened remarks I find & have no doubt whatever that the accused had appropriated

Fort St. George 8th February 1858

appropriated sums of the Collections of the Villages to his own use a practice I fear not uncommon and I felt that an example was called for—

Acting Secretary to the
Board of Revenue

Bd No 4658
From the Offg Collector of Guntoor
Reporting on Petitions Nos 677 1172 and 1488 of 1857.

Fort St. George

Sir,

I have the honor to acknowledge the receipt of the Endorsement of the Board of Revenue dated the 15th August last on Petitions Nos 677-1172 and 1488 of 1857.—

2. Petitioners claims exemption from payment of quit rent of certain Enams lands in their occupancy, as well as the remission of arrears which have accumulated thereon.—

1 Virjanum pond
2 Pauvaloor
3 Jncolloo
4 Duggoopond
5 Conealagoontah
6 Boggarum
7 Gogoolapond

3. The enams referred to are situated in the Villages indicated in the Margin—all of them were formerly held on free gift tenure as appears from the accounts of $\frac{1232}{1822/23}$ to $\frac{1236}{1826/27}$ which is further confirmed by the entry in Mr Ross's register and other documents

documents. In fuslies $\frac{1237}{1827/28}$ and $\frac{1238}{1828/29}$ quit rents was charged upon them by the late Zemindar, a portion of which was levied annually from 1237 to 1244.-

4. Mr. Blackburne in para 14 of his report of the 21st June 1833 upon certain aggrahaarums &c. in this District observed with reference to certain disputed cases, that the Parties concerned "did pay the increased Shrotriem to the Zemindar since fusly 1237," and that the "same demand has in consequence been continued annually collections are making accordingly," and in their Proceedings of the 2d December 1833 No. 479. the Board of Revenue remarked that "there appears to be no reason why they (aggrahaarumdars) should not pay the Collector what they paid him upto fusly 1236 when the estates were under his management, and which they are willing to pay and would have paid to the Zemindar had she consented to, to receive it." The Board thought that this principle should be adopted in respect to all the aggrahaarums

Para 44

in the Mutrouze Estate - namely to revert to the shrotriem payable during the former management of the Collector viz upto fusly 1236 with the exception of those settled by Razeenamah and those in which the aggrahaarumdars have actually paid since fusly 1237 under written or verbal engagements with the Zemindar. "These aggrahaarumdars, the Board further remarked "should be required for the present to continue the same payments which the Collector reports he has done."-

5. "The foregoing instructions referred exclusively to aggrahaarums, but they were considered applicable to enams also, and orders issued accordingly in November 1834.

6. In pursuance of these orders, the quit rent on the Enams of the Petitioners was relinquished in 3 three villages No. 5- 647 but that in the others, was continued on the grounds that the Enamdars agreed verbally to make the payment to the Zemindar, a remark to that effect being observable in the accounts of 1242 - 25 years before. Hence it appears to me that the demand

Complaint

Fort St.e George 8th February 1858

complained against is not a recent one, but has had its origin 30 years ago, and that it cannot now be remitted.-

7. Petitioners state that no agreement of the nature addressed to was entered into regarding the payment of quitrent but that a false report to that effect was made by the late Ameen to favor the Zemindar. How far it is correct cannot be ascertained neither is it necessary to do so at this distant period.-

8. The arrears due by Petitioners appear to be Rupees 194-8-4 as shown in the accounts of which they are entitled to a remission of 40 Rupees in the Coomkalagoontah village, the quitrent demand on the Enams situated therein having been given up as unauthorized: this sum extends over a period of 6 years from 1239 to 1244 and I would recommend it's being struck off the accounts. the remaining amount (154-8-4) is correct, and the Petitioners are bound to adjust it.

With this explanation I beg to return Petitioners No.s 677–1172 and 1488 with their several enclosures.-

Fort St.e George 8th February 1858

No. 149.

To

J. D. Sim Esqre
Acting Secretary to the Board of Revenue.
Fort St.e George.

B.d No. 5149.
From the Collr of Bellary
With reference to Government orders of the 22d July last submitting information regarding the assessing of Veesabady and Bagayre Veesabady of the Bellary District &c.a

Sir,

I have the honor to acknowledge the receipt of the Board's Proceedings forwarding Extract from the Minutes of Consultation dated 22nd July 1857. No. 932 containing the observations of Government on my recommendation fully supported by the Board for permanently assessing the Veesabady and Bagyr Veesabady of this District. I must beg permission to point and a misconception of my intentions by Government in the 6th para of their Minutes. The Government observe that my "proposal would lead "to the eventual, though gradual, abolition "of the tax and that the Maturpha "tax would then gradually become "extinct with the present generation "of payers, and the Government, in "sanctioning the proposed scheme, would "be obtaining in an indirect manner

"a

Fort St. George 8th February 1858.

"a measure which directly they have hitherto been unable to obtain."—.

2. This result was never contemplated in my proposal, I always intended that new comers who take the place of others who have died or who have emigrated, should be taxed. The son would in most instances, take up the trade and puttah of his father, and when the family become extinct or had entirely left, a new comer supplying his place would be assessed. That portion of my letter at the close of the 14th para/ on which I wrote "that I also propose that new comers be assessed, "which will form an increase in the "annual assessment" seems to have "escaped the Notice of Government. The Decrease in the annual Beriz will be confined to two causes Viz: that of persons dying and leaving no relatives to continue their trade, and that of persons Emigrating into other Districts. The increase will be derived from the taxing of new comers who will be assessed as proposed in the 14th para of my letter. There will no longer be the objectionable method of raising every year the assessment of present incumbents.

Fort St. George 8th February 1858.

incumbents - to make good the losses of Revenue by deaths, Emigration, or poverty of others. Although the interference of the Tahsildar must to a small extent be exercised, yet the great body of Merchants, Shop Keepers, artizans, &c. will be entirely exempted from all the annoyances of attending the Talook Cutcherries under the proposed system.

3. I have submitted this explanation, because the view that Government have taken of the effect of the proposed plan Viz: that it involves a gradual abandonment of the Moturpha Tax, has been one and a principal reason for withholding their sanction to the measure to which they are otherwise favorably disposed, - and which I yet hope may be sanctioned as soon as the Government feel themselves justified in relinquishing a Comparatively small (not I think a considerable) portion of the revenue for I do not anticipate that the Moturpha Tax can now be raised again to the average of the past 10 years, by raising

raising the rate of the present rate payers, and which being now fixed under the proposed system would with small variations be permanent, till the Moturpha Tax is entirely abolished, and I further think that by fixing a permanent moderate rate there is a far greater probability of the Moturpha Tax gradually increasing. It will free the Ryot from the fear of an annual unauthorized exaction, often paid to save him from being assessed higher than usual. It will induce Emigrants to return, and by giving confidence promote trade and Manufacture, as the ryot will know that he cannot be taxed higher in proportion to his industry, and his improvements in his trade, or that he can be made liable for the loss of revenue occasioned by the Death or failures of his neighbour, and this will encourage others to embark in trade and handicraft.

4. The Sheep tax on Shepherds and Graziers who are also Cultivators has been abolished as directed by Government.

The

No. 2634 of 3d August 1857.

The Board in the 14th para of their Proceedings proposed the entire abrogation of the Sheep tax by whatever classes, payable at present, whether occupying land or not. But this entire relinquishment of it has not been noticed by Government in the Minutes Consultation under reply. The Taxes on Sheperds and Cowherds in Bellary amounts to 20810 — " Rupees exclusive of Sheep tax paid by Cultivators of Land Viz. Paid by Shepherds and Cowherds —

For Sheep and Cattle	12,541	— " — "
For Looms and Sheep	8241	— " — "
For Cumbly Weaving	3732	— " — "
	24516	— " — "

Deduct Estimated amount sanctioned for remission in the two first items on account of Cultivating Shepherds 3706

Net Total amount 20810

5. My attention is directed by the Board to the last clause of para 16 of the Minutes Consultation in which the Government say that they "will leave it to the Board and Collector "to concert measures for relieving the Contributors.

Fort St. George 8th February 1858.

"Contributors as much as possible from
the evils attendant upon the Collection
"of the taxes" and that they "will be
"prepared to give immediate relief in
"any cases where the oppressive or unequal
"nature of the tax requires it" I am not
able to suggest any other plan than that
already proposed by me and so fully
approved by the Board, for relieving the
contributors from the evils attendant upon
the Collection of the tax - The evils of the
present system are interference, interruption
of business, loss of time, expense and liability
at all times to increase taxes, and great
importunities for unauthorized exactions -
These will all be mitigated, if not entirely
stopped by the Measures proposed. —

6. With regard to the desire
of Government to give immediate relief
in any cases where the oppressive
or unequal nature of the Tax
requires it, I would beg to sub=
=mit the following as properly de=
=serving of consideration. —

Beriz of Fusly 1266. Rs 4,608-

1st House Tax - This is levied generally

Fort St. George 8th February 1858.

generally on very poor people, who have no
fixed employment as Artizans or Cultivators
It is not Universal. It is levied at the
rate of one, half, and smaller sums on
the individual. —

Rs. 3,844.

2. Sundry occupations. This Tax
is levied on some persons who are also
Cultivators of the Land - where this is
the case the Moturpha tax for Sundry
occupation should be remitted. —

Bangle earth. " Kiln " Manufacture Rs 1192 —

3rd The Tax on the manufacture
and sale of Bangles is collected from
four sources. —

Bangle Dealers Rs 1640 —

1st On the renting of the Earth from
which the Bangles are made.
2nd On the preparation of the Earth
3rd On the manufacture of them.
4th On the Dealers and hawkers
of the trade. —

It would be proper to confine the
3 first taxes to the manufacturer, and
the Bangle Dealers should be exempt. The
manufacturer should have a moderate fixed
Tax assessed on him. —

4th A few substantial weavers are taxed with
both items of the Moturpha Viz: the Veesabady
and the baghyr Veesabady on the ground that
they trade in the Cloths manufactured by
them

them and their under weavers - It would be proper to forego one of these Taxes.

Indigo Dying Rs 6200 - - -

The Amount is not known but it is trifling

5th Some weavers prepare their own dyes and are subject to the Loom and the Dye Tax also - But they should be exempt from the latter - The Indigo Dye Manufacturer not paying the Loom Tax may be taxed as before.

Red Dye Rs 1768

6th This Tax is paid by the very poorest labourers: Men women, and children, who search the Jungles for this dye, and obtain it, with much labour, and sell it to the weaver for dying his threads - The weaver is taxed with the Loom Tax and these labourers should be exempted from this tax on them. —

Manabah Rs 2994 —

7th The Manabah Tax generally rented out and collected from a few people as fees on marriages and on offences against caste &c. This Tax has been before recommended for remission, and the only reason, I presume, why it has not been abolished long ago, is that it has been held in abeyance pending the settlement of the Motarpha Question. It should be abolished forthwith. —

See Letters of Coll.r under Dates.

24th May 1845 No 26
Do 8th - No 24.
17th Sept.r 1855 No 88.

7. The probable amount of these exceptional

exceptional taxes to be given up would be about Rupees 17,550.

8. In my former letter I calculated that the loss by fixing the future Rent of the Iyen Motarpha would be about 4,000 Rupees below the assessment of 1266 Fusly - This did not include - the Sheep tax on Cultivators, now ordered to be abandoned, nor the taxes above recommended as specially objectionable, and oppressive or unequal, but which have now been noticed in consequence of the orders of Government. —

The result of the whole would

9. probably be as follows: —

Revenue Veesabady 1266 fusly		94,831
Do Probably for 12by and future		90,000
Net Loss		4,831
Baghyer Veesabady 1266 fusly		1,35,215
Deduct		
Agricultural Sheep tax	5,000	
Other item mentioned above	17,550	
Reduction in remaining items	5,215	
Total Reductions		27,765
Baghyr Veesabady for 12by and future		1,07,450
Total loss on Veesabady and Baghyre Veesabady		32,596

† Note Rs 5,215. would have been the proper Estimate as the account of 1266 since made up shows Beriz of Fusly 1266 Rs 1,35,238
Estimate for Fusly 12by Rs 1,07,450
Difference 5,215

Some

2716

Fort St. George 8th February 1858

Some of the Items above
mentioned as falling heavy
on Labour were submitted
in accordance with in-
structions from the Board
of Revenue for considera-
tion on my Letter of
17th September 1855, but no
orders have been passed thereon, no
doubt in anticipation of immediate
orders for the total relinquish-
ment of the Moturpha.—

Bd No 183
From the Collr.
of Rajahmundry

Sir.

I have the honor to submit a report from the Acting Sub Collector on the progress of the Survey Class under his charge for the third year of its institution.

2 It will be observed from Mr. Morris's report that the number of paid pupils was the same as in the previous year. The places of those who had subsequent to the date of the last report entered the public service having been supplied by volunteers who had previously been under instruction.

3 The pupils have been taught chain surveying the use of the Prismatic compass and Plane Table and most of them are tolerably conversant with the rudiments of mensuration and geometry. They can plot, and colour, and compute

compute the area of fields. The Rush-rah method of surveying after the manner of Captain Priestley's operations in the District of South Arcot, is also conducted on a small scale the Prismatic Compass being used in-stead of a Theodolite in taking a bea-The pupils have also been usefully em-ployed in measuring disputed encum-and in several disputes regarding bou-Fifteen Villages have been fully survey-

4 As required in the Extract from the Proceedings of the Board of the 10th Ultimo, a few specimens of the work done are submitted as per list accompa-in a separate packet. A large and neatly executed map of the Village of Bunda-poorum will be forwarded on an early date with the report called for in Minutes of Consultation of the 7th August 1856. The Acting Sub Col-tor it will be observed reports favourably of the work executed by the pupils generally.

5 Instructions has been afforded to Cummums in the principles and elemen-

rules of land surveying and the comput-tation of areas. The practical part of their tuition has chiefly and in my opinion very wisely consisted in surveying with the Chain Fifty eight Cummums have been under instruction during the past year. I have pointed out to the Acting Sub Collector how very desirable it is to bring all the Cummums of at least the Delta Talooks under tuition. This is more especially necessary now when the survey of this District is about to be commenced and it is proposed that the Cummums should be employed in measuring minor Sub Divisions within a Circuit boun-dary correctly laid down, and with the total area of the Circuit indepen-dently ascertained.

6 I beg to submit a list of the pupils of the survey class and of public servants now in this District acquainted with the art which has lately been forwarded by me to the Director of Revenue Survey.

Rajahmundry District
Collectors Office Pettapoor
31st December 1858

/Signed/ A. Purvis
Collector

To

Fort St George 8th February 1858

Revd No 2.

No 378.

To The Collector of

Rajahmundry

Sir.

In conformity with the Proceedings of the Board of Revenue, dated the 12th of May 1855, accompanied by an Extract from the Minutes of Consultation of the 1st of May 1855, I have the honor to submit the third annual report on the progress of the survey Class which is attached to the Sub Division of Rajahmundry.

2 When the last report was submitted the number of paid pupils in the class was fourteen several of these persons subsequently attained employments in the Revenue Department and in the Department of Public works. but their places have been filled up by Volunteers who had for some time previously been under tuition in the class. The number for the year under report is consequently

Fort St George 8th February 1858.

the same as it was last year.

3 The pupils have been taught chain surveying the use of the Prismatic Compass, and Plane Table, and most of them are tolerably conversant with the rudiments of mensuration and geometry. They can plot and colour and compute the area of fields. The Chasrah method of surveying after the manner of Captain Priestley's operations in the District of South Arcot, is also conducted though on a small scale for want of materials, the Prismatic Compass being used instead of a Theodolite in taking a Circuit.

4 Instruction is afford-ed to Circumnavigating and the computation of areas The class book which they use is Mr. Taylor's Manual of Geometry in Telugu that has lately passed through the press. The practical part of their tuition chiefly consists in surveying with the chain as the use of the prismatic Compass

Compass is considered to be too expensive to be generally employed.

5 It is evident how great the advantage of the Curnums being acquainted, in some measure, with this useful branch of Knowledge must be to the people and Government. The every day business of these officials is connected with the superficies and computation of land, and it is desirable that they should know how to measure the holdings of those ryots who are under their authority. There are, I believe, several instances of Curnums in the Sub division who from their Knowledge of field Surveying have proved of much benefit to the village communities.

6 The work performed by the pupils of the Survey Class during the past year has been creditable. Many of the disputed crums and other manieums under investigation have been measured, and, in several cases of disputes regarding lands, the Civil Courts have availed themselves of the services of the class.

Fifteen

Fifteen villages have been entirely surveyed.

7 These results will shew that the class is of great use, and I have great hopes that the pupils will be of much service when the General Survey of the District is commenced.

From the Collr of Tinnevelly } I have the honor to acknowledge an Extract from the Board's Proceedings, under date the 2d October 1857, intimating that though the Rules regarding Wells are of general application, yet if there be any thing peculiar in the State of things in Tinnevelly that would render them inapplicable to this District, the Board will be prepared to give due consideration to the subject.

The

Fort St. George 8th February 1858

2 The Chief points in connection with well irrigation have already been laid before the Board in my Predecessors letters of the 27th July and 6th August 1855 and in my own letters of the 21st May and 11th June 1857.

3 In pursuance of the Rules prescribed in Extract from the Minutes of Consultation dated 30th May and -nessed to Extract from the Proceedings of the Board of Revenue under date the 29th June 1854 that no well dug within 100 yards of the rear of Tank bund Rivers Channels and beds of tanks shall be exempt from extra assessment orders accompanied by Proclamations were sent to all the Talooks in this District and the case

an

believed or pretended to believe that his Stepmother was using enchantments against him. He Secretly left her house and went about from one relation to another for nearly 2 months till I ordered him into Masulipatam as I saw no hopes of effecting a reconciliation. He is an intelligent sensible youth and is already making some progress in his Studies. for the present he is instructed in his own house till he has acquired sufficient english to make him admissible into Mr Nobles School.

4 At his request I sent for 3 years account of her management from the widow and have no hesitation in saying she sent me a fabricated one. the expenditure balances the receipts and the extravagance displayed would have ruined any estate. I submit herewith an abstract of her accounts.

5 The minor is most anxious the estate consisting of six Villages should be taken into Government management and after duly considering his

his interests, and the evident danger they are in when intrusted to an angry and extravagant Stepmother I determined to comply with his request.

6 The yearly income from the estate is about 2440 Rupees of this Rupees 2174 is payable as pensions leaving 1966 Rupees which I propose to expend as follows

720 for the minors yearly expenses
480 for the widows Do Do
240 for management.
1440

leaving 500 Rupees which if my calculation of receipts prove true will accumulate for the minors benefit.

7 As this estate lies in a remote corner of the Talook, I propose that the Sub Officer of Terwoor, the nearest Official, should manage it and receive 10 Rupees monthly for his trouble, that 3 peons should be employed on 3 Rupees each and 1 Rupee for Saderwared expenses. The saving to the Minor is principally in the dismissal of a swarm of dependants and followers who under the widows management eat up the Estate.

8 I trust this arrangement will meet the Boards approval.

/Signed/ T. J. Rouse
Acting Collector

A

Fort St George 8th February 1858.

No 1

To J. D. Sim Esqre

Acting Secretary to the

Board of Revenue

Fort St George.

B. No 135 Sir.

From the Collr of Tinnevelly } I have the honor to acknow-

ledge an Extract from the Board's

Proceedings, under date the 2d October

1857, intimating that though the Rules

regarding wells are of general appli-

cation, yet if there be any thing peculiar

in the State of things in Tinnevelly that

would render them inapplicable to

this District, the Board will be

prepared to give due considera-

tion to the subject.

The

Fort St George 8th February 1858

2 The Chief points in connection

with well irrigation have already been

laid before the Board in my Pre-

decessors letters of the 27th July and

6th August 1855 and in my own

letters of the 21st May and 11th June 1857.

3 In pursuance of the Rules

prescribed in Extract from the Minutes

of Consultation dated 30th May and

-nexed to Extract from the Proceedings

of the Board of Revenue in

under date the 29th June 1854

that no well dug within 100

yards of the rear of Tank

bund Rivers Channels and

beds of tanks shall be exe-

empt from extra assessment

orders accompanied by Proclama-

-tions were sent to all the Talooks

in this District and the case

an

on lands cultivated under wells of such description / dug subsequent to Fasly 1252 has since been levied with reference to the produce raised, which is similar to that levied on cultivation under old wells, or those sunk prior to Fasly 1252, while crops under Wells subsequently dug and situated beyond the defined limits, are taxed with Poonjah teerwah

4

I must here observe that the above Rules seem to have been construed by Mr. Bird, as implying that the limit of 100 yards applied equally to wells standing within that distance from any field or other place whatever to which the water from any Government source of irrigation found its way and this construction having been inserted in the Proclamation and circulated through

the District the Ryots have been obliged to pay the special tax varying with the produce raised under such wells- But this construction appears to me to be erroneous, as the Rules do not in my opinion especially when contrasted with those of the 21st May 1855, refer to any thing more than 100 yards from the Bank of a Tank &c as that distance is sufficiently great from any Reservoir to prevent absorption of Government water by percolation.-

The more liberal Rules

5

contained in the Boards Circular of the 21st May 1855, establish that Wells in Poonjah land shall not be exempt from extra assessment if within only 10 yards of a Tank bund or 50 yards of a River or Channel, but no reply having as yet been received from the Board to Mr. Birds query in his letter of the 6th August 1855, as to whether these Rules are to be applied

Fort St George 8th February 1858

applied to the assessment of lands under wells sunk subsequent to Fasly 1252 or only to new Wells dug since the receipt of these Rules, the tasc on lands dependent on Wells sunk after Fasly 1252 is necessarily levied in the proportion laid down in the Rules of the 29th June 1854 by which the Ryots are discouraged.—

6 I would therefore beg to suggest the cancelment of the System based upon the Proclamation which emanated from the Rules of the 29th June 1854 and request that sanction may be granted for the discontinuance of the distinction between old and new Wells as recommended by Mr. Bird in para 15 of his letter of 5th September 1855, and particularly referred to in para 6 of my own letter of 11th June last, and that the cultivation raised under old and new wells alike be ordered to be assessed with reference to the proportion laid down in the modified Rules of 21st May 1855.

In

Fort St George 8th February 1858

In the event of the Board not according to the above recommendation, I would beg to recommend that the lands under Wells sunk subsequent to Fasly 1252 be tassed at the Poonjah rate, where the wells are beyond 10 Yards of a Tank bund, or 50 yards of a river or Channel agreeably to the rules abovementioned. As regards those Wells that are situated within the above limits they should be tassed at double the Poonjah rate.—

7 The introduction of this System in supercession of all existing Rules and practices, will, I believe tend to multiply wells and prove beneficial to the people, particularly in adverse Seasons.—

8 With reference to the concluding

Fort St. George 8th February 1858

concluding part of the Boards Extract under acknowledgment desiring to have specific cases of lands bearing excessive rates of taxation brought forward as the question of wet assessment generally is reserved by the Board and Government for future consideration I beg to state that I am not at present prepared to cite any special instances.—

Tinnevelly
2d January

Bd. N° 226 Sir,
From the Collector of Tinnevelly } I With reference to para 2 of my letter of the 17th June last, N° 198 stating that the Travancore Circar was prepared to receive charge of the lands falling within their side of the new boundary at the commencement of July 1857 and to pay annually into the Taluk Treasury at Sencauney, the sum of Rupees 600 - 14 - 2 therein particularized, I have the honor to inform you that the Tahsildar of Sencauney reported to me under date the 27th August 1857 that the Travancore Circar on taking charge of the lands falling within their limits objected to receive 4 - 15 - 1¼ of Punjah and 7 2/10 chain of Poonjah in Code. cooracherry Village stating as their reason that 19 - 4 3/8 of land

Requesting for reasons shewn the sanction of the Board for ordering the cessation of the land mentioned to Travancore along with the extent which that Government objected to receive till the point was settled.

+ N° 14 in a statement forwarded to the Board with letter dated 5th Augt 1852.

to

to which they have a claim should be made over to them in addition to the above lands.

2 The enquiries made on the subject and a reference to the accounts show the claim advanced by the Travancore Circar to the small additional piece of land abovementioned to be well grounded.

3 The land in question is the waterspread of a tank in the Codecorchee Village.

4 In Fusly 1243 when the Village was under attachment the additional land in question was newly brought under cultivation and was amalgamated with the lands of ayen Village bearing the same name.

5 The same course appears to have been pursued with regard to the above land during the years in which it was brought under cultivation and the Teerwah levied thereon was carried to the credit of Government.

Tinnevelly 5th January 1858

I have &c

(Signed) J. Silver

Collector

Account

6 As the above land is not included in the Olugoo accounts of the ayen Village and falls within the Travancore side of the boundary it should properly be made over to that Government. I have therefore the honor to request you will be good enough to furnish me with the sanction of the Board for ordering the cession of this land to Travancore along with the extent which that Government objected to receive till the point was settled.

7 A Statement shewing the cultivation raised on the said land from Fusly 1243 to 1266 with the Teerwah collected thereon is enclosed for the information of the Board.

B2 No 605
From the Collector of Bellary

Sir,

I have the honor to acknowledge the receipt of Extract from the Proceedings of the Board of Revenue No 176 of 15th Instant, calling for a report, on the effects of the new Rule respecting the Summoning of Public Servants as Witnesses in Police cases.

I beg to observe that the attendence of Public Servants, except Peons to give evidence in Criminal cases is seldom required, but if they are Summoned the Heads of Offices will of course be put to some inconvenience of their Subordinates being suddenly Summoned. But since I have received the Board's Circular No 58 of 7th January 1857 communicating Extract Minutes in Consultation of 16th December 1856 on this subject, no practical inconvenience to the Heads of Offices, has ever been brought to my notice.

B2 No 606
From the Collector of Bellary

Sir,

I have the honor to acknowledge the receipt of your Circular No 4476 of 15th December last forwarding with a view to ascertain the correctness or otherwise thereof, a paper descriptive of what are supposed to be the Weights and Measures in use in this District.

2 I beg to report that after personal scrutiny made by myself and Mr Collett, the Additional Sub Collector I find that the paper which accompanied your letter, of Weights and measures in use in the Bellary District, is correct, and inaccordance with the information previously communicated from this District with the exception of an apparent error or two.

It is said that "the dimensions of the seer "vary the long seer being 7¼ inches deep and 3½ inches diametre and the short seer "6 inches deep and 3¾ inches diametre" It would be more correct to say the seers were "about

Fort St.e George 8th. February 1858

"about" the said demensions.-

At the end of Dr. Kelly's Table quoted in the Memorandum, it is written "4 Punchagahs. 1 Contaga 98 3/8 lbs" This is evidently an error 96 Cwt. is the Product of 84 + 4 + 4 + 4 + 4 + 5th - 430,080 Solas ÷ 40 = 10752 lbs ÷ 112 = 96 Cwt.-

The cundagah is the Canarese word for Coolly or Candy, which is 107,520 Solas according to the seer Metre of Bellary or 24 Cwt.-

In Dr. Kelly's Table there appears to be some wrong calculation - if one Multiplier of 4 were struck out the result would correspond, exactly with the Bellary Candy. The Gidna and all other terms therein mentioned are very undefined measures varying in all Villages. The Gidna for instance varies from about 105 Solas in weight to about 26 1/4 Solas in the Goolty Salook. Dr. Kelly seems to have assumed the Gidna as equivalent to the Seer. The seer of Bellary is a well ascertained and definite quantity being 84 Solas weight but the Gidna is as above stated an indefinite quantity - But it is quite clear that, that there is some miscalculation which I am unable to adjust.-

As directed in the 7th Para

of

Fort St.e George 8th. February 1858

of the Board's Proceedings under reply, I beg to enclose a list of weights and measures prepared by Mr. Collett in the prescribed manner.-

Sir,

B. No. 608
From the Collector of
Tinnevelly

With reference to Extract from the Proceedings of the Board of Revenue dated 12th October 1857 No. 3428, and to Extracts from Minutes of Consultation under date the 29th September thereunto annexed, I have the honor to forward as required by Government a Statement showing the extent of land under Cotton, Sugar, Indigo, Jute, and Mulberry cultivation, and the aggregate value of each of those products, as well as the assessment of the land per acre as per accounts of Fusly 1266, and to inform you that Coffee and Tea are not produced in this District.

2 From the above Statement it will be observed that all the products with the exception of Cotton are cultivated in this District to a small extent.

From the Acting Collector of Madura

Sir

Note

Returns certain statements relative to the reduction of assessment on Pollams duly filled up and corrected where found necessary with 2 other Statements affording the information called for in the Boards Proceedings of the 6th April 1856 A & B

Adverting to your letter of the 8th June last, I have the honor to return the Statements there with received duly filled up and corrected where found necessary and to enclose two Statements explanatory of the information called for by the Board in their Proceedings of the 6th April 1857

2. As directed in para 4 of the Proc.

It would appear that the Ayacut was not the same in the series of years but so fluctuated. The causes I beg to state, were that Peramboke lands when brought under Cultivation, it is very rarely the case, in a good season were included in the Ayacut, as also Excesses found by measurement, Poonjah converted into Nunjah Lands which escaped notice at the Survey, Nunjah Lands transferred to Punjah and vice versa

Proceedings in question. Mr. Sullivan directed an enquiry to be made as to the practicability of the waste & lands in the lower class in 5 of these 7 Villages being cultivated as Nunjah, the result of which is exhibited in the above Statements. Inferiority of the soil, added to the proportionately enhanced rate of Assessment, is assigned as the cause of the lands having been left waste. Some of them however were brought under cultivation in Fusslies 1265 and 1266, probably under the hope of an abatement in the taxation, which was then under contemplation. Of the remainder 529 cawnies 8 annas it is said, will from their situation be invariably cultivated as Nunjah, their retention under that head is consequently proposed.

Statement 2d

† Nunjah.

3. The Situation of 785 cawnies 3/4 annas renders them incapable of irrigation in ordinary seasons, and even in a good season the larger proportion of the land does not admit of it. They will therefore be transferred to

to Poonjah and charged with Teerwah Jastee when Government water is used. The rate of Poonjah tax to be levied is exhibited in the statement and the proportion of the difference between Wet and Dry rates will be found in the Memo: appended

Description and Class of Soil	Nunjah rate per Cawny	Poonjah rate per Cawny	Difference or Decrease	Centage borne by Col: 4 to Col: 2
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
Kaliar 1st Sort	6 5 10	1 6 11	4 14 11	77 8 "
D: 2d Do.	5 1 5	1 3 1	3 14 4	76 8 "
& Seralay 3d Sort	4 2 2	1 3 1	2 15 1	71 " "
Kaliar 3d Sort	3 13 1	" 13 3	2 13 10	75 " "
	3 2 11	" 15 3	2 3 8	70 " "

4 There are portions of the Nunjah lands which from their elevation above the level of the cultivated portion cannot be brought under irrigation without the outlay of some capital, which will depend upon the inclination of the cultivators their isolated position precludes

their

their being cultivated with dry crops these amounting to 27-9¾ I would class as Nunjah Peremboke, until by being levelled they become arable.-

Poonjah converted into Nunjah

5 The waste under this description of land, it will be observed, is considerable and will be entered as Dry, subject to extra cess when Government water is used.-

B

6. This Statement prepared under the same principles & affords the information relative to Nunjah, Mail Poonjah and it will be unnecessary to give any details here.

Boards Proceedings para 10

7. The Survey Wet lands cultivated as Dry in Fusly 1264 paid Nunjah Mail Poonjah tax according to the usage of the District which was ½ of the Nunjah tax, or fluctuating as the case may be with reference to the Jeerwah Dittum of the several Villages.

8. The result of the measure contemplated in this report would increase the financial loss

loss referred to in paras 11 of the Proceedings under reply

	Rupees	as	ps
Loss anticipated in the Board's Proceedings	5,600	"	"
Deduct amount, at the proportion recommended in former reports to be reduced from the Survey Assessment which falls on the land now suggested to be excluded from the head of Nunjah and included in Dry	958	"	"

No. 11

To J. L. Forbes Esqre

Secretary to the Board of Revenue

Fort St. George

Sir

I have the honor to acknowledge the receipt of the Extract from the Proceedings of the Board of Revenue of the 17th March last Conveying Extract Minutes of Consultation of the 1st Inst and calling at the close of the year for a report on the operation of Act XXVIII of 1855—

2 The Board are aware that previous to the act in question Coming into operation the laws in force against usury were Constantly evaded, I have no doubt that the removal of all restriction will eventually prove beneficial but I have reason to believe that sufficient time has not yet elapsed since the passing of the act to admit of the effect of it being fully felt by the people at large—

B/ No. 663
From the Asst. Collr.
of Madura ——

Sir,

Para 1. With reference to an Extract from the Proceedings of the Board of Revenue Dated 12th November last No. 3913, calling upon the Collectors for their opinions on the general question of allowing private companies to undertake works of Irrigation and Navigation, and another of 23d Ultimo No. 332, I have the honor to submit my opinion on the subject-

2 With regard to the 1st Project Viz Irrigation works, I beg to remark that the cultivable lands of this District are irrigated from tanks fed by rain and from the

Vaigay

Vigay river the one main source of irrigation of the District - If the periodical rains and the consequent freshes of the said river and the minor ones, are favorable and Season-able the District is able to dispence with any other assistance, and even when these resources fail, the ryots Jam is informed, would not incur the expence as prescribed by the Honorable Court in Para 8 of their Despatch, in as much as they consider themselves entitled to water at the Government expense in return for the assessment they pay on their holdings - If however the Government choose to

to allow the Company to undertake the works on its own responsibility, without constraining the ryots to purchase the water, no local opposition will affect the project -

3. With reference to the second project Viz. "Navigation Works," I beg to state that it is not probable that in this District a sufficient supply of water could be furnished to supply canals with - The presence of water in the river Vigay is most uncertain varying from 2 Months to 10 Days and in some years there are no freshes at all.

4. With reference to the 4th

4th para of the first Extract I beg to state that in the opinion of some experienced native agriculturalists and Merchants who have been consulted irrigation is injurious to Cotton Crops. which are what is termed Dry Crops, and depend upon the periodical falls of rain.

From the Ag Collector of Masulipatam

Sir

I have the honor to forward herewith Para 1 the fuller information regarding the Ellore Taluk

Yalook required in Proceedings Board of Revenue dated 15th January 1858 1st All the Villages are under roats in this Yalook as in the District in general

2nd The average fall of rain in this Yalook is not accurately known. The average of the District is 45 inches but 34 inches affords a good season in Ellore, for this Yalook greatly depends on the Tummelair which this year did not rise

3rd Dry Crops are not often grown on wet land in this District, and certainly none were so grown this year in this Yalook

4th 1,352 Rupees is the full assessment on the dry land sown the extent of which is greater this year than usual and as there was so little rain the cholum crop is generally very good

J. D. Sim Esqre
Acting Secretary to the
Court of Wards
Fort St. George

Sir

From the Acting Collector of Madura

I have the honor to state that in his Yuzee of the 18th Instant the Manager of Shevagungah recommends the employment of 72 Peons at 4 Rupees per mensem each from the funds of the Zemindary for protecting his and the Yalook Treasuries, as well as the property of the people against robbery apprehended from the dearth of grains effects resulting from a long prevailing drought in this part of the Country. This Establishment he proposes to retain till the scarcity bordering on famine ceases

2 I concur with the Manager in the necessity of entertaining this increased force as the number

number of the Police Peons allowed to each of the 8 Valaks of the Zemindary is 8 and of Revenue Peons 25 a number too limited to meet the demand of the present exigency and therefore request sanction of the Court for the monthly outlay of Rupees 288 for this Extra Establishment

3 If granted I shall only avail myself of the sanction for such a period as may be found necessary

Recd No 595
From the Collector of Tinnevelly

Subject
Para 1 Adverting to the unfavourable nature of the present season owing to the failure of the latter rains of the North East Monsoons and of which fact

your Board has been kept apprized by my periodical season reports and by my letter of the 25 Ultimo No 15 I deem it my duty to solicit permission to grant a remission on dry crops destroyed or perished by drought on the same principle and rule as now obtains for crops lost on Nunjah land as shewn—

2 I am well aware it is not usual to allow a deduction on dry crops perished. But at the present juncture, when much of the gram Varagoo, Oil Seeds and other dry crops are entirely lost I am of opinion that policy as well as humanity call for some relaxation in making the settlement for this year

Extract Proceeding of the Board dated 26 January 1854

3 A similar permission was granted to me in 1854 and to prevent the present indulgence being cited as a precedent hereafter I would act upon the same precautions and conditions as suggested in my letter No 7 of the 19th January that year

4 My application is for the entire District wet and dry Valaks

To

G. S. Forbes Esqr.

Secretary to the
Board of Revenue
Fort St. George

Bd. No. 672
From H. D. Phillips Esqre
Acting Collector of Tanjore
Submits two Statements exhibiting the responsibilities of Tahsildars and the Establishments in each Talook belonging to the Police
1 No. 1.
5 No. 2

Sir

With reference to the circular from your office dated the 5th of September last. No. 2974. I have the honor to submit herewith two Statements in the form prescribed one shewing the duties and responsibilities of the Tahsildars in this District. the other exhibiting the strength of the Establishment in each Talook with a specification of the officers who could be transferred to the Police in the event of a separate Police Establishment being organized.—

2 The portion of the existing Establishments shewn in Column 3 of the statement as available for the new Police may appear small, but regard must of course be had to the wants and efficiency of the Revenue Department. It is evident that as long as the executive functions of the two branches remain united under one superintendent, the strength of the subordinate Establishment can be economized and turned to account, in a manner that would be utterly incompatible with a fresh system involving a separation of duties and under which each Department must have its full compliment of servants. The Officers therefore entered in Col 3 are all that in my opinion, could with propriety, be separated and made over to the new Department without impairing the efficiency of the Revenue management of the Province.—

3 The officers of Pullah manigar and Moonsiff in Tanjore are at

C.B.

Fort St. George 10th. February 1858

at present generally united in the same individual and as on the separation of the Police from the Revenue this class of Servants would still be wanted in the Revenue Department, none of them can be assigned to the Police. The subject of the reform of the Police of this District being however now under consideration, any Servants who may eventually be elected exclusively for Village Police purposes would of course be at the disposal of the new Department.—

To,

J. S. Forbes Esqre.
Secretary to the
Board of Revenue
Fort St. George

Dd. No. 90.
From the Collector of Nellore. } Sir,

I have the honor to acknowledge the receipt of Extract from the Proceedings of the Board of Revenue under date the 12 November 1857 transmitting Minutes of Consultation dated 31st October preceding and Copy of the Dispatch of the Honorable Court of Directors on the Projects of the Madras Irrigation and Canal Company:-

2 The proposed Plan for providing irrigation and Canal Transit to portions of the Districts of Bellary Kurnool Cuddapah and Nellore would not materially benefit the Nellore District if confined to what is laid down in the particulars of proposed plans referred to in the Letter from the Directors of the Madras Irrigation and Canal Company to Sir James C. Melville dated 6 June 1857.

Vide Pamphlet Page 4.

3 But a very promising project nearly connected with the plan

Fort St. George 12th February 1858.

plan above referred to, was brought forward by Captain Colleys Superintending Engineer Central Circle in April last when he visited this District as this may not have come before the Board I beg to forward Copy of that portion of Captain Colleyers report which refers to the project alluded to together with some valuable remarks by Lieut Mullins the District Engineer on the subject.-

4 The project embraces the construction of an Anicut at Samaveram near which spot the Ponar enters this District with reservoirs in the village of the affluents of the Ponar as between Samaveram and Sidapet and Irrigation Channel on the North bank and a Canal for irrigation and navigation on the Southern one from Samaveram to Kistinapatam a Sea Port to the South East of Nellore where it would join the Northern Canal from Madras when the latter shall have been extended as proposed.-

5 I now proceed to notice the points

Fort St. George 12th February 1858.

points on which the opinion of the Collectors is requested in the Extract from the Boards Proceedings under reply.-

1st On the general question of allowing private Companies to undertake works of irrigation and Navigation. I am of opinion that it would be of great advantage to this Country to do so The example of the Railways in course of construction on this principle and the obvious advantages of securing the Application of British Capital for Local improvements in India by the construction of works of Public utility seem to shew that private enterprise in this direction should be not only permitted but encouraged Projects could no doubt be pointed out promising large returns which cannot now be carried out by Government from want of funds, or from the great number of works which are laid before them preventing their being undertaken at once.-

2d As regards the difficulties anticipated by the Board in carrying out the views of the Honorable Court that the profits of Water Companies are to have no Connection whatever with the land assessment.

and

Fort St. George 12 February 1838.

and are to be realized simply by the sale of water to those requiring it. I am of opinion that the difficulties as anticipated by the Board are very great and that any attempt to levy the water cess direct from the Cultivators would lead to a clashing of authority and other evils. It would be necessary for the water Company to keep up an Establishment some what similar to what Government has for the Collection of Revenue. There would be the greatest danger of its clashing with the Tahsildars and other native Revenue Officers and the Company would probably experience great difficulty in realizing their dues from so many cultivators while the interests of Government might be jeopardised a legislative enactment would be necessary to enable the water Company to realize their dues by summary process not so with a view to the principal Collection of the Public Revenue but in many instances probably to the prejudice of the Collection of the same. The difficulty also of

Preamble to Regulation XXVIII of 1802.

Fort St. George 12th February 1838.

disentangling existing rights to water from those belonging to the irrigation Company would be considerable where the union of the land tax and water charge in one gross sum forms the assessment. where lands at present under dry cultivation exclusively are supplied with water by a Company the matter will be much more simple but in cases where irrigation already exists though susceptible of extension and improvement the adjustment of the water rate will be much more complicated.

3rd The best plan I can suggest for obviating these difficulties though not free from all objections and so distinctly objected to by the Honorable Court of Directors would be for Government to levy the medium of levying the water cess crediting the water Company out of the land Revenue with what is due to them for water supplied.

4th As to the alleged injurious effect of artificial irrigation on the cotton crop I beg to observe that the cotton cultivation of this District is as has been before shewn so comparatively limited. It is sown

wholly

To Board 15th June 1838 No 5.

wholly on dry lands and artificial irrigation is not practised I am not aware that there are any Cotton Merchants here European or Native of intelligence from whom to obtain any valuable information on the subject which will probably be better understood where Cotton is a staple of the District It is probable that much depends on the nature of the soil on which the Cotton is grown Black Soil would be hardendedly being irrigated And thereby injured or At least more labour would be required to open ant the roots while on red and Sandy soil irrigation I would think be beneficial.

Nellore Collectors Office
8th February 1858.

[Signed] H.B. Elliot
Collector

Enclosure 1
No 45

To
Colonel C.E. Faber
Chief Engr P.W.D.

Sir
In my letter No 40 dated 31st Ultimo and to which I have the honor to refer you I stated that I considered it inexpedient to spend 32,000 Rupees upon the Government tank project while other and more profitable because less precarious means of investing money

money in Public works would be found in the District of Nellore In my letter No 39 dated 28th Idem I sketched out the possibility of constructing a canal of Navigation on the right bank of the Pennair from Samasweram Pagoda to Kistnapatam a Sea Port on the Ramparoo river.

2 The Canal alluded to was the terminal reach of the Isambud-dra canal there in reported upon and which I propose should be of irrigation as well as of navigation giving off minor channels where required.

3 The distance from Samasweram to Kistnapatam may be 60 Miles and the average breadth of the irrigable country between the proposed channel and the Pennair river is 4 miles the only Consider-able west cultivation between Somasweram and Nellore on the right bank of the river is at Chanjerla and may probably be 700 Acres.

4 The northern Trunk Road is the western boundary of the Cultiva-tion under the Nellore tank and amount the area which requires to be provided

* As much probably permile as is really good lande.

provided with water from Somaseveram is therefore 48 Miles × 4 × 200* acres = 38,400.-

5th On the north bank of the river the Sungum channels are the western limits of the cultivation from the Pennair and the area requiring to be provided with water may be considered to be
$38 \times 3 \times \frac{\text{acres}}{200} = 22800$.

6 During the dry season 26,000 cubic yards of water per hour which at 1,000 cubic yards per rupee is of the value of 624 Rupees per diem is all that may be calculated upon as available during the months of March to July inclusive
$624 \times \frac{\text{days}}{150} = 93600$ Rs. Another calculation by 3 cubic yards of water per hour per acre is required for cultivating a description of rice called Rshunnum and Pishanum land is worth 10 Rupees an acre or deducting Poonjah teerwah 3 Rupees an average 7 Rupees for two crops then $8700 \times 7 = 60900$ Rs. of net increase from this again must be deducted 1/10 th for ground rent of cultivation and 1/10 for repairs and the probable sum to be realized is 47700 from summer water & during the other seven months not only will this sum be realized a second time but an additional 38400 acres will

will be cultivated which will at 5 Rs give Rupees 192,000 deduct as before 1/5 the net increase would be Rupees 152,000 giving a total on the South bank of Rupees 1,99,780.-

7. Upon the north bank in like manner 22,800 acres at 5 Rupees would after deducting 1/5 give a net increase of Rupees 91,000 there would be no second crop land from the rivers on the north bank, the whole summer water being required for the Kistnapatam Canal but existing tanks may be supplied in the Monsoon months on both sides of the river and others may be constructed and again reservoirs may be made in the valleys of the affluents of the Pennair between Somaseveram and Sidhout to allowing of second crop cultivation.-

8. The canal upon the south bank of the river having an Hydraulic mean depth of $\frac{2}{3}$ of a foot and of all of not more than 3 inches a mile, must to carry water for 38400 acres have a width of 33 yards and as at its eastern extremity it must have a width of 13 yards for the navigation its mean section will be $33 \times \frac{13}{3} \times 2 = 45$ yards which at 2½ annas

a

a cubic yard will cost 4 – 5, Rupees a running yard or 7,920 Rupees a mile and Rupees 3,80,160 for the 48 miles, the canal would cost ½ of this so that the sum to be charged to each for earth work is Rupees 190,000 Say 4,000 Rupees a mile. –

9. Taking the channel alone it might possibly cost as follows, minor works of irrigation Sluices discharge Calingalahs, minor channel 2,000 Rupees a mile = 96,000 half share of Selection of bank road ways accompanying bridges waste weirs &c. at 1,500 Rupees a mile = 73,000 total for irrigation channels Rupees 3,58,000. –

10. The cost of canal at 4,000 Rupees a mile 60 × 4,000 = Rupees 2,40,000 share of minor works 1,500 Rupees a mile Rupees 90,000 – 20 Locks 12,000 each = Rupees 2,40,000 sum for dry aqueducts and bridge on southern road 50,000 total 6,20,000 rupees. –

11. The above of course is but an approximation but it has been well considered and will serve as a guide. –

The

12. The locks are probably under estimated but then they need not be so capacious as has hitherto been considered necessary they may for instance be 80 feet long instead of 150 feet they might also be 10 feet wide. –

13. Calculations may in the same way be made for the channels on the north bank. –

14. The amicut will cost more or less according to its height there is stone of the very best description on the spot and it may be so figured as to make a road up towards Cuddapah at the same time it might cost probably Rupees 1,50,000. –

15. The Channel for irrigation on the South side is calculated to cost 3,58,000 rupees and dividing the amicut into 3 shares the share would be 50,000 Rupees to each work the total would be 408,000 Rupees and the profit 1,99,373 Rupees and this I think without fail and the canal would be at hand for transport to the port of Pulicat and also to the

Southern

northern canal and so to Madras.—

16. In addition to the cost of the Canal to 6,70,000 Rupees there must be added the cost of lockage and Evaporation the evaporation will be as follows: the Surface of the canal 30 yards wide multiplied by 1760 yards per mile multiplied into 60 miles and by half an inch = 500 cubic yards a mile = 30,000 cubic yards per diem for the whole canal. I do not consider it necessary to store this quantity of water for more than six months because during the rainy portion of the year there is no doubt plenty of water to supply the deficiency for six months the quantity required is $30{,}000 \text{ cyds} \times 180 \text{ days}$ = Cubic yards 54,00,000 it may be prudent to store double this quantity say 11,000,000 again for lockage each boat (which I shall calculated as for the smaller description of lock) will carry 40 tons for a boat going down one lock full of water will suffice the whole way so that the quantity required is $80 \text{ feet} \times 20 \times 6 = 400$ cubic yards, but for a boat coming up it will be $400 \text{ cyds} \times 20 \text{ Locks} = 8000$ Cubic yards/ it will be observed that in this calculation the [illegible] of

of lift only is calculated as in single locks there must always be a ~~pre~~ level of draught / now in the supposition that this is all the traffic there $8{,}400 \text{ cyd} \times 180 \text{ days}$ = 1512,000 is the quantity of water to be provided in cubic yards but 3,000,000 be stored then the quantity to be stored is 14,000,000 cubic yards for evaporation and lockage for 80 tons a day or 40 tons each way, 17,000,000 cyd would be required for 160 tons a day or 80 tons each way now to store 14,000,000 millions Cubic yards of water I shall allow an expenditure of 50,000 rupees or 3 Rupees per 1,000 yards then the cost of the whole canal would be Rupees 7,20,000 and allowing 5% for repairs and 5% dividend then the sum to be realized is Rupees 72,000 now if the traffic is confined to 80 tons a day for 365 days = 17,52,000 tons carried one mile it will cost 8 pice a ton but if double this quantity is carried 3,000,000 cubic yards of water in addition must be stored — which will add an expense of 9,000 Rupees giving an extra dividend of Rupees 900 to be realized and 17,52,000 tons carried at 9 of a pice a mile would realize that sum then with a traffic of 160 tons a day 80 each way

the

Fort St. George 12th February 1858.

the cost per ton would be the mean of 8 pie 9 = 4.45 pie a ton a mile were the traffic to be further increased proportionate reduction would be made.

17. It may be very true that 8 pie a ton a mile is a higher rate than we have been accustomed to be told is the rate on Canals but at present we have not a larger amount of traffic* to look to let us however assume that 8 pie is to be paid and that it will pay to make the canal on that supposition then at the present rate paid on Nellore viz. 3 4/5 annas per ton per mile the saving on that quantity alone would be 4,67,000 Rupees and I need not enlarge the argument further.—

Fort St. George 12th February 1858.

No. 806

To

G. N. Taylor Esqre
Acting Collector of Nellore

Sir,

In returning the Document as per margin which was forwarded with your letter No. 100 of the 30th Ultimo, I have the honor to inform you that no Surveys or levels even of a rough or preliminary nature having been taken along the line of Country which would probably be occupied by the Channels under the proposed Somasewar Annicut I can afford you but little information regarding this project in addition to that exhibited in paras 3 to 17 of Captain Collyer's letter.

Even the limited knowledge I possess

2.

of the country on either side of the Pennair is however sufficient with the information afforded by existing irrigation works to shew that at an Annicut situated close to the point where the Pennair enters this District would water a very large tract of land for on the North side

× Copy of letter No. 15 dated April 4th 57 — from Supt. Engr. C.C. to Chief Engineer

Fort St George 13th February 1858.

side it would have a greater command than the Amnicut agarum Tank and this latter work is I know capable were its supply increased of irrigating all the land included between the river on the one side and a line drawn from Amnitas agarum viâ Lankerangepully and Engalapully to the Buggair on the other hand and similarly all the land north of the river and South of a line drawn from the NE end of the Atma Voor Tank to Permana could likewise be watered from the same source

3. On the South side of the Penn air the irrigation field would commence at the Longitude of Bad duly and after watering a narrow tract as far East as the first M— of Cumpand would spread out gradually to a width of from 4 to 6 miles and extend as far as the Nurtimmiakonda Hill where after a temporary contraction it would pass to the Southward and would become in the Eastern Direction solely for navigation while towards the South and west irrigation Channels would convey water to the lands in the western parts of the Surroopully and the South of the Toommalatalpoor Taloohs.

The

Fort St George 13th February 1858.

4. The above is a general description of the tract of country which would probably come under the Amicut and a nearer approximation to the irrigable area than that arrived at by Captain Collyer is not at present attainable

5. Perhaps the principal consideration affecting the desirability or otherwise of a project of this description is the condition of the inhabitants of the surrounding country and their present prospective capability of greatly extending or improving their cultivation and in this respect on either side of the Penn air the circumstances are favorable for the inhabitants of Amnitas agarum Voor Luckerangepully, Engapully, Atmacoor and Valley on the one side and of Kalawoy Koty Veerthum Cummumpand, Chajerla &c to Mooloomoody on the other are rich in Cattle and generally well to do and there is but little doubt therefore that the available water would profitably be made use of. The alluvial soil on either side of the River is extremely rich and yields

Fort St George 13th February 1858.

yields most luxuriant crops wherever the ryots are able to irrigate their lands from wells or Innderoogoos and the prejudices of natives to improved methods of irrigation have no longer to be overcome since the advantages of a steady and certain supply as in the case of the ancient channels at Nellore have been witnessed

6. The exact merits of such a project as that now under consideration cannot of course be determined without a system of levels but judging from the financial results of the construction of the Nellore Anicut the local of which is much less favorable than Somasoorum. I think there can be no doubt of its success in a Revenue point of view and I have even less doubt of the benefits that would accrue to the ryots of the villages under the influence of an upper Ameent

B. No 714
From the Collector of Cuddapah.

Sir,

With reference to your letter of the 16th Ultimo, No 167 and the Extract from the Proceedings of the Board of Revenue dated 30th July 1857 No 3587- I have the honor to inform you, there are no Zemindarees in this District and consequently no fines under the Provisions of act III of 1857 are levied by Landed Proprietors-

2. The Zemindar of Venkatagerry in the Nellore District pays a Peishcush of fifteen thousand and odd Rupees to this District but the Police of the villages of that Zemindary which are scattered amongst those of Cuddapah is conducted by Ameeens attached to the Zillah of Nellore, whether the above named Zemindar is in the habit of collecting fines under the above act

2830 Fort St George 12th February 1858.

act I am unable to state, but this fact will no doubt be mentioned in the report of the Collector of Nellore.—

The delivery of this letter will announce to you the arrival of the Trafalgar having on board the 6 Boxes and 1 Package of Printing Materials ordered in your favor of the 10th Inst. the Invoice and Bill of lading are herewith enclosed being duplicates of those about to be despatched by

2831 Fort St George 12th February 1858

by the first mail leaving this—

You will find every thing in the order executed agreeable to your instructions and have no doubt that every thing will give the greatest satisfaction except the Roller Moulds— this is of the best description of those made in Brass— but they are very inferior to the Iron Moulds which— although much more expensive are worth all the additional money but we did not feel at liberty to send one, in future cases if you allow our discretion we shall always do the best for you—

Hoping

2832 Fort St. George 12th February 1858

Hoping to be favored with further orders which shall at all times Command our best personal attention —

London — 31st August 1857 } (Signed) V. J. Liggins.

Bd No. 691
From the Collector
of Bellary —

Sir,

Submits 2 Returns exhibiting the duties rec.d of the Talukdars and the Talook and Village Establishments called for by the Board of Revenue under date the 5th Sept.r 1857 for the information of Mr. Ricketts.

With reference to the Board's Circular letter of the 5th Septr. last No. 2974, calling for 2 Returns, for the information of the Commissioner for the Revision of salaries and Establishments, I have the honor to submit 2 Statements marked A. and B. respectively. The Return A. has been prepared with some modification of the form annexed to the Board's Circular.—

2 As there is no return kept containing the information called for in the Return A. in this District this

Actg. Collector.

Establishments. Allowances. Remarks.

this information has been collected from the Tahsildars and I do not think that it is very correct. According to this return, the average number of Revenue and Criminal cases disposed of by the Tahsildars in a year, is 8018, the number of cases referred to them by the Collector and his covenanted Assistants on the average of 3 years is 3088 the number disposed of on the Tahsildars report is 1814, and there are 1274 cases un=decided. The number of cases of years previous to 1854 remaining un=disposed of is 537.-

3 In the return B the Ta=look as well as Village establish=ment has been included. The Talook Revenue and Police establishments is paid by monthly fixed salaries; the Village Establish=ment

ment hold enams and have fees paid by the ryots. In the accompanying return the monthly emolument of the Village servants has been calculated from their annual nominal emo=luments. The return exhibits in detail the servants who perform either Revenue or Police duties alone, as well as those employed in the joint performance of both duties. There are certain classes of servants not Government servants properly speaking but who are required by the ryots. In the return it is shown also what servants could be transferred to the Police, in the event of a separate Police establishment being organized.-

Fort St. George.

Sir,

Bd No. 693
From the Collr
of Tinnevelly

With reference to a Circular letter from the Board of Revenue dated the 25th January No. 325 requesting to be informed what number of Salt Balances will be required in this District if weighing is substituted for measuring in all Salt transactions and to the correspondence noted in the margin, I have the honor to state that 2 Balances one to weigh one and the other two Indian Maunds, are required for each of the nine Cotaurs named in the margin, with complete sets of weights of the sizes ranging from 1/4 to 2 Indian Maunds.

Board's Circular 9th October 1855 No. 2632
Collector's reply 22d October 1855 No. 318
Board's Circular 1st February 1856 No. 324
Collector's reply 16th February — No. 56

1 Vypaur
2 Manjancolum
3 Meesady
4 Tutacorin
5 Paliacoil
6 Coilpatam
7 Coolasagarapatam
8 Pizapatty
9 Coattungooly

As the Salt manufactured and that stored for sale will sometimes have to be weighed at one and the same time, and as these transactions cannot be carried on simultaneously with a single balance, it is necessary that each Salt Cotaur should be supplied with two balances as abovementioned.

Although no Salt is sold in this District for exportation by sea, yet the larger balances are required to expedite the weighing of Salt both manufactured, and ready to be sold.

No 26

To J. D. Sim Esqre
Acting Secretary to the
Board of Revenue

Fort Saint George

Sir,

Para 1. I have the honor to receive thro' you, Extract of Minutes Consultation under date 20th January 1858 regarding supplies, and impressment of carriage for troops -

2 With reference to para 7 of which I respectfully remind the Board that in Para 3 of my letter dated 8th June, I solicited instructions if my powers as Magistrate under Section 53 Regulation XI of 1816 to fix the rates of hire for travellers, is not to apply to Troops -

3 The difficulties I am, not this moment in, to provide carriage for troops are very great, and under this order of Government, I have felt myself obliged to ask the Officers Commanding Masulipatam, and Ellore both requiring Carts, if they will promise that the Cartmen are paid the amount of hire I may fix, otherwise as already has

Pd No 686
From the Coll. of Masulipatam

2838

Fort St George 13th February 1858

has happened, when I was providing carts for the families of the 15th Regiment the sepoys took my carts, kept them for several days, disputed with the cartmen about the hire, & let them go & applied to me for more, and this will happen again -

4 All I would propose to charge for the carts is the regular hire as laid down in the Nerrick & batta from the time of impressment to day of starting on the march common justice to the cartmen points to this as the least remuneration for forced labour

No 119

To

J. D Sim Esqre
Acting Secretary to the
Board of Revenue
Fort St George

Bd No 2419
From the Collector of Guntoor

Sir,

Herewith returned

1 I have the honor to acknowledge the receipt of the Boards endorsement on Petition No 3186 of 1857 from the inhabitants of Yedlapaud in this District complaining against the measurements and assessment of their lands

2 The Village in which these lands are situated was originally held on aggraharum tenure, but resumed in 1835 for the non payment of the arrears of Shrotriem due upon it

3 The ayacut quantity, exclusive of Porumboke and Enam, was 207 acres and 28 Coontahs as entered in the accounts of $\frac{1264}{1854/55}$ this was not a correct entry based upon actual measurement, but a mere Estimate the number of Coochells shown in the old accounts having been converted into acres. It was measured in $\frac{1266}{1856/57}$ under the orders of the late acting Collector with the English standard, that is, with a chain of 33 feet and amounted

6

to 368 acres and 1 Coontah or 150-13 plus the Estimated quantity - the Petitioners object to this and assert that the standard rope usually adopted was that of 18½ "Bauras" but this assertion is not borne out by the records in the Office which show that the rope formerly in use in this village was that of 16½ "Bauras"

4 The real question in this matter does not hinge upon the standard of measurement - for with whatever standard the lands are measured, the extent when reduced into English acres of 43560 Sqft. would be the same and if any difference occurs in calculation, it will be inconsiderable, and hardly worth notice, and therefore the only point to which the objections of the Petitioners should be held to apply is the amount of demand leviable on the land

5 The cultivation in Fusly 1265/1855-56 was 17a 33c bearing a demand of Rupees 282-9-11 which averages 1-10-6 per acre - this average was taken as a standard rate and the whole of the lands were assessed accordingly which has raised the revenue in on cultivation from Rs 282-9-11 to 476-4-0 or Rs 193-7-2 per cent

6 The lands cultivated in 1266/1856-57 amounted to acres 311-2 assessed at Rupees 506-6 - at the average rate of 1-10-7 per acre whilst the extent of

of waste was 56.11 liable to a charge of Rs 91-10-7 being in all Rupees 598-11-7 or 294-4-7 more than the average collections during the 10 years previous to 1266.

7 The drift of the Petitioners statement is that the amount paid by them on cultivation in Fusly 1265 was Rupees 282-9-11 and should the waste lands be also added the whole revenue amounts to Rupees 353-2 which would be proportioned on the entire extent ascertained by recent measurement viz acres 368-1 such a proportion averages Rs 1-5-4 an acre, which they request should be taken as the standard rate of assessment in lieu of 1-10-6 now fixed an urzee to this effect was also presented by them to the late Acting Collector when the question of the assessment of this Village came under notice in March 1857

Fusly's	Assessment Amount	Actual Collections
1256	323	337
1257	325	308
1258	323	322
1259	323	331

1261	323	305
1262	323	287
1263	323	255
1264	323	246
1265	323	316
Total	3232	3038
Average per annum	323	304

Present demand 598-11-7
Increase 294-4-7

Present demand on cultivation alone 506-6-6
Increase 202-6-6

Fasles	Shotrum demand	Actual collections
1237	681	681
1238	663	663
1239	663	663
1240	663	663
1241	663	663
Total	3333	3333
average per annum	666	666

	average per acre
East Veeravo South Vedalapad	2-11-5
	2-2-11
West & North Veen Rayalapad	1-2-2

8 Mr Newill in reviewing the assessment appears to have considered the request of the Petitioners inadmissable, and that the average rate of 1-0-- per acre, or rather the demand of 598--4--7, was not heavy for in a statement submitted for his inspection Mr Newill Remarks that "this is not high with reference to former assist and neighbouring rates" both of which are given in the margin for the information of the Board

9 There are in this District no less than 22 standards of Cochel measurement as will appear from the list previously furnished to the Board. The entry in the old accounts is not uniform which enhances the difficulty of reference - the Cochel rope is an indefinite one when an increase is discovered in the holding of a ryot he immediately protests against it and declares that it is not a real one and that it has been caused by the difference in the standard rope adopted, when he is unable to hold is ground on this plea, he attributes it to a difference in the length of the cubit but when a

+ Vide letter No 15 dated 10th May 1853

deficiency is found out he is clamorous for remission be the standard of measurement whatever it is. this state of things is very unsatisfactory, and opens a wide door for fraud, and I am therefore of opinion that Mr Newill's adoption of the English standard was perfectly correct.

10 With regard to the destribution of the previous demand on the extent of land ascertained by measurement, proposed by the Petitioners, it has already been decided as inadmissible under the circumstances above detailed, but such a destribution as the one referred to is partially admitted under the well known designation of "Wards arrangement," that it is not uniform throughout the District is some villages the previous demand has been allowed to be proportioned on the ascertained extent of land in others a discreationary amount some thing more than the former payment has been fixed which the ryots have proportioned on their respective holdings the classification of the assessment being determined amongst themselves. Again in some few cases the extra lands discovered were charged with the average rates prevailing in the village as in the present instance there is no definite principle for adoption in such cases and the Collector is therefore guided by his own discretion, and by local circumstances - In the absence of a regular survey and assessment such anomalies necessarily exist, but I think it

it would be better to attempt at some uniformity of Practice instead of perpetuating the present multifarious modes of settlement which are objectionable in every point of view

11 The process of survey and assessment being in contemplation, it occurs to me that until its completion the present condition of holdings may generally be allowed to remain as it is unless in cases, where an apparent encroachment has been made on the adjoining waste land, when an extra assessment may properly be charged any additional cultivation from waste being likewise subjected to a demand. I see no difficulty in carrying out this principle in every instance in which the boundaries of fields are defined, but in the absence of any definite boundary an enquiry on the spot and a reference to public accounts will no doubt point out the extent of new land added to the previous holding

12 The Petitioners not having paid up the amount due by them their property has been attached under the regulations.

13 The collections during the 10 years previous to 1266, which include arrears also do not exceed 304 — Rupees per annum upon the average, whilst the present demand amounts to 506-6-11 or about 67 per cent

more than the average payment, and I am therefore of opinion that the complaint of the Petitioners deserves some consideration they assert that the standard rope formerly made use of was the one of 132 "Bamas" and if this is admitted, the number of acres under cultivation in 1265 would be 216 instead of 172-33 as shown in para 5, should the revenue of 282-9-11 be distributed upon 216 acres, the proportion per an acre would be 1-4-11 which may perhaps be considered an adequate demand upon the land. The whole revenue, under this calculation will be Rupees 460-3-2 or 137-13-5 less than the present settlement

On calculation 388-8-6
On waste 73-10-8
460-3-2

14 I take this opportunity also of stating that this aggraharum which was attached in 1835 still remains unsettled 23 years ago. The amount of arrears was then small but it has now accumulated to Rupees 2,425-4-8 as shown in the accounts and therefore the sooner it is disposed of the better.

15 The shotrum from 1242 to 1632/33 annually charged at Rs. 323 and comprises the several items enumerated on the margin, to this, the aggraharumdars object the plea that it is exorbitant and unsupported by official records. The collections made in every year are carried to

and were produced at the time of investigation. In the register of Enams framed under the orders of Mr. Ram the name of this village is not entered at all. From 1199 to 1202 no accounts are forthcoming- and from 1203 to 1208, the

b. The Sunnud authorizing the alienation of this village dated 105 Years previously shows the amount of Shrotrium to have been 5 Pagodas or 20. Rupees per annum, which Doomba la issued by a former Collector as Fusly 1198/1788-89 gives it at 30 Pagodas equivalent to 120 Rupees both these papers are in the possession of the aggraharumdars

Fort St George 13 February 1858

Fuslies	Amount Paid Rupees
1203	40-0-0
1204	unknown

1207	96-0-0
1208	136-0-0

Shrotrium - 112
Nazzur 6/118

the payment of Shrotrium varied in every year- the records of 1209 to 1212 are not discoverable, and in those of 1213 a sum of 200 Rupees (30 Pagodas) is specified under the head of Shrotrium with a remark that "it is independant of certain items" An Extract of this account was furnished to the Parties on stamp Paper in 1819 under the signature of Mr Oakes former Collector in which the remark alluded to is not made and it is upon these accounts and Extract that the Aggraharumdars ground their objection to the present demand- No information is obtainable with reference to the amount recovered between Fuslies 1214 to 1225 from want of accounts and in the statement of Demand, Collection, and balance for 1226 1118 Pagodas are exhibited as the demand against this aggraharum. Again the accounts from from 1227 to 1232 have disappeared but the entry in those of 1233 gives the Shrotrium at 7 Rupees 30 7/8 - " - " From 1233 to 1236 the same demand appears to have continued, but in 1237 it was again raised to 863 Rupees which it fell to Rupees 251-4-0 in 1238. In 1239 it was raised to 320 1-0 and 1240 it again dwindled into 246-12-0 In 1241

* Extract of Entry P.F. 6

	Pagodas

or Rupees	307-0-0		

it

it was Rupees 320-12-3 and from 1242 it has assumed a permanent standard of 323 Rupees. Under the conflicting character of these entries it appears difficult to arrive at a satisfactory conclusion, and no other details are procurable.

17 The grounds upon which the claim of Government for Rupees 323 rests are first that the entry in the accounts of 1232 is specific. 2nd that the demand is uniform from 1242 or for the last 25 years, 3rd that payments appear to have been made at this rate for some years and lastly that the sum of 80 Pagodas or 200 Rupees shown in the extract is irrespective of certain other items as remarked in the accounts of 1213 which should properly be added to the shrotrium.

18 The plea of the Aggraharumdars is that the claim of Government for the amount over and above the 200 Rupees is unfounded. 1st because the Extract in their possession is more authentic than the accounts of 1213 the one being signed by a competent authority and the other wanting in that essential 2nd because the entry in the accounts of 1232 although specific will not affect the demand determined at the time of the permanent settlement of the District

3rdly

3rdly because the uniformity of charge since 1242 was made by Government in their own accounts without the concurrence of the Aggraharumdars, and lastly because they have not recognized this demand, and paid it in any one year

19 These are the circumstances connected with the Aggraharum Village under reference, and it rests with the Board to determine how far the claim of the Enamdars is admissible.

20 Past experience shows that during the last 23 years, the Collections have not equalled the standard of Shrotrium, except in 3 Fusles.

Should

2870

Fort Saint George 13th February 1858

21 Should the Board be of opinion that the claim of the Aggraharamdars is correct, they are entitled to restoration, the amount due at the rate of 200 Rupees per annum having already been realized; on the contrary if it be determined upon that the demand of 323 Rupees should be enforced, it would be better to resume the village at once and to strike off the arrears, for the parties are utterly unable to pay the arrears as at present calculated, and there is no use in retaining the Village under the head of Aggraharam

2677. Fort St. George 8th February 1858

No 193

To I. D. Sims Esqre

Acting Secretary to the

Board of Revenue

Fort St. George

Sir

With reference to para 2 of Extract

Bd's Proc. 23rd Aug.
From the Collr of Ganjam
Submitting the full explanation called for by the Board regarding the old wells in this District and forwarding 2 Statements connected therewith.

from the Proceedings of the Board of Revenue under date the 6th April and to the concluding part of para 37 of their Proceedings dated 6th December last of which a Copy was furnished to this office with the above quoted Extract requiring full explanation regarding the old wells in this District

I have the honor to forward two Statements No. 1 and 2 the one showing the extent of Ayacut and the last years Cultivation under old wells, as well as the average Cultivation of 5 years antecedent to the promulgation of the new rules or from Fasly 1214 to 1251 inclusive and the other exhibiting the extent of land actually Cultivated under old wells at each rate of assessment prevailing as per accounts of Fasly 1263.—

On

2 In reference to the Statement No. 1 above referred to you will observe a decrease of 2861 acres in the waste of Fusly 1265 as compared with the average waste of 5 years which is solely to be attributed to the Ryots having augmented Cultivation under the irrigation of wells in Fusly 1265 in Consideration of the very unfavorable nature of the season of that year and the Consequent apprehension of a Famine -

3 Adverting to the Requisition of the Board as Contained in the Concluding part of Para 37 of the above quoted Proceedings of the 6th December 1856 desiring to have full information as to the extent of land given up since the promulgation of the new rules I beg to state that a reference to the accounts does not shew that lands under old wells have been given up since the promulgation of the new rules owing to the Causes hereunder stated.

4 New wells have not as yet been so extensively sunk as they ought to have been with reference to the exigencies of the District for, though the first orders on the subject

subject as Contained in para 13 of the Board's Proceedings dated the 15th September 1842 stated that all Poonjah lands cultivated with what: ever produce by means of wells dug at the Ryots own expence should pay only Poonjah assessment, yet in the Proclamation made found: ed on the above Proceedings in Fusly 1253 it was mentioned that in the whole of the Punch: mahl Taloks and in the localities near the Sea in the Vellayer Taloks lands classed as Poonjah when Cultivated by means of irrigation from new wells i e those dug since the pro: mulgation of the above instructions should be assessed as before for Poonjah Betel, and Plantain Crops, and at double the Poonjah Rate for Sugarcane Coconut and jack trees and in all the other parts of the District the assessment on lands watered from such wells should remain the same as before for Poonjah and Betel, but should be double the Poonjah Rate for Cocoanut and Jack trees Plantains and Sugarcane -

5 This mode of taxation prevailed up to June 1853 when the Board of Revenue having

Fort St. George 8th February 1858

having in their Proceedings of 9th June 1853 in
Reply to a Communication from this office
Dated the 26th March preceding ordered the
proclamation above referred to be Cancelled
and limited the Government demand to the
fixed assessment of the land irrespective of the
description of produce that may be grown,
orders accompanied by proclamations, were
accordingly sent to all the Tahsildars on the
11th August 1854. The subsequent orders of the Board
and Government on this Subject Viz. that of
exempting new wells sunk on dry lands
from extra cess, contained different provi-
-sions as mentioned in para 4 of my letter
dated the 21st May. Hence the people are some
-what discouraged from effecting extensive
improvements of the nature under notice.

6 Under these Circumstances, I am
led to believe that although no land under
old wells has been now given up, yet sooner
or later a great portion if not the whole will be
observed by Mr. Bird be relinquished as new
wells are Constructed on a larger scale, which
it is expected, will be done in the Course of

Punjab Taram assessment & Lowest rate for
on Lands under New Wells
Special rate for Lands under
Old wells

Channi Thomum

(Signed) J. Silver
Collector

Statement

Fort St. George 8th February 1858

tions on the Ryots receiving distinct and
final assurance of the extent of encouragement
that will permanently be given to the Construc-
-tion of wells. I therefore beg to repeat my
Predecessor's recommendation that the distinc-
-tion now made between old wells and new
wells be discontinued in as much as it is
opposed to principles of equity to allow lands
under new wells to be occupied by the owners
for the land assessment Viz. Poonjah teerwah
whilst their neighbours possessing lands
of similar quality under old wells are
charged simply on the plea of their
lands being situated under old wells
with special taxe varying with the
description of produce raised and exceed-
-ing the Poonjah taram assessment as
particularized in the Margin.

2682 Fort St. George 8th February 1858

No. 121

To,
J. D. Sim Esqre
Acting Secretary to the
Board of Revenue

Sir,

Fort St. George

Bd's No. 4802
Strain the Collr of
Cuddalore park.

Para 1 In returning petitions Nos. 1645 of 1856. 1074 & 3234 of 1857 I have the honor to state that the late Collector Mr. Cochrane afforded a full explanation of the case to the Board on the 10th April 1846 and the Board replied on the 28th May of the same year Cudalapa royadoo the then occupant of the enam who was ordered to be kept in possession of the lands during his life time has since died leaving no son, the wife of his son or daughter in law is the present claimant, his son having died soon after the father. The dispute regarding the right of inheritance and pretensions of the different parties interested remains still unsettled.

2. It will be seen from para 6 of the Collector's letter that the adoption of Cudalapa royadoo by Merayalu Chinna Ramalottoo was by no means satisfactorily established but remained very doubtful and it further appears to me there is a legal objection to the adoption

Viz

viz that C. R. Ramanbattoo has adopted a son from a different gotrum the adopted child being the son of his wifes brother while there were nearer blood relations, and it further appears from depositions given by the curnums of Ponetur Cudalaparoydoo in 1843 that he performed the funereal ceremonies of his natural father which he was not entitled to do after being adopted into a different family. Should the adoption be considered invalid the present claimant, the daughter-in-law of Cudalaparoydoo can have no claim to inherit the enam if the right of the father be invalid so is that of the son.

3. It is further known that two individuals Ramiah and Soobiah have preferred their claims to the enam on the grounds that they are the nephews of M. Chinnoo Ramabattoo and brothers of Cudalaparoydoo whose names are entered in the accounts "the eldest brother of the applicants bore the same name as the deceased holder." With regard to their pretensions there is some doubt, the merits of their claim is entered into by the Collector in paras 5 of his letter and in para 6 it is stated that the witnesses called on behalf of Cudalaparoydoo in number deny that the fathers of the claimants were the brothers of M.C. Ramabattoo while the witnesses in their behalf state that he was.

4 In 1843 an action was brought by Cudalaparoydoo against

against Ramiah and Soobiah for loss of produce on account of the land being attached on their complaint when depositions were taken from the Curnums of Ponetur Cudalaparoydoo within the limits of whose village the enam is situated in which they state that Pollia the father of Ramiah and Soobiah was the brother of M. C. Ramabattoo and they are the legal heirs and that Cudalaparoydoo entered in the Enam Fasly accounts was their eldest brother and that the enam in question was mortgaged to them as a temporary measure Ramiah and Soobiah being minors were taken to Guntoor district by their maternal uncle and on their return deceased refused to restore the land, hence the dispute.

5 The Board in para 8 of extract from the proceedings of the 28th May 1846 distinctly state that they do not consider it within their province to offer an opinion upon the pretensions of the respective claimants and recommend that should Ramiah and Soobiah desire that their right should be brought to a formal issue they ought to apply to the Governor in Council who should he see no objections would appoint such person or persons to enquire into the claims as seemed to him most fit

fit. I have not yet learned that they have preferred their claims before Government and in consequence the dispute dispt. remains as it was with the exception that the then occupant has died and the enam is now claimed by his daughter in law there can be no doubt that Cudalporeyder long enjoyed the enam and it is to be decided by the Board whether she shall be placed in occupancy of it notwithstanding the doubt which has arisen with regard to the adoption

Herewith forwarded 6. Two documents have been produced which do not appear to have been filed before the late Collector a deed of sale dated the 1st August 1836 said to have been executed by Cudalporeyder to one Vencat Row and a deed of gift by the latter to his brother in law Rungacharloo, these two documents appear to me to be of little value if not forgeries. The cummums of Ponda Cudalporeyder whose signatures the deed of sale bears deposed before the sub Court that they were not present when the deed of sale was written that they were called by Rajarow the late Moonsiff of Cudalporeyder and father of Vencat Row the purchaser of the enam a child of 10 years and requested to attest it as witnesses, they at first refused to do

So

so urging that the seller was not the owner but on being informed that there was a provision in the document that if Government did not permit the land to be made over to the purchaser the purchase money should be refunded they signed the document but the seller was not present, this is sufficient to invalidate the deed.

7. The deed of gift is valueless from its having been altered, it is said to have been executed in Sowmeah year 1849 corresponding with the 1771 of Sorlevar hamar year the year after the Government proclamation was issued prohibiting enams from being sold or disposed of in gift. Sowmeah year was subsequently altered to Soobacrootoo 1842 but they forgot to alter Sorlevar hamar year so that Soobacrootoo stands with the corresponding year of Sowmeah 1771 instead of 1764, this alteration renders the deed worthless and Vencat Row stated in 1845 that he was then in possession of the land, though it was said to have been made over in gift in 1842.

8. As there are considerable doubts regarding the rights of either party to succeed to the enam and as it has not yet been ascertained who is the legal heir to it I think it advisable to continue the attachment until one or other of the parties can clearly establish the points at issue and show without doubt that they are the legal heirs This can only be done by one of the parties petitioning Government on the subject when the merits of the case may be tried and decided by the civil tribunals

No. 111

From S. D. Sim Esqre
Acting Secretary to the
Board of Revenue
Fort St. George

To
The Secretary to Government
Fort St. George

B. No. 4294.
From the Collector of Cuddapah
Forwarding the Annual Report upon the Settlement of both the Land and Exctra Sources of Revenue in the District of Cuddapah for Fusly 1266/1856/57, together with Statements connected therewith.—

Sir,

Para 1. I have the honor to forward the Annual Report on the Settlement of both the Land and Exctra Sources of Revenue of the District of Cuddapah for Fusly 1266/1855/56.—

2. The Settlement was commenced on the 4th December 1856 and concluded on the 30th June 1857. The names of the different Officers by whom and the Stations at which the Settlement of each talook was conducted, are particularized in the accompanying Statement.—

Season.

3. The Season of Fusly 1266 may be said to have been a good one, throughout the District generally. The rain that fell between May, June, and July tho partial, proved sufficient to enable the Ryots to plough their Wet & Dry and Garden lands and sow the two latter. The favorable Monsoon which followed from August to November supplied the Tanks, Coontahs and Channels with a full supply of water which enabled the Ryots to sow their

The average fall of rain from May 1856 to April 1857 between Fusly 1265 and 1266 in.

Collector

their Wet lands with the Carthee Kum and Vysakum or 1 and 2d Crops and to convert a considerable extent of dry land into wet and Garden for Seervajasty. It also proved favorable for the Cultivation of Chitta Jonna, Cotton and other Dry Grain usually produced on Ragged or black Soil and to the lands previously sown. Between the 9th and 12th December however heavy Showers fell accompanied by high wind which greatly injured the Dry Crops consisting of Jonna, Cotton, Green grain &c. by Causing a blight which prevented the ear filling and caused a sweet gum to exude from the heads which ought to have produced grain and the pods of Cotton before opening prematurely dropped: the flower of the last was, for the time, destroyed. It is however satisfactory to know that the rain proved advantageous to the different species of cereals in the Southern and eastern Talooks where some of the Tanks received a supply which enabled the Vysakum or 2d Crop to be Sown and reaped.

Statement No. 2 Crops.

4. It may be considered that the harvest of the year under review throughout

the District was a good one and will bear comparison with any of the previous favorable seasons. Of the first sowing of Dry Crops in Red misced Soils and that on Ragged, Viz.t. Jonna and Pulse of all description, one third of the quantity Sown yielded an average of three quarters of a full crop, one third half and the remainder suffered more severely from the unseasonable rains which fell about the middle of December. The Garden lands dependent on wells have, in General, yielded a full return. The wet lands under Tanks and Channels in most parts of the District may be said to have yielded an average of not less than three quarters of a Crop and about one half in others. Sugar Cane and Indigo yielded an average return Cotton Suffered considerably by Showers which fell in December and by the ravages of insects in consequence of which the yield cannot be estimated at more than two thirds of a Crop in Some places and about one half in others Of the different

different species of oil plants, such as Castor, Gingelly oil seeds, Linseed &c. one half may be estimated at two thirds of a Crop and the other half about one half.—

5. The season like that of the past, has been far from healthy; altho food has been plentiful for both man and beast, yet I regret to add, that the mortality among people in some localities has been very great from fever which prevailed in almost every Village throughout the year; Small Pox and Cholera have also been fatal. Cattle and Sheep have likewise suffered from disease, probably caused by eating the young Shoots of the grass which Springs after the different rains, more particularly, amongst the former. This loss was severely felt by the Cultivators as well as by the Sheep farmers.—

6. The Dresser attached to my Establishment has made himself useful in rendering medical aid to the ryots, in conformity as with the instructions of Government, as well as to the public Servants and their families. The Number of Cases treated by him during the year is 524. There is a decrease

	No. of Children
Fasly 1265	22977
" 1266	20090
Net Decrease	2887

decrease amongst the Children vaccinated of 2887, which may, in a great measure, be attributed to the fever and Sickness which has prevailed throughout the year. The Vaccinators have on complained that the people refused to have their Children vaccinated. the cause why, has not been satisfactorily ascertained.—

7. It will be observed from Statement No. 2. that the Prices of Grain ranged lower during the Fasly under review when compared with those of the previous and with the average of five preceding years, but rather higher than Fasly 1262, the cheapest Season ever known in the Province. Not only has this happened as regards the prices of Paddy and other grain entered in the above Statement, but also as regards those of the other Species not included in it. The Per centage on Paddy being at about 15 per cent and those on the principal Dry grain being from 20 to 25 per Cent below the preceding year.—

Statement No. 3 Enclosures A and B

8. From Statement No. 3 it is Shewn that on account of the great extent of land brought under Cultivation in the present in comparison with the past year, there is an increase of Rupees 189647 of which only a Small amount belongs to Dry and the remainder to Garden and

+ Col: 28.

and Wet and the per centage on the increase may be stated in round number at 9 per Cent. The high price of grain for the last 3 years and the great demand for Cotton and Indigo, may be ascribed as another cause, in addition to the favorable nature of the Season referred to in Para 3 of this report, which induced the ryots to extend the Cultivation of these species of produce, especially the latter, which yielded very high prices, and also to sow both the Cartecknum and Vysakum, or the 1st and 2d Crops on Wet lands which, likewise yielded a remunerative return, as well as to bring under Cultivation dry lands converted into wet on which Teervajasty is levied and lands which had been long waste and reduction of assessment.—

9. On comparing the revenue of the present year with the most favorable of any of the preceding since Fusly 1231 at which time the Country was taken under Amanie (which had formerly been rented) the present has yielded a greater increase of revenue to Government than any of the former.—

10 On a reference to the enclosure B in the above Statement, it will be seen that a sum of Rupees 04801 has been carried to the credit of Government, collected from lands which had been

left waste without any satisfactory cause being assigned, their being sufficient water in the reservoirs for their Cultivation, and also upon lands which had been left waste for pasturage.—

Statement No. 4.

11 There is an increase of Rupees 72810, above last year, under the head Remissions, which is made up of various items as shewn in Statement No. 4, and may be classed under the heads Caboolaty or Bunjer or lands agreed to be cultivated portions of which were waste, lands taken up on Cowle tenure, Ayacut Bunjer, other lands upon which high assessment has been recently reduced under the Sanction of Government dated 10th July 1854 as well as certain other items under the head Miscellaneous.—

+ which accompanied Board's Proceedings 31st August 1854.—

12. There is a decrease of Rupees 5379, arising from lands which had been swamped and injured by inundation as well as upon others on which crops have perished for want of water in the previous year, but have been Cultivated during the present, and from Well lands subject to 1/3 Remission having been irrigated from Tanks and Channels on which 1/4 remission was granted instead of 1/3.—

13. There is a decrease of Rupees 237 in the item denominated "Pymaish Cummi" or fields believed to be less than those entered in

in Pymaish accounts. these lands were allowed a remission up to the past Fusly, but in the present they have been remeasured and found correct.—

14 Under the head sundry items there is an increase of Rupees 7646. chiefly in the Enamaty Jodee &c., owing to a larger quantity of land under this denomination having been brought under the plough than in the previous year and also to an increase in the sale of the Palmeira and other species of Timber.—

15. The decrease of Rupees 9159 exhibited under the same head is to be attributed to land yielding a revenue of Rupees 8,640 which had not been entered in the accounts but discovered subsequent to the Settlement, on an examination of the Cultivation in different Villages by the Carkoons deputed for the purpose and comes under the head Tanakirjasty, which was erroneously entered in Statement No. 4 of Fusly 1265 but now omitted in this Statement as referred to in Para 20 of last years report. The decrease of Rupees 479 is owing to a smaller offer being tendered for the rent of orchards for one year in consequence of the trees being less productive.—

Statement No. 9. Extra Revenue.
Land Revenue — Total decrease } 4797
Deduct decrease under the same head } 3159
No. 1608.

Statement No. 5.

16 There is a great diminution in the

the Remission granted on account of Heavy or crops which have perished for lack of moisture in the present in comparison with that of the previous year as explained in Para 12.—

Statement No. 6 Shews the extent of land

Statement No. 6 17. taken upon progressive and fixed Cowle during the year under review. No particular remarks are required as the Statement itself is sufficiently explanatory.—

Statement No. 7. 18 The marginal note shews the increase in the Cultivation of Indigo and Cotton and the decrease in Sugarcane. The increase is to be attributed to the high prices of these two latter descriptions of produce, particularly Indigo, which is much more remunerative to the growers than any other crop produced on their lands and for which an immediate sale can be obtained without expence of Carriage. Owing to the seasonable rains, the ryots were induced to Cultivate as much land with these products as they could manage. The decrease in the extent of land Cultivated with Sugar Cane is owing to the Samastanum of Poonganoor in which there are considerable plantations, having been made over to North Arcot, but which was formerly attached to

	Sugar Cane acres	Cotton acres	Indigo do.
Fusly 1265-6216.	65908.	23931.

Deduct Pongamia	2250		
Remaining	937		
Contage	15.		

to Cuddapah. The Chief Cultivation of this produce is carried on in the Talooks of Goorrumcondah and Muddenpully: tho this product is Cultivated in other talooks still the extent does not approach that in the above named two provinces. This being a 10 months Crop, the ryots at the commencement of the Season planted as many acres as they could manage and the sources of irrigation would permit. Towards the latter part of the Season the demand for Sugar for exportation became so great that this article of commerce rose to an unprecedented height. The year previous a Candy was sold for Rupees 12 to 14 but towards the end of the present it rose to from 35 to 42 per Candy yielding an enormous profit to the grower.—

19. The number of Sugar manufactories in the District exclusive of Pouganoor is 115.—

20. The Cultivation of Cotton from American Seed may be said to have almost ceased, the Cause has been explained in former reports.—

Statement No. 8. 21. Statement No. 8 exhibits a decrease in various items of Vijsabuddy and Baghair Vijsabuddy and

	Vijsa Buddy	Baghair Vijsa Buddy	Total
decrease in Fasly 1268	3178	3233	6911

Statement of Fasly 1268	67904	71828	139732
Difference between the above items	2136	1558	3694

and the marginal note shows the remaining decrease of this Zillah after deducting Pouganoor made over to North Arcot and the average of the 5 preceding years: which may be attributed to the high prices at which grain has ranged for the last few years, to the death desertion and impoverishment of some of the larger merchants and those carrying on petty trade who have abandoned their profession, as well as to the mortality amongst the herds of Sheep and Goats, the property of Shepherds and Dungurs.—

Statement No. 9. 22. Statement No. 9. shews a total Increase of Rupees 4990. Of this, Rupees 970 falls under the first item, Viz.t Land Revenue, and is owing to certain Enam lands, the owners of which had died without heirs and upon their demise the Enam was resumed. Rupees 3078 is attributable to a considerable quantity of land not entered in the accounts but discovered by the Carnoons upon examination of the Villages after the close of the Settlement to have been actually cultivated. Rupees 970 is an increase under the head Revenue from Sayer, levied from the Currumns

Land Revenue Total Increase 4797
Deduct Decrease under the same head 3159
Net In. Rs. 1638

the seventh item, is attributed to the causes already assigned, being the amount of Net Increase compared with the various items of Extra Revenue in Statement No. 9.—

30 Of the whole decrease of Rupees 77949 exhibited, Rupees 63,000 belongs to the first item, Rupees 7709 to Abkarry and Rupees 6,907 to Moturpha which is attributable to the transfer of Poonganoor Samastanum to the District of North Arcot; but upon the whole, deducting the decrease from the Increase there is a net Increase of Rupees 11,336.—

31 In the Marginal Statement the Feerwajasty Levied upon Dry lands converted into Wet and Gardens is shewn together with the average per acre. It was considered desirable to shew

shew the actual additional assessment levied on the land in consequence of no heading having been provided in the present forms of Statement received from the Board of Revenue as explained in Para 30 of last years report.—

Statement No. 11

32. At the close of the Fusly 1266, there remained a balance of Rupees 175,422 uncollected, as shewn in Column 4, of which the greater portion has since been recovered. Of the remainder Rupees 34,448, a considerable portion is supposed to be recoverable such sum, however, as may be considered irrecoverable will be enquired into during the Annual Settlement of Fusly 1267/1857/58 and reported on in due course. Comparing, however the Collections of all branches of Revenue entered in Column 9 Abstract A of the above Statement with those entered in the same abstract of the preceding Fusly, a net Increase of Rupees 117,888 (Collected) is the result.—

33. With respect to the amount of Rupees 12,339, exhibited in Column 13 of the Statement, they beg to submit that the Cause of their not being recovered is explained in para 35 of this report with reference to

to Statement No. 13.

Statement No. 12 Zemindary:

34. The balance of Rupees 15198 due on account of Tengatagherry Peishcush at the close of the Fusly has been since recovered, but cannot appear in the accounts of this Fusly as it was not received until after it had terminated, but will be shewn in those of the ensuing Fusly.—

Statement No. 13.

35 In Column 9 of this Statement it will be seen that Rupees 5899-14-3 is entered as recoverable and in Column 10 Rupees 350-3-3 is exhibited as doubtful—measures have been adopted for the recovery of these sums. I beg to recommend that of the sum of Rupees 6289-3-5, entered in Column 11 under the head irrecoverable Rupees 2753-9-4 may be remitted and request the Board of Revenue will be pleased to obtain the sanction of Government for writing off this amount for the current Fusly, it being due by parties impoverished, deceased, and who have absconded their Villages.—

36. Statement A annexed to the above Statement shows the particulars of coercive measures adopted for the recovery of Government due during the Fusly under review.

No

	Individuals
Collectors Departts.	14
Sub Collrs Departts.	12

Statement No. 14

No party has been confined in jail for the non payment of revenue.—

37 This Statement shews an Increase of Rupees 134678 in the gross Collections of which Rupees 99003 are the recoveries in the present year, of the arrears of Land Revenue outstanding at the close of Fusly 1265, and Rupees 99003 are the Collections of the Current Revenue which was greater in the present than in the preceding year notwithstanding the transfer of Pongamoor.—

	Rs.
Increase	134678
Deduct Decrease	16831
Net Inc:	117847

38. The increase of Rupees 2683 in the Doctrs Revenue is composed of the larger Collections of the present years demand as well as the recovery of arrears of the past.—

39. The Increase of Rupees 3869 under the head Stamps is attributable to the more extensive Sale of Stamped papers and the Collections for the months of June Fusly 1265 having been brought to account in the Current year, this amount not having been received into the Treasury till after the termination of the Fusly.—

40. The transfer of the Samustanum of Poongamoor to North Arcot as already noticed explains the Cause of the Decrease of Rupees 16831 in the abkarry. Mathurpha and other branches

branches of the Revenue, but it is satisfactory to find that there is a Net Increase of Rupees 17,847.—

41. There is also an Increase of Rupees 36,697 under the head Charges, owing to the Salaries of the Collector and his Assistants for May and June of Fusly 1265 having been disbursed in July of the Current Fusly on account of the new System of Preaudit being brought into operation.

42. The Increase in the next item, Coozoor and District Establishment, is partly owing to the above Cause and partly to the payment of increased Salary to the Head Sheristadar of this District in the present Fusly agreeably to the Order of Government dated 8th December 1856 No. 1292 and to the disbursement of the arrears of the same under the above order. The other items being small do not call for any particular remark.—

43. Under the head Motunpha and Extra Charges a Decrease of Rupees 1359 is observable owing to the Salaries of Additional Carkoons and Goomastahs and Sunderward &c. items not having been charged within the Fusly as was the case in the preceding year.

Increase 36697
Deduct Decrease 1359
Net In. 35338

year. There is, however, a Net Increase under this head of Rupees 35,338 after deducting decrease.—

44. The abstract annexed to the above Statement will shew the per Centage between the Amount of Collections and Charges.—

45. The measures adopted for the recovery of the balances outstanding under the head of Tuccavie or advances for Cultivation has been explained in Para 41 of my report on the Settlement for Fusly 1265. The balance due for Fusly 1264 amounts to Rupees 100 and that for Fusly 1265 to Rupees 25, and I beg to state, that the former will be recovered agreeably to the instalment mentioned in the para above alluded to, and the latter will be recovered without delay. Strict orders having been issued to that effect.—

46. Statement in the Margin shews the extent of land which has been brought under Cultivation and the portion left waste of those on which a revision of assessment

† Board's Proceedings dated 27th November 1856. Do. do. 10th Augt. 1857. Extract Minutes of Consultation 16th February 1857.

assessment has recently taken place and on approved of by † Government. It will be seen that upwards of two thirds have been brought under cultivation and one third is still left uncultivated.

47. It may here be remarked that the portion thus left, has been waste for many years and the difficulty of levelling extracting the roots of trees and shrubs has been proportionately great, but it is hoped that some part of it will eventually be cultivated. From the other portion, the proposers have been too precipitate and after the land had been granted on reduced assessment they found that it had been so injured by floods, impregnated with salt, others situated too high to allow of irrigation, part taken up by roads, others situated near Tanks, on the soil of which, has been applied for the repairs of the bunds and others so overgrown with Date trees from which toddy is extracted, the Adhaary Renters object to their being cut and cleared as it would cause a loss to them and certain lands upon measurement being found less than that entered in the Pymash,

Pymash, is such as to prevent the hope of their being cultivated. An enquiry into this subject will shortly engage my attention and be disposed of.

48. In Column 3 of Statement No. 4. (ninth item) it will be seen that Rupees 17,407 have been granted as Remission on the lands alluded to above, which exceeds the amount of actual collection of Fusly 1266 entered in the Statement appended to the preceding Para. This is caused by portions of assessment only having been collected from some of the ryots who have left their lands waste, tho there were means to cultivate them, and portions having been remitted to them according to circumstances, as well as the difference between the Original Survey assessment and that fixed on certain lands in the current Fusly 1266 in pursuance of the provision introduced under the authority of Government quoted in Para 12, in regarding which a Separate report will be submitted to the Board at an early date.

49 The annexed Statement exhibits the number of Topes planted for charitable and

and private purposes under the Rules which accompanied the Board's Circular dated 6th. April 1848. the extent of land occupied by them as well as the assessment leviable thereon.

No new Topes have been planted in Fasly

	No. of Topes	Extent of Land	assessment	No. of Trees in each Tope.

For charity as per 3 and 4 Para of the Circular letter.	18	36	204	1786
For private purposes as per Para 5 Ditto Ditto	11	31	31	1607
Total	29	67	235	3393

1266 under the rules referred to, as no proposals were offered and the ryots prefer on planting Orchards upon their own dry Putta lands which are lightly assessed, paying the tax for the same, and thereby securing to themselves the full benefit of their labours and the produce of the Orchards in future.—

50. I have the honor to forward Mr. Blair's Report of the three Taloks forming the Sub division of this province which enters into full detail of the Settlement. Mr. Wedderburn left the District in January last in order to proceed to Europe on furlough he has been zealous in the performance of the duties of Sub Collector. He has been succeeded by Mr. W. J. Blair, a most useful and valuable public servant. he was formerly Head Assistant.

† Returned for alteration and will be submitted shortly.—

Assistant of this province and so thoroughly acquainted with the usages of the District.—

51 My Assistant, Mr. J. W. Reid, has afforded me every assistance that lay in his power, has an aptitude for business and takes an interest in the duties he is called upon to perform.—

52 In conclusion it affords me much pleasure to speak favorably of my Head Sheristadar. V. Streenevasarow. he continues to sustain the high Character he has obtained during his long services in mysore Bombay Territories and while Head Sheristadar of Guntoor. With great intelligence and abilities he has assisted me in the reduction of the assessment upon waste as far as they have been sanctioned.

53 Kristna Row the Naib Sheristadar an old servant in this district has performed the duties to my satisfaction.—

Cuddapah Collectors Office, 27th. October 1857.

/Signed/ M. Murray
Collector

Amount of Taffrie on Enam lands which is disputed, as being against Mamool, and Enam lands left Bunjur as being unfit for Cultivation.

Amount of Cuttoogottah Rayaty which was attached on the death of the late incumbent but which has been continued to his heirs -

Amount of assessment erroneously charged on Porumpoke lands on which the Ryots stacked their straw -

Collector.

Statement.

No. 103

To

H. Murray Esqre

Collector of Cuddapah

Sir,

I have the honor to submit herewith the annual Jummabundy report for Fusly 1266.

Where the Settlement was made

II The Settlement of the Doorpand Saloot was made at Markapore by my predecessor Mr. Wedderburn I assumed charge of the Sub Division on the 30th march 1857 and made the Settlement of the Budwail and Cumbum Saloot's at their respective Cusbahs - The Settlement occupied from 3rd December 1856 till 15th January 1857 and from 1st April till 15th June 1857 -

Residence of the Sub Collr

III Mr. Wedderburn the late Sub Collector resided in the Sub Division from the Commencement of the Fusly up to 1st February 1857. From the 30th March 1857 the date on which I assumed charge to the 9th April I remained at Cuddapah from 10th to 20th April at Budwail and the remainder of the Fusly at Cumbum -

Season

IV The Season was more favorable in all respects during the Fusly under review

review than the preceding one as Rain fell abundantly in the Cumbum Talook in the months of May June and July 1866 in the Budwail Talook in August and September and in the Doopaud Talook in October The November rains were sufficient for all crops in all three Talooks with the exception of the wet crops in the Villages of Poreamillah and Cherlopully in the Budwail Talook and of Reddy Cherlah and a few neighbouring Villages in the Cumbum Talook and of the later dry crops viz^{t} Green Red Horse Bengalgram and wheat in some localities most of the Tanks received a full supply of water The average produce of the crops same in dry wet and Garden lands was as marginally noted the Cause of the averge produce being less than in the preceding year being that the crops suffered from blight.-

Dry	1/2
Wet	3/4
Garden	7/8

Prices of grain

V. There is a fall in the price of grain is owing to increased Cultivation and decreased exportation.

Cultivation and Settlement Vide, Enclosure A in Statement No 3

VI The increase of Rupees 19980 in the Beriz above the preceding fusly is owing to the increased cultivation consequent on the favorable season and also to the cultivation which has taken place in lands which had been long left waste in consequence of excessive assessment after the assessment had been reduced in accordance with the Orders of Government

Enclosure B in Statement No 3

VII The extent of land newly taken up by the ryots amounts to 18671 acres assessed at Rupees 8-2084 including Seerwajasty and Swalyausty while 22038 acres assessed at Rupees 30463 have been deducted from the ryots holdings on account of death desertion and poverty and relinquishments of lands rendered unprofitable by inundation - The decrease in the extent as compared with the assessment between the lands taken up and relinquished is attributable to the average assessment of the lands taken up being higher than that of those relinquished.-

2. The decrease of acres 9291 assessed at Rupees 7705 under the head of whole

"whole numbers waste is owing to two Causes 1st The exclusion from the Dittum of many whole numbers of waste 2d The extension of cultiv-ation during the fusly under rev-iew owing to the favorable Season-

3. The increase of acres 304 as-sessed at Rupees 773 under the head of "Shamilat Runjor remitted" and the decrease of acres 5692 assessed at Rupees 1933 under the head of waste Charged" are attributable to portions of many whole numbers which were left waste in the preceding year having been cultivated in the year under review.-

Remissions vide statement No 4.- VIII The explanation given in section 3 of the foregoing para also accounts for the increase of remission viz to 773 Rupees under the head of Shamilat Runjor or portions of feilds left waste.

Lands flooded 7 An increase of Rupees 60 ap-pears under the head of Paumiboo-dity or lands flooded" in consequence of lands cultivated in the beds of banks having been flooded by the water re-ceived in the Month of November The

Shavy or withered crops 3. The increase of Rupees 511 on account of remission granted for withered crops and Seed destroyed was caused by the 2d Crop of Indigo under some Tanks having suffered from blight.-

Cowle 4.- The increased extent of waste land taken up on cowle during this year accounts for the increased remission of Rupees 52 which appears under this head.-

Tarum commee or reduction of assessment 5. The increase of Rupees 1918 under the head of "Tarumcommee or reduction of assessment" was caused by a considerable extent of highly assessed land which has been waste for many years having been taken up by the ryots after their assessment had been reduced in accordance with the Orders of Government.-

Pymaesh Cummee 6. It having been brought to notice that many numbers of lands had been fraudulently entered by the Curnums of Cusbah Cumbums under the head of "Pymaesh Cummees" these lands were measured during the Fusly under review and remissions granted

granted to those which were found to be entitled to it and the remainder charged with the full assessment A decrease of Rupees 265 below the preceding fusly has thus occurred under this head.—

Guddaheeroo

7 The decrease of Rupees 52 under this head is in consequence of the wet lands in the villages of Poremalah and Shenkhavarum in the Budwail Taluck not having been Cultivated with a 2 Crop from want of water.—

Mucktha Cowle

8 The Mucktha Cowle land of one G. Veeriah late Curnum of Cuttabah Cumleum having been sold by auction in Satisfaction of the decision passed against him under the provisions of Regulation IX of 1822 and transferred to the head of usual or 1/4th remission a decrease of Rupees 32 has thus been occasioned in this item.—

9. The increase in the remissions granted under the heads 6-7-8 11—12—13—17—18 and 19 as shewn in statement No 4. is in consequence of the increased extent of Cultivation as

as compared with the preceding Fusly.

IX/ The increased extent of cultivation is the cause of the increase under the head of Enamaty jodee Enamaty Suffrich and Enamaty Seerwajastiy.—

2 An increased exportation of Teak wood to Bellary and other western Districts has occasioned an increase of Rupees 103 in the tax levied on that wood.—

Vide Statement No 8

X The decrease of Rupees 277 under the head of "Moturpha" is attributable to the death emigration and poverty of certain ryots and the increase of Rupees 142 under the head of Sheep &c was discovered on examination The net decrease under this head is therefore Rupees 135.—

Extra Revenue vide statement No 9

XI. The increase of Rupees 235 under the head of "Gifted and Benaras Enam" is owing to certain Dasvendum Lands having been attached on account of the failure of the Dasvendums to keep their irrigation works in proper repair and to an extended Cultivation of Ruined Pagoda Enams.—

2 The decrease of Rupees 85 under the head of Suspended Enams

has

has been caused by the entry in the Circar ayacut of the Dranis of certain Village Servants who died without heirs.-

3. A large number of tanks and channels having been repaired during the current Fusly by Government an increase of Rupees 547 appears under the head of "Maramut Suffrick" for Crandars quota of repairs.-

Concealed Cultivation

4. The increase of Rupees 439 under this head is in consequence of a large amount of concealed cultivation having been discovered chiefly in Cusbah Cumlums.-

5 The cause of the decrease of Rupees 9 under the head of Excess Collections is that in the preceding year the amount of "Land Revenue Collected above the demand was Rupees 19 while in the present fusly it only amounted to Rupees 10.

Revenue Fines

6. The increase of Rupees 655 under this head has been caused by the fines imposed on the Curnums of Cusbah Cumlums &c under the provisions of Regulation IX of 1822.

The

Excess Collections

7. The cause of the decrease of Rupees 27 under this head is that in the preceding year the amount of "Moturpha" "Collected was Rupees 41 while in the present fusly it only amounted to Rupees 14.-

8. The cause of the decrease of Rs 78 under the head of "Interest" in the Current Fusly is that it was not found necessary to take coercive measures for the collection of their Kists from the ryots in so many cases as in the preceding year.-

Demand Collection and Balance vide statement No 11

XII Out of the balance of Rupees 12097 explanation of the amount of Rs 663 is given in the margin and instructions have been issued with regard to the remainder viz Rupees 11434 either to collect the amount or in default of payment to attach the property of the defaulters Further enquiry will be made at the time of the Jummabundy and the result

* Jodee &c to be collected when an appeal to the Collector is disposed of Rs	36

No. 28.

To,

G. S. Forbes Esqr.

Secretary to the Board of Revenue

Fort St. George.

B.R. No. 718.

From the Asst. Collector of Tanjore ...

Recommending remission of the demand on waste and unproductive land under the circumstances stated.

Sir,

Para 1. The difficulties of season which appear to be felt through Southern India, have not, I am sorry to state left Tanjore untouched and with reference to these, I have now the honor to address the Board. My reluctance to do so is the greater that only a brief period has elapsed since the principles of the settlement were affected by the indulgent measures of my predecessor Mr. Cherry, two years prior to which, also, as your Board will recollect, certain special concessions had been granted on under the urgent requisition of the Collector, Mr. H. Forbes.

2. Whatever the extent of my desire to abstain from adopting arrangements that will tend still further to unsettle the Meerassidars belief in the permanent character of the conditions of an Colongo system

it

it would not consist with my duty to let matters take their course when the future interests of Governors and governed are certain to suffer detriment from following the beaten track. I have therefore resolved to lay a statement of the prospects of the season before the Board and seek their sanction for certain remedial and preventive steps which seem to me of undoubted necessity.

3. The North East Monsoon which as the Board are aware materially contributes to the success of the main harvest of the district has proved deficient. It set in with fair enough promise, but the rain that fell was untimely in many respects. It commenced in October, but instead of extending as we generally expect, far into December, it ceased after the 20th November.

4. In December, it is true, we were not wholly deprived of rain but what fell was partial and unimportant in quantity and did not assist the full formation of the ears of the Simba Pashanum Crops which constitute above 4/5th of the entire Cultivation of the District. Had it not been for this unfortunate deficiency of rain, the hops originally and justifiably entertained

entertained of a satisfactory and productive harvest would have been fully realized.

5. I am not enabled to report favorably of the earlier periods of the season. The South West Monsoon commenced well and early as did also agricultural operations; but in July and August a deficiency of rain was felt and in September which, as the interval between the two Monsoons, is always a critical time a total want of rain proved particularly trying to the standing Crops.

6 The floods which followed in October simultaneously with the first out burst of the N.E. Monsoon proved no less injurious. So that although the actual quantity of rain which fell in the course of the year has not been very much below the average of the Province its distribution over the usual period has been so unequal as to have created alternate suffering from drought and superabundance.

7 Under these circumstances then, out of a Nunjah Dittum for the year of 10,07,788 Vaylies the extent cultivated amounts to only 10,1594 Vaylies.

The

Fort St. George 13th February 1858.

The area left waste is thus nearly 6,000 Vaylies, whereas in that disastrous year Fasly 1263 / A.D. 1853/54. owing to the earlier part of the season having been more suited to cultivation, 1,039 93 Valies were brought under the plough out of 1,07,233 which had been taken up. There were consequently left waste only 3,300 Vaylies or not much in excess of half that of the current Fasly.

8. In the same manner I regret to add, a very large proportion of the Poonjah and Baghoyet lands has been left uncultivated during the present year. The season throughout has been peculiarly unfavorable for dry crop husbandry and from the beginning the Cadasumbum tracts of the Collectorate, have fared badly.

Poonjah and Bagayet.

	Fasly 1263	Fasly 1264
Dittum	35,087	33,552
Cultivation	22,693	17,932
Remaining Waste	12,394 or 35%	15,620 or 45%

9. On reference to the Season reports for August and September your Board will observe that the early Poonjah Cultivation of which Cumboo is the principal product, was a failure for which no compensation was found in the outturn of the dry grains sown in

Fort St. George 13th February 1858

in the latter half of the Fasly as these likewise have very extensively perished.

10. The irregularities of the former period of the season would have been of no material consequence had not its ultimate failure impaired the success of the Main harvest. The apprehensions of short produce and consequent scarcity which now prevail in every direction have contributed to raise the price of all kinds of provisions and the extensive purchases of paddy made by traders from the neighbouring Districts of Trichinopoly, Salem, and Madura keep them on the rise. They are now not less than 60 per cent in advance of the Standard or 26 3/4 per Cent above those which ruled in Fasly 1263. The distress among the poorer classes which consequently prevails is general and severe, and it appears to me to be not unlikely that it is somewhat enhanced by the withdrawal from circulation of the large sum which in the time of the late Rajah found its way monthly into the hands of

		Rs.	C.
Standard		3	3
Current price according to returns received up to 20th January		4	30½
	Increase	1	27½
	or		60%

64	Do	4	30¼
	Increase	1	1½
	or		26 3/4%

of persons who have relatives and connections in all parts of the District.—

11 Fusly 1263. as the Board will remember was rendered an exceptional year by the early cessation of the North East Monsoon. The rains on that Fusly not only intermitted on the 14th November, but their intermission was unbroken throughout December. In the present year the Monsoon continued some what late in November and December was not without its falls of rain, for a few scanty and desultory showers were received. However slight and insufficient they proved useful to the crops on the Critical condition in which they were then found and it is expected that the present season will be attended by a less extensive failure of the harvest. Moreover, Fusly 1263 felt the disadvantage of having been preceded by the destructive storm of March 1855 and the great losses which that event had occasioned.—

12 Whilst then the comprehensive and important measures of relief then adopted are not now

now required some departure from the ordinary rules of the settlement seem to me to be necessary to meet the difficulties of the season.

13 The enquiries which I have made and my own observation induce me to believe that the Sumba Peshanum harvest is not likely to yield more than 1/2 or 3/4 of an average Crop. However under the high prices which now prevail there is little or no doubt that unless the outturn falls so far short of the standard as to entail positive loss on the owner the Meerassidars will reap on their own account. Still, there will be numerous cases in which taking advantage of the rules of the Dobongoo System, the harvest will be thrown on the hands of the Government officials for a division of the Crop and applications for that mode of adjusting the year's demand are now being daily received both by post and presentation in person. If a remedy be not at once applied, the Government and the

Meerasidars

Meerasidars will suffer certain loss by the postponement of the harvesting into the Months of April and May. The evils of such a contingency and result have been so forcibly represented in Mr. Forbes's report of date the 20th February, 1857 that their further discussion by me would be out of place But as was done in that year, so also I am of opinion that now it will be most conducive to the interests of Government and Meerasidars in Ooloongoo and Grass rented Villages to create the utmost possible inducement for cutting the crops by a remission of the demand on waste and unproductive land and accordingly I beg to solicit permission from the Board to adopt that course of proceeding.

14. Although indulgence on account of the latter failure may not be very large in amount this year, the extent of waste in the current Fusly, as has already been shown, is not much less than twice that of Fusly 1263 The Tarum settled Villages have not only

enjoyed

enjoyed all the advantages of the present high prices, but the conditions of the settlement made with them, admit of the deduction of waste and the remission of assessment on Shavee. Further the recent orders of Government by which the Minimum of produce entitling the Meerasidars in Villages of those classes to remission is raised from 10 to 20 Cullums, place them in possession of such additional advantages as being strongly into contrast the less favorable position of the Ooloongoo Meerasidars.

11th July 1857.

15. I have to submit also that a special measure of relief seems imperatively to be called for in the Cadarumbuin parts of the District. In these the Meerassidars who are poor and needy hold but small estate. Their lands are wholly dependent on the falling rains. Great and general distress is prevalent amongst them consequent on the prices ruling which have already reached a famine height. In most Villages the early Pungah Crops were a total failure and wherever any

return

return at all was realized, it is known to have been but scanty. Looking forward to a better state of things and a less disheartening result in the later half of the year, the Meerassidors of these tracts generally did not seek to obtain any remission for the failure of their early crops and in great part they have duly discharged their November and December Kists. Their hope of securing reimbursement for the out-turn of the later crops has however been disappointed for these are a complete failure and they are I fear, without the means of meeting the January Kist unless measures of coercion be indiscreetly adopted and the result of these even so far as realizing the demand made on them, would I apprehend be unsuccessful. They will be equally incapable of meeting the Government demand on account of future Kists.

16. In one division alone the Trivady Talook

Talook it has been ascertained that although 3278 Vaylies of dry land were sown with the later Poonjah grains, the Crops have entirely perished, yeilding actually nothing on 1346 Vaylies or 41 per cent of the entire breadth so occupied. Judging from present appearances the remainder is not likely, I consider to produce more than the most scanty return, which in most instances will probably be insufficient to repay the Cultivator the Costs of Cultivation.

17. Under these outward circumstances some special remission seems to be justly and indispensably called for as an unusual measure and I therefore beg authority to relinquish the Government demand on all the Poonjah Shares of the later crops, it being impossible at the present time to ascertain the exact extent of the loss that was sustained in the earlier part of

Gummabundy Report for Fuslies 1263 & 64 Paras 23 & 19.

of the year. The Board are aware that in Fuslies 1263 and 1264 the demand on unproductive Poonjah was suspended.

18. The grant of permission to deduct waste and Nuttoopaul (unproductive land) in the Oolungoo and grass rented villages on the understanding that the Meerassidars shall reap the produce on the remaining lands and the remission of the public dues on dry Shavee in the Cadarumbum Villages, as I have now permitted myself to suggest, seem to me to be the only remedial measures which are at present needed. I trust that I shall not be under the further necessity of hereafter seeking further relief when the harvest has been closed and the Gummabundy price of the year has been fixed.

Tanjore 10th February 1858.

No. 47

To
G. T. Forbes Esqre
Secretary to the
Board of Revenue
Fort St. George

B. No. 583
From the Collector of Tinnevelly.

Sir

I have the honor to forward translations of Plaints in original suits No. 20 and 21 of 1857 on the file of the Principal Sudr Ameens Court in Tinnevelly preferred respectively by Maramuttu reddy and Mullupa reddy of Soobramoneyapooram in the Ettapedarum Talook against myself, Head Sherishtedar and some others of the revenue Officers in our official capacity as well as against the Shareholders of the above Village

2. The defendants from No. 10 being the proprietors of the lands referred to in the Plaints receive Puttahs for the same and pay Peishcush to Government while the Plaintiffs in the other suits are two of their under tenants. The above defendants applied to me for permission to sell by auction the property of the Plaintiffs and of other ryots which they (the Defendants) had attached under the authority vested in them by Regulation

Regulation XXVIII of 1802 from the realization of the rent due to them. The under tenants presented a petition requesting that no orders should be given for the sale of their property.

3 A summary enquiry instituted on the subject agreeably to clause fourth section IV Regulation V of 1822 shewed that in 1843 the landholders and their under tenants had in consequence of a dispute between them regarding Sawmy bhogum entered into an agreement to the effect that the latter were to pay to the former a Sawmy bhogum of 2 fanams per chain of Poonjah land that an order was issued by Mr. Thomas the then Collector of the District for carrying the above arrangement into effect that subsequently the rate of Sawmy bhogum was reduced to 1½ fanam per chain by mutual agreement between the parties and that Rupees 188-4-8 were due by the under tenants to the landholders on account of Sawmy bhogum I therefore issue an order to cause the property attached to be sold in the event of the ryots not paying the said sum

sum and the sale was carried into effect. The order issued by me is positive occupying the place of an original Decree in any ordinary suit as ruled by the Court of Suder Udalut in their circular orders of the 10th December 1838 and 10th March 1853

4 If the Plaintiffs affirm that they possess any right to the lands they should sue only the Defendants who are the Proprietors in the proper Court. Instead of doing so they have erroneously included the Collector who acted according to Regulations and the native officers of Government who are subject to the Collectors orders as parties in the suits in direct contradiction of the provisions of the Circular order of the Court of Suder Udalut dated 5th November 1839.

5. Translations of the order issued by Mr. Thomas in 1843 and of the one issued by me on the 19th November 1857 are herewith forwarded for the information of the Board together with translation of a draft of an answer which I propose to file in the above suits and I request that the Board will be pleased to obtain the sanction of Government to defend the suits on account of myself and the other revenue servants

servants of Government above referred to at the public expense. The time granted by the Court for filing answers in the above suits will expire on the 9th March 1858.

6 I will here mention that of late the Principal Sudder Ameen at this station has been allowing proceedings to go on in his Court in the matter of litigious and Vexatious suits against the public Officers of Government altogether irregular and opposed to the Regulations and Circular orders by which he ought to be guided. It is unnecessary for me to tell the Board that my time and that of my Cutcherry which can ill be spared is thus needlessly wasted by these irregular proceedings and I propose to bring this subject before the Board in a separate Communication.

Tinnevelly 29th January 1858

I Signed I J. Silver Collector.

Enclosure No 1

No. 4

Translation of an Order issued to the Tahsildar of Attapedaroum Talook on the 19th November 1857 —

I have received and perused your Urzees Nos. 243 and 283 of last year, and Nos. 38, 169, 249, 256, and 283 of this year, on the subject of the dispute on the part of one Sungoovien Vakeel for the Pungallies and Merassidars of Velanthee Column Village in the above Talook, about the Pooracoodies not having paid the Samy bogum for Fusly 1265. their property should be attached, and on the part of the Poracoodies to the effect, that it has not been the practice to pay Samy bogum together with their accompaniments. It appears that the Village in question comprises 148. Pungoos or Shares; that 3 Shares pertain to Perryacoomarasamy a Pillay of Attapedaroum detachedly; that 4 pertain to the Chuttrum of Seevapooragoondum; and 11½ are assigned for the Desacavul; that deducting these 18½ Shares the remaining 129½ belong to the Pungallies; and that on account of the Samybogum due to them amounting to Rupees 188-4-8; property adequate to that Sum has been attached; that the Pungallies of 129½ Shares declare they have been

Fort St. George 13th February 1858.

been in the habit of receiving Samy bogum, and that the Pungalie of the two remainning shares Ramasamy Reddy denies the practice of receiving Samybogum. It also appears, as that you are of opinion that Ramasamy Reddy has started this objection because he and the Poorakoodies who object to pay Samy bogum are of one Caste. It is not only evident from the Huzzoor records, and from the previous orders that Samybogum has been fixed as represented by the Pungallies of the 17½ shares, but you also report in support of this. The denial on therefore on the part of the holder of the two shares cannot be accepted. Still as Ramasamy Reddy who is one of the individuals who receive Samybogum denies the practice, I have decided that so much of the property that is under attachment on account of his two shares should be exonerated, and the property under attachment on account of the remainning 17½ shares be sold on the 10th December next. You are to intimate this to the Poorakoodies by a Notice, and in event of their not discharging the arrears of Samybogum within the above date you should proceed to the Spot yourself, or depute the Moozoomdar,

Fort St. George 13th February 1858.

Moozoomdar, and sell so much of the property attached as will discharge the Samybogum due to the Pungallies of the 17½ Shares, make the proceeds over to the Pungallies, obtain and file their Receipts, and report the circumstance to the Huzzoor.—

No. 5.

Draft of an Answer proposed to be filed in Original Suit No. 20 and 21 of 1857 on the file of the Principal Sudder Ameen's Court of Tinnevelly.

The Collector submits on behalf of himself and the Defendants 2 to 9. that under the provisions of Act XVIII of 1850 he is not liable to be sued in any Civil Court for any act ordered to be done by him in good faith in the discharge of his public duty— that no more are the Defendants 2 to 9. liable so to be sued for the execution of such order that the Defendants from the 10th being the proprietors of the lands specified

Fort St. George 13th February 1858.

Specified in the Plaint: obtain Gouernment Puttahs for the same and Stand responsible to the Gouernment for the teerwah, whilst the Plaintiff is only their under tenant. that under the authority vested in them by Regulation XXVIII of 1802 they had attached the Plaintiff's personal property for arrears of rent due to them by him. and that as the Collector had ordered the sale of the property after instituting a summary enquiry agreeably to clause 4th Section IV Regulation V of 1822. Such order is positive; occupying the place of an Original Decree in any Ordinary Suit. as ruled by the Court of Sudder Udalut in their Circular orders of the 10th December 1838 and 10th March 1853. If the Plaintiff pretends to possess any right to the lands in question he should sue only the Defendants from No. 11 in the proper Court.—

On these grounds the Collector, under instructions from Government, prays the Court to dismiss the Suit with Costs.—

(Signed) J. Silver.—
Collector.—

№ 33.

To

G. L. Forbes, Esqr.
Secretary to the
Board of Revenue
Fort St. George.

Bd. № 646.
From the Ag. Collector of Madura.—

Sir,

I have already noticed in my former reports that the Season of the current Fusly has not been favorably the weather having been quite dry since the middle of October last— The result is a considerable amount of withered crops, instead of a plentiful harvest— It may be remembered that the dry crops were also generally deficient and in some parts wholly failed— Cattle suffer a great deal from want of water and pasture.—

2. On the whole the result of the year has been so adverse that the price of rice at present is 6, measures a Rupee, and that any rain during its remaining part of which there is very little prospect, will not remove the present distress.—

3. I feel myself therefore obliged to recommend

Fort St. George 13th February 1838.—

recommend with a view to induce the agricultural class to engage in cultivation, the following relief to be afforded, till the Ryots begin to experience a good Season which may probably be in August next.—

1st That Dry lands irrigated from Wells to be dug anew close to Channels or Tanks without the restriction, as to distance laid down in the new rules, or from rivers or Channels, may be exempted from extra cess.—

2d That Nunjah mail Poonjah Crops on Wet lands, raised by means of Government water may be invariably subjected to ½ on Nunjah on the Nunjah Mail Poonjah tax only.

3d That the same, receiving supply by artificial means, shall pay half of that again.

4th That the same receiving no irrigation whatever, but being dependent on rain, shall pay Poonjah tax alone.—

4. It will be observed that the above

Fort St George 13th February 1858.

above suggestions are in no way affected by the principles now recognized, except that the 1st of them causes an apparent modification in the rules which is of very little consequence in the face of the relief thereby anticipated, and in consideration of its short duration.

5. The subject of the 2d 3d and 4th approaches that discussed by the Board in their Proceedings 14th September 1854, in which they acknowledged that when water in the reservoir is not sufficient to raise a 2d Wet Crop, the Ryots may be allowed to use it as they please without being subjected to any Extra demand I beg however to observe that the course therein pointed out by the Board, to put the principle in force was not adopted for considerations connected with the peculiar circumstances of the District, which it would take long to dwell on.

From the Ag. Collector
of Canara —
herewith returned

Sir,

With reference to the Board's Endorsement dated 30th May last on Petition No 2229 of 1856, I have the honor to state for their information that the Grain therein alluded to is stated in a letter received from the Acting Collector of Malabar to have been landed at Cochin in consequence of steps of weather which is reported to have been very tempestuous about that time and to have caused several Shipwrecks, It does not appear that this Rice was re-exported by sea but the Acting Collector of Malabar seems to think it may have found its way from Cochin to Allepee by back water.

A duty of Rupees 82-11 was collected on the exportation of the above Grain at the port of Mangalore as shown in the margin.

1302 Indian Maunds of Rice at 1 Anna per Maund — 81-6
