ool

Fort St. George 16th May 1842

12 To both these causes, do I attribute the unwillingneſs manifested by the ryots to the introduction of a survey and aſseſsment into the Village of Kytapilly. The ryots were impreſsed with an idea which was encouraged by the head inhabitants and Curnums that the aſseſsment both in the aggregate and in detail, would be exceſsively high, and that whatever might be the extent of cultivation or produce, they would be called upon to pay the aſseſsment of the fields occupied by them. By explaining to them, however, that the aſseſsment was calculated on the average produce and prices of a series of years, embracing a due proportion of good and bad seasons, and that the demand would hereafter be regulated by the actual extent of Cultivation or to speak more plainly, by the aſseſsment fixed on the fields which might be cultivated & prove productive; and finally by shewing them the amount of aſseſsment which

they

Met

will be Rupees 1-6-5 for the dry lands, & Rupees 3-„-3 for the wet lands, and with reference to Col: 25 & 55 of the abstract Statement No 1, it will be found that while average grain assessment per acre remains nearly the same the average assessment in Money has been reduced by 4 as – 2 p per Acre, in the Dry, and 7 as – 6 p in the Wet lands, in consequence of a reduction in the prices of commutation. But tho' there is a reduction in the assessment per acre, it is clear, that if the present cultivation be much greater than the average cultivation of 6 years from Fusly 1245 to Fusly 1250, the present aggregate demand arising from the lands under cultivation will also rise in the same proportion, and may nearly reach the amount of the former average collections; thus the average cultivation of the said 6 years amounted to 955-4-8 13/16 acres G. V. in the Dry, and 347-27-4 9/16 acres G. V. in the Wet lands, and at the rate of Rupees 1-10-7 per Acre for the former, and Rs 3-7-9 per Acre for the latter, gave the aggregate demand

at Rupees 2,799-1-11 while the present Cultivation of 988-39-9 acres G. V. at Rupees 1-6-5 per Acre in the Dry, and 445-24-3 acres G. V. at Rs 3-„-3 a p in the wet gave the aggregate demand at Rs 2729-9-11 but supposing the former rates of Money assessment per Acre to be continued, the aggregate demand should amount to Rupees 3,195-13-1 as shewn in the Margin. Thus the demand from the cultivated lands will be either more or less than the average collections, in proportion as the present cultivation is more or less than the average cultivation of former years, and as the rates of Money assessment assumed per Acre, are more or less than the former rates.–

22 In reference to this point, I conceive it to be my duty to submit, that the instructions furnished for the guidance of Collectors in Para 305 of the Proceedings of a former Board dated 5th January 1818, would have involved all my calculations in

they would be called upon to pay for the fields usually occupied by them; their objections were immediately removed, and they gladly hailed a change of system which held out to them so many and such important advantages.

13. Having thus adverted briefly to the causes of the great delay in effecting the survey and assessment of Kiltapully, and having produced an example of as great delay under circumstances of comparatively less difficulty in the case of Zalapole, and further, having stated a few general observations showing the evils of the Amany system, and the principles according to which in my opinion a survey and assessment should be regulated, I now proceed at once to detail the data, which I have assumed as the basis of my calculations in introducing so necessary and beneficial an arrangement into this District.

The

14. — The evils of our assessment which have marked the greater part of the operations connected with survey and assessments undertaken under the Madras Government, appear to me to have arisen principally from deficient information as to the actual average produce derived from a definite or an ascertained extent of land under cultivation and also from the absence of regular accounts of the annual "Khetwar Anchanah" or estimated produce of each field, by which an approximation might be obtained of its probable actual produce.

15. Before the introduction of surveys, the actual extent of cultivation was deemed to be a matter of little importance, because the assessment depended entirely on the actual produce and was in no way regulated by the extent of lands cultivated except in the Mucta or money rented lands. The consequence was that the extent of cultivation in the "Warapput lands,"

Lands of which the produce was divided between the Circar and the Ryots.

they would be called upon to pay for the fields usually occupied by them; their objections were immediately removed, and they gladly hailed a change of system which held out to them so many and such important advantages.

13. Having thus adverted briefly to the causes of the great delay in effecting the survey and assessment of Kyltapully, and having produced an example of as great delay under circumstances of comparatively less difficulty in the case of Zalaprole; and, further, having stated a few general observations showing the evils of the Amany system, and the principles, according to which in my opinion, a survey and assessment should be regulated, I now proceed, at once to detail the data, which I have assumed as the basis of my calculations in introducing so necessary and beneficial an arrangement into the District.

The

Lands of which the produce was divided between the Circar and the Ryot.

14. The evils of our assessment which have marked the greater part of the operations connected with survey and assessments undertaken under the Madras Government, appear to me to have arisen principally from deficient information, as to the actual average produce derived from a definite or an ascertained extent of land under cultivation and also from the absence of regular accounts of the annual "Khetwar duchanah," or estimated produce of each field, by which an approximation might be obtained of its probable actual produce.

15. Before the introduction of surveys, the actual extent of cultivation was deemed to be a matter of little importance, because the assessment depended entirely on the actual produce and was in no way regulated by the extent of lands cultivated except in the Mucta or money rented lands. The consequence was that the extent of cultivation in the "Warapat lands," whether

Wet

whether Wet or Dry, was never ascertained by measurement, and was forwarded to the Collector's Cutchery on the vague and imperfect Estimates of the Curnums, which with the view of diminishing the expected returns, or making fraudulently reduced Anchanahs or Estimates appear more plausible always considerably understated the quantity of land that had in any year been tilled.–

See Col: 51 Ac. hood Statement No. 1 Page 4 & Col: 66 and 93 of Detailed Statement No. 2.

16. The Estimates of produce also which were sent to the Collector's Cutchery having contained only the estimated extent of cultivation without any specification as to fields from whence the produce was derived, could be of no service in adjusting or apportioning the amount of future assessment on each field.–

See Col: 29 Stat. No. 3

See Col: 39 of Do.

17. To whatever extent the estimated cultivation as delivered in from year to year, might be less than the actual cultivation, to that extent would an additional assessment be laid on the village, and the reason of this result is very evident, that the average produce and Collections

See Statement A

Statement B.

Statement A

would be spread over a smaller superficies than the real one, and thus an incorrect and exorbitant average per Acre would be established by the survey and assessment as the necessary consequence. The actual cultivation as ascertained by survey gives the average produce in the Dry lands at 4 Tooms 9 1/10 seers and in the wet lands at 9 Tooms 4 5/2 seers per Acre, but, if the imperfect accounts of the cultivation as delivered in by the Curnums from year to year in estimates, were assumed as the basis of the calculations the average produce would amount to 5 Tooms 29 7/10 in the Dry and 11 Tooms 6 1/10 seers in the Wet lands, and be thus increased by 45 11/16 seers per Acre in the former, and 1 Tooms 9 2/16 seers per Acre in the latter.–

18 As a proof of the defective state of the accounts adverted to in Para 16, I beg leave to forward the form of Estimates which subsisted previous to my arrival, and request the Board will compare it with the Form which I deemed it to be my duty to substitute. By the

16, I beg leave to forward the form of Estimates which subsisted previous to my arrival, and request the Board will com-

will appear, that not only the extent of cultivation but also, the particular field in which the produce is appraised, is required to be forwarded to my Cutchery. This account has been found to be invaluable, not only in preventing abuses from year to year, but, also, in aiding my judgment as to the amount of the assessment to be laid on each field.—

Fusly-1245
" —1246
" —1247
" —1248
" —1249
" —1250

19. The average gross produce per Acre in the Dry and wet lands for 6 years Vizt, for the Fuslies noted in the Margin having been ascertained as per Cols 66 & 93 of Statement No 2, the next process was, to calculate the average amount of grain per acre, that would remain to the Circar after making the usual deductions on account of the Ryots share and grain allowances.—

+ See also Col: 55 of Abstract Statt. No 1. Page 11—

20. The average grain assessment per acre, having also been ascertained as+ shewn in Cols 70 & 97 of Statement No 2, at 2 Tooms $\overset{\text{seers}}{\frac{3}{16}}$ for the dry lands, and 4 Tooms 14$\frac{4}{16}$ seers for the wet lands, the next question to be determined, was, what was a fair

---

fair average price, at which the grain amount was to be converted into Money.

See also abstract Statement No 1 Col: 44 Page 10—

It will be observed from Cols 59 & 86 of Statement No 2, that the proportionate price per Candy, as fixed by the annual settlements, amounted to Rs a p 16-9-7 for the produce of the Dry lands, and Rupees 16-2-9 for that of the wet lands, but adverting to the circumstance, that the prices in Fusly 1248 as shewn in Cols 15 & 86 of Statement No 2, were exceedingly high, in consequence of the almost unprecedented scarcity of that season, and to the fact, that the prices as fixed by the Jumabundy, are often higher than can be realized by the Ryots, in consequence of the free importation of grain which takes place from Arracan and other Ports in this District, I have after conferring with the Ryots of Kytapully, and also after consulting the opinion of those of the neighbouring Villages, fixed the commutation price at Rupees 14 per Candy, which I conceive to be a fair price both for the Ryots and the Government.—

21. The average assessment per acre for the whole cultivated lands will

See Col: 27 abstract statement No. 1 Page 9.

will be Rupees 1-6-5 for the dry lands, & Rupees 3-„-3 for the wet lands, and with reference to Colns. 25 & 55 of the abstract Statement No. 1, it will be found that while average grain assessment per acre remains nearly the same the average assessment in Money has been reduced by 4 as. - 2 p. per Acre, in the Dry, and 7 as.-6 p. in the Wet lands, in consequence of a reduction in the prices of commutation. But tho' there is a reduction in the assessment per acre, it is clear, that if the present cultivation be much greater than the average cultivation of 6 years from Fusly 1245 to Fusly 1850, the present aggregate demand arising from the lands under cultivation will also rise in the same proportion, and may nearly reach the amount of the former average collections; thus the average cultivation of the said 6 years amounted to acres G. V. 955-4-8 13/16 in the Dry, and acres G. V. 347-27-4 9/16 in the Wet lands, and at the rate of Rupees 1-10-7 per Acre for the former, and Rs. a. p. 3-7-9 per Acre for the latter, gave the aggregate demand

Wet	347-27-4 9/16	3-7-9	1211-3-11
Total	"	"	2799-1-1

at Rupees 2,799-1-11 while the present Cultivation of acres G. V. 988-39-9 at Rupees 1-6-5 per Acre in the Dry, and acres G. V. 445-24-3 at Rs a P 3-„-3 in the wet, gave the aggregate demand at Rs. 2729-9-11 but supposing the former rates of Money assessment per Acre to be continued, the aggregate demand should amount to Rupees 3,195-13-1 as shewn in the Margin. Thus the demand from the cultivated lands will be either more or less than the average collections, in proportion as the present cultivation is more or less than the average cultivation of former years, and as the rates of Money assessment assumed per Acre, are more or less than the former rates.—

Total	"	"	3195-13-1

22 In reference to this point, I conceive it to be my duty to submit, that the instructions furnished for the guidance of Collectors in Para 305 of the Proceedings of a former Board dated 5th January 1818, would have involved all my calculations

in a manifest error, had fixed upon them, for the Board directed, "that before "aſseſsing each field, it would be pre-"ferable to determine in the aggregate "the Maximum Government demand "upon the whole arable lands under culti-"vation in the Village, and that this aggre-"gate should not exceed the average "past Collections from the Village for former years."

23. If the lands under cultivation equal the average cultivation, of course, the aggregate aſseſsment on such cultivated lands should not exceed the average collections but if the lands under cultivation be greater, or leſs than the average cultivation, of course, the aggregate demand on the cultivated lands must rise or fall in the same proportion.—

24. The aſseſsment per acre was, as already explained in Para 21, fixed at Rupees 1-6-5 for the Dry and Rupees 3-3-3 for the wet lands under cultivation and the distribution of this aſseſsment on each field was made in the following manner.—

Accounts

25. Accounts of the Anchana or estimates referred to in Para 18 were prepared for each field, and also calculations of the proportionate outturn thereof by Kile or measurement, and these accounts were compared with the produce aſsigned to each field by the aſseſsors and Ryots with reference to its known or supposed quality and capability. To aid me, further, in deter-mining the aſseſsment, accounts of the average payments per acre, for 6 years by each Ryot for the fields actually occupied by him were prepared, and from a combined consideration of these different accounts, and after making due allowances for difference in locality, by which the labor of the Ryot might be enhanced, or diminished, and his crops rendered more or leſs precarious, the aſseſsment on each field was finally determined.—

26. —— The proceſs observed will be better — explained by taking the fields of a Ryot as shewn below.—

for

27 The assessment on each field was finally fixed as per Col: 11 in the presence of and with the consent of each individual Ryot; after duly considering all the circumstances of the land, & after comparing the present average assessment with the average payments received from him from the same land for former years.

28. The share of the gross produce remaining to the Ryot per 100 Candies will be found to be as follows.

	C.	T.	S.
Supposing the gross produce at	100	..	..
Deduct usual grain allowances	13	13	43
Net produce remaining for division between the Circar & the Ryot	86	6	5
Sircar share at 50 per Cent	43	3	2½
Share remaining to the Ryot	43	3	2½
Add Ryots proportion of the grain allowances deducted above	4	2	14
Total share of the Ryot; candies	47	5	10½

29. The above is the share which falls to the lot of the great body of the Ryots of Keytapully; but there are more favourable rates of share, which are allowed by the custom

custom

custom of the country to a few Bramins and some of the principal resident Ryots and also to Payakarries or non-residents. These vary from 10½ to 12 in 20 Toons or per Candy, or from 52½ to 60 per Cent of the net produce remaining for division between the Circar and the Ryot.

30. As the number of individuals who are entitled to this privilege, does not always remain the same, and as the amount of remission is consequently liable to fluctuation from year to year, it has been deemed advisable to fix the assessment on all lands at the established and uniform rate of share viz. 50 per cent, to consolidate the excess above the ordinary share as per Col: 28 of Statement No with the demand and to determine that annual remissions or deductions from the assessment be granted as or the Cultivators may happen to belong to any of the classes above indicated.— The average amount of remission under this head from fusly 1245 to 1250 inclusive amounted to Candies 3-14-7 9/16 or to Rupees 60-2-2 as p in the dry and wet lands, as will appear by Col. 4

See page 9

	C	T	S
Dry	2	4	17 15/16
Wet	1	9	37 10/16
Total	3	14	7 9/16

Coll. 35 and 46 of the abstract Statement No 1 and at the same rate the amount of remiſsion for the lands now Cultivated will amount to Rupees 46–8–9 as per Col 28 of the said Statement.—

See Page 10

See Page 9

31 The small quantity of grain as per Col. 36 usually deducted from the groſs produce consists of trifling perquisites in grain to Kalagars or Grain Measurers, and Mahasooldars &ca. which have been consolidated with the demand, as the services of these Officers will no longer be required under the operation of a fixed Money aſseſsment.—

32 The Grain allowances referred to in Col. 40 of Statement No 4, payable to the Village servants enumerated therein, hitherto, fluctuated with the quantity of the produce from year to year, and the neceſsity for the presence of the Curnums and other Officers to Superintend the actual cutting rendered it impoſsible for the Ryot to thrash his crop till these persons should

have

have attended; but as a Money aſseſsment has now been fixed upon the land, and as it is desirable, that the Ryot should poſseſs full power over his crop at all times so as to enable him to thrash it out however he pleases, and without reference to the Curnum or any other Officer a fixed deduction calculated on the average receipts of each Village servant for 6 years has been established, as the regulated fee per Candy, and a list of the same has been placed in the hands of the Curnum for future guidance— The amount receivable by each Village servant, will be regulated from year to year, by the extent of cultivation, and by the amount of groſs produce, aſsigned to each field, by the survey the rate on each field being fixed, and the amount being only liable to fluctuate like the annual Settlement with the extent and claſsification of the lands under Cultivation.—

33.— In fixing the aſseſsment on the waste lands, it was determined that the Maximum per Acre should not fall much below that aſsigned to the cultivated lands

See Coll. 17 & 21 Abstract Statement No 1 Page 8.—

firstly, because a great part of the lands, which are now waste, had not long ago been cultivated; secondly, because the Village of Kytapully contains a great quantity of waste land of equal quantity with the cultivated lands, and thirdly because, an undue reduction of the aſseſsment on the waste lands might induce the Ryots to abandon the cultivation of their usually occupied lands— In cases, where accounts could be procured, they were compared with the estimates of the aſseſsors and the Ryots as to the capability of the soil and the aſseſsment was fixed on a due consideration of all the circumstances of the land— In other cases, where no accounts were forthcoming, the aſseſsment was fixed with reference to the claſs aſsigned to the adjacent and already aſseſsed cultivated lands of similar quality and capability and poſseſsing equal local advantages in point of irrigation and vicinity to the Village.—

See Cal. 21 Page 3 & Cal. 67 Page 11 of Abstract Statement No 1—

34 There is but little Garden land in this Village; and in aſseſsing it I have been guided as far as poſsible by the former Collections

Collections received from it, because it did not appear from my inquiries that this description of land had at any time been overaſseſsed.—

Total	3261	7	1

35.– The total assessment on the cultivated Circar dry, wet and Garden lands amounts as per Margin to Rupees 2794–6–1 but supposing the former rates of assessment per acre to be continued, the aggregate demand on the cultivated lands would amount to Rupees 3261–7–1 as shewn in the margin– Thus, it will appear that a reduction has been made in the assessment of the Circar lands under Cultivation to the amount of Rupees 14–5–2 per Cent– Respecting the items coming under the head of Rockadayam or ready Money Collections, such as quitrent on Cuttoobuddy Enams, Tax on Toddy and fruit trees the usual and established rates and modes of Collection prevailing in the Village has been continued–

36 The whole lands of the Village amount in the aggregate to $\overset{\text{Acres}}{6,369}$–$\overset{G}{6}$–$\overset{V}{13}$ from which, if Poramboke or land unfit for cultivation, and also the space occupied by the backyards of the Ryots amounting together to Acres 1301–$\overset{G}{17}$–$\overset{V}{\,}$ be deducted, there will remain $\overset{\text{acres}}{5067}$–$\overset{G}{29}$–$\overset{V}{13}$ of which $\overset{\text{Acres}}{4170}$ $\overset{G}{32}$–$\overset{V}{15}$ comprises the Circar lands, $\overset{\text{Acres}}{566}$ $\overset{G}{17}$–$\overset{V}{3}$ the Sirval Doombalahs or rent-free land, and $\overset{\text{Acres}}{330}$–$\overset{G}{19}$–$\overset{V}{1}$ the Cuttoobuddy or quit-rent land– The Circar lands have been divided into the following classes and rates per acre.–

Class

firstly, because a great part of the lands, which are now waste, had not long ago been cultivated; secondly, because the Village of Kytrapully contains a great quantity of waste land of equal quantity with the cultivated lands, and, thirdly because, an undue reduction of the aſseſsment on the waste lands might induce the Ryots to abandon the cultivation of their usually occupied lands—In cases where accounts could be procured, they were compared with the estimates of the aſseſsors and the Ryots as to the capability of the soil and the aſseſsment was fixed on a due consideration of all the circumstances of the land—In other cases, where no accounts were forthcoming, the aſseſsment was fixed with reference to the claſs aſsigned to the adjacent and already aſseſsed cultivated lands of similar quality and capability and poſseſsing equal local advantages in point of irrigation and vicinity to the Village.—

See Col. 21 Page 9 & Col. 57 Page 11 of Abstract Statement No 1—

34 There is but little Garden land in this Village; and in aſseſsing it I have been guided as far as possible by the former Collections

Collections received from it, because it did not appear from my inquiries that this description of land had at any time been over aſseſsed—

35.— The total aſseſsment on the cultivated Circar dry, wet and Garden lands amounts as per Margin to Rupees 2794—5—1 but supposing the former rates of aſseſsment per acre to be continued, the aggregate demand on the cultivated lands would amount to Rupees 3261—7—1 as shewn in the margin—Thus, it will appear that a reduction has been made in the aſseſsment of the Circar lands under Cultivation to the amount of Rupees 14—5—2 per Cent—Respecting the items coming under the head of Rockadayam or ready Money Collections, such as quitrent on Cuttoobudy Enams, Tax on Toddy and fruit trees the usual and established rates and mode of Collection prevailing in the Village has been continued—

36 The whole lands of the Village amount in the aggregate to $\overset{Acres}{6,369}$—$\overset{G}{6}$—$\overset{V}{13}$ from which, if Poramboke or land unfit for cultivation, and also the space occupied by the backyards of the Ryots amounting together to Acres 1301—$\overset{G}{17}$—$\overset{V}{0}$ be deducted, there will remain $\overset{acres}{5067}$—$\overset{G}{29}$—$\overset{V}{13}$ of which $\overset{Acres}{4170}$—$\overset{G}{37}$—$\overset{V}{15}$ compose the Circar lands, $\overset{Acres}{566}$—$\overset{G}{17}$—$\overset{V}{3}$ the Surval Doombalah or rent-free land, and $\overset{Acres}{330}$—$\overset{G}{19}$—$\overset{V}{1}$ the Cuttoobudy or quit-rent land— The Circar lands have been divided into the following claſses and rates per acre.—

---

37. It will be observed that the lands in the
Village of Kytapully occupy but a small rank in
the general Scale, aſsumed by the Hookoomnamah,
as the claſsification and rates of the whole District,
but the reason of the inferior position aſsigned to
them is very evident, Vizt. that many parts of
the District are remarkable for the fertility of
the soil, which consists of fine black mould,
and alluvial deposit, while, the lands in Kytapully
are generally light and of a Swampy character.–

38. The total aſseſsment of the Village amounts
as shewn in Col. 12 Page 7 in Abstract Statement
No. 1 to Rupees 8175-4-7 of which the sum of
Rupees 2794-5-1 forms the aſseſsment on the
Cultivated lands, the Sum of Rupees 5160-11-1 the
aſseſsment on the Waste lands, and the Sum
of Rupees 220-4-5 the average Collections received
~~under the~~ Head of Rockadayem or ready Money Collections,
as in upholding the right of Govt. I have endeavoured
to do justice to those of the Cultivators, I trust that
the Survey and aſseſsment of Kytapully will not
only be ~~followed by~~ a considerable increase of
revenue, but also, by an improvement in the
general State of the Village, and by the happineſs
of the great body of it's inhabitants, and, fur=
=ther, that its increasing prosperity, which may
fairly be anticipated from the encouragement
held out to individual exertion and industry
will induce the Board & Government
to extend so great a boon to all Villages
which are now the property of Government,
or may hereafter lapse to it on account
of arrears of Revenue.–

Remarks

62

This account is prepared from the Accounts in the Collectors Cutcherry and in cases where they are not forthcoming, or could not be procured from those in the possession of the Curnum of the Village.—

The large decrease under the Head of Ready Money Collections has arisen from the circumstance of the non. Collection of Durbary charges, as well as from the grain allowance denominated "Sooranany mary Lutchmedavey Gumprah" having since been restored to that family.—

Fort St. George 16th May 1842

No. 6

Instructions for the guidance of the surveyors in introducing a regular survey into the Government Estates, and Villages in the Masulipatam Collectorate.

No regular survey has ever been introduced, nor has a uniform standard of measurement at any time prevailed in this District. In the Asarah lands, or lands of which the produce is divided between the Circar and the Ryot, the extent of Cultivation was only stated on estimate, and it was in the money rented and garden lands alone that the Cultivation was annually ascertained by measurement, but the measurement itself having been conducted by measures of different lengths according to local usage, led to much uncertainty as to the result. In some Villages, lands are measured with a rod of 72 Cubits, in some with one of 80 Cubits and in others with one of 88 Cubits in length. In some Purganahs, a piece of land containing 32 Coontahs is denominated a Cutty; in others the Cutty consists of 35 Coontahs; in some parts of the Country 20 Coontahs of land is called a

frootty

6117

Fort St. George 16th May 1842.

pootty, and in other parts 6 6/8 Coontahs of land is denominated a Polas Cutty. It is therefore hereby determined as follows.—

1. An uniform system of measurement shall be adopted for every description of land in the Government Estates and Villages, and all accounts shall be kept in Acres, Goontahs, Veesums and Perahs.—

2 A piece of land measured by a chain of 33 English feet from East to West and from South to North makes one Goontah and 40 Goontahs make an Acre, according to which all lands shall be measured and entered in the survey Accounts.—

3. On your Arrival at a Village for the purpose of surveying the lands thereof, you are to obtain Moochilkas from the Village Curnums, Head inhabitants and Moonsiffs, binding themselves to be present during the survey for the purpose of pointing out the boundaries of the fields, as also to produce annual Accounts from the commencement of fusly 1212 and further to assist you

in

6118.

Fort St. George 16th May 1842.—

in conducting the survey, so that no inaccuracy or mistake may occur. You will likewise insert a clause in those Moochilkahs that in the event of any Curnum practising frauds or furnishing untrue Accounts, relative to Sary or Circar lands, Enam lands, Moturfa and other items of Revenue, they shall be liable to be fined to the Amount of double the loss, which must be sustained by such false or fraudulent Accounts, and to be dismissed from their situations.—

4 On your arrival in a Village for the purpose of surveying it, you will call on each individual Ryot to attend, not only to point out the boundaries of his fields, but to make himself acquainted with the extent measured. This measure will obviate any just grounds of complaint, on the plea of his land having been incorrectly measured during his absence and a second measurement will not be allowed.—

5. In surveying the lands of a Village, you will commence from the most convenient spot and conduct the measurement regularly. You should measure each field separately in order, without omitting any

field whatever, and should there be a large field that contains 1, 2, or 3 Cutties, you will divide it by marks, such as Hedges, Ridges Banks &ca into such portions as can be easily cultivated by one or two Ploughs, as the case may be, and then enter the same distinctly in the survey accounts numbering the fields so divided consecutively according to their Nos 1. 2. 3. 4. 5 and so on.—

6. Garden land which was formerly liable to a tax fluctuating with the nature of the produce, is hereby defined to be that on which Tobacco, Chillies Turmeric, Ginger, Garlic, Onions, and Chilgadum (a kind of curry root) Chayroot, and other Garden produce, irrigated by Wells, is grown; and though, in this description of land, Natchery, Mockajonnah &ca Crops may occasionally be raised, yet it must be considered to be garden land. However, this designation is intended to apply only to such extent of land as is capable of irrigation.—

7. All lands in which garden crops have never been raised, and which are deemed unfit for such products, as also dry land in which dry crops are cultivated by

by irrigation from Wells &ca, should be entered in the Accounts as dry lands.—

8. You will enter in the accounts the name of every field — Fields which have no name should be designated by any species of tree or other mark in the vicinity that may appear best calculated to point out the locality.—

9 In surveying each field of Wet, dry, or Garden, land, you will enter in the survey Accounts the name and number of each field, describing at the same time, the names and numbers of the fields by which it is bounded on the south, North, East and West of it.—

10. In order to distinguish and separate tracts of different soils, it is ordered that durable Banks shall be erected, where one kind of land terminates, and where the other begins.—

11. In all cases where a part of a field which can be cultivated by a single Plough may be left fallow, the whole field should be entered in the survey Accounts as belonging to the same No.—

12 In surveying the fields, you will ascertain and note down the description

of the soil of each field in the remarks to be appended to Accounts.

13. If three quarters of a field be cultivated and the other quarter be left fallow, you are to survey and enter the whole field including the portion lying fallow. But if a half or a quarter of a field be cultivated leaving the remainder fallow, you will measure the whole field distinguishing the cultivated from the fallow land, and noting down the same in your Accounts.—

14 Should land, lying waste from time immemorial, be bounded by dikes or thick hedges, you are to consider such lands as distinct fields, and number and measure them in regular order, using the said dikes and hedges as marks: if there be no marks of the above kind, you will divide the lands into small fields of 3. 4 or 5 Acres according to the quality of the soil, and designate each field by any other kind of mark which may be applicable, and measure them accordingly by defining the limits thereof, and taking at the same time due care not to include the

the dimensions of any field beyond the above limitation. All dry land, whether cultivated or waste and Garden lands, as also Porumpoke, are to be surveyed in regular order, and numbered consecutively.—

15. In measuring waste lands, you must ascertain how many years such lands may have lain waste, and enter the same in the survey Accounts in the following manner Vizt. Quantity of land lying waste for a less period than 5 years. Do. lying waste above 5 years, and not exceeding 10 years. Do. lying waste above 20 years. you must enter the above particulars distinctly in the Accounts, so that it may be available for future references.—

16. If there be trees, Wells, heaps of stones, Mounds, Ravines either, in wet or dry lands, you will enter in the Account the exact extent or superficies thereof, distinguishing it from the remaining lands and numbering each item separately.—

17. If there be fruit trees, such as Tamarind trees &ca. in the fields, you need not exclude from your survey the

surrounding land under the shelter thereof, for the Ryots derive profits from their produce. Should there be any trees that yield no produce, you will survey the surrounding land and then deduct the same from the total extent of the measurement of such field.——

†Land occupied by Tanks &ca

18 In surveying Porumpoke lands which are not fit for cultivation, you will enter in the Account the superficial extent of the Forts, Pettahs, Villages, Backyards & together with the number and description of the trees therein situated; the Banks of the Tanks, Rivers, Ravines, Channels, Hillocks, Roads, barren Grounds, Wells, Large Wells, Temples, Large Ponds, the gates of Hindu Temples, salt Hillocks, Groves, together with the number and description of the trees therein contained. You will, in entering in the Accounts the extent of each field, deduct therefrom the extent of Porumboke land (if there be any) upon duly measuring the same, detailing at the same time the particulars thereof. Some of the said Porumpoke lands being situated contiguous to the cultivable or waste lands liable to Assessment, you will take care to number such Porumpoke lands consecutively in regular order.——

you

19 you are to enter only such portion of a field of dry land, as may be actually converted into Garden land, under the Head of Garden land, the remainder being entered under the Head of dry land. In the event of any further portion of the said Field being converted into Garden land at a future period, such portion shall then be numbered as a supplemental No. belonging to the original number, thus the original No. of a dry Field being 20, the newly formed Garden lands would be called No. 1 in 20 No. 2 in 20 so on.——

20. Should there be plantations and productive trees in fields, you will take an exact account of them, specifying the description, and number of the same, distinguishing young trees, and those yielding fruit, from old and unproductive ones, and entering these particulars in the survey account. Should there be Palmira trees growing so closely that sufficient space is not left between them for cultivation, you must enter a remark in the measurement Account, and note down the quantity of land of this description; you are likewise to show in the Account, the

Potoo Gitaloo
Pinti Gitloo

the number of productive and unproductive Palmira trees, the number of male trees yielding Toddy, but no fruit, the number of female trees yielding fruit—Hayloo Tauloo, or trees from which no Toddy can be drawn—the number of young and large Country date trees—You will separately survey each land occupied by such trees, and then number them.—

21. You are to distinctly note down the means of irrigation of the wet lands, stating whether they are watered by Tanks, Lakes, Rivers, Anicuts, spring water courses, large Wells, Ponds &ca you will enter in the Account the names by which the different sources of irrigation may be Known.—Lands, tho' watered for one or two Months only by spring water courses, shall also be claſsed as wet land.—

22. All Gardens of Cocoanut and other fruit trees, having abundance of water for irrigation at all times, should be claſsed as wet lands—you will particularize the quantity of land situated between trees, and rendered unfit for Cultivation; and distinguish such land where there are no trees or where the trees are so far apart, that the land can be cultivated and

and is under Cultivation—You will also keep a detailed account of the number of Cocoanut trees, nut trees, Rose apple trees, lime trees, Citron trees, exhibiting all fruitful trees, distinct from young, or unproductive ones—All lands yielding paddy, or having means of irrigation sufficient for the production of that crop, must, if cultivated with Betel, Sugar Cane, Tabacco, &ca be claſsed as wet lands—

23. If lands, which have sufficient means of irrigation at all times such as Wells, Rivers, spring Water Courses, &ca and which formerly yielded a paddy Crop, be subsequently Cultivated with dry ones from some cause or other, you will duly enquire and ascertain whether such lands have formerly been cultivated as paddy fields, as also the means of irrigation, and then enter such fields as Wet lands. But if such lands were converted into dry lands for want of the means of irrigation, you will claſs them as dry.

24. You will survey the lands situated with the Tanks, and shew in the Account the quantity of such land, as may be under cultivation from year to

year, distinct from that unfit for cultivation.

25 Such Fields only, as have actually been cultivated in Fusly 1250, or the year preceding the survey, should be brought to account as lands now under cultivation. You will, however, shew, as far as can be ascertained from the Annual Accounts, the extent of land which may have been cultivated in each year and that left waste, out of the Goodecuttoo or whole extent of land of a Village, and detail these particulars in the Accounts for each field.—

26. In your accounts for each Village you are to exhibit, distinctly and particularly, the extent of lands allotted as Enams for the maintenance of Head Inhabitants, Curnums, Village Watchers, Vettymen, Washermen, Barbers and other Village servants, Pagodas, Bramins, Mosques, Cauzees, Fakeers, Ministers of Jungum Caste &ca &ca. In this Zillah, there are various sorts of Enams namely Swayemcrooshy Enams, or Enams cultivated by Enamdars themselves, Coppadoombala Enams, or Enams for the produce of which permits are granted without the necessity of measuring the grain. Survadoombala Enams, or free gift lands

lands

lands- Parumcrooshy Enams, or those ploughed not by the owners themselves but by other, Purdoo Enams or Enams by which a given quantity of grain is allowed to the Enamdars from the Village produce, Gittimpoo Enams, or those from the produce of which a certain quantity is deducted, and brought under sary, and the remainder allowed from the Village produce to the Enamdars. Padega Enams, or those paying quit Rent, at a certain rate per Cutty- and Potta Cuttoobady Enams, or those paying rent at a certain rate per each Candy of grain; you are; therefore, to ascertain all these particulars, and enter them in the Accounts According to the following instructions.—

1st You are to call upon the respective Enamdars to produce the sunnuds, Doombalahs and Chekoonamahs; compare whether the limits of their lands, as laid down in the Chekoonamahs correspond with the existing limits, and shew the difference, if there be any, between the quantity of land originally granted, and that found by your measurement.—

Sf

2. If the Enamdar possess no sunnuds, Doombalahs, or other vouchers, you will refer to the annual Accounts in the possession of the Village Curnums previously to Fusly 1212, as well as to the Jummahbundy accounts, and then go on with the measurement of the Enam lands now enjoyed, provided their extent agrees with the said Accounts—

3. The Enams registered by the Authorities long before Fusly 1212, for which Doombalahs were granted by several Collectors under their seal and signatures, and which were continued as "Swayemaroosky" and "Cooppadoombala Enams" previous to the said year, were fraudulently entered by the Curnums as "Paramaroosky" and "Baudoo Enams" If the limits of those Enams, as entered in the sunnuds and Checconamahs duly registered, correspond exactly with the present limits, the extent thereof, according to the measurement now ascertained, may be entered in the account, with every particular belonging to it. Should there be any difference in the limits, you will measure such land and include it in the

tary

ary lands. A settlement will here after be made in the Huzzoor according to justice. Some Circar lands have been fraudulently enjoyed as Enams of late years. and also some Circar land &ca has been intentionally omitted in the accounts— In the event of such lands being discovered, the Officer by whom the said fraud may be detected will, on proving the fact to the satisfaction of the Collector, be entitled to a reward equal to ½ the amount discovered, and establish a claim to future preferment. The informant will also be entitled to ⅛ of the Amount discovered—

27. You will particularly ascertain from the Accounts, whether the sundry taxes levied in Fusly 1249, under the general Head of "Rockadayem" or ready Money Collections, were just or otherwise, and if it shall appear to you that a higher tax on Palmira Trees and Toommakaya₰ &ca can justly be assessed, you will enter the same in your accounts upon due enquiry. You will likewise submit to the Huzzoor an Account Particular of the Caste and profession of the individuals who pay the Moturfa tax—

₰ A kind of unripe fruit given to Cattle for food

28. The Curnum of each Village should attend during measurement, and if he should keep

a separate account of the survey. In the absence of the Curnum from indisposition, he should depute on his part, a person to act for him, furnishing him with a power of attorney in accordance with the regulations, and the survey should be carried on in the presence of the person so deputed. Should it appear that you neglected this Rule, you will be dismissed—

29. As it is desirable that the survey should be finished with all practicable expedition, you are directed to send daily, according to form, a short report of the number of Acres measured by you each day; also a detailed report once every five days. Your activity will be ascertained by those reports. Any surveyor who may appear to be negligent in his duty will be dismissed from the service—

30. On the expiration of each English Month, you will forward to the Huzzoor, a statement of the lands surveyed during the Month as follows:—

Namely

Extent of land measured from 1st to 31st

Village	1	
Hamlets under it	1	
Total Villages &ca completely measured	2	
Dry lands No. of Acres	2100	
Wet lands No. of Acres	70	
Total Acres		2170

The

The Palmira and other Trees examined and counted are in number, 000—

31. In the event of the Heads of Villages, Moonsiffs or Curnum, or the Ryots &ca throwing any impediment in the way of your duties, you will enquire into the case, take down their depositions, and report the result to the Tahsildar, forwarding the records for his inspection, in order that he may levy a small fine suited to the offence—

32. As the Goodecuttoo or entire extent of land in the Villages of this Zillah has never been thoroughly Surveyed, as many fields are small, and a great number of fields have no proper boundaries and hedges, as it is necessary to assign limits to the fields before measurement, some delay may take place in completing the Survey according to the principles of South Arcot; you will, therefore, Survey, as much as is practicable, with reference to the state of the lands the extent of which should not be less than 2170 Acres at the rate of 72 Acres per day as follows.—

Dry

6133

Fort St George 16th May 1842.-

	acres
Arable land	1446
Waste from time immemorial and the Porumboke lands	289
	1735

36. No fixed quantity of land has ever hitherto been allotted rent free as Backyards to the Ryots; The Backyards of some Ryots contain a large extent of rich land, called Pautee, while those of others are of little extent and some Backyards are liable to be taxed. It is therefore necessary that definite rules should be established in this respect to prevent abuses and secure the convenience and comfort of the Ryots according to the wishes expressed in their declarations already made, when you proceed to Survey the Backyards or lands included in their respective Compounds,

You

you must make out an account of the average sist of each individual as per his Puttahs for three years from fusly 1247 to fusly 1249, and regulate the deductions as rent free on account of Backyards, as follows -

Rule 1st No Ryot shall hold rent free more than 10 Goontahs of land on account of a Backyards -

Rule 2nd Ryots paying a sist of more than 100 Rupees at an average shall be allowed a piece of Ground not exceeding 10 Goontahs -

Rule 3rd Ryots paying an average sist of from 80 to 100 Rupees, shall be allowed a piece of Ground not exceeding eight Goontahs -

Rule 4th Ryots paying an average sist of from 40 to 80 Rupees shall be allowed a piece of Ground not exceeding 6 Goontahs. -

Rule 5th Ryots paying an average sist of from 20 to 40 Rupees shall be allowed a piece of Ground not exceeding 4 Goontahs -

Rule 6th Ryots paying an average sist of leſs than 20 Rupees shall be allowed only 3 Goontahs. -

Sookamasooloo -

Rule 7th Sookamasooloo &ca or persons of the non-cultivating claſs, shall be allowed no more than 2 Goontahs -

Rule 8th Should any of the above descriptions of Ryots at present hold more than the above limitation, they shall be allowed to do so but no Ryot whatsoever shall be entitled to hold rent-free more than 10 Goontahs of land -

After making deductions at the above rates from the quantity measured in the Backyards, you must carry the surplus quantity thereof to the heads, to which they belong, according to this Hookoomnamah, and exhibit the same in the accounts. Should the Backyards of some Ryots not be liable to deduction under these rules, you must take care to measure and insert as his Backyard only so much land as has to this time been enjoyed by each Ryot. -

The Cocoanut trees, Lime
37 trees, Oranges, Pine apple and other fruit trees in the Backyards so fixed or in such parts of the Backyards, as may be brought under the head

head, of Circar land, shall be counted in the manner prescribed in Para 20, and the particulars thereof exhibited, in the accounts under their respective heads -

38 Lands included in a disputed boundary shall be entered in your accounts as belonging to the Village whose Ryots may have cultivated the same - should such land have been waste from time immemorial, you must enter them in the account, as lands disputed between the adjacent Villages -

39 As the chain used for measurement may be broken at times and some of its links may be lost, you are directed to compare it every Morning and Evening, with the Gajumbussa or standard, which has been provided for the purpose -

40 You will measure the lands every day from Sunrise until Sunset. On the completion of the measurement of each field you and the Curnum will prepare rough accounts thereof, and after Sunset you will prepare your detailed Statement according to Form from those rough accounts - No delay will

will be allowed or excuse admitted, for not writing the Survey accounts of the day - You must leave sufficient blank space for inserting the quality of the land and extent of the produce -

41 In writing the boundary of each Village, you will find out the several Boundary Marks, such as Stones, compare them with the Bhoobund[⊕] Zabitah, measure the said Boundary in the presence of inhabitants of the neighbouring Villages, prepare a Bhoobund Zabitah explanatory of all the permanent land Marks and send one Copy thereof to the Huzzoor with the signatures of the people of the Village to which the Boundary belong, and also of those of adjacent Villages -

42. On the completion of the Survey of the lands of a Village, you will make out an Awurzah[†] account of the different pieces of lands measured and then prepare from it an abstract which you will send to the Huzzoor with the Signatures of the Village people, as well as of yourself. No accounts will be admitted unless they are attested by the Curnum and head inhabitants of the Village, nor will any accounts containing erasures or interlineations be received -

You

[⊕] an account shewing the whole extent of land within the limits of the Village and other particulars -

[†] an abstract by which several items of accounts are arranged under appropriate heads

43. You are to hand over the rough accounts of the lands surveyed by you to the Uzmoyeshdar, or Examiner of Survey, together with the fair accounts.–

44. If the Uzmoyeshdar should, in his examination of the Survey discover any discrepancy arising from negligence, you will be dismissed, or if arising from fraud, you will receive an additional punishment.–

(Signed) P. Grant
Collector

No. 7.

Instructions to the Examiner of Survey.

1. As you are appointed to examine the accounts of measurement rendered by the Surveyors, you are hereby required to attend to the following instructions.–

2. Having procured Copy of the Hookoomnamah issued for the guidance of the Surveyor, you are to enquire whether his Survey has been conducted according to the instructions therein contained.–

3. Previously to entering on an Examination of the Survey, you will obtain from the Surveyor the rough Accounts of the Survey, and

and then inspect the measurement of all the fields in the Village, and ascertain whether the Survey accounts already rendered are correct.

4. You are to be very particular in Examining the measurement of lands belonging to the Head Ryots Curnums and other Principal Ryots of the Village, and ascertain whether any lands have been omitted from the accounts, your daily Examination of Survey should be conducted as follows Vizt.–

Dry land 500 Goontahs or Chain measuring rods.
Wet Do. 150– Do. – – – Do. – – – – – –

5. After completing your daily Examination as above directed, you are to submit your accounts to the Huzzoor in the following form.–

No. 1. Circar land designated Vapachettoo Chanoo belonging to Runga reddy, situated North of Murry Chettoo Chanoo occupied by G. Goorapah Originally surveyed by Beemarow Paymashdar Vizt.–

		Goontahs–	acres G.
Measuring from East to West – – – – –		11½	
North to South – – – – – –	Square Goontahs	15½ 178½	or – 4 – 18¼

Content of the State found on Examining the above Vizt.–

East to West – – – – – – – –		12¾	
North to South – – – – – –	Square Goontahs	16¼ 201–	or – 5 – 1–
Excess above the Original Measurement – – – – – –			22¾

you

Fort St. George 16th May 1842.

6. You are to furnish your accounts in the above form in respect to any increase or decrease found on examination.—

7. You are to deliver the rough accounts ~~you~~ of your examination into the hands of the Aſseſsor, and obtain from him from time to time receipts in his own hand writing for the same.—

8. In examining the measurement, whatever extent of land may be found in exceſs or in deficiency of the former measurement, you will include it in, or deduct it from, the Circar account (whether it be dry or wet land) as the case may be, and should any considerable difference arise, you will report it to the Huzzoor for future orders.—

9. If any Ryot complain of the measurement of his land being incorrect, you are immediately to proceed to his land for the purpose of ascertaining the justice or otherwise of his Statement.—

10. You are to enquire into all cases where Maneyem lands may be enjoyed without authority, where extra Collections may have taken place, or where items belonging to the Circar may not have been brought to account, in such cases, you are to submit to the Huzzoor, a Statement thereof, with any other documentary evidence which may be forthcoming, you will be remunerated for your diligence in a suitable manner hereafter. Those also who have aided you in your enquiries will also be entitled to a reward.—

11. The Chain or measuring rod should from time to time be compared with the original measure so that no mistake may occur.—

(Signed) P. Grant
Collector.

Fort St. George 16th May 1842.

No. 8.—

Instructions for the guidance of the Aſseſsors in claſsing and aſseſsing the lands in the Government Villages of the Masulipatam Collectorate.—

The Aſseſsors on their arrival at a Village must first aſsemble the Village Moonsiff, Duskutdars, or Head Inhabitants, Curnums, Ryots &ca and obtain from them an agreement to the following effect that "they shall furnish a correct ac-
"count of the Produce of the Wet, Dry, and
"Garden lands of the aforesaid Village
"specifying distinctly the quantity produced
"in the Superior, Medium and inferior
"Lands, as also the various species of Grain pro-
"duced in each description and claſs of
"Land, that should the said account
"differ from the rate of aſseſsment which
"might be fixed by the public Servants
"on a due Estimation of the Produce
"and inspection of the different soils
"or should their Statements or other
"documents which they may bind themselves
to

"to deliver as to whether the land yields one
"or two Crops or as to any particulars res-
"pecting the kinds of Grain grown, such as
"Cumdooloo or red gram, Horse Gram,
"Menoomoo, Suggar &ca. that may be mixed
"with the principal dry grain crop or res-
"pecting the sources of irrigation as laid down
"in instructions to the Assessors, proven in any
"way to be incorrect on enquiry that they
"shall be liable to pay double the amount
"of difference in the assessments to be
"dismissed from their hereditary Offices of
"Curnums and Moonsiff, and to be punish-
"ed to such extent as may be deemed ade-
"quate to the Offence."

2 You will in the first place with the assistance of the most respect-able Inhabitants of the neighbouring Villages, Class the different Villages of a Division into 1st 2nd 3d and 4th Sorts and you will then obtain from the head Inhabitants and Curnums of each Village, correct accounts of the produce of former years in

in the Wet, Dry, and Garden Lands, stating the quantity per Cutty in the Superior, Medium and inferior description of soils and whether lands produce one or two Crops and keep the Accounts that may be forthcoming for future reference.-

3 You will forward to the Huzzoor for comparison an account of the Villages divided into 1st 2d 3d and 4th Sorts as laid down in the preceding Para together with the two Accounts referred to therein.-

4 The mode of Classing the lands is as follows, the Head Inhabitants, Curnums, Ryots and respectable Inhabitants of the adjacent Villages having been assembled you should proceed to Class and rate the lands according to the quality of the soil the means of irrigation and other advantages in point of locality.-

5 Should the soil of a Village & that of its dependant Hamlets be of the same description, you should, upon due examination into the sources of irrigation &

&ca enter it as belonging to the same rate.

6.- You will claſsify each field in the presence of the Ryot to whom it belongs according to the quality and capability of the soil the sources of irrigation and its ascertained produce but you are not on any account whatever, to lay an additional tax on the Capital or industry of the Ryots who may have improved the land or raise the rent beyond what it may be expected to produce by an ordinary degree of Cultivation.—

7 The mode of Claſsing the lands is the following - There may be several Villages of the first sort in a division but it does not follow that all the lands therein will be of the same quality - These have been divided into Superior, Medium and inferior; 14 rates are fixed for dry lands, 20 for wet lands, and 10 for Garden lands and the lands must be claſsed according to the rates to which they belong thus.—

Fields

Fields,	1st Sort Village -	1st Sort Village -	1st Sort Village -	1st Sort Village
No. 1	Second rate	First rate	Second rate	Third rate
No 2	Third Do	Fourth Do	Eighth Do	Fourth Do
No 3	Fifth Do	Sixth Do	Ninth Do	Seventh Do
No 4	Sixth Do	Eleventh Do	Thirteenth Do	Tenth Do
		Fifteenth Do	Fourteenth Do	Twelfth Do

In the same manner the lands of the other 1st 2d 3d and other sorts of Villages shall be claſsed with reference to the quality of the soil and estimated produce.-

8 A piece of wet dry or Garden lands measured in length and breadth, with a rod of 88 Cubits, makes one Coontah - 32 Coontahs of this description make 1 cutty and a cutty is equal to 15¼ English Acres - The quantity of produce which each cutty of land is capable of yielding for one Crop with reference to the quality of the soil and its Claſsification is shown hereunder.-

Particulars of the Dry Lands.-

5thly The mode of assessing the dry, arable and waste lands which annually yield one crop is described below.

First Class Lands.- In this class is included 1stly Earth denominated Panty, a very rich soil found in the sites on which a Village formerly stood, 2dly Land denominated Panty Reevada a very rich soil mixed with white earth and containing a variety of deposits from its vicinity to the Village.-

The superior Lands of the said class should produce Candies 15–$\overset{3}{12}$ per Cutty.-

The medium 13 Candies per Cutty and the inferior Candies 10–8 per Do.-

Second Class Lands.- In this Class is included.-

1stly Land termed Panty Reevada, mixed with white soil and containing but little deposits.-

2dly Tella Ravada or rich soil of a brown colour free from Sand and containing alluvial deposits.

3d Nullaravada

3dly Nullaravada, a rich Black Soil containing alluvial Deposits.-

The superior Lands of the said Class should yield Candies 14–$\overset{7}{6}$ per Cutty.-

The medium $\overset{6}{11}$–$\overset{7}{14}$ per Do. and the inferior Candies 9–2 per Do.-

Third Class Lands.- In this class is included.-

1stly Land termed Tellaravada a rich white soil containing alluvial deposits and fine sand.-

2dly Black soil containing but little deposits.-

3dly White earth found in the Islands of Kistna formed by alluvial deposits and free from Sand.-

The superior land of the said class should yield Candies 10–8 per Cutty

The medium Candies 9–2 per Do. and the inferior Candies 7–16 per Do.

Fourth Class Lands.- In this class is included.-

1stly Tellaravada or white land which contains but little alluvial deposits.—

2dly Alluvial Deposit on a Substratum of Black clay.——

3d. Land found in the Islands of the Kistnah mixed with white & Black Earth and some fine sand.-

4th. Pantty Land or Land of a white colour mixed with sand and containing but little deposit.-

5th. Keevadu Land or Land mixed with filth and fine sand.-

6th. Valliguttera Land or Land of a brown colour mixed with sand and deposit.-

The superior Land of the said Class should yield Candies 9 – 2 per Cutty

The medium Candies 7 – 15 – D°

and the inferior Candies 6 – 10 D°.

Fifth Class Lands.-

In this Class is included

1stly. Nullaravadu and Tellavadu or white and black Land containing a mixture of fine sand & a little deposit

2dly Land found in Islands mixed with much sand.-

3dly. Vullegattera or red earth mixed with some fine sand containing

a little deposit.-

4thly Red earth mixed with some deposit and fine sand.-

5thly Black earth mixed with small stones and fine sand.-

6thly Land formed in the inside of Tanks containing deposit.-

The superior land of the said class should yield Candies 7 – 15 per Cutty.

The medium Candies 6 – 10 – D°

and the inferior Candies 5 – 4 D°.

Sixth Class Lands.-

In this Class is included.-

1stly Panty or Keevadu land mixed with some fuller's earth.-

2dly Chavata Bhoomy, or Fuller's earth of white and black colour mixed with mud.-

3rdly. Land of a red and brown colour mixed with gravel and fine sand.-

4thly Goravoo land or sandy soil of a light brown colour.-

5thly Land mixed with white black and red soil.-

6thly Sulliguroo or moist land of a black

6151 Fort St George 16th May 1842.-

black colour.-

7th Island land mixed with sand and Fullers earth

The superior land of the said Class should yield Candies 6- $\overset{7}{10}$ per Cutty

The medium Candies 5- 4- D°

and the inferior Candies 3- $\overset{7}{18}$- D°

Seventh Class Lands.-

In this class is included!

1st Goroovoo or red earth of an inferior quality mixed with gravel.

2nd Valegutteroo or land of Brown colour mixed with fullers earth and sand.-

3rd Moodegurao or land having hard sand and deposit.-

4thly Masaka Esoka land or sandy soil.-

5thly Bakkao or poor land mixed with some Black and white soil and much fullers earth.

6thly Black or white earth mixed with a little fullers earth.-

The

6152 Fort St George 16th May 1842

The superior land of the said class should yield Candies 5-4 per Cutty.-

The medium Candies 3-18- D°

and the inferior Candies 3- 5- D°

In this class is included.-

Eighth Class Land.-

1st Black or white land mixed with much sand and lime stone.

2nd Black land mixed with gravel and fullers earth.-

3rd Sulioo Nuroovoo or red earth for a fixed consistence and difficult to be ploughed.-

4th Neparay land, or barren soil in which a specie of Marble is found.-

5th Red barren soil, in which Iron is found.-

6thly Toova land or barren land principally composed of sand.-

7thly All Lands which contain a great quantity of fullers earth.-

The superior Land of the said class should produce Candies 2-12 per Cutty

The medium Candies 1-17- D°

and the inferior Candies - 9- 6- D°

The above 8 classes have been arranged into the following rates.-

	C	F		C	F		C	F
1st Rate	15	2	5th Rate	10	8	10th Rate	3	18
2nd Do	14	6	6th Do	9	2	11th Do	3	5
3rd Do	13	-	7th Do	7	16	12th Do	2	12
4th Do	11	4	8th Do	6	10	13th Do	1	19
			9th Do	5	4	14th Do	1	6

In the event of Wet lands becoming unfit for raising wet crops from the impossibility of restoring the sources of irrigation, you will enter the same as dry land and fix the assessment thereon according to the quality of the soil, altho' they may have been cultivated as wet land at some former period.-

In classing the dry waste lands, you will class each field as separately entered and measured by the Surveyors in the rough Accounts prepared by them whether the same may have boundaries or not.-

Garden Lands.-

The Garden land must be classed in the following manner

after

after duly enquiring into the means of irrigation and the quantity of the soil.-

First Class.-

In this class in which is generally reared Tobacco and Turmeric is included.-

1stly Panty land a very rich soil found on the site on which a Village stood.-

2ndly Panty Keevada or land containing deposit from its vicinity to the Village.-

3rdly Low lying land near a Village enriched by filth.-

4thly Island soils.-

The above lands if irrigated by well +Motahs, and Pacattahs shall be rated in the following order.-

+ Large Leathern Buckets used to draw water by two Yoked Bullocks.-

1stly Superior class of the said lands at 448 per Cutty.-

2ndly Medium 384 Rupees per Do

3rdly Inferior 320 Rupees per Do

The above lands if without means of irrigation and dependant entirely on rains should be rated as follows

2nd Superior 320 Rupees per Cutty

3rd Medium

The above 8 Claſses have been arranged into the following rates.–

	C	F		C	F		C	F
1st Rate	15	2	5th Rate	10	8	10th Rate	3	18
2 Do	14	6	6th Do	9	2	11th Do	3	5
3 Do	13	..	7th Do	7	16	12th Do	2	12
4th Do	11	4	8th Do	6	10	13th Do	1	19
			9th Do	5	4	14th Do	1	6

In the event of Wet lands becoming unfit for raising wet crops from the impoſsibility of restoring the sources of irrigation, you will enter the same as dry land and fix the aſseſsment thereon according to the quality of the soil, altho' they may have been cultivated as wet land at some former period.–

In claſsing the dry waste lands, you will claſs each field as separately entered and measured by the Surveyors in the rough Accounts prepared by them whether the same may have boundaries or not.–

Garden Lands.–

The Garden Land must be claſsed in the following manner after

duly enquiring into the means of irrigation and the quantity of the soil.–

First Claſs.–

In this claſs in which is generally revised Tobacco and Turmaric is included.–

1stly Panty land a very rich soil found on the site on which a Village stood.–

2ndly Panty Heevada or land containing deposits from its vicinity to the Village.–

3rdly Low lying land near a Village enriched by filth.–

4thly Island soils.–

The above lands if irrigated by one 13 Mo+tahs, and Pacottahs shall be rated in the following order.–

+Large Leathern Buckets used to draw water by two Yoked Bullocks.–

1st Superior claſs of the said lands at 448 per Cutty.–

2ndly Medium 384 Rupees per Do

3rdly Inferior 320 Rupees per Do

The above lands if without means of irrigation and dependant entirely on rains should be rated as follows

1st Superior 320 Rupees per Cutty.–

3rd Medium

3d Medium 256 Rupees per Cutty.-
4th Inferior 208 Rupees per Do.-

2d Class.- In this class, in which is also raised Tobacco Turmeric and Chillies is included:-

1st Keevadu land containing slime and filth from its vicinity to the Village.-

2d Panty land mixed with soil of a slimy nature and sand.-

3d Black Clay or rich soil mixed with slime.-

4th White clay mixed with slime, and of muddy nature.-

5th Alluvial soil situated near the Bank of a river and containing slime.-

6th Panty land of a brown colour mixed with sand.-

The said land if cultivated and irrigated by means of Paccotahs, and Motahs+ should be rated as follows.-

+Note P. Leathern Bucket

2d Superior 380 Rupees per Cutty.-
3d The Medium 320 Rupees per Do.
4th The inferior 256 Rupees per Do.

Lands without regular irrigation and

---

and depending on rain should be rated as follows.-

3d The superior 250 Rupees pr Cutty
4th Medium 208 Rupees pr Do.
5th Inferior 160 Rupees pr Do.

Third Class.- In this Class is included.-

1st Black clay mixed with sand

2nd White clay mixed with sand

3rd Panty land or rich soil of a brown color mixed with sand.-

4th Island Earth.-

5th Garoovoo land or white soil mixed with white sand.-

6th Nullegutteru or red land mixed with fine sand and filth.-

7th Land of white soil mixed with sand.-

8th Toova land of soft soil.-

The said lands on which are generally grown Tobacco, Chillies, Turmaric, Garlic, Ginger, Chaynut &ca if irrigated by Paccottahs and Mootahs are rated as follows.-

3d Superior 320 Rupees pr Cutty
4th Medium 256 Rupees pr Do.

5th Inferior 208 Rupees pr. Do.-

The said lands if depending entirely on rain for irrigation, shall be rated as follows.-

4th Superior 208 Rupees pr. Cutty
5th Medium 168 Rupees pr. Do.
6th Inferior 128 Rupees pr. Do.

Fourth Class

In this Class is included.-

1st Panty Land situated in the vicinity of a village and mixed with fuller's earth and sand.-

2nd Hurada Garoovoo or land containing slime and filth from the Village.-

3rd Vallegutteru or red soil.-

4th Land of white color mixed with coarse sand.-

5th Black land mixed with fuller's earth.-

The said lands on which are generally grown Chayroot, Garlic, Chillies, Turmeric, Ginger, Natchenny, Mickayonnalee or great millet crop, Onions &c. are to be rated as follows if irrigated by Picottahs and Mootahs.-

4th Superior 256 Rupees pr. Cutty
5th Medium 208 Rupees pr. Do.
6th Inferior 168 Rupees pr. Do.

The said lands, if irrigated by Pools

Pools dug from time to time, or which are watered by means of Pots are to be rated as follows.-

5th Superior 168 Rupees pr. Cutty
6th In Medium 128 Rupees pr. Cutty
7th Inferior 104 Rupees pr. Do.

The said lands if entirely depending for irrigation on rains are to be rated as follows.-

6th Superior 104 Rupees per Cutty
7th Medium 80 Rupees per Do.
8th Inferior 64 Rupees per Do.

The above classes of Garden lands have been arranged into the following rates.-

			Rs.
1st Rate	pr.	Cutty	448
2nd do.	pr.	do.	— 384
3rd do.	pr.	do.	— 320
4th do.	pr.	do.	— 256
5th do.	pr.	do.	— 208
6th do.	pr.	do.	— 168
7th do.	pr.	do.	— 128
8th do.	pr.	do.	— 104
9th do.	pr.	do.	— 80
10th do.	pr.	do.	— 64

In this District it is customary to raise a variety of valuable products in very inferior Sandy Soils, but such lands should not be entered as Garden land, unleſs in the vicinity of the Village where the soil has become fertilized by a rich accumulation of deposit from the Village when such are not included within the skirts of a Village and of the quality just described, they should be claſsed as Poonjah or Dry lands..

You will consider and enter as Garden land only such Land as has been hitherto cultivated as such, but not the land in its vicinity, on the supposition that it may hereafter be converted into Garden land.- Should the lands have been formerly cultivated as dry or wet, they should be entered according to the claſs to which they belong as Dry or wet lands.

Wet Lands.

The manner of claſsing wet lands both cultivated, and waste and which may be expected to yield but one crop, is the following.-

First Claſs.

In this Claſs is included.-

1st Tallaravada a very rich white soil mixed with the deposits from inundation

Black

2nd Black clay mixed with white earth from inundation.-

3rd. Mooroogoodoo or low land having slime and thereby yielding Dabva or Black Paddy.-

4th Black clay of a slimy & muddy quality mixed with alluvial deposit.-

5th Garoovoo land, or soil of Brown color containing fine white sand and alluvial deposit.-

The superior Land of the above Claſses should produce 32 — 7. pr. Cutty.
Medium, Candies 28 – 15 pr. Cutty
Inferior, Candies 25 – 3 pr. Do.-

Second Claſs-

In this claſs is included.-

1st Nullaravada or Black clay mixed with slime.-

2nd White clay mixed with some slime and mud.-

3rd Mooroogoodoo land or black earth mixed with some fine sand.-

4th Bomdooyesaha or white sandy soil mixed with slime and mud.-

5th White sandy ground mixed with some filth.-

The superior land of the above

claſs should produce Candies 30-11 ^{7}ths Cutty

Medium Candies 26-19ths Do

Inferior Candies 23-7ths Do

Third Claſs. In this claſs included.—

1st White clay mixed with some black earth and mud.—

2nd Black clay mixed some fine sand.—

3rd Laka land or land found in Islands containing alluvial deposit and of a brown color.—

The superior land of the said claſs should produce Candies 25-3ths Cutty

Medium Candies 23-7ths Do

Inferior Candies 21-11ths Do

Fourth Claſs. In this Claſs is included.—

1st Black clay of a sliming quality

2nd Land found in Islands of brown color mixed with some fine sand.—

3rd Black land mixed with sand and slime from the Kistna river.—

4th Panty land of brown color mixed with some fine sand.—

The superior land of the said claſs

claſs should produce Candies 23-7ths Cutty

Medium Candies 21-11ths Do

Inferior Candies 19-15ths Do

Fifth Claſs. In this Claſs is included.—

1st Lanka or Island land mixed with some fine sand and slime.—

2nd Yarachicka, or red land mixed with some slime.—

3rd Salapoleum or land mixed with sand and red earth.—

4th Black land mixed with fine sand

5th Clay of a brown color mixed with some fine sand and slime.—

The superior land of the above claſs should produce Candies 21-11ths Cutty

Medium Candies 19-15ths Do

Inferior Candies 17-19ths Do

Sixth Claſs. In this Claſs is included.—

1st Red land of a sliming nature mixed with some fine sand.—

2nd Red land mixed with Nauparay or a kind of Marble.—

3rd Black clay of a sliming quality

Red

6163

Fort St. George 16th May 1842.-

4thly Red sand mixed with black earth and Pebbles.-

5thly White clay mixed with some fine sand and slime.-

6thly White clay mixed with some fine sand.-

7thly Red sand mixed with white Pebbles.-

The superior land of the said class should produce Candies 19 - 15 ¾ Ps. Cutty

Medium Candies 17 - 19 ½ Ps. Do.

Inferior Candies 15 - 3 Ps. Do.

Seventh Class

In this Class is included.-

1stly Poulachowtah or white land mixed with some fuller's earth and filth.-

2ndly Land found in Islands mixed with fuller's earth and sand.-

3rdly Black clay of a brown color mixed with slime.-

4thly Land composed of black and white clay and slime.-

5thly White clay mixed with some fuller's earth and sand

The superior land of the said Class should produce Candies 17 - 19 ½ Ps. Cutty

Medium

6164.

Fort St. George 16th May 1842.-

Medium Candies 16 - 3 Ps. Cutty

Inferior Candies 14 - 7 Ps. Do.

Eighth Class

In this Class is included.-

1stly Panlachowta land or white soil mixed with some sand.-

2ndly Black clay mixed with sand.-

3rdly Yerrachickee land or red soil mixed with fuller's earth.-

4thly Valeguttra land or red soil mixed with the deposits from inundation.-

5thly Red land mixed with some mud washed down from the Hills.-

6thly White clay mixed with large quantity of fuller's earth and sand.-

The superior land of the said class should produce Candies 16 - 3 Ps. Cutty

Medium Candies 14 - 7 Ps. Do.

Inferior Candies 12 - 11 Ps. Do.

Ninth Class

In this Class is included.-

1stly Valeguttera or red land mixed with fine sand.-

2ndly Black clay mixed with fine sand.-

3rdly Badavah land or land mixed with slime.-

4thly Goorvoo land mixed with sand and white earth

Goorvoo

5thly Georavee land mixed with white earth and fine ſand.-

6thly White clay mixed with ſome pebbles and fuller's earth.-

The ſuperior land of the ſaid claſs ſhould produce Candies 14-7 Ps. Cutty

Medium Candies - 12-11 Ps. Do.

Inferior Candies - 10-15 Ps. Do.

Tenth Claſs.

In this claſs is included.-

1stly Land within Tanks and containing ſlime.-

2ndly White clay mixed with fuller's earth and ſand.-

3rdly Chaligurree land mixed with red earth.-

4thly Valligattera or red land mixed with fine pebbles.-

The ſuperior land of the ſaid claſs ſhould produce Candies 12-11 Ps. Cutty

Medium Candies 10. 15 Ps. Do.

Inferior Candies 9-11 Ps. Do.

Eleventh Claſs

In this Claſs is included.-

1stly Gurroree land mixed with earth Badara

2ndly Badara land or muddy ſoil mixed with fuller's earth.-

3rdly Do. mixed with a kind of filth.-

4thly Black ſoil having fuller's earth and ſand.-

5thly Badara or muddy ſoil mixed with pebbles.-

The ſuperior land of the ſaid claſs ſhould produce Candies 10- 15 Ps. Cutty

Medium Candies 9 - 11 Ps. Do.

Inferior Candies 8 - 7 Ps. Do.

Twelfth Claſs.

In this Claſs is included.-

1stly Puludu Ravada or land mixed with black ſoil pebbles and fuller's earth.-

2ndly Swampy ground mixed with black and white ſoil of a hard consistence and fuller's earth in a ſubſtratum.-

3rdly Land mixed with iron ſtone and red ſand.-

4thly Gurroree or ſandy land mixed in the black earth.-

5thly Black clay mixed with Chunam ſtone and fuller's earth.-

6thly Sunparay land or ground containing marble mixed with red ſand Land

7thly. Land mixed red and fuller's earth.—

8thly. Land having black and white ſoil and gravel.—

9thly. Pulliadooparada a ſand mixed with black ſoil and pebbles.—

The ſuperior land of the ſaid Claſs ſhould produce Candies 9– 11 pr. Cutty

Medium Candies 8 – 7 pr. Cutty

Inferior Candies – 7– 3 pr. Cutty

Thirteenth Claſs

In this Claſs is included.—

1stly. Poor white ſand mixed with fuller's earth.—

2ndly. Land mixed with red ſand and ſtones.— called Malaparoy and Naparoy.—

3rdly. Land mixed with red ſand and Pebbles.—

4thly. Garapah land or light ſoil mixed with fuller's earth iron ſtone and red earth. as well as fine ſand.—

5thly. Black ſlime of a little ſlime mixed with fuller's earth.—

6thly. Garooroo land or ſandy ſoil mixed with fuller's earth.—

7thly. Land having red ſoil and pebbles.—

The ſuperior land of the ſaid claſs

---

claſs ſhould produce Candies 8-7 pr. Cutty

Medium Candies — 7- 3 pr. Do.

Inferior Candies —— 5- 10 pr. Do.

Fourteenth Claſs.

In this Claſs is included.—

1st. Land mixed with Nauparoy or a kind of Marble red ſand and fuller's earth.—

2ndly. Black land containing a large quantity of fuller's earth and fine ſand.—

3rdly. White ſand containing a large quantity of fuller's earth and black earth.—

4thly. Land mixed with iron ſtones coarse ſand and fuller's earth.—

5thly. Black ſoil containing a large quantity of fuller's earth.—

6thly. Swampy ground full of long graſs and containing gravel.—

7thly. Garoon land or ſandy ſoil mixed with coarse ſand of fuller's earth and white earth.—

The ſuperior land of the ſaid claſs ſhall produce Candies 4– 15 pr. Cutty

Medium Candies 3 – 11 pr. Do.

Inferior Candies 2 – 7 pr. Do.

The above 14 Classes have been arranged into the following rates.-

	6	7		6	7						
1st Rate	32	7	6th Rate	23	7	11th Rate	14	7	16th Rate	7	3
2nd do.	30	11	7th do.	21	11	12th do.	12	11	17th do.	5	19
3rd do.	28	15	8th do.	19	15	13th do.	10	15	18th do.	4	15
4th do.	26	19	9th do.	17	19	14th do.	9	11	19th do.	3	11
5th do.	25	3	10th do.	16	3	15th do.	8	7	20th do.	2	7

It is to be observed, as a general rule that all lands comprized in the above 14 Classes should be classed and assessed according to the means of irrigation and the labor required in bringing the crops to maturity.

Those possessing a constant supply of water from Tanks, Water courses, or springs and situated near the Village should be entered as belonging to the superior description of lands.-

Those lands which from their locality distance from the village, and the uncertain supply of water from tanks cannot be expected to yield the best Crops, or if they do yield good Crops cost much labor in bringing them to maturity should be entered as belonging to the Medium description.-

Those lands, the irrigation of which is still more precarious from their distance from the tanks should be considered to belong to the inferior description.-

Lands yielding one or two Crops irrigated by manual labor or by Paccottahs from Wells or deep ravines should be classed as wet Garden Lands, and be assessed according to their quality at ½ less rent than such lands would have borne had they been irrigated in the usual manner by tanks and water courses.

Lands which have no tanks or water courses and which depend entirely upon rain for bringing their Crops to maturity and patches of low lying lands in which Paddy is sown must be classed as wet lands according to their quality, but should be assessed at ½ less rent than the same description of wet lands irrigated by tanks or water Courses.

In classing wet and Garden

lands you should pay great attention to the sources of irrigation, and a remark should be appended to the claſsification of each field stating the particular kind of irrigation whether by a tank, Well, River, or spring water is supplied to it.—

In examining the lands watered by wells, it should be ascertained whether the water in those Wells is sufficient to bring one or two crops to maturity and such lands should be claſsed and aſseſsed accordingly.—

In claſsing the lands you should take the rough accounts of the survey and enter therein the claſses of the lands according to the different descriptions of soils afterwards you should distinguish Circar from Enam lands and arable from waste lands and rate them according to their estimated capability.—

Lands lying in the inner part of the tanks shall not be claſsed as barren or uncultivated lands when the water in the Tanks becomes dry you

shall

shall find out what part of it is cultivated and then claſs the same.—

In claſsing the wet lands an entry should be made thus. "Wet Lands watered Rivers" "Channels" "Mountains" "Rivulets" or spring wells by anicut raised in rivers or channels whether depending for irrigation on large or small tanks and whether those Tanks are supplied by river or rain water.—

In claſsing the dry lands also an entry should be made of having available sources of irrigation stating whether fields have Wells, Channels, Tanks &ca. to depend upon in the event of the failure of the periodical rains..

The lands in this District do not poſseſs the same means of irrigation in respect to water-courses and Wells &ca. as in the more Southern Districts nor are there large Tanks capable of holding a large supply of water it consequently follows that lands are seldom cultivated with more than one crop and therefore no lands can be aſseſsed as two Crop lands, but should any land yield a second crop in any year an additional aſseſsment.

aſseſsment equal to half the Amount of the 1st Crop may be imposed after a full enquiry in each particular case.—

The accounts of the aſseſsment which should be fixed in the manner ~~as~~ as directed in Para 4, should be attested by the Ryots, Curnums as also by you, and then should be sent to the Huzzoor so soon as it is completed for each Village.—

Should the Ryots &ca. produce correct accounts of the extent of produce of each field in their respective Villages, you should draw out copies thereof cause them to be attested by all of the parties, and after affixing your signature also thereto, forward the same to the Huzzoor.— Should no accounts be forthcoming of the actual produce, you should get an account prepared according to the consent of the Ryots, shewing the estimated produce of such lands caused to be attested by all the Village people and after affixing your signature thereto send the same to the Huzzoor.—

The arable and waste portion of Enam Lands composed of wet, dry and Garden lands belonging to Pagodas Bramins, Village servants and other

claſses

claſses of People, and which are denominated "Swayem Crooshy" Surva Dumbalah, "Parum Crooshy" Baudee Surdee Gottumpoo Catoobady &ca. as referred to in Para 28 of the survey rules, should be claſsed and aſseſsed in the same way as Circar Lands, and an Accounts thereof should be forwarded to the Huzzoor.

The mode of drawing up the statement of all persons liable to the Moturpha tax under the general Head of ready money collections is as follows.—

An account should be prepared of all Bramins, Wholesale dealers, Weavers, Merchants, Oil makers and other Castes, liable to Moturpha, Tax, distinguishing those who tho' liable, had not yet been called upon to pay, stating the occupation and profeſsion of the latter, the circumstance under which they may claim an exemption from the tax, and the amount which they are individually liable to pay.— An account particular regarding the Tax on Palmeira Trees, should also be prepared and forwarded.— Should there be any productive Trees in the lands under cultivation there is no neceſsity to levy a tax on such trees, because the lands pay a sufficient aſseſsment. therefore you need not enter such trees in the accounts as subject to tax but take care to note down the Trees which are thus exempted.— Each

Fort St. George 16th May 1842.

Each Ryot should be present when his field is claſsed and aſseſsed in order that he may observe the mode of fixing the same. Should any Ryot afterwards complain of his lands being entered in two high a claſs and aſseſsment, the blame will be his own, you must therefore insist on the attendance of each Ryot in claſsing his land.

The land in which there are plantations of lime trees, Orange Trees Pomagranate Trees, &c. should be claſsed and aſseſsed with reference to the quality and productiveneſs of the soil, so that when they may be cultivated hereafter the full rate of aſseſsment may be collected therefrom; it being however understood that till that event may take place the usual mode of pointing out such lands will be continued.-

As the attempt to fix the standard rate of commutation, would lead to inequality in the aſseſsment and as an equitable rate of conversion must depend on the distance from Markets and other circumstances and must vary in different Villages the rate of commutation of each Village shall be determined in the Collector's Cutchery. It will be the duty of the aſseſsors, therefore, to fix the grain aſseſsment only leaving the money aſseſsment to be determined on a final review of the circumstances of each Village.-

(Signed) P. Grant
Collector.

J.H.B.

Fort St. George 16th May 1842

No. 9.—

Instructions iſsued to the Head Aſseſsor.—

1 You are hereby appointed to Superintend and correct the aſseſsment of the Aſseſsors for each Village.

2 On your arrival at a Village, you will call for the accounts of the aſseſsor and examine personally the claſsification of the lands and furnish to the Huzzoor a Statement shewing the quality of the soil, the average produce of former years for each field with reference to the estimated or actual outturn, the sources of irrigation together with a Statement of all other circumstances connected therewith you are also required, in conjuction with the Head Ryots and Curnums, the cultivators of each field, together with the Head inhabitants of the neighbouring Villages, as Mediators, to ascertain the probable quantity of produce per Cutty or Acre and fix the grain aſseſsment on each field

and to forward a Statement thereof to the Huzzoor which will be taken into consideration in making the final assessment ——

3 Should the Assessors have classed the lands erroneously, or at rates different from those to which they should belong or should they have committed any other irregularities, you will report the same to the Huzzoor immediately, in order that they may be punished for the same. If on examination you find that the Assessors have entered two or three kinds of land in the same class you will transfer each sort to its proper class. As the classing of the fallow and waste lands at too low a rate might induce the Ryots to occupy their lands and throw up the usually cultivated lands to the injury of the Revenue, and as, on the other hand, the waste lands if too highly assessed, will never be brought under Cultivation, you will carefully assess the waste and

fallow

fallow lands according to their quality and capability. You will also examine the Enam lands in the several Villages and enter in the Account only those which may be in the actual enjoyment of the parties claiming them, and assess them with reference to the quality and capability of the soil, and other advantages in point of locality. You will examine whether the Assessors have attended to these instructions.

4 You will pay strict attention to the instructions already issued to the Assessors for their guidance, and take care that they be duly conformed to ——

5 Your diligence in the performance of these duties will entitle you to future promotion, while negligence or inattention will bring down on you censure and disgrace. ——

Sir

With reference to the Extract from the Board's Proceedings dated 7th February last, I have the honor to forward a Statement shewing the present distribution of the peons on the Salt Establishment from which it will be seen that none are available for the new platform. I therefore trust the Board will be pleased to obtain the Sanction of Government for the employment of the 2 Peons retrospectively from 1st May 1841 and for their continuance in future.

To the Chief Secy to Government

To

The Chief Secretary to Government

Sir,

From Guntoor 3d January in Cons 7th February 1842

Boards Proceedings 7th Feby

From Guntoor 2d in Cons 16th May

I am directed by the Board of Revenue to request you will lay before the Right Honorable the Governor in Council the accompanying correspondence with the Collector of Guntoor, having reference to the appointment of two Peons on a monthly salary of 5 Rupees each per mensem, for the security of the Salt stored on an additional platform raised on the east of Sree Vencatasuerla Doddy in that District under the authority conveyed in the Resolution

6185 | Fort St George 16th May 1842.

P.W. Dept. in Cons 12th August 1841.

Resolution of Government dated 6th August 1841. No 1032.

As it appears from Mr Stokes' letter of the 2d Instant that the Peons on the Salt Establishment are fully employed and that none are available for the new Platform, the Board recommend that authority may be granted for the employment of two Peons retrospectively from the 1st May 1841.

From the Collr of Nellore.

Sir,

With reference to the Extract from the Board's Proceedings dated the 7th of February last, requiring the original sunnud for the grant of a certain Yeomiah at Ongole which was latterly received by the late Abdool Raheem, I have the honor to state that the original sunnuds of the Yeomiahdars in this District appear to have been forwarded to the Board by Mr Travers under date the 28th of August 1804. Upon reference to the records of this Office, a Copy of a Sunnud of Nabob Wallajah bearing date 16th Mohurrum 1207 Hizery, has been found. It does not mention the name of any particular individual and merely authorizes the Employment of teachers in the different Talooks on a monthly allowance of 7 Rupees to each; but the said date corresponding with that specified in the

the

Fort St. George

(35)

From the Pl. Collr. of Nellore.

Sir,

Para 1. I have the honor to acknowledge the receipt of Extract from the Boards' Proceedings dated the 31st March last, transmitting Extract from the Minutes of Consultation in which an explanation is called for of the small amount of advances for cultivation disbursed in this District in Fusly 1250, compared with the disbursements made on the same account in preceding years with the Estimate for that Fusly which amounted to Rupees 15000.

2. The small advance made in Fusly 1250 compared with the disbursements in preceding years is owing to two causes— First, the circumstance of Tuccavy advances having been restricted since Fusly 1248 to the lowest possible amount, by a close scrutiny into the details of the Tahsildar's accounts

of proposed advances, and secondly to a more favorable season; The Board and Government will see by the Marginal Statement the large sums annually sunk and lost to the Revenue by the heavy advances for Tuccavy for many years previous to my joining the District. These advances was money actually sunk for though recovered in the course of the year it was only to be repaid more or less at the commencement of the next. A permanent reduction in the amount of Tuccavy is therefore an actual recovery of so much money for the use of Government.

1251	5,000	.	.	1,896	"	"

3. As regards the 2d point on which the Government desire explanation Viz: the Estimated

Estimated amount of Tuccavy for Fusly 1250 so much exceeding the actual disbursement, I have to observe that when the Tuccavy Estimate is submitted for sanction, it is at that early period of the year, when it is not possible to know what may be the circumstances of the season, or the extent of assistance which the Ryots may require. The Estimate for Fusly 1250 might no doubt, as the season proved favorable, have been fixed at a lower sum, but I conceived it safer, to have the power of regulating the advances as the circumstances of the season indicated by an Estimate which would provide for such contingencies than to make the original Estimate so low as possibly, if not probably to render it necessary to apply for sanction for a further Estimate, which would not probably be received at the earliest within a Month, while circumstances might demand immediate assistance. Estimates for Tuccavy are not like Estimates for the construction of works. The latter admit of an expenditure to the amount of the

the Estimate and the money so spent is gone for ever, but Tuccavy money, whether the actual disbursement come up to or fall short of the Estimate, returns to the public Treasury. The Government will not fail to observe from the marginal Statement given above that the actual disbursements have always fallen very considerably short of the sanctioned Estimates.

4. The Government has also observed on the increase in Fusly 1250 in the charges incurred without Estimate beyond those of the previous year. The chief item in these charges is that for Salt, shipping, &ca charges, the amount of which depends on the extent of the manufacture and shipments, and is an item of charge entirely beyond my controul. The charges incurred without Estimate in Fusly 1250 amounted to Rupees 19,671-3-11 of which Rupees 15,628-„-4 was on account of Salt, shipping charges, leaving the actual charges incurred without Estimate Rupees 4043-3-7. The marginal Statement

Statement* exhibits what they have been in round numbers exclusive of shipping charges in Fuslies previous to Fusly 1245, the year from which I have had the administration of the District. They would have been lower in Fuslies 1249 and 1250, but for some unusual though unavoidable charges such as the price of the Porto Novo Ploughs 453 Rupees, and others connected with the late Commission on the affairs at Woodiagherry. The Government may always feel assured that if there is any one point of my duty which receives my most especial and anxious consideration, it is the diminution of the public expenses so far as it can be done without impairing the efficiency of the administration of the District.

To the Chief Secretary to Government -

(48)

To the Chief Secy. to Govt. Submitting a Report from the Pl. Collr. of Salem detailing his [illegible] [illegible] 1842

Sir,

I am directed by the Board of Revenue to transmit the accompanying Report from the Principal Collector of Salem in the affairs of the native Religious Institutions of his District with the Board's sentiments on the subject -

Salem detailing his propositions for withdrawing from interference in the affairs of the Native religious institutions of his District

2 It will be seen from the figured Statements enclosed in it, that the number of Temples to be so treated is 198 enjoying a Tusdeek or fixed revenue derived from the proceeds of resumed lands and of certain money payments previously engaged by them which were consolidated in the year 1211 Fusly into a fixed and definite allowance in lieu of all other demands. The Tusdeeks underwent further modifications in 1231 Fusly and now amount to Rs 55,237-8-9 (Rs as p) disbursed from the public Treasury in sums varying from Rupees 3 or 4 to Rupees 1,743 the largest income enjoyed by any single Pagoda. These payments together with the entire superintendence of the Temples and their concerns, Mr. Wey proposes to transfer to 68 Punchayets or bodies of Trustees, consisting for the most part of three Members but in some cases of fewer, selected from the Village Community

community by the public voice, each Punchayet having charge of all the temples in the particular Village for which they are elected, provision being also made for the supply of vacancies in the number of the Trustees by the choice of the inhabitants.

Paras 14-16 3. So far these measures are entirely in accordance with the views expressed by the Board in their Proceedings of the 24th March last. But to control

15-17 these local bodies and to exercise a ~~or~~ general authority for the decision of all petty matters of dispute Mr. Wey recommends that permanent Punchayets of a superior order should be appointed in different parts of the District. The Board have already objected to schemes of a somewhat similar from Bellary, Chingleput, and Trichinopoly. The established tribunals ought to be competent to the disposal of all such cases as may be brought before them and in the Form of Trust Deed to be hereafter adopted, the Board contemplate that the powers and in the affairs of the native Religious Institutions of his District with the Board's sentiments on the subject -

Salem detailing his propositions for withdrawing from interference in the affairs of the Native religious institutions of his District

2 It will be seen from the figured Statements enclosed in it, that the number of Temples to be so treated is 198 enjoying a Tusdeek or fixed revenue derived from the proceeds of resumed Lands and of certain money payments previously engaged by them which were consolidated in the year 1211 Fusly into a fixed and definite allowance in lieu of all other demands. The Tusdeeks underwent further Modifications in 1231 Fusly and now amount to Rs 55,237 - 8 as - 9 p disbursed from the public Treasury in sums varying from Rupees 3 or 4 to Rupees 1,743 the largest income enjoyed by any single Pagoda. These payments together with the entire superintendence of the Temples and their concerns, Mr Gleig proposes to transfer to 68 Punchayets or bodies of Trustees, consisting for the most part of three Members but in some cases of fewer, selected from the Village Community

by the public voice, each Punchayet having charge of all the temples in the particular Village for which they are elected, provision being also made for the supply of vacancies in the number of the Trustees by the choice of the inhabitants.

Paras 14 - 16 3 - So far these measures are entirely in accordance with the views expressed by the Board in their Proceedings of the 24th March last. But to control

15 - 17 these local bodies and to exercise a ~~or~~ general authority for the decision of all petty matters of dispute Mr Gleig recommends that permanent Punchayets of a superior order should be appointed in different parts of the District. The Board have already objected to schemes of a somewhat similar from Bellary, Chingleput, and Trichinopoly. The established tribunals ought to be competent to the disposal of all such cases as may be brought before them and in the Form of Trust Deed to be hereafter adopted, the Board contemplate that the powers

and duties and responsibilities of the Trustees shall be so clearly defined as to render any act of abstraction, neglect or malversation easily cognizable by the ordinary Civil and Criminal Courts. They would propose therefore that the Managing bodies selected by Mr. Glegg and enumerated in Statement No. 5 should be confirmed without the intervention of any superior controlling authority and subject only to the execution of the Trust Deed to be hereafter framed.

Para 6-7 4 It has been stated that the Tasdeekes or commuted allowances originally fixed in 1211 Fusly were afterwards modified in 1231 Fusly (1821) and the Principal Collector enquires which of the two should be permanent guide in future. The Board see no reason to depart from that last fixed which has been in force for the last 20 years.

5 Mr. Glegg's recommendation for the disposal of the surplus funds now in deposit forms part of the general question now in abeyance pending

[illegible]

further

---

further instructions.

6 It will be explained to the Principal Collector that the instructions of the Supreme Government, referred to in Para 18 of his letter, apply only to landed endowments, at present administered by the Officers of Government, and not to those that have long been assumed, and fixed commutations granted instead. A separate communication has been lately received from Mr. Glegg containing his opinion of the injurious effects to be apprehended from the permanent transfer of landed property to the management of Pagoda Superintendents, which will be submitted to Government hereafter when the sentiments of the other local officers have been received.

7 The Board will instruct Mr. Glegg to endeavor to remove the apprehensions stated to be felt by the people at the measures about to be adopted, by explaining to them the true object and intent of the Government in ordering them, and by pointing

out that no invasion or diminution of their privileges or emoluments is intended, while every facility will be afforded to them of vindicating their rights by the same means that are open to all other sects and denominations of British subjects.

To The Collector of
South Arcot

Sir

1 I have the honor to acknowledge the

the receipt of an Extract from the Proceedings of the Board of Revenue under date the 24th April, wherein they decline to sanction my Extra tent allowance while I resided in Cuddalore, I beg to offer the following explanation.—

From June 9th to August 5th 47 days

2 The Sub Collector, previous to the 9th of June, received a private note from the late Principal Collector Mr. Ashton desiring him to proceed with his Cutcherry to Cuddalore, as he was about to be removed, and afterwards received the sanction of the Commissioner Mr. Dent to proceed to the Hoozoor station in order to know his opinion on various subjects connected with the District, and also for the settlement of accounts at the termination of the Jummahbundy. Up to the present day it has been the Custom of the Sub Collector to proceed to the Hoozoor station for the adjustment of accounts with the collectors Cutcherry, and remain there for some time, and up to the present time the Board of Revenue have found no objection

It is true the sub Collector was more than one Month at the Hoozoor station, but the time he was there was unprecedented, there being three persons in charge of the district in the course of a few weeks and contradictory orders issued - the Commissioner issuing orders diametrically opposed to those of the Collector, the adjustment was delayed by orders from the Commissioner to restore certain sums which had been collected by order of the late Collector, and new accounts had to be made out - a new Collector having been ordered to take charge of the district from the Commissioner it was necessary for the sub Collector to see the Acting Collector Mr. Hallett, in order to know his opinion that they might act in conformity. -

From 22d. Septr. to 8th. October.

3 During this period the sub Collector was in charge of the district, the late Principal Collector having

having gone on a months leave, the greater part of the time the Principal Collector was absent - The sub Collector was in tents, and was obliged to proceed to Cuddalore on public duties, the justice of reducing the allowance of the sub Collector when his duties are doubled seems doubtful - The sub Collector had not the whole of his Establishment with him, merely those who were necessary to carry on the current business of the Division the records and Revenue Goomastahs being left at Verdachellum, so that it was absolutely necessary to keep up the Cutcherry for the establishment left behind.

20th to 29th Octr. 10 days
28th Decr. to 3 Jany. 7 days

4 During this time the Cutcherry servants, attached to the sub Collector's Cutcherry, were not at the Hoozoor station, but at Verdachellum, and only those of the current business at the Hoozoor, the statement does not shew where the Cutcherry was, but where the sub Collector was, and on these grounds the sub

Collector is of opinion he is entitled to extra tent allowance, the Cutcherry Establishment attached to the Sub Division being actually in poſseſsion of the Cutcherry provided by him, and he would further beg to add that his predeceſsor Mr. Pycroft paſsed much more of his time at the Hoozoor station than the present Sub Collector has done, without any reduction of his allowances. It might therefore be justly inferred that the Board of Revenue sanctioned the Sub Collector's residing for some short time in Cuddalore without any reduction.—

Translation

A

Translation of a Reply presented to the Assistant Judge of the Auxiliary Court at Cuddalore by the Court Vakeel Vencatramana charry on the 21st April 1842 in behalf of the Plaintiff Allagapillay in Suit No 198 of 1840 to an answer filed by the Collector.

The Collector admits in his answer that the 2nd Defendant (Durkastdar) give an agreement to the Plaintiff on account of the land now in dispute and that his right to it being thereby established he accordingly passed a decision in his favor but in the mean while he mentions in his answer that he did so without being informed that the Plaintiff was a Paracoody Ryot and being afterwards aware that he was a ryot of that denomination he passed another decision against his first one on the 14th July 1837 after the Collector had passed his decision in favor of the Plaintiff upon a thorough investigation of the case, both in the presence of the Plaintiff and Defendants as well as on a due inspection of the Documents by which

which the right of the Plaintiff was fully established. Agreeably to the agreement given to the Plaintiff how is it that he now says he did so thro ignorance even this the Collector had omitted to mention in his subsequent decision as a reason for having cancelled his first one - and it must also be observed that he was not justified in passing his decision in this case while he well knew that the Plaintiff had just then filed his suit (No 162 of 1837) in this Court about the disputed land in question and when he ought to have waited its issue. This being therefore contrary to section X Regulation III of 1812, the decision cannot be considered valid.

It is further mentioned in the answer that according to the Rules of the Hookumnamah of Fusly 1240 the Plaintiff has no claim to the land in dispute the Plaintiff knows nothing of such Hookumnamah altho such an Hookumnamah is in existence, yet it has no Connection whatever with this suit, because, according to its own provisions it does not appear that a Durkastdar is excluded from the right of making over his Durkast land to any strange ryot. It has been admitted in the answer that the Durkastdar the 2d Defendant is an Oolcoody who has an establishished right to the land such being the case, it is optional with the 2d Defendant (Durkastdar) to dispose of his Durkast lands in any manner he may think proper, and how can the Collector or any other authority start any objection whatever.

The Jummahbundy Hookumnamah was not formed by Government like the Regulations, but framed by the Collector from time to time merely for the security and management of Revenue business which is not even acted upon. In proof of this a piece of waste land which was obtained on Durkast by an Oolcoody ryot in the Village of Ayanoor in the Munnargoody Talook was given up by him to a Paracoody by Razeenamah which was approved

by

by the Circar and confirmed on the latter by a Puttah. Besides the 3d Defendant in this suit who similarly obtained some waste lands in the Village of Shavakum in the same Talook has also made them over to certain Paracoodies on the terms above said and they have been confirmed by the Circar on Puttahs. It is moreover customary in this Zillah for an Oolcoody ryot to dispose of the land in his possession to the Ryots of another Village or Paracoodies by giving a Razeenamah to that effect which is then duly accepted by the Collector and Puttah accordingly granted to the person obtaining the said document further the Circar sells the lands of the Ryots against whom Arrears of Revenue may be due, by public auction to the Ryots of another Village, which practice has always been considered unobjectionable. In Munnargoody and Chellumbrum Talooks several lands were sold to the Ryots of other Zillahs agreeably to an Istyar published by the Collector in the month of December

Firstly

Fusly 1250 inviting persons to purchase lands belonging to the Ryots against whom arrears of Revenue were due and which were to be sold by public Auction according to the orders of Board of Revenue. Besides these a portion of land which was lying waste among the Kyput lands of the Plaintiff in the Village of Yerhunay in the Munnargoody Talook was proposed for by a Paracoody ryot to be taken on Durkast which notwithstanding the Plaintiff's immediate remonstrance and objections to the proposal was put in the possession of the former and a puttah given to him by the Carear and he subsequently relinquished it in favor of another Paracoody ryot on whom the land was latterly confirmed by the Collector. Circular Orders also were issued in the time of Mr. Ashton directing that the practice of confirming "Oolcoodies" only in the possession of lands granted on Durkast is no more to be observed, and that "Paracoodies" also are to be considered equally entitled to that privilege. Extract of which order is filed with the suit No. 162. While such orders and

and practice are in existence great deviations from them prevail, by which it appears that the Hookumnamah is not a fixed Rule. how then can the Collector maintain only in this case, that an "Oolcoody" "Oolcoody" cannot relinquish his land to a Paracoody ryot? Besides this if a Ryot has only Cultivation and Puttah in a Village no matter where he resides, he must be considered an Oolcoody and not a "Paracoody": so the Plaintiff possessed Cultivation and Puttah in the Village of Punnaput where the disputed land is situated, from a long time previous to the occurrence of the dispute. The Puttahs belonging to the Plaintiff were filed with the abovementioned suit No. 162 and confirmed by the Court in its original decree, by which it is evident that the Plaintiff is an "Oolcoody" of that Village. I therefore pray the Court will be pleased after obtaining the necessary proofs and examining the proceedings held in Suit No. 162 as well as those in the present suit to pass a reasonable decision.

Sir

Para 1. I have the honor to forward the Account particulars, called for by the Extract from the Proceedings of the Board of Revenue dated the 11th Instant.

2 The Estimates on this account were made by Mr. I. I. Franklin who has undertaken the supervision of the guard boat Establishment, so long as his other duties enable him to remain in the neighbourhood of the Pearl Banks.

The

Original Destroyed

The provisions have been laid in, and purchased, under his superintendence, and the reason why the charges for them exceed the estimate appears to be, that the Estimate was merely a rough one and was not formed on sufficient data.

(87) From the Collector of Ganjam. Return of Persons convicted under Regulation IX of 1822, for the Month of March last.—

(88) From the Collr. of Ganjam. Stating that Certain Returns for the Month of March last are not sent, there being no entry to make.—

(89) From the Collector of Guntoor. Return of Public Servants suspended or dismissed from Employment from 1st January to 31st March last.—

(90) From the Ag. Collr. of Guntoor } Stating that the Returns of fines and of Alterations, of the Quarter ending 31st March last, are not sent, there being no entry to make.—

(91) From the Collector of Masulipatam. Abstract of Demand Collection and Balance for the Month of March last.—

(92) From the Collector of Masulipatam. Statement showing the Average Bazar wholesale prices of Grain and

according to its own provisions it does not appear that a Durkastdar is excluded from the right of making over his Durkast land to any strange ryot. It has been admitted in the answer that the Durkastdar the 2d Defendant is an Oolcoody who has an established right to the land such being the case, it is optional with the 2d Defendant (Durkastdar) to dispose of his Durkast lands in any manner he may think proper, and how can the Collector or any other authority start any objection whatever.

The Jummahbundy Hookumnamah was not formed by Government like the Regulations, but framed by the Collector from time to time merely for the security and management of Revenue business which is not even acted upon. In proof of this a piece of waste land which was obtained on Durkast by an Oolcoody ryot in the Village of Ayanoor in the Munnargoody Talook was given up by him to a Paracoody by Razeenamah which was approved

by

by the Circar and confirmed on the latter
by a Puttah. Besides the 3d Defendant in
this suit who similarly obtained some
waste lands in the Village of Shavakum in
the same Talook, has also made them
over to certain Paracoodies on the terms
above said and they have been confirmed
by the Circar on Puttahs. It is moreover
customary in this Zillah for an Oolcoody
ryot to dispose of the land in his posse-
ssion to the Ryots of another Village or
Paracoodies by giving a Razeenamah
to that effect which is then duly accepted
by the Collector and Puttah accordingly
granted to the person obtaining the said
document further the Circar sells the lands
of the Ryots against whom Arrears of
Revenue may be due, by public auction
to the Ryots of another Village, which
practice has always been considered
unobjectionable. In Munnargoody and
Chellumbrum Talooks several lands were
sold to the Ryots of other Zillahs
agreeably to an Istyar published by
the Collector in the month of December

Firstly

5237 Fort St. George 16th May 1842.

(93) and Salt for the Month of March last.

From the Pl. Collr. of Madura. Return of Persons confined in pursuance of sentences passed under Regulation IX of 1822 for the Month of April last.

(94)

From the Al. Collr. of Trichinopoly. Return of Fines imposed & stoppages made from the Pay of the Public Servants, from 1st January to 31st March last.

(95)

From the Al. Collr. of Trichinopoly. Return of Alterations that have occurred in the list of fines and Stoppages, from 1st January to 31st March last.

(96)

From the Al. Collr. of Trichinopoly. Return of Public Servants Suspended or Dismissed from Employment, from 1st January to 31st March last.

(97)
