At a Meeting - Present

Monday 1st March 1841 } John Dent Esqre Senior Member

Alexander Maclean Esqre Temporary Member

Walter Elliot Esqre Third Member.

Absent on leave

Minutes of the last Meeting read and approved.

Read the following Extract.

Extract from the Minutes of Consultation dated 15th February 1841.

Read the following letter

To H. Chamier Esqre

Chief Secretary to the Govt of Fort St. George

(2) From the Chief Sect. to Govt Transmitting Copy of a letter from the Govt of India confirming the sanction given for the temporary employment of Mr Smith as Sub Conservator of Forests in this District on a

Sir,

3 I am directed to acknowledge the receipt of your two letters dated respectively the 28th August last and 5th Instant, the latter with enclosures on the subject of Teak Forests.

2 The Right Honorable the Governor General in Council is pleased to

a salary of 150 per mensem.

to confirm the sanction given by the Government of Fort St. George for the temporary employment of Mr Smith as Sub Conservator of Forests in Malabar on a Salary of Rupees 150 per Mensem.

3. With reference to the observation in the 3d paragraph of the Minutes of Consultation of the 5th Instant I am desired to explain that the words "other products" used in my letter No 267 dated the 18th November had reference to the 15th Para of the letter from the Acting Principal Collector at Canara to the Board of Revenue dated the 18th August 1838 a copy of which — accompanied your dispatch of the 30th of June last.

4 It is believed that a survey of the Godavery and of the Forests in its vicinity was made sometime ago and the Resident at Hydrabad will be written to, to elicit any information that may be in his Office on the subject. I have been also directed to make enquiries

Fort St. George 1st March 1841.-

enquiries thro' the Residents at Nagpore respecting the Wyne Gunga the feeder of the Godavery at Kamptee.-

5th. Mr. Palmer's and Captain Fennwick's letters respecting the Teak Forests in the vicinity of the Godavery having been returned to Madras from the Military Department, the Governor General in Council has been prevented perusing those papers in connection with the reports under acknowledgment.-

(Received 25th January 1841 No 23)

4

From the Chief Sect. to Government

The Right Honorable the Governor in Council observes that the services of the German Missionary who lately offered to educate the Todavars were not declined on the sole ground of his being a Clergyman, as supposed by Mr. Conolly, and that he will be ready to receive any definite proposition which that

Fort St. George 1st March 1841

that Officer or the Board of Revenue may be able to make upon the subject but that he entertains no great hope of inducing a person to undertake such a duty for the mere sake of the Salary which may be given, or the success of the experiments if tried.-

To the President & Members of the Board of Revenue

/A true Extract/
/Signed/ H Chamier
Chief Secretary.

Order thereon.-

Ordered that transcripts of the foregoing Extract from the Minutes of Consultation with a copy of the letter to the Chief Secretary to Government on which it is founded be furnished to the Collector of Malabar for any proposition he may wish to offer thereon with reference to his letter of the 9th December last.-

To the Secretary to the
Board of Revenue
Fort St. George

Sir,

(6)

From the Collr Rajahmundry. Original Cons No 974 of 1840 and Bd No 150 of 1840.-

I have the honor to submit my report on the accompanying Petition of certain

Fort St. George 1st March 1841.-

certain Renters of the Village of Mamede-coodooroo in the Nagaram Talook of this District.-

2.- The Original assets of this Village are Rupees 1655-8-.- and the Permanent Settlement Rupees 1127-10-4 with reference to which, the actual engagements of the Petitioners were made as follows.-

Fusly 1247	----------	1300-.-.-
-.-.- 1248	----------	1425-.-.-
-.-.- 1249	----------	1425-.-.-
-.-.- 1250	----------	1425-.-.-
-.-.- 1251	----------	1425-.-.-

which have been fulfilled correctly up to this moment; the present balance to the end of the current fusly being only Rupees 565-4-

3.- Under these circumstances Petitioners are certainly entitled to every fair indulgent consideration but I am averse to the breaking through of engagements if it can possibly be avoided; not only on the ground that if the result of such engagements prove ever so unfavorable to Government faith exchanged cannot be violated but because the belief in the possibility of

Fort St. George 1st March 1841.-

of their being allowed to break their engagement & induced many to direct their efforts to avoid rather than to fulfil them.

(14)

Sir,

From the Coll.r of Madura

As directed by the circular order of the 24th April 1824 I have the honor to forward copy of a suit filed against me in my official capacity in No. 432 of 1840 for recovery of Rupees 42 14-11 unjustly collected on certain trees and for future enjoyment of the same trees free of tax. On my return to Madura I shall have the honor of submitting draft of answer, and hope to obtain permission to defend the Suit at the expense of the Affects of the Shevagunga Estate in which has arisen the ground of Action.

To

The Secretary to the

Board of Revenue

Fort St. George

(15)

Sir,

From the Pr. Coll.r of Madura submitting draft of answer in Suit No. 432 of 1840 for consideration of the Board of Revenue and for sanction to defend it at the charge of the Shevagunga Zemindary.

Para 1 In reference to my letter of the 3d Instant I beg leave to submit the following draft of answer to Suit No. 432 of 1840 on the file of the Zillah Court, and beg permission to be allowed to defend it at the charge of the Shevagunga Zemindary.

Plaintiff sues for enjoyment of tax of certain trees growing on a piece of land granted in Inamium to Nutted Sahibs mosque in Oomayandapooram Talook of Amdotty in Shevagunga of which he pretends to have acquired the right by purchase in the years Jaya and Doormookee or in 1835 and 1836 and for the recovery of Rupees 42-14-11 the Amount of the annual tax from that period.

By the Istimrar accounts of fusly 1214 2 bullk of seed land in the Villoge of

of Coonayandapooram was alienated to Nuttut Sahibs mosque on payment of an annual quit rent of 12¼ double fanams (Rs 1 a 14 p 6)- and to this amount even Plaintiff can have no claim because any purchase or acquisition made of it by him in 1835 and 36 is clearly null and void under the provisions of Regulation VII of 1817.

Plaintiff pretends that the Fagueers in whose charge the Mosque was, procured the consent of the then Zemindar, Gowry Vullabha Paria Odia Thaver, to be satisfied with the tax of 2 out of 5 kullums of seed land and in commutation of the land tax on the other 3 kullr of seed land the tree tax only was to be levied and such he says was long the practise, which continued even two years after he acquired the land. He further states that on the 11th December 1837 he obtained the Ese Zemindars written consent to remission in full of the tree tax on payment of the land tax on the whole 5 kullums of seed land. Now as the Zemendary was assumed by the

the 1st Defendant the Collector on the 9th May 1837 the latter part of the claim is on Plaintiffs own shewing void of grounds, because no act of the Ese Zemindar could have effect after the assumption and in addition the Sudr Udalut ruled under date the 5th March 1838 that no validity could be acknowledged to alienations made by the Ese Zemindar.

The amount of tree tax was not incorporated with the Ain revenues by Gowry Vullabha Paria Odia Thaver, as stated by the Plaintiff nor has it now been newly brought to that head by the 1st Defendant since the assumption but has been so entered in the accounts ever since fusly 1211.

Till the points to be proved

2. are given by the Judge it is needless to submit the titles of the documents or names of witnesses by whom I propose to substantiate the answer.

It may be proper to mention

3 here for the Board's information that till furnished with a copy of the plaint in question I was not

aware

aware that the holder of the Inamium land paid a tasc upon them other than the quit rent of 12¼ fs.—
He seems to have designedly kept this from my observation in order to give a color to his com=plaint and I only now learn the particulars on the enguiry of the Devastanom Tasildar who was till now as uninformed on the subject as myself.—
An order will be issued to repay to the Plaintiff the over collection; and as soon as the case is disposed of in the Zillah Court I purpose taking steps to restore the 2 Cullms of seed land /Inamium/ to the purpose for which it was originally granted
e.e. to recover it from the Hindu and restore it to the Mussulman.—

Madura
2nd February 1841

/Signed/ J. Blackburne
Princ! Collector.

Translate of a Plaint to the Judge in the Udalut Court of the Zillah of Madura.—

Plaintiff. Versus Defendants.

Pareauen Chetty aged 72, son of Nullalaghen Chetty of Silthattoor-nyel in Goottaganad Talook in the Zemindary of Ramanad Merchant.—

1. Mr Blackburne Princ! Coll! of Madura
2. Pariacurpen Ambalagaren Son of Chinnanen Ambalagaren/ An Ambalagar and Cultivator of Ambacoody in Sakai Talook in the Zemindary of Shevagungapa
3. Moorogapa Pillay Son of Nootroocurpa Pillay Curnum of the same Village.—

For recovery of Rupees 42-14-11 levied as

tree

tree tasc and for the enjoyment of the said tasc of Oomayandypooram Village consisting of 5 Cullums Seed land containing various kinds of trees yield=ing annually Rs 10 — 11 — 8 — 75 (a p c) situated within the boundaries below described. The claim is founded on a deed of Sale and Receipt.—

1st On the 28th Arpasee year Munmada 66 years ago Mohammed Khan Sahib bestowed upon Nutted Levay exempt from assessment for the first year and tasced at 1 fanam per Cullum for the second and 3 fanams for the third and 6 fanams for the fourth year, the Village Oomayandy pooram consisting of 5 Cullums of seed Land situated East of the Neerpoody or land within the water mark of Ambacoody Cummoy North of Thittahapooram and the above mentioned Neerpoody west of the Inamul cullay Reedapooramboo of Mootooveeroo Ambalum and a Palay tree and Market road or bye path south of the Neerpoodies of Pettha=naindel and Vagadeeyaendel in Vadapavaghee Praganam in the Talook of Sakai & in virtue of the Purvana Grant passed to him on the date abovementioned, the said Nutted Levay

and

and his son Mahommed Meera Levay enjoyed the land and trees till the year Survajitto paying the stipulated tase.—

2d In the year Survadaree, date of month and month forgotten Mahommed Meera Levay represented to Goury Vullaba Parea Odyah Taver, then Zemindar of Shevagunga his inability to pay the assessment at the rate established in consequence of the land being over run with bushes, and there upon failure of cultivation when the Zemindar exempted 3 bullums of Land from tase, but in order to reimburse himself for that amount he incorporated the trees on the whole 5 bullums with the ain cultivation of Ambacaody and allowed the said Mahommed Meera Levay to pay assessment on 2 bullums only, who accordingly enjoyed from the year abovementioned to Saya the whole 5 bullums of Land.—

3d Afterwards unable to pay the assessment on the 2 bullums of land also from failure of cultivation the said Mahommed Meerah Levay sold to me on account of an idol consecrated by my ancestors as Valaroleevoonaigen in Saikavoyel the Poojah

ceremonies of which had been maintained from their own funds, half of the said Village Doonay-candy poorain for 100 Gopauly Chuckrums and giving me a receipt for the amount made over enjoyment of the lands to me and on the 5th Arpasay of Doormooky he sold me the remaining half of the Village for 110 Gopauly Chuckrums, and transferred to me the original Purvana and Ologhoo &c Accounts of the Village passing at the same time with reference to his former deed of sale a receipt for the purchase money.

The arrangement made by the Zemindar continued during the years Munmada and Doormookye

4th On the 25th March 1837 corresponding with the year Yuvvelumbee agreeably to the Purvana and precedent of enjoyment till Survajittoo by Mahommud Meera Levay I petitioned the present Zemindar Rajah Mootoovezia Ragoonada Bodogooroosawmy Paria Odaya Taver to be allowed to pay 6 double fanams ₱ bullom for the whole 5 bullums and that the arrangement made because of the exemption

exemption of assessment on the 3 Cullums might be annulled and the trees restored to me accordingly on his order the Ameen of Sackai Talook instituted an enquiry of the Curnums Vinbalagars and Ryots and of my documents and sent his report to the Zemindar on the 21st April accompanied by the depositions given on the 16th of the same Month by the 2d and 3d Defendants, and in eight Months before any order was received in answer, all the Ayn lands in the Zemindary were assumed on behalf of the Government by the 1st Defendant. As however the Davastanums, Chattrums and Durmasanums remained under the Management of the Zemindar he on the Ameens report and its accompaniment and taking into consideration the precedents of enjoyment sent an order on the 11th December of the same year (1837) to Ramier the Davastanum Tasildar annulling the arrangement about the assessment and directing that according to Custom the land be transferred as attached to Oomayandy poorum and I permitted to enjoy them free of tree but paying full land tax and

the Zemindar issued another order to the same effect to the 2d and 3d Defendants on the 12th December or 29th Kartigay of Yuvvelumbee from which to the present period being 4 years I have held possession paying full Assessment of 6 double fanams per Cullum of seed land for which I have receipts.

5th I presented on the 14th December 1837 a Petition to the 1st Defendant who had assumed the ain lands of the Zemindary praying to be put in possession of the trees and to be exempted from paying Tree tax agreeably to the Zemindars order which he endorsed on the 7th January 1838 "that on the report of the Ameen to effect that the trees had been included in Ain and the tax collected for 10 years, I must continue to pay it as usual;" on this I presented a more explanatory Petition to the said Defendant on the 9th of July following which he endorsed on the 18th of the same Month that as the trees had all along been included with the Ain of Ambacody and the tax collected they could not be restored to me.

6th On the 14th August following

I

I addressed a Petition in English to the Board of Revenue shewing the particulars of the above 2 endorsements and praying the trees might be restored to me excempt from tree tax but they passed an endorsement on the 1st October that they were not inclined to reverse the order passed in the matter by the 1st Defendant. On this I addressed the Government a Petition in English on the 26th of December requesting reversal of the Board's order in endorsement to which dated 15th January 1839 I was ordered to explain the grounds for such reversal. I accordingly petitioned the Government again in the same language on the 2d April 1840. in endorsement whereto dated the 1st of May I was referred to the one they had already passed.

7th The 2d and 3d Defendants the Ambalagar and Curnum of Ambacoody gave depositions when by order of the Zemindar they were examined by the Ameen that the trees did not belong to the limits of Ambacoody, but to the boundaries described for Oomayandy poorom and that in consequence of the exemption of Assessment on 3

Colluns

Colluns of the land, the Trees were by order of the former Zemindar merely to make up for the loss of Assessment incorporated with the Aim of Ambocoody. By the two orders of the present Zemindar I am allowed to enjoy the Trees without paying tax and the Government have no right to the profits and Loss of a Zemindary paying a fixed Kist.

8th No Regulation provides that for the 5 Colluns of Land, assessment should be levied agreeably to its Purvana and another tax upon the trees thereon by which means the tax is doubled contrary to the Purvana and the two orders of the Zemindar nor does this action come under the provisions of Regulations IV and VI of 1831. The Court should therefore entertain and decide this as in the instance of all other suits under the provisions of Section VIII of the Regulation last quoted.

9th The 2d and 3d Defendants have from 1837 to the present time, by order of the 1st Defendant (on which account

I

Fort St. George 1st. March 1841.

I have included him in this suit / exacted Tax on the Trees on the 5 Cullums of land at 6 Chuckrums and 9 double Fanams per Annum contrary to the Zemindar's orders and to the Purvana and as the exaction amounts for the 4 years to Chuckrums 27 and Fanams 6 or Rupees 42 — 14 — 11, I pray this amount may be recovered for me and the tree tax — amounting to Rupees 10 — 11 — 8 — 75 per Annum be remitted to me agreeably to the deed of Sale and receipts.

(19)

To the Chief Sect.y to Government.-
Submitting with Pa.a 1.

To The Chief Secretary to
Government.

Sir,

I am directed by the Board

Fort St. George 1st March 1841.-

reference to the letters of Govt. of the 27th Octr. last letters from the Collrs of Madras and Chingleput respectively furnishing information called for on certain points connected with the Abkarry system at present in force in the Cantonment at St. Thomas Mount and stating that the Bd. are of opinion that with a proper understanding existing between the Collr. of Madras and the officer Commanding at the Mount, the rules under which the sales of arrack and toddy are at present conducted are adequate to remedy the evils complained of.-

Letters 27 Octr. 1840

Board of Revenue to acknowledge the receipt of a copy of a letter to your address from the Registrar of the Foujdaree Adawlut, bearing dated the 17th October last, with the orders of Government thereon, dated the 27th of the same Month, whereby a report is called for, thro' the Collector of Chingleput, upon certain points connected with the Abkaree System at present in force in the Cantonment at St. Thomas's Mount.-

2. The points upon wich information appeared to be required by Government were 1st certain alleged defects in the Management of the Abkaree farm at the Mount, and 2d a proposition made by the Military Authorities there, for an extension of Magisterial powers with a view to remedy the abuses complained of, and as the controul of the Abkaree farm is vested in the Collector of Madras, it was considered necessary to refer the Matter for his report also.-

3. The accompanying letters from

Fort St. George 1st March 1841.-

From Madras 15th Jan. para 4. 5th Febry 1841.-
From Chingleput 5th Cons. 18th Feb. 1841.-

the Collectors of Madras and Chingleput, respectively, are submitted for the information of Government.-

The Collector of Chingleput

4. for the reason above alluded to, has confined his observations to the suggested alteration in the Magisterial powers of the Superintendent of Police at the Mount, and as this subject is strictly within the province of the Foujdaree adawlut, the Board do not consider themselves called upon to offer any opinion thereon. With regard to Mr. Robertson's report on the rules under which the sales of arrack and Toddy are at present conducted, the Board can only observe that the orders under which those rules were originally framed from time to time, appear to have contemplated the strictest communication between the Collector and the Officer Commanding at the Mount, and the concurrence of the latter in all details of any

Fort St.e George 1st.e March 1841.-

any importance.. in fact, that the sites of the Abkarree shops within the Cantonment were originally selected by the Commanding.co Officer, and that no shop can be moved from it's present locality without giving notice in writing to the Police Officer at the Mount and obtaining his approbation, and the Board conceive that with a proper understanding existing between these Officers, the rules in question are adequate to remedy the evils complained of.-

/Signed/ P. B. Smollett.
Secretary.

Read the following letter and Statement.-

To The Secretary to the
Board of Revenue
Fort St.e George.

(20)

From the Coll.r of Madras.

Sir,

With reference to the Correspondence

Fort St.e George 1st.e March 1841.-

Fo.B.e 15th April 1840
From.a 11th June.

noted in the margin, I have the honor to observe that, whilst the Estimate of the Expense for inclosing the Hindoo Burial Ground at Triplicane amounted to Rupees 2,821-4-0, the actual charges exhibited in the statement forwarded with the letter from this Office under date the 15th April last were only Rupees 2,491-8-4 the difference being Rupees 396-4-4. It has since been discovered that through oversight certain other charges provided for by the Estimate were omitted to be included in that Statement, I now transmit herewith, for submission to the Board of Revenue a detailed account thereof amounting to Rupees 165-13-2. This sum was debited in the Journals for the months of March and May 1839, whereas the charges already Sanctioned Rupees 2491-8-4, were adjusted in September and October 1839, and January and March 1840, The addition of the charges referred

Enc.e A.

to

Fort St. George 1st March 1841.—

Rs. 2491-8-4
165-13-2
2657-5-6
2821-4-0
163-14-6

to above, Rupees 165-13-2. to those entered in the Statement of 15th April 1840 raises the aggregate to Rupees 2,657-5-6. which is still less than the amount of the Estimate Rupees 2,821-4-0 by Rupees 163-14-6.

2. Under the foregoing Explanation, I request that the necessary sanction may be procured for the disbursement specified in the present statement, Rupees 165-13-2.

Madras, 3d February 1841.

/Signed/ A. Robertson.
Collector.

Proceedings-

(20. 21)

Ordered that Copy of the foregoing letter be submitted to Government with a request that as under the circumstances stated, sanction be given for the disbursement exhibited in the statement which accompanies the Collector of Madras's Communication, amounting to Rupees 165-13-2 and which it is stated were omitted, through oversight, from the Statement of charges

Fort St. George 1st March 1841.

charges incurred for enclosing the Burial Ground at Tri: plicane previously sub: mitted.

Read the following letter No. 1. to Government.-

To The Secretary
Military Department

Sir, I have the honor by desire of His Excellency the Commander in Chief to forward for the consideration and orders of Government the enclosed communication received from the Officer Commanding the Southern Division dated the 15th Instant, recommending a change in the limits of the Cantonment of Trichinopoly under which the Arrack contracts are now contracted by the

Collector of Trichinopoly.-

Fort St. George
27th. August 1840

(Signed) W. Strahan Lt. Col.
Quarter Master General

Head Quarters Southern Division

To The Quarter Master General
of the Army

Sir,

Since assuming the command
of the Southern Division, I have had oc-
casion to remark more than once
upon the great inconvenience which
is hourly experienced from the limits
of the Cantonment of Trichinopoly oc-
not being clearly laid down, and as it
appears most desirable that it should
be better defined, I have the honor to
request you will submit for the oc-
consideration of His Excellency the
Commander in Chief the following
observations, with a view to the per-
-mission of Government being obtained
should His Excellency concur with
me in the expediency of an alteration

in

in the present boundary, which appears
originally to have been determined by
circumscribing a space of 4 Miles oc-
from a given point without reference
to the localities of the station, or oc-
circumstances which should have
regulated the disposition of a oc-
specified extent of Ground, according
to the nature of the control which was
to have been exercised by the Military
authorities, in proof of which it is
only necessary to state that the circle
embraces a large portion of the oc-
Island of Seringham including
the large Pagodas and all the subsidi-
-ary Munteepums, over which of course,
no power or control can be exercis-
-ed by the Commandant of the Gar-
-rison, and should not therefore, be
within the range of his authority
as it can only tend to create unplea-
-sant discussions between him and
the Collector, who in his Capacity of
Magistrate should have the oc-
management

management of the Abkaree throughout Co Seringham. A Village called Mailoor is also included in the given circumference although a part of it is by measure= =ment beyond the prescribed line of demarkation, rendering evident that in point of real efficiency the arrang= =ment is bad as it cannot fail to Co admit of a principle of confusion and clashing between the Civil and Military Co Authorities which must tend to perplex the best arranged and digested system, as well as the best intentions of both, and which I cannot convey a more correct and just conception of than by adverting to the Regulation VII of 1832 which cannot be rendered applic= =cable to Trichinopoly, but must be managed under particular and peculiar arrangements, nullifying in a measure the powers vested in the Superintendent of Police from the circumstance of there being

no

no Military or Camp Followers out of the Regimental Lines and small spaces appropriated for the Regimental Lines.

The principal part of the Circle lying East North East and North West of the defacto Cantonment, a Co Village is left out which should not, of the name of Shattanoor, it being to the Southward and Eastward of the Barracks, occupied by the Artillery and 1st Mx 37 Regiment, where there is a licensed arrack shop, and is Co much more within the reach of the European Soldier than any part of Seringham, and consequently affords every facility for his pro= =curing Liquor, which would have furnished just grounds for a Co protest were it not for the circum= =stance of the Collector Mr Anslow being perfectly aware of the objection to its being there and intention of abolishing it, one equally objec= =tionable is established at Alletoray

an

Fort St. George 4th. March 1841.

on the Coimbatore road, but there are on the other hand in the Commissariat range and in his Department.—

In the heart of the Cantonment and throughout the space, which is nominally considered to be the Military Cantonment, there are Houses and Ground property, a great portion of which belongs to Individuals independent of both the Civil and Military authorities, over whom consequently the Commandant can exercise no control making the Command an anomalous one and different from any other throughout the Madras Presidency. To remedy the evil as far as practicable under the existing circumstances before pointed out, which prevents a radical change, I would suggest that

Fort St. George 4th. March 1841.—

that the Cannery should be the Commissariat Boundary on the side of the Cantonment, on which it runs, this would place under the control and Management of the Collector instead of the Commissariat Department, the Places in the annexed list written in red Ink, and in lieu of it, the Commissariat control might extend further than it now does in the direction and beyond the race Course and Lines occupied by the 19th. Regiment N.I. the limits of which can be defined by the Collector in communication with the Brigadier Commanding the Station and myself.

I offer these suggestions with the concurrence of Mr. Onslow who fully enters into my views with regard to the advantages that must necessarily result from them, and under the impression that

in

in intrusting the Commissariat with the management of the Abkaree at every Military Station the object was not to make a revenue, but to prevent drunkenness amongst the Troops. This desirable end would be better obtained by the Commissariat Peons preventing Liquors being taken into the Fort, instead of their parading up and down the roads on the Island of Seringham. A glance at the Map will at once shew any person acquainted with the Localities, that it is almost impossible to prevent persons from reaching the North bank of the Coleroon in the Island of Seringham, and their getting to the South Bank so as to effect an entrance into the Fort could be easily hindered by a vigilant and careful watch and where a Guard of a few Peons would at the same time effectually prevent access to any other part of the Cantonment.

Under

Under the partial control that either the Commandant of the Station or Commissariat Officer can exercise over any part of Seringham for the reasons before stated, and also because Mr. Cuslow as the Magistrate, must from the same cause be particularly anxious that there should be no interference in the Management of the Abkaree of Seringham, it is desirable that it should be withdrawn from the limits of the Garrison.—

In conclusion I beg to state, that these suggestions are made with the knowledge and full concurrence of the Collector to whom I am indebted for information, which enables me to assure His Excellency that the interests of the Service will be promoted while the convenience to be derived by the Civil and Military Authorities will be great.—

Clerk of Wards

Fort St.n George 1st.n March 1841.

Ordered that the foregoing letter be referred for the report of the Commissary General.-

Fort St.n George, 31st.n August 1840.

(Signed) S. W. Steel 2d.n Col.n Secy. to Govt.n

No.n 2.

To the Chief Secretary of Government.

Sir,

1st.n I have the honor to acknowledge the receipt of Order of Government No.n 3293. dated 31st.n August last, forwarding for my report copy of a communication from the Major General Commanding Southern Division of the Army, recommending that the Military Abkaree limits at Trichinopoly should be changed; and in reply, I beg to submit the following observations thereon, for the consideration of the Right Honorable the Governor in Council.-

2.- The limits as now defined were fixed when General Military Bazars were first established, and the Abkaree

Fort St.n George 4th.n March 1841.

Abkaree Collections placed under the Control of this Department, as per orders of Government No.n 230. dated 14th.n June 1822.- In the Arrangement which then took place between the Collector and Major Jones, the Commissariat Officer at the Station, the Chief part of the Island of Seringham, including the more populous Parts around the Pagodas, was comprised, as being within 2 Miles, the limits prescribed for the Military Abkaree Department.- The boundary of the general Military Bazar was also marked out, but for special reasons assigned by the Collector, the Station of Trichinopoly was placed by the Orders of Government above referred to, on a totally different footing from all other General Military Bazar stations; Military Police control being confined to the general Military Bazar only, which at that station occupies

but

but a small space of about 400 yards by 100, leaving the whole of the rest of that extensive Cantonment under the jurisdiction of the Civil Magistrate.-

3.- It is now proposed in the letter under notice, to exclude the Island of Seringham from the Military & Abkaree limits, and in lieu thereof, to extend the Commissariat control of the sales of Liquor towards the South of the Cantonment, and in the direction and beyond the Race Course and Lines occupied by the 19th Regiment Native Infantry.- The reasons assigned for this change are stated to be, First- That from the limits of the Cantonment of Trichinopoly not being clearly laid down, great inconvenience is hourly experienced, and as no Military Police control over Seringham can be exercised, & it ought not to be within the

range

range of Military jurisdiction, as it only tends to create unpleasant clashings between the Civil and Military Authorities;- and secondly, the prevention of drunkenness among the Troops, the entrusting the Commissariat Department with the Abkaree at Military Station, manifesting that Revenue was considered by Government of no object, which desirable ends it is said would be better obtained by the proposed change.-

4.- For the last 18 years, during which the present Arrangement has existed I am not aware of any collisions between the Civil and Military Authorities, and more particularly as connected with the Abkaree in the Island of Seringham. But from the circumstance of the Civil Magistrate being vested with Police Authority over the whole Cantonment of

Trichinopoly

*Note. It is not so only as regards Abkaree; and this involves no Military jurisdiction or control beyond the apprehension of smugglers by the Commissariat Officer.-

Fort St. George 4th March 1841.

Trichinopoly, excepting only the small spot of ground before mentioned, on which the general Military Bazar is situated, much inconvenience may probably be experienced by the Military Authorities, but this has no necessary connection. I conceive, with the Island of Seringham, being included in the Military Abkaree limits, as the difficulties of exercising Military Police authority complained of, affect not that Island in particular, but the whole space comprised within the 4 Mile limits; for beyond the boundary of the general Military Bazar at Trichinopoly, the Commissariat Officer exercises no Police jurisdiction whatever, except for the offences of smuggling and illegally selling liquor; so the reason assigned, that from the circumstance of the Officer Commanding the garrison

Fort St. George 4th March 1841.-

not having any Police control over that part of the Island of Seringham, which is included in the Military Abkaree limits, it ought not to be within the range of his authority, would equally apply to the whole Military Abkaree limits.-

5. But be it observed that at no general Military Bazar station can the Officer Commanding the station who alone controls the Police extend the exercise of his Police Authority to the utmost verge of the Abkaree limits- Nor is it at all requisite that he should His authority is strictly confined to the Cantonment Limits as originally fixed, whereas the Abkaree Limits every where stretch considerably beyond them, and the greater their Range, the more desirable for many Reasons.-

6.- The primary intent of farming the Abkarry was doubtless for

for the prevention of drunkenness among the European Soldiery, and if the Military Authorities at Trichinopoly are of opinion that the shop at Allitory, or at any other Village belonging to the Military Abkaree, is established too near the Barracks, it is in their power to direct the Officer of this Department to cause its immediate removal, and as the Collector, it appears, has intimated his intention to remove the District shop at the Village of Shaltanoor for the same reason, there would seem to be nothing more required to complete the Check for the prevention of drunkenness among the Soldiery - The great distance of Seringham from the European Barracks (being nearly 6 Miles off) and the difficulty of gaining access to it on account of the guards posted at the Pootoor and Darkee Bridges to prevent Soldiers

From

from crossing them without a regular Pass, render that Island almost inaccessible to the European Soldiery, and such I understand is the experience of the Officers of this Department, instances of their strolling so far for liquor being almost, if not quite, unknown The reasons therefore which have been adduced for the alteration of the limits do not appear to me, to be of that conclusive nature that would be desirable in making so important a change, as it would prove to be to the interests of the Military Abkaree - A large portion of the Supply of Toddy is at present drawn from Seringham, as being considered the best in the District, and the transfer therefore of that Island to the Collector would throw it into the hands of the District Abkaree Renter, the effect of which would

be

be not only the lessening of the sales of Toddy in the licensed Military shops and the consequent loss of Revenue, but it would probably prove more than any other means the cause of drunkenness, as it would drive those who indulge in it to the District Renters shops established in all the Villages round the Military limits, where the best Toddy would then be procurable at half the price it is now sold for, at the Commissariat licensed shops, and would doubtless lead also to its being smuggled into Military limits, and to clandestine sales.-

7.- In conclusion I would observe that in the original arrange=ment between the Collector and the Officer of this Department, it cer=tainly seems singular that the Boundary line should have been made to cut through the centre of the Island, comprehending within its sweep the great Pagoda of

of Seringham, and Jumbakeistnah, with the circumjacent Bazars and Houses, instead of taking in as it ought to have done, the whole Island, as a better defined line of Boundary, yet, as it was always the desire of Government that the Abkaree limits should be as extensive as possible, and fully concurring in the advantages of this object, I would beg leave respectfully to suggest, that instead of excluding the Island from the Abkaree limits as proposed, that the whole of it should be brought under Commissariat control, as such an arrangement can make little or no difference in the District rent, there being few, if any Villages of any size in the Island beyond our Boundary line, the principal part being a mere barren waste, while the loss of the Island would conceive materially affect the Military collections which,

which, tho' not now so productive as some years ago, cannot be said to have deteriorated under the Manage-ment of this Department.-

Commissary General's Office, Madras, 26th January 1841. } (Signed) A. Tullock Lt. Col. Comm.y General.

Resolved that the above letters be referred, through the Revenue Department, for the Report of the Board of Revenue on the proposal of the Officer Commanding the Southern Division of the Army to exclude the whole of the Island of Seringham from the Military Allkaree Limits at Trichin-opoly, and the Counter proposal by the Commissary General to include that part of Island at present beyond the limits.-

(Signed) S. H. Steel, Lt. Col.
Secy to Govt.

Ordered to be communicated for the information and guidance of the Board of Revenue.-

(Signed) H. Chamier.
Chief Secretary.

Ordered that the following address be submitted in consequence.

3-4

To the Chief Secretary to Government.

To the Chief Secry to Government.

Sir,

Para 1st. I am directed by the Board of Revenue to acknowledge the receipt of an Extract from the minutes of Consultation under date the 13th February last having reference to a correspondence originally with Major General Showers Commanding the Southern Division of the Army, in which it is proposed to exclude the whole Island of Seringham from the Military Allkarry limits of Trichinopoly. Coupled with a Counter proposition of the Commissary General to include that part of the Island at present under the Control of the Revenue authorities.-

2 The Board have themselves no knowledge of the localities on which to found any satisfactory judgment but as Major General Showers is satisfied that the convenience of

of the service would be promoted by excluding the Island and Pagodas of Seringham from the Military limits, and as the Collector Mr. Onslow is stated to concur with him, there seems to them to be no objection to a compliance with that Officer's suggestion.—

Revenue Board Office,
Fort St. George, 4th March 1841. } (Signed) P. B. Smollett.

From the Chief Secry to Government.—

Transmitting Copy of a letter from the Court of Sudr Udalut and desiring the Board to furnish a full report on all the circumstances connected with the Cuzeeat of the Town Cauzee of Guntoor.

A

(No 11.)

To the Chief Secretary to
Government

Sir,

1 I am directed by the Judges of the Court of Sudr Udalut to transmit to you for the purpose of laying before the Right Honorable the Governor in Council the accompanying papers noted in the margin connected with

From the Asst Judge of Guntoor dated 18th Sept. 1839 with its enclosures.
To the Coll. of Guntoor dated 9th November 1839.
To the Coll. of Guntoor dated 9th December 1839.
From the Coll. of Guntoor dated 16th December 1840. with its enclosures.

an application of Meer Yacoob Ally, the Acting Town Cauzee of Guntoor, to be allowed the Salary and the enjoyment of the maaniums granted by the Nizam's Government for the support of the Office of Cauzee.—

2 The applicant was appointed on the death of the late incumbent by Mr Lavie in the year 1835 under the sanction of the Judges of the Provincial Court according to the Circular Order of Government dated 25th April 1828 "to "act as Cauzee of Guntoor and its "neighbouring Villages until one of "the sons of the late Cauzee shall "have became competent by age and "learning to fill the situation".—

3. It would appear from the enclosure No 1. to the letter of the Acting Collector Mr Orr to Government dated the 29th August 1827. that the Town of Guntoor then contained an estimated population of 18,889 Musulmans, and that the Cauzee enjoyed

enjoyed under the Mahomedan Government possession of 12½ Coochels of land at Chilvore, yielding at 20 Pagodas each or 1,000 Rupees. 12½ Coochels at Colocalore yielding 15 pagodas each Coochel or 750 Rupees — and 6 Coochels at Taraully yielding 15 pagodas each Coochel or Rupees 360. besides an allowance of 35 Rupees per Annum. Nuzzers Amounting to Rupees 150, and fees on Marriages &c Amounting to 464 the whole of which with the exception of the fees were, it was stated, discontinued; — but under what circumstances is not explained. It is however stated in the Petition of Meer Yacoob Ally that they were discontinued in consequence of the former Cauzee Mahomed Momen having neglected to appear at Madras when the whole of the Cauzees were summoned thither by the Government on the acquisition of the Country by the Company

4. The only emoluments of the present Acting Cauzee are the fees — These though estimated at Rupees 400 per annum must, observes Mr Goldingham in his letter of the 16th December, fluctuate; and have moreover decreased as the Population was reduced during the calamities of Twelve 1211-1213. and 1241 —

5. It will be observed that objections have been raised to the appointment of Meer Yacoob Ally by certain Mahomedan inhabitants of Guntoor, and that a Petition has been forwarded by the descendants of the late Cauzee containing charges against him. —

6. Meer Yacoob Ally is however described by Mr Orr as a man well qualified for the Office. and Mr Goldingham states that "the Petitioner "Meer Yacoob Ally appears competent to perform the duties of the Office, and adverting to the

Circumstance

"circumstance of there being no enor-
"luments attached to the Office (the
"duties of which he is performing)
"besides the usual fees and to the
"Enams in Colacolore being in the
"enjoyment of the descendants of the
"late Cauzee" Mr. Goldingham rec-
commends "that he may be confirmed
"as Cauzee with an allowance of Rupees
"35 per mensem."

7 The Court have been
struck by the difference in the state-
ment made by Mr. Goldingham
that the Enams of Colacolore is in
the enjoyment of the descendant of
the late Cauzee, and the report made
by the late Acting Collector Mr. Orr
stating it had been discontinued.

8 It is however observed
in a note appended to the Column
of remarks of the statement No. 2.
forwarded by Mr. Orr that the late Cauzee
possessed the Sageer Village of Inna-
vele and in the 16th para. of their
Proceedings of the 18th April 1831.

this Court expressed their opinion that "it
"seemed desirable that the Government
"should call upon the Collector to report
"more particularly on the Sageer
"Village of the annual value of Rupees
"1,000 which he, the Cauzee, is stated to
"hold. It is not clear from the state-
"ments forwarded by Mr. Orr, whether
"it is vacant personally to himself or to
"his family, or an Enam attached to the
"Office of Cauzee which would render
"any new disbursement by Government
"unnecessary."

9 The Court are not aware
of the result of this enquiry. But if
it should appear that the Enams
in the enjoyment of the descendants
of the late Cauzee are held in virtue
of the Office formerly filled by their
father and if among the descendants of
the late Cauzee there be a suitable person
for the Office of Cauzee the Court
of Sudr Adalut are of opinion
that upon the principle approved
by Government in the Minutes
of

of Consultation of the 9th April 1831. the Assistant Judge should be required to appoint him and to annex to him all the emoluments. but if there is none such or not likely soon to be one, the Maniam, should not in the opinion of the Sudr Adalut, be left with the family who now hold it, but if found to be Officiat should be transferred to the Petitioner who does the duty.

10 With reference to Mr. Goldingham's recommendation that an allowance of 35 Rupees per Mensem should be paid to the Petitioner the Court do not feel themselves at liberty to offer any suggestions, the Government having in their order of the 18th April 1831 stated that they were not prepared to sanction any new charges on account of the Office of Town Cauzee

Sudr Adalut Register's Office, 29th January 1841. } (Signed) H. Douglas. Register.

Resolved

Resolved that the foregoing letter and it's enclosures be transmitted to the Board of Revenue for a full report on all the circumstances connected with the Emams of the Town Cauzee of Guntoor; particularly as regards the Jaghire village of Inapegarda, and for their sentiments generally on the propositions of the Sudr Adalut.

From the Chief Secy. to Government

Para 1.

7

The Gross Revenue realized from the sale of Stamped Paper and Cadjans in Fasly 1249 amounted, inclusive of certain recoveries, to Rupees.

Rupees 4,78,817 – 6 – 11. from which the refunds and charges amounting to Rupees 52,448 – 7 – 10½ being deducted there remained a net revenue of Rupees 4,26,368 – 15 – ½. This result of the sales is not considered by his Lordship in Council altogether unfavorable, for although the amount fell short of the net revenue under the same head in Fusly 1248, in the sum of Rupees 5,365 – 12 – 10½ it was considerably in excess of the revenue realized in all the preceding years from Fusly 1216 to 1247 –

R4 4,31,734-11-4.

To the Secretary to the
Board of Revenue
Fort St George

Sir,

21

From the Collr & Agent to the Govt of Fort St George at Guntoor

Stating that he has communicated to the Zemindar of Pauttyhur the orders of Government granting him 4 years time for the liquidation of the arrears due by him and expressing his hope that this order will enhance the difficulty of the future realization of the Govt Peishcush from the Zemindars as the measure will tend strongly to confirm the prevailing belief that the Zemindary will not under any circumstances be sold for arrears of revenue—

To the Chief Secy to Govt 5th November 1840.
Extract from the Minutes of Consultation 2d January 1841
Extract from the Proceedings of the Board of Revenue 23d January 1841—

Para 1. I have the honor to acknowledge the receipt, this day of the papers noted in the margin on the subject of the realization of arrears of Peishcush from the Zemindars and Proprietors of Estates in this District for fusly 1249—

2. In obedience to the orders contained in the 2d Para of the Minutes of Consultation of Government dated the 2d ultimo, I have addressed a communication to the Zemindar of Pauttyhur, of which I beg to forward a translation for the information of the Board of Revenue

I have also issued orders for the immediate withdrawal of the segues=tration on the Zemindary and have recalled the Establishment deputed to attach it—

In

Fort St George 4th March 1841-

3. In giving effect to these orders, I hope to be pardoned in stating my fear that the indulgence which has been extended to the Zemindar of Pantyhur on the present occasion will have a very prejudicial effect and greatly enhance the difficulty of the future realization of the Government Peishcush from the Hill Tributaries in this District inasmuch as the measure will tend strongly to confirm the prevalent belief that the Hill Zemindaries will not, under any circumstances, be sold for arrears of Revenue. I take the liberty to add that the opinion expressed in my letter of the 10th October last that the default of the Pantyhur Chief in the present instance was wilful has been fully confirmed by the subsequent examination of the Zemindary Accounts, which shew that independent of Jaghires and other items which are not included, the

the collections actually realized in cash by the Zemindars Officers during the last three fasslies amounted as per margin while the Peishcush annually payable to Government is only Rupees 52,000-0-0-

4. In reference to the 3 Paras of the Minutes of Consultation I request that I may be informed if the authority to waive the demand of Interest on balances thereon conveyed, is intended to apply to arrears of fasly 1249, and whether, on the ground of the adversity of the past season, the indulgence may be extended to all of the Proprietors as well as the Hill Zemindars in this District-

A

To Balankaswarah Kurrischendaroo Jagirdar Bahadur Zemindar of Pantyhur-

(After Compliments)

Having this day received instructions

instructions from the Government and the Board of Revenue on the subject of the arrears outstanding against your Zemindary I beg to acquaint you that the Government have been pleased to grant to you the indulgence of a years time for the liquidation of the said arrears, and I have accordingly this day sent orders to the Ameen deputed to sequester the Zemindary to withdraw the attachment and have also forwarded for publication in the Fort and throughout the several Villages a Proclamation notifying the same, and requiring all Ryots Mooastuzers and others to pay their Kists to you as heretofore and to obey you in all lawfull matters.

I am further specially directed by the Government to inform you that on failure to liquidate your arrears within the period above specified your Zemindary

Zemindary will certainly be again resold.

Office of the Agent to the Governor Ganjam 11th February 1841.

(Signed) R. A Bannerman
Agent to the Governor

Proceedings thereon.

(21. 22)

The Board approve of the course pursued by the Collector and Government Agent in Ganjam in reference to the case of the Zemindar of Bauttghur. They are of opinion that the indulgence of Government in waiving the demand of interest on arrears should be applied to all Balances accruing through adversity of season, and extended to Proprietors as well as Pottah Zemindars.

As regards Bauttghur, the Collector and Government Agent or should the Board think take measures as far as practicable to enforce the more punctual payment of Peishcush by proceeding to sequestrate the Estate during the fusly, and before the Crops are removed from the Ground,

on

Fort St George 4th March 1841.

on a failure by the Zemindar to make good his payments and of this the Zemindar should be duly apprized. The value of this Hill Zemindary shews that the Peishcush is moderate and as his default appears to be occasioned by private embarrassments it seems inadvisable to advertize the Estate for sale, while other means present themselves by which the Government demands can be made good —

Read the following Letter

To the Secretary to the
Board of Revenue
Fort St George

Sir,

(23)

From the Collr of Masulipatam

Para 1. I have the honor to acknowledge the receipt of an Extract from the Proceedings of the Board of Revenue under date the 17th August last forwarding an Extract from the Minutes of Consultation dated 28th of the previous July directing that a Statement of the Charges incurred on

Fort St George 4th March 1841.

on account of the Porto Novo Ploughs, as also of the sums realized on those sold be submitted together with any suggestions that may occur as to the best mode of disposing of those that remain unsold —

2. In compliance with the above requisition, I have the honor to forward the accompanying Statement shewing all expenses incurred according to the Books of this office —

3. It will be observed that the whole expense amounts to Rupees 649-5-8 and that nothing has been realized from the sale of Ploughs in this District notwithstanding the exertions that were made to induce the Ryots to purchase them — This result is entirely attributable to the diminutive size of the Cattle, and their inability to procure the description of cattle required to use them with efficiency —

4 Under these circumstances I am of opinion that the Ploughs sent to this District all of which remain unsold should be disposed of by public auction —

Nawab Noorunneesah
bagum Petitioner.-

Read Extra Petition No. 344 of 1840 presented by T. Soobbaroyadoo Pleader on behalf of Nawab Noorunneesahbagum Plaintiff in

in No. 22 of 1834, this Courts file.-

2. With reference to the Rauzeenama presented by the Petitioner and the Defendant Rajah Mubrauze Lutchmiah in the above case on the 15th July 1835, Copy of which is herewith presented, and wherein the Defendant bound himself to pay to Petitioner a sum of Rupees 53373-3-" being the amount claimed in 6 Instalments together with interest at one per Cent per Mensem, the Petitioner represents that the Defendant having failed to pay the 1st 2d and 3d Instalments of the said Rauzeenamah, She presented Petitions for the enforcement of the same, but that the Defendant having pacified Petitioner by promises of payment she made known the same to the Court thro' her pleaders, that at last the defendant having failed to keep her word Petitioner presented two Extra Petitions No. 182 of 1838 and No. 344 of 1839 praying for warrants for the collection of the amount of the past four instalments from the Defendant and her Vakeel with whom a

Sum

sum of 8,000 Rupees belonging to her Defendant was deposited, that this Court thereupon held Proceedings on the 19th June of 1838 and the 11th November 1839 to the above effect; that the Defendant having then declared her inability to pay at once the whole amount of the Principal and interest of the past instalments of the Rauzeenamah and satisfied Petitioner by promising to pay her 8,000 Rupees then, and to pay the balance at once. On 15th Mauka Soodahdah year Vekary the Petitioner agreed to that arrangement, received the said amount and presented a postpone Petition in No. 442 of 1839. that the Defendant not only failed to fulfil the conditions of the postpone Petition, but also having appropriated to her use certain sums which were realized by her and which were promised to be paid under the said debt, the Petitioner now refers the Court to the Copy of the Rauzeenamah presented herewith and to the Courts Proceedings of 18th April and 22d June of 1838 relating to the enforcement of the Rauzeenamah, and prays that as a sum of Rupees 74409-2-" being

being the balance of Principal and Interest of the past five instalments of the Rauzeenamah is due to her by the Defendant; Precepts may be issued to the Zillah Court of Nellore and to the Auxiliary Courts of Guntoor and Masulipatam, directing them to issue warrants, and sell the real and personal property of the Defendant, situated at Nursaraupettah, Masulipatam and Guntoor and also Sydapore Talook in the zillah of Nellore and Rauchoor, Venkatagherry and Bellumcondah Talooks in the zillah of Guntoor, together with any real and personal property belonging to the Defendant that might be shewn by the Petitioner and cause the sale proceeds thereof to be paid to the Petitioner under the abovementioned sum of Rupees 74409-2-0 and thereafter subsequent interest up to the date of payment together with the Costs of this Petition.

3. The Petitioner further prays the Court to issue Precepts to the Zillah Court of Nellore and Auxiliary Court of Guntoor directing them to attach in the first instance the ready money being 2000 Rupees which were placed in the Defendants Fort and the whole of her property in it and also the Talook of Sydapoor.

4. Ordered that Copies of the Rauzeenamah filed in No. 22 of 1834 be forwarded to the Zillah Judge of Nellore and the Assistant Judge of Guntoor with directions to the latter to attach and dispose of any personal property pointed out by the Plaintiff or her authorized agent, and to remit the proceeds to this Court, & that the Judge of Nellore be likewise ordered to attach & sell any real property belonging also to Defendant which the Plaintiff or her duly authorized representative may point out as

Ordered

Ordered that an Extract from these Proceedings be sent to the Judge of Nellore and to the Assistant Judge of Guntoor by precepts returnable within 6 Weeks after their receipt.

Proceedings thereon.

The Board are of opinion that the entire Estate of Sydapoor should be advertised for sale in conformity with the Precept of the Provincial Court for the Northern Division.

2. In the advertisement the arrears of Peshcush due to Government should be inserted as required to be liquidated in the first instance from the Sale Proceeds - and if the sale should proceed the Principal Collector should bid on behalf of Government to that amount.

3. The Judges of the Northern Provincial Court should at the same time be duly apprised of the state of the Zemindary, and of the amount of arrear due to Government thereon.

Ordered to be sent for publication in the Fort St. George Gazette.

Read the following letter.

To,

The Secretary to the
Board of Revenue
Fort St. George

From the Actg Collr of Cuddapah

Sir,

(29)

I have the honor to request the attention of the Board to my Predecessor's letter of 10th December 1839 and their reply of 9th January 1840.

The Board's objection to comply with Mr. Lavie's wish arose from their impression that Mr. Blane and the Cuddapah Servants, which he took with him, would soon return from Kurnool. There does not appear to be any likelihood of this occurring. The employment of Salook peons to supply the places of the Dalays etc is very objectionable, unless as a very temporary step. The Revenue and Police duties in the Zillah are really so heavy that the services of

every

every peon of every description is absolutely required, and I therefore beg that the Board will no longer refuse to grant sanction for other peons to be employed in the place of those taken to Kurnool whose services have now been lost to this District for nearly a year and a half.

Cuddapah
Collector's Office
16th February 1841.

(signed) C. H. Hallett.
Acting Collector

Proceedings

Fort St. George 4th March 1841.

Proceedings thereon. Mr. Hallett should

(29. 30)

place himself in communication with

Mr. Blane and arrange either for the return

of the Deloyets and Peons taken by him to

Kurnool to their duties in Cuddapah, or if

these preferred remaining where they went, from

to supply their places and surrender his

Establishment complete.-

2. In that case Mr. Blane should be

informed that the wages of the servants with him

would cease to be charged on the Cuddapah Establishment

but must be defrayed in future from the Revenues of Kurnool.

Read

Fort St. George 4th March 1841.

Read the following letter.-

To

The Secretary to the

Board of Revenue

Fort St. George.

Sir,

(31)

From the Collector of Chingleput. Reporting the result of his examination into and revision of the Survey field assessment of the Conjeveram Ycd fine Talooka settled by Mr. Vincash; as also the completion of certain details connected with the Survey of the District.-

Para 1. I have now the honor to submit for the Consideration of the Board of Revenue the result of my enquiries relative to the process pursued by Mr. Vincash in framing the Survey field assessment in 025 Villages situated in the Conjeveram Ycd fine Talooka enumerated in the Margin, during fusles 1236 and 1237, as reported in his letter of 31st August 1828, together with a proposed revision of that settlement arising from those enquiries proceeding from Village to Village, with a few further details connected with the Revenue Survey of this district, which were left for my examination and report by my predecessors.-

*Settled in 1230.	Conjeveram	155.
	Kramaloor	142.
Do in 1237.	Carungooly	173.
	Teroporoo	126.
	Chingleput in part	29.
		025.

2 The instructions of the Board relative to the mode in which the Survey Assessment should be conducted are dated the 19th May 1825, but as those instructions have been well abstracted in

in a further Communication of the 7th. March 1831 to the then Collector. I shall as they form the main points on which I am desired to report and as they have been my guide in the steps now pursued, here allude at some length to the latter. The Board suggested that the assessment should be commenced in the Conjeveram Taluk, and that assessors should be sent to class and value the lands in communication with the inhabitants of that and the neighbouring District of North Arcot, with reference to the Teervahs existing or in the bordering Taluk of Cauveripauk, local circumstances, former revenue and such information as their enquiries might elicit, in regard to the pro= =ductive powers of the different sorts of soil, because the Villages being inter= =mixed they would thus obtain the ad= =vantage of being able to compare the estimated resources of the land with the assessment already in force; in others of a

similar description and possessing the same benefits and drawbacks as regards the situation and markets for the produce.-

3 The Board likewise pointed out the necessity for caution in placing too much confidence in the Thundoomodul or accounts of mailvaram produce converted into money, as the accounts furnished by the Curnoms who were the Servants of the Mootadars or their under renters could not be relied on, and even where correct they would only shew the result after all the abuses of an unwary management. As that the Mootadars had in many instances mismanaged or neglected their Mootahs or abandoned them to Strangers whose object was to deceive them as to their real resources.-

4 The Board also cautioned the Collector against taking the Permas= =nent assessment as his guide, as such a System would lead to the assess= =ment being made too low, as the

demand

demand under the Permanent Assess=
=ment was fixed much below the receipt
of former years to enable the Mootadars
to meet the contingencies of Seasons, the
expences of Collections, and the repairs
of the Tanks and Watercourses, that
these would now have to be borne by
Government out of the Amount of
Revenue which would no longer be fixed
but fluctuate with the extent of land
actually productive, that the money Assess=
=ment was the highest that could be
collected, whilst the actual Collection an
an average of years must be less, and
that in all comparisons in determining
the Berij of Villages former remissions
must be kept in view, as otherwise, all
future remissions would be so much
lost to Government.-

5 The Actual measurement
and classification of the lands in most of
the Villages in the Talooks of Conjeveram
Cotramaloor, Caroongooly, Teroopporoor and
Singlepat

Singlepat had been completed prior to
Mr. Vincash commencing his operations in 1820 Fl 1230,
and the Sirtaramdars after due investigation
into the Accounts of former produce as far as
they were able to obtain them, and a Con=
=sideration of the natural Capabilities of the
Soil with its peculiar means of irrigation
the average price at which the Nailvarum,
after deducting all Swatundarams and &c
fees payable to Village Officers or others,
was to be Commuted, and of the facilities
or difficulties of disposing of the surplus
produce together with such other points as
might tend to guide their judgment &c
had suggested respective rates of &c
Assessment for the Villages in the Con=
=jeveram and Cotramaloor Talooks; whilst
in the Teroopporoor Talook, though the actual
rate of Assessment had not been pro=
=posed, the preparatory details had been
completed. Mr. Vincash then deputed the
Sirtaramdars with similar instructions to
prosecute their proceedings in it, and the

remaining

remaining two Talooks. Thus far the work appears to have been carried on in conformity with the Board's instructions. but the mode in which Mr. Vereast subsequently proceeded to determine what should be the rate of assessment on the lands differed in some of the most important points.-

6. In entering upon the assessment he first divided the Talooks into Pirkahs or divisions, each comprizing from 10 to 42. Villages and having them summoned the ryots, desired them to suggest an aggregate Beiz for their respective Pirkahs, which result they were told to arrive at by calculating the amount they considered each Village should pay with reference to the extent and capabilities of the land cultivated in Fusly 1232; that year being selected as the best for all comparisons, from the cultivation exceeding that of most years, whilst grain maintained a fair average price - The comparative rate

of proposed assessment should be stated, be confirmed by him unless some gross partiality was apparent, though the net amount would be increased or decreased as might be considered expedient by a general percentage on the Beiz of the Pirkah and he also nominated certain Nattavars and head inhabitants of the District. Mediators for the settlement of such disputes as might arise between the ryots in framing the comparative amount to be assessed on each Village -

7 In the prosecution of the task thus entrusted to the Ryots after having taken the average produce and Village Collections for 23 years, the Collections of Fusly 1232, and the assessment suggested by the Sirtarumdars, they calculated the amount that would be payable by each respectively in the event of the average of the four accounts above mentioned being assessed upon the Shaigal

Shaigal lands- These calculations were their Chief guide, and where the result appeared to them such as the lands could easily bear it was adhered to, but in some instances from various Considerations those rates were raised or reduced in particular Villages by a 1/16 or 1/8 and even 3/16ths of a Pagoda per Cawny. The Beriz thus settled by the Ryots jointly on each Village was called the "Nerodvadel" or apportioned Beriz- They then however proceeded to deduct same varying from 2 to 10 per cent on the aggregate Beriz of each Firkah and dividing the balance on the Nunjey and Punjey lands, prepared an abstract of the result which they delivered to the Collector with a General engagement to adjust amongst themselves according to an uniform percentage any alteration that might be made in the total demand. This they termed the "Ryots' Beriz".

8 "No certain information could be obtained regarding the alleged grounds of the reduction from 2 to 10 per cent made from the Beriz of each Firkah by the Ryots themselves, nor is there any account to shew the exact amount of reduction so made, but it is supposed that the real object was to meet any increase that might be made to their suggested beriz.-

9. On the presentation of these accounts Mr. Vivian proceeded to ascertain the beriz of each Firkah for 1210, the average actual produce and Collections of the 23 years and of the Collections of 1232, and with reference thereto and to the Permanent Beriz and the Beriz of the years preceding Fuerly 1210 as also his opinion of the existing Condition of the Country and people, determined the amount of assessment on the Nunjah lands by deducting from

from 3 to 7 per cent from the actual collec=tions of 1232. the Cultivation of which year was adopted as the extent of assessment for the survey settlement, the result being from 8 to 15 per cent below the Star=dard assessment. On the Punjey lands he fixed the assessment nearly on a par with the average actual produce and collections of the 23 years. Having then compared the aggregate of the assessment he considered proper according to the above principles upon each Firkah with the Proposed Beriz of the Ryots, he con=firmed such as approximated to his calculations and raised such as were below the amount by an additional per centage varying from 1/2 to 9 per cent. The Ryots then executed an Agreement to him setting forth their Consent to the Beriz thus regulated and arranged the respective rates of assessment on their lands according

to their different Classes and number of Crops usually raised. A Statement containing these particulars and another shewing the Cadavarum or gross produce which each class of land was supposed, according to the rates of assessment proposed by the Ryots to be likely to produce; were also prepared and co delivered to the Collector, after which the assessment thus determined was introduced and is still in force.

10. The number of Firkas into which Mr. Vivedah divided the 625 Villages settled by him was 28. and his additional assessment on the Beriz proposed by the Ryots averaged 3 per cent, but in examining this in detail it will be seen that their suggested Beriz was Con=firmed by him in 10 Firkahs and raised in the remaining 18 in the proportions exhibited in the Margin, several english Statements were found in the records

1	Firkah at 1/2 per cent.	
2	Do.	at 2 Do.
0	Do.	at 3 Do.
1	Do.	at 4 Do.
3	Do.	at 5 Do.
1	Do.	at 6 Do.
3	Do.	at 7 Do.
1	Do.	at 9 Do.
18		

records with the initials of Mr. Vincash &
shewing the Beriz settled by him on each Firkah
Five of which for the undermentioned Firkahs
are submitted for the perusal of the
Board.-

1 For Malayancolum Firkah comprizing
27 Villages whereon an increase of 7 per
Cent was made.-

1 For Salavankum Do. comprizing 21 Villages
whereon an increase of 5 per Cent was
made.-

1 For Keleyanagarum Do. Comprizing 30 Villages
whereon an increase 7 per Cent was made-

1 For Kayar Do. Comprizing 29 Villages
whereon an increase of 1½ per Cent was made

1 For Yedamichey Do. Comprizing 42 Villages
in which the Beriz proposed by the
Ryots was confirmed.-

11. It is scarcely necessary for
me to point out how improbable it was
that a rate of assessment thus determined
should at all approximate the revenue
realized in former years, or how contrary
to the orders of the Board and Government
and the principles of a detailed field

survey was. this system of fixing the settle-
=ment on a number of Villages in the =
mass. leaving the details and division
of the gross beriz to be fixed by the Ryots
without any enquiry into the circumstances
of their respective Villages, or of the =
advantages or dis-advantages attending
their position.-

12. Having thus detailed the
systems under which the settlement
of the 625 Villages was conducted by
Mr. Vincash. I now submit a short
abstract statement exhibiting its re-
=sults compared with the actual Collec=
=tions in Fusly 1232, the extent of Culti=
=vation of which the actual
Collections in Fusly 1232, the
extent of Cultivation of which year formed
the basis of the Settlement; as also with the =
Collections of other periods-

Former-

13. In reference to the foregoing Statement it will be observed that the Settlement of the Village Collections for the Aslamabad Division has been fixed by the Viveash Settlement, and that the average Collections of 23 years realized according to the Village accounts by the Mootasaddy and Renter, and which are produced in the Circar Cutcherry, but is also below the Circar Collections for the same period; and the Collections for 1232 - the last mentioned year, the whole of the 25 Villages, with the exception of Tejtaw, were under Renters for one or more years, and though the Cultivation was greatly extended Compared to the Aslamabad Settlement, and the Aumaut of Revenue realized by Government was not increased in a Comparative ratio with the Village rents were adjusted entirely to their respective Pretadars, it gives us to think that the Collections may further be considered that the Revenue not beyond the Revenue of an average season - these data combined with the Cultivation that the Survey Establishment is the highest that could be desired under

whilst the revenue will probably be less, are of themselves sufficient to shew that though the assessment was based on the actual Collection of 1232, the survey assessment was unduly lowered, when fixed at an amount below its actual Collections.—

14 In proceeding to revise an assessment fixed on such principles, the only course to be pursued was that pointed out by the Board. Viz. to ascertain by a minute enquiry, proceeding from Village to Village how far the rates of assessment existing in each were proportionate to the productive powers of its lands, taking into consideration the facilities of irrigation the rates prevailing in similar lands in the neighbourhood, the revenues formerly realized with any other peculiar circumstances that might suggest themselves, and where the rates appeared disproportionate, to ascertain the extent of such difference— with this object the Peristadars of the survey Department has visited every one of the Villages in which the survey assessment was fixed by Mr. Vivash, making enquiries on the spot from the Ryots and inspecting the sources of irrigation, whilst many of the Villages in each of the Talooks were also visited by myself— The Ryots of the respective Villages

Villages were then summoned, and after an examination and Comparison in communication with them, of the existing settlement, and the accounts of produce of former years, and other matters, a revised rate of assessment, wherever it appeared necessary, was proposed by me, the general result of which has been an increase of Pagodas 11143-5 7/8. or 11 per cent upon the Beriz fixed by Mr. Vivash on the Shaigal lands, including ready money Collections.

+ Pags as
Former settlement 10014 by — 13 1/4
Present proposed Pr. 11,1611 — 3 7/8.
Increase 1147 3 — 5 7/8.

15. I must here draw the attention of the Board to the subjoined statement containing some details from which the above result has been obtained, when it will be observed that the chief difference between the former and present rates of assessment, is in the wet lands, and that the assessment has been raised in 525 Villages only, the rates existing on the Punjah and Punjey lands having in the others appeared to me duly apportioned— The revised rates on the wet Lands Of these 525 Villages framed after an attentive consideration of the several points suggested by the Board

* Coladavady. 160 per cent.
Manevatchy 100 per cent.

vary, excepting in two* small Villages from 2 to 66 per cent— the average being 14 per per cent, whilst in those two Villages the increase is no less than 160 and 100 per cent, respectively— The net increase of the revised assessment on the Punjey, Punjey and Potacab lands in these Villages, including ready money collections, amounts to 13 per cent, but a more particular detail with specific accounts of some of the Villages in which the assessment has been greatly raised, will be given hereafter— Talooks

Excluding the 2 Villages in which there is a large increase	"	"	"	"	"	"	"	"	"	"	"	"	66/4	2

16 The following Statement is also submitted to shew the per centage which the Beriz now proposed by me on the nunjey shaigab lands in the 625 Villages bears to the amount of the "Rayats' Beriz" and that ultimately introduced by Mr. Vincash on the Firkahs or Divisions. This state-

ment also shews the beriz calculated upon the accounts of produce which were originally given by the Ryots to the Sirkundars for the Canjeveram Patramaloor and Tiroopporoor Talooks.—

17. A detailed Statement is next subjoined shewing the Beriz now proposed in comparison with the extent of the Cultivation and Beriz of Fusly 1210 / the year preceding that in which the Permanent Settlement was fixed and in which the Villages were rented on a careful estimate of the produce / the average extent of cultivation Beriz and collections of the 23 years subsequent to the Permanent Settlement, the extent of cultivation and Collections of Fusly 1232, the Beriz proposed by the Ryots to the Sirtaredars, the Beriz proposed by the latter, as also the Beriz proposed by the Ryots to Mr. Vincent, and

and that finally fixed by him with an average per Cawney for these different Settlements. The extent of cultivation and Revenues with average per Cawney &c. for 23 years or from 1210 to 1232 / though these Accounts are not complete but entirely formed on averages / as well as the Permanent Settlement and other old Beriz as prior to Fusly 1210 are also exhibited in this Statement. It likewise contains the extent of immemorial and arable waste Lands which were uncultivated in 1232, together with the probable revenue derivable therefrom under distinct heads, according to the former and present Settlements and a Memorandum of the amount of Repairs executed to the Reservoirs from Fusly 1230 / previous to which a number of Mootahs reverted to Government (G.O. 1249 1840.) — Particulars

Fort St. George 4th March 1841.

Several

18- Several material points as to the relative Amount of the different Settlements are apperent from an attentive examination of the above Statement- The permanent Settlement exhibits a Decrease below the actual Collections of Fasly 1210 in Pagodas 18,483 or 14½ per Cent and which was deducted to meet the expenses of the Mootahdars and the contingencies of seasons- The actual Collections of Fasly 1232 when these Villages had reverted to Government again fall short of those of Fasly 1210 by Pagodas 19,137 or 15 per Cent- but as will be observed from the Statement, the extent of Cultivation was also in a decreased ratio- The Cultivation Accounts of Fasly 1210 exhibiting an excess of Cawnies 5,022-7/8 in the Nunjey single Crop Lands, Cawnies 6,192 in double Crop Land, as also 5,763 Cawnies of Punjey Land- but the Settlement formed by Mr. Vincash on the leases of the Lands actually cultivated

Enclosures Marked- ABCD & E.

Cultivated in Fasly 1232 exhibits a decrease compared with Fasly 1210 of Pgs 25,311-10 As or 20 p. Cent, and a Decrease as compared with the Collections of 1232 of 6,174 or 5¾ per Cent- The result of the Settlement now suggested on the cultivation accounts of 1232 exhibits a Decreased as compared with the Collections of 1210 of 11¼ per Cent and an Increase on 1232 of 4¾ per Cent-

19- It will be further observed that though the Nunjey average of 1st Crop according to the present proposed Settlement is a little higher than all the other averages shewn in Col. 2, yet including the 2d Crop it is on a par with the averages of 1210, of the 23 years following, and the Sirtarundars proposition shewn in Col. 4- This it must be remembered is the general result of the five Talooks but in the detail the result as regards each Talook varies as will be observed by the accompanying five detailed Talookwar Statements and the Abstract hereunder submitted-

The

Fort St. George 4th March 1841.

20 The average assessments per Cawny in the Teroopporoor Talook according to the present Settlement is as shewn in the Statement higher than that of Fusly 1210 but it will be found at the same time to approximate closely to the average of Fusly 1232. The difference between the present average and that of Fusly 1210 arises from the accounts of the extent of Land cultivated in the latter year being incorrect the extent of Cultivation in former years having been entered in the accounts on very careless estimates. In fact as brought to the Board's notice by Mr. Maclean in Paras 28 and 30 of his Report on the survey of the Manamungalum Talook, there are many Villages in which the aggregate of the lands cultivated in Fusly 1232 with the arable portion of the waste does not amount to the extent of Cultivation shewn in the accounts

Compd 4 P

Fort St. George 4th March 1841.

of fusly 1210. This circumstance naturally vitiates the averages of the Revenues realized and is a still further reason for asserting that the assessment on a number of Villages in mass upon any set of averages must be fallacious, and that the only means of approximating to a fair and correct standard is to proceed as has now been done, on Village by Village, inquiring into the particular circumstances of each, and rejecting averages where there is cause to consider them erroneous. A statement comprising a few Villages where there is great discrepancy between the Cultivation of 1210 and 1232 is hereunder subjoined.

21. The average Collection per cawny on the Wet land for Fusly 1210 in the other four or Talooks, is not less than those present averages, and but for the great disparity in the Teroopporoor Talook, the general average would have been higher than the average of proposed Settlement in lieu of falling a little short as it now does in the general abstract annexed to Para 17.-

22. A comparison of the aggregate settlement of Mr. Vieash with the Permanent Beriz exhibits a decrease of 6⅜ Pr. Cent, whilst that now suggested shews an increase on the whole of 4 Pr. Cent, although it varies in each Talook as is shewn in the subjoined Statement. but these comparisons are not correct unless the decreased extent of Cultivation of Fs. 1232 which has been taken and the basis of the survey settlement is also kept in view. The Cultivation and produce of Fs. 1210 forming the ground-work of the Permanent Beriz.-

On

Fort St. George 4th March 1841.—

24. On comparing the average of the proposed assessment with the average Collections of the 23 years (inclusive of Fusly 1232.) it would appear that they nearly correspond with each other in the 3 Talooks of Conjeveram, Octramaloor, and Chinglepute, but in Peroosporoor and Carangooly there has been so large an increase above the latter average that a small augmentation is perceivable in the general average of the 5 Talooks. The 23 years' average Collection of the latter mentioned two Talooks appears so low inconsequence of the Curnums accounts of many of the Villages being incorrect, and exhibiting deceptive returns of produce in lieu of the amount actually realized by the Moodaliars and to the practice, as before stated, of entering the extent of Cultivation by guess. The real amount of Village rents has been ascertained where practicable, and is noticed in the Village Statements under the head of Remarks.—

Fort St. George 4th March 1841

	Villages rented for 30 years	10 years	5 years	4 years	1 year	Total	Villages unaccounted for	Total	Villages let by mutual Agreement	Villages let on the Ryotwar Plan	Total	25. There is an increase also of 8¼ per Cent in the proposed Assessment, over the Collections

Rented for more than one year 245
D° for one D° 365

in that year under rents, as shewn in the margin. The first mentioned 245 Villages having been rented out in the year following that in which they reverted to Government from the Proprietors, the renters though enabled greatly to extend the cultivation from the favourable nature of the year, and deriving the best possible advantages, yet only paid the stipulated rent to Government. With respect to the latter mentioned 365 Villages although they were under Circar Management in Fusly 1232 a portion of them were rented early in the year on

on Deakhast with reference to the average Collections of preceding years, whilst others were rented on an estimate of the Crops. The Collections of that year cannot therefore be considered as the actual value of the Government share of the produce and when the amount of Sistar Revenue is divided on the extent of land cultivated in that year, the average per Cawney is necessarily lower than it would otherwise have been. A Survey field assessment being however a fluctuating tax depending on the extent of cultivation and including all remissions must be Determined with regard to the actual condition of all the Lands at that time the Beriz of each Village and Talook being completed, the average deduced will naturally exceed most of the averages of the fluctuating Revenues of former years.

The Beriz calculated

upon the produce, the accounts of which were originally given by the Ryots to the Sirtarumdars, for the Canjeveram, Ootramaloor and Perrapporon Talooks, as stated in Para 5 are for the purpose of being compared with the other Berizes also shewn in the Statements of each Village and in the Abstract Statements of those Talooks whilst the following Statement exhibits the difference between that Beriz, the Beriz settled by Mr Vincash and that now proposed.

Talooks

Fort St. George 4th March 1841.

2992

Fort St. George 4th March 1841.

27. The Accounts of the gross produce were not obtained by the Sirtarumdars from the Ryots for the Curangooly and Chinglepet Fa. books, as probably they were considered unnecessary from the plan of requiring the Ryots to propose the Beriz for each Firkah having been adopted by the Collector.

28. In the revision of the Survey, the necessity of moderation has never whilst endeavouring to guard the Government against an unnecessary sacrifice of revenue, been lost sight of, and the Estimates of the gross produce which the Lands are able to produce have been framed on a moderate scale.

29. The Maliwarum or Government share of the produce fixed after deducting the various grain fees as Swatuntrum and Merahs has been commuted at the same rate as that adopted by Mr. Vincash being 18 Mercals for Pagoda, for all the Villages except those situated in the

the Southern part of Carangooly and Ostramalore Talooks where it has been calculated at 19 and 20 Mercals in consideration of the greater distance of the Markets for the sale of the produce. These rates are sufficiently favourable to enable the Ryots in all seasons to pay a money assessment without loss.

30. The number of Classes into which the wet Lands have been divided in these 5 Talooks varies from 2 to 10. The maximum rate of Nunjey assessment fixed on land irrigated by River or Spring Channels being Pagodas 4 3/4 per Cawney for the 1st Crop, and inclusive of the 2nd Crop Pagodas 7 1/2. The minimum rate for the 1st Crop is 1 Pagoda and including the 2nd Crop Pagodas 1 1/2. With respect to Lands irrigated by the ordinary means such as Tanks, Tongles, &c. the rates of assessment are for 1st Crop Pagodas 4 and inclusive

including 2nd Crop Pagodas 6, the highest rate being Pagodas 4, and the lowest Pagodas 1/2.

31. It must not be overlooked in considering this revision of Mr. Vincent's Settlement that extensive repairs have been executed at the cost of Government to the reservoirs of the 625 Villages between Fusly 1230 and previous to which year a considerable number of them reverted to Government from the Mootadars hands and Fusly 1237. The amount of which together with the outlay incurred in the subsequent years is Rupees 5,58,971 as shewn in the following Statement

From 1231 to 1237 — 3,13,264 — 1/4 per C.
" 1238 to 1249 — 2,45,706 — 1/4 — 4
5,58,971 — 12 — 7

A short

32- A short account of the means of irrigation existing in the five Talooks may perhaps be desirable as a point materially affecting a view of the general average assessment per Cawney on the Wet Lands situated within them- In the Conjeveram Talook considerable tracts of Nunjey Lands are irrigated by Springs and Channels from the Palar River, whilst many of the Tanks have supplying Channels from the same source- There are also Lands where the water rises to within a short distance of the surface and which yields abundant Crops- There is also the large Tennery Tank which is capable when filled, of supplying 22 Villages for 15 Months- of which 21 Villages belong to Government comprising of 2,659 Cawnies of Shaigal and Laickh Nunjey Lands- In short with the exception of about 2 or 3 Cawnies of Manavary Land

	Extent of Land	Amount of Assessment
Shaigal-	1810- 6 5/8	3,766- 14 1/4
Laickh-	849 2 3/8	1102- 1 3/8
	2659- 12	4,868- 15 1/2
	or Pa-	17041- 3-

Land which depend upon the falling rains alone, all the Nunjey Lands of the Talook have Tanks, Tanglies or Channels in good order to irrigate them-

33- In the Cotramalore Talook there are some fine River Channels and large Tanks fed from the Palar and Cheyar Rivers, and that at the Cushab which is filled from the latter river is capable of watering the lands of that and two other Villages amounting to Cawnies 2,635 of Shaigal Land for 12 Months, there are also a number of fine wells available in seasons of drought- The Manaveray Land in this Talook extends only to 126 Cawnies, with the exception of which all Lands are watered by Tanks generally in good order-

34- A small portion of the lands in the Carangoly Talook is irrigated by means of Channels from the Palar River, while the rest have good Tanks and Tanglies which receive their supplies from

from the Jungles and a number of Wells of good description- There are only about 53 Cawnies of Manavary Land in the whole of this Talook- The Lands under the Large Tank of Madavant acund in this Talook were included in Mr Hepburn's Settlement made in 1803-

35- The Teroporoor Talook lying within 10 miles of the Coast extends from the South bank of the Adyar near the Residency as far as Ladras and with the exception of 444 Cawnies of Manavary Land the rest of the Wet Lands are irrigated by Large and small Reservoirs deriving their supplies from the Jungles- There is a Large Tank in Condunghy capable of holding 11 months supply of water- It irrigates 5 Villages comprizing 630 Cawnies of Nunjah Sheigal and Laicks Lands- With respect to the Lands of the 29 Villages in the Chinglepat Talook, there are Tanks and Jongals of the same description as

Compd J.R.

as those in the Teroporoor Talook-

36- The average per Cowney of the assessment fixed by Mr Vincash on the Poonjah lands, agrees with the average collections of 23 years, though it is below the average collections of 1232 by a little more than 3 per Cent. The assessment now proposed by me is 4 per Cent above the average of the 23 years, 3 per Cent above the average Collections of 1232 and 4 per Cent above the assessment fixed by Mr Vincash- The remarks I have before offered relative to the Village accounts and collections are of course applicable to these lands also- one point which has materially affected the extent of the Sheigal Poonjah lands is the practice of cultivating a great portion of them only in alternate years, in consequence of the difficulty and expence of manuring sufficiently to ensure a fair return and the impossibility of obtaining one without- This cause

reduced

reduced the extent of the Punjey lands cultivated in 1232 to Cawnies 14474, whilst the extent of the Laikh Punjey land cultivated in the preceding years and then waste was Cawnies 23348. The Number of classes into which the Dry lands of the 5 Talooks have been divided does not exceed four. The highest assessment now proposed is Pagodas 1-10, and the lowest is 1/4 Pagoda per Cawney the average being Pagodas 11 3/4 per Cawney.

37. Previous to the introduction of the survey settlement of Mr. Veneash in 1236 and 1237 Fs an assessment varying from 12 1/2 Pagodas to 3/8 per Cawney had usually been levied on the Gramanuttum Garden lands, the former rate being fixed when those lands were Cultivated with Tobacco or Plantains, and the lower rates, when with Chillies, Onions, Cucumbers, Natcheny and such grains. but in some instances when grain was grown, the amount of the

the Government Revenue was determined upon an Estimate of the Crop, or Crops raised and the conversion of the Mailvarum produce into a Money rent. The revenue thies

Punjey and Poonjah lands of the Villages through the intervention of the Ryots, the assessment of the Gramanuttum Totacal lands was not mooted, but during the Summahbundy of Fusslies 1236 and 1237 when Mr. Veneash introduced his survey assessment he ordered them to be assessed as a temporary measure with the following rates, leaving the question of the fixed rates for future consideration

consideration, the rates he then introduced have however continued in force upto the present moment. In the Conjeveram, Teroo=
=puroor, Chingleput and Ootramaloor Talooks the Gramanuttum gardens, with the exception of in one Village were assessed at 1 Pagoda per Cawney, whilest in the excepted Village they were rated at 4 1/4 Pagodas. In the remaining Talooks of Carangooly they were rated generally at 3 Pagodas per Cawney though in that Talook also the lands of one Village were assessed at 1 Pagoda per Cawney.-

+ Poodoopolliem

39. In the report of the general result of the survey assessment of the 625 Villages, Mr. Vincash has not noticed this circumstance, whilst the accounts trans=
=mitted by him exhibit a different detail. for in them, the revenues actually realized from the gramanuttum totacal lands in Fusly 1232, with the Collections from Topes, Trees &c. are included in the amount of ready Money Collections,

So

so that, from those accounts it would appear, that the average high rate of assess=
=ment previously levied would be realized under his Settlement; whereas a very reduced revenue only would come into the

Treasury, the rates acted upon being as much too low generally as the former were excessive;- The statement offered in the Margin exhi=
=bits the de=
=crease in the average Collec=
=tions under this head to 1.6- per Cawney whilst as shewn in the Memorandum appended to Para 37, it amounted in 1232 to 5 2/8 Pay. per Cawney.-

40. In some Villages in the Carangooly

Carangoaly and Ootramaloor Talooks the Gramanuttum Totacal lands are of the very best discription, and which from peculiarities of soil or water have long been considered are most favaurable for the Cultivation of Tabacco. In the revision of the assessment therefore a teerwa of 6 Pagodas per Cawney has been proposed on them, whilst on the inferior or less fertile Gardens in these as well as in the other three Talooks, lower rates varrying from 5 to 1 Pogada per Cawney has been suggested, with due consideration to the description and quality of the soil and the facility or difficulty of irrigation, the average result per Cawney being Rs. 4 - 1½ - The aggregate Beriz thus proposed on the Gramanuttum gardens Cultivated in 1232 is 1,001 Pagodas, as exhibited in the subjoined Talookwar Statement, being 276 Pagodas or 21½ per Cent below

Actual Collection of 1232 - Rs &c
Demand proposed by present - 1,001 - 8 8
Decrease - 2 7 - 2½

below the Collections of 1232 - There is also a considerable quantity of similar land which, though not cultivated in 1232, had been cultivated in former years and of which much is now occupied, upon these a like teerwa has been proposed, and the extent is exhibited in the same statement under the head of laikh - This assessment is not dependent on the nature of the Crop, and no increased assessment therefore would be levied in the event of two Crops of any description being raised within the year.

Previous

Fort St. George 4th March 1841.

41 Previous to the assessment of Mr. Viveash a fixed money rate per Cawney had been annually levied on some of the Topes or groves of fruit trees whilst the teerwa on others and on the detached fruit trees was annually determined upon an estimate of the Crop- During the assessment however he fixed a money rate per Cawney on a portion of the Tope lands of the Villages settled by him corresponding with the rates of the adjoining Punjey lands, leaving the detached trees to be taxed as usual. This mode of taxing the topes appears judicious, as in the event of the destruction of the topes or the greater portion of the trees becoming unprofitable, the land may be cultivated with the usual punjey produce without loss to the Sircar, or the Ryot.- This system has been followed by the different Officers by whom the details of the survey have since been carried on in the remaining Villages of the district, but a fixed rate of assessment for the detached trees as noticed in the margin was introduced by Mr. Maclean during the Fusly 1243 in lieu of the annual estimate of produce, and is now

	Annas.
+ Tamarind Trees	4

	1168	11 3/8

Punjey	140	5/2
Sanjey	362	12 5/8
	503	2 1/8

42 There are also in these Villages various description of manieums; such as 3/4 - 1/2 - 1/4 and 2/3rds enjoyed by Village servants and others, amounting to Cawnies 1168. Of which 503 Cawnies being Cultivated in 1232 are included in the sheigal land, the assessment payable to Government upon the last portion according to the present proposed revision is 400 Pagodas, this amount as also the sum of Pagodas 175 being the fixed tank Merah or quit rent to meet the repairs of the sources of irrigation paid by the possessors of certain Tarabady and Sunnud Maneums, together with the various items of Bajeebab Mohturpa, the taxes on Gramanutham, gardens, topes and detached trees, form the amount entered in the accounts under the head of ready money Collections, and a comparative statement is submitted exhibiting the actual amount realized under this head in Fusly 1232 as proposed by Mr. Viveash and at present suggested. It must however in Considering this statement be borne in mind that the amount of the Nagadeot of 1232 includes the extra Collections levied on those wet lands on which garden products were realized, and various small items not properly coming under that head.-

43 In framing the present revision of the settlement as proposed by Mr. Vivesh the lands and accounts of many Villages in the Caverypauk, Shalingeneram, Wundawash, and Tirovenkoor Talooks of North Arcot, and of the Tindevanum and Chetput Talooks of South Arcot which were adjacent or intermixed with the Villages of this District, have been inspected, and the rates payable in them with the means of irrigation and other points are noticed in the Village statements herewith submitted for the examination of the Board.

Enclosures marked F, G, H, I, K, L, M, N, O, P.

44 I must now allude to one point to which the attention of my Predecessors was particularly directed by the Board in their instructions of the 7th March 1831, namely to include in the comparison of Revenue the amount of former remissions, and though I have not offered any details of their actual extent beyond the amount yielded to the Mootahdars, to enable them to meet the expence of management, the amount

amount of the remissions is de facto included in the respective berizes, because the Villages were formerly either rented or held in cumanei, and where rented, the rented Beriz being entered in the accounts. Consequently includes any remission that might have been subsequently granted to the Renter: and where the Villages were in dumany there were of Course no remissions, the beriz being the amount derived from the sale of the Government share of the grain.

45. Previous to bringing to a close my remarks upon the general result of Mr. Vivesh's settlement, I must offer one more statement for the Consideration of the Board from which it will be observed that notwithstanding the extent of land actually cultivated in the 625 Villages in Fusly 1249 exceeded the extent cultivated in Fusly 1210 by Cawnies 1,980 of Punjey Land and 5,997 of Punjey. the revenue payable to Government according to the Survey assessment was less than the Collections of Fusly 1210 by 13,320 Pags. or 10 3/4 per Cent, and after deducting remissions by 17,318 Pags. or 14 per Cent.

The

Fort St. George 4th March 1844.

46. The general and detailed Talookwar statements submitted with the foregoing remarks relative to the mode in which the settlement was conducted by Mr. Vincent and the principles adopted in forming the present revision of that assessment in the Nunjey, Dunjey and Totacal lands, will I trust be found sufficiently clear to enable the Board to form a correct judgment on the General result and bearing of the proposed Settlement - but it will now be

Fort St. George 4th March 1844.

be necessary for me as noticed in Para 15 to subjoin a few Village statements to exhibit in the clearest light the errors and inequality of the former assessment, with the necessity of raising it so greatly in some of them - General statements in a similar form have during the revision been prepared in the native language for every Village, and can be submitted, should the Board consider it expedient -

Fort St.a George 4th. March 1841.

47. It is also necessary for me before closing the subject of the revision of Mr.a Vivedsh's settlement, to state for the information of the Board that most of the Ryots and Merasdars who attended my Cutcherry for the revision of the settlement of their respective Villages, and who were present during the examination of their accounts, have acknowledged that the rates proposed were sufficiently moderate, and also signified their willingness to pay the proposed assessment, in the event of the remarks which is entered with the permission of the Board in the individual Ryotwar Puttahs issued during the annual Summahbundy since Fasly 1239 to the effect "that the assessment fixed on their lands are not to be considered as finally fixed until they have been revised

Vide letter from Board 29th Oct.r 1829.

Fort St. George 4th. March 1841.

revised and sanctioned by the Board, and that they are subject to be either raised or lowered according to circumstances" being cancelled because until the settlement be finally closed and this clause omitted, they would have reason to doubt its stability and could not with confidence apply themselves to improvements.

48 The most mature and deliberate consideration that I have been able to devote to the subject has convinced me that the rates of assessment now proposed are not excessive and though a few Petitions have and may be presented to your Board against the measure it is but natural to expect it would be so and that even much stronger opposition than has been shewn should be made to raising the rates of assessment that might be considered too low after an enjoyment of them for so many years.

I

Fort St. George 4th March 1841.

49. I shall now proceed to lay before you for the consideration of the Board the result of my enquiries relative to the assessments framed in Fusly 1232 by Mr. Smalley in 147 Villages of the Chinglepaut Talook with a detail of such modifications as the experience gained in the consideration of the survey assessment of the Villages of the District generally has induced me to suggest.

Settled in Fusly 1232 — 125
Latterly settled — 22
147

50. On a reference to Mr. Smalley's Report under date the 31st October 1822 submitting to the Board his proposed survey assessment on 125 of the above Villages it will be observed that he adopted generally as a standard the rates of assessment suggested by the Sirtarumdars who had been deputed to prepare upon enquiries conducted in each Village a scale of assessment stating it to be his opinion, that the assessments proposed by

Fort St. George 4th March 1841.

by them for 45 of the Villages was proportionate to their condition and the capability and quality of the soil whilst he suggested a reduction on the others, varying from 2 to 15 but averaging 10 per cent. The suggested Beriz and rates of assessment for these Villages were then confirmed by the Board and Government as per correspondence noted in the Margin.

Board's Proceedings 14th April 1823.
From Govt. to Board 9th May 1823.

51 Mr. Smalley subsequently assessed 22 other Villages but regarding which no distinct report has at any time been submitted. Previous to acting upon the sanction by Government of the proposed assessment on the 125 Villages Mr. Smalley resolved, in order to test its correctness, to introduce it in the Village of Codiembaukum allowing, as entered in the statement submitted with his report, a reduction of 11 per

Fort St. George 4th March 1841.-

per cent from the Berij suggested by the Sir. Tarrundars, but before carrying his views into effect in regard to the remaining Villages he was removed to another District.- Mr. Babington his successor introduced in Fusly 1233 the survey assessment in 144 of the Villages, retaining two Viz.t Goodalaor and Sheik Emam Hundegay under Aumany, the Ryots having strenuously objected to the proposed assessment but in doing so, he does not appear to have considered himself bound to abide by any one of the assessments in partiular proposed or sanctioned as will be seen by the following

Memorandum

Fort St. George 4th March 1841.-

Memorandum.-

	Villages
Settled according to the rates proposed by the Sirtarrundars	100
D.o ___ D.o ___ by the Ryots	3
D.o ___ D.o ___ by the Hoozoor Cutcherry	11
D.o ___ D.o ___ fixed on the average price of 22 years from 1210 to 1231 excluding years of draught and famine	25
D.o D.o rates proposed by mediators	5
	144

The difference in the rates of Assessments suggested by Mr. Smalley and those introduced by Mr. Babington are exhibited in the subjoined statement extracted from Mr. Maclean's final report Paras 91st, in which also from Para 91 to 97 much information relative to this Settlement is to be found.-

assessment as introduced by Mr. Babington has continued to be acted upon up to the present period.-

55. At a subsequent period Mr. Vivean with reference to the complaints of certain Ryots presented, whilst Mr. Babington was introducing the assessment, brought to the subject of a proposed reduction to the notice of the Board in two separate letters under dates the 28th August and 23d September 1827- In the first of these letters he stated, the assessment generally to be satisfactory to the Ryots though some partial remissions might be required to correct irregularities, but in the latter he expresses an opinion, that a general remission of about 10 per cent would be necessary founding his belief on a comparison with the rates introduced by himself in Cotramdaram and Conjeveram Talooks. The Board however in reply stated that they considered it advisable to continue the

Vide Proceedings dated 19th May 1828.-

the survey rates as they then stood until the whole district should have been assessed when with further means of comparison, and a further trial of the existing rates a more conclusive judgment might be formed as to the necessity of the proposed reductions.-

56- In conformity with the foregoing and subsequent instructions in reexamining the assessment, I have endeavored to ascertain the causes which led Mr. Babington to adopt a different scale of assessment in introducing the settlement made by his Predecessor and sanctioned by Government, but have been unable to elicit any positive information as there is nothing relative to them upon the records of the Office- some of the servants who were then employed in the Minor Department of the survey Establishment have however represented that doubts having arisen regarding the correctness of the returns furnished by the Sirtarumdars

* Board's letter to Govt. 4th Octr. 1839 Mins. of Cons. 25th October Do.

Sirtarundars a further enquiry previous to the introduction of the Settlement was made by Mr. Babington, and that influenced thereby, he took upon himself the responsibility of altering the assessment suggested by his predecessor - This appears the more probable from the same individual who superintended the Survey Department under Mr. Smalley having filled the like Office under Mr. Babington. These circumstances have led to the necessity of my again going into the detail of the assessment of each of the 1141 Villages, and for me to state where I consider the settlement as suggested by Mr. Smalley and enforced by Mr. Babington commensurate with the condition of the Village and it's resources and to propose such alterations as might appear to me necessary to equalize the rates in those Villages with

those payable on the neighbouring ones - In so doing I have found the assessment in 103 Villages as introduced by Mr. Babington duly proportionate to the produce that might be derived In 25 Villages I would recommend small remissions whilst in 13 others, it would appear necessary to raise the rates to approximate them to the assessment on similar lands in the neighbouring Villages - 57. The subjoined Statement exhibits the settlements proposed by the Sirtarundars and Mr. Smalley, that introduced by Mr. Babington with the modifications suggested by myself in the 25 Villages above alluded to 17 of which were included in the 125 whereof the Settlement was sanctioned by Government, whilst 8 are included in the number subsequently assessed under the supervision of Mr. Smalley but regarding which no report was at any time transmitted. -

exhibited in the same statement under different heads, the assessment at present suggested stands on a par with that proposed by Mr. Smalley, whilst in 6 others it is below the latter assessment from 5¾ to 19 per Cent. In the remaining 3 there is an increase from 18 to 34 per Cent - The reductions in proposed in the assessment introduced by Mr Babington and still acted upon though amounting in the aggregate to 5½ per cent varies in the respective Villages from 2¼ to 17 per Cent - I propose therefore mentioning hereafter the causes which have led to my suggested remission in those Villages where the per centage is the greatest -

59- The Village of Anoomundapottary in which a reduction of 17 per Cent is proposed, is a Backerack or uninhabited Village, and consists wholly of Punjey lands of

Fort St. George 4th March 1841.

of inferior quality which are situated on high ground. These lands were usually cultivated under dumany by the inhabitants of neighbouring Villages. The assessment proposed by the Sirtarumdars on the lands which were all entered in one class and adopted by Mr. Smalley was 5/8 of a Pagoda per Cawney, whilst that adopted by Mr. Babington was 3/4 Pags. in Consequence of which the whole of the lands amounting to 66. Cawnies, including the Laikh and Anadie wastes have been left fallow.

	Rs. As.
Sheegal	8- 8 1/2
Laikh	19- 14 1/8
Anadie	38- 0 1/4
	66- 9 1/2

I have now divided the lands into three classes and assessed the 1st Class at 5/8 of a Pagoda per Cawney the rate originally proposed by the Sirtarumdars - the 2nd at 1/2 Pagoda and the 3d at 3/8 Pags. per Cawney

60.

Moorminay in which a

Fort St. George 4th March 1841.

a reduction of 15 per Cent has been now recommended is also a Bacherauk Village, situated at some distance from the Chingleput Tank and contains only 8. Cawnies of Nunjey and 3 1/2 Cs. in Punjey, but of the former only 4 Cawnies are watered from that Tank when full, the remaining lands which lie at the bottom of a Hill being occasionally cultivated as Manavary or by the falling rains alone. Mr. Babington assessed the Nunjey lands with reference to the actual produce of some very favorable years, the assessment including the 2d Crop amounting to Pagodas 30 - 20 3/4 as and which though less than the assessment suggested by the Sirtarumdar, by the small sum of Pags. 1 — 12 1/2 as, is still too high for the lands of this Village - a convincing proof

Pags. As
31 — 15

Fort St. George 4th March 1841-

proof of which is the lands having been left fallow - Had the assessment been a moderate one, no impediment would have existed to the maintenance of the cultivation. Under this consideration the reduction of 15 per Cent has been suggested which reduces the Beriz to Pagodas 25- 5¼ - The average per Cawney according to the proposed reduction closely approximates to that of the 22 years preceding 1232 - -

61. In the Village called Yadayattoor the proposed reduction is 14 per Cent - This Village which was included among the 22 Villages lattely assessed by Mr. Smalley is situated on an island in the Pulas river, the lands with the exception of a few Cawnies of Manavery Nunjey

Fort St. George 4th March 1841-

being Punjey - The Beriz proposed by the Sirtarundar on the Sheigal lands, including the ready Money Collections, was Pagodas 10.6 1/2 and was confirmed by Mr. Smalley. but Mr. Babington, though he adopted the Sirtarundars assessment for the Nunjey lands, added Pagodas 46. or 51 per Cent to the assessment on the Punjey lands, the total beriz of the Village so fixed. amounting to 152- 13 1/3 being 43 per Cent above the beriz of Mr. Smalley - The assessment originally framed by Mr. Smalley particularly for Punjey lands was I conceive too low. but that introduced by Mr. Babington was as much too heavy when compared with the Capacity of the land, and the result has been that the

the cultivation of the higher classed Punjey lands has been gradually declining, whilst the whole of the Nunjey lands has been thrown up - I therefore deemed it proper to propose a reduction of 14 per Cent. which will equalize the assessment with that formed on similar lands in the neighbourhood -

Assessment of Punjey.

Assessment of Nunjey.

The Memorandum in the Margin shews the rates of assessment as introduced by Mr. Babington and now proposed -

Fort St. George 4th March 1841.

The Nunjah lands of the Village of Rajahcoolapettah which is likewise one of the 22 Villages already mentioned, and in which a reduction of 12 per Cent. has now been suggested, are situated in the bed of the Chingleput Tank, and having no separate reservoir are watered from it by means of Pootahs - The assessment in force on these lands is that proposed by the Sirtaramdar on the average price of 22 Years, this rate, as also more particularly the rates of assessment upon some manavary Lands which by an error were similarly assessed, have been found too heavy for the labour in the one case and the uncertain nature of the Crop in the other, and as consequently led to the abandonment of the lands and ultimate loss to the Circar. Under the proposed reduction, I hope the lands will

will again become profitable to all parties. The memorandum in the margin shews the rates of assessment on each description of wet land now existing and proposed. The Lands of Heraparakum & Gokalakrgum Village are situated under a Hill with but one Meerasidar to cultivate them. In Fusly 1210 about 30 Cs. of Nunjey and 7¼ Cawnies of Poonjey lands were under the plough, the revenue realized amounting to Pagodas 30. The Permanent Berij

				22 7½	2 11½ / 65 11½	2 9 / 57 10½	8	1

Berij subsequently fixed on the Village was 25½ Pagodas, whilst the Collections in some years when it was rented by the Mootadar amounted to between 40 and 50 Pagodas the Village reverted to Government in 1221 and from that period up to 1232 was again rented to the Meerasidar at 31 Pagodas 2½ Anium, which appears to have been fixed with reference to the actual revenue of 1210 and the Permanent Berij. At the time of assessing this Village though no change had taken place in the actual extent of the Shaigal lands the Sirkar amildar appears not to have taken into consideration the great improvements which subsequent to Fusly 1210 had been made in the means of irrigation fixing a Berij for the Shaigal lands amounting to Pagodas 38, and on which sum Mr Smalley recommended a remission

Fort St. George 4th March 1816.

remission of 2 per Cent: Mr Bar-
-lington considering the assessment
of the Sirkarimdar to be under-
rated raised it to 53 Pagodas
or 51 per cent. This Assessment
is however much too heavy
considering the situation of the
lands and the liabilities
to Shavi. Under these considerations
the reduction proposed with regard
to the state of the land and
actual facilities of irrigation
amounts to 6 Pagodas or 12 per
Cent.-

64 Nethungal is also a
Bachcramb Village in which a reduc-
-tion of 9½ per Cent is now proposed.
The whole of the lands including
waste do not however exceed
10 Cawnies of Runjey and 2 Cawnies
of Punjey. The former being capable
of yielding 2 Crops. The Village which is
irrigated from the Chingleput Tank is situated
close to Poolepauktam, the assessment of which

Fort St. George 4th March 1816.

was lately revised by Mr Maclean as
stated from Para 78 to 91 of his final
report and the lands are of the same
description. The highest rate for
Assessment per Cawney including the
2nd Crop (which was formerly fixed
with reference to the high prices of
some years) is 3½ Pagodas, a rate above
the capability of the lands and the
responsibility of a fixed money assessment
though the extent of the lands being
small they have generally been
Cultivated. The reduction now made
in consideration of these circumstan-
-ces shews a decrease of 5 and odd
Pagodas in the net Brij of the Sheigal
lands, which reduces it to Pagodas 49-
the average being 3 Pagodas per Cawney
including the 2d Crop. The present revised
rates are equivalent to those fixed in
the adjacent lands of Poolepauktam.-

65 The Village of Coothumbaidoo
in which a reduction of 8 per cent has
now been proposed is included in the 22
Village

Fort St. George 4th March 1814.

Villages latterly assessed by Mr. Smalley.
It has a small Tank capable of
holding 3 Months supply of water
In. 1210 and the three next years
the whole of the 12 Cs of Ryoty lands
being cultivated a revenue ranging
from Pagodas 158 to 197 was
derived, but the subsequent revenues
were not so favorable. The assessment
proposed by the Tahsildar on the
average price of grain for 22 years
or 48 Meracks per Pagoda on 90 Candies
of Sheigal lands was Pagodas 93 which
was confirmed by Mr Smalley &
adopted by Mr Babington, In
consequence of the heaviness of this
assessment the cultivation and Revenue of
this Village have since 1233 when Mr
Babington introduced the assessment
fallen off even in favorable seasons. The
proposed reduction in this Village therefore when
viewed with regard to the last revenues or the
condition of the lands is indispensible.

66 For the Village of Tundray the remission of

Fort St. George 4th March 1814.

of 8 per Cent. from the Assessment of the
Tahsildar as recommended by Mr Smalley
appears to me reasonable. A reduction there-
fore equivalent to that sum has now been
proposed - sufficient grounds could be assigned
if necessary for the reductions made in the remaining
Villages, but the details I have now offered will
probably be considered sufficient.

67 I shall now advert to the 13 Villages mentioned
in Para 56 in which as I before stated, I propose
partly from a consideration of the Assessment being
informed on too low a scale with reference to the probability of the
Soil, and partly from the conviction of the impolicy of approximating the rate
in them to those paid in the neighbouring Villages where
the lands are of a similar description, to raise the
Assessment at present in force. There are in these Villages
178 Cs of Ryoty land irrigated by Tanks. The proposed
increase of Assessment on which amounts to Pagodas
128 the aggregate being of these Villages including this
Amount with the revenues of the dry lands and
ready Money Collections, which are very inconsiderable
varies in the respective Villages from 8 to 45 per Cent.
the average being 16½ per Cent. as will be observed on the following Statement
No. 11 of these Villages are included in the 125 Villages in which the Settle-
ment was first formed and the remaining two in the 22 Villages subsequently assessed
by Mr Smalley.

Sanderson

68 Tauderwandy one of the 13 is uninhabited, the Meerasidars having lands and residing in the neighbouring Villages. In 1210 there was no wet land cultivation, and only 10 Cawnies of Punjah, from which the trifling sum of 1¾ Pagodas was derived. The permanent assessment of this Village was 2¾ Pagodas. It was under Mootadary Management upto 1229 during which period it was rented to the Meerasidars for 10 years on a progressive rent increasing from 4 to 13 Pagodas. The Cultivation during this period was greatly extended, in some years the actual produce having amounted to 25 Pagodas, soon after the reversion of this Village under Amanay the Survey was Commenced, and for two years before the field assessment was finally introduced, it was rented to the Meerasidars on the Average Revenue of past years. The extent of Nunjy Sheigal lands Amounts according to the Survey Accounts to Cawnies 14 8/16. The assessment for which proposed by the Sirtarumdar and

said which has been confirmed was Pagodas 12-1/2 the Average being 13 as per Cawny. The Assessment now proposed by me for the same lands Amounts to 17 Pags. 11 as 7/16 the Average being 1 Pag. 3 as per Cawny there are also 7 and odd Cawnies of Nunjy Land and 9 C. 7 as 7/16 of Punjy land, the total Assessment proposed therefore Amounts to 25 Pagodas.

Description of Land.		One Crop.				
		Irrigated by Tanks.				
		Nunjy.				
		Sheigal.				

This Village has a Tank and a Tangul the former irrigating the lands which are generally of a good quality for 6 months. The estimated produce of the Land and proposed assessment are noted in the margin.—

69 In the Village of Tarrapauthum about 27 Cawnies of wet land were Cultivated in 1210, a Beriz of 30 Pagodas being realized

For Ft. St. George 4th March 1841.

realized. But the Cultivation and Revenues of the Village were greatly decreased when the Village reverted to Government from the hands of the Shrotriar. Prior however to the Survey being introduced it had been rented for 10 years to the Shrotrasidars at a reduced Amount. The Sirtarumdar then proposed a Berij of Pagodas 23-9 for the Shaigal lands or 13 3/4 as per Cawney which was approved of for the settlement. There is a Tank capable of holding 4 Months supply of water and the lands are generally of a good quality. The assessment now proposed by me with reference thereto and the means of irrigation is 1-3/4 as per Cawney and the Aggregate Berij including Tarpey is 32-6 1/4 as to which the assessment of the arable wastes being added the total Berij as now suggested is Pagodas 36-13 1/4 as. The assessment of the Sirtarumdar will be found to be very much below the Average of years prior to the Permanent assessment whilst that now proposed approximates to it.

Fasl 1218

July 23d 1832 at 20 Pags per annum

70 The Villar taluk about 43 Cawnies of wet land were Entwated in 1210 F. from which a Revenue of 53 and odd Pagodas was derived, but the Actual Collections of preceding years was higher. The rate of assessment proposed by the Sirtarumdars which was adopted as the Settlement was 1-3/4 as per Cawney the aggregate being 38 Pagodas on 36 Cawnies of Punjey Shaigal lands. To this however the arable lands being added

Comp. Ft. R.

Fort St. George 4th March 1841

added the Total quantity amounts to 43 cx as in 1210 F. The assessment now proposed by me for the Shaigal lands is 1-9 Pags 11 as 7/8 the average per Cawney being 1-5 Pags 7/8 as. This Village has a Tank and a Tongle, the first irrigating the lands for 3 Months. The proposed assessment including the Laikh Punjey lands amounts to 36-6 Pags 3/4 as.

71- The assessment proposed by the Sirtarumdar for the lands of Kaurnay and according to which the settlement was formed, was 12 7/8 as per Cawney, whilst the rate now proposed is 1-1/8 Pag as. The average collections of the 22 years from 1210 to 1231 gives Pagodas 1-1/8 per Cawney, the assessment formerly fixed is very much below the averages of past years and the actual capability of the lands. This Village has a Tank containing 3 Months supply of water.

72- Having thus explained the modification which I consider it expedient to suggest, I would here insert an abstract statement of the remaining 103 Villages, the existing assessment in which as I have already stated to be in my opinion commensurate with the conditions and resources of the land. a more detailed statement for these Villages is also transmitted

73. The annual reduction of 11 and 2 per Cent on the rates of assessment in the Villages of Ootthiembaukum and Ottevaukum as entered in Paras 51 and 53 and which now annually appear under the head of remissions in the Summahbundy Statements would in the event of the assessment now suggested receiving confirmation no longer be necessary, as the amount of remissions now allowed, have been taken into consideration with the natural productiveness and capabilities of the land. The annexed small statement exhibities the rates of assessment first enforced on the different classes of Nunjey lands in these Villages, the proposed reductions and the result.

74. In 65 vsb of the 145 Villages in which the assessment was introduced by Mr. Babington, a consolidated Teerwa was fixed upon the double Crop wet lands, but in two of them Viz.t. Nattum and Poolepan-
Paras 52 & 54. -Rum for the reasons assigned by Mr. Maclean in his final report, those rates were revised, and an assessment calculated upon the pro-
-duce of a single Crop fixed upon the double Crop lands, declaring them liable to an additional cess of one half the original amount when cultivated with a second Crop; I have now revised the rates in the remaining Villages as also in Oodiem-
-bauRum on similar principles, the re-
-sult on the extent of 646 Cawnies being a net decrease of Pagodas 34. the details of which are exhibited in the subjoined State-
-ment.-

																net decrease	24 9 5/8

75 These remarks will I trust be sufficient to explain the grounds of my suggesting what might and particularly in some of the Villages where the percentage is highest at first appear an enormous increase but the general result of the revision of the Settlement in 145 Villages is a decrease of 15/15ths per cent on the previous Settlement introduced by Mr. Babington and an increase of 3 3/4 per cent on that suggested by Mr. Smalley. Should more detailed Statements be required they have been prepared in the native language and can be forwarded for the examination of the Board, but in truth I do not think the correctness of any Settlement can be justly judged of by a reference to accounts or from any figured results that may be exhibited in a report, a personal inspection of the Villages and a Knowledge of the Country is I conceive indispensably requisite to form a correct opinion on the matter.-

Decrease — 186 6/4
Settlement of Mr. Smalley — 18,954 11/12
Present Proposed Settlement — 18,949 5/12
Increase 714 — 10

76- Mr. Maclean in Para 102 of his final report on Survey of this District states as follows- "Mr. Smalley having made no arrangement

"arrangement regarding the assessment on "Gramanuttum Totacal lands in any of the Villages "settled by him, the ummary rates continued in force "until they were revised by Mr Viveash - I "would now suggest that as much of the Grama- "nuttum Totacal lands cultivated with valu- "able products the whole of the rates of assessment "on land of this description in the Taloocks above- "mentioned should be revised, and single Teerwa fixed "with reference to its productive powers and facilities of irrigation" In conformity with this suggestion I have revised the Gramanuttum Garden lands of the 141 Villages subject to the Chingleput Taloocks fixing a permanent Teerwa on the principles adopted in the other Taloocks, the highest rate being 5 Pago-das, and the lowest 2 Pagodas per Cawney:-

Conjeveram Ootramalore Tarangoly Seroperoor Chinglepute

Rate per Cawney	Extent of Land		Berij-	
Pagodas-	Cs.	ax.	Pgs.	ax.
5	"	3/4	"	3 3/4
4	34	6 7/8	137	11/2
3	29	6 1/8	88	2 3/8
2	21	4	42	8
	85	1 3/4	268	9 5/8
Average per Cawney	---	--- 3		2 1/8

77- I must now advert to the Survey assessment of Voyloor conducted under the Superintendence of Mr. Ellis and regarding which I have also been instructed to report.

78- Mr. Maclean in his Communication of the 31st July 1839 from Para 7th & details the method adopted by Mr. Ellis in framing his settlement: the entire lands of the Village having been formed into Tuttics or Divisions, extending to 26 in number. In these Tuttics the immemorial waste and Pourmboke lands were included, but only on the actual extent of the lands then available for cultivation, varying in the different Tuttics from 1 to 140 Cawnies, were respective rates of assess- ment

ment determined, the extent of the lands

A— as
Nunjey- 1415- 2 3/8
Punjey- 360- 4 5/8
1775- 7

thus assessed amounted to Cawnies 1775- 7 as noted in the margin.-

79- The whole of the lands have now in communication with the Ryots been renewed, classed, and numbered, & distinct rates of assess- ment suggested on each field in lieu of the general rate fixed on each Tuttly-

80- No material difference has occurred between the result of the present and former measurement of the Nunjey and Punjey lands entered in Mr. Ellis' Accounts as available for Cultivation, through there is a considerable disparity in the Anadi and Pourmpoke Lands from their having formerly been entered upon estimate in lieu of actual measurement- The subjoined Statement exhibits the extent of the lands of the Village of every description as entered in the former accounts and as now ascertained upon the resurvey.

Particulars

Fiat 5th George 4th March 1841-

Mr. Ellis's Present Survey-

Fiat 5th George 4th March 1841-

81- The Nunjah and Punjah lands have been divided into 5. and 4 classes respectively, whilst the aggregate assessment at present suggested upon the 1415 Cawnies of web land included in Mr. Ellis's operations, amounts to — Pagodas 1498 being Pagodas 92 in excess of the former Beriz. the average per Cawney under the former assessment was Rs. 3-7-8 15 7/8 x and that of the proposed assessment is Pagodas 1— 7/8 xx Rs. 3-11-4 but if the aggregate of the proposed assessment on all the Lands with

with the exception of the Poirumbake
be compared with the assessment
framed by Mr. Ellis including the
waste rated for the purpose of
comparison at the amount of the
assessment per Cawney on each
respective Sutty, then the former
will appear to be less than the
latter amount in Pagodas 116.—

82 The proposed assessment
on the 360 Cawnies of Punjey Lands inclu
ing Laikh is Pagodas 183-5, whilst the
former
