Sent the following letter.

(2)

To The Acting Principal Collector of Canara.

To the Actg. Pl. Collr. of Canara.

Sir,

I am directed by the Board of Revenue to transmit to you a copy of the Report of Mr. John Stoker Commissioner in Canara on the subject of the land revenue of that District as requested in Mr. Blair's letter dated 25th Ultimo No. 13.

* dated 12th July 1844.

In Con. 1st Febry. 1844.

The Board did not record any proceedings at the time on the Report, but referred to it in their Proceedings of 11th January 1836, a copy of which will be sent to you if you require it.—

Revenue Board Office, Fort St. George, 15th February, 1844.

To,
The Acting Secretary to the
Board of Revenue
Fort St. George

From the Collector of Ganjam ... 1.

Sir,

18

Adverting to Paras 23 and 27 of my Report on the settlement of the extra Sources of Revenue of this District for Fusly 1252 (1842/43) dated 4th January 1844. I have the honor to state that the Balance outstanding on account of Sundry Small Farms and

and Licences for Fusly 1250 (1840/41) and 1251 (1841/42) is Rupees 3910-12-6- as per Columns 15 and 18 of the Statement marked B. which accompanied the Report in question. Of this sum Rupees 2030-14-6- it is expected will be collected hereafter and the remainder Viz.t Rupees 1879-14-0 which is due by the Renters of Poo=bacondah, Attehapore and Wadadah Talook and Palatalagum Estate being deemed altogether des=perate from death Emigration and poverty

Balance due by Renters dead	88-9-3	among the defaulters as per margin
Do. by Do. emigrated	238-2-1	consequent on the succession of bad seasons during the period exc=
Do. by Do. in distress	1553-2-8	=tending from Fusly 1246 (1836/37) to a part
Total	1879-14-0	of 1251 (1841/42) and their having no property whatever available in satisfaction

of the Balance still due by them from their being of the classes mentioned by the Collector in Para 24 of his Report on the Land and Moturpha Revenue and sundry Small Farms and Licences of the Havelle Taulooks of this District for Fusly 1251 (1841/42) dated 10th April 1843. I accordingly beg to recommend that the Board will in reference to the mode in which the Rents on this account have been annually settled

as

Fort St. George 19th February 1844

-as shewn in the latter Report be pleased to obtain the sanction of Government for writing off the amount from the Public accounts

2.

In respect to the Balance of Fusly 1252 a Report will shortly be submitted :-

to the Governor.-

Resolution thereon,

22-24

Under the circumstances stated in the foregoing letter the Court of Wards sanction the disbursement of Rupees 1500 from the surplus funds of the Purlah Kimedy Zemindary for the marriage expenses of Sri Sri Govaravachendra Gaz Putty Narain Deo.-

22

Proceedings.

Requesting the Collector of Vizagapatam to direct his attention to the early re-organization of the Village Police throughout his District.-

The Board have ascertained in the course of their enquiries into the Village Police of the Southern Provinces of the Presidency that in them the ancient Village System of the Country is every where inforce to a certain extent more or less complete, but throughout the Northern circars the Village system of Police is imperfect, indeed it has been matter of enquiry how far the lands and Rooftoomes originally appropriated to the remuneration of Village officers can in many instances be now made available for that purpose, and opinions have been expressed of the difficulty if not impracticability of ensuring from the heads

of

Bds Proceedings 7th April 1831 (No 708)
From Judr Sedalut to Govt
Enclosure in letter from Govt 31st May in Lons 2nd June 1831.-

of Villages in the Northern Zemendaries the discharge of the duties which devolve upon them under the Regulations. This very incompleteness of the system whilst calling for amendment has retarded its reform. The requisitions of the Board at different periods for reports to enable them to propose remedial measures have been in general tardily, and in all cases in=sufficiently responded to; in a great measure seemingly from the diffi=culty of arriving at a correct know=ledge of facts and accounts necessary to form the basis of proposals for amendment.

2. In much that has been already done the general fea=tures of the Village Police in the Northern Circar have been kept principally in view; the Board now propose to consider the System as affecting each District separately, but in proceeding to do this they will first notice the obstacles which have opposed the settlement of this question and the opinions on the subject which they

find upon their records.

3. In order to enable them to submit information called for by Government respecting the propriety and means of making provision for any Head Inhabitants who might not be already provided for, the Board in 1827 called upon the several Collectors to report whether there were any Villages in their respective Districts in which the Head Inhabitants was not in the receipt of any allowance, either in money, land or grain, and if there were any so circumstanced, to submit their opinions both as to the propriety and means of making a suitable provision for them as contemplated by Clause 1st Section III Regulation IX of 1816; but the information afforded in consequence of that requisition was, in many in=stances, so defective that in address=ing Government in 1830 the Board had to regret their inability to submit a report on the subject without fur=ther references.

From Govt 2d Feby 1827. in Ons 8th Do

Circular 19th April 1827.

To Govt 21st in Ons 27th Octr 1830.

4. In the following year when submitting observations on certain imputations which had been cast on the

Fort St. George 19th February 1844

Bd. Proceedings 1st April 1831.
From Coll.r of Ganjam 10th inst.o 22d Oct.r 1827.
From Coll.r of Vizag.t 8th inst.o 15th Oct.r
From Coll.r of Rajah.y 27th Oct.r inst.o 5th Nov.r
From Coll.r of Masulip.m 26th Nov.r inst.o 3d Dec.r
From Coll.r of Guntoor 18th inst.o 29th Oct.r

the Native Heads of Police in the Northern Division by the Judge on circuit, and referred for the consideration of the Board of Revenue, an opportunity was taken of forwarding to Government the reports from Collectors received up to that time. In adverting to the authority and controul of the Magistrates in the Circars it was observed that these were, and ever had been very imperfect, especially in the more Northern Districts where a great part of the Country was little known to the European Officers of Government, and was in the possession of Zemindars, jealous of interference, and able effectually to resist any attempt at establishing an efficient Police within their Villages.

5. The reports then submitted shewed that the potails of a very great majority of the Villages in these Districts received no emoluments of office either in grain or fees, and that if it were determined to grant them remuneration for their services in the Police it must be done at the expense of Government. This it

Fort St. George 19th February 1844

it appeared to the Board was no doubt true in many cases, but adverting to the little knowledge which we possess of the Country, to the very imperfect nature of the controul we exercise, and to the difficulty which under such circumstances must attend the attainment of correct information upon a subject where it is the interest both of the Zemindars and people to conceal the truth, it seemed a question requiring the serious consideration of Government whether it would be desirable to prosecute the enquiry; and whether even if the accuracy of the accounts could be relied upon, there were the means at command of affording that security to the free enjoyment of the grant, and the independent discharge of the duties from which alone any advantage could be derived to the public. So great did the difficulty of effecting this desirable end appear, that it seemed to the Board advisable to abandon the project at once, so far as the Hill Zemindaries were concerned, if not

not in the Zemindary Lands generally, and thus avoid giving rise to expectations which were never likely to be realized.-

6. The Court of Sudder Adawlut to in submitting an opinion on the competency of Government to institute enquiries through their local Officers as to the due maintenance of the Village institutions in Zemindaries, and to enforce the discharge by the Village Police of the duties prescribed in the Regulations of 1816, or in any other provisions of the Code, expressed their apprehensions that all endeavours to make the Village functionaries in the Northern Circars available would prove abortive.-

From Govt 31st May 1831.

7. In this opinion of the Sudder Adawlut the Government did not see reason to concur, provided that the Village functionaries were secured in the enjoyement of the emoluments originally allotted to them as a remuneration for their services. The want of such recompence in the Northern Circars having been stated

From Govt 15th inst. 18th July 1831.

stated to be the chief cause of the unwillingness of these Officers to discharge the duties devolving upon them under the Regulations, they added that it was of the first importance that measures should be taken for rendering the Village maniems, merahs, and other ancient emoluments available in support of the Village Police. The Board were desired to submit their opinion as to the best means of effecting the desired object.-

18th July 1831.

8. A Circular was in consequence immediately despatched to the several Collectors in the Northern Circars in order accurately to ascertain what emoluments in land, grain, fees, or otherwise, were possessed by Village functionaries at the time of the permanent settlement, as the object in view was to restore such as might be found to have been since taken from them by the Zemindars and others, and to devise measures for protecting them in the free enjoyment of their rights

For

for the future - The Collectors were informed that the enquiry was to be general and to extend to all Zemindaries without exception the basis of it being the accounts of the period at which the permanent assessment had been fixed on the valuation of the Committee of Circuit..

9 In their Proceedings &c under date the 8th Instant the Board adverted to the causes which had &c interrupted their enquiries into the state of the Village Police in the Northern Circars - In now continuing them the attention of the Collectors will be forcibly recalled to the Board's circular under date the 18th July 1831. and they will be desired to submit with the least practicable delay &c such information as bears most &c fully on the important question of reviewing in their efficiency the &c Village establishments of their several Districts - The Board are not insensible of the impediments which will be thrown in their way by the parties best able to afford their assistance,

but

but they trust that the importance attached by Government and the Honorable the Court of Directors to the prosecution of this &c enquiry as well as the benefit which a well regulated Village Police would &c confer will stimulate the exertions of each Collector to an early and thorough investigation of this subject.-

10- The opportunity afforded by the management of the Vizianagarum Zemindary being under the Officers of Government holds out the prospect of the &c enquiry of the Collector of Vizagapatam being conducted with more hope of &c general success than might be &c looked for under other circumstances.

From acting Agent to the Governor at Vizagapatam 30th Novr. 1843- in cont. 8th Jany. 1844.

From a recent notice by the late acting agent to the Governor at Vizagapatam of the Heads of Villages in that District it would appear that these functionaries instead of giving their aid towards the due regulation of the affairs of their Villages, are in most &c cases opposed to it, at least where the fiscal interests of Government are concerned, whilst they perform no magisterial duties..

11 The attention of the Collector has

From the Coll.r of Vizagapatam 8th inst.a 29th July 1841. Proceedings of the Board 11th Oct.r — & — from Govt. 7th Dec.r inst.a 3d Jan.y 1842.

has been zealously given to the efficiency of the General Police of his District the Board trust that it will now be directed with equal effect to the early reorganization of the Village Police To ensure this, each functionary, whether Naidoo, or Talier, or watcher, under whatever name distinguished, attached to each Village must be adequately remunerated - The Collector will therefore throughout his enquiries be pleased to bear this in mind, and in submitting his report he is requested distinctly to shew how far there are resources available for the purpose independent of any disburse=ments which it may eventually be necessary for Government to a= make in order adequately to pro=vide for the due discharge of the duties which under the Regula=tions devolve upon Village Police Officers.-

Order thereon, Ordered that a Copy of the foregoing Proceedings be trans=mitted to the Collector of Vizagapatam

Read the follow=ing letters.-

Board of Revenue
Fort St. George

(24)

From W. W. Arbuthnot Esqre
Collr of Vizagapatam —

Sir,

Para 1. I have the honor to acknowledge the receipt of your letter under date the 22d ultimo trans=mitting Extract from the Minutes of Consultation of Government together with copy of an Extract of a des=patch from the Honorable Court of Directors in which the opinion of the local Officers is required as to whether the institution under Regulation IV of 1816 of Heads of Villages as Village Moonsiffs has been productive of advantage to the people and afforded them satisfaction.-

2- In this, and I imag=ine in all the other Districts, in=to which the permanent settle=ment has been introduced the above Regulation has been entirely in= operative - In many Villages no Emams have been allotted to Village Moonsiffs

Moonsiffs, and even where there are such Enams the services of the holders have almost invariably been dispens= =ed with, and their authority super= =seded - In the Hill Zemindaries almost all petty Civil disputes are adjusted by the Zemindars or their Dewans - In the plains the population resort to the Courts of the District Moonsiffs when they are unable to adjust their dif= =ferences amongst themselves --

3. I see no prospect of any change in this System so long as the Country remains in the hands of the Proprietors nor perhaps is it required but in Ryotwarree Districts where it is desirable as much as possible to raise the character of the Village Moonsiffs who are regularly appointed by the Collector, and whose conduct is constantly under his observation

observation, I consider the institution of Village Moonsiffs is highly beneficial to the people and its benefits would be greatly extended if (of course only in Ryotwarree Districts) the District Moonsiffs were prohibited from receiving Suits for sums under 10 Rupees. I have always observed that those Villages are in the most satisfactory condition where the Village Moonsiff exercises the authority vested in him by the Regulations --

(25)

Sir,

From W. Ashton Esqre
Princ.l Coll.r of Cuddapah

Paras. 1 With reference to your letter of the 22nd Ultimo, forwarding Extract from Minutes of Consultation and Calling for a report on the mode in which the Provisions of Regulation IV of 1816 have operated in the District, I have the honor to state that the Village Moonsiffs are for the most part extremely ignorant unable to read

read, and have seldom the degree of influence over the inhabitants of their Villages which would induce them to rely on their decisions.-

2.- In only one talook of this District is the System reported to work well and to afford satisfaction to the Villages. In the rest the people have recourse to the heads of Villages as arbitrators in which capacity their decisions are not binding on the parties but they appear to distrust the judgements of the Moonsiffs under the Regulation, which must be enforced and admit of no appeal.-

3.- I am unable to give information of the number of Suits disposed of by the Moonsiffs, as no returns are made to the Revenue Officers, but it will be supplied by the report from the judicial authorities.-

Ordered

2779. Fort St. George 19th February 1844

Order thereon,

(28-29)

Ordered to be sent again in Circulation.

Read again letter from the Principal Collector of Cuddapah dated 30th Ultimo and entered in Consultation 8th Instant.

Ordered that the abovemen=tioned letter be submitted with the following address.

(30)

To the Chief Secretary to Government

To the Chief Secretary to Government

Sir,

In Cons. 4th Jany. 1844

With reference to the orders of Government dated 19th December 1843 regarding the claim of Kabil Khan to certain Enam Lands, I am directed by the Board of Revenue to submit for the orders of the Most Noble the Governor in Council the accompanying letter from the Principal Collector of Cuddapah from which it appears that Kabil Khan has expressed his wish to be put in possession of the Enams in preference to a pension equivalent to the average pro=duce there of. but states his willingness to abide by the decision of Government. The Board therefore beg leave to propose that the Principal Collector be now instructed to cause the lands to be delivered to Kabil Khan.

30th Jany. in Cons. 8th Feby. 1844.

2 The Board would suggest that as the question is now before Government it may be well to decide whether the Grant shall

Fort St. George 19th February 1844.

shall be merely for life or in perpetuity.

Revenue Board Office
Fort St. George
19th February 1844.

Signed C. C. Lovell
Sec. Secretary

Read again letter from Mr. I. W. Cochrane late Sub Collector of Cuddapah dated 13th Ultimo and entered in Consultation 8th Instant.-

Proceedings thereon-

(31)

In the Boards Proceedings dated 14th January and 18th February 1841 the charge for Extra tent allowance made by Mr. Cochrane for 133 days in Fusly 1249 was disallowed on the ground that he resided the whole of that period at the Wuzzoor station but it now appears from the explanation furnished by that Gentleman in the foregoing letter that he was detained at Cuddapah from the 1st August to the 2nd September 1839 at the request of the Principal Collector to take charge of the District- Under this explanation the Board sanction the charge for the period in question Viz. 33 days, but with regard to the remaining 100 days during which Mr. Cochrane was in charge of the District the Board cannot for the reasons stated in their Proceedings above referred to relieve him from retrenchment.-

(31-32)

Order thereon-

Ordered that a copy of the foregoing Proceedings be transmitted to the Civil Auditor.-

Read

Fort St. George 19th February 1844.

Read the following letter.-

To C. C. Lovell Esqre
Acting Secretary to the
Board of Revenue
Fort St. George.

(33)

From W. Ashton Esqre
Collr of Cuddapah

Requesting that the night guard furnished by the Regiment at Cuddapah may not be discontinued

Sir,

Para 1. With reference to your letter of the 25th Ultimo informing me that it was not considered expedient to withdraw the Military guard from the Treasury at Cuddapah, but that the Board saw no objection to the discontinuance of the night guard at the Cutwalls Choultry I have to submit for their consideration the following observations.-

2. The Town of Cuddapah is large and straggling so that it is not easily guarded without a numerous body of Police Rons, which this Establishment cannot afford, and the principal danger from the character of its inhabitants, and the most prevailing crimes in the district generally is that of Gang robbery.-

3. The Police scattered in Tanks can afford little defence against such attacks and are not free from the suspicion of connivance with the Robbers, but the Military guard small as it is being placed in a central

position

position has the very best effect in pre-
-venting the attempts of large bands-
The value of property has, I am informed,
very considerably increased, since the
guard has been maintained, and the
Merchants have now addressed a
Petition to me requesting that it may
not be withdrawn.-

4. The number of guards
afforded by the Regiment at Cuddapah
is I am informed very small, and I
trust therefore that I shall be excused
for strongly urging that this night
guard may not be discontinued.-

Cuddapah District
Pl. Coll. Office
Vaimpelly 13th Feby 1844

/Signd/ Wm Ashton
Pl. Collector

Ordered that a list be
prepared from the replies of the several
Collectors regarding the withdrawal of the
Military Guards and submitted with the
following address.-

To The Chief Secretary to
Government

Sir

33-34

To the Chief Sec. to Government
Reporting the numerical strength of the several Military guards employed for revenue purposes in the Districts whose services

Rec'd 19th Feb. 1844

Para 1. With reference to the
Extract from the Minutes of Consultation
of Government under date 28th December
last I am directed by the Board of Revenue
to forward for submission to the Most
Noble

services can be dispensed with without risk to the treasuries or the tranquility of the Country & soliciting sanction for the cost of the Armed peons proposed to be entertained in their stead.-

Noble the Governor in Council the annexed
list of Military Guards employed for reve-
-nue purposes in the several Districts of
this Presidency which in the opinion
of the Board can be dispensed with without
risk to the treasuries or the tranquility
of the Districts shewing the numerical strength
of the several Guards and the number
and cost of the armed peons which
will be required in their stead.-

2. The Guards employed in the
Districts of Chingleput, South Arcot,
Nellore and Guntoor are supplied
from the none effective Corps, to these
the above orders of Government are
considered not to apply of which the
Collectors of those Districts have been
already informed by the Board.-

3. The Board are of opinion
that the guards stationed over the
Hoozoor treasuries and Jails in all
the Districts cannot be dispensed with
but where invalids are at hand
there seems no objection to their
substitution for effective Troops
with the exception perhaps of the
Districts of Ganjam, Vizagapatam

Bellary

Bellary Malabar and Canara.-

4. The Principal Collector of Canara states that no dependence can be placed on the peons of that Dis=trict in any case of danger and consi=ders that it would be attended with risk to withdraw the Military Guards or detachments from the several trea=suries and out-posts of that District- The Board concur with the Principal Collector, they are also of the same opinion in regard to the Guards over the treasuries at Palghaut and Cochin in the Malabar District.-

5. The Collector of Vizagapatam states that the Hoozoor treasury is the only one, in that District over which there is a Military Guard- There are two field detachments to guard the most important passes leading from the plains into the Hills and he attributes it to the Esta=blishment of these posts, that the Villages near the Hills have of late years so entirely escaped attacks from the Hill people and he has stated other objections in which the Board concur to the temporary employ=ment of Armed peons- It appears therefore

therefore that there are no Military Guards which can be dispensed with in that District.-

6. The Board concur in opinion with the Commissioner of Kurnool that as the management of that Country has been so recently assumed and it is situated in the frontier of the Nizam's dominions it would be in=expedient to withdraw either of the two small Military Guards employed there, one of which is posted over the Treasury the other over the General Choultry.-

7. There is a small Military Guard over the Talook Treasury at Nowgaum in the Ganjam District and several Guards in the District of Bellary which it is thought may be dispensed with- The strength of these has not been yet reported, a further reference has therefore been made to the Collectors and the result will be duly reported for the information of Government when their replies are received.-

8. With the exception of these the number of troops which it is

is proposed to relieve is 170 besides one Company of Sepoys at Dindigul in the Madura District which the Principal Collector thinks may be dispensed with, but appears to doubt whether there may not be some objection to their removal in a Military point of view. The Principal Collector purposes also that two Companies stationed at Madura should be withdrawn and their place supplied from the invalids - but he urgently presses the continuance of the strong Detachment of effective Sepoys at Ramnad.-

9.- The number of Armed Peons recommended to be employed instead of the Guards is 118 at a total cost of Rupees 576 per Mensem for which therefore the sanction of Government is requested.-

10.- The Principal Collector of Coimbatore having reported that the armed Peons would be employed in place of the Military Guards to be withdrawn in that District from the 20th ultimo the Board request that

that the sanction of Government for the Establishment noted in the margin, for Coimbatore may have effect from that date but it will be observed that the Principal Collector strongly recommends the restoration of the Military Guards at those stations from which they have been withdrawn when the Public service will admit of it.-

3 Duffadars at 5 Rs. each per Month	15-0-0
25 Peons at 3-8 each	
per Do.	87-8-0

The Collector anticipates= no difficulty in the punctual realiza= =tion of the revenue under his manage= =ment and the Board concur in his recommendation that the Enam may be now resumed and a pension of the above amount Rupees 814-6-4- per annum granted in lieu of it, with which it is stated the petitioner will be satisfied.-

4.- Referring to the con= =cluding Para of the Collector's letter it is observed that the Enam was= granted to the Subadar, his wife the present petitioner, and eldest= daughter since dead, and the petitioner being

To the Chief Secy to Government } Submitting with reference to the Extract from the Minutes of Consultation under date 2d December last a letter from the Collr of Chingleput and concurring in his recom= =mendations that the Enam held by Vee= =rummal Widow of Subadar Mootial Naick may be now resumed and a pen= =sion of Rs 814-6-4 per annum granted in lieu of it.-

In Cons. 1st Feby 1844.

1st Feby 1844.

Fort St. George 19th February 1844.

being now the only survivor of the three orginally specified, and as there are two other daughters of the Subadar still living, the Collector suggests that it may be the wish of Govern=ment to continue the Enam after the decease of the petitioner to the elder of them; but the Board are of opinion that the determination of this point will be best deferred during the life time of the present incumbent.

Revenue Board Office, Fort St. George, 19th February 1844. } /Signed/ C. C. Lovell, Actg Secretary

Read again letter from the Collector of Chinglepet dated 24th ultimo and entered in Consulta=tion 8th Instant.

Ordered that the above=mentioned letter and the previous communication on the subject be submitted with the following address.

36

To the Chief Secy to Govt — } Sir,

To The Chief Secretary to Government

I am directed by the Board of Revenue to request that you

Fort St. George 19th February 1844.

From Coll.r 28th Dec.r 1843 in Cons.n 11th Jan.y 1844
From Do. 24th Jan.y 44 in Cons.n 8th Inst.

You will submit for the orders of the Most Noble the Governor in Council the accompanying letters from the Collector of Chinglepet requesting that the higher rate of Salary Rupees 525 may be granted under the existing rules to his Head Sheristadar Neelacanta=Row from the 1st July 1842 on which date he completed a further period of 5 years service in his present grade.

From the Actg Coll.r of Chinglepet 26th May 1838 in Cons.n 7th June

Neelacantarow has served the Government in various capacities with great credit for about 40 years and the Board recommend that Mr. Freeses application on his behalf may be com=plied with.

It will be seen from the Collectors letter of the 24th January last herewith submitted that the omission of Neela Canta Row to bring his enhanced claims earlier to the notice of the Collector was the cause of the delay in submitting the present application.

Revenue Board Office, Fort St. George, 19th February 1844. } /Signed/ C. C. Lovell, Actg Secretary

Sir,

(48)

From the Collector of Tinnevelly — Para 1

Reporting the examination and measurement of the 4 experimental Villages ordered by the Board preparatory to the General Survey of the whole district, explaining generally the grounds and principles which have guided the investigation the many anomalies and irregularities met with heavy balances in Tinnevelly and the desideratum of a moderate assessment and forwarding the accounts and Statements connected with the subject.-

I have the honor to forward the accounts connected with the survey of the first of the 4 Experimental Villages in Tinnevelly, undertaken according to the orders of the Board, I had hoped to have forwarded them at an earlier period - Their preparation and translation has occupied many more hands and much more time than I had anticipated - I was also anxious to omit no account or information that I thought the Board might require or be likely to call for - With a view to greater caution and accuracy in these first examinations and measurements on which future proceedings will greatly depend, a revision of many of the Statements and accounts has also been made, but I trust the delay will be more than compensated by the accuracy attained and the care bestowed.

2. The translations alone have occupied my Establishment for a considerable time and being desirous of saving expence to Government as far as possible, and not expending the

the amount sanctioned for Survey sooner than could be hoped. I have completed the present accounts and examinations by means of my fixed Establishment alone without incurring any extra cost or entertaining a Survey Establishment. A draft having been made of the best Talook Servants, Curnams Goomastahs Peishcars &c. under an intelligent Tahsildar and detached for this special duty.

3 I may add that this has been going on simultaneously with the heavy current work of the District, the Jummabundy Accounts being also under preparation and constant surveillance and vigilance necessary to keep up the Collections and avoid balances in a year of unexampled low prices and that I have been without any additional European Assistance having had only the Sub Collector and Acting Head Assistant of the other two Gentlemen appointed - one having just joined the District and the other the Special Assistant being only now on his way. An inspection of the Demand Collection and Balance Accounts* will I trust be satisfactory to the Board, and best assure them that neither myself nor my Establishment have been unoccupied.

4 I have endeavoured to enter into and lay before the Board every

every statement and enquiry calculated to lead to a just Estimate of the present state and resources of the Province and to a settlement which may be permanent and tend to its future stability and prosperity without losing sight of the due interests of Government on the one hand or the welfare and means of the Ryot on the other and if this can be effected without any great sacrifice of present Revenue, it is I conclude as much as the Government and the Board desire or expect.

5 I need not observe to the Board that the difficulty is considerably increased by commencing the survey in a year like the present, of such low prices of grain as have not been known in Tinnevelly for 40 years and to persuade the Ryot to accede to a Settlement fixed at a rate considerably higher than the selling price all over the District, it avails little to explain to him that "better prices and times may come" in which he must make up for present losses he considers present prices and circumstances, and has not the

* of the past fasly

the forethaught or inclination to look beyond them and to make the Settlements without the peoples concurrence, and their signature of assent would be unsatisfactory and indecisive.

6. A good many Statements are now submitted for the Board's information and consideration Many others in detail have also been gone into here.- Any further Accounts or information required will be immediately furnished to the Board.- To give some slight idea of the irregularity and variety prevailing under the present rates in Tinnevelly it is only necessary to mention that there are 456. different rates for Poonjah in the District 377 for Nunjah and as endless ones for tope trees for example a tamarind tree in bearing of Similar size and productiveness being taxed at no less than 25 different rates in various Villages the real value of the tree being much about the same in each, these variations in most instances being founded on "custom" only.- This multiplicity of rates opens a door to fraud confuses the accounts and puzzles the illiterate Ryot.- I propose to simplify these rates and lessen their

+ of Nunjah & Poonjah

their number as far as practicable.- The two minute subdivision and detail in classification often attempted is I think an evil rather than a good: it is an error into which Native Surveyors commonly fall and is much more fitly left for arrangement among the Ryots themselves whose better local knowledge and long experience of the lands are a safer guide than the Estimate of the passing Surveyor provided the Ryot can be got to give a fair and unbiassed opinion uninfluenced by self interest.

7. Though the actual measurement and examination of the 4 Villages did not commence till April last the subject of the Survey has engaged my best attention since I first joined the District and the Sheristadars and other head Servants of my Establishment have been employed in gradually collecting information bearing on the subject besides what I found already in progress under my predecessor Sir H. Montgomery.-

8. In determining a fair and just average "Reruck," or standard of price for the whole District as a base from

from which to proceed I am persuaded from the fullest consideration that Rupees 2¼ per Grain Cottah is the highest standard that can be safely fixed accomodating the rate in the different Talooks as required by the peculiarities of their situation markets, productiveness facility of irrigation &c. the rate in each of course will differ somewhat, as in the various Provinces of the same Presidency the Nelliambalum Talook, for instance has the Towns of Tinnevelly Palamcottah and others with a large Military and general population to ensure a good Market and price for its grain while Tenkassey Shenkernaracoil and Streevelly pootoor bordering on the Hills, with large Zemindaries and much paddy for sale at an extremity of the District without traffic or high roads thro them find great difficulty in disposing of their grain at all at any remunerating price. these Talooks cannot of course be put on the same footing with Nelliambalum.

see para 21 of this Report

Cuttak

9. I will state briefly a few of the grounds on which I have fixed the proposed

proposed standard and to which I beg the Board's consideration - Tinnevelly is an esctreme not a central District, has no water carriage few passable roads or large Towns or Markets the neighbouring Districts of Madura and Travancore both more than supply themselves and send paddy for sale into Tinnevelly which has thus but little outlet for its grain - A reference to the Districts noted in the Margin - particularly Madura the nearest and most in contact will also shew their average standard prices to have been fixed in most instances lower than that I now propose for Tinnevelly with the exception of Chingleput, a District bordering on the great mart of the Presidency and whose Nerruck was (if I am rightly informed) fixed on Streeperma-pootoor a large Town with a good Market.

See Statement B	Rs	a	P
Tanjore	2	—	4
South Arcot	2	4	9
Trichinapaly	2	—	—
Madura	1	11	2
Salem	2	4	9
Chingleput	2	8	9
Darapauram	1	11	9

The Board will remark that

10- an average of 20 Years prices, (see Statement B.) gives a rate of 8¾ Annas above that I now propose, but it is to be remembered that these Nerrucks are fixed chiefly on shop prices and on the large Villages, and Towns, and not on

on the prices at which the Ryot disposes of his grain in the first instance to the shop-keeper. That the "Aloongoo" rate is not a fair or just criterion and was not carefully fixed has already been brought to the notice of the Board / see Mr. Bishop's Report + 19th September 1835 July 1244 comparing Calacaud and Sherenmadavy. /

11. I would also beg particularly to refer the Board to Statement H. forwarded shewing the present actual low selling price of paddy throughout the District the highest rate of which falls below the Aloongoo or old fixed standard. It will of course be impracticable and unfair to expect the Ryot to accede to a Settlement of Rupees 2-12-0 in Villages where he has for some time past been getting only Rupees 1-2-0 and 1-4-0 per Cottah for his grain. I would also refer the Board to statements of former Collectors of Tinnevelly noticing the lower standard of Assessment in Madura and the absolute necessity of reducing the Neruck of Tinnevelly / See letter from the Collector 27-28-29- paras 16th January 1832- / It is also an important fact, and a consideration not to be overlooked in

in fixing permanent Settlements, that known seasons of great drought and distress periodically recur once in 7 or 9 years. when a Ryot from a failure of the usual and indispensible rains scarcely recovers the seed sown, loses perhaps half his cattle and unless he has a well to depend on, has probably the whole of his Poonjah and the greater part of his Nunjah lands utterly waste- for such seasons it is vain to expect the present Ryot of India to prepare or lay by whatever surplus he may in a year of high prices realize, he usually expends in extra and useless expences of marriages festivals, ornaments or the like- The only fair average on which to base a fixed Demand, is on the Collections, not on the Jummabundy Settlements of a District. Neither can the Collections of a District without balances be always taken as a safe test of a moderate Assessment- Such collections may depend much on the temporary or individual vigilance of a Collector, and his Tahsildars, and while they shew a satisfactory Balance Sheet may be in reality

really unadvisable as pressing unduly and urgently on the Ryots means, by obliging him to sell at a loss and disadvantage to meet punctually to a day the Government dues while the postponement of the demand for a few Months or even weeks often enables him to find a better Market and price, and to discharge his kists without loss to himself or eventually to Government.-

12 I have endeavoured as far as possible in obedience to the orders of the Board in their letter of 2d January 1813,- to be guided by "the principles of Sir T Munro," as exhibited in the 5th Report and other papers accessible to me and the repeated necessity which even that eminent Officer found in his own and other Surveys of reducing the Settlement first fixed on has led me to caution in not fixing it too high in Tinnevelly, the result of which would be a large, but fictitious Demand on paper accompanied with yearly heavy balances and constant remissions - Under the elastic pressure of a moderate assessment, cultivation will undoubtedly increase as the Ryots means

Tuddapah
Bellary
Cumbatore
Trichinopaly &c.

means improve, fewer Balances and remissions will follow much fraud will be avoided the Demand be collected within the Fusly, and a few years will shew the District in a rising condition I beg particularly to refer the Board to statement marked C exhibiting Balances to the amount of 10,79,010 Rupees which have been obliged to be struck off in the last 42, years and showing a yearly average loss to Government with the Demand still hanging over the Ryots head of Rupees 25,690. Looking at the average Collections of the last 42 years, the rate I propose will produce a total, exceeding the average Collections by more than

Fort St. George 19th. February 184

than 70,000 Rupees I should not th
therefore have thought it nec
to state in detail so many of the
grounds for fixing the present
proposed standard, but that I
was anxious to assure the Board
I had endeavoured to consider every
circumstance and condition of
the District which they would
wish me to do, if I have omitted
any it has been unintentional and
I shall gladly give my best attention
to any thing the Board may point
out

13-

With regard to the
standard of measurement I have
made every enquiry amongst the
principal

Fort St. George 19th. February 184

principal Ryots, as well as trying the two measures
personally at Gengycondan; and find the "Cawny"
the most suitable standard to fit for both Nunjah
and Poonjah, as a substitute for the present Seed
Cattah and Chain. The "Acre" is quite new to the
people, they do not understand it, and have a
strong objection to it,- it would be many years be-
fore the great body of the poorer classes would com-
prehend its relative proportions to the present
measures they are accustomed to; they also ad-
vance two sound reasons for preferring the
Cawny- the present Seed Cattah and Chains will
convert more easily and with much fewer
fractions of account, into Cawnies, than into
Acres; and the Cawny is already understood,
though not used, in Tinnevelly, from its
being the standard in Madura, of which Dis-
trict several Saloots adjoin this, and many
villages are intermixed. To any change at
all, the Ryots are naturally averse; the few
who read and write being alone able to com-
prehend the new accounts, or check any
fraud against themselves by Curnams or
Saloot Servants: they would much prefer
adhering to their old measurement, but as

the

* One of the 4 Villages.

the Board have ordered and it is certainly desirable to introduce one measure for all lands, I have found the Cawny the most practicable and desirable one; and as I believe it also obtains in Madura, South and North Arcot, on Trichinopoly Chinglepet &c. I trust it will meet with the Board's concurrence: the Acre has been measured out and explained to the people, but they universally decline it and prefer the Cawny: a rod of 24 feet has been used.—

	Acres.	Goontahs.	Sq. feet.
1 Sq. Chain of Nunjah land is equal to	1	24 53/64	4 11/64
1 Chain of Poonjah land is equal to	3	25 29/64	5 33/64

but

1 Sq. Chain of Nunjah land is equal to	1¼ Cawnies
1 Chain of Poonjah — is equal to	2¾ } very nearly

14. In referring to the Statement marked C, shewing on an examination of 42 years a total loss to Government from irrecoverable balances (and necessary remissions) of Rs. 10,79,010 and a yearly average loss of Rupees 25,690, it will occur to the Board that a fair and moderate assessment will in all probability obviate this loss and these uncollected balances, depressing to the people as long as they hang over their heads; and if finally and stringently collected, alike

alike detrimental to Government and the Ryot; as trenching too much on his future means and productive resources. they are also a great source of fraud and oppression as long as outstanding. I greatly fear that every new Tahsildar is tempted to shew his activity by too rigorously collecting these old balances; or taking a douceur to let them alone, and report them "irrecoverable." a reduction therefore in the assessment to this extent is only the removal of a baneful and positive pressure from off the people, without any real or actual loss to Government: for a total existing only in account, to be collected with difficulty or eventually remitted, is of no real value.—

15. I have also the honor to submit herewith 3 Hindoovee Hookoomnamahs with Translations Viz. 1 Pymash Hookoomnamah, 1 Azmaish Do. and 1 Tarum Do. for the Board's perusal, and correction if necessary. The Hookoomnamahs of such other Districts, as could be obtained, chiefly thro means of my Head Sheristadar, and those brought down from the Board's Office by Ram Row when he was acting there

Sub Coll's Sheristadars.

Fort St. George 19th February 1844

there for the purpose of gaining information on such points, have been carefully gone thro'; and those now submitted are the result or abstract of others. It is believed they will answer the object in view as a set of General or Rules, open of course to correction or modification where peculiar circumstances and tenures arise.— No set of Rules could I fear be framed to meet all the anomalies of Sinnoadly: they have been adapted to the District as far as practicable. The Villages selected for survey were such as had various tenures in them: of Palaboga, Yegabogam, and Peroomput or tenure, containing Pungoonaly and Puttawirty, Nunjah and Poonjah under Agapat and or Poonoolums, with Baugayet lands. These Villages are as follows.—

The Village of Padinalampary is "Yagapogum" containing also Buttaverty Nunjah and Poonjah lands. The Nunjah lands are irrigated by the "Chittranadee" River, The total Berij of this Village for Fusly 1252 A.D. 1842/43 amounts to as Chuckrums 54.—

* For term see Glopary appended.

The Village of Perkelundacoolum contains, Nunjah, Poonjah, and Garden lands, is irrigated from a Poonacoolum Tank, and is

Fort St. George 19th February 1844

is called a Pungoovaly Village, the Berij for Fusly 1252 A.D. 1842/43 is Chuckrums 264.—

The Village of Chittaur Chuttrum has Nunjah lands irrigated from the Chittranadee River; and is a Peroombut Village. It contains also Poonjah and Garden lands.— The revenue derived in Fusly 1252 A.D. 1842/43 is Chuckrums 649.—

The Village of Singasamoodrum is large, has its supply of water from the Chittranadee River contains Nunjah and Poonjah lands under the Head of Pungoovaly and or Buttavirty. The Berij of Fusly 1252 A.D. 1842/43 is Chuckrums 1558.—

16. It has not not been usual in Sinnoadly to name the several fields but as it is desirable to name as well as number all fields as far as practicable, it will be done in all future operations. In some fields the present measurements alone, without the old are entered; this is where either the old Oloogoo accounts are not forthcoming, or are so defaced as to be illegible. The measuring and classing of the fields was conducted by the Head Sarundar and his Assistants in the presence of the Meerasidars and

2817

Fort St. George 19th February 1852

and Ryots of Padinalampairy: the accounts of Mailvarum, when the Village was formerly under Amany, were inspected and considered, and the Estimate made with reference to the accounts of produce then, and the productive powers of the land at present. The Ryots expressed themselves satisfied with every thing but the Neruck, which they demanded should be fixed with reference to current selling prices. The following State= =ment will shew the Goshwara or Beriz of the Village of Padina= =lampairy. accurate measure= =ments will probably bring an increase in many Villages, or which with the cultivation of the waste, will combine to make up any sacrifice now conceded by Government for the benefit of the Ryot.

R.

Fort St. George 19th February 1844

17. It can be shewn that the Oloongoo rates fixed from Fusly 1222 to 1230 were assumed on insufficient data, and fell unequally and unfairly on many parts of the District. A striking instance is shewn in the Collector's Tummahbundy report of Fusly 1244 dated 12th October 1835, and many others may be adduced. These rates are 146 in number varying from 16 8/64 to 10 Cully Fanams. A reference to the Statement A will shew that the rates fixed in some Villages in the Vullyoor, Nanganacherry, & Ottapedaram Talooks, where there are neither Markets nor large towns, are in some cases equal to and higher than in Nelliambalum which has both.—

15. The price paddy bears in the Market cannot fairly be taken as the Standard for the Ryot we must add wastage, the merchants profit, cost of conveyance &c. to the price got by the Ryot when selling it in his Village; these fair deductions the Ryots now comprehend, and strenuously demand, before any fixed Neruck is decided upon, from which there can be no future abatement in their

their favor: In some of the Villages where the Nerunk fell too high, the Puttahs were often declined: and tho the demand fixed at the Summabundy may have been, by the Tahsildar's diligence, nevertheless collected according to the Puttah, it by no means follows that such Collection was either just or politic: It trenched too deeply on the Ryots means, and shook his confidence in the fairness of all future demands. The following Statement will shew the Collections and Balances of former and late years.—

+ which remained in the Talook Cutcherry.—

	1252	2 1 4	1 8 5½	1 12 11	2 1 11

St

Fort St. George 19th February 1844

It will be observed from the foregoing Table that the Nerueck of Fusly 1251 and 1252 falls below that of Fusly 1225. in which year the Ryots sus-tained great loss by selling their co lands and other property to meet the Circar dues. For instance 1/3rd of the Village of Lingasamoodrum and the whole of Padinaulaw-pairy were then sold to one Bamboo Row, and 3 hamlets attached to the Village of Serkelundacoolum to an-other individual.—

20. The Ryots are afraid that the price of Grain may remain at its present low ebb in Tinne-velly. They think the annual Summabundy Settlements are now made with some reference to current selling prices, and they are very averse to accede to an arrangement which

It is now nearly Stationary in Tinnevelly, and said to be falling in Madura.—

Fort St. George 19th February 1844

which fixes at once and for ever the rate of their dues to Government however the prices may fall— They also themselves quote the fact "that whereas the Circar Rent was formerly col-"lected by longer instalments, and with occasional "delays, the Berij of each year is now prefixed "for within the Fusly, obliging them frequently "to sell their newly cut crops hastily, at "an unfavorable rate in a bad Market, to "meet the Circar dues:" a truth which can-not be disputed.—

21. The Statement marked B shews the Cloongoo Nerueck, the average Nerueck of 21 years from Fusly 1232 to Fusly 1251 and the average selling and settled prices of Fusly 1252 together with what is be-lieved to be the Nerueck of other Districts, all with better Markets and greater advantages, but with a lower Nerueck than Tinnevelly.—

under the Aumany management some Items were saved to the Ryot which were not considered

Fort St. George 19th February 1844

considered in the Oloongoo Settlement such as expence of carrying and drying the paddy formerly borne by the Government now by the Ryot. The subjoined Statement exhibits the deductions particularized and requested by the Ryots themselves and which are items fairly deserving consideration.

	Per Grain Cottah Quantity	Value	
1 Wastage in grain by exposing it to the sun after being threshed	" 1 "	2 1	under aumany Management the Malabaram grain was not exposed to sun immediately it was thrashed but stored in heaps and remission granted for wastage from the Barinjeneries in the Summabundy account. This was charged under aumany on daily accounts of produce but no remission has been granted for it after the lands were brought under oloongoo
2 Charge for conveying the grain from the thrashing floor to the Granary in the Village	" " 4 "	1 35/32	
3 Hire for constantly exposing the grain to the air to prevent its being damaged	" " 4 "	1 25/64	This was charged in Do Do
4 Wages for persons employed to watch the cutting of Crops	" " 3 "	" 7 55/64	Charge incurred on this account was extensive when under aumance but now entered here in proportion to the expence incurred by Ryots on this account.
5 Loss by wastage in the grain incurred by grain sellers who sell the grain for a price including this loss	" " 4 "	1 25/32	This loss by wastage and by merchants profit is included in the 20 years average price
6 Grain Sellers profit also included in the price for which they sell the grain	" " " "	2 "	
7 When there was demand for aumany grains or purchasers who could buy at that high price fixed by the Circar it Regulation Pagoda 1799 a aumany merchant valuing it at that high price and after dispersing of the grain in this manner there still remained in store it was sold at a price less than that upon which the Summabundy was made	" " " "	2 "	The deficiency that occured by selling the grain for low price has been remitted
	" " 9	7 7/64	in 21 ½ per Cent upon the 20 years average price of Rs 2 12 9¼

The

These charges amount to 2 1/16 per Cent, from which deducting 1/16 the remaining 20 per Cent may be considered as fairly remittable, and is accordingly struck out from Rupees 2-12 9/4 being the average settled price of 20 years from Fasly 1232 to Fasly 1251 (Vide Statement marked B) this remission of 20 per Cent leaves the 20 years average settled price at Rupees 2-3 9 1/16 to which adding 2 3/16 price to bring it up to a round sum, the permanent Assessment is now fixed at Rupees 2-4-0, and I am fully persuaded it will be unsafe and impracticable to raise it higher than that now proposed-namely 2 1/4 Rupees as above stated per Candy of Grain.— I beg particularly to refer the Board to Statement C shewing the amount of irrecoverable Balances remitted for 42 years, at all times a bad item in every account, and one which a moderate assessment can alone remedy.—

22. In assessing the waste the Assessors Rule I believe generally laid down has been, "to fix it somewhat lower than the "cultivated land of the same description but "not so much as to tempt to the relinquishment

"of the latter". I am not quite decided on this point and would beg the Boards opinion for my guidance, it being an important question— I am myself inclined with due reference to inherent fertility and natural and relative advantages, to fix the same assessment on the waste as on the cultivated land of a Village— to fix it somewhat lower merely because it is waste must naturally tend to an unfair inequality of assessment in a course of 8 or 10 years, and to draw away cultivation unduly to the waste, as being more lightly assessed; it will probably lead to a more rapid cultivation of the waste, but not I think to so sound or permanent occupation of it— I would therefore propose to assess it the same as all other similar lands in the Village— giving the necessary encouragement and remuneration by means of long Cowles; so that the wastes brought under cultivation shall eventually come up to a full and fair, not an under assessment; as I think any lower assessment of the waste, however slight, yet being permanent, must tend to the gradual relinquishment of present cultivation for the occupation

of

Cowles

of the "waste." In the case of all cowles whether on waste or improvements I think they should be sufficiently long to remunerate the Ryot fully for his labour and enterprize, and fix his capital and interests permanently on the spot: Cowles are too frequently taken for a short period, and thrown up the moment the assessment of the land comes to the full.

23. One of the first questions raised by the Ryots, when the actual measuring commenced, was whether the Ridges of the fields (or Balks as they are termed in some Counties in England) should be included or not. To measure and exclude all the inner and smaller subdivisions of fields would be too minute and troublesome a process I therefore provided in the Pymash of Pothummanah that all the small ridges of less than one foot in breadth should be included in the measurements, while those exceeding one foot should be deducted. The 4 Villages have been thus measured. In making in the measurement all the ridges under one foot in breadth will come to about 1 Cawny per Cent.

There

Garden. 24. There is no proper garden assessment in this District but only the one called Tompyre on the produce not on the soil, a practice equally at variance with sound policy and the repeated orders of the Board. On this point some few further enquiries are necessary, and I propose to refer it to the Board shortly in a separate letter. Pottacaud or garden land only occurs in 2 of the 4 Villages measured, in these it has been entered at a discretionary rate for the present, pending reference to the Board on this subject.

25. A reference to statements D and E will show the different rates of Samahikurch and Mailwaram obtaining in Tinnevelly, they are of old standing, from the time of the Mussulman rule, and it will not be practicable to assimilate or alter them.

Ponjah 26. The Ponjah lands in this District, besides being subject to the ayen tax fixed with reference to the soil, according to the old classification are also subject to the additional taxes of Deshacawil, Varyuttum and Thiropony, which were formerly collected by the Polligars and by Village Meerasidars at various fractional rates in each village, but since the

assumption

assumption of the District they have been entered as a tax to the state, under the old denominations, and collected as here under shewn.—

Singasamoodrum Village.—

Class		Ayen tax	Vattum and vary at 1 3/4 C pCt per 100 C: pCt of the Ayen tax	Tripany	Deda-cavil	Total	Proposed tax excluding fractions
	1	2	3	4	5	6	7
		Cully pCt	C pCt	C pCt	C pCt	C pCt	C pCt
Per Chain of Bonjah lands—	1 Caresul	29 45/64	2 19/64	1/4	1 1/2	33 3/4	"
	2 Veppel	27 27/32	2 5/32	1/4	1 1/2	31 3/4	"
	3 Pottel	12 63/64	1 1/64	1/4	1 1/2	15 3/4	"
	4 Shevel	3 45/64	19/64	1/4	1 1/2	5 3/4	"
Per Cawney of Do—	1 Caresul	10 57/64	53/64	3/32	35/64	12 7/64	12 1/2
	2 Veppel	10 1/8	25/32	3/32	35/64	11 39/64	11 1/2
	3 Pottel	4 23/32	9/8	3/32	35/64	5 47/64	5 1/2
	4 Shevel	1 23/64	9/32	3/32	35/64	2 3/32	2

If the ayen and additional tax per cawney be retained separately as at present, it will be difficult for the Ryots to understand what is due by them, and will confuse the accounts greatly. The conversion of the several rates per chain into those per cawney will produce a great many fractions, as shewn in the foregoing Statement; I there-fore propose to include these 3 additional taxes with the ayen and fix the demand per cawney, omitting small fractions, at the rate given in Column 7 of the foregoing Statement— The accompanying Statement marked H shewing together with the proposed rates the various present Bonjah rates including the additional tax of Decacovil, Vary vuttum, Tripany, has been prepared according to the pro-posed plan.—

The following is the abstract of the Statement—

Fort St. George 19th February 1844

In

Fort St. George 19th February 1844

In some Villages where the Poonjah land bears no fixed assessment upon soil, it is assessed upon the sort of grain produced, at so much per Chain. These lands will be surveyed and assessed in relation to their soils alone with=out reference to the kind of dry grain produced.—

27 There are a few Villages in this District which pay an extra assessment on a 2d Poonjah crop, on the ground of their being near the Hills where showers are more frequent: this is chiefly in Tencausey and Chockumpetty. the 1st Crop bears full Poonjah Teerwah, the 2d a lowers rate varying from 1/4 to 6 fanams per chain in 14 rates. There are also a few Villages in the Talooks of Nellyamba=lum, Streevygoondum, Bommadasum, Punja=mahl, under similar arrangement. as this is an anomalous and undesirable system, I pro=pose consolidating the Teerwah on the 2 crops and fixing it with reference to the fer=tility, and the rates of neighbouring lands.. The total amount of the 2d Crop Teerwah col=lected for Fasly 1252 is only Rupees 1640.12 -8 of which Rupees 429-2-2 is recommended to be

abolished

For. St. George 19th February 1844

abolished.

Talook Chinna Ravoy

Teneansey including the Villages of Chockimpatty	1560¼	121	10 6	In the 42 Villages of this Talook there are 14 rates of Teerwah from 1¼ to 6 Fanams on the 2d Crop Cultivation.

Sheevygoondum	228/16	395	9 5	made in few Villages
Punjahmahl	19/64	4	9 7	in these Talooks is
Brummada-samum	4 49/64	7	1 2	Charged with a Teerwah equal to that on the 1st Crop. This 2d Crop Teerwah amounting to Rupees 429-2-2 should be abolished
	429	2	2	
	1640	12	8	

The

For. St. George 19th February 1844

28. The Board will perceive some alteration in the Poonjah accounts on comparing the present with old Pymash Statements. The general tenor of the orders of the Board have not been with reference to the Poonjah assessment but the Nunjah in the progress of the Survey, and they have remarked in Para 29 of Proceedings 2d March 1840 - that "In the "case of the dry lands, the present assess- "ment tho' not based upon such exact "or satisfactory data, has yet received the "testimony of all the successive Collectors "to its general correctness, and its retention "has been recommended at every stage of "the discussion - It should however be "corrected wherever practicable by the "Collections of subsequent years, and - "by a comparison of the present and "former extent of Cultivation". The Board appear fully aware of the con- -fusion and irregularity existing throughout the dry lands, and in the above and other letters frequently enjoin

enjoin

enjoin their revision - The injunctions I would therefore propose to follow- as far as is practicable, measuring the Poonjah lands with all the rest; not disturbing the assessment wherever it can be avoided. The present Poonjah rates and classifications have attained nearly 35, since Mr. Hepburn's time, after several changes and revisions under Mr. Lushington, Parish and Cochrane - The remeasurement however has exhibited discrepancies which the Board will not fail to observe, and which it is necessary to explain - In going over the lands for accurate measurement under the present survey, the soils are not now found to exist as they stand in the old Pymash accounts; shevel (red) has been found substituted for Caresul (black), and Pottel (mixed) for shevel, either from fraud or carelessness, or both, in the old assessment -

29, As far as can be ascertained at this distance of time, these classifications

classifications were made either on the ipse dixit of the Meerasidars, or on vague conjecture, without any careful and actual inspection of the soils. The self interest of the cultivators would of course lead them to depreciate generally the class of soils of the whole Village, as far as practicable, or at all events to class their own lands, then cultivated, in as low a grade as possible - Hence in the 4 Villages now carefully examined many fields and soils are found to be wrongly entered, mostly in a lower class, and this will probably be found the case in many of our future examinations. I therefore bring the facts at once to the notice of the Board, as well as the way in which I have dealt with them: the soils I have of course directed to be entered in the present Pymash accounts as they are now found to exist, be they black, red or mixed; raising the rates slightly whenever the soils have risen in class; these rates have now been allowed for 40 years, and

† See Abstract joined Statement

tho

the rule are in many instances wrong-
-ly and perhaps under-classed, the
rates will not bear much raising; for
the Ryots tho' paying a shevell (or
lower rate) for what might strictly
be charged at Cawsul (higher) have
by no means grown rich on these
rates, but on the contrary the Village
of Chittaur Chuttrum, tho' held on
"Cultyoottah" has been unable to pay
itself, and fell under Zuft in Fasly
1225. The rates in all future Villages
therefore will be slightly altered, taking
care at the same time that the
alteration be within the old highest
and the lowest rate; and that the
average rate for the whole lands in the
Village

Village according to the new classification
do not exceed or fall short of the old one
upon the old classes. The sorts will be ena-
-bled as they really now are found to exist
for our accounts at any subsequent examina-
-tions would appear fictitious excess, and any
excess by measurement ("alavoo jasty") annex-
-ed to account as an increase. This appears
to be the way of dealing with the cases the
Poonjah Ryots consider their assessment
fixed, and neither would nor could pay a higher
rate, and the fact of the classes having been thus entered low originally
and yet the Ryot not grown rich upon the rate,
would shew that the Poonjah assessment
is quite as high as they can bear, and
will I think be found on comparison
with Coimbatore and Madura, —
Neighbouring Districts rather high. —

Fort St. George 19th February 1844

Mandy 2 Cor. 3.

The ratio of Malabarum to Cooly Manjah Cultivation depends in every village and on each description of land, and is therefore left to the option of the Ryot.

The number of Cooly Manjah Malabarum required for the Fasly is to the number of Malabarum Manjah required for the Fasly as 1 to 2½ nearly

Fort St. George 19th February 1844

I think the only fair and practicable method is to fix the assessment on the land according to its relative capability and resources, and if water sufficient and a favorable season allow of a 2nd Crop, it should pay half the 1st crop terwah whatever that is without any reference to what the 2nd Crop may be. this will indnce and encourage 2nd crops, and will be simple, uniform and equitable arrangement which I think obtains in most other Districts and will meet the sanction of the Board. After a 1st Crop there often remains just water enough for a light 2nd one of Raggy, Cholum, Kemp, Pulse, or other dry grain crop, which at half terwah the Ryot will raise with advantage to himself and to Government, but which he will not attempt at a heavier rate, the soil being partially exhausted by the 1st crop and an insufficient supply of water for a full Nunjah crop and even in cases where there remains water in the Tank sufficient for a 2nd crop, the too heavy assessment on the 2nd crop deters the Ryot from using the water the produce will not repay him and the water is allowed to run to waste. The fixing all 2nd crops at ½ Nunjah terwah will involve a present loss to Government, but I am confident will be made up by an enlarged 2nd Crop cultivation as well as by an increase of assessment on the 1st Crop where the land will bear it. No water will then be allowed to remain useless in the Tank as now and the Ryot and Government will both benefit.

34. The average Ayen Terwah is per Cawny of Poonjah land in Padinalam pauy amounts

Fort St. George 19th February 1844

amounts according to the present rates of assessment to 1 33/64 fanams as shewn in Col. 6 of the annexed Statement and the Desaeavil tax to 1 13/16 fanams per Cawny. The Vattum tax per Cawny amounts to 1/8 fanam at 7 3/16 fanams per 100 fanams of Ayen Teerwah. The tax under the head of Tripany is collected at 3/32 fanams per Cawny, thus the total of additional tax amounts to 2 1/32 fanams per Cawny of Poonjah land, which added to the Ayen Teerwah, the Total Teerwah per Cawny amounts to 3 35/64 fanams. as the entry of these different taxes renders the account confused and difficult to be understood by the Ryots it was consolidated into one, and the rate per Cawny fixed at 3½ fanams omitting 3/64 fanams from the Total rate per Cawny on account of its being a small fraction, as before proposed. The several taxes above mentioned are levied on Poonjah lands also in many other Villages in the District in addition to the Ayen tax. It is therefore my intention to consolidate them all into one tax, and levy under one head in the same manner as now done in Padinalam pauy.

According to the proposed Jummabundy of Fasly 1252.

Accordingly to the proposed Jummabundy of the Settlement of Fasly 1252.

35 Chatoorbagum was hitherto de-
=ducted from the Poonjah Ayen tax in favor of
the Mahajanums (Brahmins) at 1/5 (not at 1/4 as the term
would imply) Vide Statement No. 8 for Pade-
=nalampairy. It is proposed in Para 34 that
the 3 items of Desaeavil Varyuttum and Tri-
=pany now collected at various rates, in addi-
=tion to the Ayen tax, should be incorporated
with the Ayen in order to avoid fractions and
confusion in accounts, the Chattoorbagum will
therefore be infuture deducted at such rate
per Cent as the 1/5 of the Poonjah Ayen tax
bears upon the total Ayen and the additional
taxes of Desaeavil Varyuttum and Tripany
combined.

36 With regard to Topes and
trees there are but 2 in the Village of Pade-
=nalampairy subject to tax, the taxation on
trees differs on the same trees in nearly every
Village of the District, the subject has been fully
brought to the notice of the Board in my letter
of 6th February last and the Teermah on Topes
and Trees remains to be decided when the
Board's Instructions are receeived on this point
an early Settlement of which is much to be
desired.

The

x See Statment therein forwarded. See also Board's Circular 2nd January 1843.

Topes. 37. The Tadbund or Palmirah
topes are numerous in the Sandy soils of Tinne-
=velly. The total Revenue now derived is
Rupees 108000. The Palmirahs are divided
into 4 Classes according to their age and
size.

	Highest rate Cfs.	Lowest rate Cfs.	No. of rates
1st Class Puradanee or Toddy yielding Trees	5/8	2/16	12
2nd Do. Caipoopanee or Fruit bea-ring Do.	5/16	1/16	11
3rd Do. Culloopanie or Trees giving less quantity of Toddy than purvapanie	7/16	1/16	15
4th Do. Olay vettoo or Leaf giving Trees	1/8	1/64	20

Several irregularities and inequalities of rates
exist which will be arranged and made
uniform all over the District as soon as the
Board's answer regarding Topes and Trees is
received. I have before said, generally, that
I consider the rate on all trees too high,
and a bar to planting in Tinnevelly, and as
I believe it is an admitted and known fact

that

that a Country denuded of trees enjoys less rain, it is a subject worthy of some consideration, inasmuch as the Government would derive benefit from the trees, and the District from the rain.

38. In this District a tax under the Head of "Tripany" is collected at so much per Grain and per Seed Cottah, and upon Heaps of Straw in Punjah, which has been hitherto kept in Deposit and applied to the repairs of Pagodas. This tax is in the Village of Padinalampairy collected only upon the Heaps of Straw, and it amounts for Fusly 1252 to 2 per Cent upon the Punjah Beriz entered in Columns 4 of Statement No. 8. after the permanent settlement is introduced the No. of Heaps upon which the Tripany tax is now collected will not be then ascertained; the Tax has been therefore deducted from the proposed Turnm Settlement at the above rate per Cent. In future I propose to include this tax with the Ayen, and Substitute in lieu of the deduction at so much per Cent a fixed "Toodee" or money payment for Tripany with reference to

to the average amount collected on that account for a certain number of Years. The tax collected on account of Tripany Amounts throughout the District on Punjah lands to about 11,000 Rupees and on Poonjah lands to about Rupees 5000 a Year.

Turnums & Tank Pharahs. 39 The dues formerly collected on these accounts under the Nabobs' Government are now incorporated with the Ayen. It will be seen even from the small Village of Padinalampairy how various are the rates for Punjah, Poonjah, Trees, &c. the same irregularity and want of uniformity has obtained, and remained almost unaltered since the Nabobs' Government, all over the District, in the land Assessment, the Moturpha, and every other department. to reduce all to one uniform & equitable System will be a work of labour and of time which cannot be at once accomplished. This is the 6th. District under the Madras Presidency in which I have had the honor to Serve, and I never yet met with so many anomalies and irregularities, founded only on "Mamool," as prevail in

in Tinnevelly.—

40 I trust the accompanying Statements and accounts leave little unexplained to the Board, exhibiting some of the many inequalities prevailing all over the Province under the present Assessment. It has been my endeavour to place at once before the Board every information attainable and which they were likely at any time to call for, to obviate future delay or reference and to enable the Board to judge of the difficulties and inconsistencies existing in Tinnevelly and the best practical mode of reconciling and correcting them, as far as possible, and I am sure I need not tell the Board that the collection and preparation of these data, have cost my own fixed Establishment and myself many Months of Extra and incessant labour, especially as considerable care and re-examination has been bestowed on them to ensure their correctness and this has been going on simultaneously with the current work, not light, of the Jumma-

-mabundy and other duties of the District.—

41 During the preparation of the fair Report and accounts for Padinalumpairy, the necessary accounts for 2 of the remaining 3 Villages Viz.t Chittaur Chuttrum and Terkke-lundacoolum have been concluded, both in English and in Hindoovee, and they are also submitted for the Board's information and approval.—

Tinnevelly— 24th October 1843 } (Signed) E. B. Thomas Collector—

Glossary of Terms used in the Survey Hookoommamah and Accounts.—

Agapute—Channel irigation &c.a

Allur—Brackish or Saline Soil

Aloyda—

Aloyeda Porumboke — Entire Porumboke which see.

Anady waste — Immemorial waste

Aund — Malabar Year Aund 1019 corresponds with the 1843/44.

Ansawny Porumboke — Porumboke lands in the midst of Cultivated fields and Arable waste.

Baravurd — Pay abstract

Baugact — Garden Cultivation

Battavirty — Land in the possession of Merassidars. opposed to Pungoovaly.

Chattoorbagum — Remission of 1/4th of the demand on Poonjah land Vide.

Chuckrums or Pons — Equal to 10 Cully fanams

Coodeewarem — Ryots Share after deducting Somoh Kurch which see

Cully fanams — Equal to 3 a 8 - 4 nearly.

Cul Shevel — Red soil mixed with gravel

Cursel — Black or Cotton Soil

Cutty Shevel — Hard Red Soil.

Deshacavil — A certain contribution formerly levied by the Poligars from the Ryots on account of watchers the Village & which is now collected by the Circar a species of Black mail

Egabogum

Egabogum — A Village in the enjoyment of a Single proprietor.

Goshwara — Abstract.

Juddidy — Examination. Correct Adjustment.

Kutcha Chitta — Original rough daily Account of Measurement.

Mahajunnums — Brahmin Merassedars.

Mailwarem — Government share of the produce after deducting Somoh Kurch.

Manul — Sandy Soil.

Manul Pottel — A mixture of Manul & Pottel

Manul Shevel — Red soil mixed with sand

Moothalady — 1st Crop.

Mouzah — Principal Village

Muzrah — Hamlet.

Oloongoo price — Standard price.

Padoogay — Best soil generally found near the borders of rivers.

Padoogaul waste — Cultivable or Arable waste

Poonacolum — Tank dependent on the falling rains.

Porumboke — Lands that cannot be brought under the plough.

Pottel — A Mixture of 2/3 of black and 2/3 white soil.

Pungoovaly — A Village held in shares & liable to change periodically

Pynash

Fort St. George 19th February 1844

Pymash Chittah——Account of daily measurement

Pymashdar——Surveyor

Saderewarde——Contingent Charges.

Somolichurcho——Grain taken from the prod
produce before apportionm
it for Charges to be borne b
the Ryots and Governmen

Seygal waste——Cultivable waste.

Shevel——Red soil.

Tadbund——Clumps or Topes of Palmirah
Trees.

Shadee——Means a field but generally
applied to Sub divisions of a
field.

Shalady——2nd Crop.

Shollacaul——Garden Cultivation.

Shoolavady——Watered by Artificial mean
or by Picotahs.

Tripany——Repairs of Pagodas.

Turrum——Classification.

Vesspol——A Mixture of 2/32 of black

Vesspol Pottol——A Mixture of Vesspol & Pottel

Vompyre——Garden Crops.

and Todbunds at 7 3/4 fs.
per every 100 Cully fanams

Uzmashdar——Examiner.

Fort St. George 19th February 1844

No. 1.

Pychaiwar Pymash Chittah of the village of Padi
=na Lampary.

Measured on the 20th April 1843.

No. 1 — 1 15/16 — Cawnies of entire Poombeke Nunjah land, bounded on the West by Nunjah field No. 365 of the pre=
=sent survey, on the north by a stream in the limits of Gengecaunndawn, and on the south by Poodoor Coodeyeroo=poo. This land is entered in the old Assyacut as Nunjah, and measures according to the old measurement 1 — 1 — 3½ which is e=
qual to 1 15/16 Cawnies. The present measurement is as follows.—

E to W.	S to N.	Gountahs	Cawnies
14½ rods	× 9 rods	= 130½	or 1 15/16

Odei Emmgul with 38 Palmirahs thereon, of which 34 are productive and 4 young trees.

No. 2 — 1 54/64 — Cawnies of entire Poombeke Punjah lands occupied by 11 thatched houses belonging to Soodasan in the Village of Poodoor Coodeyeroo=poo. There are on this land 14 productive Palmirahs. It is bounded on the North by field No. 1 on the South by Punjah land No. 4 and on the West by 2d and 3d Cawnies Nunjah. The old measurement is L. R. 182 3/8 or 1 23/32 Cawnies of Nunjah land. The present measurement is as follows.—

E to W.	S to N.	Gountahs.	Cawnies
12	× 15	= 180	or 1 54/64

Cawnies

No. 3-6 5/64 — Cawnies of entire Poumboke Poonjah land bounded on the West by Poonjah land No. 2, on the East by the river Chittrananthee and on the North by a stream called Vallayeramoodiar in the limits of Geng-a-coondaum - The old measurement is S. C. 4-11-3 1/2 or 3 29/64 Cawnies of Nunjah land - The present measurement is as follows -

E to W.	S to N.	Gross.	Cawnies
South End 25 / North End 20	22 1/2 ×	27 —	607 1/2 or 6 55/64

Oday Cungal with 175 productive Palmirah trees and 100 young trees or both together 295 Palmirah trees -

No. 4-2 1/2 — Cawnies of entire Poumboke Poonjah land, bounded on the north by No. 3 on the East by the river Chittrananthee and on the West by Vadacuttalay Nunjah - The old measurement is S. W. q. 5 or 25/64 Cawnies of Nunjah land - The present measurement is as follows -

E to W.	S to N.	Gross.	Cawnies
10	×	25 —	250 or 2 1/4

This is occupied by oday Cungal with 360 Palmirah trees of which 220 productive and 140 young trees.

No. 5-1 3/8 — Cawnies of entire Poumboke Poonjah land, bounded on the north by No. 4 on the West by Vadacuttalay Nunjah

Nunjah and on the East by the river Chittrananthee - The old measurement is chains 37/64 or 1 37/64 Cawnies of Poonjah land - The present measurements are as follows -

E to W.	S to N.	Gross.	Cawnies
South End 13 / North End 11 1/2	12 1/2 ×	11 —	137 1/2 or 1 2/5

with 998 Palmirah trees of which 348 are productive and 750 young trees -

No. 6-2 27/64 — Cawnies of entire Poumboke Poonjah land bounded on the North by No. 5, on the East by the river Chittrananthee and on the west by Vadacuttalay Nunjah - The old measurement is 64 chains or 2 5/8 Cawnies of Poonjah land - The present measurement is as follows -

E to W.	S to N.	Gross.	Cawnies
South End 16 / North End 18 1/2	17 1/2 ×	14 —	244 1/2 or 2 27/64

with 1360 Palmirah trees, of which 60 are productive and 1300 are young trees -

No. 7-1 1/16 — Cawnies of entire Poumboke Poonjah land bounded on the North by field No. 6 on the East by the river Chittrananthee and on the West by Vadacuttalay Nunjah - The old measurement is S. E. a - 10 - 3 1/2 or 69/64 Cawnies of Nunjah land - The present measurement is as follows -

E to W.	S to N.	Gross.	Cawnies
14	×	12 —	168 or 1 11/16

Deduct

Deduct burying ground measuring as follows

E to W.	S to N.	Gross.	Caw.
2	× 2	= 4	or 3/64

remaining extent of Poombuhe Poonjah lands is 1 51/64 Cawnies with 492 Palmirah trees of which 92 are productive and 400 young trees.

No 8 — 1 26/64 — Cawnies of entire Poombuhe Poonjah land, bounded on the North by field No 7 on the West by Vadacuttay Poonjah Land & on the East by the river Chittranathee. The old measurement is chains 4 or 1 3/8 Cawnies. The present measurement is as follows.

E to W.	S to N.	Gross.	Caw.
10	× 14	= 140	or 1 13/32

There are 186 Palmirah trees, of which 156 productive and 30 young trees.

No 9 — 1 9/64 — Cawnies of entire Poombuhe Poonjah land, bounded on the North by field No 8 of the present survey, on the west by Vadacuttay Poonjah land and on the East by the river Chittranathee. There is no old measurement to this land. The present measurement is as follows.

E to W.	S to N.	Gross.	Caw.
5½	× 2½	= 13¾	or 9/64

This is occupied by a stream.

Cawny

No 10 — 31/64 — Cawny of entire Poombuhe Poonjah land, bounded on the North by field No 9 of the present survey, on the West by Thencuttay Poonjah land and on the east by the river Chittranathee. The old measurement is 7 mas — 6¾ or 29/64 Cawny. The present measurement is as follows.

E to W.	S to N.	Gross.	Caw.
6	× 8	= 48	or 31/64

There are 165 Palmira trees, of which 15 are productive and 150 young trees.

No 11 — 1 4/64 — Cawny of entire Poombuhe Poonjah land, bounded on the North by No 10 of the present survey, on the west by Thencuttay Poonjah land and on the east by the river Chittranathee. The old measurement is 7 mas — 6¾ mas or 29/64 Cawny. The present measurement is as follows.

E to W.	S to N.	Gross.	Caw.
S. End 9 N. End 5 } 7	× 17½	= 122½	or 1 4/64

Deduct 64 Cawny of burying ground measuring as follows.

E to W.	S to N.	Gross.	Caw.
1	× 1	= 1	or 1/64

Remaining Poombuhe is 1 3/64 Cawnies occupied by 64 Palmirah trees, of which 34 are productive and

and 30 young trees.-

No. 12—39/64— Cawny of entire Poomboke Poonjah land, bounded on the North by No. 11 of the present survey, on the west by Thencutlay Nunjah land, and on the east by the river Chittranathe- The old measurement is 1-6 mk 1 m 0—2—5¼ o Cawny 64- The present measurement is as follows-

E to W.	S to W.	Goon.	Cawny
9	× 5 —	45	or 29/64

This is occupied by Anto Emegul with 131 o Palmira trees, of which 1 is productive and 130 young trees.-

No. 13—4/64— Cawny of entire Poomboke Poonjah land, bounded on the North by No. 12 of the present survey, on the west by Thencutlay Nunjah, and on the east by the river Chittranathee- There is no old measurement to this land- The present measurement is as follows-

E to W.	S to N.	Goon.	Cawny
6	× 11½ —	69	or 4/8

This is a declivity of the River Bank stone gravel-

No. 14—16/64— Cawny of entire Poomboke Poonjah land, bounded on the North by No. 13 of the present survey, on the east by the river Chittranathee, and on the west by Thencutlay Nunjah

land

land- The old measurement is 1-6- mk 2 m 2 o 27/8 Cawnies 1 55/64- The present measurement is as follows-

E to W.	S to N.	Goon	Cawny
11	× 11 —	121	or 1 57/64

This is a declivity of the River Bank and also occupied by 402 Palmira trees of which 2 are productive and 400 young trees.-

No. 15—7/8— Cawny of entire Poomboke Poonjah land, bounded on the north by No. 14 of the present survey, on the East by the river Chittranathee, and on the west by Thencutlay Nunjah land- There is no old measurement to this land- The present measurement is as follows-

E to W.	S to N.	Goon.	Cawny
14	× 6¼ —	87½	or 7/8

This is occupied by 600 young Palmira trees-

No. 16—2 7/64— Cawny of Poonjah land, bounded on the north by No. 15 of the present survey, on the East by Chittranathee river, and on the west by Thencutlay Nunjah land- The old measurement as 1 field is Chains ¾ or 2 8/8 Cawny-

The present measurement is as follows-

E to W.	S to N.	Goon.	Cawny
14½	× 14½ —	210¼	or 2 7/64 of

1 Shovel dab from which deduct 11/16 Cawny of

of Seygal waste under 5 years as follows.

	E to W.	S to N.	Goon.	Caw.
1 Tank on East side	5½	× 4	—	22
1 Do. South of Do.	4½	× 10½	—	47¼/64 or 1/16

Remaining extent of land under cultivation amounting to 1 27/64 Cawnies is entered in the name of Bamboo Row.-

No. 17 — 1 2/16 — Cawny of entire Poombohe Poonjah land, bounded on the West by No. 16 of the present survey, on the East by the river Chittravathee and on the North by Poonjah land No. 15. The old measurement is ½ chain or 1/8 Cawnies. The present measurement is as follows.

E to W.	S to N.	Goon.	Caw.
8	× 14	—	112 or 1/8

There are 117 Palmira trees of which 7 are productive and 110 young trees.-

No. 18 — 2/8 — Cawny of entire Poombohe Poonjah land, bounded on the North by No. 17 of the present measurement, on the East by the river Chittravathee, and on the West by Poonjah land No. 19. The old measurement is 1/64 Chains or 2/64 Cawnies. The present measurement

measurement is as follows.

	E to W.	S to N.	Goon.	Caw.
South End 10 / North End 7/17	8½	× 25	= 212½ or	2/8

The is a declivity of the river Bank and occupied by 33 Palmira trees, of which 3 are productive and 30 young trees.-

No. 19 — 1 30/64 — Cawny of Cultivated Poonjah land, bounded on the east by No. 18 of the present survey, on the west by Thencattay Nunjah land, and on the north by Poonjah field No. 18. The old measurement as 1 field is chains 26/64 or 1 7/64 Cawnies. The present measurement is as follows.

	E to W.	S to N.	Goon.	Caw.
1 Tank	11½	× 11	= 115	
West End	5½	× 5¾	= 31 5/8 / 46 3/8 or	1/64

Shevel Clay. There are 97 Palmira trees, of which 32 productive and 15 young trees. This land is entered in the name of Bamboo Row.-

No. 20 — 3/4 — Cawny of entire Poombohe Poonjah land, bounded on the North by No. 19 of the present survey, on the west by Poonjah land No. 28 and on the South by Poonjah land No. 27. The old measurement is chains 4 or 1/8 Cawny. The present measurement is as follows.

E to W.	S to N.	Goon	Caw.
5½	× 13½	= 74¼ or	3/4

There

Fort St. George 19th February 1844

There are 255 Palmira trees of which 245 are productive and 10 young trees.

No. 21 — 1 13/16 — Cawny of entire Poramboke Poonjah land is bounded on the west by No. 20 of the present survey, on the East by the river Chittamatheo and on the North by No. 19 of Poonjah land The old measurement is chams 27/64 or 1 4/64 Cawnies. The present measurement is as follows.-

E to W.	Sth N.	Goon	Caw
19	× 9½ =	180½	or 1 12/16

with 1650 young Palmira trees.

No. 22 — 28 — Cawnies of entire Poramboke land occupied by the river Chittamatheo, and bounded on the west by No. 21 of the present survey, on the South by Coopacoorchy limits, on the North by Gengoondan limits and on the east by half of the river Chittamatheo in the limits of Sarelpary. There is no old measurement to this land. The present measurement is as follows.-

E to W.	Sth N.	Goon	Caw
8	× 350 =	2800	or 28

The total extent of old measurement for the 22 fields measured on the 20th April is Cawnies 28 of which Seed Cottahs 7 or 10½ or 10 32/64 Cawnies are included in the Poonjah

Fort St. George 19th February 1844

Nunjah Anjacent and 5-8 Chains or 14 57/64 Cawnies in the Poonjah Anjacent. The total extent of the present measurement is 61 2/64 — Cawnies of Poonjah of which 57 29/64 Cawnies forming 20 Numbers are entire Poramboke land not fit for Cultivation, of which the following are the Particulars.

26 49/64 Cawnies of 16 fields are occupied by Palmira trees.

50/64 Cawnies in 2 fields are occupied by streams

1 51/64 Cawnies in 1 field are occupied by Coodero pars.

28 Cawnies in 1 field are occupied by river Chittamatheo

½ Do. forming Burying Ground is included in the 16 fields above mentioned.

Total Cawnies 57 29/64

The Remaining 3 37/64 — Cawnies in 3 fields are fit for Cultivation and are of the Shevel Class, of which

2 57/64 Cawnies are under Cultivation and 4/6 Cawnies Seygal waste.-

Measured on the 31st April 1843.

No. 23 — 2 44/64 — Cawnies of entire Poramboke Poonjah land, is bounded on the East by the river Chittamatheo No. 22, on the North by a stream, and on the South West by the Poonjah field No. 25. The present measurement as 1 field is as follows.-

East-

E to W. Sto N. Goon. Caw.
North side S. end 7 / N. end 6 } 6½ × 13 = 84½

E to W. Sto N. Goon. Caw.
South side N. end 6 / South end 5 } 5½ × 24 = 132 / 216½ or 2 4/64

No 24-3 11/64 — This is a declivity of the river Bank & gravel. Cawnies of Seygal Poonjah land, waste from 10 to 15 years, bounded on the East by No 23 on the North by No 21, and by a stream, on the west by Poonjah No 27- This land is entered in the name of Banbas Row- The present measurement is as follows.

E to W. Sto N. Goon. Caw.
23½ × West end 14 / East end 4 3/27 } 13½ = 317¼ or 3 9/64

of Pottel Class of which ansamy or Individual Poonnoke is Cawnies 23/32 with 187 Palmira trees of which 137 productive and 50 young trees. the measurement of this Poonnoke was as follows.

E to W. Sto N. Goon Caw.
5¾ × 13½ = 78 7/8 or 23/32

the remaining Seygal Poonjah Bunjer 17 amounts to Cawnies 2 29/64.

No 25-5 44/64 — Cawnies of Seygal Bunjer land, bounded on the North by No 24 of the present measurement, on the East by Poonjah land No 23 and on the South by Coopacheeoley limits and entered in the name of Banbas Row- The present measurement is as follows.

E to W. Sto N. Goon Caw
24 × West end 24 / East end 2 3/27 } 23½ = 564 or 5 44/64

Pottel

Pottel Class- This is a Seygal Waste land between 10 or 15 years.

No 26-3 44/64 — Cawnies of Seygal Bunjer land bounded on the East by No 25 of the present survey, on the South by Coopacheeoley limits, and on the west by Poonjah land No 37 and entered in the name of Banbas Row-

The present measurement is as follows.

E to W. Sto N. Goon. Caw.
19 × East end 23 / West end 17½ / 40½ } 20¼ = 384¾ or 3 54/64 This

is of Pottel Class land waste between 10 and 15 years with 2 Palmirah trees of which 1 productive and the other young.-

No 27-4 4/64 — Cawnies of Seygal Bunjer land bounded on the South by the field No 28, on the East by Poonjah land No 24, and on the west by Poonjah land No 36 and is entered in the name of Banbas Row- Its present measurement is as follows.

E to W. Sto N Goon Caw.
27 × West end 13½ / East end 18 / 31½ } 15¾ = 425¼ or 4 4/4

This is of Pottel Class land waste between 10 and 15 years with 57 Palmirah trees paying Teervah to Government.-

No 28-2 3/64 — Cawnies of Seygal Bunjer land bounded on the South by the piece of Ground No 27, on the East by Poonjah land No 20 [illegible] and on the west by Poonjah land No 35 and is entered in the name of Banbas Row- The present measurement is as follows.

E to W. Sto N. Goon Caw.
24 × East end 8 / West end 9 / 17 } 8½ = 204 or 2 3/64

This is of Pottel Class land waste between 10 and

and 15 years.

No. 29 — 4 57/64 — Cawnies of Seygal Bunjer land bounded on the South by the piece of ground No. 28, on the East by Poonjah land No. 19, and on the West by Poonjah land No. 34 and is entered in the name of Bau Row. Its present measurement is as follows.

E to W.	S to N.	Goon.	Caw.
1 Tank — 14 × East end 13 / West end 10/23		11½ =	471½
1 Tank in the west corner	2 ×	4 =	8/471½ or 4

This is of Pottel Clay waste between 10 and 15 years are 84 Palmira trees paying Teerwah to Govern and 50 young trees.

No. 30 — 3 23/64 — Cawnies of Poonjah Seygal Bunjer land bounded the South by the piece of ground No. 29, on the west Poonjah land No. 33 and on the East by Poonjah land No. 16, and is entered in the name of Bauboo Row. The present measurement is as follows.

E to W.	S to N.	Goon.	Caw.
24 ×	14 =	336 or	3 23/64

This is of Pottel clay waste between 10 and 15 years.

No. 31 — 3/4 — Cawnies of Seygal Poonjah Bunjer land bounded on the by No. 30, on the North by Shencuttay Poonjah land and on west by Poonjah land No. 32 and is entered in the name of Bauboo Row. The present measurement is as follows.

E to W.	S to N.	Goon.	Caw.
24 ×	13 =	312 or	3

This is a Pottel Clay land waste between 10 and 15 years there are 20 young Palmira trees standing on it.

No. 32 — 3/4 — Cawnies of Seygal Poonjah Bunjer land bounded on the east by piece of ground No. 31, on the North by Poonjah land, and on the west Poonjah land No. 33 and is entered in the name of Bauboo Row. The present measurement is as follows.

E to W.	S to N.	Goon.	Caw.
24 ×	13 =	312 or	3

No. 33 — 3 23/64 — This is a Pottel clay land waste between 10 and 15 years. Cawnies of Poonjah Seygal Bunjer land bounded on the North by the piece of Ground No. 32, on the west by Poonjah land No. [illegible] and on the East by

land No. 30, and is entered in the name of Bauboo Row. The present measurement is as follows.

E to W.	S to N.	Goon.	Caw.
24 ×	14 =	336 or	3 23/64

This is a Pottel class land lying waste between 10 and 15 years. There are 206 young Palmira trees standing on it.

No. 34 — 11/64 — Cawnies of entire Poramboke Poonjah land bounded on the North East by the piece of ground No. 33 on the East by Poonjah land No. 29 and on the West by Poonjah land No. 57 and is entered in the name of Bauboo Row. The present measurement is as follows.

E to W.	S to N.	Goon.	Caw.
4½ ×	4 =	18 or	11/64

There are 149 Palmira trees paying Teerwah to Government.

No. 35 — 137/64 — Cawnies of Poonjah Seygal Bunjer land bounded on the North West by the piece of Ground No. 36 on the East by the Poonjah land No. 28 and on the West by Poonjah land No. 57 and is entered in the name of Bauboo Row.

The present measurement is as follows.

E to W.	S to N.	Goon.	Caw.
16 ×	12 =	192 or	137/64

This is a Pottel Class land waste between 10 and 15 years. There are 18 Palmira trees paying Teerwah to Government.

No. 36 — 137/64 — Cawnies of Poonjah Seygal Bunjer land bounded on the

the North by the piece of Ground N°35 on the East by Poonjah land N°37 and on the West by Poonjah land N°57 and is entered in the name of Baubee Row. The present measurement is as follows.

	E. to W.		S. to N.	Gom.	Cw
	4	x	13¼ =	189	157/4

This is a Pettel clap waste between 10 and 15 years
There are 33 Palmira Trees paying Peeruah to Government and 30 young trees.

N°37 3 22/64 Cawnies of Poonjah Seygal Bunjer land bounded on the North by the piece of Ground N°36 on the East by the Poonjah land N°26 on the West by Calcomiacal and on the South by Coopacoochy limits and is entered in the name of Baubee Row. The present measurement is as follows.

	E. to W.		S. to N.	Gom.	Cw
E end 21½ Centre 22 W. end 24/25 17½	22½	x	E end 12 W. end 4/25 11 —	313¼	
1 Tank in the South Corner	9¼	x	E end 5¼ W. end 3¼ 4½ =	38 7/64 351 22/64	or 3 33/64

This is a Pettel Clap land waste between 10 and 15 years.
There are 58 Palmira trees of which 18 pay Peeruah to Government and 40 young trees.
The Total extent of the measurement Baubee Runjah for the 15 pieces of ground measured on the

April is 5.635 19 m 3¼ m 11 44 3/64 Cawnies. The total extent of present measurement as Poonjah land is 46 25/64 Cawnies forming 15 fields — Deduct Coromboke land in 2 fields not fit for cultivation 2 22/64 Cawnies of which 1/64 Cawnies of land in one piece of Ground is occupied by Palmira trees and 2¼ Cawnies of land in another piece of Ground is a declivity of the River Bank and composed of Gravel. Deduct Buseany or Individuals Coromboke land occupied by Palmira trees is 1/64 Cawny. Total of Coromboke land de: ducted 3/64 Remaining land fit for cultivation is 43 32/64 Cawnies in 13 pieces of Ground which is Seygal Bunjer land of Pettel Clays.

Measurement on the 22d April 1843.

N°38 33/64 Cawny of Seygal Poonjah Bunjer land bounded on the South East by the piece of Ground N°37 on the West by Coopah Coochy limits, High road and Calcomiacal and on the North by Coopah Coochy limits and Vuttapany. The old measurement is Chains 5/64 or 1/64 Cawnies. It is entered in the name of Baubee Row. The present measurement is as follows.

	E. to W.		S. to N.	Gom.	Cw
	4/5	x	11½ =	57¼	or 33/64

This is a Pettel clap land waste between 10 and 15 years.
Cawnies

Fort St. George 19th February 1844.

No. 39 — 17/64 Cawnies of Poonjah Seygal Bunjer land bounded on the South by the piece of Ground No. 38 on the West by High Road and on the East by Poonjah land No. 34 and is entered in the name of Boutos Row. The old measurement is 17/64 cawnies or 1/4 Cawny. The present measurement is as follows.

Bank in South Corner	5 1/2	x	2 1/2 —	13 3/4
Bank North of Do.	7 3/4	x	15 —	108 3/4
Bank in the north Corner	5 1/2	x	4 —	22/144 or 1/64

This is a level clay land waste between 10 and 15 years. There are 9 Palmira trees standing on it paying Teerwah to Government and 25 young trees.

No. 40 — 1/4 Cawny of entire Ground bounded on the South by the piece of Ground No. 39 on the West by Road and on the North by Poonjah land No. 41. There is no old measurement as as follows.

	8	x	15 —	120 or 1/4

No. 41 — 3/4 Cawny of Seygal Poonjah Bunjer land bounded on the South West by the piece of ground No.

Fort St. George 19th February 1844.

on the East by Poonjah land No. 42 and on the West by a Rock, and is entered in the name of Boutos Row. The old measurement is 25/64 or 1/4 Cawny. The present measurement is as follows.

	2	x	16 —	32 or 1/2

This is level Clay waste between 10 and 15 years.

No. 42 — 53/64 Cawny of entire Ground occupied by Vellapauny Rock bounded on the East by the piece of Ground No. 41 on the West by the Coopercoorchy limits and on the South same limits. There is no old measurement to this. The present measurement is as follows.

	16	x	5 1/2 —	82 1/2 or 53/64

There are 56 Palmira trees standing on it of which 1 Pay Teerwah to Government and the remaining 55 are young trees.

No. 43 — 1/2 Cawnies of Seygal Poonja Bunjer land bounded on the South East by the piece of ground No. 42 on the West by Coopakcoorchy limits and on the South

Fort St. George 19th February 1864.

South by the same limits. This belongs to Pa-
-nadayar Sasthamcoil Pagoda. The old measure-
is 2 3/4 chains or 5 1/2 Cawnies. The present measure-
is as follows.-

	D to N.	S. to N.	Goon.	Caw.
N. and S. ms 19/25	1 3/4 x	3 1/4 —	4 5 7/2	or 1 1/2

				2/16

Remaining Seygal Banjer land is 13/64 Cawny.-
This is a level class land waste between
10 and 15 years.-
There are 2 Cultahy trees 1 Arasa tree and one
Attee tree standing on it.-

No. 45 13/64 Cawnies of entire Poramboke Poonjah land
bounded on the South by the piece of ground
No 44, on the North by the walls of the Pagoda
called Casa Mandon Coil belonging to the
Parias on the East by the Road and on the
West by Cospah coorchy limits. The old measurement
is chains 5/2 or 1 3/8 Cawnies. The present measurement
is as follows.-

	D to N.	S. to N.	Goon	Caw
	4 x	40 —	160	or 1 38/64

Deduct 3/64 Cawny lands occupied by the 3 following
Pagodas measuring as follows.-

	D to N.	S. to N.	Goon	Caw
Paracasamanden Pagoda	1 x	1 —	1	or 1/64
Pillercasamanden Coil	1/2 x	1 —	1/2	1/64
Sakkamarcasamanden Coil —	1 x	1/2 —	1/2	1/64
			4	or 3/64

Remaining land occupied by 572 Palmira trees is 1 37/64 Cawny
of which 15 Toddy giving trees 7 productive 200 leaf giving trees
and 650 unproductive.-

There

Fort St George 19th February 1846.

There are also 1 Areca tree and 2 Atty trees

No. 46 4¾ Cawnies of entire Poumbokie Poonjah land bounded on the South by the piece of Ground No. 45 on the East by the Road and on the West by the boundary Stone of Corpaconchy. The old measurement is 1 58/64 Chains or 5¾ Cawnies The present measurement is as follows.—

S. end 24 / Centre 18 / N. end 16 / 58	19 8/16	X	E. end 38½ / W. end 20 / 80½	28¾	487 44/64 or	4 7/8

There are 2 Eddy giving Palmira Trees 2 Productive 200 leaf young trees and 800 young Palmira trees or altogether 704 trees.—

No. 47 2 58/64 Cawnies of Seygal waste land under 8 years bounded on the South by the piece of Ground No. 46 on the East by the Road leading to Sevelpary and on the West by a Rock. The old measurement is 1 7/64 Chains or 3 7/64 Cawny. It is entered in the name of Bamboo Row. The present measurements is as follows.—

S end 16 / N end 13½ / 29½	S to N. 14 3/4	X	E end 22½ / W end 17 / 39½	S. to N. 19¾ —	Goon 29 8/64 or	Caw 2 5/64

Deduct 11/64 Cawny of land occupied by Rock and Palmira Trees measuring as follows.—

Rock — 1½ / 4	E. to W. 1½	×	S. to N. 1¼ —	Goon 2¼	or	Caw 9/64
8 Young Palmiras	4	×	4 —	16		2/64
					Remaining	2/64

Fort St George 19th February 1846.

Remaining Seygal Poonjah land of said Lot is 2 7/64.

No. 48 6 7/64 Cawny of Seygal Poonjah land waste from 10 to 15 years called Cumaraty Poonjah bounded on the North east by No. 47 on the west by the Alwajarapauny Keelelgah limits, and on the South West by the Corpaconchy boundary Stone bearing the inscription of the Tamil Sept Letter N and a Chuckrum facing to the South which is fixed in the South west direction of Cunnymoolie, and on the South by the Chuckra Adisshoo Olga Cal passing to the South and fixed in the South Easterly direction. The old measurement is Chains 2 7/64 or Cawnies 5 47/64 in the name of Bamboo Row. The present measurements is as follows.—

S end 38 / N end 30 / 73	E. to W. 30½	×	W. end 14½ / Centre 18½ / E end 22 / 57½	S. to N. 17½ —	Goon 629 5/64 or	Caw 6 9/64

from which deduct 15/64 Cawnies of Aswanny Poumbokie land occupied by a Rock on the East side measuring as follows.—

E. to W. 22	×	S. to N. 6 —	Goon 132	or	Caw 15/64

The remaining extent of Seygal Poonjah Poonjah land is 6 49/64 Cawnies

Deed Copy.—

Fort St George 19th February 1864.

No 49 4¾ Cawnies of Ponjah waste land of about 20 years bounded on the South by 2348 on the North West by Bundicha Jeamie and on the North by Ponjah land 2352 The old measurement is 5/32 Chains or Cawnies 3/16 of the Shevel Class in the name of Bundoo Row The present measurement is as follows.—

8	× 7 =	56	or 2/16

with 1 Toddy giving Palmira tree.-

No. 61 2/64 Cawnies of entire Poonjah Ground occupied by 15 houses in the Village of Padamalampairy of which 1 is upstair house 1 thatched upstair house and 14 thatched houses. There are also 2 unproductive Palmira trees, and 1 young tree Standing on it. It is bounded on the South by field No. 60 on the East by a channel and on the west by a Pagoda. The old measurement is 1 M. 2. 9. 4¾ or 2 13/64 Cawnies. The present measurement as follows.-

E to W	S to N	Goms	Cawr.
14½	× 15 =	217½	or 2 11/64

with 2 productive and 5 Margosa trees and 1 Jamarind tree.-

No. 62 27/64 Cawny of Sevel Poonjah land waste above 20 years bounded on the West by a Road on the North by a Pagoda and on the South by field No. 61. It is entered in the name of Baboo Row. The old measurement is 1 M. 6. — 9 — 5 or 27/64 Cawny. The present measurement is as follows.-

E to W.	S to N	Goms	Cawr.
North end 4½ / South end 2½	3½ ×	12 =	42 or 27/64

No. 63 1 50/64 Cawny of Seygal Poonjah Cramboo waste land above

20 years; bounded on the North west by field No. 62 on the east by Nunjah land and a branch channel on the North by a Palmira Tope It is entered in the name of Bauboo Row. The old measurement is Chains $\frac{3}{4}$ or $2\frac{1}{16}$ Cawny. The present measurement is as follows.-

E to W		S to N		Goom	Cawnies
$11\frac{1}{2}$	×	$15\frac{1}{2}$	=	$178\frac{1}{4}$	or $1\frac{50}{64}$

It is occupied by 47 Palmira trees of which 25 Siddy giving trees and 22 Unproductive.

Total extent according to old measurement is $52\frac{46}{64}$ Cawnies for the 26 fields, measured on the 22nd April 1843 of which there is Nunjah land to the extent of S. C. 4-7-$1\frac{3}{4}$ or $5\frac{21}{64}$ Cawnies, and Poonjah land Chains $17\frac{15}{64}$ or $47\frac{25}{64}$.

Total extent of present measurement is $54\frac{41}{64}$ Cawnies forming 26 fields. Deduct there from land not fit for cultivation amounting to Cawnies $21\frac{38}{64}$ of which $14\frac{6}{16}$ Cawnies are entire Poromboke of which the following are the particulars.-

Rock:-

	No. of field	Cawnies
Land occupied by Palmiras	3	$3\frac{52}{64}$
Ditto ——— Ditto by Road	2	$6\frac{17}{64}$
Ditto ——— Ditto by Coodegeroo pos	1	$6\frac{61}{64}$
Ditto ——— Ditto by 3 Pagodas	3	$3\frac{14}{64}$
	"	" $\frac{3}{64}$
Total	9	14-$\frac{3}{4}$

The following are the particulars of the remaining $7\frac{7}{32}$ Cawnies of Nunjah Poromboke land.

Land occupied by 2 Pagodas $\frac{5}{64}$ Cawny

Rock $6\frac{55}{64}$

Land occupied by Palmira trees $\frac{2}{32}$

Total $7\frac{7}{32}$

Total land deducted on account of Po: ramboke ——— $21\frac{38}{64}$

Remaining extent of land fit for cultivation is $33\frac{3}{64}$ Cawnies in 17 fields of sevel class.- The following are the particulars thereof.-

	No. of		
Extent of seygal waste land ———	11	17	$\frac{17}{32}$
Ditto — of Sandy Cramboo waste land	6	15	$\frac{33}{64}$
	17	33	$\frac{3}{64}$

Measured on the 23rd April 1843.

No. 64 $17\frac{17}{32}$ Cawnies of entire Poromboke land in the bed of Padamalampairy Tank bounded on the South east by field No. 63 on the east by a Tank Bank, on the West by Road, and on the North by Nunjah land in 3 Curnas belonging to Vadacutlay - The old measurement is S. C. 16-4-$\frac{5}{8}$ or $19\frac{56}{64}$ Cawnies. The following is the present measurement.

	E to W		S to N		Goom	Cawnies
South end $12\frac{6}{8}$ / North end $\frac{31}{43\frac{5}{8}}$	$21\frac{13}{16}$	×	$74\frac{1}{4}$	=		$1619\frac{37}{64}$
1 Tank at N.W. end 3 — South end 8, Centre 5, N. end 2 / 15	5	×	23	=	115	
						$1734\frac{37}{64}$ or $17\frac{17}{32}$

No. 65 $\frac{7}{64}$ Cawny of Nunjah cultivated land bounded on the North

North by a Channel and by 3d. Cunnar Nunjah, on the West by a road and on the South by field No. 64. The old measurement as 1 field is included in the preceding No. It is entered in the name of P. Babo Row. The present measurement is as follows.-

E to W.	Sth to N.	Goovo	Caw
4 1/4	× 2 5/8 =	11 5/32	or 7/14

of Manul Clafs under Cultivation.-

No. 66 2/14 Cawny of Nunjah cultivated land bounded on the North by field No. 65, on the East by Tank Bank and on the West by bed of Tank.- The old measurement as 1 field is included in the preceding No.- It is entered in the name of Babo Row. The present measurement is as follows.

E. to W.	Sth to N	Goovo	Caw
5 1/2	× 2 1/2 =	13 3/4	or 9/14

of Manul Clafs.

No. 67 11/64 Cawny of Nunjah cultivated land bounded on the North by field No. 66, on the West by field No. 64 and on the East by Tank Bank. The old measurement as 1 field is included in the preceding No.- It is entered in the name of Babo Row. The present measurement is as follows.-

E to W.	Sth to N	Goovo	Caw
5 7/8	× 3 =	17 5/8	or 11/14

of Manul Clafs.

Cawny

No. 68 7/32 Cawny of Nunjah cultivated land bounded on the North by field No. 67, on the West by field No. 64 and on the East by Tank Bank. The old measurement as 2 fields is included in the preceding No. It is entered in the name of Babo Row. The following is the present measurement.-

E to W	Sth to N.	Goovo	Caw
5 7/8	× 3 3/4 =	22 1/32	or 7/32

of Manul Clafs.

No. 69 14/64 Cawny of Nunjah cultivated land bounded on the North by field No. 68 on the West by field No. 64 and on the east by Tank Bank The old Measurement as 2 fields is included in the preceding No. The present measurement is as follows.-

E to W	Sth to N	Goovo	Caw
7	× 3 1/8 =	21 7/8	or 14/64

of Manul Clafs.

No. 70 17/14 Cawny of Nunja cultivated land bounded on the North by field No. 69 on the West by field No. 64, and on the East by Tank Bank The old measurement as 3 fields is included in the preceding No. 64, and entered in the name of Babo Row. The present measurement is as follows.-

E to W.	Sth to N	Goovo	Caw
7 1/4	× 3 3/4 =	27 3/16	or 17/64

of Manul Clafs.

No. 71 27/64 Cawny of Nunja cultivated land bounded on the North

North by field No. 70 on the West by field No. 64, and on the East by Tank Bank. The old measurement as 2 fields is included in the preceding No. 64 and entered in the name of Baboo Row. The present measurement is as follows.

E to W.	Sth to N	Goors	Cawn
6	× 7 =	42	or $\frac{27}{64}$

of Manul class.

No. 72 $2\frac{1}{4}$ Cawnies of land bounded on the west by field No. 71 on the west by Nunjah Peroogal, and on the South by Vuttapary. The old measurement as 1 field occupied by Tank Bank as far as 3rd Cumar Nunjah is 1-15-5 1/2 or $2\frac{5}{16}$ Cawnies The following is the present measurement.

E to W.	Sth to N	Goors	Cawn
2	× $112\frac{1}{2}$	225	or $2\frac{1}{4}$

of entire Poramboke with 150 Productive and 800 young Palmiah trees.

No. 73 $1\frac{25}{64}$ Cawny of Nunjah cultivated land bounded on the West by field No. 72 and on the North by Vadacattaley 1st Cumar and by Seroopathaly pairy of Gengycondan. The old measurement as 1 field occupied by a Channel from 1st Cumar of Nunjah as far as 3rd Cumar is 1-2-16-2-7/8 or $3\frac{5}{32}$

Cawny

Cawny. The present measurement is as follows.

	E to W	Sth to N	Goors	Cawn
1st	Tank	1/2 × 16	=	8
2nd	Ditto	1/2 × 8	=	4
3rd	Ditto	1/2 × 60	=	30

7th	Ditto	1/2 × 76	=	38
8th	Ditto	1/2 × 16	=	8
			$138\frac{3}{4}$	or $1\frac{25}{64}$

Total extent of Nunjah land measured on the 23rd April 1843 is according to old measurement 5-1-6 20-18-1 or Cawnies $25\frac{37}{64}$ forming 10 fields and that according to the present measurement is Cawn. $21\frac{17}{32}$

Deduct entire Poramboke.

1 field occupied by Neerpedy containing $17\frac{11}{32}$ Cawn.
1 field occupied by Tank bank containing $2\frac{1}{4}$ Cawn.
1 field occupied by Nullah containing $1\frac{25}{64}$ Cawn.
3 fields containing $20\frac{63}{64}$ Cawnies.

Remaining extent of Nunjah land cultivated is Cawnies $1\frac{35}{64}$ forming fields of Manul class.

Measured on the 24th April 1843.

No. 74 $\frac{25}{64}$ Cawny of Nunjah Seygal land waste from 10 to 15 years bounded on the West No. 73 on the South by No. 32 and on the North by a Drain. The old measurement

is

is S.M 5 1/4 or 19/64 Cawny The present measurement as one field in the name of Bauboo Row in the Thencattalay Cumnar No. 10 is as follows.

E to W	S to N	Goors	Cawnies
6 1/2	x 6 =	39	or 25/64 of

Manul Class.-

No. 75 11/64 Cawny of Nunja Seygal land waste from 10 to 15 years bounded on the North by a Stream on the South by Poonjah field No. 32 and on the west by No. 74 in the name of Bauboo Row.- The old measurement as 2 field is S.M 6 1/2 or Cawn 26/64 The present measurement is as follows.

E to W.	S to N	Goors	Cawnies
3 1/2	x 5 =	17 1/2	11/64

of Pottel Class.-

No. 76 13/32 Cawny of Seygal Nunjah land waste from 5 to 10 years bounded on the West by field No. 75 on the North by a Channel and on the South by Poonja field No. 32 The old measurement as 3 fields is S.M 7-4 or 7/16 Cawny of Buttaverthy in the name of Venkatasoobien. The following is the present meast.

E to W.	S to N	Goors	Cawnies
7- x	5 7/8 =	41 1/8	or 13/32 of

Pottel Class.- There are 10 Palmirah trees of which 7 Toddy giving trees 1 productive and 2 young trees.-

No. 77 5/64 Cawny of seygal Nunjah land waste from 5 to 10 years bounded on the West by field No. 76 on the North by a Channel and on the South by Poonjah field

field No. 32 The old measurement as one field is S.M 1-5 7/8 or 3/32 Cawny of Buttaverthy in the name of Venkatasoobien. The present measurement is as follows.

E to W	S to N	Goors	Cawnies
1 1/2	x 5 1/2 =	8 1/4	or 5/64

of Pottel Class.

No. 78 11/64 Cawny of Seygal Nunjah land waste from 5 to 10 years bounded on the West by field No. 77, on the North by a channel and on the South by Poonja field No. 32.- The old measurement as 1 field is S.M 2-6 1/8 or 5/32 Cawny of Buttaverthy in the name of Venkatasoobien. The present measurement is as follows.-

E to W	S to N	Goors	Cawnies
3	x 5 1/2 =	16 1/2	or 11/64 of

Pottel Class.- There are 8 young Palmirah trees standing on it.

No. 79 13/16 Cawny of Seygal Nunjah land waste from 5 to 10 years bounded on the West by field No. 78, on the North by a Channel, and on the South by Poonjah field No. 32. The old measurement as 1 field is S.M 3-3 3/8 or 13/64 Cawny in the name of Venkatasoobien. The present measurement is as follows.

E to W	S to N	Goors	Cawnies
3 1/2	x 5 1/2 =	19 1/4	or 3/16

of Pottel Class.

1 3/8 × 7 = 9 5/8 or 3/32 Cawny

of Manul Class-

N°-347 1/4 Cawny of Nunjah Seygal land waste from 5 years, bounded on the East by field N°-346 on the South by a Channel, and on the North by N°-361- The old measurement as 2 fields is S M 3 7/8 or 19/64

Cawny

Cawny in the name of Alagherry Reddy- The present measurement is as follows-

E to W		St. to N		Goon.	
4 1/4	×	6	=	25 1/2 or 1/4	Cawny of

Manul Class-

A°.348 19/64 Cawny of Cultivated Nunjah land bounded on the east by field A°.347, on the South by a Channel, and on the North by A°.360- The old measurement as 1 field is S.M.B- 1 7/8 or 5/16 Cawny in the name of Baboo Row- The present measurement is as follows-

E to W		St. to N		Goon.	
4 1/8	×	7 1/8	=	29 25/64 or 19/64	Cawny

of Manul Class-

A°.349 19/64 Cawny of Cultivated Nunjah land, bounded on the east by field A°.348, on the South by a Channel, and on the North by A°.337- The old measurement as 1 field is S.M. 3 1/2 or 11/64 Cawny in the name of Baboo Raw- The present measurement is as follows-

E to W		St. to N		Goon.	
2 7/16	×	6 3/4	=	17 27/64 or 11/64	Cawny

of Manul Class-

A°.350 19/64 Cawny of cultivated Nunjah Land bounded on the East by field A°.349 on the South by a Channel, and on the North by A°.356- The old measurement as 1 field is S.M- 4- 7 3/4 or 19/64 Cawny in the name of Baboo Raw- The present measurement

measurement is as follows-

E to W		St. to N		Goon.	
4 1/8	×	6 3/4	=	27 54/64 or 18/64	Cawny

of Manul Class-

A°.351 6/64 Cawny of Anady Nunjah land waste above 20 years, bounded on the East by field A°.350, on the South by a Channel, and on the North by A°.355 The old measurement as 1 field is S.M. 1- or Cawny 1/64 in the name of Baboo Raw- The present measurement is as follows-

E to W		St. to N		Goon	
1 1/2	×	6	=	9	or 6/64 Cawny

of Manul Class-

A°.352 15/64 Cawny of Anady Nunjah land waste above 20 years, bounded on the East by field A°.351 on the South by a Channel, and on the North by A°.354- The old measurement as 1 field is S.M. 3 1/8 or Caw. 3/16 in the name of Baboo Raw- The present measurement is as follows-

E to W		St. to N		Goon.	
5	×	4 3/4	=	23 3/4 or 15/64	Cawny

of Manul Class-

A°.353 31/64 Cawny of Anady Nunjah land waste of above 20 years, bounded on the South by A°.352, on the West by a Channel, and on the North by the limits of Lingasamoodrum, The old measurement is S.M. 12 1/4

or

or Cawny 47/64 in the name of Babo Row- This belongs to Vadacuttay Curmar No 1 The present measurement is as follows-

E to W 8 + S to N 6 = Goon. 48 or 31/64 Cawny of Manul Class-

No 354 37/64 Cawny of Anady Nunjah land waste of above 20 years, bounded on the West by field No 353, on the North by the limits of Lingasamoodrum, and on the South by No 352- The old measurement as 13 fields is S M 7-3 7/8 or Cawny 7/16 in the name of Babo Row- The present measurement as 5 fields is as follows-

	E to W		S to N		Goon.	
North end 7 / Centre 6 3/4 / South end 5 5/8 / 19 3/8	6 7/16	×	9	=	57 15/16 or 37/64	Cawny

of Manul Class-

No 355 3/4 Cawny of Seygal Nunjah land waste under 5 years, bounded on the East by field No 354, on the North by the limits of Lingasamoodrum, and on the South by No 351 The old measurement is included in the preceding No- The present measurement as 8 fields is as follows-

	E to W		S to N		Goon	
South end 5 1/4 / Centre 6 1/2 / North end 7 3/4 / 19 1/2	6 1/2	×	11 1/2	=	74 3/4 or 3/4	Cawny

of Manul Class in the name of Babo Row-

Cawny

No 356 34/64 Cawny of Seygal Nunjah land waste under 6 years bounded on the West by field No 355- on the North by limits of Lingasamoodrum and on the South by No 350- The old measurement as 5 fields, is S M 7-7 5/8 or 13/32 Cawny in the name of Babo Row- The present measurement is as follows-

E to W 5 1/4 + S to N 10 = Goon. 52 1/2 or 14/64 Cawny of Manul Class-

No 357 3/8 Cawny of Cultivated Nunjah land bounded on the West by field No 356 on the North by the limits of Lingasamoodrum and on the South by No 349, The old measurement as four fields- S M 4-5 5/8 or 9/32 Cawny in the name of Babo Row- The present measurement is as follows-

	E to W		S to N		Goon.	
North end 4 3/8 / Centre 3 3/8 / South end 3 / 11	3 11/16	×	10	=	36 7/8 or 3/8	Cawny

of Manul Class-

No 358 3/32 Cawny of Nunjah Cultivated land bounded on the West by No 357, on the North by Lingasamoodrum limits, and on the East by No 360- The old measurement as 1 field is S M 1-6 3/8 or 7/64 Cawny in the name of Babo Row- The following is the present

Fort St George 19th Febrauary 1844

present measurement-

E to W 2 3/16 × Sto N 4 1/8 = Goon. 9 1/64 or 3/32 Cawny

of Manal Clafs-

No. 359 3/32 Cawny of Seygal Nunjah land waste under 5-

years, bounded on the North by No. 358- on the

West by No. 357, and on the East by No. 360- The

old measurement as 1 field is S.M. 1-1/4 or 3/64 Cawny

in the name of Baboo Row- The present measurement

is as follows-

E to W 3 × Sto N 3 = Goon. 9 or 3/32 Cawny

of Manal Clafs-

No. 360 9/64 Cawny of Nunjah Cultivated land, bounded on

the West by field No. 359, on the North by Linga-

-samoodrum limits, and on the South by No. 348- The

old measurement as 1 field is S.M. 1-4- or 3/32 Cawny

in the name of Baboo Row- The present measurement

is as follows-

E to W 3 1/4 × Sto N 4 1/4 = Goon. 13 13/32 or 13/64

Cawny of Manal Clafs-

No. 361 21/64 Cawny of Nunjah cultivated land,

bounded on the West by No. 360 on the

East by No. 363, and on the South

by

Fort St George 19th Febrauary 1844

by No. 347- The old measurement as 2 fields is

S.M. 5-4- or Cawny 21/64 in the name of Baboo-

Row- The present measurement is as follows-

E to W 6 × Sto N 5 1/2 = Goon. 33 or 21/64 Cawny

of Manal Clafs-

No. 362 15/64 Cawny of Nunjah cultivated land, bounded on the

South by No. 361, on the North by Lingasamoodrum

limits, and on the West by No. 360- The old measure-

-ment as 2 fields is S.M. 3-5-3/4 or 7/32 Cawny in the

name of Baboo Row- The present measurement is as

follows-

E to W 5 3/4 × Sto N 4 = Goon. 23 or 13/64 Cawny

of Manal Clafs-

No. 363 7/64 Cawny of Seygal Nunjah land waste under 5 years

bounded on the West by No. 362, on the North by No. 364

and on the South by No. 347, The old measurement

as 1 field is S.M. 1-4- or Cawnies 3/32 in the name of

Baboo Row- The present measurement is as follows-

E to W 2 5/8 × Sto N 4 1/4 = Goon 11 3/32 or 7/64 Cawny

of Manal Clafs-

No. 364 1/8 Cawny of Seygal Nunjah land waste

under 5 years bounded on the South

by

by No. 363, on the North by Lingasamoodrum limits and on the West by No. 362 - The old measurement as 1 field is S M 1 3/4 or 1/16 Cawny in the name of Baboo Row - The present measurement is as follows -

E to W S to N Gowr.

6 × East end 1, Centre 2, West end 3/8 } 2 = 12 or 1/8 Cawny

of Manul Class -

No. 365 1 Cawny of Kunjah Anady Bunjer of above 20 years, bounded on the West by No. 364 on the East by Poonjah field No. 1, on the South by Kunjah field No. 341 - and on the North by a Stream - The old measurement is S M 14 - 2 7/8 or 1 1/164 Cawny in the name of Baboo Row - The present measurement is as follows -

E to W S to N Gowr.

South end 10 1/2, Centre 11 1/2, North end 11/33 } 11 × 9 1/8 = 100 3/8 or 1 Cawny

of Brackish Soil with 2 Palmira trees of which is productive, and 1 Toddy giving tree -

Total extent of Kunjah land measured on the 28th April 1843 is

is as follows

No. of fields - old meast in do - Cawny - Present meast. -

57 — 10 — 20 7/8 — 13 1/2 — 15 11/64 from which deducting 1/4 Cawny of land in 2 nos of entire Poramboke, occupied by Channel, the remaining extent of present measurement is 14 59/64 forming 55 fields as here under particularized -

No. of Cultivated fields — Cawny

26 — 5 37/64. Of which 27/32 Cawny forming 3 fields are of Pottel Class and 4 47/64 Cawny forming 23 fields are of Manul Class -

No. of Seygal fields — Cawny

21 — 5 13/16 Of which 3/64 Cawny in 1 field are of Pottel Class and — 5 49/64 Cawny forming 20 fields are of Manul Class -

No. of Anady waste fields — Cawny

8 — 3 34/64 Of which 2 17/32 Cawny forming 7 fields are of Manul Class and 1 Cawny in 1 field is of Brackish soil -

The

Fort St George 19th February 1844

The Total extent of land measured from 20th to 28th April 1843 is as follows-

Extent of Nunjah Anjacut land according to old measurement	SC. M. M. Cow: 80-15-4 5/8-99 1/32
Do. of Nunjah land entered in the old survey accounts as Nunjah but now measured as Poonjah	SC. M. M. Cow. 49-15-1/2-61
Do. of land entered as Poonjah in the old and present survey accounts	Chains 22-39/64 — 62 2/64 " — " — 123 2/64
Total extent of Nunjah and Poonjah Anjacut land according to old survey accounts	222 25/64

The Total extent of Nunjah and Poonjah Anjacut according to present measurement is as follows-

	No. of fields	Cow.
Nunjah land irrigated by Tanks	302	100 3/8
Poonjah land	63	162 1/16
Total Anjacut according to present measurement	365	262 7/16

Deduct

Fort St George 19th February 1844

Deduct entire Porumboke as follows

	No.	Cow.
Poonjah land occupied by Coo = Leyerooppoo	4	5 1/64
Nunjah land occupied by Roads	1	1/2

No 21.- An Account Shewing the Population &c. as also the Tarum Goshwara of the Village of Therkalundacoolum in the Ottapadarum Talook in the District of Tinnevelly.-

1 Mouzah or principal Village inhabited, called Therkalundacoolum.
6 Muzrahs or Hamlets Viz.
1 Alticolum inhabited.
1 Egathendaman - Do.
1 Coomoolungolum - Do.
1 Sungun Malawarayen Colum - 3 Bachirag or uninhabited.-
1 Coottycolum - Do.
1 Poolyancolum - Do.
6

7 of which Busthy or Coodyerooppoo - 4.
Uninhabited Hamlets ..... 3.

	In Good Repair.	Out of Repair.
Jungle Stream	1	"
Tanks useful for cultivating purposes	2	"
Tanks or Coorumy whose water is used for drinking	4	2

	Good Repair.	out Repair.	
Wells useful for cultivating purposes	3 - 3	4	22 - 8
Wells from which water is drawn for drinking use	19 - 8		

Cattle.-

	Full Grown.	Young.	Total
Cows	117	93	210
Bullocks	222	46	268
Buffaloes	92	23	115
	431.	162.	593.

Goats.	Sheep.	Total.
219.	261	480

Upstair Houses	2	Cultivating Ryots being land holders with Puttahs	27
Brick Roofed	1	Ploughs with 4 Bullocks for each	65
Thatched Houses	113	Ploughs with 2 Bullocks for each	2
	116		67

Tus-deek or Enam for Temples - None -
Oochemamakaeuly Covil in good repair it is supported at the expense of the Ryots -
One Stone Montapum -

Brahamins

No. 39.

Proposed Hookoom Namah for examining the correctness of the measurement made by the Pymashdars.—

Whereas Pymashdars have already been appointed to survey lands of every description viz. Nunjah, Poonjah and Baguet in the District of Tinnevelly, and as there may occur cases in which the Pymashdars may err in measurement by various causes such as, corruption, carelessness, or ignorance and also cases in which the mode of taking measurement of lands, which are not square, but crooked, round, and triangular may be mistaken, and which may cause loss to Ryots, the following rules have been passed for the guidance of Uzmashdars appointed over them.—

1. As each Pymashdar has already been furnished with a Memorandum of the Villages he should pymash, and the Uzmashdar of the Villages which are to form his division for examination, the latter shall examine the lands in his respective division as entered in that Memorandum.—.

2. All lands of Mirasdars, Local Inamdars, and public servants and those bordering on enams, Cuteenghar or Zemindary estates should be examined with particular attention.—

3. Asmashdar should, on receiving the Cowgoo account (fieldwar Measurement) from Pymashdar, proceed to examine of all lands of other people excepting those stated in para 2 which should be examined by actual measurement only by Tuppody) a certain mode of measuring by leaping

over

over) a mere ocular survey, and in cases when it may be stated that any piece or pieces of land have not been correctly pymashed and ascertained and in which case the mode of taking an estimated measurement by Tuffedy or ocular inspection would not answer the purpose, the Uzmashdar should examine such pieces of land by actual measurement. In very large villages not less than 20 pieces in Number and in small Villages ten or fifteen should be examined and also all number of fields or whole Villages of Mirasdars the correctness of the measurement of which may be suspected, and bring every such carelessness found in pymasdar to the notice of Huzoor. Uzmashdar shall be held answerable for his omission to examine any land the measurement of which may be stated to him by any individual to be incorrect.—

4. The ten pymash Mootsuddies appointed subordinate to each Uzmashdar should be distributed over Villages as follows.—

1. As there are large Villages having under each of them 10 or 20 hamlets two Pymashdars for one single hamlet, one Pymashdar for two hamlets or one Pymashdar for a single hamlet should be appointed referring in every case to the number of hamlets depending on the principal Village and the extent of land lying in each of them.—

2. For every large Village having a hamlet

hamlet depending on it two or three Pymashdars should be appointed and the Pymashdars shall, after marking the different divisions to be measured by them respectively by flags or other signs commence measuring their respective portion taking care that the intermediate part of the land be not omitted, but measured and entered in the Account of the respective pymashdar enquiring one with another whether he measured it and carried to his account.—

3. If the Village be a very small one other Villages situated at its neighbourhood also may be given to one Pymashdar.—

4. If the Village has ten or fifteen hamlets each bounded originally by certain marks every such hamlet should be pymashed separately as usual, and those which have not been so bounded, jointly as usual with the principal Villages on which they respectively depend.—

5. In Villages where the lands of different Villages may be situated promiscuously the fields of each Village should be numbered separately and the same rule applies to the Patent lands of a ryot and those Cultivated by Porcody- Uzmashdars are to examine the whole Number of fields in each Village already measured by Pymashdars, particularly those bordering

bordering on neighbouring Villages in order to inform themselves, whether the whole lands of every department have been all correctly measured and carried to respective Account by Pymashdar or not. and in cases in which any may be thought to have been omitted or included in that of a neighbour, the Uzmashdar shall examine all such cases.—

5th Para— Of the cultivated lands the correctness of the measurement of which may be suspected, the Uzmashdars shall examine an extent of 3½ Cawnies in Nunjah land and 6½ in Poonjah land per day and render their respective Examination Accounts as follows.—

No 30 called Nellimuttedy Sai of Ussavien of Tavoy Village situated east to Henuttedy Nunjah of Wonnenesthien examined—

As pymashed by Beem Row of Tenasserim—

Number of rods from east to West. 14 × No. of rods from South to North. 12½ = 175 Square Goontahs. Cawnies 1 Poor 75

As examined by Uzmashdar here enter the Month and day on which it was examined)

× No. of rods from east to West. 15 × No. of rods from South to North. 14

equal to 210 Square Goontahs

Difference in Excess 35

Satisfactory reason for the abovementioned excess should be here given

No.

2 No. 15 called Poolia Muttedy Sai of Sondramien Mirasdar situated South to Coluttoopoja of Govindien examined—

As pymashed by Ram Row of Erode.

No. of rods from east to west. 10 × No. of rods from South to North. 5 =

equal to 50 Square Goontahs — — —

As examined by Uzmashdar (here enter the Month and day of examination.)

No. of rods from east to west 9½ × No. of rods from South to North. 4½

equal to 42 3/4

Deficiency 7 1/4

Satisfactory reason for the abovementioned deficiency should be here given—

The accounts prepared by Uzmashdars in the abovementioned manner should be submitted to Hoozoor accompanied by the Cucha-Nady-Chogn Account in its original rough form, shewing the fieldwar measurement rendered by Pymashdars, they must send to Hoozoor, also one fair Copy of the latter for arrangement.—

6. All excess of land discovered in Nunja by Uzmashdar, if exceeding 5 per Cent of the extent already ascertained by Pymashdar and in Poonjah if exceeding 10 per Cent should be carried to

to his account adding it also to the extent ascertained by Pymashdar, but if on the contrary any decrease less than the above Centage be found, it should be remitted to Ryots. No addition to or deduction from the extent entered in the Pymash accounts should be made, but in presence of respective Pymashdar and the Pymash accounts thus rendered correct, should be submitted to Hoozor attested by the Mirasdars of respective Villages for perusal.—

7 In cases where every field in a Village may be suspected and it may be thought therefore necessary to examine the whole Village, application should be made to Hoozor for Order to commence examination and if the Hoozor shall so order the Uzmashdar to examine, he shall then accordingly examine the whole number of fields in that Village and report the result, also acquainting at the same time by whose carelessness or fraud such difference in measurement took place, and sending the proofs which may be found in support of it for reference—

8. In all cases in which any ryot may complain to Uzmashdar of Pymashdars having incorrectly measured his lands, and in which the Uzmashdar may have found his statement true, the Uzmashdar should carry the difference so found to his account, bringing every such case to the notice

of Hoozor.—

9. All recently enjoyed enams, lands and Moturpha items concealed from account, all excepting of lands held unauthorized; or pottom, poroop, Cutcodgah Shrotriam, Urdhanamnipum, or other favorable tenure, lands fraudulently enjoyed in addition to the sanctioned extent with in the limits of backyards: if found to have been omitted by Pymashdar should be examined by Uzmashdar and brought to the Notice of Hoozoor, and also all conversion of Ponjah land into Nunjah and Baganet, Nunjah lands into Nunjah Baganet, Nunjah into poonjah, or Baganet land, and Baganet lands into Ponjah, lands of one individual entered in account as belonging to another. In cases where any Pymashdar may be found not to have conducted the survey in the manner stated in para 44 of Pymash Hookoomnamah, and carried the lands discoverable into his account, Uzmashdar should examine all such lands, and put the account to right, according to the result of his examination.—

10. If any fraud be suspected to have been practiced by Pymashdar in the measurement of Akebhogum, entire pottum or poroop Villages or of lands lying under a Tank held on favorable

Shares

shares of those deduct as poramboke, the Uzmashdar should examine every such entire Village & Tank and report to Hoozoor, if proved sending also the proofs in support of his statement.—

11. The rods measuring 24 feet each delivered to Pymashdar and Uzmashdars for measuring should be compared every eighth day with the sample rod kept unused, in order to know whether they are of the same extent with it or differ.—

12. The rods must be used by the Canvelgars and Toties of the respective Villages in measuring land, and their hire distributed daily in presence of Nattamagars-Mirasdars and Curnum of the respective Villages, out of the sum advanced to you at the rate of two Pooties each per day and you (Uzmashdars) are to forward Monthly to Hoozoor the Boraward accounts of these people for sanction, accompanied with the account particular of the sum paid to them during each Month.—

13. Uzmashdars shall pay for every thing they may purchase for their private use at the villages they may halt, at the Market rate and nothing without payment either by force, or in any other way or at a price

less than the Market rate shall be received by them.

14 Uzmashdars shall examine the extent of land enjoined in para 5 to be measured by them per day and not examine the whole extent of land coming at that rate per Month on any one of the days during the Month and misrepresent in the account as if it was measured daily at the fixed rate; and never mind, if the land examined by them every day exceed a little or fall short of the fixed extent comparatively, but at the end of the Month, the whole extent at the fixed rate per day should be carefully examined and carried to account. The lands that may have been pymashed during every Month by each Pymashdar should be examined by the respective Uzmashdars during the same and not in different Months. Pymash and Uzmash measurement accounts of every entire Village completed in every month, should be submitted to Hoozoor at one or two different convenient periods of the respective Months but not to be sent in an imperfect State.—

15. The whole extent of lands cultivated, Seygaul turs, Anady turs and Porumboke both in Nunjah and Poonjah, and also of Nattam grounds occupied houses &c., measured by every Pymashdar and examined by the respective Uzmashdars during every

Fort St. George 19th February 1844.

every English Month, the rate of Pay sanctioned and the amount payable at that rate to each individual, and also the pay for each peon and sideward charges should be stated in the Barawird account Monthly forwarded to Huzoor for sanction and the receipts passed by each forwarded with the Barawird account of the next Month.—

16. Umashdars shall forward to Huzoor thro' the Tahsildar once in every Month their respective Uzmash Accounts prepared in the form furnished to them from Huzoor and shewing what Number of the fields measured by each Pymashdar under their respective division were examined by them during the Month, the names of different Pymashdars, and the extent of land measured by them respectively together with the names of the Villages to which the Uzmashed lands may be attached and the Differnce found by Uzmashdar, and take receipts for it from him.—

17 Pymashdars or Uzmashdars are not to force, beat or use any kind of ill treatment towards the Mirasdars or Ryots of any Village nor to confine them on any account.—

18 Uzmashdars shall not employ the Peon under them on their private account. They should bring every instance of carelessness &c. found in the Peons and Pymashdars in discharging their respective duty to the Notice of Huzoor.—

Tinnevelly ———
Tenegusy ———
30th September 1843.

/A True Translation/
/Signed/ C. B. Thomas
Collector.

Fort St. George 19th February 1844.

No. 40.

Translation of the Pymash Hookumnamah proposed to be adopted in the District of Tinnevelly

Para 1 As since the assumption of the District, nothing has been done to fix the mail-warem and assessment of each field with reference to the fertility of the soil and as under the present system the Ryots pay the same teerwah on bad and good soils and as the want of defined boundaries to Villages has been found to produce great inconvenience both to the Ryots and to the Government and to afford facility to commit fraud, to the prejudice of them both, and as this last is more severely felt in cases of boundary disputes when from want of known boundaries it is often found difficult to ascertain to which Village the disputed land belongs, and as these circumstances combined, have always given rise to numerous complaints to the Government have determined, in order to promote the welfare and interests of the Ryots that all the lands in the District be correctly measured and classified and each field numbered and the assessment thereon be fixed permanently

Fort St. George 19th February 1844.

permaisiently with reference to the capability of the Soil, as also that permanent boundaries be fixed to Villages &c. After the assumption of the Tinnevelly District Nunjah lands were continued to be measured by a rod of 7½ Carpenters' cubits or 20½ English feet in length, a square of which was considered to be 1 Puddy, 8 of these Puddies a Mureal, and 21 of these Mureals or 168 Puddies a Cottah or 70,602 square feet, and Poonjah land with a chain of 398 feet in length, a square of which was equal to one Chain or 158,404 Square feet Thus the Standard of measurement for Nunjah and Poonjah lands was different, and as much difficulty was experienced in preparing the accounts, the old standards of measurement in use in the several Districts, were abolished and a new general measurement by acres and Cawnies, introduced for survey. the effect that followed the adoption of this measure was, that the Ryots clearly and easily understood, the new standard and the relative quantity to the old one, and the preparation of accounts was greatly facilitated In order that the Ryots of this District may enjoy the same benefit, the Government have determined to conduct the Pymash of this

Fort St. George 19th February 1844.

this District with a rod of 24 English feet, a square of which or 576 square feet make one Goontah 100 such Goontahs make one Cawny or 57,600 feet One Cottah of Nunjah land measures 1 7/32 Cawnies and 402 feet or 1¼ Cawny nearly and one Chain of Poonjah land, 2¾ Cawnies nearly For measuring the land a rod of 24 feet long is given, sealed at both ends This rod is divided into 16 parts and marked, one Sixteenth part of it makes 1/16th part of a Goontah &c In measuring the lands with this rod, according as they lie in a square straight or crooked form, you should enter the measurement in the accounts as follows.—

E. to W. L. to N. Sq.ft. Goontahs

12½ × 10 = 125 or 1¼ Cawny

What lands are to be considered as Nunjah or description of Nunjah or Wet lands.

2d para. You will first ascertain what are wet lands and then measure them.—

Lands watered by Channels

1.

branching from the River Tambraporny

by

Fort St. George 19th February 1844

by Ayacut Tanks supplied by those branch channels, by Pomacoolum Tanks filled by the rains by the surplus of Tanks and Channels as also from wells by means of swings and from springs, and always cultivated for a wet Crop, only in the Cara season, for 2 wet Crops in Cara and Peshanum, and for a wet Crop only in the Peshanum season, is also seygal or cultivable lands yielding a wet Crop the first time, and cultivated a second time with Nunjah mail Poonjah by the assistance of the abovementioned sources of irrigation, should be considered as Nunjah and entered in the accounts as such and afterwards the survey made.—

2 As the Nunjah Waste lands having old marks or bounds and Anadi: Punjer, having those marks effaced, which are attached to the Anyacut of, and lying under Tanks Vsa in good condition, can be brought under wet cultivation to some extent in each year, in proportion to the supply of water and more in places where extensive repairs are executed to

Tanks

Fort St. George 19th February 1844

Tanks Vsa you should include such waste lands under the Head of Nunjah and measure them—

3 Waste lands having no marks or bounds to distinguish them, and lying under Tanks Vsa are entered in the Ayacut as Nunjah, but as these will be in a damp state, when the neighbouring fields are cultivated no dry cultivation can possibly be carried on in them Therefore lands which are considered fit only for wet cultivation according to the supply of water obtained should be entered and measured as wet.—

4 If the lands which were formerly entered in the Anyacut as Poonjah, were by the assistance of the above mentioned sources of irrigation, afterwards cultivated every year with wet grain such lands should be entered and measured as wet.—

5 Lands entered in the anyacut as wet and having a constant supply of water are in certain Villages Cultivated with Vomipyre or Garden produce and also with Nunjah mail Poonjah produce—These lands together with Lands occupied by Sugar cane and Betel plantations, should be entered and measured as wet.—

In

Of what description are the lands called Nunjah Shattahaul

3d para In the midst of fields and in lands enclosed with hedges which are entered in the Anjacut as wet, there stand Cocoanut Areca, Jack, mango and other species of trees as lands thus occupied by Trees cannot be cultivated as wet, they should be entered as Nunjah Shattahaul and measured as such— If the trees stood close to each other and if there were also vegetables growing under them it should be so specified in the Column of Remarks —

Description of Poonjah or Dry Land—

4th para The following will be your guide for ascertaining the Poonjah lands and measuring them —

1 Lands entered in the Anjacut of Fusly 1212 as Poonjah whether since cultivated or not, should be entered as Dry

2 Lands in certain Villages, which were not cultivated as wet from the Tanks which supplied them with water having fallen into decay before Fusly 1212 but since cultivated with Nunjah mel poonjah by the falling rains and taxed with Nunjah mel poonjah teerwah are entered in the Anjacut and Survey accounts of Fusly 1212 as Nunjah; but as these lands cannot be brought

brought under wet cultivation unless some repairs are executed to the Tanks, they should be entered and measured as Poonjah —

3 If the lands, which from their lying under Tanks Vcd. were entered in the old Survey accounts as Nunjah were in after periods cultivated with dry grain from those Tanks Vcd. having become unserviceable, such lands if from want of sources of supply, cultivated with dry grain during the last 5 years, should be entered and measured as dry, again if this sort of lands, which always had the means of supply, were cultivated with dry grain from a failure of the supply of water in some one or two years during the last 5 years, then such lands should be measured and entered as wet, because in places where such lands are, some efficient measures will be adopted for improving the means of supply there at an early Period —

4 If the lands originally entered in the Anjacut as Poonjah were subsequently cultivated with Nunjah and

and Nunjahmailpoonjah by the assistance of any source of irrigation and of the same were afterwards from some cause or other cultivated with dry grain or laid waste, such lands should be measured and entered as Poonjah, because they cannot be converted into Nunjah or Shottakaul unless some means of supply are provided.

5 Certain lands situated on a high level were from their lying adjacent to the wet lands irrigated by Channels, Tanks wells &c. inclosed with wet lands and measured as such. But they never were cultivated with wet grain nor is it possible that they can be converted into Nunjah or Poonjah Shottakaul even at the expense of a great trouble for their improvement. In measuring these lands you should be careful in ascertaining the above particulars and in getting accurate information as to the previous state of the soil. If on enquiry you find that the lands were cultivated as wet or as Shottakaul only in a certain year in which there was an extremely unusual fall of rain and not in ordinary years

years and that they are only fit for Dry &c and not for wet cultivation, in such cases you will measure and enter such lands as Dry

Description of Poonjah Shottakaul land.

5th para You will first ascertain of &c what description the Poonjah Shottacal lands are and then measure them.—

1 Of the lands entered in the Nunjah or Poonjah Ayacut of those on high grounds which were never cultivated as wet of the Garden or Shottacoorroo lands as also of the Nunjah and Poonjah Poramboke attached to the Nuttums (Villages where ploughmen and low caste people live) &c such as were not hitherto non will &c hereafter be cultivated as wet without difficulty are not to be entered as Nunjah or wet because they are not situated on too high a level to be watered constantly by the channels or other sources of supply enumerated in the margin, &c

1 Branch channel from Tambaraipoorny Vellaur rivers
2 Agapat Tanks fed by these branch channels
3 Pinacolums
4 Water obtained from channels & and Tanks by Baling
5 Draw wells for Dry Lands
6 Water obtained from Ponds by Baling and by means of Swings
7 Water obtained from Springs by means of Baling Baskets

from

Fort St. George 19th February 1864

from all which but deficient supply of water can be obtained — These lands may have been sometimes in extremely favorable Seasons cultivated as wet but not always, you will therefore, if the Ryots dividing those lands into fields or enclosing them with walls or hedges cultivate them with Sweneric Potatoes, Plantains, Tobacco Onions Garlic and other Plants or Vegetables as also with Raggy, Ratcheny, Varagoo, Redgram and other kinds of pulse or if the lands were occupied by Betel and Sugar cane Plantations, enter such lands as Seygal or cultivable Poonjah Shattakaul —

2 If the same lands above mentioned having the advantage of the above mentioned 7 sources of supply which have for a series of years been cultivated with the plants and Vegetables aforesaid, were left uncultivated for one or 2 years previous to the current Fasly either from the Ryots want of means of cultivating them or from negligence on his part or from any other cause and if it appears to you that those lands can hereafter be cultivated with the abovementioned species of Garden &

Vegetables

Fort St. George 19th February 1864

Vegetables &c. you will then make a strict enquiry with the Meerasidars and ask their opinion regarding it and if you are satisfied that the lands will be brought under cultivation with ease you will then enter only such portion under the head of Shattakaul waste, as on examination of the means of supply of water, you think, can be brought under cultivation and the rest you will enter as Poonjah or dry land

For cultivating the Poonjah &

3 Shattakaul lands with poonjah and garden produce, the Ryots of the Streevelly pootoor, Sattoor Ottapedarum Bremmadasum, and other Talooks sink wells at their own expense for water in Poonjah lands or use the water of Old wells or that of Draw wells but these lands are in the Streevelly pootoor and Satoor Talooks assessed with the Dry land tax while in Sherkerminarcoil and other Talooks they are taxed with the Nunjahmail Poonjah teerwah You will therefore enter as Shattakaul only such portion of Poonjah land as was cultivated with Shattakaul produce by the assistance of well water and by the supply obtained from the above mentioned sources, but you are in no case to enter the adjoining Poonjah lands as Shattakaul land under a supposition that the former will hereafter be cultivated as with

with Garden produce

4 If the Pottakaul lands lying waste from time immemorial were found on inspection to be so situated as not to derive irrigation from Tanks, Channels, wells &c., so unless extensive repairs are executed to them, the lands should be measured and entered as Poonjah but if the above lands were susceptible of Cultivation by the assistance of wells in good repair then, they should be entered as Pottakaul.—

6th para For each of the fields attached to Nunjah and Nunjah Pottakaul and Poonjah and Poonjah Pottakaul, the sources, from which it derives irrigation, should be distinctly shewn in the Accounts together with the original sources of the Tanks Channels &c. If a field had 2 sources of supply they also should be specified with their names, as also that it is one Crop Carr land, or one Crop Peshanum land or land yielding 2 Crops. It should also be shewn that the Land yields the 1st Wet Crop or Kottaby in Carr and the 2d wet Crop or Thalady in Peshanum that the lands yields the first time a wet Crop in Carr and the second time a Nunjahmail poonjah Crop in Peshanum &c and

and that the land yields the 1st time a wet Crop in Peshanum and the 2d time is cultivated with Nunjahmail Poonjah or Vompyre or Garden produce in the Carr Season, and so on for every field of Nunjah Nunjahmail poonjah and Vompyre yielding one or 2 Crops.—

The names of the Proprietors of the lands and those of the Cultivating Ryots.

7th para For each of the fields of the abovementioned 4 descriptions of land it should be shewn with their names that such a person is the Meerasidar or land owner, such a person is the occupant under such right of occupancy and such an one is the actual cultivator and that this cultivator is the proprietor or a mere occupant or that he is a Pooracoody or under cultivator For every field it should also be shewn in the Accounts that the land is Pungoo: valee - Buttavitty Samoodaya condaeryem, Peroom: but or Desacavil as the case may be.—

Draw wells

8th para The wells sunk in Nunjah Nunjah Pottakaul lands and in Poonjah Pottakaul lands whether unserviceable or in good repair, whether built with brick in Chunam or masonry, whether single Capalies wells/walls from which water is drawn by Bullocks by means of Pulleys/ or Double Capalies wells, whether

wells

wells with one swing or wells with 2 or 3 swings, should be entered as such against the field in which the wells are situated.—

The trees in each field should be entered.

9th para The number and species of Trees growing in Nunjah Thottakaul and Poonjah Thottakaul and also in Puramboke lands &c. whether productive or unproductive should be inserted in the Survey accounts

What lands are subject to full and what to favorable assessment and what are Inam lands

10th para The mode of specifying in the accounts every field of Nunjah, Nunjah Thottakaul, Poonjah and Poonjah Thottakaul land subject to full or favorable assessment is as follows

1 Such of the Poonjah lands as pay Poonjah teerwah and such of the Nunjah lands &c. as pay full mailwarem should be distinctly specified in the Survey accounts

2 Such of the Poonjah lands as are favorably assessed and such of the Nunjah lands as pay mailwarem at a favorable rate should be specified in the Survey accounts

3 You will enter every field in Nunjah and Poonjah lands paying a Cutgootah or quit rent as such in the Survey accounts.—

If

4 If there were under the head of Nunjah and Poonjah, lands held on a Poroopootenure you will enter them as Poroopoo lands, and if there were Nunjah or Pottem lands paying a favorable grain assessment these should be entered as Pottem lands.—

5 There are some lands yielding 2 Crops of which the produce of the 1st Crop goes to the Circar and that of the second is remitted in Inam to certain persons. In cases of land of this kind you will specify in the Column of remarks the 1st & 2d Crop the produce of which the Inamdar or Pottemdar enjoys.—

6 If there were survamaniem or lands or Mauniem lands on which a trifling sum is received by the Circar under the name of Mailveipoo, you will specify them in the accounts.

7 In Villages where Thoolavady Pottem lands (or lands favorably assessed in consideration of the trouble the Ryots undergo in drawing water from wells by means of swings) exist you will ascertain whether the Ryots holding this description of land pays Pottem or warem and that whether in Carr or Peshanum and specify the same in the accounts. In addition to the above you will also enter the following particulars.—

You

3200- Fort St. George 19th February 1844

You will ascertain when and in whose names and for what purpose the maniems and other Indulgences such as Reyayut Cutgootah Pottem and Poroopoo, were originally granted and who enjoy them and who cultivate the lands thus held on favorable tenures and whether or not there is any sunned in support of the claims set up to those privileges and enjoyments. you will also pay strict attention to the following detailed instructions.—

What Lands are those termed Seygal.

11th para. Instructions as to the manner in which the Seygal lands in the Talooks to be surveyed, should be ascertained and the survey conducted.

1 You will enter as cultivated every field that was cultivated in Fusly 1251.

2 If one fourth part of a field was cultivated enter and measure the whole as waste.—

3 If half of a field was cultivated and the other half left uncultivated, you will measure it as two fields numbering the part cultivated and that laid waste separately.

4 If 3/4 part of a field was cultivated and the remainder laid waste measure and enter the whole as cultivated.—

Of

3201- Fort St. George 19th February 1844.

What are waste lands?

Of the 3 descriptions of land Viz. Nunjah, Poonjah, and Puttacaul you should find out, what sort of land can properly come under the Head of Punjer or waste and then measure it.—

1. In the account of measurement of waste lands, you will enter lands laid waste for 5 years ending with Fusly 1251, as Seygal, or cultivable waste, you will also enter the name of the Ryot who last cultivated this waste land. If this last cultivation was made by a Poracody, or under cultivator, then you should enter his name. If the person who last cultivated the land has transferred it to others, either by sale or by Mortgage, then the name of the purchaser and Mortgagee should be also entered.—

2 In measuring the waste lands they should be classed as follows—

Waste of 6 to 10 years.
Do. of 11 to 15 years.
Do. of 16 to 20 years.

You need not enter in the Survey accounts the names of the Ryots who cultivated these

Fort St. George 19th February 1844

these waste lands as it is difficult to ascertain them accurately, but if you can get the names readily by means of the Curnums you will do so, and enter them in the account.—

3 All lands of more than 20 years waste and Anady Punjas that were never cultivated, should be entered and measured as Anady waste.—

Safe lands. 13 If the Punjah lands occupied by a thick grove of unproductive and unproductive trees, were found unfit for cultivation, from their being undrained, you will then enter them as Safe lands.

Sadlands. 14 The Rules to be observed in measuring lands occupied by Palmira trees and in classing and counting the trees are as follows.—

1 If the fields containing Palmira trees were formerly measured and the trees counted separately, you will do the same now.—

2 If formerly and now these lands belonged to a particular Pyot, you will

Fort St. George 19th February 1844

will enter them in his name.—

3 If a field was formerly and now in the enjoyment of several persons then, you will divide it into as many pieces as there are partners, and number the fields thus. No. 1 in 1-2 in 1 and so on. You will also cause each field to be marked by boundary stones, in order to distinguish one from the other.—

4 If a field formerly occupied by one person were now from some cause or other enjoyed by several persons, you will divide it into the requisite number of fields and number them 1 in 1. 2 in 1 and so on.—

5 If a field were now occupied by a few of the Pyots in the Village, or by the whole of them collectively, you will specify the same in the Column of Remarks.

6 You will ascertain whether the Trees are rented by the owners to others for a fixed sum or the owners get Sawmyboguns, at so much per tree, or whether they rent out the whole number of trees for Sawmy Boguns and who are in the receipt of Nadaccor (a certain deduction

Fort St. George 19th February 1844

deduction made from the Government demand in favor of the persons who originally [illegible] the trees) and state them in the accounts.

7 If the lands were entered in the accounts of one Village and the tax in the other, it should be so specified in the Survey accounts.

8 In a few instances lands containing Palmira trees are cultivated every Year, or every two years alternately, such lands should be entered in the Survey accounts as Seegal Punjah Lands specified by a young leaf giving Palmira trees &c. are now from the trees not admitting ploughing, unfit for cultivation, but as these lands can be brought under cultivation hereafter they should be entered and measured as Punjah lands under shade.—

What are Poromboke lands } 15

You should first find out what are Poromboke lands and then measure them.

1 Ansany Poromboke. Poromboke lands having owners.—

1 Banks of Nunjah fields of lands and [illegible] Small

Fort St. George 19th February 1844.

1 Small channels irrigating Nunjah lands.

1 Rocks and High grounds in the middle of fields.

1 Nunjah or Poonjah lands under the shade of productive or unproductive jungle trees, are unfit for Cultivation.

All Poromboke lands of these Kinds should be measured at the same time that the Nunjah and Poonjah lands are measured and entered in the Survey Accounts as Ansany Poromboke.

Small wells in the Midst of Nunjah fields.

Rocks, brooks, upright stones and wells in Poonjah lands.

2 Entire Poromboke lands having no owners.

1 Nutham, Dwelling houses and other buildings.

Backyard of houses &c.

1 Temples, Choultries.

1 Bungalows.

1 Pasture grounds, Forts, Ditches and

1 Topes or groves.

Streets.

1 Public roads

Bathing

Fort St. George 19th February 1844

1 Bathing Tanks, the extent of the Tank banks and the highest water mark

1 Threshing floors and Granaries

1 Irrigating Channels running in the midst of Nunjah lands.

1 Subsidiary Channels of Tanks.

1 Pholavady wells.

1 Streams.

1 Shops.

1 Burying grounds.

1 Mosques.

1 Brackish Soil unfit for cultivation.

1 Tanks, the extent of the Tank banks together with the highest water marks should be specified.

1 Hills and Hillocks.

1 Public Offices.

1 Flower gardens.

1 Water Sheds created for subsisting the thirsty with drink.

Places inhabited by Brahmins

In some Villages Cooly Serroofers, dwelling houses and other buildings are entered in the old Survey Accounts as

Fort St. George 19th February 1844

as Nunjah and in others they are entered as Poonjah. You will therefore measure them in conformity with the orders given below.

1. If it is likely that any lands now entered as Punnuboke, which have Nunjah Cultivation and Tanks &c. in its vicinity can hereafter be brought under wet cultivation, such lands should be entered in the Survey Accounts as Nunjah Punnuboke.

2 If it is likely that the Punnuboke lands having no sources of subsisty situated in its environs, can hereafter be brought under dry cultivation, such lands should be entered as Poonjah Punnuboke.

3 If when the tanks are dry or when the water in the tanks is subsiding, the bed thereof was in a state fit for cultivation then so much thereof as was cultivated and left uncultivated should be entered in the Survey Accounts as cultivated, and as waste respectively, and not as Punnuboke, but if the beds of

Fort St. George 19th February 1844

of the tanks were never cultivated with Nunjah - nail poonjah, such beds of tanks together with the watery part thereof, should be entered as Punnubeke -

4 It appears that there is no rule for prescribing the limits of backyards of houses. The old Survey Accounts appear to be a Confirmation of the former one, but on the 10th March 1827 Mr. Munro the then Collector, issued an order to that effect that the Cultivating Ryots should have backyards of treble the length or breadth of their dwelling houses - which ever is more and that persons of whatever caste they may be, should if they were not cultivating Ryots, have only double the length or breadth of their dwelling houses and that lands beyond these limits should be considered as liable to payment of rent to Government - You will therefore measure the backyards of dwelling houses, in the following manner

1 For the dwelling houses of every description the dimensions of the buildings and the extent of the backyards

Fort St. George 19th February 1844

should be measured and entered in the Survey accounts in which the difference between the old measurement as made in the time of Mr. Munro with reference to the foregoing restrictions, and the present one, should also be stated -

2 If, besides the dwelling house and its backyards, the householder had used any other lands as backyards, such additional backyards together with the extent of the lands cultivated, and waste with trees thereon, should be measured and entered separately. You will also enter the bullock stables if any in the accounts -

3 If waste lands liable to Government tax were joined to houses and backyards entered as such in the old Survey accounts, such waste lands should now be attached to the field to which they formerly belonged and then measured -

You have no occasion to measure the Hills, beds of Rivers and Channels but you should enter their extent by estimate - There are on the Tencausey

Fort St. George 19th February 1844

Tenacawey Hills situated on the border of a foreign state some lands cultivated with Poonjah, which you should measure taking care to ascertain by enquiry in whose limits the lands are situated. The order is applicable only to those Hills and not to the other Hills. The other Hills should not be measured but you must as above directed enter the extent of Hills by estimate. In measuring the Hills in the Tenacawey Talook, you must enter in the account the extents of land cultivated and waste.

16 Form of Moochilka.

To The Honorable Company

Moochilka executed by the undersigned Mahajanums, Meerasidars, Nattangal, &c. Cummums, head Cavilgars and other inhabitants of the Village of Kondacolloy attached to the Talook of Sattoor.

We hereby binds ourselves to furnish to the best of our knowledge Ramachendriah, the Poonah Moottasuddy, who is come to measure the lands of our Village with true and accurate

information

Fort St. George 19th February 1844

information on all matters relating to the lands of our Village and on such points as he requires.

1st Lands suppressed in the Summahbundy accounts of last year shall be brought to light.

2d We shall give true information regarding the Inaums, Pottems, Sarvapoot, Cuttygottahs, Peyauts and other indulgences enjoyed by Individuals from the time of the Carnatic Government to that of Nabobs and afterwards down to the present time.

3d Regarding the Inaums and other indulgences granted since the abrogation of the District by the Honorable Company, together with the authority and date on which they were granted.

4th Regarding Inaums enjoyed without authority and regarding the Inaums misappropriated.

5th Regarding the Inaums not enjoyed by the legal representatives of the original grantees.

6th Regarding Circar Warapoot lands enjoyed rent free on the grounds that they belong to the Inaum lands.

Regarding

Fort St. George 19th February 1844

7th " Regarding the enjoyment of lands different from those originally granted in Cowm

8th " Regarding enjoying fields different from those on which Pellem (a favorable grain assessment) and Parcoffee (a favorable Money assessment) was originally fixed-

9th " Regarding the concealment of Circar lands alleging that they belong to the Anjacent of another Village

10th " Regarding appropriating to our own use the funds derived from Nanniam and other favorably assessed lands granted for the maintenance of certain Charities-

11th " When Punjah and Peerah land are measured by fields, we will tell for Punjah the class to which each field belongs and for Punjah of what sort of soil each Punjah field is-

12th " We will truly tell that such land is Sircar land and such land is Nanneum land

13th " We will also tell that such land has such source of irrigation, and that such land is one Crop land and such is 2 Crop land-

14th " Star lands and Palmirah trees &c. we will tell the names of the rightful owners-

15th " We will shew the true boundaries of our Village. We will also give true informations on such other points besides the above as are requisite. On the contrary if we fraudulently give false information to the detriment of the Circar we hereby agree to undergo such fines and examination and proof will be awarded against us-

We

Fort St. George 19th February 1844-

Who should be present at the time of measurement-

17- As the survey should be conducted publicly the persons that should attend you during the measurement are-

1- Nattamgars of the Village-
2- The whole of the Merasidars of the Village-
3- Cowmoms employed by the Merasidars-
4- Circar Number Cowmom-
5- Totty Tundulgars, Head Cavilgars, and other servants of the respective Villages-
6- Poracoody Cultivators of the respective fields-
7- Merasidars of the neighbouring Villages-
8- Pymash Peon-
9- Measurer-
10- Boundary Markers-

These should be present with the surveyors- Orders to this effect have been sent to the Tahsildars- You should give timely notice to all the Merasidars in order that they may be present at the measurement of their respective fields- You should also inform them that if they failed to attend you at the time of measurement, their lands will be measured without them and that therein complaint that the measurement of their fields is not fair will not be attended to- If a Merasidar possessed lands in 2 or 3 Villages, he should depute his agent with a power of attorney executed on Stamp papers when

then his lands will be measured in the presence of that agent.

To fix the Boundaries of a Village on the 8 Sides.

18. Before you proceed to measure a Village you should examine its site and find out how far it extends on all 8 sides and then enter the Villages as being bounded on the 8 sides thereof by such and such Villages and by such and such marks in the following manner.

1. The Village of Nelliambalum is bounded by Periar Jambrapoorney on the East, and situated to the West of Deetchasamoodrum Sindoopoondary.

2. Bounded by Coorookootary Agrahaarum on the South East and situated to the North West of the Nelly Tope in Coorpentory attached to Veerangandapoorum.

3. Situated to the North of Nanarayanum on the South.

4. Bounded by Coomaloor killock on the South West and situated to the North East of Soothamally Boundary stone.

5. Situated to the East of the Village of Veeranda Chitty of Poothupatty the Poonjah fields of Nanarayanattum. the Bank of the Canavailmeadum Tank and the Aruy eolum Pottelroad all on the West side.

6. Situated to the South East of Pothapatty Veeramapilly Mutum and the Bank of the Veeracotty

Veeracotty column both in the North West side.

7. Situated to the South of Yalandercolum Poorawoo. the Stream and the Poonjah lands of Podoocolum on the North side.

8. Situated to the South West of the Poonjah land under commalum column the limits of Saithooroya pootoor, the Tany column Chettrum, the Boundary stone of Carayeroopoo and Sachenoor, all on the North East side.

Within these boundaries is the Village of Nelliambalum Cudak attached to the Nelliambalum Talook thus observing the boundaries on the 8 sides with your own eyes you must write them down in your accounts. If there were boundary stones fixed these also should be noted down.

You must begin measuring a Village after you had fixed flagstaff on the 8 sides of the Village conspicuously you must specify in the accounts that the Village you are about to measure is a Pottom one, or Poroopoo, or Suruva Maniem or Irupany Village or Chettrum Village or Cotyoodah one or Warapul or Yagapoguum or Palaiyam Village or Pungoovaly or Puttavaty, or

or Circumjacent Village.

When the measurement should be began.

1st When you proceed to measure a Village you must begin your measurement on the East side where you will find with Circar land, and next to it you will find Inamdars land, next to it waste land and next to that Pannaiha land these several descriptions of land will be blended together you will therefore measure them in the order in which you find them situated.

The land first measured should be marked with No 1 that next measured with No 2 and you will go on numbering the lands consecutively as you measure them and the last number should end the place where you began with No 1.

2d In measuring the lands you should be very careful not to leave any land unmeasured.

For each sort of land the Boun- daries thereof on the 4 sides should be specified.

3d When you measure the lands in the order in which they are situated you will for each number of Circar and Poorvjah lands enter in the accounts the bounds with which and

each land is situated thus, East of the Parra- chady field South of Ramen's land West of Posthathan's land and North of Caramaidy land is the land of such number.

Of the mazrahs or hamlets attached to a Mouza or principal Village.

21. Some are situated within the limits of their own Mouza and the others within the limits of another Village in another Talook In the same manner the lands of one Village are within the limits of another. It appears from the old survey accounts that Mouzahs and Mazrahs were measured separately. If the lands attached to one Village were situated in the limits of another then such lands called Hadjca- lapoo were formerly measured as if they were attached to the latter Village and afterwards deducted from the accounts of this Village and entered separately as land belonging to another Village In mea- suring lands of this kind you will attend to the following instructions.

1. If the Mazrahs situated within the limits of a Mouza to which they are attached were formerly measured either together with their Mouzah, or separately, you will now measure and number the lands

laide both in the Mouzahs and in the Muzrahs continuedly because all the lands in a Village should have a consecutive number and then enter in the accounts only the Total of the Muzrah lands with their respective boundaries separately- The Total of the Mouza lands should be entered including the Total lands of the Muzrahs-

2- If when measuring a Village in the manner abovementioned the measuring rod comes to the limits of a Muzrah Village you will then enter the boundaries on the 8 sides of it and when the measurement of this Muzrah is finished, you will enter the total lands of that Muzrah-

3- If when fixing the Boundaries on the 8 sides of a Mouzah Village in the limits of which other Mouzah or Muzrah Villages whether in the same or in another Talook are situated: you find the lands of this Mouzah Village to be measured situated within the limits of another Village you should enter the Total lands of the former Village including its lands so situated in another Village and then deducting from this Total the lands so situated in another Village under the head of "Transferred to another

another Village" enter the remainder to which adding the lands of other Villages situated in the Mouzah Village, the total should be entered. afterwards the Mouzah Village should be measured beginning from No 1 and when the measuring rod comes to the limits of the Muzrah of the other Village you should in the presence of the Curnams and Merasidars of the Muzrah Village and Mouzah Village fix the Boundaries of the above Muzrah Village on the 8 sides and then measure it in continuation of the last No of the Mouzah Village- In the daily Goshwara account and in the Village Goshwara account the total lands of each Muzrah Village attached to another Village in the same Talook as also the Total lands of each Muzrah Village in other Talooks should be entered. When the measurement of the Muzrah Villages of other Mouzah Villages is finished, you should get from the Curnams the survey accounts of these Muzrah Villages and after comparing them properly with those you have, you should cause the Merasidars of the both Villages to affix their signatures to them and you also should sign them.-

4- You should observe the same rules with respect to lands situated within the

the limits of a different Village from the one to which they are attached.

The survey may be made with reference to the old survey accounts.

22- The Nunjah and Poonjah lands were formerly measured specifying the Cuttaly the Cunnam and the name of each field You will in the same manner now enter the Cuttaly, the Cunnam, name and the No. of each field. If the Aloogoo was not formerly conducted methodically or in order, you will now measure the lands in order beginning from No 1 and continue your measurement round from the right-hand side till you reach the last field to which the last number should be given-

The names of the lands should be inserted-

23- Each field of land, whether cultivated veygal or cultivable Waste land or anadi waste lands has a certain name given to it which you must enter- If a field have no name given to it you will in concert with the Meerasdars, the Cunnam the accountant and the Cultivator, and with reference to any visible marks near or about the field give it one-

Large Poonjah fields should be divided into such No. of fields as is convenient-

24- Some of the Poonjah lands were formerly measured dividing them into large fields which are cultivated only by the rich Ryots, such large fields cannot be cultivated by a poor Ryot- You will therefore divide such large fields into such number of fields as a Ryot possessing one or 2 ploughs can possibly cultivate and then measure them in the following manner-

Extent of Poonjah land which as rich Ryot can cultivate as one field- } Sq. Coontahs 11,500-

This 11,500 Square Coontahs of land can be cultivated by poor Ryots having one or two Ploughs only in the following proportions and they should be divided and entered thus 4,000 Coontahs in one field, bounded on the South by Velappen Poolianmarum Poonjah field, on the West by Pungien Poonjah in the Tank bed, on the North by Ully Marum Poonjah field belonging to Vanoonien and on the East by Cul-pauray Poonjah field belonging to Soobien-

3800 Do. Do. within such Vauch boundaries-
3700 Do. Do. within Do.
11,500-

In this manner you should ascertain from

Fort St. George, 19th February, 1846.

from the Meraseidars the extent of land divided into large fields and dividing them into such No. of fields as is convenient measure them. If the lands were formerly measured dividing them into fields of such an extent, as a Ryot possessing one or 2 ploughs can cultivate. You are to remeasure those fields letting them remain in the same state provided they were not altered. If the fields contain less land than a Ryot possessing 1 or 2 ploughs can cultivate, they should be measured in the same state. It is not necessary that each field of land named Carsel Vayal should contain more land than is hereinder-mentioned.

		Seygal land. Cawnies.	Podungalunte or land left to rest after once cultivated. Cawnies.	Arudy cawnies.
1 Caresel.				
2 Veppel.	}	6	6	20
3 Pottel.				
4 Shaul.				
5 Manul Shaul.	}	8	8	30
6 Manul.				

25. A field of Poonjah Hot Ware should not contain more than 3 Cawnies.

Fort St. George, 19th February, 1846.

26. A field of Punjah land should not contain more than 4 Cawnies.

Poonjah field should be marked by banks of earth.

27. In measuring the Poonjah fields in the manner abovementioned they should be marked by Pulles or banks of Earth as follows.

1st In dividing caresel or black land you will mark the Division by setting up Boundary stones because the Pulles or Bank of Earth would would injure the black land by overrunning it with long rooted grass. If the fields were square the Boundary stone should be fixed on the 4 sides. If they were of unequal sides, the Boundary stones should be fixed in such a manner as is adapted to the case.

2d If fields of other classes of land were enclosed with hedges, you should cause the enclosure to be strengthened. If they had no enclosures around them, you will cause banks of earth to be made round them and the boundary stones fixed. You will also cause different sorts of Trees to be put in the banks of the fields to serve for marks. When the trees grow large, they will supply

sufficiently the Ryots with materials for
Implements of husbandry-

3rd. As the contents of each field
and the Berij thereof according to its
class should in future be permanently ascer-
tained, and as the Ryot is required to
cultivate a field to the full extent and
pay the full Teerwah thereon according
to the rate fixed for that field it is of
great importance that each field should
be properly marked by boundary stones-

Each field should be di- 28- A large field or
-vided into not less than having unequal sides
3 Tanks and measured should be measured in
accordingly- three different ways, di-
-viding it into not less than 3 portions
or Tanks- If it was measured dividing it
into less than 3 Tanks the Coontahs
or Pits cannot be accurately ascertained-
You will therefore divide such large
fields into such number of Tanks as
is requisite and measure them accord-
-ingly-

For each field the old mea- 29- As the Nunjah and
-surement should be en- Poonjah fields were formerly
entered- measured shewing their extent
in Cottahs and Chains respectively, you
will now enter that measurement
in S. 6. and in 6 chains with a

their equivalent in Cawnies and the extent of the pre
new measurement only in Cawnies. If one large
formerly were now divided into several fields,
will then enter for the new fields, the old me
-surement, and the new measurement as now se
-rately made.-

Broader Banks of Nunjah fields should be deducted- 30. In measuring
the Nunjah fields, if they
had banks of less than one foot in breadth, th
Banks should be measured together with the
fields- But if the banks of the fields were
broader than one foot they should be measu
together with the field but afterwards deducte
from the field and entered under the Head of
Awsamy Porumbokes.-

The subdivisions of each field should be specified- 31 Each field con
-tains one or more Thadies
or subdivisions- you
will therefore specify the number of Thadies whi
each number of fields contains.-

In measuring the Nunjah Ma
32 Poonjah and Totacal waste Lands you shou
enter in the Survey Accounts the old names given
them, and any old indelible marks. If Anady
waste

waste Lands had no such marks about them then you will new measure them distinguish-ing them by any new marks and boundaries-

Hours of Measurement- 33 You will daily measure the Lands from half past 5 in the morning till ½ past 10 O'Clock and from that hour till 2 O'Clock you and your Colleagues should after taking meals employ your time in comparing the Accounts. At 3 O'Clock you will again com-mence measuring and go on till it is 6 O'Clock and from this hour till 9 O'Clock in the night you should prepare the Accounts-

34 Where the Measurement ends daily there you should cause some earth to be heaped and the heap marked with some wooden Stamp in order that you may know whence to begin your measurement the next day. you should also cause the heap to be cover-ed over with a pot to prevent its being destroy-ed by rain or wind

Extent of Land required to be measured daily.- 35 The extent of Circar and Moniem Lands which the Surveyars are required to measure daily

daily is as follows.-

Description of Land	If Land annually cultivated	If Produceable Waste	If Anady waste
	Cawny	Cawny	Cawny
Poonjah - - -	46	80	105
Nunjah - - - -	23	30	46
Nuttum Coodi-yeroopoo &c.a Porumboke Land	45 fields	"	"

At this rate you must measure the Lands

Form of Pymash Chittah Account- 36 The Pymash Chittah or daily Account of Measurement should be kept according to the form you are furnished with. As this Ac-count, which you are required to send to Huzzoor is a document of great importance you should to render it durable, get thick grown Cadjan leaves cut into leaves of equal length and breadth and write the accounts thereon.-

Pymash Goshwarah Account should be forwarded Monthly.- 37 At the end of each English Month you should forward a Goshwarah Account of the Lands measured in each month, prepared agree-ably to the form hereto annexed, you will also forward a similar Account for each Village.-

At

Abstract of the Sibbendy.

38 As the Pay of each Surveyor or Pymashder is fixed at 14 Rupees per Month you will prepare your abstract, with reference to the extent of Land which you are required to measure in each Month and send it to Huzzoor. You will include in the abstract the Pay of the Peons employed under you which is fixed at 3 Rupees per Months. If you measure a less extent of Land than that prescribed to you your pay will be lessened in proportioned.

Saderwared Charges.

39. As the amount of Saderwared Charges for Oil and Stationery is fixed at Rupees 1 per Month, you are to send with your abstract a list of Saderwared Charges, upon which the Money will be sent you.

Pay of Coolies.

40 The measuring rod bearers and the persons employed in marking the boundaries will be paid as follows.

1. Three measuring rod bearers are allowed for a day and they should be paid at 8 Pice each per day.

2d For waste or Arable waste Land the Boundary Stones should be set up in the Banks by the Cavilgars and Tolies of the respective

respective Villages whom you should pay at your discretion. For the cultivated Lands, the Ryots should be called on, to set up the boundary stones. For the expences incurred on account of the above items, you should send monthly a list, the amount of which will be sent to you with your Pay. When you receive the sum you will pay the measurers and the persons employed in marking the boundaries, in the presence of the Merafsidars and Curnums and take their receipts.

Old Accounts should be referred to when measuring.

41 You should measure the Lands, with reference to the Survey Accounts of Fusly 1243 and the old Olongoo Accounts of the preceding Fusly 1213 as also with reference to the other Accounts regarding Pottom Poroopoo Moniems of the Lands. When the Survey is finished you should deliver the Curnums Accounts to the Curnums and take their receipts. The account received from the Huzzoor you should return to the Huzzoor.

The

How many Copies of the Survey Accounts should be kept-

4.2 The Survey Account should be prepared in the following manner-

1st You will let the Curnom enter the account of Measurement.-

2nd The Pymashdar the Circar Curnum and the Villages Curnoms should each keep a copy of the daily account of measurement or Chittah which should correspond exactly with each other. There should not be the least difference between one copy and another. The Accounts should be daily compared with each other. The accounts should be free from blanks and obliterations.-

3rd The 3 Copies of the Chittahs should be daily signed by the whole of the Merasidars of the respective Village, by the Merasidars of the neighbouring Villages, who were present at the time of measuring as also by the Pymashdars.-

Boundary disputes.

4.3. In cases of Boundary disputes between one Village and another, you should act as follows.-

1st The whole of the disputed Lands together with the boundaries on the 4 sides should be

-be inspected. You should inform yourself of the Boundary marks on the 4 Sides.-

2nd Referring to the Accounts of both Villages, you must ascertain, whether at the time of former Survey the disputed Lands were attached to one or both Villages.-

3rd Were the disputed Lands since Fusly 1211 under cultivation or not. If they were always cultivated, which of the 2 disputing parties cultivated them. Were the Lands cultivated by the same parties without interruption or they were cultivated by both parties in different years. If the Lands were now lying waste which of the 2 parties last cultivated them. These informations you should gather from the Accounts or well informed Ryots. If the Lands were lying waste, you should ascertain whether it lies so waste since Fusly 1211 or whether it was so only in certain years.-

4th If the disputed Boundary Lands were heretofore the subject of investigation by Servants deputed from the Huzzoor or the Talook, then you should inform yourself of that circumstance. Thus informing yourself

of

of all cases of Boundary disputes you will re-
port those cases to the Huzzoor. You are to
prevent obstruction to your surveying the Lands
further directed to measure the disputed
Lands and enter them in the column of re-
marks as lands in dispute between such
and such Villages.

Subjects of Enquiry.- 4 to The Pymashdars
should know what are the subjects of their
enquiry in each Village.-

1st Regarding concealed cultiva-
tions of the previous Fuslies you should
if the Ryots of a Village were divided into
2 sets, enquire with both parties, or if the
Ryots were not disunited by discord, you
should then try your best to get such in-
formation from them, as will lead to a
discovery of the concealed cultivations and
bring the frauds to light you should spe-
cify in the Column of Remarks whether
or not the concealed Lands were brought
under cultivation last year.-

2nd If any Lands under a false
pretence, that it belongs to another Village,
were

were since along time suppressed in the Accounts
you will bring such lands to light and state
in the Accounts that they were so many years
suppressed in the Accounts.-

3d By the assistance of the old
Survey Accounts and the other Accounts in your
possession regarding Maniem Pottom Poroopoo
&c. Lands, and also by enquiry you will ascer-
tain with correctness whether the Maniemdars
and other Incumbents enjoy their Maniems &c.
on the authority of the Summabundy Accounts
of Fusly 1211 and 1217 or under order from
the Huzzoor or other documents. or they enjoy
them without authority.-

4th The fields which were
formerly entered under the Head of Maniem
Pottom and Poroopoo are now entered under
the Head of waraput and vice versa. cases
of this kind have also come to light in
former investigations. you should therefore get
the old Kytady Accounts from the old Enam-
dars &c. and from Curnams and Merasidars
and

and by means of these accounts as also by enquiry find out in what Poo-oravoo Cunnar and field the Maniem Land was situated, and what field is now enjoyed as Enam and enter the result in the column of Remarks.-

5. If any maniem Lands granted to certain person for certain purposes were enjoyed by persons other than those legally entitled thereto you will also enquire into such cases-

4&5 It appears that some of the Poonjah Lands were at the time of former measurement entered under the wrong class such Lands should now be measured with attention to the following particulars.-

1. In some Villages the same field is entered under 2 or 3 classes.-

2 In some Villages the whole of the Lands in the Village is entered under one and the same class..

3 In some Villages the whole of the Lands in the Villages is divided into 3 or 4 classes and each class has a definite extent but the class of each field is not defined. The Settlement of these Villages is annually made, entering the Lands cultivated, under each class at

at the same rate per Cent as that centage bears to the Total Land in the Village.-

4. In some Villages the cultivated Lands only are classified and the waste Lands remain unarranged..

5. In some Villages neither the Lands were ranged under their proper classes nor the Accounts kept correct. The Curnums have in subsequent periods altered the classifications. The classes entered for the lands cultivated last year will therefore differ from those of which the Lands will appear to be.-

6. In Villages also where there are old Survey accounts you will find the same difference to exist. As these differences should now at the present measurement be done away with, it is necessary that you should carefully examine the Colour of the Lands and then enter them under the classes to which they belong.- If in one field, there were 2 or 3 different sorts of soil you should enter it as a field of that soil which it contains the more..

Oymashdars will be punished for misconduct.-

4&6 If the Oymashdars will not conduct themselves agreeably to the following instructions they will be dismissed even for the slightest fault

fault and others appointed in their room - If they were guilty of gross misconduct they will be punished according to the Regulations. - They will further become unfit for public employment in this and the neighbouring Districts.

1st You should measure the lands correctly. you should enter in the accounts the true column of the lands and place them under the right class.

2nd You should not write the accounts in favor of any Ryot or person but you should measure and enter the Land in strict conformity with this Hookoomnamah, making the necessary enquiries and referring to the necessary Accounts.

3rd You should pay for all the articles you buy in ready cash and obtain receipts.

4th You should not borrow from any person any articles such as straw Firewoods &c. you should pay ready money for all things you should not receive grates any thing from the Merasidars under pretence of Batta.

5th The Peons also attending upon the Pymashdars &c. of other Villages should not receive any thing grates.

6th You will pay the Coolies employed in carrying any burdens and take their receipt

7th You should not fine or beat any person.

8th The Circar Peons should not be employed for private business.

47. The Pymashdars may from a desire of increase of pay, be hasty in making additions and multiplications and commit blunders. To examine these and rectify the errors the requisite orders have been given to the examiners. If the Pymashdars have been found to have written any thing erroneously, they will loose the days pay on which such blunder was committed.

Merasidars interrupting the Survey will be fined. 48 If the Merasidars or others interrupt your surveying the lands or make any trouble, you should report the circumstance to the Huzzoor through the Tahsildar and they will be fined.

What Village should be measured. 49. You will receive orders from the Huzzoor that you are to measure such and such Villages.

Accounts to be furnished after Survey. 50 You should obtain the accounts enumerated in the annexed list from the Curnums and send them to the Huzzoor well compared and

Fort S.t George 19.th February 1844.

and examined.-

51 When the survey of a Vil-
=lage is completed you should get from
the Curnum attached to it the following-
Account.

A Statement shewing the
N.o of Pagodas in the Village and the amount
of allowance attached to them as also whether
the Pagodas are built with granite stone, or
covered with bricks or tiles; you should ascer-
tain and insert in the Accounts to whom the
charitable institutions such as Chattrums,-
Muttoms, Pullevausels or Mosques and Water
Pandals &.c belong, and in what manner
the charity is kept up at these places. The
N.o of tiled and thatched houses cottages
Shops Store houses Annicuts, channels,-
Rivers and Agapur and Poonacolum Tanks
in each Village; should be specified, re-
-marking at the same time, that so many
of the abovementioned Tanks are in good
repair, and so many are out of repair,
and that if out of repair, that they have
been so for such period, and that the
annicuts are constructed with stone, bricks
or

Fort S.t George 19.th February 1844.

or mud. The amount of population, the N.o of
full grown and young persons of both sexes,
in each caste, the N.o of cattle, such as Cows,
Bullocks, he and she Buffaloes, Goats,
and Rams together with the N.o of Merchants
Carts and Bullocks as also the names of
Pooracoodies and the number of Bullocks
kept by them for ploughing, should be in-
-serted in the Accounts. The Pymashdars
should take a copy of the account regard-
-ing the above particulars as prepared by
the Curnums and compare it with the Ori-
-ginal. If they find any errors in it they
should alter it after obtaining correct in-
-formation. If the Accounts prepared by
the Curnums be correct an exact copy of
the same may be taken. But in cases
where their correctness is suspected the
Pymashdars should check them after re-
examination and make the necessary
alterations in the Survey Accounts. He
should also report how the discrepancy
arose

Fort St. George 19th February 1844.

arose in the Accounts and how he puts them right. The N: of Looms in each Village also should be taken into account. A separate Statement shewing the Waïraditum and Soodantra dittums fixed for each Village should be obtained from the Curnam and forwarded together with the Survey Accounts.

52 You will cause Boundary stones to be fixed on the 8 Sides of each Village in order that its limits may be the better known to all. If in any Villages there were Boundary stones set up to shew its limits, then you will not alter their position but where there are no boundary Stones you will cause them to be fixed.

53 If any articles other than those contained in this Kookoomnamah, occur to you, you will report them for our information.

Tennevelly,
Tencausey,
30th Sept. 1843.

Fort St. George 19th February 1844.

No. 41.

Proposed Kookoom Namah for the guidance of Turndars in the classification of Nunjah, Punjah Baguet, and Poonjah Baguet lands in the District of Tennevelly—

Every Village in this District,

1. having different kinds of Soil and it having been long since customary to assess such different lands in a Village, whether good or bad, at one uniform rate, it is now deemed proper to assess the different Soils with different rates of Teerwah, referring duly to the degree of productiveness and description of the respective Soil and as it has been already ordered that the whole lands in this District, should be surveyed in order that the Ryots, after paying the public revenue thereon, may enjoy the surplus profits derived therefrom, by their respective exertion and labour, you are now to examine the different description of lands in each of the Villages, forming your respective division, as given in a Memo already furnished to each of you and assort them.—

Teermdars shall on their

2. arrival at every Village in their respective division summon the Merasdars, local Curnom, Nautaumagar, and all respectable Ryots together,

and

and take a Moochelka, executed and signed by them to the following effect—

"We hereby bind ourselves to shew to Turumdar all lands of Nunjah, Nunjah Bagauet and Poonjah, Bagauet in our Village, and their respective sources of irrigation Viz^t Agáput—Poncolum, Tunnet—Woottaraway Voycaul, Aravoy, and Kenuttaraway; to inform him which of them is One crop, and which of two and three crops, to arrange them with reference to the different degrees of productive power under 1st 2nd 3rd and 4th Clapes; to render correcter accounts of the produce yielded by each clap every fusal crop — and of the sameki charges defrayed therefrom before being divided between Circar and Ryot, and every other information that may be required for clasification, and in cases where it may be proved on examination that we made any false statements contrary to the tenor of this Moochelka, we engage hereby to submit ourselves to the Punishment, which may be deemed by Superior authority proper for it—

1 Tank and Channels fed by Rivers—
2 Tanks dependent on the rains
3 Spontaneous irrigation from Springs—
4 Spring irrigation by means of swings—
5 Channel irrigations by means of swings
6 Well irrigation—

3. Turndars should clasify all lands in the Villages forming their respective division in presence of and communication with the Mirasdars, Nottamgars, Ryots & local

local Curnum, and Curnums on the part of Ryots of the respective Villages and respectable Mirasdars of the Neighbouring Villages with due reference to the different description and Colours of Soil stated in the Pymash account, and also to the state and circumstances of land with respect to sources of irrigation &c^a and be held answerable for any fraud that may be practised by the Villagers during the time of Clasification & the clasification accounts so rendered should be signed by them all respectively—

4. Suppose there is a Village having five or seven hamlets depending on it, and that each hamlet has different descriptions of lands in it called by local custom 1st 2nd and 3rd and 4th Clapes and these Clapes to be at variance with the respective ones in the principal Village. In such cases you should give preference to that which may be found of superior fertility as follows—If the 1st Clap in the principal Village be found of inferior fertility in comparison with that of the same Clap in the hamlet the latter should be considered as 1st Clap converting the former into lower Clap, and if otherwise the former converting the latter into a lower Clap.

Turndar

5. Turndar shall clafsify the lands of every Village in presence of the Ryots, because they are well acquainted with the state and pro=ductive power &c.a of their respective lands, taking care that after clafsification there be left no room for Ryots to complain that 2nd clafs has been erroneously included in the 1st.o and the 1st into the 2nd.o clafs &c.a as the Ryots are used to plead, at the time the teerwah is fixed on their lands, that they were not present during the time of clafsification and that the Turndar &c.a has misrepresentated their lands in the account, you should give them a previous notice that no such complaint will be heard after=o clafsification, if they omit to be present when it is going on—

6. Though the colours of Soil=e are various, yet finding it expedient as in other Districts to ascertain certain clafses of them to which the different soils may=e bear a near approach in colour, and men=tion them in the Pymash account in order to find out with facility the different de=scriptions of Soil, the following are the differ=ent kinds, as distinguished in communi=cation with the respectable Merafsdars, sent for

for from the different Talooks in the District—

1 Caresel, black colored ——— 1
Nul caresel or good corsel ——— 1
Alur Mixed coresel ——— 1
Coresel Mixed with sand ——— 1
D.o D.o with clay ——— 1/4

2 Coorgay, partly yellow, and partly white
Nulgoorgay ——— 1
Coorgay mixed with sand ——— 1
D.o D.o with sevel ——— 1
D.o D.o with Alur ——— 1/4

3 Sevel, red colored—
D.o mixed with sand ——— 1
D.o D.o with sand and Mud ——— 1
D.o D.o with gravel ——— 1
D.o D.o with clay ——— 1/4

4 Veppel white colored—
D.o mixed with sand ——— 1
D.o D.o with clay ——— 1
D.o D.o with Alur ——— 1/3

5 Padoogay ——— 1

6 Alur.
D.o mixed with sand ——— 1
D.o D.o with shells ——— 1
D.o D.o with pebbles ——— 1
D.o D.o black colored ——— 1/4

Manul, white colored
D.o mixed with clay ——— 1
D.o D.o with shells ——— 1
D.o D.o with mud ——— 1/3

23

the foregoing colours and others which may be occasionally found, should be mentioned in the Tarum accounts—

7. As lands should be assessed with Teervah after their being duly classified, and as the rate on each succeeding class, should regularly fall by 3 or 6 fanams, you are to inform this to all Ryots, and make them divide the Nunjah lands into eight or ten kinds, and Bagaut lands into four or six and if required to add one or two further divisions for Nunjah lands, duly referring to the difference of Soil, and they are not to fix any rate of Teervah either in money or in grain—In every Village the difference in the rates of Teervah, over different classes, should neither exceed nor fall below 3 or 6 fanams regularly or in grain ½ or ½ Cotah, and the Ryots should, therefore, consider this and divide their respective lands into different descriptions, accordingly You are to inform the Ryots in your respective division, that if they do not pay due attention, to the different description of land, and separate them duly their complaint will not be heard after permanent Teervah is fixed on the lands—

8 After the lands in a Village, are assorted into different classes by the Villagers and Turndar, an Odiwarum account of every description of land, should be prepared in communication with the local Curnum, respectable Mirasdars, Ryots and others, who may be well acquainted with land, with due reference to the Culnady accounts, if produced by them and to those prepared during the period of Aumany, and enquiring among the neighbouring Villages, in order to know whether the Statements of the Villagers are correct, shewing the quantity of produce yielded by two Crop land during the 1st and 2nd Crop respectively and by one Crop land, during the 1st Crop only and their respective sources of irrigation whether Agaput or Ponacolum, Viz. large or small, rivers, Channel, large or small Tanks, Dikes, Woottaraway, Tunnoot, Spring and wells &c. The account thus prepared should be submitted for consideration, signed by the Villagers and Neighbouring Villagers respectively, and attested by Turndar, and if the Villagers could produce no Cundoomodul or Culnady accounts, prepared during Aumany, the account should be prepared according to the Verbal Statements of the Villagers, and as also for Bagaut lands—

In

+ Gross produce

× Account of daily produce

Fort St. George 19th February 1844.

9

In disposing of the lands into different classes, reference should be duly made to the colours and sources of irrigation, the distance between the field and water-sources, between the field and Village, trouble and charges required for Cultivation, As for instance, suppose there is a land situated near the source of irrigation or so as to be easily flooded, this land cannot be considered as of the same description with other lands situated far from the Village or source of irrigation, for the Ryots are obliged to take ploughs seeds, Cattle &c. to a great distance from the Village; and they cannot so often inspect it to keep out Animals &c. from destroying the Crop and to guard the crops from being stolen, they cannot get labourers so cheap for cutting the crop, and the charges for conducting water will be heavy so that the whole amount of cost for the cultivation of 1 Seed Cottah of land, lying near the Village or water course, will suffice for the cultivation of only 3/4 S.C. of land, lying far off; and therefore the latter land should be put into lower class; and be assorted with similar descriptions, high lands to which

water

1 Agapat
2 Poonacolum
3 Koolteravay
4 Coottumeravay
5 Sunnoot
6 Renatte ravay
7 Nadee Era way or river irrigation

Fort St. George 19th February 1844.

water must be raised, must also be put into lower class as the Bagauet lands situated under wells, requires no great labor for their irrigation, excepting a trifling charge, to keep the wells in good repair, and the water may be raised by means of Mattayettum, a kind of Picotah, they should be put into different classes according to their situation. If lands of same description, be put into different classes, satisfactory reason for it should be recorded in the Chittah Book.

10. Nunjah and Bagayet Lands should be put in different classes with due reference to sources of irrigation. Lands irrigated by the River Tamprapurny, which afford a constant and ample supply, should be considered as of higher description than those irrigated by the Chittravady, which afford full supply only for one Crop land, and a scanty one for two Crops and a few of the sources of irrigation are enumerated hereunder—

Agaput
Tank ——— 1
Channel ——— 1
Yaraway 1/3

Pona Colum

Tank ——— 1

Yaraway
Tunnel or spring following --- 1/2

Yaraway ——— 1

Singly Dikes ——— 1

Yaraway ——— 1/2

Bagauet or lands situated under well and on which Nunjah is cultivated ——— 1

10

of the lands situated under the foregoing sources of irrigation, some are cultivated with only one Crop while others with two Crops and more, some are cultivated during one fusul with Nunjah and in the other, with Poonjah and the same is the case with the lands, situated under Poona Colum Tanks, whether large or small. The cultivation of the lands to which water is raised, is attended with some difficulty and trouble in comparison of those to which water can flow, and that under wells, more than the former, for Bullocks and labourers are required for working the Picotahs, to raise the water from a depth or where the spring is slow. In Agaput, small rivers afford less

less supply in comparison with the large ones, wells afford a scanty supply in comparison with Pona Colum. As the different sources of irrigation abovementioned, afford different supply, and the lands situated under several of them, require much charge, and exertions for cultivation, they should be discriminated as follows. Lands irrigated by the river Tompraparny, should be considered as of higher class, than those irrigated by Chittranady, for, they yield abundant crop and so forward from Agaput to Renuttaraway, according to the different degrees of labour, and charges required for cultivation. In Verdachellum irrigation district three fourth of the Nunjah Paushanum Teervah, has been levied on yaraway land, and in this district also, a due rate of Teervah lower than that on Nunjah, will be fixed on yaraway land, with reference to the charges and exertion required in the cultivation of it. In Caroongolum Village &c in the Talook of Vellyoor Pona Colum lands have been charged with higher rate of Mailwarum than that, on Agaput lands, and therefore, in the classification of these lands, the respective sources of irrigation, the state and circumstances

circumstances of each land, and its respective degrees of productive power, should be duly referred to—

11. Monthly salary of Turmdar, is to fluctuate with the extent of land classified by him, during the Month, as follows. If an extent of land, assessed as last fusly with 5000 Rupees, be classified by him in a Month, he is to draw Rupees 17½ for that Month, and if less, his salary will be reduced, and if above, his salary also will be increased accordingly— Turmdars who will be found to have classified greatly less than the fixed extent abovementioned, will be dismissed from Service, as unfit to hold it any= longer.—

12 In cases where a field may be formed of different descriptions of Soil, and which may have been measured by Pymashdar together, Turmdar should find out, how many kinds of soil there are in that number, what extent of each descrip= =tion, what will be the total amount Teeroah thereon, all at the different rates, fixed for the respective description, what is the aver= average thereof, and to which class, such aver= average

average is equal, and put the land into such Tarum, remarking it at large in the Cawn Chittiah—

18. Anady Bunjer lands, should be classified in communication with the Ryots of the respective Villages and of its Neighbourhood, for, they may be well acquainted with the state, and circumstances, of them, and every measurement made by Pymashdar should be classified= respectively—

14. Kunjah Bagauet lands, on= which Cocoanut, Areca nut, and Mango trees are thickly grown, and Poonjah Bagauet lands, should be put in the same classes, in which lands of similar descriptions in other Villages, are put, and Turmdars will be here= =after furnished with instructions, for their re= =spective guidance, in classifying 2d crop fusul Jasty lands, according to the fertility of soil, and sup= =ply of water, received—

15. Turmdars shall, on receiving the original Chittah rendered by Pymashdars, com= =mence the classification with the 1st therein, and finish with that of the last, paying due attention to each succeeding number, and shall thereon, prepare therefrom a distinct extract of the

Pymashdar, and Uzmashdar, and report it to Hoozoor—

21. Curnum or Merasdar &c.s of a Village should not be taken to another Village excepting to those in the Neighbourhood for clasification and the clasification account of every Village, should be prepared and compared in the same Village, and not in another.

22. Lands lying within the bet of a Tank, and which may have been cultivated with Nunjah, for a series of years, or as often as the water retires, should also be duly clasified, as well as those cultivated by spring or yaraway water—

23 In cases wherein it may be found either on the report of the Turndar, or by any other means, that Turndar has by partiality or corruption, put one kind of land for another, such Turndar will be fined and dismissed from service, and in more important instances he will receive more severe punishments; and if such offender be the Merasdar of a Village, he will be dismissed from such Merasy service—

24. Turndar shall after clasifying the whole lands, of a principal Village, and its

3255 Fort St. George 19th February 1844

its hamlets, together, send the account to the Turndar, who shall then come to the Village, refer to the Mailwarem quantity of it, and settle the rates of Teerwah, on different descriptions of Soil clasified—

25. After the whole lands in a Village have been put into their respective clases, all the lands, cultivated in Fusly 1251 should be stated in the Jarum account of Fusly 1252, as lands fit for cultivation, and others as Burejer, and if the cultivated and waste lands, be not severally exhibited as above said it will be difficult thereafter to separate them—

26. Turndar shall pay at Bazar rate, for all the things which may be purchased for their private use, during their stay in a Village, and nothing either by force or as a gift should be taken—

27. You are not to wait for the arrival of the Turndar in the Village the lands of which you have already clased, for examination, but proceed immediately to another Village—

28. As the lands should be clased immediately after their being Pymashed, you should follow the Pymashdar without delay— and

3235

Fort St. George 19th February 1844

and in cases wherein it may be found, you have delayed contrary to the order above given, you will be fined.—

29. Turndar shall not proceed to another Village, before he inakes the circuit of the Villages, the lands of which he may have clased, well acquainted with the details of it, and if he does not give a full explanation to the burroom, he will be furnished.—

30 Turndar shall classify also Enam lands whether cultivated, Seygaol Turse, or Anady turse, respectly like the circar Iyen lands.—

31. A Memorandum should prepared, shewing the names of all individuals in setty and Pikelurs castes, and Merchants whether they be Cultivators or not, and others excepting Cultivators who may have paid Motorpha tax up to last fusly, and also of all who may not have paid such tax in their respective castes.—

Tinnevelly —
Tencaudey —
30th September 1843

(A true Translation)
(Signed) E. B. Thomas

3236

Fort St. George 19th February 1844

49

From E. B. Thomas Esqr. Coll.r of Tinnevelly

To The Acting Secretary to the Board of Revenue Fort St. George.

Sir,

Submitting for consideration and orders certain facts and information not noticed in the 1st. Survey Report dated 24th October 1843 and respecting instructions regarding them also forwarding the accounts and other papers referred to in this Report.

Garden

With a view of not making my former letter on the survey too long. I refrained from touching on one or two points which I will now bring to the notice of the Board and on which I request their consideration and orders, as well as on my first Report under date the 24th October.—

The Board in their Proceedings 13th April 1843 remark, it is for the survey to introduce a better system for Garden, now classed as "Vampyre" in Tinnevelly," and they are aware that in this District there is no classing and assessment of garden lands (called Bajayet or Totacal) as in other Provinces but only the one called "Vampyre" on the crop not on the soil &c. in the practice equally at variance with sound Policy

policy and the general tenor of the Board's orders. There is some little of what would be elsewhere called "Nunjah Bagayet" i.e. garden produce on kunjah land but the great proportion of Vampyre is grown under wells. regarding the well cultivation. Sir H. Montgomery remarked, that it would be difficult to prove how and when any wells had been dug at crear expence. The Board on the other hand observe in para 7. of their Proceedings 19th April 1843 that in most Districts old wells and where Surveys have been made, wells prior to such surveys were considered "crear wells" and again in para 8 that the distinction between old and new wells is in every District well known. In reference therefore to the Boards view the I think with Sir H. Montgomery that it would be difficult to show that any wells now in the District were dug at Government expence and are therefore "crear wells." I have classed as "old Wells" all those under cultivation previous to July 1252 / 1842/43 (agreeable to

3257 Fort St. George 19th February 1844.

to the Boards orders 7th June 1841. Para 19 and as new only those dug since in poonjah land and at the Ryots own expence. the latter class will of course be exempt from gondan thay:— paying only the usual poonjah assessment according to the class in which the land and well lies paying one tax, without reference to the number or nature of the crops.—

3. For the old wells hitherto
Wells. paying as Vampyre (at 233 rates) throughout the District according to the crop or the custom of the Village (neither very definite data) I propose to fix a garden assessment, dividing the gardens into 4 or 6 classes, and fixing their assessment, as in the case of the kunjah, on their relative and inherent fertility of soil, command of water, from what depth and how raised, and other necessary and fair considerations. the assessment will be usually somewhat below the kunjah and above the poonjah a medium between them, regulated as far as practicable by the rates hitherto paid for such land. If the new rates are a little lowered (which they must be bring in some

see paras 8 & 9 of Mr. Thompson's letter to the Board 13th August 1840.

Cases

Fort St. George 19th February 1844

cess too high, the garden cultivators will think a cent to the arrangement, and it will save the large sacrifices which would follow on declaring all wells new and old liable to Poonjah only; tho' undoubtedly in strict truth 9/10ths if not all of them have been dug at the Ryots own expence, tho' it may be 10 or 50 years back.—

4. As the Board are I believe aware of my opinion of the great importance of encouraging well cultivation I need not again advocate it in detail. I may be perhaps allowed to refer the Board back to my letter of 1st November 1836. when my service and experience was younger than now. and I can only say that I am still more strongly convinced that well cultivation is most valuable, and worthy of all encouragement. it is I think the standby of the Ryot and the Government. a well sunk gives a value to dry Poonjah land it never had before. makes it immediately saleable. secures the Government Revenue after supporte the Ryot and his cattle in seasons of drought and distress. ensures him even in a dry year a portion at

and 5th Feby 1835 from Sub Collr to Principal Collector South Arcot.

3257

Fort St. George 19th February 1844

at least of his crop, when perhaps the kunjah and poonjah may utterly fail. fixes his interest and capital on one spot and finally gives the cultivator the power a very valuable one, of varying his crop with the demand of the market. and raising many valuable products impracticable either on mere kunjah or Poonjah lands.—

This latter consideration is

Garden Crops. 5

of especial importance in Tinnevelly where prices have fallen so low and paddy is so remunerative that it barely pays. while the mere Poonjah lands are not susceptible of much variety of cultivation, but generally speaking cotton follows cotton, cholum, cholum, and so on, to 4 or 5 ordinary dry grains year after year, with a well and pucka at command the Ryot may within a limited extent of land raise plantains, Tobacco, chillies, Turmeric, and many other valuable garden crops. many such crops would be utterly ruined on mere poonjah lands, by one failure of expected showers; but where the well, even a small one, comes in to aid, it secures the crop from entire failure, and adds to the Ryots confidence

and

and energy.—

6— The assessment on the various wells must of course differ: in some of the Talooks, as Satoor and Mapadaram, lying high a well must be dug 40 and 50 feet and will cost from 100 to 50 Rupees, while in Pimpalmai a sandy Talook lying low towards the sea, and full of springs, a well of 10 or 15 feet depth will give a good supply of water— and the soil tho' poor, is adapted for plantains and some other products: nearly the whole consumption of plantains in Tinnevelly and Palamcottah is supplied from Pimpalmah alone, brought in on Bullocks for want of Bandy Roads.—

7— The value of gardens as of all other lands will of course depend chiefly on its natural and inherent, not on its acquired fertility, for the produce in two gardens may be the same, the value of the lands may differ considerably— it may require much more cost of labour and capital to raise the same crop in the one, than the other.—

Of

Of the 8 kinds of— produce now usually taxed on the crop at various rates I would include all but Betel under the Garden assessment, they will in future therefore pay according to the class of soil they may be in: not arbitrarily as at present on their kinds— Betel cannot well be raised on any but Nunjah land— uses much water from public sources: is profitable, and also is a luxury rather than a necessary of life. I propose therefore— to assess it with treble the Nunjah tax, paying according to its turn (class)— that is treble of the class on which it is found— It is now in most instances— higher, in some few lower, than this proposed rate: and very variable and irregular— it will be seen by the marginal statement however that this fixing it at treble the Nunjah rate of the land on which it is grown, will fall on the whole considerably lighter than the present average Betel assessment— any less rate than treble, will fall much

1 Plantains
2 Betel
3 Karumy Pelungo
4 Cheroo Pelungo
5 Chamy Pelungo
6 Tunneries
7 Kunjah
8 Chadumbo or Tiemps

Total Betel cultivation in Fasly 1252 Sic. Cattahs - 317
Standard Tirwah of the present average Betel assessment - - - - Rs 14,550
Treble Nunjah Tax as now proposed - - - - - 9750 less 4,800
Double do - - - - - - - - 6,000 less 8050
½ Nunjah Tax or do fuel tirwah - - - - 4,875 less 9,675

much

much below the present average payments &c. and be a still heavier loss to Government and as many other necessary remissions of tax must be conceded in the Survey, I think Betel as an article of luxury and profit may fairly pay up to nearly its usual average, and has no claim to particular indulgence. I have proposed definitely, as I believe the Board would wish, what occurs to me as the best arrangement for Betel assessment, but as I am aware the Rate varies in other Districts the Board with more extensive information before them will best decide what is proper.

Plantains on Nunjah land should assess the same as if paddy were grown at the fixed term, whatever it may be ("yek or do fusl") of the land: they yield little the 1st or 3d years but pay in the 2nd.

Permanent

9. Of the 1266 Villages in this the District the Board are aware 412 are called Pirigonally, 364 Puttawirty and 82 Perambutty or Cevcar. In all the former, proprietary and occupancy rights are

are both recognized, there are of course sometimes united, sometimes separate, in the former case the same individual being landlord and tenant, in the latter the proprietor receiving Rent or "Swamybogum" from the occupant cultivator. In the 82 Peroombut Villages however only one right is recognized that of occupancy and the occupant (even of several generations) is precluded from selling or mortgaging his land it is called and considered entirely Cheri land and the Pyot has not even a share, as in all other Villages, of a Palmyra tree if cut or fallen. The natural consequence is, land and trees are neglected, the great and desirable object of creating a property, and a spirit in the land and fixing a cultivator's interest and capital in it, are negatived, no great exertion or improvement, nor much capital is likely to be spent on land which the cultivator can never call his own, nor sell, should he wish it, to regain any capital sunk, I can discover no ground but the indefinite and unsatisfactory one of "Mamool" for this restricted tenure, nor any real good

Fort St. George 19th February 1844.

good resulting from it. while it obviously cramps the Ryots energies and deters outlay of Capital.

10. I would therefore propose to place these 82 Villages on the same footing as the rest of the District making them Buttavery that is all owing a proprietary right to be recognized and a right of sale so long as the Government dues are paid. a failure of which vitiates proprietary right any where: in as much as proprietary lands bearing a saleable value are at times gifted and sold on behalf of Government, in every District, to realize arrear dues if the proprietor himself neglects to sell, and pay up his arrears. Government will therefore lose no hold or right on the land which it now possesses by the permission I propose while the regulation of a private and saleable right, in the Ryot will create, as is always desirable, property in the land. It will also tend to secure the Government Revenues, in as much as land improved and made saleable, is a better safeguard for the Government dues I would therefore propose that all who can show long undisturbed occupation should

Fort St. George 19th February 1844.

should be considered at once bona fide proprietors with a right to sell if they choose occupants under 50 years might perhaps be fairly called on to give some consideration for this privilege. and I don't think such would be refused. I would leave it to the option of the occupant whether he chooses to pay this small "huzzur" or mulet for the proprietary right: if he had not the inclination or means to do so, he might remain occupying as before, but without acquiring a right to sell his land; but where an old occupant declined purchasing, I would continue him in possession on the old terms and tenure, rather than disturb his occupancy by admitting another purchaser and offer: the latter permission might lead to some hardship and injustice, and I think the old occupant would without doubt incline to purchase proprietary rights ere long: but if the Board like to adopt the more liberal plan of allowing the recognition at once, cost free, as the permission costs Government nothing, it will perhaps be the more desirable and liberal plan

Madras

Fort St. George 19th February 1844.

11.

Under any view I cannot see the wisdom or necessity of positively declaring 82 Villages out of 1266 unalienable, and refusing to recognize proprietary right or create private property in the soil, the best and only real inducement to outlay, and improvement. I point this non-recognition of all right except mere occupancy so prejudicial in the case of the Palmirah Trees in these Villages that I have been obliged to admit the cultivators on their urgent request to ½ shares of all dead and fallen Palmirahs: as an inducement to them to plant and keep up the Topes. in other (proprietary) Villages the Ryot has their ½ share, the Government ½ of all fruitless trees when cut and sold for timber.—

12.

Another great evil of this anomaly is the clashing of the courts with the local practices of the District. some of these "Perumbut" lands are occasionally brought and sold claindestinely, tho' in express opposition to the terms of the usual puttah, and the known custom of the Province. Suits are filed, and the Collector receives a precept on a Decree to transfer rights and proprietary possession of land which according to the Revenue practice and accounts cannot be recognized

an Urzy illustrative of this subject is submitted lately received from the Collector of Tanjore.

L.G.B.

Fort St. George 19 February 1844

the Village being considered Circar property as much as a Zuftied Zemindary would be. A long correspondence ensued on a point of this nature A in 1836 to 1839. I have just now a similar precept before me for execution from the Court of a formal recognition of proprietary right, as I have proposed above, would remedy this evil, also in the Perumbut Villages. the origin of the term or the practice cannot now be discovered, but the result is decidedly prejudicial to the people and to Government. The subject is alluded to in the old Records from Mr. Lushington down to elicited than "that there always were a certain number of Villages in which private property in the soil was forbidden." but I cannot discover sufficient reasons or arguments for its support. it is mentioned as a simple fact, or rather as an Anomaly. the sooner it ceases to be one, the better for the interests of Ryot and Circar. I should not perhaps have touched upon the difficulties and tenures of Perumbut (or the Chockumpatty Villages) had I not deemed it my duty, and not to have done so, would have seemed an omission in a Survey one peculiar and main duty of which

which is to ascertain and define rights and privileges.
The only advantage I am aware of in the Perumbut tenure is the firmer hold Government have on the waste, and the Shanars and poorer classes on the Palmira Trees, but both these may be provided for.

Establishment. 13 In appointing the Establishment for fully carrying out the Survey I propose selecting the fittest and best Servants, of various grades conspicuous for integrity and ability from among those permanently employed in the District, and supplying their places temporarily by new men. I am of opinion that this will work better than appointing an entirely new Survey Establishment from among a host of Candidates, many of whom have crowded to Tinnevelly on the report of a Survey and the hope of employment under it. I consider the Survey a far more important and difficult work than the mere current business of the District, which can be carried on, under Surveillance, by any ordinary servant not to the Survey, it requires more local knowledge, more ability, and is a far more responsible duty. Errors or frauds committed in current Work are sooner discovered and more easily rectified. but the errors or frauds of a survey, even minute ones, are more serious, more fatal in

3257 Fort St. George 19th February 1844.

in their effect, and longer of detection.

14. My main consideration however in employing almost exclusively the old and permanent servants of the District on the survey, and filling their places temporarily by new candidates, is that I have a far greater hold on them than I can have on any new set of men, however able they might be, a newly selected establishment of servants for the Survey alone, naturally disappear with the close of it. and if after a few months or years, frauds or errors are discovered (as some of course there must be) the parties employed have gone, are not to be found or called to account, and the errors are thus more difficult to be traced and corrected, whereas in employing those already attached to the District whose character and prospects are connected permanently with Tinnevelly, and their subsequent rise depending on their right performance of this duty, they will be liable to scrutiny at any future time, and will be held in check by two powerful motives, the knowledge that the safety of their present permanent situations depends on their integrity in this temporary but important duty, and also that on their return to their own posts, promotion in the District will be.

be first given to any who have distinguished themselves by diligence and efficiency in the Survey.——

15. I have been strengthened in this opinion by facts which came to my knowledge a few years ago in a District - I think Poonah, on the Bombay side - A Survey conducted with great care and much good result, was found subsequently to contain errors and frauds, not at first suspected, and when the native Agents who had conducted the details were sought for, for explanation or punishment none could be found; all had disappeared, with the Survey - they had been selected, temporarily, on good salaries, from various quarters, for supposed ability and fitness for the peculiar work - and either from want of local knowledge, or integrity, or an absence of both, had caused many errors to creep into the Survey.——

16. I proposed to call Penn Row from the Sub Collector's Division, and placed him in communication of course with the Head Sheristadar in charge of the Survey - supplying Penn Row's place to the Sub Collector for current work with the next fittest Servant in the District - I have moved but one Tahsildar since I came into the Province, each ought therefore and has had time to know something of his own charge: and where capable I shall expect each to take an

active

x 1/4 year

active part in the assessment of his own Division - if a Tahsildar after one or two years residence in one Talook has not become in a great measure aware of its localities and capabilities, he must be either very indolent or very inefficient, and while speaking of the establishment and work of the Survey, I must in justice to the Head Sheristadar add, that I have in the outset, perhaps the most important period of it, been much in=debted to Buchu Row's industry and Zeal; nothing more can now be done in the way of measure=ment till the Crops are partially off the ground, in February and March, before which time I shall hope to be favoured with the Board's approval or alteration of any thing I have proposed, and their directions for my guidance, that I may lose no time in proceeding with the work whenever the season allows - The Board were good enough to send me a voluminous Report of the Survey of the N. W. Provinces in Bengal dated 2d March 1838, Allahabad with the Remarks of the Madras Revenue Board thereon at some length, dated 7th December 1840. I have read both Papers carefully and endeavoured

endeavoured to gather practical information from both to guide me in my present Task. The Survey however in the N. W. Provinces in Bengal had I believe chiefly for its Object, not a new settlement of the Revenue, so much as a clear definition of the boundaries of Estates, and a record of the rights of the poorer agriculturist, in a tract where large Zemindaries and private estates abounded, and caused frequent collisions. With regard to the Tinnevelly Zemindaries which of course are excluded from the Survey (except the lapsed one of Chockumputty) all that seems desirable or necessary in the progress of the present enquiry, is an accurate and marked definition of boundaries between Circar and Zemindary lands, necessary both for securing the dues of Government and the rights of the Ryot. Many of these boundary disputes have existed unsettled for 40 years in Tinnevelly being yearly entered in the accounts as "Jucrar" (in dispute) and left for future enquiry and decision. The Zemindar, in some cases, the Government in others, collecting on the disputed tract. Some of these have been lately examined and settled, and others are now under enquiry.

Zemindaries

17. In most of the Zemindaries there obtains-

obtains either a verbal or written agreement between the Zemindar and the Ryot to hold the Lands on rather easy terms, some what below the Average of neighbouring Circar rates; the expences and Extravagance of the Zemindars, unsettled times, and the necessity of inducing cultivation, probably first led to these terms, and long usage has kept them up - they form at times subject of sharp discussion between the Zemindar and his Ryots - An important and long standing dispute of this Kind was only lately settled, amicably, in Yettia-poorum, involving more than a lac and half of Rupees, where the Ryots of 86 Villages had withheld their dues to the Zemindar for 3 years, and obliged him when pressed for his Circar Peishcush, to dig up and send in at one instalment, old gold Chuckrums (not now Current in the District) to the Amount of 59,507 Rupees at a loss to himself of Rupees 13,381-15-" by the exchange - the whole dispute turned on the question whether an average of 16 Fanams as demanded by the Ryots, or 19 Fanams as demanded by the Zemindar, should be paid for Poonjah lands yielded finally by the Zemindar in the Ryots favour -

(it is said) x

x in June last

I state the fact to shew that

Zemindary's. 18

Zemindary Rates usually below Ceicar Rates.

that these lower rates existing in the Zemindaries make the Government rates appear higher in the District, and argue the need of reduction. In Punjab the waram system or division of the Crop, between the Zemindar and the Ryot, is still generally adopted. Shewing the objection and inability of the Ryot to enter into fixed money agreements, unless sufficiently moderate to secure him against ruin from bad seasons and low prices. Indeed the only portions of Tinnevelly where the irrigation may be at all depended on, are the Villages on the Borders of the Travancore hills, which receive a little of the S. W. Monsoon and those on the Banks of the "Tambraporny:" but the River having a course only of about 70 Miles, cannot be trusted to like the Cauvery, in Trichinopoly and Tanjore having one of 500. and likely to be supplied by Streams, or Rain in some part of its extended course."

Low prices in Tinnevelly

19. It is rather difficult to account fully for the continued low prices in Tinnevelly. Depreciation in price usually arises from either one of two causes, extended cultivation, or very abundant Crops, the result in the market is the same, to the Ryot quite different, by the first

first he may be almost ruined, by the 2nd only temporarily and slightly affected. An abundant Crop the result of a favourable Season, Costs no more to raise it than a scanty one. but in the case of extended cultivation, every seed Cottah of grain brought to market, must have had its additional outlay of Capital. The Extra grain thrown into the market equally affects (lowers) the price, whether from an abundant Crop or from extended cultivation, but the first has not cost the Ryot any thing extra, the latter has. I have therefore anxiously endeavoured to trace the causes of the present depreciation of prices, both this year and last in Tinnevelly, the main causes appear to be, first, increase of produce from increased cultivation. Secondly the increasing quantities of grain in favourable Harvests, thrown into Tinnevelly from Madura and Travancore, thirdly Considerable increase of Punjab Cultivation by the large Zemindaries in Tinnevelly, all beyond what is required for the Zemindar's own consumption, coming into the Home Market.

20. The above causes, with the want of outlets for produce, as mentioned in my first letter will I fear lead for some

some time to depress the price, and consequently the Ryot, in Tinnevelly; and tends to point out the necessity of not over-assessing in the present Survey. Tho' I cannot now point to the passage, I have a strong impression on my own mind that I have somewhere in the Revenue Selections V.th Report, seen an opinion of Sir T. Munro expressed when on Circuit in Tinnevelly that "it was too highly assessed" and this impression is partly corroborated by an old Pensioned Gomastah now in this District, who attended Ramachundra Row, the Board's Head Sheristadar, and the Governor's Cutcherry, on duty, as long as it remained in Tinnevelly. I cannot speak positively on this point, but if correct, it is an important additional fact, coming from such a quarter.

Sir T. Munro.

21. The Board justly remark in one of their letters (26th May 1828) one principal "object of a permanent settlement is to ensure the punctual discharge of the public dues in "all seasons, and under all circumstances. a "sacrifice of Revenue being made to attain "this end." Unless the settlement is a moderate one, this object cannot be attained; and to be moderate and fair, the bad seasons, low prices, want of markets, and periodical

Famines to which the Ryot is liable, must be fairly considered.

Village Officers. 22 I would request the Board's Sanction for putting all the important Village officers, on whose vigilance, integrity and efficiency, the well being of the whole community greatly depends, on a more uniform and respectable footing. Their remuneration at present varies, both in value and Kind, in almost every Village in the District, some are paid in land, others in money. No uniformity or fairness prevails, "Mamool" is the only rule, in many instances the emoluments are most inadequate, the post not worth holding, and the duty consequently ill performed, or entirely neglected. in some Villages there are no emoluments at all. The most important members of the Village Community are the Meerassidars, Nattamygars, Curnum, Cavilgars, of the latter, on whom the whole system of Police depends, I have been called on to report Separately, under date 2d October 1843. I would propose to remunerate all on one uniform rate and System, in Comparison with the extent of the Village, its Variz and its duties: existent of by arbitrary Custom as-

Fort St. George 19th February 1847.

as at present. Village Officers are usually remunerated either in land or money. I think the latter the best, to vary in Amount with the increase or decrease of the Village: a percentage in fact on the total collections, connecting as much as possible the emoluments and interests of the Village officers with the increase and prosperity of the Village itself. Land if adequate when given, may not be so a few years hence. And if Village duties are properly performed, there is less time for its successful Cultivation.

Caution and time required.

23. Surveys conducted by far abler hands have so frequently been found to require subsequent readjustment, that it is with great diffidence and caution I shall proceed in that now commenced, and if it should not progress so rapidly as might at first be expected, I beg the patient and indulgent consideration of the Board and Government, knowing the difficulties and Anomalies existing in Tinnevelly, and the deliberation required. I shall not spare myself or my establishment, but I shall be more anxious that we should proceed on safe and well tried grounds, especially at

3257

Fort St. George 19th February 1847.

at the outset, than to show in my accounts a mass of work accomplished more speedily than satisfactorily. while therefore I shall use my best endeavours to complete the Survey within the present estimated and sanctioned Amount, I think it highly probable that it will require a considerable time to bring it to a final and satisfactory close. Indeed one of our most able Revenue Officers, Mr. Thackeray expressed it as his opinion, that one Fuloork a year was sufficient to survey properly. I do not wish or intend to make this my standard, but to do the best I can.

Proclamation proposed.

24. As the Ryots generally, especially the uneducated and less intelligent amongst them, are apt to take fright and be suspicious of any innovation or change of old System however bad, and to dread some general and indefinite raising of the demands against them, I thought it would be advisable to endeavour to disabuse them of such misconception, and make generally known a few of the leading objects of the Survey, for which purpose I propose circulating widely in the Fuloocks an Istyar or notice to the effect of the one enclosed. Should the Board see no objection to it. Verbal explanations

explanations have, and, of course, will be, given, of the objects of the survey, but these do not reach all.—

Alienations of Land.

25. There are many unauthorized usurpations of land, alienations, and indulgences requiring consideration and enquiry throughout the District, the progress of the survey is perhaps a fit time to notice, tho' not immediately to remedy or resume such. Any survey intended to equalize the public burden of taxation in fair proportion on all shoulders, and which must necessarily in many instances disturb in some, add, to existing liabilities, always has, and will, encounter considerable opposition and difficulty. and it is better perhaps not to excite more by the immediate resumption of the privileges however abused, or false claims and indulgences of long standing, however untenable, that many such exist and ought to be rectified, there cannot be a doubt. but with the exception of the Pottom and Poroopoo resumptions lately ordered by the Board, and already under investigation, I would propose to defer the investigation and resumption of other unauthorized but old alienations of public Revenue, till the

survey

3257 Fort St. George 19th February 1864.

survey has further advanced, taking note and account, in our progress, of their existence wherever discovered. I allude to manniums and grants for services long ceased: Chatoorbhogum, in Ayen and Moturpha, enjoyed by others than the original claimants. Worum: Cutgootah: Devo: Dittom &c.a.—

Revision necessary and why.

26 With whatever care the present permanent money tax may be fixed, it will need revision, as all assessments must in the course of 5 or 10 years. and I believe any assessment fixed alone on the average prices in the grain market for a series of years will be found unfair to the Ryot and unsound in fact, from the following among other causes, prices in India are seen to fluctuate greatly. money itself alters in value, and may render a fixed money rent the now light and equitable, a heavy and oppressive one. the proportion taken as land tax, is large; the Ryots means small: and forethought, foreign to his nature: the excess of agricultural and grain producing population, over non agricultural and consuming is in this Country nearly as 90 to 10 which Caste and Custom tends to perpetuate.

perpetuate) in England as 35 to 65, leading naturally and necessarily to an overstocked grain Market, and falling of prices. Markets are fair, and not easy of access, to dispose of Abundant Crops. We are subject occasionally in India to entire failure of seasons, and drought, not known in European countries. Small capitals and limited farms preclude much experiment, improvement, or good Husbandry. all these peculiarities are facts, not speculations, which require, to be taken into consideration in fixing a permanent unalterable money rate. and point out the necessity of its being moderate. The natural result of such moderation will be the prosperity of the Ryot, punctual payments without the present heavy Balances: more capital laid out on the land, greater confidence in the Government, and the gradual cultivation and reclaiming of the waste, the great resource of Government: if accurate estimate could be obtained of the extent of this resource, (the waste) throughout the Madras Collectorates, it would show a very large Amount: possibly $\frac{1}{3}$d. at least, of most Districts. In Tinnevelly it will

will be above half the whole District.

27. There are 18 other Villages in a different position from the "Perumbut" those of Chockumputty. the Chockumputty Zemindary confiscated and brought in by Government in 1834 for 8000 Rupees. In the case of the Perumbut Villages, but one right, that of occupation, has ever been admitted in Chockumputty the Circar clearly purchased the Zemindary or proprietary right, and stands in the late Zemindars' position. there can therefore exist no other proprietary claims. the late Zemindars exactions and abuses, still remain occupying and cultivating as "poora: coodies" and for the increasing cultivation new ones must come in. they are generally too poor to raise themselves into, and act as, proprietors, and the consequence is I find wealthier parties from a distance are taking up these lands, cultivating them by means of these or other poor Ryots, drawing a rent and profit from them, and gradually and quietly creating for themselves, and setting up a proprietary right in the lands. which after a lapse of a few years, it will be difficult to question. the it is now entirely a new and usurped one.

the

Fort St. George 19th February 1844

the sole proprietary right belonging till lately to the Zemindar, and passing over, at the sale, to the Circar. Had any one bid, and bought, at the sale, his object would, be of course, have been to derive a rent from the lands, after paying the full circar dues; such rent the present parties will draw, unpurchased, in an easier way - they have taken the possession which the purchaser would have been put into had a sale been effected - I believe and its definite dread of the Zemindar and the idea of his possible return to his inheritance, alone prevented any bidding - I would by no means regret, but fait the creation of this right of private property, as tending to fix interests and capital in the soil, and lead to improvements - but I think Government may fairly demand some remuneration for this permission to appropriate the lands - if this permission be not given, nor any remuneration required, it will be taken, and the process now going on will continue till the usurpation is Complete - and the poor tenants, merely used as "poora coody"

3257

Fort St. George 19th February 1844

"poora coody" cultivators, will be in either case in much the same condition, and be made to pay some species of "Sanny Bojum" or Rent, to the self constituted proprietors, as is the case in Buttaverty and Pungoovaly Villages - they have neither the means nor the power to stand alone, and become proprietors themselves, and must in any case remain as mere occupant Cultivators under wealthier possessors. the great question is therefore, shall a sort of scramble be permitted to appropriate these Zemindary lands or shall tenders be invited to hold them on certain terms, due care being of course taken that the occupancy rights of the poor Ryots may on the soil be respected - I have little doubt that any offers would be made if the Board permit, and a proprietory right may then be formally and openly recognized, which is now secretly proceeding tho perhaps under false names and nominal puttahs -

28 Some points in this letter such as the Permanent Villages, payment of Village Officers in land or money, doubtful Manniums and alienation the Choick amuttay lapsed territory &c., do not require immediate settlement, and their decision need not impede the progress of the survey, but as

anomalies

3257

Fort St. George 19th February 1844

anomalies and difficulties in the District, I deemed it proper to bring them at once to the notice of the Board, and shall take no steps with regard to them till I hereafter receive the Board's opinion and orders regarding them.

29- I beg to forward the survey Accounts in Hindoovy of the remaining one of the 4 experimental Villages, prepared since the transmission of my last Report.

Ordered that the abovementioned letter be submitted with the following address.

(D51)

To the Chief Secretary to Government } 1

Sir,

With reference to the orders of Government under date 9th January last, I am directed by the Board of Revenue to forward for the orders of the Most Noble the Governor in Council the accompanying letter from the Principal Collector of Coimbatore requesting that he may be relieved from a Retrenchment of Rupees 264-3-1- on account of the salary drawn by his Head Sheristadar Ramakistna Pundit for the period between the 11th December 1842. and the 5th January 1843.

2. The salary of Sheristadar of Masulipatam has been paid from the 11th December (when Ramakistna Pundit vacated the situation and proceeded to join his present appointment) to the person who

Submitting letter from the Principal Collector of Coimbatore requesting to be relieved from a retrenchment of Rs 264-3-1 on account of the salary drawn by his Head Sheristadar Ramakistna Pundit for the period between the 11th December 1842 and 5th January 1843 and stating that as this payment would be charged in the Civil Charges the statement in the application is forwarded for the final decision of Government.

Fort St. George 19th February 1844

who succeeded him and the salary of Sheristadar of Coimbatore was drawn up to the 6th January 1842, by Appoo Row the late Sheristadar of that District the payment of the salary for the above period to Ramakistna Pundit therefore will involve a double charge to the state and this objection having been already noticed by Government in the order above referred to, the Board beg leave now to forward the Principal Collector's application in his favor for the final decision of Government.

Revenue Board Office, Fort St. George 19th Feby 1844

Signed / E. C. Lovell, Acting Secretary

Read the following letter

To E. C. Lovell Esqre
Acting Secretary to the
Board of Revenue
Fort St. George

Sir,

From E. P. Thompson, Esqre
Acting Principal Collector of Canara

I have the honor to acknowledge the receipt of your letter of the 25th ultimo conveying the opinion of the Board of Revenue that the number of Penknives indented for, for the current year appears disproportionate to the Establishment and in reply to state

Fort St. George 19th February 1844

supply is for 2 years and that the Knives being bad sewer will not be sufficient

state that independent of the 20 individuals mentioned in your letter as requiring knives there are five European Officers and Nine Native Junctionaries including the Sheristadars whose duties require they should have Knives making a total of 34.

2. The supply in question is expected to last for two years and not for one as formerly but, instead of the Knives being better than they used to be they are much worse rendering their efficient preservation very difficult. The number indented for in 1837 was 72 - and this year 60.

Principal Collectors Cutcherry / Mangalore 3d February 1844 /

Signed / E. P. Thompson
Acting Principal Collector

Resolution thereon.

It appears from the foregoing letter that 34 Penknives are required for the use of the several Departments under the Principal Collector - The Board have passed that number to be supplied and trust that with care they may be preserved for two years, as under the Rules for the Issue of Stationery dated 17th May 1841. Penknives can only be supplied every other year.

Ordered

Read again letter from the Collector of Madras dated 10th ultimo and entered in Consultation 5th Instant.

Ordered that the following letter be sent in reply-

To The Collector of Madras

Sir,

I am directed by the Board of Revenue to acknowledge the receipt of your letter dated 10th January last, with copy of a correspondence with the Superintendent of Police regarding an attempt of a Boatman to evade the payment of Toll of Sundry Articles on Cochranes canal

2. The Board concur in the opinion expressed by the Superintendent of Police that the provisions of Regulation III of 1812. Section XVII and Act XXII of

58

To the Collector of Madras

Informing him in reply to his letter of the 10th Instant that the Board are of opinion that the attempt made by a boatman to evade the payment of Toll of Sundry articles on Cochranes Canal was not of such a nature as to call for punishment and ought not to have been forwarded to the Police Office and stating that they apprehend that in any case amounting to evident fraud the Police Magistrates will be found to possess sufficient powers to inflict a suitable punishment under the provisions of the Police Regulations

3266 Fort St. George 19th February 1844

of 1837 quoted in your letter have reference exclusively to the taxes of Government and are not applicable to the Canal Tolls.

3. The Board are not aware of any difficulty having been at any time experienced in collecting the Tolls and are of opinion that the case in question was not of such a nature as to call for punishment, it ought not therefore to have been forwarded to the Police Office - but in any case amounting to evident Grand Jury apprehend that the Police Magistrates will be found to possess sufficient powers to inflict a suitable punishment under the provisions of the general Police Regulations.

Description

3268-

Description of Ground the Propriety of which has

No	Names of the Situation Since proprietors of the when Ground Enclosed	Title under which held	Extent of Ground	Nature of the Ground
1	Staff Sergeant within the limits Enclosed of the Canton- ment of Otacamund on the Nail- gherries in the Collectorate of Coimbatore W. Holmes	Not Permission of the Staff Officer	C G ft 1 . .	Rocky
2	Mr George Norton	Do Do Partly in 1831 and partly in 1842	Partly Part of the lands for which Mr Norton now requests a consolidated Grant was for- merly held by a permission Certificate No 21. which was cancelled and a lease issued instead by Mr J. C. Brown under the sanction of Govt communicated by the Board of Revenue on the 9th Dec- ember 1839 the extent being Cst 9- 22- 0- the last mentioned lease No 38 has been duly assigned over to Mr Norton- By entry No 19 in the statement submitted to the Board on the 7th September 1837 it will be seen that he was then in possession of some other lands which he purchased from Major Jones Vide Cst 32- 1890. and that he paid the value thereof to Government on account of the Money lent to Major Jones on the Mortgage of the property- these two Lots make an aggregate of Cst 41- 22- 1890 and the additions made thereto comprise Cst 47 2- 1547. so that the total for which Mr Norton is now desirous of obtaining one Grant is	39 / 1107	Portion Ground and Swamp

19th February 1844

Applied for leases from the Government of Fort St. George.

How laid out after the 2 new buildings upon it	Quit Rent proposed per Cawney	Remarks of the Collector of Madras	Remarks of the Board of Revenue	Decision of Government
None	According to the Notification at page 60 of the Fort St. George Gazette dated 1st February 1837, the Quit Rent on this spot should pay is Rupees 5-4-0 per annum	His recommendation that sanction may be obtained for the leave applied for in this case being issued at the rate of assessment suggested in Col. 9	No. 1 The Board recommend that authority may be granted for the issue of the leave applied for by the Staff Sergeant Holmes at the rate of assessment proposed in Col. 9.	
The Staff Sergeant Garden Cottage and Garden adjoining Messrs. Norton's Garden. The rent is partly grass and partly prady and partly sweepings and all unrent Granted.	According to the Notification referred to above, three Cawnies of account of the like number of dwelling Houses already built on these lands should be assessed at Rs. 5-4-0 per Cawney and the rent at Rs. 1-2-4 per Cawney will be proper that a clause be attached to any new Grant which may be issued for the land referred to in this application to the effect that, if there shall be more dwelling Houses erected thereon than the present number one Cawney on account of each will be chargeable with Quit Rent at Rupees 5-4-0 per Annum	In this case the sanction of Government under date the 11th October 1837 was communicated to this Office by the Board on the 16th of the same Months for the issue of a lease to Mr. Norton for Cawnies 32-0-0 1390 if he was willing to accept one. This he did not take for the lands and for a quarter portion Col. 9-22-0-0 a lease was issued to Mr. Brown under the authority conveyed in the letter from the Board of 9th December 1839 referred to in Col. 5. As the Principal Collector of Coimbatore observes that he is not aware of a single objection to a compliance with Mr. Norton's request it is recommended that sanction may be obtained for the issue of a consolidated lease for the whole of the lands now in his occupancy, Viz. Col. 9-1-1037 at the rates of assessment and subject to the condition suggested in Col. 9. it being in the form denominated "on original Grant" which was submitted on the 19th March 1832 and the instrument No. 88, being previously cancelled.	No. 2 The Board recommend that sanction may be given for the issue of the consolidated lease applied for by Mr. George Norton for the lands now in his occupancy and subject to the assessment and conditions suggested by the Register of Government Grants, the lease No. 88 for a part of the above lands being previously cancelled. The Principal Collector of Coimbatore will be careful to see before the delivery of the Grant now recommended to be issued, that no usual right of way will be interfered with in consequence of its issue.
