Vol 1746

1746

365

127

Fort St George 4th March 1841-

formerly fixed on them is Pagodas 205-
-15. the Decrease being Pagodas. 22-10-.
This Decrease is necessary owing
to the former rates on a portion of
these lands being too high - as
stated by Mr Maclean in Para
74. The average of the assessment
now suggested is Pagodas 1/2 whilst
that of the former assessment is
9/8 annas.

83 The assessment on each class
and description of land as at present
proposed and as it formerly stood,
together with the former and present
settlements is noticed in the annexed
statement -

84. I must next proceed to the consideration of the assessment framed by Mr Hepburn in the Madurantacum and Conjeeveram Moo-tahs regarding which Mr Maclean in his final Report from Paras 51 to 56. has submitted some information. The following are the four points to which my attention was chiefly directed.

Villages.
Madurantacum Mootah 16
Conjeeveram Do 41

1st The classification of the waste lands and reexamination of the survey.

2nd The separation of the consolidated Teerwah on double Cropt lands.

3rd The Correction of the Punjey assess-ment in the Madurantacum Mootah, Mo-difying it with reference to the capability of the soil instead of the description of produce.

4th The Assimilation of the assessment on the Gramanettum Totacal lands as it exists elsewhere.

85. In introducing the survey assessment into these two Mootahs in Fasly 1213. Mr Hepburn classed

classed and assessed only those portions of the Nunjey and Poonjey lands which were then or had lately been cultivated, leaving the immemorial waste and Poramboke lands unsurveyed and unassessed. The remeasure-ment of these Mootahs has now been completed together with the further process of number-ing and defining the boundaries of each field.

86. In the Madurantacum Moo-tah to which I shall first refer, the ex-tent of Nunjey land which was divided into sorts and subdivided into classes, in-cluding those yielding double Crops, amount-ed at the period of the 1st survey to 1316 acres only the Beriz being Pagoda 2,212. since then 1578 acres of waste have been gradually se claim-ed on which temporary assessments corresponding with the rates fixed on the adjoining lands have been levied and brought to account during

the

Short Stage at March 1874.

the annual Summarkhamsley the ag-
=gregate amount - on the 25th being
Pagodas 2/574.

87. Shareholding - and shipping the
Shares of this Protect, including
wants to Land - of this Protect, including
those entitled subsequent to the in-
-troduction of the settlement, the shipping
= cotton - and Appurtenant fixed by allot
Reference - on the adjourning lands have
been - and taxed to in all practicable Cases
In eight Villages however comprising
of 315 of wet land - a different classification
has still been carefully - determined
in conformity with the general principles
= applied - adopted by this Settlement
in certain existing and should abiding the
Manuwirans - or Overseers Share of
the produce. He duly pays Proportion
reducible the actual and benefit of the Ryots
land - rainy Cycle - and applied by the -

Short Statement of March 1874.

Name of Village & Number of Survey Field	Classification of Soil	Extent of Land	Assessment	Remarks

Ramanakoil Pagoda				1932 3 1/2 2180 1/2
Total				3732 15 1/2 4537 7 1/2

88. There are two causes from which this increase of 216 Pagodas in the proposed assessment as shewn in the above Memorandum arises. The first of which is that a portion of the waste lands situated under the Maduranta cum Tank and reclaimed subsequent to the settlement of Mr. Hepburn, have hitherto been held on bilmuta Teerwahs comparatively light and disproportionate to their capability, but by assessing which at the rates prevailing on the adjoining lands of a similar quality, an increase of Pgs. 71-4 3/8 has been gained.

	Bilmuta Teerum hitherto collected.				Assessment proposed.					
	Extent of land.	Per.	average	Extent of land.	Prop.	Per.	Total	Amount. average	Increase
1	2	3	4	5	6	7	8	9	10	
	Cha.	Pgs.	Ps. a.	a.	Ps.	a.	Ps. a.	Ps. a.	Ps. a.	
One Crop	63	9 5/8	49 9/16	12 3/8	35	15 5/8	51 8/16	31 8/16	14 4 4	
Two Crops	2	12 5/8	11 5/8	4 1/8	30	6 3/8	66 12 5/8	33 6/16	18 2 7/8	3 4 7/8 4
	66	6/16	60 6/16	16 1/8	66	6/16	98 4 7/8	33 6/16	31 1 1/8	1 15 1/16 71 4 3/8

The latter causes is that the averages on which the former settlement was framed were calculated at very low rates, originating in the peculiar circumstances under which the settlement was made. The lands of 12 of the 16 Villages comprising

any right to enjoy them in perpetuity on the same favorable terms, the light Teerwahs having been merely fixed by the then Collectors in the ordinary course of the settlement, without reference to or the granting of any specific bowles and being of course dependent upon the adoption of any general measures.

89.

	Extent of land.	Assessment hitherto paid.		Assessment proposed.		Increase	Decrease
1	2	3		4		5	6
	C. a.	Ps.	a.	Ps.	a.	Ps. a.	Ps. a.
Lands newly assessed	316	12 1/8	226	5 1/8	302	14 3/16	76 9/16 4
Lands incorporated with former Claim and assessments	516	3/4	528	9/16	598	8 5/8	69 15/16 4
Lands of which the former assessment is considered proportionate	679	9/16	1339	10	1338	4 4	1 6

						Net	145 2 2/4

comprising the Mootah are situated
under the large Tank of Madurantaka-
+ 1205 & 1206. -cum which had been completed on-
-ly a few years when Mr. Hepburn
entered upon the settlement, the
cultivation therefore had neither
reached a fair level, compared as
with the facilities afforded, nor had
the population become sufficiently
extended to carry it on to the
point it has since reached. Hence
the average of the actual Collections
From 1205 to 1212. of the preceding 8 years on which
Mr. Hepburn calculated his berij
was comparatively so low that
the Assessment fixed by him was
lighter in many of the Minor
Villages than the Assessment exis-
-ting on similar lands in the neighbouring
ones

-ones. -and as the lands in them which
have been since reclaimed were tempo-
-rarily assessed at rates having reference
to the original settlement, the general
result was an assessment below what
the lands could easily bear.

90. In order to exemplify the light-
-ness of the rates of the gross produce and
Assessment fixed by Mr. Hepburn as above
stated. I beg to subjoin a statement shewing
the Classes of land in several Villages, the
quantity of gross produce calculated for
each class, and the rates of Seerwah
deduced therefrom, in commutation of
the Muliwaram. It will be observed that
the average rates of the above Assessment
are not only below the Assessment on
Poorijah lands in these and the
adjoining Villages, but also less than the
average rates fixed on the Maniavary Nunjey
lands, possessing no certain means of irrigation,

Fort St. George 4th March 1841

91 A comparison of the rates of assessment fixed by Mr Hepburn with reference to the then existing circumstances before detailed, upon the small portion of the lands in cultivation with the rates now suggested by me upon the lands on which no assessment was determined, exhibits so great a disparity and such inequality in the rates to be borne by adjacent lands of similar capabilities watered by the same Tank, and even by the same Channel, that I have considered it expedient to suggest a revised assessment on those lands also such inequalities being manifestly inconsistent with the general principles of the survey assessment.

But

Fort St. George 4th March 1841

But in consequence of the former rates of assessment having received the sanction of Government and been acted upon for many years I have not included the probable increase arising from the proposed revision in the general Settlement now made by me. However on the grounds above stated the Board should consider with me that the rates of assessment on this comparatively small portion of the lands should be raised with the view of equalizing the assessment and fixing it upon uniform principles, the increase will be as exhibited in the subjoined Statement.

Statement

Irrigated by Aliar Anicut Channel

92

Of the 1,316 cx of Sunjey land included in Mr. Hepburn's Settlement 279 3/4 cx situated in 8 Villages were assessed with a consolidated Beriz as double crop lands the Beriz accounting

	cx	Beriz
Single Crop land	1036	1170
Double Crop land	279	1042
	1314	2212

to Pags. 1042 — In revising which however and fixing a distinct cess for the 1st and 2nd Crops, I have discovered that 10 Cawnies were erroneously included under that head, in consequence of their having in the year of the survey been sown after the production of a Crop of Paddy with an inferior crop of Pessalu. — On the remaining 269 Cawnies the assessment as now separated is for the 1st Crop Pags. 667 and for the 2nd 333 Pags. the aggregate Beriz being 1000 Pags. On the 10 Cawnies which have been deducted as above stated the consolidated assessment as entered in the accounts of

of Mr. Hepburn's survey were as shewn in the Margin. — In lieu therefore of dividing the aggregate assessment into two thirds and one

	Value	Amount for 10 cx
Mailvarums on 13 cx of Gross Produce of Paddy	Pgs. 4	as 12 cx. as. 40 — 5
Do. on 3 Mercals of Do. of Pessalu	— 3½	2 — 3
	4 — 4.	42 — 8

third as is the actual average of the assessment on the lands upon which two Crops of Paddy might be raised, the additional assessment of 3½ As. per Cawney has been struck off, leaving the assessment for the 1st Crop at the same rate as fixed by Mr. Hepburn. — To have adopted any other arrangement would have unduly lowered the amount in comparison with the land and the rates of assessment in the neighbouring fields. —

In the settlement of this 93 Mottahs 288 cx of Sunjey land were included

included upon which the rates of Teerwa

	Pags	as
In the Village Carangooly.		
Teerwa ppr Cawney if cultivated with Ratchery and Ionnaloo	1	1
Do. ppr Do. if cultivated with Varagoo & Cumboo	"	15
Do. ppr Do. if cultivated with Horse Grain	"	3
In other Villages.		
Teerwa if Cultivated with Ratcherys and Varagoo	"	14
Do. if Cultivated with other sorts of Dry grain	"	10

noted in the margin were collected according to the description of produce that might be raised, the higher rate being for lands cultivated with Ratchery and Ionnaloo, and the lower rates for those cultivated with grains of inferior value. The amount of Teerwa on the above 288 ex amounted in Fasly 1213 to Pags 241 — 14. Subsequently however about 717 Cawnies of Punjy land (some of them being Podoocal or cultivated in alternate years) have been reclaimed, the same rates of Teerwa being from time to time collected. This plan of collecting the Government dues on Punjy land according to the description of produce instead of on the soil is directly opposed

opposed to the principles of a fixed money assess=ment. I have therefore with reference to the plan adopted in other parts of the District reclassed them with the rests of the Dry lands of this Mootah, fixing a permanent money assessment with reference to the capability of the soil. The dry lands generally have been divided into three classes. The highest rate of assessment in any Village being 1 Pagoda, and the lowest ½ Pagoda ppr Cawney.

In this Mootah Mr. Hepburn 94. also established a ground rent at the rate of 1 Pagoda on the Gramanuttum Totacal lands including those occupied by the Inhabitants, i.e. as sites of houses and backyards,

	Pags	as
Including in Mr. Hepburn's Settlement	118	9½
Since brought to account	77	13½
	126	6

and at which rate a sum of Pags 126 has been collected. To shew that this System was incorrect requires I think no argument.

I

I have therefore proposed in the revision of the assessment to exempt in favor of the Ryots a reasonable portion thereof amounting to 69 cs which will be sufficient to form the sites of houses & and backyards. there will then remain only 57 cs under the head of Gramanuttum Totacal Lands the assessment on which has been suggested with reference to the capability of the soil and the respective facilities of irrigation and with reference to the arrangements in force in other parts of the District and amounts to

Rate per Cawney	Extent of land	Amount of assessment
At 3 Pagos	56-7½	169-6½
At 2 Do.	" - 2¼	" - 4½
At 1 Do.	" - 11⅜	" - 11⅜
	57 - 5⅛	170 - "

Average 7pr Cawney 2 — 15½

Pagos 170-6⅜ as the average 7pr Cawney being a little less than 3 Pagodas. The net amount is rather higher than the amount of Ground rent at present collected - but it must be borne in mind that as this revenue depends on the quantity of land actually cultivated the full amount will seldom be realized. the measure appears necessary and expedient with the view of assimilating the Teerwa on these lands with the rates in force in

in other parts of the District.

95. Besides the Gramanuttum Totacal lands on which a Ground rent was established by Mr. Hepburn, there are in 6 Villages 29 Cawnies of the same description, some of which are usually cultivated. - No arrangements having been made by Mr. Hepburn with respect to the Government land cess thereon, it has hitherto been collected according to the high rates which prevailed during the aumany Management. - In 1214 about 3 cs 11¼ were cultivated, which was subsequently extended to 9 cs - The remaining portion is immemorial waste - I have now assessed these lands with a fixed money rent according to their capability. amounting to Pagos 27 - 2¼ being on an average 3 Pagos 7pr Cawney -

	Fl.	cs	as.
Cultivated in 1214	3	—	11¼
Subsequently Cultivated	5	—	5⅜
Uncultivated wastes	20	—	1
	29	—	3/4

96. I now beg to submit here under an abstract statement shewing at one view the settlement of all lands in this Mootah as it formerly existed and now made by me with a few other particulars - a more detailed statement prepared in the native Language is also submitted. —

Fort St. George 4th March 1841.

97. I must also before closing my report on the revision of this Mootah bring under the consideration of the Board the subject of a small Village called Erossamanellore situated near Carangooly which has been newly classed and assessed by me on the prevention occasion the measurement of the lands having been completed during the survey of the Carangooly Taloke in Fusly 1232. This Village was formerly uninhabited and prior to 1211 was cultivated by the Meerasdars of the neighbouring Village of Kenar, but from that period to 1220 it was rented by Mr. Greenway then Collector to Vurdapah Naick Subidar, and Nungiah for 10 years conferring on them also the Meerasy rights, the former occupants having resigned all claims in their favor. A Copy of Mr. Greenway's Cowle to these two individuals is submitted with a list of the Teerwa proposed by him, being 7/8 Pags. for Cawney on the wet land including

Fusly	Beriz Pags.

Vide Enclosures marked S and T

including Summah meerah and ab 1/2 and 3/8 the Pay
pt. Cawney on the Punjey lands varying with the
description of Produce raised - at the termination
of the above lease, the Zemindar of Palayancot
in whose Mootah the Village was included,
again rented it to the same parties from 1221
to 1225 after which on its reversion to Government in 1226
the produce was rented for that year on an
Estimate of the Crops - Since then however to the
present period the rates of Seerwa alluded to
in Mr. Greenway's Seerwa Zabitah have been
acted upon - Beyond the Copy of the Cowle
Submitted and the Seerwa Zabitah no other do-
cuments respecting the rents of this Village
can be procured either from the records or
from the Cowle holders, and the conditions of the
Cowle evidently do not establish the Seerwahs
in perpetuity. The Nunjey and Punjey lands have
now been divided into 3 and 2 classes respectively
and assessed with due regard to their capability, taking
the cultivation of 1232 as the basis of the Settlement
the

The extent of land in the different Classes, the
rates of Assessment fixed, and the total amount
of the proposed Assessment, together with the
Collections of 1232 are exhibited in the subjoined
Statement. The lands of this Village are watered for
4 Months by the Tank belonging to the Village
of Kenar when full, notwithstanding which and
the lightness of the assessment the
Cultivation has not been carried on to the
extent it might have been, owing to the
Meerasdars neither residing in the Village, nor
exerting themselves in the Cultivation. The
actual collections for 12 Years are exhibited
in the Annexed Memorandum —

98. In introducing the survey assessment in Fusly 1213. into the Conjevaram Mootah consisting (excluding one granted on a Permanent lease) of 41 Villages, Mr. Hepburn adopted generally the system he had pursued in the Mootah of Madarantacum, dividing the Wet land into four general classes, each class being again subdivided into Sdus or Minor Sorts. the assessment thus framed continued undisturbed till Fusly 1217 in which year, as will be seen from the Correspondence noted in the Margin, Mr. Cazalet then Collector materially changed it, by abolishing the subdivision of the lands into minor Sdus or sorts, and assess-ing them at the highest rate formerly assigned to each class, and having accordingly conducted the settlement of that year, submitted the circumstances in his report to the Board who in their Proceedings as also in their letter to the Collector under date the 5th April 1808 directed that the Assessment

Tinmasamoodrum.

Summabundy Report for 1217. dated 5th March 1808. From Board 5th April. To Do. 17th ditto. From Do. 9th December with an Extract of Proceedings dated 15th September

assessment originally established by Mr. Hepburn and confirmed by them, should be adhered to, but although Mr. Cazalet in his reply to the Board stated that he had so revised his Arrangement in conformity with their instructions, it would appear that the settle-ment of the Conjeveram Mootah was again conducted in Fasly 1218 as in the preceding year. From that period or From Fasly 1219 to the close of 1232, this Mootah was held under differ-ent Village leases for one, three and ten years, since which or from the commencement of 1233. the Assessment as revised and enforced by Mr. Cazalet in 1217 and 1218. has been acted upon. In two Villages however called Nuttapettah and Teroo-vadipullum, the Assessment under the orders of the Board as conveyed in their Proceedings under date the 25th January 1827. was lately revised by Mr. Maclean and reported upon in his final report Paras 51 to 61—

assessment originally established by Mr. Hepburn and confirmed by them, should be adhered to, but although Mr. Cazalet in his reply to the Board stated that he had so revised his Arrangement in conformity with their instructions, it would appear that the settlement of the Conjeveram Mootah was again conducted in 1218 as in the preceding year. From that period or From 1219 to the close of 1232. this Mootah was held under different Village leases for one, three and ten years, since which or from the commencement of 1233. the assessment as revised and enforced by Mr. Cazalet in 1217. and 1218. has been acted upon. In two Villages however called Nuttapettah and Peroo-vadipullum, the assessment under the orders of the Board as conveyed in their Proceedings under date the 25th January 1827. was lately revised by Mr. Maclean and reported upon in his final report Paras 51 to 61.

Vide Paras 1243.

99. In Para 14 of the same Proceedings

Proceedings the Board observed "that adverting
"to the arrangement of Mr. Cazalet which appears
"to have entirely subverted the plan of Assessment
"introduced by Mr. Hepburn, the Board think
"it necessary to call upon the Collector to report
"more fully upon the subject. They desire to know
"whether all the assessed Villages in the
"Conjeveram Talook were included in it, and
"how it has operated in practice, Considering
it abstractedly it appears to the Board that
"it must have had an injurious effect in every
"case, for if the original classification was proper,
"none but the highest class in each sort of land
"can now under Mr. Cazalet's arrangement be
"fairly assessed, the rest must be taxed in an
"inverse ratio to their productive powers. if it has
"been general, and the Cultivators have been able
"to pay the increased tax upon the poorer lands,
"under such circumstances this will only prove the
"general moderation of the assessment which may nevertheless
be

be very unequal - The subject is of importance
and the Collector will be pleased to give his attention
"to the investigation of it, at a convenient
"period."

100. The alteration effected by Mr.
Cazalet in the assessment affected only 29
Villages as in the remaining 12, though the
same principles were adopted, it so happened
that in none class were there more than one
Idu or sort of the 29 Villages, the assessment

†Nuttapettah and Peroweedepallum Vide Para 59 to 90.

of two has been revised and reported upon
by Mr. Maclean. I shall therefore now

101. In considering the assessment as introduced by Mr. Cagalet, three points appear to call particularly for notice: Viz.t. 1st. whether that assessment generally has been found by experience excessive or otherwise: 2ndly. whether there was any necessity originally for the subdivision of the classes into Idus and 3rdly. whether by the alteration the inferior Idus are not assessed beyond their proportionate powers when compared with the superior one. Before proceeding to offer my opinion on these points, I beg to submit hereunder a statement exhibiting the means of irrigation in 5 Villages, the multiplicity of the number of Idus as established by Mr. Hockburn with the small extent of ground comprized in each, the insignificancy of the difference in many instances between one Idu and the other in regard to the gross produce and the rates of commuted assessment, as also the increase in the assessment on the inferior Idus, in consequence of their being assessed by Mr. Cagalet with the rates of the highest Idu of their Class.

Sic

1841.

The Memorandum in the Margin which was abstracted from the above Statement also shews the increase of assessment as effected by Mr. Lazalet in the details of each Idu / save the 1st / as compared with the others, and which amounts in the aggregate to each of the 5 Villages varying as follows.

Salabhogum from 3 to 30 per cent.

Woolyoor

1841.

| | | |

Woolyoor from 1½ to 28 per Cent.

Aureyaperoombaukum from 3½ to 37 per Cent.

Soolungaunthandacherry from 7 to 50 per Cent.

Aupatchayemputtaday from 2 to 12 per Cent.

103. In respect to the system adopted by Mr. Hepburn of subdividing the lands into so many classes extending as high as 12 in the Village of Salabhogum comprizing only 65 cawnies, to 12 in Woolyoor containing 126 Cawnies, to 16 in Aureyperoombaukum in which there are only 65 Cawnies of wet land, to 9 in Solungunthondacharry with but 27 Cawnies, and 8 in Aupatchayemputtaday with but ten Cawnies, I cannot but consider the arrangement to have been not only unnecessary but inexpedient, for although it might appear very well in theory or on paper to exhibit the

the Lands so minutely subdivided into classes corresponding with the productive powers of each field, yet particularly so minute a division must be fallacious. Had this not been the case, the remarks of the Board considering the question abstractedly as quoted in Para 99 would undoubtedly have been true but a reexamination of the lands and the better test the actual experience of the Cultivators has proved that the difference in the estimated productive powers of the different Idus were erroneous and that the arrangement of Mr. Boazalet was not generally oppressive on the lower classed Idus.

104. Notwithstanding the alteration that has been effected, the general assessment as now acted upon in 24 of the 27 Villages appears to be sufficiently proportionate to the capability of the respective lands, and by no means immoderate. Had such not been the case, the cultivation of those lands the assessment on which has been raised would have been affected and they would have been abandoned, but on the contrary the cultivation of those classes of land has been carried over the fullest extent, whilst a large portion of waste land of

Fort St. George 4th March 1847.

a similar description and assessed with the same rates has also been brought into cultivation the saleable value too of the Lands in these Villages has increased, any portion of them quickly finding purchasers at high rates, though this is no doubt partly to be attributed to their vicinity to Conjeveram.

105. Paloodappuda Moolay, one of the 3 excepted Villages above referred to, is situated close to Conjeveram. The whole extent of land does not exceed 1cs 11 — 1as in Shaigal and 3/4 in waste. It has a common tank and enjoys a share of water flowing from a small spring channel. The assessment fixed by Mr. Hepburn on the above shaigal Lands in the Iduar principles was Pag. 4. 4. — 14 3/4 the average being inclusive of the second crop Pag. 4 — per Cawney whilst the assessment fixed by Mr. Cazalet in 1217 is Pagodas 4. 9 1/2 — 12 3/4 the average of which including the second crop is Pag. 4 — 8 1/2. The increase above the original assessment is Pag. 4 — 14 1/2.

106. The Lands of Poicholumputtadaj which

Fort St. George 4th March 1841.

which is situated close to the above, do not comprize more than 6 Cawnies which participate in the water from the Tank belonging to the former Village. The assessment fixed by Mr. Hepburn on these 6 Cawnies of land was Pag. 24 — 14 3/8, the average per Cawney being Pag. 4 — 2 3/8 whilst the revised assessment introduced by Mr. Cazalet in 1217 amounted to Pag. 26 — 3/8 or 4 — 5/8 per Cawney. The increase being Pag. 1 — 5/8, the lands of these two Villages are only cultivated to the full extent in favorable seasons. The assessment in force on them being too heavy and disproportionate to the rates fixed on the adjoining lands, I propose therefore that the difference of Pags. between the assessment formed by Mr. Hepburn and that introduced by Mr. Cazalet be now reduced in the rates of the respective Classes without reference to the Iduar division of the land.

107. Timmapiensettah is also a small Village in which Mr. Hepburn assessed the portion of the lands then under cultivation consisting of 12 1/2 as of Nunjey and 10 as of Punjey. The former mentioned lands being watered by means of Codalycanar

Fort St. George 4th March 1841.

"Codalycanar" or temporary wells were divided into two principal classes being again subdivided into 3 minor Sorts as shewn in the margin. The amount of assessment fixed on 11½ cs included in the 1st class Lands being a consolidated Peruvaram, as they were considered double crop Lands, was Pagodas 57—11⅛ as whilst the assessment on the Punjey Lands, which were divided into 2 classes was Pagodas 10. Under the alteration introduced by Mr. Cazalet in abolishing the division into minor Sorts, the Basis of the Nunjey lands was increased to Pagodas 61—10⅜ though no alteration was then made in the assessment of the Punjey or the 2d class of wet Land. The Village is stated to have been established more than a century since by a person named Timmapien, who also formed a Garden on a portion of the lands lying close to the Village, but on his demise without heirs, the whole of the land fell waste and remained uncultivated from the period of the Settlement up to 1223. In this last mentioned

year

Fort St. George 4th March 1841.

	As.	P.	As.
Wet land 5.	6⅞		
Dry land 2—9⅜			
8— "	6.	10	
Puruvaram per Cawney "	13⅜		

year certain weavers residing in the neighbourhood obtained a portion of the lands comprizing 8— Cawnies of wet and dry, on the condition of paying to the Circar a quit Rent equal to the rates fixed on the Punjey lands. They have since erected houses on 1½ Cawney of this land and continue to occupy the remainder, though without cultivating them, paying the quit Rent by dividing the Amount on their Looms. No one in the neighbourhood is at present willing to undertake the cultivation of the Nunjey and Punjey lands in this Village, inconsequence of the Assessment being too heavy. I have therefore proposed such reductions as will I trust lead to these again being made productive and to substantial wells being erected.—

108. I beg to subjoin here a Statement shewing the Assessment originally fixed by Mr. Hepburn on the — — Idwar principles for the above 3 Villages, the details of the increase since made therein, and the reduction now proposed.—

109. Of the 1130 cs of Nunjey land situated in the 39 villages referred to in Para 100, a maniem of 50 cs has been alienated in favor of one Subadar Moottiah Naik. The remaining quantity including the double crop lands is 1080 cs, the assessment on which as revised by Mr. Cazalet and at present in force amounts to Pags. 2,026 – 12⅞ – a portion of waste lands comprizing 468 cs has also been brought under cultivation since Fusly 1214 and on which temporary assessments corresponding with the rates fixed on the adjoining lands have annually been levied and carried to account, the nett annual amount being Pags. 608.–

	Extent of Cawls.	Amount of Assessment
Anadi wastes	2,343 – 13⅝	1,936 – 9¾
Do cultivated since the period of the Settlement	467 – 11⅞	595 – 11⅜
	2,811 9½	2,532 5⅛

110. In assessing and assessing the waste lands with those reclaimed since the introduction of the field assessment, the rates proposed are similar to those in force on the neighbouring lands, the amount of assessment being Pags. 2,532 – 5⅛ –

Included

111. Included in the 1080 cs of Nunjey lands assessed in 1214 and 1217, 247 Cawnies cs are entered as double crop lands.

The amount of consolidated assessment fixed thereon by Mr. Cazalett being Pagodas 1013 – 15¼ – In revising the assessment and fixing a distinct cess for the 1st and 2nd crops, the amount for the former is calculated at Pagodas 657 – 12 – and that for the latter Pagodas 326 – 11⅛ – the nett decrease being 35 – 12¼ –

The greater portion of this decrease however or Pagodas 27 – 9⅛ has occurred in the three Tullays in which I have now proposed to reduce the assessment.

112. In the revision of the assessment of the Granamut Inam Totacal lands of the villages of this Moottah the same system has been pursued as in that of Madrantacum. –

Particulars

3148 Fort St. George 4th March 1841.

113 In conclusion I beg to submit hereunder a short Statement exhibiting the assessment of the 39 Villages included in the Conjeveram Mootah as it was originally fixed and as it stood after the alteration made by Mr. Cazalet, together with the revision now proposed by me. The detailed Statement† of these Villages prepared as in the Native language is also submitted. The trifling decrease in the proposed assessment compared with the assessment revised by Mr. Cazalet has originated from the reductions proposed in the three Villages referred to in Para 108.

114.- Mr. Maclean in Para 111 of his final Report alluded to two Davustanum Shrotriem Villages retained under circar management, exhibiting by two statements the extent of land, amount and rates of assessment fixed on them by Mr. Vincash with those of former years.- The lands of the first of these Villages comprizing 86 Cawnies are wholly munjah being situated under and intermixed with the lands of the Madrantacum Tank, to which they also assimilate in every respect whether as regards natural productive powers, facilities of irrigation or position the rates however fixed by the assessment of Mr. Vincash on those lands are lower than those realized from the lands of

Cuddappairy Caroonacarum = langum -

of Madrantacum.- I have therefore deemed it expedient to suggest a revision of the assessment in order to approximate them.- The proposed increase amounts to Pagodas 22-on the 86 Cawnies or about 20 p.c. Cent. This Village having been rented in 1832 and in the preceding years I have been unable to obtain correct accounts of the actual return of the lands in those years.- In the latter mentioned Village 115. which is a small one no alteration in the assessment upon the wet lands is necessary, though some changes in the rates fixed upon the Punjey lands appear to be called for from their being below the rates in the neighbouring Villages.- The subjoined Table exhibits the extent and description of each kind of land in the above named two Villages the rates of assessment formerly fixed and the revision at present suggested.-

Particulars.

Berij settled by Mr. Vincash	Rupees	115-10 1/2
Average per Cawney for 1st Crop		1-12

Fort St. George 4th March 1841.

116 There remains one other subject to be reported to the Board, which is the proposed survey settlement of two Villages called Mailmadalumboidoo and Coluttoovanjairy which reverted by purchase to Government in 1248. The lands were measured classed and assessed in the same year and the assessment suggested for them pending its confirmation introduced as a temporary measure during the annual settlement of 1249.- The extent of the Shaigul lands with their classification and the rates of assessment proposed on each class, in the two Villages are exhibited in the two separate statements hereunder annexed. The following being an abstract for the two Villages

Amount of Beriz proposed on the Shaigal lands including ready Money Collections	Pags. a 65-5
Actual Collections of 1232 realized by the Mootahdar	1028-8
actual Produce of 1210	675-0
Permanent Beriz Originally fixed	520-5
Subsequently fixed on subdivision	508-4

+ Mailmadalumboidoo Nunjey land - 5 Claſses
Punjey Do. - 2 - Do
Coluttoovanjairy Nunjey land - 4 Do
Punjey land - 3 - Do

The

Compd. J.R.

Fort St. George 4th March 1841.

The high revenue realized in Fusly 1232 arose chiefly, from the Mootahdar having retained the mailvarum grain in store until the market price was 12 Merculs for a Pagodah whilst the proposed assessment is far below that sum in consequence of the necessity of commuting the Mailvarum at 10 Merculs a Pagodah to preserve the Royt from loss, and to enable him to meet the prices of all seasons.

I also submit for the Examination of the Board two detailed statements in the Native Language for these Villages which exhibit the cultivation and Revenue derived annually from 1210 to 1248 with the averages thereof as also the old Berizes for reference.

Description.

Office of the Recorder of Deeds in Hartford

Hartford Records

Volume 4 Page 138

Warranty Deed

Dated 12th January 1250

Recorded 14th January 1250

Witnesses: Thomas Hartwell, Mary Hartwell

Grantor: Samuel Whitfield

Grantee: Elizabeth Whitfield

Consideration: Five hundred pounds

Property: Lot No. 7 in the Second Division of the Town of Hartford, containing four acres, more or less, bounded on the north by the highway, on the east by land of Thomas Hartwell, on the south by land of the heirs of John Whitfield, deceased, and on the west by land of the grantor, with the dwelling house thereon.

Grantor covenants that he is lawfully seized in fee simple of the premises, that they are free from all encumbrances, and that he will warrant and defend the same against the lawful claims of all persons.

Signed: Samuel Whitfield

Witness: Thomas Hartwell, Mary Hartwell

Acknowledged before me this 14th January 1250

Recorded 15th January 1250

Volume of the Land Records of the Township of Millbrook, Page 247

Deed of Conveyance

Grantor: Ephraim Caldwell of the Township of Millbrook, Yeoman

Grantee: Josiah Caldwell of the same place, Yeoman

Property: Lot No. 12 in the Fourth Division of the Township of Millbrook, containing one hundred and sixty acres, more or less, bounded as follows: beginning at a stake and stones at the northeast corner of the lot, thence south forty degrees west one hundred and twenty rods to a stake and stones, thence north fifty degrees west two hundred rods to a stake and stones, thence north forty degrees east one hundred and twenty rods to a stake and stones, thence south fifty degrees east two hundred rods to the place of beginning.

Consideration: Four hundred and eighty pounds lawful money

Dated: 3rd March 1248

Witnesses: Nathaniel Ward, Simeon Ward

Acknowledged before me this 3rd March 1248

Recorded 5th March 1248

Deed of Conveyance

Grantor: Ephraim Caldwell

Fort St. George 4th March 1841.-

119.- Mr Maclean in his final report Para 136 brought to the notice of your Board the indefatigable and meritorious exertions of Pesupatty Narniah the Naib Seristadar of this Collectorate who was placed by him at the Head of the Survey Establishments, and suggested the propriety of conferring on him the retrospective rank and pay of a Head Seristadar from the 1st January 1836.- Having now brought the survey operations to a close, I cannot but put on record how fully I concur in the opinions expressed by Mr Maclean in regard to that individual. Through his labours, patience and unwearying exertion it is but justice to say, is mainly due the difficult task of revising in a manner which I hope may prove satisfactory and without creating discontents to those upon whom it must most heavily bear, a settlement originally fixed on too low a scale and acted upon for so many years I trust therefore I shall not be considered as stepping beyond my legitimate limits in here expressing

Comp'd. T. R.

Fort St. George 4th March 1841.

expressing a trust that the Government will not only comply with Mr Maclean's suggestion, but will extend it until his promotion. Narniah has filled the Office of Deputy Seristadar for a longer period (16 Years) than usually falls to the lot of such persons, which perhaps is partly owing to the manifest inconvenience and detriment it would have occasioned to the Public Service to have allowed him to seek promotion in other Districts.-

Soondungy, 8th Feby 1841. (Signed) A. Freese.
Coll.

Cowle

Fort St. George 4th March 1841

No. 22.

Cowle granted by Edward Croft Greenway Esqr. Collector in the Honorable Company's Sagheer to Vurdaspah Naick Subidar of Invalids and Mungiah.

Whereas the Village of Irisa=manellore in the Palianoor Zemindary of the first or Carongoly Division of the Sagheer laying waste and producing little or nothing to the Circar, Vurdaspah Naick Subidar of Invalids and Mungiah having promised to cultivate and render it productive, provided the Meerassee thereof be conferred on them by Cowle and a lease granted for ten years, and the Meerasidars of Illenar who have hitherto carried on little cultivation ac==tually having Voluntarily relinquished their claims in favor of the aforesaid Vurdaspah Naick Invalid Subadar and Mungiah, I have agreed to accept their offer accordingly

I therefore hereby confer on Vurdaspah Naick and Mungiah and their heirs the Meerassy of Irisamanellore aforesaid

Fort St. George 4th March 1841

aforesaid, so long as they shall continue to carry on a proper cultivation, pay all just dues and be obedient to the Circar.

The Village is to be enjoyed in two shares Viz.: one half by Vurdaspah Naick, and one half by Mungiah.

The rest of the Village is to be as follows Viz.:-

	Pagodas
Fusly. 1211	3
1212	4
1213	5
1214	5
1215	6
1216	7
1217	8
1218	8
1219	9
1220	10
Total for 10 years	65

The Village Mauniems and privileges they are to enjoy are specified in an accompanying Gentoo list under my signature

Given under my hand and the seal of my Office in Carongoly this Nineteenth of December one thousand eight hun=dred and one.

Signed C. C. Greenway Collr.
