Reporting upon the Settlement of Land Revenue of the Tinnevelly District for Fusly 1253 shewing a net Increase in the Demand of Rs 93642-12-7 in favor of the year and forwarding the usual Statements, together with the Report of the Sub Collector-

Sir

Para 1 I have the honor to report on the Settlement of the Land Revenue in this District for Fusly 1253 A.D. 1843/44 and to forward the usual Statements marked A to D and numbered 1 to 12.-

2. At the commencement of the Cart season of Fusly 1253 A.D. 1843/44 or in May and June, rain fell in all parts of the District and the Rivers and Channels received their fu supply which together with the Water remain ing in Tonnacolum Tanks from former sa plies, enabled the Ryots to carry on their C cultivation successfully to an extent beyo the year previous. In July and August the r failed, and in consequence the Lands in ger yielded (in Cart) less than the usual produ though not so much so as to demand remi entire drought occurred in some cases an short produce in others, the former to the tent of 26 Seed Cottahs and the latter 1 Seed Cottahs of Land, notwithstanding the

and short produce the total extent of Land entered in the accounts as productive in Curr. of Fusly 1253 A.D. 1843/44 exceeds that of the previous year by S.C. 4897.-

Peshanum 3 The season was unfavorable for Peshanum, the rains in September and the early part of October were but partial occasioning thereby a large decrease in Nunjah and Poonjah cultivation. the rains that fell from the latter part of October to the end of December contributed, not to any additional Nunjah and Poonjah cultivation, but rather to the growing of the Nunjah Peshanum and Poonjah Cultivation already made and to the Crops in general coming to maturity. In January and February the supply of water for Nunjah being insufficient, the crops situated on high levels and under Ponnacolum Tanks completely failed, and the extent of drought amounted in these cases to S.C. 252 in Money rented Villages, and to S.C. 41 in Amany Villages. From the same cause the extent of Land also for which remission was granted on account of short produce in Money rented Villages amounted to S.C. 568. From want of seasonable falls of rain, the Poonjah Lands also yielded but scanty produce, which though a misfortune to the Ryots in some degree operated

operated to raise the Nerack.-

The annexed is a list of Villages of various denominations as they now stand in the accounts of the District. Of the 840 Nunjah Poloongoo Villages for Fusly 1252 A.D. 1842/43 4 were taken for the experimental survey, and classed as such separately; thus shewing a decrease of 4 Villages in the N° of Poloongoo Villages for Fusly 1253 A.D. 1843/44 Of these 4 Villages 3 were repaired by 1 Village from each of the head of Pottom, Porcopoo and Poonjah Villages having been taken and added to the Poloongoo Villages for reasons here-under shewn

5 The Village of Pauracolum in the Stre[illegible] -oy goontum Talook was held till fa[illegible] 1252 on A.D. 1843/44 Porcopoo t[illegible] but the ho[illegible] having complained of the high Porcopoo Assessment and requested that the demand on the V[illegible]

should be collected according to Sivarum rate of the neighbouring Village, their request was complied with the Cowle cancelled, and the Village transferred to the head of Coloongoo- the lands being assessed at the neighbouring Village average as directed in Para 7 of the Board's Proceedings dated 30th March 1843.

6. The Village of Syanarcolum in the same Talook was till Fusly 1252 A.D 1842/43 entered among Poonjah Villages but in Fusly 1253 A.D 1843/44 some of the Lands having been cultivated with Nunjah produce it was transferred to the head of Coloongoo Villages.

7 The Village of Vadacarei in the Nauganary Talook was up to Fusly 1252 A.D 1842/43 entered under the head of Pottom, the Cultivation having been confined to the fixed extent of Patom Lands; but in Fusly 1253 A.D 1843/44 the cultivation having exceeded the fixed extent, the Excess was taxed in full and the Village carried to the Head of Coloongoo.—

8.— The decrease in the Number of Pottom and Poroopoo Villages caused by the above transfer was made up by 2 more Villages having been for-

for reasons given below, taken from the Head of Poonjah and added to that of Pottom and Poroopoo at one to each and the decrease of 3 Villages under the Head of Poonjah results from the arrangement above noticed.-

9 The Village of Veeralanellore in the Punjahmal Talook was originally a Pottom Village, but as no Nunjah cultivation was carried on in it, it was till Fusly 1252 A.D 1842/43 entered as Poonjah but in Fusly 1353 A.D 1843/44, the Lands having been cultivated as Nunjah the Village was again entered as a Pottom Village — The Village of Vaulavellum in the Streevygoontum Talook, was a Poroopoo one which having been erroneously entered till Fusly 1253 A.D 1842/43 under the head of Pottom was in Fusly 1253 A.D 1843/44 carried to the proper Head of Poroopoo.-

10 On reference to the Statement No. it will be seen that the extent of Nunjah Cultivation in unsettled and settled Villages for Fusly 1253 exceeds that of the previous year by S.C. 18-3 7/8 that the extent of Nunjah Cultivation in Coonum and that under the Head of Nunjah mail Poonjah and Vampyre, carried or not yet carried to the Head of Nunjah has fallen off to the amount shewn in the Statement

This as well as the decrease in Poonjah is chiefly owing to the unfavorable Peshanum season already noticed.-

11 It may be here remarked that the Nunjah cultivation, inclusive of Pottom and Porroopoo but exclusive of Numany lands, amounts in Fusly 1253 (A.D. 1843/44) to S.C. 101211 or S.C. 1368 more than that in the preceding Fusly in which it amounted to S.C. 99843 which was the highest extent cultivated in all the years antecedent to Fusly 1252.- (A.D. 1842/43)

12. The increase in the settled prices of Fusly 1253 (A.D. 1843/44) as shewn in the Marginal Statement № 3. is chiefly attributed to the diminished produce of the Carr harvest consequent on the failure of rain at a period when it was much required, and partly to the increased exportation of grain to Travancore, where from a similar failure of the usual rains a partial scarcity ensued, and transportation of grain from this District was encouraged by remission (by the Travancore Sircar) of the usual Frontier Duties duty on importation into that Territory: as well as by report of failure there, tending to raise the price here. The diminished Poonjah produce also was one cause of the rise in the Neruck.-

is however an increase in the total of Carr and Peshanum Cultivation of 1253/1843/44 of 16 1/4 above Fusly 1252/1842/43. This increase has occurred wholly in Carr in which the cultivation has increased from the supplying of water remaining in Ponnacolum Tank which having been large at the commencement of the Carr Season

15. The revenue derived from Warapat Villages in Fusly 1253/1843/44 amounts to Rupees 102629 15 6 which in comparison with that of the previous year shews an increase of Rupees 19873 5 1 in favor of the year under report. This large increase is attributable mainly to 4 Causes viz

1st By the extent of warapat land Cultivated in fusly 1253/1843/44 having been greater than in the previous year by Lbs 710 16 1 yielding an additional revenue of Rupees 7523 13 "

of to the extent shown, notwithstanding this result (owing to the unfavourableness of the season already noticed) the Revenue of the Aumany Villages for Fasly 1253 A.D. 1843/44 is greater by Rupees 424-4-5 than that of the preceding year. this Increase is solely attributable to the high rate of the Peruck Sibbunum which be observed that the selling prices at which the Aumany grain is usually sold are less than those for the whole District. but it must be remarked that this deficiency which is usual, is owing to causes inherent in the Aumany Villages the grain produced in Aumany Villages is generally of a bad quality, and the Villages themselves are situated on the borders of the Western Hills and are seldom resorted to by grain Merchants, the roads being nearly impassable, and the grain of a quality too inferior to attract purchasers over such obstacles. moreover the prices in the Talooks of Sumkerumarcoil and Tencausey (between which the 18 Aumany Villages comprizing the Chocumputty Estate are divided) nearly approximate to those in Chocumputty as shown in the Margin, and it may here be once for all remarked

remarked that the want of passable Carriage Roads operates materially against the sale of grain to the prejudice of Ryot and Government.

17. Under the head of Pottom there is an increase of Rupees 10,348-10 which may be accounted for as arising from the extent of lands cultivated and the rates of assessment which these lands bore, having been higher in Fasly 1253 A.D. 1843/44 than in the preceding year and also from the Nerruck having arisen to the extent shown in the Marginal Statement No. 7.

I have the honor to be,
Sir,
Your most obedient
humble Servant,
[illegible]

Fort St George, 16th December 1844.

21. The 4 experimental Villages in which the Survey was commenced and the accounts sent to the Board in October 1843 have been settled in this Summabundy on the new assessment of the Survey. this seemed desirable and necessary in the absence of any orders from the Board to the contrary; for several reasons, had the late measurement and assessment not been acted on, the Survey would hardly be considered by the Ryots as a real transaction, intended under the Board's future sanction, to be permanent and the new survey being acted on, in these 4 Villages, if founded by the Ryots not to fall oppressively will tend to introduce the measure favorably to

to their minds and aid in facilitating our future operations in other Villages. To have settled these 4 Villages again according to the old and former process would have seemed a contradiction after testing and proposing to equalize more fairly the old assessment, and discovering and remedying the irregularities ascertained to exist, it seemed therefore desirable on every account to adopt the new settlement in these Villages, for the present fusly, pending the Hon. confirmation, and the measure will I trust meet approval.

22. It will be satisfactory to the Board now to learn that the settlement in those 4 Villages appears to be working well, the people express themselves content, "if not liable to future change or increase" and under a conditional assurance to that effect, which I have made them pending the Board orders, they have engaged to undertake an increase of Cultivation to the extent of 60 Cawnies Nunjah. It has also been useful as enabling the Ryots of neighbouring Villages to have some definite idea of the principles and working of the proposed settlement, to which they have now in the main expressed their assent.

23. A comparison of the settlement of the 4 Villages between Fusties 1252 AD 1842/43 and 1253 1843/44 is given in Statement No 11 from which it will

will be seen that up to Fusly 1252 there were different heads such as Carr Peishanum, Nunjahmad Poonjah, Pottom, Poroopoo, and Well Cultivation &c., but in Fusly 1253 / A.D. 1843/44 all wet lands have been entered under two heads Viz.t Nunjah one Crop, and Poonjah Bagayet the extent of Nunjah cultivation amounts in Fusly 1253 / A.D. 1843/44 to Cawnies 592 2/64 of which Cawnies 541 29/64 have yielded only one Crop, and paid full Teerwah, amounting to Rupees 3-15-2 4- Cawnies 47 3/16 which have yielded two Crops have paid full assessment on the first Crop and half on the 2d or additional Crop and Cawnies 3 1/2 which were Cultivated with Betel, were assessed at three times the Nunjah Taxe Betel in this District always bearing a high assessment considerably above the rate here specified. Of the 592 2/64 Cawnies of land above-mentioned, 2 1/8 Cawnies is the total of several pieces of land laid waste in fields but entered in the accounts as Cultivated. This was done in order to deter the Ryots from laying their fields partially waste, and also to secure the Boundaries of fields from being effaced, which would be the case had not some strictness been enforced in this respect but as the Ryots have since earnestly requested that

+ See 2d Survey Report para 8th dated 15th Dec.r 1843.

that the land laid waste should be excluded from the Accounts, and having promised not so to lay portions of fields waste hereafter, the teerwah on these waste portions in Nunjah as well as in Bagayet, was remitted as shewn in the Statement appended to Para 13. The average Government demand per Seed Cottah of Nunjah land was in Fusly 1252 / A.D. 1842/43 Rupees 6-14-7 1/4 and in Fusly 1253 / A.D. 1843/44 it amounts to Rupees 8-9-3 9/16 per Seed Cottah shewing an increase in the average rate of Rupees 1-10 8 7/16.

24 Lands entered in Fusly 1252 / A.D. 1842/43 under the heads of Well Cultivation, were in Fusly 1253 / A.D. 1843/44 classed as Poonjah Bagayet and

60 664 amount to Cawnies 44 3/64, to which adding

60 666 Cawnies 2 49/64 which were till last year Cultivated with Poonjah produce but in Fusly 1253 / 1843/44 Cultivated with garden produce by the assistance of water from old Wells, the total extent of Bagayet land comes to Cawnies

60 669 46 13/16 of which 4 3/16 Cawnies form the total of several pieces of land laid waste in Cultivated fields, but entered in the accounts as Cultivated the average

Teerwah.

Teerwah per Seed Cottah of Bagayet land was in fusly 1252 A.D. 1842/43 Rupees 7–2–5 in fusly 1253 1843/44 it is Rupees 6–5–7/4 the higher rate founded on the Crops and not on the capability of the soil, having been found too heavy—

25. By the above Statement No 11 it will be seen that the Wasiy of the 4 settled Villages for Fusly 1253 A.D. 1843/44 compared with that of the preceding year, shows on the whole a net Increase of Rupees 992.6.11 which the Board will I trust deem a satisfactory result—

26. The revenue derived from Poonjah land both in the settled and unsettled Villages is given in the Statement No 12, from which it will be seen that the Cultivation under the Head of Poonjah, decreased in fusly 1253 A.D. 1843/44 to the extent of chains 13105 57/64, and the revenue fell short of that of Fusly 1252 A.D. 1842/43 by Rupees 38998— to which the Decrease of Rupees 21396–10–2 by lands bearing a lower rate of

of assessment having been brought under
Cultivation in excess of Fusly 1252 / A.D. 1842/43 being en-
added, the total decrease amounts to Rupees
60:394—10—2 as shewn in the foregoing State-
=ment No 12. The net Decrease in the Cultiva-
=tion of all the 6 Classes of Poonjah, has, as
has been already observed, arisen Chiefly from
unseasonable falls of rain during Peshanum,
and occurred mainly in the dry Talooks
of Streevellyputtoor, Sattoor, Sunkerenainarcoil
and Ottapedarum—

27. The following Statement
No 13 Shews the Revenue derived from
Poonjah land in the 4 settled Villages,
it amounts for Fusly 1253 / A.D. 1843/44 to Rupees 2367-5-
8 being Rupees 388—12—6 short of that of
Fusly 1252 / A.D. 1842/43 — The reason assigned for the
Decrease in the Poonjah revenue in
the

Fort St. George 16th December 1844.

the preceding para, is also applicable to
the Decrease under this head— All the
Poonjah lands in the District were
formerly surveyed, Classed, and the
assessment laid on each field fixed
with reference to the capability of the
Soil— in late years the Ryots have by
partially Cultivating portions of
fields obliterated the marks and Boun-
=daries, rendering the extent of fields
uncertain and changeable, and a 2d
Survey absolutely necessary— To prevent
the occurrence of this evil, the Poonjah
fields that were in Fusly 1253 / A.D. 1843/44 —
partially

partially Cultivated, were entered as wholly Cultivated and carried to account, but afterwards, at the earnest request of the Ryots, the waste thus carried to account was excluded, and remission granted, on condition that if the Ryots again failed to Cultivate their fields to the full extent, such fields will be entered as Cultivated, and the tax levied accordingly and wherever the extent of one field was found on examination inconveniently large it was subdivided and a distinctive number given to it.—

28 The Cotton crop has been an unusually fine one both in quality and quantity, hot and dry weather chiefly desirable for the Cotton about the time of gathering from March to May having been experienced, though unfavorable to other Poonjah produce. The demand for it this year at Tutucorin has been large; chiefly for the China, and some for the English Market, and it appears likely to rise in importance and value as a main staple of the District. Four Cotton Screws are now at work in this District and I was lately at the opening of a fifth a very powerful one on the Hydraulic principle. others are also said to be in contemplation.-

The decrease in the 1st Item was caused by many Tamarind Trees having yielded less produce than in Fusly 1252 / A.D. 1842/43 that in the 2nd Item was occasioned by lower offers, and in the 4th Item by certain Trees paying Cutgoottah of Rupees 36 — 1 — 0 having been, agreeably to the order of the Board dated 2nd November 1843, resumed and taxed in Full. The decrease in these three Items amounts to Rupees 612 — 13 — 2, from which the increase of Rupees 598 - 13 - 3, brought to account in consequence of certain Topes held under Aumany yielding fully, being deducted the net decrease remains at Rupees 13 - 15 — 11 as shewn in Statement No. 15.-

31 The increase of Rupees 1178-4-4 under this Head was caused by more Trees having been brought to account as "bearing" and by higher offers being received for the rent of the Palmirahs in Item No. 2.-

32 The Board and Government were good enough to sanction a measure proposed by me in February last encouraging Palmirah planting on the "Teree" or large Sanddrifts on the Southern plains of Tinnevelly, at half Teermah-I mentioned to the Board in my letter of 15th February the evil and annoyance of the Sand Hills and the frequent necessity for Estimates for clearing the neighbouring Channels and Tanks of the Drifting sand with which they are liable to be yearly choked, to shew that I did not overstate the Evil, I may mention that

that very lately the Tahsildar of Pun=

34 The revenue derived from Woodengand in Fusly 1253 A.D. 1843/44 exceeds that of the previous year by Rupees 59-2-2 chiefly caused by certain Thorn Jungles which had been hitherto erroneously entered under the Head of Moturpha having been in Fusly 1253 A.D. 1843/44 brought under this Head.-

35. Of the 6 Talooks in the Margin, where these Jungles exist the Punjahmal Talook contains the most. These had been rented out for 7 years, the lease expireds in Fusly A.D.

Fusly 1252 A.D. 1842/43 and as the Board in their Proceedings on the Jummahbundy report of Fusly 1247 A.D. 1837/38 dated 11th April 1839 declared their opinion against leasing Woodengand these lands in Punjahmal were assessed in Fusly 1253 A.D. 1843/44 as Poonjah according to Tarum, at Rupees 2050-2-9. as shewn in the Marginal Statement No. 18. In cases where the Ryots expressed an unwillingness to Poonjah Assessment the Jungles were kept under Cirkar management. The 1st Item of Rupees 373-7-7 is the amount of Rent of thorn Jungles in the remaining 5 Talooks which have been rented out for more than one year and which will be closed with the termination of the present Fusly 1254 A.D. 1844/45.-

36. The Jungles under rents, and those under Aumany will be all assessed as Poonjah so soon as the rents are closed and the Ryots consent to a Poonjah assessment, bringing these tracts under the principle desired by the Board an assessment on the land and not on the produce.-

37 With reference to these Woodengand or Thorn Jungles chiefly in the Punjahmal Talook it was necessary formerly to give them

them when rented for 7 years. The Ryots are unwilling to take them for a shorter period - that time being required, like Copse-wood in England to render them fit for cutting - these Jungles are also essentially necessary to the Palmirah Cultivators. they grow in Soils of nearly pure sand where nothing but the Palmirah Tree and Thorn bush will flourish and the wood of the latter is used to boil the juice of the former (for Jaggery) A second use of the thorn is that it is employed as the only procurable fence to the fields in those parts, and 3rdly large flocks of goats and sheep live on the young shoots of these Jungles during the dry season when all grass disappears from these sandy plains.

38 The Board perhaps fear the thorn Jungles interfere with grain cultivation (poonjah). this is by no means the case and even if it were so, still the same extent of land under thorns pays usually the same to Government as if under dry grain. the fact is the soil is so poor and sandy that little else except Palmirahs and Thorn bushes will grow, these striking their roots some what deeper into the sub soil find moisture and support where grain would find none these lands are only capable of Poonjah cultivation

Cultivation after about 7 years of Jungle - the Jungles being then cut and the roots burnt, the falling leaves and decaying vegetation, together with the manure left by the Flocks of Sheep and Goats yearly frequenting them forms a top dressing or artificial soil, which will yield a grain crop for 1 or 2 years, when the upper soil being again exhausted, the land must revert to Thorn Jungle and the former process for restoration, or must lie waste - Under the peculiar circumstances and nature of these poor lands the Board will perceive that the Thorn Jungle is the best and in fact the only profitable mode of employing them. as the Ryots are practically aware of it - If rented for 1 year as the Board suggested the renter would of course for his own profit cut down all the trees young or old. and the objects and use of the Thorn Jungle would be nearly lost.

43. The remission granted for Spots waste in Cultivated fields in the 4 Turum or Settled Villages mentioned in paras 23 and 27, amounts as per Statement No. 23 to Rupees 393-9-7. This indulgence was necessary, as it has not been hitherto customary in this Zillah to assess waste portions in Cultivated fields, and the ryots pleaded ignorance of this intended measure.-

44. It seemed also desirable to make this concession in these 4 Villages, in the present instance, in order to

Fort St. George 16th December 1844.

to conciliate and satisfy them- as on the good feeling and contentment of these 4 Villages depends much of the success and facility of the carrying out of the future Survey and assessment- all the Ryots have been anxiously looking to the state of the 4 Villages, and if the pressure is made too heavy on these, many others will hold back their assent from a similar assessment in their Villages- All however have been now distinctly given to understand that in future no remissions will be allowed for small portions left waste in entire fields, and the practice will be gradually abandoned.-

45. The increase in the 1st 2 Items of Enam was caused by the grain in which the Enam is usually paid having been commuted into money at a better price than in Fusly 1252 A.D. 1842/43. and by certain Enams belonging to

to Pagodas Vcu which were hitherto erroneously entered as Enams to Individuals having been in Fusly 1253 / A.D. 1843/43 re-attached to Pagodas Vcu after a full enquiry. That in the 5th Item was occasioned by high prices at which the grain given to Village Servants was valued in Fusly 1253 / A.D. 1843/44. The Decrease in the 3d Item was caused by certain Enams entered under this Head having been as abovementioned included with 1st & 2d Items of Enams, and that in the 4th Item is owing to the falling of in the Poonjah Cultivation of Fusly 1253 / A.D. 1843/44.

The

Fort St. George 16th December 1844.

48- The Decrease under the head of Curnum and Tank Mara wds caused by the amount derived from these Sources, which were hitherto entered Separately, having been in Fusly 1253 A.D. 1843/44- included with the Iyen as directed by the Board in their Proceedings dated 19th November 1836- That under the head of "Bungalow and Gardens held without grants," was caused by the Revenue derived from this Item which was last year entered separately (for reasons explained in my Summahbundy Report for Fusly 1252 A.D. 1843/43) having been in the year under report included with the Ayen as it ought to be- That under the Head of Hill rent was occasioned by lower offers received for the rent of the Hill produce; and that under the Head of Desacaveb on Surva en Enam Villages is consequent on the decreased Poonjah Cultivation in these Villages in Fusly 1253- A.D. 1843/44 falling

falling off in Cultivation in the Chuttrum Villages is the cause of the deficiency in the Chuttrum Fund- The decrease under these different Heads being added together the total amounts to Rupees 56087-8-7- from which the Increase of Rupees 3822-9-10- in Extra Revenue (as Shown and explained in the accompanying Statement No. 8.) and that under the head of Tripany amounting to Rupees 660-14-9- (caused by high prices of Fusly 1253 A.D. 1843/44) are both together Rupees 4483-8-7- being deducted, the net decrease remains at Rupees 51604 as shewn in Statement No. 26.-

52.- The balance at the end of Fusly 1253 and A.D. 1843/44 Rupees 16,634-2-1. which by subsequent collections to 15th November 1844 was reduced to Rupees 11,229-10-7 being less than the Balance of the same period in Fusly 1252 A.D. 1842/43 by Rupees 543-2-4 as shewn in Statement No. 30. The above balance of Rupees 11,229-10-7 may be classed under 3 heads as follows.-

53.- Of the balance entered under the Head of Recoverable, Rupees 290-2-4 is due by the Ryots of certain Ayen Villages and Rupees 6900 by the Woorcaud Zemindar. Both these sums are in Course of Collection.-

54.- The Doubtful balance Comprehends 32 Items which are as follows.-

Of the Sum of Rupees 3286-1-11. entered as Item Rupees 2652-1-4. have been as mentioned in my letter of 24th October 1844 collected and

in deposit pending a final and amicable settlement of the dispute.-

55.- Of the balance of Rupees 503-8-0 entered under the head of Irrecoverable Rupees 203-12-0 is the value of the excess quantity of grain erroneously added to the 7 years average Mailwarium of the Villages of Aizoomoogo-mungalum in the Streevygoontum Taloork and which exceeds the Ryots demand should be remitted. Rupees 173-4-6 is the amount of Boundary adjustment balance which was lately decided after full enquiry to belong to certain Zemindars, and Rupees 126-7-6 is the amount of taxes erroneously laid on Crops in excess of the Ordinary assessment and on Palmirahs past bearing and on some waste lands not cultivated.-

56.- Under the above explanation I beg to recommend that the Sum of Rupees 503-8-0 being the irrecoverable Balance of Fusly 1253 A.D. 1843/44 be remitted.-

57.- In conclusion I have the honor to forward the Original Report of the Sub Collector Mr. Whittingham on the Settlement of the 4 Taloks Comprizing the Division under his charge for the Fusly in question. From this Gentleman I have always received the most cordial Co-operation and assistance, and much regret that I am about to lose his services in the District: Mr. Elton, who Succeeds Mr. Silver as Special Assistant, joined the District only at the end of May, when the settlement was about to

to be concluded. He was placed in charge of the Revenue of 2 Talooks and the Magisterial Du=ties of 2 others, and I have every prospect of deriving Zealous and efficient Assistance from him. Mr. Levinge the Acting Head Assistant had entrusted to him the de=tails of the Salt and Sea Custom Departments, in addition to the Management of the revenue of 2 Talooks and the Police of 3 others. he was relieved by Mr. Pringle only for a about 2 Months and resumed the duties of the Head Assistant immediately on the departure of the latter Gentlemen again to Madras on Sick leave; and has conducted the duties in a manner most creditable to himself, as satisfactory to me. The Extra Assistant Mr. Forbes, had the Superintendance of the Sayer and the Revenue and Police of the 2 Talooks to the South of the District, Mr. Forbes' general intelligence and habits of business rendered him a valuable Assis=tant. and his departure for another District was a serious loss to me. Mr. Grant, my 2d Assistant, is at present employed in the Petition Depart=ment, under my immediate Super=vision; and from the intelligence and activity he has already displayed,

C. B. Thomas Esqre

Collector of Tinnevelly

Sir,

Para. 1. I have the honor to report the conclusion of the Settlement for Fusly 1253. of the 4 Talooks under my charge Viz. Shermadavy Brommadesam Sunkenmar. coil and Streevilly pottah; and to forward the usual accounts numbered from 1 to 10.

No. 1 Villages.

2. Table No. 1 shews the number and description of Villages of every Division as they stood during the two last Fuslies, no change having been made in them during the year under review, except in the Village of Vylee in which some Punjah land has this year been cultivated with Nunjah, and the Village consequently been included

1997. Fort St. George 16th December 1846.

included in the Money Rented Villages.

3. The last Season of Fusly 1253 was on the whole a favorable one. The rains which fell in the Months of April and May were more abundant than is usual in those Months, and were beneficial in enabling the Ryots to prepare their Ayaput lands for the reception of last Seed at an earlier period, thereby rendering the crops less liable to injury from an unfavorable termination of the season. Ponacolums Tanks were also partially filled by these rains, and enabled the people to extend their cultivation under Tanks of this nature. From the commencement of June to the middle of July continual and heavy Showers fell on the Hills which filled the Ayaput Tanks and kept the channels well replenished, and the partial rains which subsequently followed also proved highly beneficial to the last cultivation which was extended considerably beyond that of the preceding Fusly and came to full maturity.

4. The Peshonam Season of Fusly 1253 compared with that of Fusly 1252 was less favorable throughout. The rains which fell in September were much lighter and much more partial than usual, as shewn by

From St. George 16th December 1846.

by the usual periodical accounts of rain fallen in the Villages of the Division. These September rains are of great importance as it is during this Month that the greater part of the Ponjah land is brought under cultivation. During the Months of October and November rains fell but not in the usual abundance, and though the rivers and channels which feed the Agraput Tanks were well supplied, there was a deficiency of water in the Ponacolum Tanks dependant on the local rains. at a later period the monsoon proved light, and from the month of December no rain fell to be of any material service, and consequently in some fields the crops withered or yielded a scanty produce rendering remission of tax necessary. A considerable decrease has occurred in the Peshcoush Nunjah and Ponjah cultivation during the Fusly under notice. The deficiency in the latter item which occurred particularly in the Talook of Streevilly poottore, is partly attributable to the unfavourable commencement of the Peshcoush season as above mentioned, and partly also to a murrain that prevailed among the cattle during the Months of October and November in the above Talooks.

Fort St. George 16th December 1804.

9 The extent of Poonjah cultivation of Fusly 1253 falls short of that of Fusly 1252 by 8270 11/16 chains, deducting therefrom 600 13/64 chains being the increased cultivation of Poonjah raised under old and new wells, the net decrease stands at 7670 31/64 chains. A large portion of this decrease amounting to 4243 1/32 Chains which occurred in the Talook of Shreevilly pootoor, is attributable as already observed to the unpropitious nature of the seasons, and also to a great mortality among the cattle in the Months of October and November. At the commencement of the present year I proceeded to the Shreevilly pootoor Talook and held my Cutcherry there for two Months and the state of the Poonjah cultivation of that Talook having attracted my attention, I instituted an examination of the cultivated lands of as many Villages as the number of public servants available in my own Cutchery and the 4 Talooks under my charge, would permit. The increase derived from this remeasurement of the lands was not considerable amounting only to 250 Chains

In

Fort St. George 18th December 1844.

In the Village of Vattrayeroopoo in which the greatest decrease occurred Viz.t 777 chains. I held my Cutcherry for some days and the cause of this decrease in the cultivation of Poonjah in that Village was ascertained to have been the mortality of the cattle and the unfavorable nature of the season at the period of the Poonjah cultivation. These unfavorable circumstances affected the Poonjah cultivation of the greater part of the Talook of Sreevilly pootoor.

12. The Net Revenue derived from Nunjah Waraput or full rated wet lands in the Fusly under consideration exceeds that of the previous year by Rupees 64858-6-2. The additional Revenue derived from extended cultivation amounts to Rupees 7366-2-3, and the increase produced by the different rates of Melwarum to Rupees 20856-14-8. To these must be added the increase consequent on the rise of prices amounting to Rupees 4071-15-4 forming a total of Rupees 68935-"-3. If from this sum be deducted the Amount of remissions amounting to Rupees 4076-10-1, the result will shew a net increase of Rupees 64858-6-2 as above stated and as shewn in the Table No. 11.—

Thirdly.- There is a net decrease of Pagodas 837 : 4 : 6 as per Statement No 12 on the Summah of the Nunjah Wanapur Annany Villages. The decrease is owing to the Annany Villages not having been able to cultivate the whole of their cultivation from a difficulty in procuring a sufficient supply of water. The Collector's Annual Report for Fasly 1255 : 1 : 1 - 10 states that the decreased Pagodas 837 : 4 : 6 arises from the Annany Villages not having been able to cultivate the whole of their cultivation, the Canal Irrigation having failed in consequence of the Canal not having been cleared out. The decrease in the Melwaram Collection of Fasly 1255 : 1 : 1 - 10 arises from the Annany Villages not having been able to cultivate the whole of their cultivation, the Canal Irrigation having failed in consequence of the Canal not having been cleared out.

the cause of which increase I have adverted to in my Report of last year. There is a falling off in the Moturpha tax amounting to Rupees 973—3—4, of which Rupees 362—2—2 is the amount of defalcation occasioned by the Collections made on account of the Sunkerninarconil Pagoda having been, under the late orders of the Court of Directors, made over to the Trustees of the above Pagoda, and the remaining sum of Rupees 610—13—2 is the amount of deficiency caused partly by the exemption of certain number of cultivating Ryots from the payment of Moturpha, and partly also by a smaller number of persons having been subjected to the payment of loom tax, the total deficit as above stated amounts to Rupees 973—3—4. If this sum be deducted from the above excess on the Fish Rent of Rupees 4,343—11—8 the Net increase remains at Rupees 3,370—8—4

Sir

From the Collector of Malabar & Canara

I have the honor to request you will lay before the Board of Revenue the accompanying Statements connected with the settlement of the Land Revenue of Malabar for Fusly 1253 A.D. 1843/44.

Reporting on the Settlement of the Land Revenue of Malabar for Fusly 1253 A.D. 1843/44

Season and its effect upon Cultivation and Produce

Although there was an abundance of Rain about 140 inches, the season cannot be said to have been altogether a favorable one, for from the date the 21st May 1843, the S.W. Monsoon set in to the end of June the rain was so heavy and continual that in some parts of the District the lands situated on the banks of Rivers and Nullahs were flooded for several days, and much to the injury of the Kurrny or first crop. In July and August the fall of rain was tolerably seasonable, but a failure occurred in the two following months of September and October, the period when the cultivation of the second crop commences, and the outturn of this crop would have been more generally unfavorable than it has, but for some unexpected showers which fell in the early part of December. Setting aside the partial

partial failures of crops, which will be more fully treated of under the head of Remissions the supply of Grain may on the whole, be said to have been an average one as the quantity taken away from the District both by Sea and Land during the year under review was equal to the exportation of the antecedent year, the decrease of Rupees 27,325 apparent in the accompanying statement No. 22 being entirely owing to the value of Grain exported to Coimbatore and other Eastern Districts since April last the date of the abolition of the Frontier duty not being comprized in the said statement. The surplus of the produce wheat remained in the District was also quite ample for home consumption until the next harvest.

+ Estimated at 30,900 Rs. for three months.

+ The Market value of Rice may be quoted at about 5 per Cent above the selling prices of 1252 / 1842/43

3. The season was favorable for all species of Garden produce except Pepper, this not to any great extent. There was a superabundance of the raw produce of the Cocoanut tree. the effect of the good season experienced in the two previous years which added to a falling off in the external demand occasioned a decrease

See para 3 of the Report for 1251 / 1841/42

" 2 of Do. 1252 / 1842/43

decrease of about 5 per Cent in the wholesale price of Cocoanuts and Kapparahs and a deficiency in the exportation of these articles amounting to Rupees 75,686 and Rupees 31,662 respectively. It will however be seen that more than two thirds of this deficiency has been made up by an excess in the exportation of the manufactured produce of the Cocoanut tree, Viz.ⁿ, Oil, Coir and Rope; the great decrease of Rupees 1,64,120 in the article of Pepper is entirely attributable to a depreciation in the demand for this spice for exportation to Bombay. Upon the whole it will be observed that the exportation of the staples of this District in 1253 / 1843/44 amounts to Rupees 32,74,979, which is Rupees 1,5,081 below Fusly 1252 / 1842/43 when there was an increase of Rupees 2,60,793

See Statement No. 22.

+ Rs. 32,366 & 43,272

* Part of this decrease is attributable to the value of Goods taken from Palghaut to Coimbatore since April last the date of the abolition of the Sayer not being included in the Accounts.

4 The Net decrease of Rupees 610-2-5 exhibited in the Abstract of the Land Settlement given in the Margen is nominal. It will be seen that the Settlement of 1252/1842/43 is inclusive of a sum of Rupees 4,500-3-10 the collections made on account of the Neilgherries up to the 9th April 1843. when the Hills were transferred to the Collectorate of Coimbatore as explained in Para 10 of my Report for that Fusly — No such collection is credited in the accounts for 1253/1843/44 if therefore the above mentioned sum of Rupees 4,500-3-10 be deducted the result of the Settlement of the year now reported on will be an increase of

of Rupees 3890–1–5– instead of the Decrease already adverted to.

same extent had to be taken into consider
ation in the adjoining Talaks of Kootnaad
and Betutnaad in addition to those that
spring from the failure of the after rains,
also alluded to in my 2d Para. The Board
may rely on the fact of these remissions
having been given with discretion and, in
accordance with their repeated instructions
Kootnaad where the remissions amounted
to Rupees 493—8—6. has, it must be remem-
bered a larger number of poor Ryots than
almost any other division in Malabar
No 4. The total Summa of the Lands composing
the Farm made over to the Chermurs
was Rupees 432—8—10 the crop they raised
last year proved a very bad one, so that,
after Deducting the expenses of cultivation
according to the usages of that part of the
Country, there remained only Rupees 189-2-4.
to be brought to account, the Difference, Viz.
Rupees 243— 6— 6. is therefore entered as
remission.

It is with much regret that
I have to express my opinion after a trial
of nearly 2 years that the scheme of
ameliorating the condition of the escheated
Chermurs by making them small landed
proprietors

+ the out turn of this year will I fear be little better than that of last

last tho' I have taken reasonable pains to secure its being so.

proprietors is not likely to succeed— My
attempts to create a spirit of independence
in them have utterly failed. I fully explain-
ed to them that if they would exert them-
selves and turn out a good crop the Net proceeds
should be at their disposal to be spent as
was most for their advantage— but tho' they
promised fair in my presence it was impos-
sible to get them to exert themselves after
my back was turned— Like the free Negroes
of Hayti they seem sufficiently contented
so long as they can obtain the mere subsist-
ence they have hitherto been accustomed
to, and that being necessarily assured to
them while working on the Farm, they will
not work further than they are obliged
to do.

The person whom I appointed as
a Superintendent or bailiff, and whose
interests were to depend on the success which
attended his exertions could do nothing
by the only means (those of persuasion)
he was authorized to use towards the
Chermurs— There is no doubt that the poor
out turn of the crop is owing to their negligence
they having neither ploughed, weeded

or watched - as they would have done had they been under the eye of a master. The private lands in the vicinity yielded an average produce I can only recommend that the former system be reverted to - that the farm be leased on the most advantageous terms procurable to any person who may be willing to take it and that the Chermars be left to engage themselves as free laborers on the farm or elsewhere as they think fit.

It is with reluctance that I advert at this opinion but I see no use in deferring it. The Chermars may eventually prove themselves worthy of a further trial, and it can then be repeated, but I know not when to anticipate such a period I had hoped to improve and strengthen the minds of the younger branches at least by giving them a simple education, but so great was the ignorant horror of the whole body of any such process that tho' I introduced a schoolmaster with all possible caution, they ran off into the Jungle the next day, and left the farm utterly unattended

Fort St. George 16th December 1844

unattended till I had them recalled with an assurance that they should not be forced to learn any thing against their will. This detail is hardly fitted for a Summary report but I could not explain the cause of the remission in a satisfactory manner without entering into it.

Passing over item No. 5 which speaks for itself I shall briefly notice No. 6 & 7 by stating that every possible effort is being made towards reclaiming the wastes on which the remissions comprised in these items are recommended.

In the item No. 8 are included a few lands of this description, the re-occupancy of which cannot be accomplished unless a reduction be made in the original assessment in other words, unless the revenue hereafter payable be made proportionate to the produce of such unfavorably situated lands.

Reg. applies to nine small lands the soil of which was so ill adapted for Rice cultivation that they were converted into Cocoanut Gardens. The trees having become productive are taxed, and the amount of the assessment

assessment thus imposed and carried to the credit of "Garden Revenue" is Rupees 26 9 4 or Rupees 16-13-7 above the old Rice land assessment - Here I would with reference to the observations contained in the 16th Para of the Board's Proceedings dated 22d August last, solicit their orders as to whether the latter / the Rice land assessment / should still be borne in the accounts, or at once expunged therefrom - The same doubt exists in respect to item No. 10 as the Lands to which it applies do not bear a fixed assessment, but are annually taxed with reference to the extent of their cultivation and produce, and the result credited and debited to the respective heads of + Increase & Decrease, on the same plan which regulates the settlement of the Dry grain Cultivation - Land of the description here alluded to is termed, in this District, "Poonjah" the cultivation is carried on after the monsoon is over and the inundations begin to subside, by throwing out temporary enclosures in the beds of sweet water Rivers and Lakes and then baling the water out of them by wheels and Picottahs - The labor is great and the

Note The land under the yenamakul Down is all of this description

success

success depends on more than one contingency a very early Freshe, which will break down the slight barrier of the enclosure, or an ingress of Salt water / notwithstanding the means used to prevent it / from the back waters - under the influence of the tide in the neighbourhood of which almost all the Poonjah land is situated will cause a partial or entire failure - It seems therefore hardly possible to levy a permanent assessment on lands of this nature and hence the doubt of the propriety of preserving in the accounts the amount of the decrease which annually occurs - Were all such items" brought on the accounts at the full assessment, and the difference shewn annually as remission" as directed by the Board, I apprehend the measure would nominally swell the Summa, and gradually enhanced the amount for which Remissions will be annually required.

Para 16 Board's Proceedings of 22d August 1844

Item No. 11 Rs. 2-14-4 Part of this small sum is the Sheistom or Landlords share of a Garden hitherto considered to form part of an escheated farm, but which Garden has now been proved to belong to a poor

Rs 4-12-11 Chermur, The Landlord's share has accordingly been relinquished to him, the land tax
Rs 2-1-5 alone being taken by Government. The residue is decrease in the Landlord's share of a small escheated Garden which is in a deteriorated condition. These items more properly belong to the "Garden Revenue" but hitherto the amount of the whole farm appears to have been blended with the Rice land assessment which is the reason of the present deduction being made under this Head Rs 12. Wynaad the causes of the decrease which occurred in these Talook being explained in the 6th Para of Mr Sub Collector Crozier's Report / a Copy of which

contumacious conduct led to the attachment and

the land against which the arrears stood) to the
extent of Rupees 152-2-7.

Outstanding Balances 17—

By the enclosure Statement No. 25 it will be perceived that the arrears on account of the Land Revenue of Fuslies anterior to 1253/1843/44 outstanding at its commencement, amounted to Rupees 12,281—15—7, of which Rupees 9,660—14—6 were realized in the course of it. Rupees 288—8— are struck out of the account under the sanction of Government 8/8th October 1844 Of the residue Viz.t. Rupees 2,332—9—7 Rupees 198—3—9 is supposed to be recoverable. Rupees 106—5—7 stands as doubtful pending the enquiry necessary for its final disposal and Rupees 1,027†—15—9 appearing to be irrecoverable, I beg to recommend that sanction be granted for writing it off to Profit and Loss. In the latter amount is included the annual sum of Rupees 38 a fraction, noticed in the 4th Para. of the Board's Proceedings the amount is assessment of certain small plots of Rice fields

fields situated on the borders of the Cochin Rajah's territory and claimed by that state as being within its limits. The claim does not ever appear to have been admitted by the Revenue authorities of this District.

The case has been pending for several years and I have lately been in correspondence with the Resident on the subject, and trust the dispute will ere long be brought to a termination. Admitting however that the result will be in favor of Government it would, I conceive, be a harsh measure to demand the arrears, as no less than fifteen poor Ryots are involved in the small sum of Rupees 3 10 4.

Waste Lands 18

×No. 26

By the accompanying †Statement the Board will perceive that during the late Fusly Cowles were issued for 117 Cawnies, Minus a fraction, of waste Land taken up for Rice cultivation, which in course of time will yield a revenue of about 227 Rupees, the period of total exemption allowed, with advertence to the locality of the lands, and the labor and expense required for rendering them productive, varies from 1 to 4 years, and the same consideration

consideration has regulated the graduated portion of assessment to be received at the expiration of the period of total exemption.

19. In addition to the above 117 Cawnies reclaimed for Rice cultivation 153 Cawnies has been taken up, on Cowles, to be converted into 65 separate Gardens, Capable of holding about 13,000 Cocoanut Trees. The returns received from the various Talooks shew that during the last season 75,925 Cocoanut, 7,770 Betelnut, & 4,286 Jack trees were planted both in Gardens newly formed and in old ones in replacement of the Trees which had gone to ruin or become unproductive.

20. The Board have desired me in the Extract from their Proceedings under date the 17th October last to give my opinion as to the periods when the Gardens in Malabar should undergo inspection, as also for what period I consider that Gardens newly enclosed should be exempted from tax.

21. The first question was debated in Mr Graeme's report and with so much ability and fulness that I do not

not think I could throw any additional light on the subject by any observations I might offer- Mr. Warden, it will be seen, had deprecated the interference of Government, & with what he wished to have considered a permanent Garden assessment; but the arguments of Mr. Grame to shew the difficulty of having a permanent tax on so fluctuating a property as Cocoanut Gardens were deemed sufficiently conclusive by Government to authorize the adoption of his views.

Para 1265- 22- Mr. Grame, it will be seen, fixed 12 years as the period during which the garden assessment when once made should not alter but he evidently does not think it necessary that a fresh inspection should of necessity take place after that time- On the contrary, as the chief object of periodical revisions is to

Para 1287 counterbalance any extensive remissions which partial bad seasons, or "private Misfortunes." may render indispensable, I do not see the necessity of Government specifying a particular time at which it will order a fresh inspection.

The

The people are aware that

23

the Government are not likely to engage in a troublesome & expensive task without some sufficient and palpable cause; and none I think are likely to be deterred from improving their Gardens by a fear of such inspection being made at an unseasonable time- They are secure by the Government pledge of noninterference for a period of 12 years- a period founded, as was observed by Mr. Chief Commissioner Munro, on the practice of the Native Rajahs who preceded us- They are aware also that tho' we do not think it desirable to bind ourselves to a permanency of aggregate amount of tax we do so to a permanency of the proportion of the Government demand to the produce- I would respectfully recommend, therefore, that matters be allowed to continue on their present footing which provides for an annual survey of such persons Gardens as are forced by their necessities to demand it- that no precise period be fixed for another general revision, and that no such revision be made till it is absolutely required with reference to the just rights of Government.

Adverting

"It was the universal practice under the Government of the Rajahs to inspect all Gardens once every 12 years & to alter the rent by them according as the Produce had declined by the loss of the old Trees or augmented by the planting of new ones- The Rajahs adopted it in their own Dominions and enforced it whenever called upon among the Landholders and their Tenants- That its origin is of very ancient date and is said to have been coeval with the Establishment of the ancestors of the present race of Rajahs, and the Custom itself was kept up until the transfer of the Country to the British Government.-

Para 1288

Vide Mr. Grame's Bookumnamah Enc- No. 27

Fort St. George 16th December 1844

24 Adverting to the second question propounded by the Board — for what period Gardens newly enclosed should be exempted from tax I would beg to observe that I do not think the period which has, as a general rule been allowed for many years past, is in any way excessive Viz.th 10 years.

From 8 to 12

25 The Government remarks that "no rent was demanded until 2 years after the trees were productive, a relinquishment of the Government dues, which the Board correctly considered too great "an indulgence," and which it is "presumed "has not been sanctioned," but I think the remarks both of Government and the Board are based on a slight laxity of expression made use of in the Summabundy report for $\frac{1247}{1837/38}$ — Mr. Clementson did not, I am sure, mean to convey the impression that Coconut plantations were exempted from tax for 2 years after they come into full bearing — all he could have meant was that the trees, or rather some of them, might be expected to begin to bear after from 5 to 10 years according to the

Minutes of Cons dated 21st Jany. 1843 Para 6.

Fort St. George 16th December 1844.

the locality. Cocoanut trees do not come into profitable bearing, as a general rule, for some considerable time after they commence to produce fruit and I doubt if less than 12 years on an average will see them in a state which would justify the term of "full bearing".

26. I should be extremely unwilling to see any measure resolved on which would act as a check to the formation of new plantations. A description of Culture which requires and deserves much encouragement. The sites selected for this purpose are almost invariably on ground which from being sandy and brackish is useless for any other description of culture. The labour expended in reclaiming them is in all cases great, and in some, where embankments have to be constructed to keep out the Salt water, attended with great risque and expense.

Note. The more eligible and easy sites have almost all been taken up.

A man must have a prospect of a good return to induce him to lay out his capital on works of this nature, and I repeat that I do not think the advantages which

Fort St. George 16th December 1844.-

which have been proposed to the public in Malabar for the last 15 years, with reference to this matter are in any way excessive.-

27. With respect to the remarks contained in the 3d Para of the Board's Proceedings under date the 22nd August last relative to the remission of Rupees 283 15 6 allowed in Fusly 1251 (1841/42) on account of the Kalanikara Lands, in the Temalpooram Talook, belonging to the Nelikel Eddatil family, I have to express my regret that I should have omitted to explain that the Parties who had undertaken to cultivate them, whom abandoned by the Chief of the family, as stated in the 31st Para of my Report for 1250 (1840/41) - were constrained to leave them waste the following year (1251 / 1841/42) in consequence of the obstructions thrown in their way by the Proprietor who has great influence in that wild part of the Country. Their engagement was for no specified time, and I had no right therefore to demand from them the payment of the Revenue of that year. But I took such effectual steps with the Proprietor, who receives a portion of Malikanah from Government, as led him to

Fort St. George 16th December 1844.-

to withdraw from any further vexatious interference, and I was able accordingly to give over the lands in 1252 (1842/43) to another person (a Member by the bye of the same family) in whose hands they have been ever since.-

28. In reply to the observations contained in Para 7 of the Board's Proceedings of the 22d August last relative to the remission of 10 Rupees on account of a Garden belonging to a Namboodry in the Chaughaut Talook, I beg to state that it appears that the Trees in the Gardens or compounds in which dwelling houses of the principal Namboodries stand have been from the earliest times exempt from taxation as a mark of respect to the ancient aristocracy of the Country. By some misunderstanding the Gardens in question was in Fusly 1235 (1825/26) brought to account the Namboodry having remonstrated against the measure. Mr. Rudleston in Fusly 1240 (1830/31) ordered the collection of the Tax to be suspended; and it has not been demanded ever since as the proposed remission is intended merely to put the

Namboodry

Fort St. George 16th December 1844

Namboodry on a par with other individuals of that class in the District, I beg to recommend that it be sanctioned.

29. In Para 11 the Board require an explanation touching the grant of 9 Cowles to Nelikel Eddatil Komby achan after he had "left his usual holding uncultivated" I beg in answer to state that this Chieftain's case is hardly analogous to those existing in other Districts, as referred to by the Board. Komby Achan is not only the proprietor of the jungle Lands (which he abandoned on the score of the new assessment fixed in Fusly $\frac{1248}{1838/39}$ being unfair) but of a great deal of other landed property, the assessment on which he pays punctually. The lands comprised in the 9 Cowles noticed by the Board are his private Property; and if his application for Cowles were rejected the land would probably continue in its primitive condition, as it would be difficult to find other persons who would have the power or wish to cultivate them without his consent.

30. Referring to the observations made

Fort St. George 16th December 1844.

made by the Board in the latter part of Para 24, relative to the remission of 4 Rupees granted to a Ryot in the Root-naad Talook, I trust I need only state that though the Man's name stands in the accounts as the payer of 138 Rupees a year, the best part of his property is incumbered with heavy Mortgages, and he himself is in such embarrassed circumstances as to make it an essential object with him to obtain a remission of 4 Rupees for Poonjah land which he had been unable to cultivate from an excess of water. The 8 annas recommended by the Tahsildar to be given as remission on account of the Crop which should have been cut in January was not, as the Board seem to think allowed.

31 Proceedings above adverted to, the Board desire that the four last items† of Remissions entered in my Report for $\frac{1252}{1842/43}$ be brought in the accounts, at the full assessment, and the difference shewn annually as remission. This has been

† 9 "On account of 8 Parary Lands in Ernaad belonging to Government which were found to be overassessed, the difference now proposed to be remitted being more than the lands can fairly pay Rupees 22—6—2.

been done as far as regards the items No. 9 & 12 as will be seen by a reference to the Statements noted in the margin. With respect to the two other items (No. 10 & 11) I shall, with reference to the explanation offered in Para 7 touching the item No. 10 of this year, defer recrediting them until favored with the Board's further instructions.

The Decrease which occurred in 1252/1842/43 in leasing out by auction two Government lands in Palghaut not being also of a resumable nature.

I

32. I shall hereafter submit draft of a Cowlnamah, framed as far as circumstances will permit with reference to the practice which obtains in other Districts, as well as the Statement called for in the 10th Para of the Board's Proceedings above noticed.—

33. I have to speak in my usual terms of approbation of all my subordinates. the only one whose name has not appeared in my former Reports is that of Mr. Cook. I find him an intelligent and active Head Assistant.

of 1252 a decrease amounting to Rupees 815-2-4 the balance between the gross increase of 1253 being Rupees 4,684-1-5 and the gross decrease Rupees 6,499-3-9 this I have reason to hope, only temporary — falling off - I shall now proceed to explain shewing the causes of increase and decrease respectively.

Gross increase on Paddy Lands below the Ghauts Rupees 671-9-a

The gross increase on Paddy Lands below the Ghauts is Rupees 671-9-a and the following are the items composing the same Viz.t Rupees 140-9-8 on 62½ Cawnies of Land cultivated on Cowley Rupees 113-5-- the amount of revenue, brought to account during the Fusly under review, of certain reclaimed waste Lands the revenue whereof had been remitted from Fusly 1237 to 1250 in consequence of non tillage? Rupees 58-6-6 the amount of assessment on 27 Cawnies of newly cultivated waste Lands — Rupees 73-1-9 upon 26¾ Cawnies of Land — permanently assessed (during the present Fusly) at the established rate formerly cultivated as Modon Lands Rupees 39-2-3 the balance between the tax of the last and present Fusly on salt — marsh Lands (cultivated occasionally) fixed

fixed on inspection of the crops- Rupees — 146-10-2 the increased assessment on Ta- -rary or escheated Lands (situated in Il- -umshoms in the Cattery on Salook) surveyed by one of the Huzzoor Gomastahs with your consent and orders, and Rupees 81- -14-11 a moiety of the Landlords share on the above Lands, the other moiety having been under sanction of the Principal Collector temporarily remitted to the Ryots (owing to the immediate vicinity of jungle) as particularized in para 17 of the report for Fusly 1246- Of the increase under review, the sum of Rupees 146-10-2 is on 254 Tarary or escheated Lands cultivated by 122 Ryots which not having been inspected for a — length of time, and there having appeared reason to suspect that the Ryots were carry- -ing on a concealed cultivation on such — Lands, a report was made to you, and with your consent and orders the above- -mentioned Gomastahs surveyed the lands which survey was subsequently confirmed by an Huzmash or after survey made by by his subordinates- The balance Rupees 18-6 -11 is increased assessment on certain —

Government

Government Lands situated at canatoor Deshom, Edakkand Umakom in the Cherikul Talook- Report having reached me that the heirs of a deceased individual, to whom the last mentioned Lands were let on a Patteyom Gratt formerly given to him by Government, were Sub leasing the Lands to others without the knowledge of Government, an investigation was held and the result reported to you, when upon your cancelling the Patteyom formerly granted, the Lands were pymashed and reassessed during the Fusly under review, hence the reason of the a= last mentioned increase amounting to Rupees 18-6-11.-

Gross increase on Paddy Lands in Wynad Rupees 2,916-10-6.

4 To the above increase of Rupees 671-9-a in the Talooks below the Ghauts must be added the increase in Wynad amounting to Rupees 2,916-10-6, the items com= =posing which are Rupees 2,611-4-7 upon newly cultivated Lands belonging to Ryots- Rupees 232-3-7 upon newly cultivated Government Lands, and Lands which the Ryots had usurped possession of and Rupees 73-2-4 the co= share which the Sirkar as Land Lord of the above Lands is entitled to-

Gross decrease on Paddy Lands in the Talooks below the Ghauts Rupees 140-13-4-

5 The gross decrease amounts to Rupees 140-13-4 on Paddy Lands in the Talooks below the Ghauts and comprehends Rupees co= 23-13-1 on Kypaud or salt marsh Lands co= upon which it appeared after careful inspection a temporary remission was necessary owing to inundation by salt water- Rupees 82-14-10 on Lands suffered to become waste from co= devastations of wild Animals- Rupees 16-14-11 from Government Lands suffered to lie fallow being situated in the neighbourhood of Jungles, dangerously infested by wild ani= =mals- Rupees 7-9-10 the Land Lords share upon the above Lands- Rupees 6-10-4 is a remission resulting from the inspection of certain Lands, partly allowed to lie fallow from the indigence of the Ryots and other co= causes and Rupees 2-14-10 a decrease arisen from two rice Lands having been converted into Cocoanut Gardens-

Gross decrease on Paddy Lands in Wynaud Rupees 3,358-13-5

6 The following are the items com= =posing the gross decrease to the amount of Rupees 3,358-13-5 in Wynaud, viz. Rupees 2,861-3 on Lands suffered to lie fallow, either to enable them to regain or recover their ferti= =lity; or from the inability of the Ryots to cultivate

cultivate them and from the departure and death of Pannians or the workers of the soil Rupees 209-2-5 owing to a drought, which prevailed to a considerable extent and subsequently failure of crop - Rupees 195-14-2 - is a decrease occasioned in consequence of certain Farary or escheated lands having also been allowed to lie fallow for reasons above noted - Rupees 64-12-7 the decrease of Landlord's share on the above lands and Rupees 28-4-4 - is the assessment on Farary or escheated lands let by auction on lease -

Gardens - Net Increase Rupees 537-7-9

7 Several Ryots having again during the Fusly under review made representations of serious losses the Gardens were ~~pymashed~~ surveyed pursuant to the Huzzoor Circular orders and the following has been the result -

Gross Decrease on Gardens Rupees 204-9-9

8 The gross decrease on Gardens amounts to Rupees 204-9-9 Vizt. Rupees 158-6-11 owing to the unproductiveness of 417 Gardens partially destroyed by lightning &c encroachments of sea and rivers, and poverty of Ryots - Rupees 32-9-7 the remission on Gardens belonging to 7 Ryots, the trees wherein are represented

represented to have become unfruitful and Rupees 13-9-2 the decrease of Landlord's share on two particular Farary or escheated Gardens, in the Cottayom and Cherikul Talooks - This last mentioned decrease resulted from the unproductive state and loss of the trees in the Gardens -

Gross Increase on Gardens Rupees 742-1-6.

9 The gross increase on Gardens is Rupees 742-1-6. Vizt. Rupees 20-7-10 the tax on young trees in 43 gardens surveyed during the past and re surveyed during the present Fusly Rupees 12-1-2 on young Trees in 40 Gardens, allowed to lie concealed in the Cauje Talook by the Umshom Menon now under suspension - Rupees 251-10-6 on 330 new Gardens assessed during the Fusly under review Rupees 24-7-9 the increased assessment on 162 Government Gardens situated at Cherikul Talook for reasons noted in the concluding part of para. 3 - Rupees 9-8-4 the increased assessment on 36 resurveyed Gardens Rupees 385-8-4 the Landlord's share (vizt. Rupees 145-2-6 on account of Cocoanut trees in the Gardens at the Cherikul and Cotteyom Talooks and Rupees 240-5-6 on account of Pepper being one third of the average price of the gross

grass produce) and Rupees 38-6-5 the assessment on Gardens belonging to 9 individuals brought to account during the Fusly under review and which was temporarily remitted during the last Fusly.-

10. The total decrease Rupees 204-9-9 being deducted from the total increase Rupees 742-1-6 a net increase of Rupees 537-7-9 is exhibited on account of Garden Lands.-

11 The decrease in Ponom has arisen from the deficiency of suitable lands, in the neighbourhood of the Villages and which had been allowed to lie waste, for a sufficient time to render the crops productive. The fold, it would appear, has been variable in some parts the same in other above, and again, below the preceding Fusly - you are aware that the Ponom cultivation within my division is principally in the Cawye Talook, and favorable and convenient hills being still unprocurable in this Talook the Cultivators have, it appears, resorted to Bekul (in Canara) bordering

bordering thereon, and have there extended this cultivation, and a few, it is reported, proceeded to corg, also for the same purpose.- Further, the heavy rain in the months of May and June, washed away, the manure, and almost the whole of the seed sown on the top and more steep sides of the hills, and from the continued heavy rain an unusual and serious difficulty was found in removing the long grass and weeds at the necessary period, and much injury to and loss of crops in many parts resulted - added to these drawbacks, the rain of July and August partially failed - I have however good reason to hope and believe, that the Ponom cultivation which, from the deficiency of suitable land, has for the last few years considerably fallen off will now again from the lands having resumed their former efficient condition, the Jungle again being of sufficient growth to permit its destruction by fire and thus remain fresh, and reinanure the land, return to its former state of productiveness.-

It appears that the decrease

12 in Modon is partly owing to the absence of sufficient favorable high Lands, those cultivated

cultivated during the preceding five years having been left fallow for the recovery of their fertility and the fall of rain at that particular period, Viz: July and August, having been more adapted for the one cultivation than the other - the cultivators were engaged in raising and transplanting the low or wet rice crops in consequence of which, and from want of a sufficient number of workmen, the cultivators were partially prevented sowing the Modon seed and further, a portion of land hitherto cultivated at Modon, was converted into rice cultivation, and as such regularly brought on the assessment.-

13. The increase in Ellu or oil plant would appear to have arisen from the extended cultivation and increased consumption of the article.-

Land Revenue Collections -

14 The collections for Fasly 1253 amounts to Rupees 4,07,775-3-4 and the balance outstanding to Rupees 207-12-2 which will be realized with the least possible delay & it is gratifying to be enabled to state, that the Collections of the revenue in the

the present Fasly, have been effected without recourse either to confinement of defaulters or distraint of property except in the two following trifling cases - in these the Government dues were obliged to be recovered by sale of property - but not from the incompetency of the respective parties to pay up, had they been willing - Chowcaran, or Kattery Coonky Coolty Ally a man of wealth - declaring himself unable to pay Rupees 18-8-1 revenue derivable from certain property belonging to the Chowcara family, and which lately was under the management of Karnawan Chowcaran Bappen Coolty - in consequence of certain tenants, also members of the Chowcara family, who are in immediate possession of that property refusing to pay him the Pattom or rent, hence their moveables were sold and the proceeds realized - Family dispute is however the real reason of Coonky Coolty Ally's refusal to pay the Government dues. The second defaulter named Porrangaddan Cunnen is indebted Rupees 13-2-2 on account of a fresh assessment and increase of

Chutty Tobacco used in distilling -

15 Independent of the aforesaid items, the sum of Rupees 81,592-2-7 has been collected during the Fusly under report on account of extra sources of revenue (exclusive of Tobacco, Salt and stamp) Viz^t Rupees 40,967-7-1 under the head of Moturphas Rupees 649-12-10 of Kathy Chutty, Rupees 14,675-2-8 of Ferry Farms Rupees 22,761-12-a of Abkarry Rupees 1430-a-a of Hill Farm Rupees 1,008-a-a of Gold mine and Rupees 100 the rent of Tarary or escheated Cardamom Hill.-

Season and its general effect on the cultivation and produce of the District.

16 The south west Monsoon commenced very early in May and, altho there was an abundance of rain, it was unfavorable for all produce with the exception of the Ponam and Modon cultivation, on the lower part of the Hills the fall was too heavy and incessant at this season period - The after rains however were very favorable for the second rice crops, and Ellu or oil plant, and rendered the produce of Beetel and Cocoanut Gardens abundant - The price of paddy during the year became a little in advance of

Fort St. George 16th December 1814.

of that of the preceding the price of Betel and Cocoanuts the same.

17. The Cholera made its appearance at Waynaad July, Kambo Sabattah and Goodalore about the beginning of July and continued to the end of August, but happily its ravages have been comparatively trifling. The small pox however deeply regret to have to add made fearful ravages in many of the Talooks especially in the Cottayam and Cartenaad - One town in Wayne I am given to understand has been nearly decimated from its sad effects. Vaccination I am sorry to find, partly from the neglect and indifference of the local Officers to whom this most important duty has been entrusted, and partly from the superstitious and other opposing feelings of the inhabitants, has not been carried out nearly so extensively as desirable - Wherever I go I now however make it a point of sending for these Officers, and also the Chief inhabitants of the Villages and endeavor to impress upon them from the late mortality the advisability and necessity of increased exertions, and more ready compliance - I have on two occasions considered it my duty officially to represent to the Superintending Surgeon, the neglect of duty on the part of the Wayne and Wynaad Vaccinators. a disease also amongst the Cattle carried off many throughout my division - Above the Ghaut this disease commenced about the beginning of Kurkadagom July/August and continued to the end of Chingom August/Septr. and on the lower part of the Ghaut its ravages began in Dhanoo Decr/Janry and ended in Combhoom March/April.

18. The pleasing duty now only remains for me to express the praise that I consider my immediate subordinates are justly entitled to, and a passing remark upon the tranquil and flourishing state of North Malabar - Vencataramanier the Sheristadar attached to my division has rendered his usual valuable willing assistance, and I believe him still to merit the confidence and the encomiums hitherto passed upon him by my predecessors and myself - I consider him a meritorious and highly deserving Officer -

After the assessment has been fixed upon the number of productive trees, if they should hereafter happen to deteriorate from any cause, it will be necessary to state the case and prove the fact to the Collector at the time of the year when it is usual to frame the Jummabundy, the Collector will then re-duce the assessment on such trees as may have decayed, as he will have the power on the other hand to assess all young trees which may in the interval have reached maturity.- This mode of making the Pymashee is adopted in preference to others, because it is in a less degree subject to any fraud, and no over assessment can therefore occur and be complained of.-

To Messrs. Parry & Co.

Gentlemen,

With reference to your letter of the 31st Ultimo requesting the grant of new Titles in the name of Mr. Moore for certain Lands situated at St. Thomas's Mount, I have the honor to inform you that two separate certificates

1815/5 Fort St. George 16th December 1844

were granted for these lands in the name of Mr. Peter Cator Administrator of the late Major General Thomas Hayes under date the 26th April 1836. One of these certificates accompanied your letter under reply without a regular transfer or assignment in favor of Mr. Moore and the other Certificate for 3 Cawnies and 1899 square feet does not appear to be in his possession unless the latter document is produced or its non-production satisfactorily accounted for and the assignment of the lands to Mr. Moore established, it will not be in my power to comply with your request.

Messrs. Parry VC.

Gentlemen,

With reference to your letter of the 26th September last relative to the Estate of the late Major General J. Hayes to which Mr. F. Cator was Administrator, and touching the certificate and the Deed of Government alluded to in Mr. Freese's letter to your address, bearing date 21st September 1844, which accompanied your letter under acknowledgment, and which is herewith returned, I beg to state, that after a most minute search I am totally unable to give you any reason which could have induced Mr. F. Cator not to assign over the Documents above referred to, provided he was of opinion, which by the correspondence in my profession clearly appears to have been the case, that Mr. Moore was bona fide entitled to the same.
