To E. P. Thompson Esqre
Secretary to the
Government of
Fort St. George -

Sir,

Para 1. I am directed to forward herewith copy of a Despatch from the Honorable the Court of Directors dated 17th June 1845 No 5 enclosing a Memorial from the Salt Manufacturers of England representing the disadvantages under which they consider themselves to labor in respect to the exportation of

Fort St. George 30th October 1845.-

of Salt to India.-

2. The Governor General in Council will be happy to receive the Sentiments of the Most Noble the Governor in Council on the Subject of Para. 6 of the dispatch; and with reference to Para 14 I am directed to request that a report on the terms and conditions generally on which Salt is permitted to be imported at the Presidency of Fort St. George may be furnished at the earliest convenience of His Lordship in Council for transmission to the Honorable Court.-

Ordered that the following address be submitted in consequence.-

To The Chief Secretary to Government.

Sir,

(1-3)

To the Chief Secy. to Government } Stating with reference to Extract Minutes of Consultation of the 23d Ultimo transmitting for report a letter from the Secretary to the Supreme Government on the subject of the importation of British Salt into India, that as far as this Presidency is concerned Salt of Foreign origin cannot with any chance of success compete with the Home manufacture. - In Cons. 30th October 1845.

I am directed by the Board of Revenue to acknowledge the receipt of an Extract Minutes of Consultation of the 23d Ultimo transmitting for early consideration and report copy of a letter 16th August 1845 with its enclosure from the Secretary to the Supreme Government on the subject of the importation of British Salt into India.

2 In this letter information is requested on the subject of Para 6 of the Despatch from the Honorable the Court of Directors No. 5 of 1845, and in reference to Para 14 of the same document a report is required upon the terms and conditions generally on which Salt is permitted to be imported at the Presidency of Fort St. George.-

3. In Para 3 of the Court's Despatch an opinion is expressed that in place of the present prohibitory duty which may perhaps be represented by the British Manufacturer in the light of a grievance, the Customs duty on the importation of Salt into the Ports of the Madras Presidency might-

Fort St. George 30th October 1845.-

might be advantageously adjusted on the same principle as is adopted in Bengal, namely by charging as import duty a sum equal to the amount by which the selling price exceeds the cost price to Government.-

4. On this the Board desire me to remark that the adjustment of duty on the principle there laid down will in the Madras Presidency be attended with some difficulty. because partly arising from the difference arising from local circumstances in the charges of storing Superintendence &c. and partly from the difference in the rates paid to the manufacturers the actual cost price to Government of Salt produced within the Madras Presidency varies in every District. The maximum cost price of manufactured Salt may be stated at 25 Rupees per Garee. the minimum at 8 or 10 Rupees Spontaneous or swamp Salt of good quality is however collected to a large extent in some Salt Districts its total cost to Government being considerably below the latter rate.- To strike an exact average it would be necessary to communicate with the Collectors in the Provinces which would be productive of delay.

and

and the Board presume that minute accuracy is not of importance in the present stage of the enquiry. They believe that the average would be found to fall under 15 Rupees per Garce. admitting it however for the sake of illustration to be 20 Rupees per Garce, certainly an excessive estimate. the profit to Government on each Garce of salt made in the Madras Provinces and sold for Home or Inland consumption, or the import duty to be fixed accordingly to the Honorable Court's principle on English salt, will be 100 Rupees per Garce or at 120 Maunds to the Garce 13a 4p - per Indian Maund. The monopoly price of salt in the Madras Presidency being 1 Rupee per maund, there would then remain 2 - 8 per Indian Maund or 4 - 8. Rs. per Ton to cover the cost of production, freight. in fact charges of all description upon English salt until it is exposed for sale in the Indian Market. It will thus be evident, as indeed the Honorable Court seem to be aware, that as far as this Presidency be concerned, salt of Foreign origin cannot with any chance of success compete with the Home manufacture

5. In regard to the terms and conditions

conditions on which the import of salt into the Madras Presidency is permitted, the Board are not aware that there can be said to be any except the payment of 3 Rupees per Indian Maund under schedule A Act VII 1844. but this is evidently tantamount to a total exclusion of the article.-

A

To G. A. Bushby Esqre
Secretary to the Government
of India
Home Department Revenue
Fort William

Sir,

In reply to your letter of the 17th July No. 459 requesting that the Madras Government may be supplied with a few Copies of the Rules for the guidance of Surveyors in conducting the Revenue Surveys of Districts I am directed by the Honorable the Lieutenant Governor to state that no separate Rules of the Kind indicated by the Secretary to the Government of Madras have ever been drawn up for the guidance of the Revenue Surveyors in these Provinces. I am however directed to forward to you, Extract Paras 4 to 74 of a printed Circular issued to the Revenue Commissioners by the Sudder Board of Revenue, dated 9th April 1839 and also to suggest that the Madras Government may be referred to Sections II and III of the Directions to Settlement Officers lately printed and Circulated by direction of this Government in which the general mode of

14177 Fort St. George 30th October 1845.

of conducting the measurement and survey is laid down. Some copies of these directions have already been furnished to the Madras Government. The Circular of the Board, Extract of which is annexed, is out of print and no spare Copies are now procurable.

Agra, The 13th August 1845. } (Signed) J. Thornton
Secretary to Government N. W. P.

No. 1 in No. of 1845.

Extract Paras 4 to 74 from Circular order by the Sudder Board of Revenue N. W. P. to the Commissioners of Revenue No. 1. dated 9th April 1839.

4. Government having determined that the whole duty of measurement shall be performed by the Revenue Surveyors, both the general Map, and also the detailed field Map, and Khusrah of each Village will be prepared and furnished to the Collector from the Survey office in the form which the Board have already furnished to the Deputy Surveyor General.

Section I Adjustment of Village Boundaries.

5. To obviate any delay in the progress of the Survey it is necessary that previous to its commencement all boundaries in the selected Purgunnah should be marked

ff.

off and all disputes adjusted.-

6. For this purpose, as soon as you have fixed on a purgannah, you will instruct the Collector to relieve the Tahsildar entirely of all his current duties, so that his whole time and attention may be devoted to the business of the approaching settlement. But if it happen that any other Tahsildar be more able and experienced than the one who stands appointed to the purgannah under survey, you will be pleased to exchange the two for the time, always employing for this settlement duties the most competent officer.-

7. For enabling the Tahsildar to fix on the proper points at which to set up boundary marks, the Board have requested the Deputy Surveyor General to instruct the Revenue Surveyor of the district to furnish one or more tindals on the requisition of the Collector.-

8. It will be the duty of the Tahsildar and Canoongoes to make Memoranda of the points at which the boundary marks are fixed and to see that they are not subsequently removed, and they will inform the Zemindars and others that any persons concerned in removing

removing a boundary mark will be liable to the penalties awarded by the Regulations to persons obstructing the progress of a measurement.- The Collector will be careful to enforce the penalty in every instance in which the offence may occur.-

9. It will be expedient that the Collector in communication with the Revenue Surveyor attached to the district, fix the point where the Tahsildar should commence his demarkation, and from that point the Tahsildar will proceed contiguously Village by Village until the whole Purgunnah shall have been completed.-

10. In the prosecution of this duty whenever the Tahsildar shall meet with a disputed boundary he shall immediately forward a report to the Collector, stating the names of the contiguous Mouzas and their proprietors the position of the ground in dispute, with its distance and direction from the Tahsildaree Cutcherry and the extent of any portion of which neither party may be in actual possession.-

11. So soon as the season will admit the Collector shall with reference to the number of cases reported, depute for

for their adjudication one or more competent Assistants or Deputy Collectors under Regulation IX of 1833.-

12. Each officer so deputed having visited the land in dispute and ascertained its position and extent shall offer to the parties the alternative of settling the question among themselves or by private arbitration within seven days; and if either course be adopted he shall distinctly record the particulars of the adjustment.-

13- If this offer should be declined or if having accepted the offer the parties should fail to report their adjustment on the day appointed the Assistant shall proceed as follows.-

14- On the selection of a Pergannah for settlement the Collector will cause to be prepared in the Tahsildar's office a list of the names and residences of the Zemindars and other persons of good repute in the pergannah or vicinity a Copy of which shall be furnished to each assistant or deputation.-

15. He shall cause a notice to be served in his own presence on the parties to the dispute to the effect that on a date appointed by

by himself and not exceeding three days from that time they must give in their statements and produce their proofs.-

16- Having then taken at random from his list 15 or 20 names of persons residing in the vicinity he shall summon them to his presence and shall cause each name to be written on a slip of paper and shall draw either three or five.-

17- As each name is drawn the officer shall allow either party to object for sufficient cause assigned as relationship connection, alliance, enmity, debt &c. in setting aside any one against whom sufficient cause may be shewn, and recording the fact and reason in his proceeding. So soon as three or five unobjectionable Assessors shall have been selected the officer shall cause the statement and proofs adduced by the parties to be laid before them and when the case has been gone through, shall require them to give their decision which shall be determined by the award of the majority.

18. The officer shall immediately with the aid of the Assessors proceed to mark off

Fort St. George 30th October 1845.

officer every evening, and submitting to that Gentleman the sketches statements and Kararnamahs in the cases he had settled: Next Morning the officer visited any spot where the Tahsildar had failed to settle a dispute, and in most cases was able to induce the people to it at once, otherwise he allowed them a week to do it in. The settling officer has reported, that in every instance but one, the dispute was settled by private arrangement. In several cases, the parties at once nominated the Assistant himself, as umpire, and gave a written adherence to his decision.-

23.- In this District there were two parties under two Assistants - a Tahsildar headed one party; a Nail the other, and at first four Mohurrirs were placed under each.- This number was subsequently increased to eight, and though at first each party seldom managed to dispose of more than two Mouzas a day, and the Tahsildar and Nail at the commencement found a difficulty in preparing the Sketch and Statement, yet latterly as many as 20 Mouzas a day were completed.-

24.- The ordinary marks made by the Ameens are small oblong mounds thrown up with the phowrah, but when three

Fort St. George 30th October 1845.

boundaries meet a taller pillar is erected and Charcoal buried under it. Copies of the Ameen's Sketches and the boundary registers of two of these cases are annexed.-

+ Appendix No. III.

25.- The Board see no sufficient reason for declaring Zamoongoes ineligible as arbitrators. It is of course open to either party to object to them for cause shewn, but if this be not done before the decision is given, no such objections can be admitted afterwards.-

26.- The rule of one year's dispossession is not intended to apply to boundary cases. The decision is meant to be final as to the whole matter in dispute whatever that may be. If the question given to the Umpire or jury be whether a decision has previously been made, under which one of the parties has held for many years, and the verdict be in the affirmative and they maintain the possession, their award would be conclusive. But when parties go to trial on the general issue to have a boundary fixed; in that case, the decision of the boundary must be binding and the losing party cannot afterwards bring forward a fresh plea to invalidate it.-

The Board wish you to

understand that the decision of the jury is that which is to be enforced, whether the European officer may approve it or not, and that decision is to be maintained unless there be a new trial granted in which a different award be made. When the jury have decided, it is the business of the Assistant to see that the award is authenticated by the signatures of the whole, if unanimous, and of every Member of the Majority if decided by a majority.-

28- When the Assistant has once ascertained and recorded this matter, he should immediately execute the award and the question should never be raised again.- Nothing can more tend to the destruction of all certainty in decisions and to the total demoralization of the people than allowing an act done before one officer to be questioned and denied before another.- If an Assistant is not able to ascertain, from a number of persons whether they understand the contents of a paper purporting to be signed by them, and whether they have voluntarily signed it, such an Assistant should be considered unfit for the duty.-

29- You will be pleased to

See

see that the Tahsildar of every Pergunnah about to be surveyed and settled after completing the demarcation of boundaries is placed in attendance upon the Surveyor, for the purpose of looking to the preservation of the boundary marks, enforcing attendance of Zemindars and putwarees and generally in aiding and forwarding the progress of the survey until the Pergunnah shall have been completed.-

30- A Peshkar at 50 Rupees per Mensem should be deputed to take the Tahsildar's Current duties, while the latter is engaged with the Survey, and at the same time an application should be made to the Board to sanction the charge.-

31- You will be pleased to direct and enforce that the boundary Maps, drawn by the Tahsildar's Ameens in conformity with paras 22 and 23 be always made over to the Surveying Officer, as soon as he enters the Purgunnah, and that a Competent Officer be placed in attendance on each Survey to point out the boundary marks from the Maps.-

32- You will also direct that whenever a boundary has been marked, the Tahsildar shall call the Zemindars of the conterminous

contermineous Mouzas, whose property has thus been fixed, and commit the boundary marks to their custody taking from them a suproord namah agreeing to be answerable for them- Any party who may refuse to give the suproord namahs must be taken into Custody and fined for obstructing the Survey.-

33. To obviate the difficulty of finding men on whom dependence can be placed to point out boundaries &c. it will be found advisable to take the Danoo-=goes, or some of the Malwars with the Pergunnah and supply their places temporarily with other persons; so that the men on the fixed Establishment, who are of course more responsible, shall be employed during the progress of the Survey or settlement on that duty, and persons hired for the occasion be employed to discharge the Current duties. Any reasonable charge of this Kind, pro-=posed by you, the Board will be pre-=pared to sanction, it being obvious that the delay of a costly Survey Establishment through want of Collateral aid, must entail far greater expense than a few extra Officers.-

The

34 The particular modes in which interruption is experienced by surveyors from the neglect of the local officers to prepare boundaries, appear to be these:-

I. The boundaries not having been settled, and marked off previously.-

II. The marks having been subsequently changed or obliterated.-

III. No persons being in attendance to point out the boundaries.-

IV. The zemindars and Putwarees not being present and not attending when called for

35. The first point has been distinct-=ly enjoined in paras 5 and 6, 9 to 19 and the mode of operation has been clearly laid down in detail in paras 22 - 23 and 24. It will be seen that the adjustment of "existing disputes" is contemplated throughout, not the cognizance of old claims which may have been in abeyance for several years or been long since decided by a competent tribunal and on which the land now claimed may have been for a series of years in the undisturbed possession of one of the parties- In all such cases the demarcation of boundaries ought to have been made accord-=ingly, and the claimants referred to the Civil Court.-

36. The limitation of jurisdiction to

to existing disputes has reference in this case not to length of time since the dispute originated but to the present existence of a dispute of a nature requiring decision - The Board mean by existing disputes where neither party has clear posession, nor can there be found any previous decision on competent authority, which will admit of demarcation being made without previous adjudication - It is obvious that whether the dispute has been going on for one year or for twenty years till it has been authoritatively decided, the demarcation and consequently the survey, cannot be made -

37. The second point has been provided for by para 8 and it can only arise from a want of attention on the part of the local Officers in seeing that the Tahsildars and Danoongoes do their duty. that failures could occur in this matter -

38 The third and fourth points you will find provided for in paras 29 to 33 were they carefully attended to, no inconvenience could well arise, but many complaints have been made of the utter want of any person of competent authority and influence and knowledge to point out the boundaries which have been fixed, when the survey

survey comes round; your particular attention is requested to this matter in future -

39. The Board have reason to believe that the above orders are often not attended to, and not even referred to by the Executive Officers, and that in many instances the proper steps have not been taken either by the District or controlling Officers, to ensure due attention to them -

40. There is cause to think that instead of the Tahsildar, an inferior Officer is often employed to make the demarcation, and the whole advantage which would be gained by the influence of the Tahseldar, his acquaintance with the Malgoazars and knowledge of the Purganah is lost -

41. The Board desire me to impress on your mind the necessity of paying attention to the injunctions of Para 8 It should be made a point, by all concerned, to punish sharply the first misconduct which occurs - a mistaken leniency in this respect entails infinite trouble and expence, and necessitates increased severity in the end - Ready obedience is yielded to orders which the people see there is power and determination to enforce -

42. If in spite of these precautions the

the boundary marks on any Village should be destroyed, the Board request that having in the first instance fined the offending parties, and caused the marks to be re-constructed an Amean and Peons be appointed to watch over and preserve them, the expense of whose allowances must be defrayed by a fine levied from the offending Village.—

Section II. Survey.

43. Instances having been brought to the Board's notice of errors and mis-understandings that have arisen from the use of the native languages in correspondence between the Collectors and Surveyors whether from the inadequacy of the language itself, or ignorance of the Officers employing its terms, the Board have directed its discontinuance and the substitution of the English Language as the sole medium of communication between the European officers of the Revenue and survey Departments.—

44. Surveyors should communicate direct with the Commissioners of the Division regarding any arrangements connected with their surveys, to which they may consider it desirable to give effect, and it is only in the event of any difficulty arising or particular orders being required, that questions of detail

should

should be referred for the Boards consideration.—

45. The Collector shall at all times furnish any information sought by the Revenue surveyor, as to the progress making in the adjustment of boundaries; and the Surveying Officer will use his own discretion as to the time at which he shall commence his survey.—

46. You will instruct the Collector to impress on his Assistants, who may be deputed into the Purgunnah, the necessity for their giving immediate attention to any applications or requisitions on the part of the Revenue surveyor in matters connected with the survey and should there be no Assistant on deputation in the Purgunnah and there be reason to believe that the presence of such an officer would facilitate the progress of the survey, one shall be deputed for that purpose.—

47. Immediately on receiving information from the Board or from the survey Department you will issue the requisite notification to the District settlement officers, of the approach of the survey of the order in which the Purgunnahs will be undertaken and of the number of parties

which

which will be employed - You will direct the District officers to put themselves into immediate communication with the officer appointed to the general charge of the survey in their Districts, for the purpose of obtaining all requisite information; and you will impress on the district officers the expectation of Government that they will maintain at all times a conciliatory and cordial communication with the surveying officer, as the only mode by which the service can be brought to a favorable issue.-

48. Whenever a survey is to begin in any District, you will direct the district officer in charge of the settlement to propose such a moderate Establishment as may be necessary for enabling him to test the field maps and Khudrehs, and especially to see that the Columns of nature of soils, irrigation, and crop, be properly filled up.-

49. You will direct the District Officer to arrange with the surveyor at what period the Khusrehs and field Maps are to be made over to the Tahsildar, and will direct that the Tahsildar grant a receipt with the date inserted for all he may receive.-

The

50. The Tahsildar assisted by the District officers Establishment is to verify the Maps and Khusrehs as speedily as is consistent with accuracy, and you will be pleased to require, weekly reports of the number verified. The Tahsildar is to forward the Maps and Khusrehs to the District officer with his statement of verification, and the district officer will then determine if they are to be received or rejected or if he thinks necessary will himself make further investigation.-

51. If the settlement officer finds reason to believe that considerable error whether arising from neglect or fraud has occurred in any instance, he will give notice to the surveyor whose duty it will be in communication with the settlement officer to establish the incorrectness or otherwise of the measurement - In all such cases the settlement officer will report the result to your Office for the information of the Board.-

52. You will be pleased to cause it to be understood that the Tahsildar is to be held responsible for the correctness of the Columns of soil irrigation

and

and Crop in the same manner as the surveyor is held responsible for the correctness of the measurements.—

53. The surveying Ameen will perform his work entirely by contract, at rates to be fixed by surveyors under the sanction of the Board of Revenue. This plan has been found greatly conducive to cheapness rapidity and facility of operation.—

The expence of preparing these documents is to be divided between the survey and Revenue Departments in the proportion of 2/3ds to the former and 1/3d to the latter.—

54. The Khusreh Ameens are required to measure not only the cultivated land, and newly abandoned waste, but also the culturable land of longer standing and the barren waste, and to place the amount of each in the Khusreh returns under their respective headings.—

55. The total of these will thus give the area of the Village which may then be easily compared with the survey area.—

56. The process of this additional measurement being less laborious and complicated than that of the detailed field measurement,

measurement, the contract pay should be reduced to one half the rate allowed for the detailed field return.—

57. If the rapidity of the survey may render the services of one or more superior officers as Peshcars under the Tahseeldar requisite, you will direct the district officer to apply for such, and requisite aid will also be given by the appointment of Ameens and Mohurrirs to act under the Tahseeldars orders.—

58. The Native Deputy Collectors are always to be placed at the disposal of the settlement officer to proceed wherever their presence may be required for any purpose connected with the survey or settlement.—

59. The District officer will be considered responsible for bringing to the notice of the officer in charge of the survey any errors or omissions of importance; and Government have declared it to be the duty of the surveying Officer on such occasions either personally, if requisite, or by some trust worthy European Assistant to enquire into the facts in the presence of the settlement officer, or such person as he may depute.—

60. You are particularly requested to see that the Examination of

of any part of the work be not allowed to be over - The verification should be made speedily after the completion of the Maps and measurements, and the work accepted or rejected at once - Nothing can be more injurious in this matter than delay - The Ameens who misbehave should be immediately detected, and made to do the work over again or removed, according to the nature or cause of the defect - But when ameens are kept many months without pay and have no opportunity of seeing their own work examined they of course become dissatisfied and indifferent and ready to abandon the occupation - On the other hand if the work be quickly proved and the ameens, who have done well speedily paid up, and those who have done ill detected and exposed, a stimulus is given to the exertions of the deserving and all are encouraged to endeavour to excel within six weeks or two Months every Khusrah ought to be accepted or rejected -

61 It is the wish of the Board if it can be effected, to have the Khusrahs precede the professional survey, as the check of the latter will afterwards

come with more effect -

62 Any zumeendar or Putwaree who shall refuse or neglect to attend when duly warned will of course be liable to the penalties assigned by the Regulations to such misconduct -

63. It will be the duty of the Tahsildar to see that the Village putwarees prepare a counterpart Khusrah of the field measurement, and that they every Evening bring up the Khuteeas of the work of the day -

64. To secure the accuracy of the Khusrah measurements, it is not sufficient that the Collector should content himself with providing a patrolling Establishment, but he should himself visit occasionally different spots where the measurements are in progress, and subject them to such an Examination that no material inaccuracy shall be allowed to pass unquestioned - For this purpose the field Map is amply sufficient, and by taking a line from one boundary to the other of a particular Mauza and by examining the position and extent of all the fields intersected by, or adjacent to, that line no error of importance can escape without detection -

65. If this is done frequently, the mere apprehension which the Mohurrirs would be under of having their work rejected, would tend to make them careful in every instance you are therefore particularly requested to direct the observance of this practice, as without accurate khusrahs one of the greatest benefits which the present settlement is supposed to confer, is neutralized.—

66. Extract from letters shewing the method adopted by two intelligent — and experienced officers in verifying — khusrah measurements are given below. The same method should be put in practice as nearly as possible by all settlement officers.—

67. The plan you suggest of testing the khusrah by comparison of it and the field Map with the field itself, was adopted by me immediately on coming to this district, and the fact above stated become immediately apparent. The mode of deception noticed in your third para, is the coarsest of the very many every clever Ameen has at command: for the jinswar teary is made from the khusrah not by the Ameen but by the Tahsildar — and

and immediately brings out the real — total cultivated area. The Ameen also has to prepare the Moontukhib Asameewar as well as the khusrah and requires much nicety for him to falsify the total of each Asamee's Cultivation, so as to make the — paper add up in correspondence with so clumsy a falsification of the khusrah — This plan therefore is comparatively seldom practised. Another plan, a little more — artful, is to measure by a beegah of one size, and to turn this into acres on the — a larger Beegah. A khusrah is — much too carefully tested in the preparation of the statement of rights and resp — bilities, in this district, where the Jumma is usually — divided on the area of each man's share, for either of these plans to stand a chance of deceiving. But if not sufficiently bribed the Ameen enters an unduly large number of fields as irrigated and as consisting of the better denominations of soil, and an unduly large amount of cultivation of the better sorts of produce. On the other hand where it suits him, he not only acts on the reverse with respect to these cases, but puts down many fields as uncultivated for many years. All attempts of

of the Ameen to falsify the measurement must soon, both to him and the Zemindars, be proved futile, if the settlement officer has a good and regular system of testing the work.-

68. "To secure a correct Khusreh the settlement officer must convince the Ameens that he will not pay them till he has tested their work. He must compel the attendance of the Zemindars, and insist not only on the attendance of the Putwaree but on his writing counterparts of the Ameens papers. If the Zemindars and Putwaree fail to attend the Ameen must not go to work but report the circumstance and be paid for his loss of time, by a fine on the Zemindars. The Putwarees Khusreh and Moontukhib must be filed with the Ameens. When the surveyor sends the papers having satisfied himself regarding them they should be sent to the Tahsildar, who, as the people of the Village come in to pay their revenue can, by a few questions, see if the number of Puttees and sub divisions are correct, and the amount of land in each about what the Zemindars consider it to be. Out of five or six Mirasi, he should select one or two

two which either from the above inquiries or from containing statements of soil, irrigation or Crops, are not such as his knowledge of the Village and state of the Malgoozaree led him to expect; and a person fit for such work should go to the Village, and with the Field Map in hand, go across the land once or twice in different directions, referring to the Khusreh and comparing it with each field that falls in his path, and he should put down the points of agreement or disagreement regarding each of these fields; and the statement should be filed by the Tahseeldar with the Misel. Now that the Board authorize a small Establishment for this purpose, the only difficulty that of finding a fit person to test the Khusreh on the fields is removed.

In one district where the field Map was in use in the measurements made under Regulation VII of 1822 the people acquired such confidence on that measurement, from the system above stated having been pursued that they take Copies of these numbers in the field Map which relate to the fields which belong to them, and on disputes arising regarding any lands, state

state correctly in their Petition the numbers in the Khusrah and field Map of the fields in question, and this is necessarily a great assistance to the person who has to settle the dispute."

69. The plan which I now pursue myself as far as my leisure from other duties will allow me, and upon which I have directed Mr. —— and the examining Meharrirs in talooka Moorthul to proceed is, as follows. In order to diminish the labor of going over the fields as much as possible, every number of the Khusrah which has been measured, as now irrigated, is first marked on the field Map with a small cross in red ink. when this is done, which takes little time, a glance of the Map will show on which side of the Village the great Mass of non irrigated land is situated. The Examining officer then begins first in that quarter and if he discovers the existence of error, he proceeds to every field, which is marked, as above described, and records on the spot, whether each number is really capable of being watered or not. By the above method there is evidently a considerable saving of time and labor as the attention of the officer employed is

is confined to those fields to which a suspicion of error attaches."

70. "After having myself gone over twelve or thirteen Estates of Purgunnah level in the above way, I am able to assert that the extent of error in the classification of land in that Purgunnah has certainly not been overrated by the Peshkar. On the contrary, my own observation has generally led to a still further reduction in the number of Beegahs distitute of the means of irrigation. But this may be accounted for by the fact that the Peishcars enquiry took place two Months ago, before the Catcha wells were dug for the use of the present season. He had therefore to be guided by the number and situation of the wells dug in previous years whereas the advance of the season has now afforded means for judging with greater precision."

71. "I should here mention, that the seasons in which these measurements originally took place, were doubtless unfavorable for the formation of Cutcha Wells in consequence of the unusual heaviness of the rains in the years 1835-36. The discrepancy in the extent of irrigation which now prevails as compared with that shewn in the

the Khusrehs, may in part be ascribed to the above cause: This however by no means forms a sufficient excuse for the anneens as in furnishing data for a settlement of twenty or more years they ought to have been guided by the abundant evidence of a different state of things which the existence of old wells and water courses afforded them.—

72. The Board desire me to conclude this portion of their instructions by communicating an Extract. Para 11 and 12 from a letter received from the officiating secretary to the Lieutenant Governor dated 18th. September 1837. No. 347. by which you will perceive the importance attached by His Honor to the Khusreh measurement and the urgent necessity that exists for its correctness.—

73. His Honor entirely concurs in the sentiments expressed in the concluding para of the Board's letter. It is necessary carefully to bear in mind that the survey was primarily designed and can only be justified for revenue purposes. Revenue proceedings must always be based on the Khusreh measurements. Defects or inaccuracies in them whether as regards the total cultivated area, its distribution in thakes

thakes pattees or fields, its classification under the head of irrigated or unirrigated, or its arrangement according to the prevailing qualities of soil, are fatal to the value of the survey for the purposes primarily in view. The topographical information it is calculated to give is no doubt highly valuable and important; nor can this branch of the operations in itself admitting the greatest accuracy be neglected or slurred over without materially detracting from the value of the survey and reflecting upon the character of the superintending officer still these operations were originally designed as a check upon the native measurements and excessive attention to the former or even remarkable accuracy in the conduct of them can never be admitted in extenuation of errors that may be detected in the latter. In estimating the comparative intrinsic value of the two branches, it must ever be remembered that inaccuracies in the professional survey deprive the state of many great, though incidental advantages, which it is calculated to produce; but that errors in the khusreh measurement lead on the one hand to extensive private injury or ruin, or on the other to an undue and blind sacrifice of the rights of Government.—

74. The Settling Officers should on no account implicitly rely on the data they receive from the survey. Wherever there is any reason for doubt, the work should be carefully examined, and for this reason the settling officer should always have at his disposal a small Establishment expressly for this purpose. The maintenance of this check conveys no

no necessary imputation upon the survey-
On the contrary any surveyor who has
a conscientious desire to fulfil the
duties of his situation will be glad
of the valuable assistance which will
thus be afforded him in the arduous task of
controlling his own large Establishment - The
Native Ameens, when they once perceive that
a friendly cooperation is established between
their immediate superior and the Revenue
Officer will be fearful that any Mal
practices, which may escape the observa-
tion of the one will be brought to light
by the amicable rivalry of the other — —
Much fraud may thus be prevented and
the labors of the surveyors materially —
lightened and facilitated -

Order thereon. (4-5) Ordered to be recorded.

From the Secy. to Government } Extract from the Minutes of Consultation under date the 6th October 1845.

Transmitting for Consideration and report a letter from Mr. Groves requesting that the clause in Act XV of 1839. which makes the personal appearance of the possessor of Sugar necessary for procuring a Certificate of growth may be relaxed.

(6)

Read the following letter.

To The Chief Secretary to
Government

Sir,

I have the honor to request you will lay before the Most Noble the Governor in Council the following circumstances of peculiar inconvenience to which purchasers of Sugar are subjected from the operation of the Act XV of 1839 in so far as it requires the possessors of Sugar to appear in person before the Collector in order to obtain a certificate - I am induced to call the attention of Government to this circumstance from the full confidence I feel in its desire to afford every facility to mercantile transactions as well as remove impediments.

I beg to call the attention of the Most Noble the Governor in Council to the enclosed two documents which I received in answer to my written applications for Certificates of growth of the Sugar I had purchased in the Cuddapah and Bangalore districts respectively

The

The Enclosed document (No 1) requires me as the professor of the sugar for which a certificate is required to appear in accordance with the act at Bangalore a journey there and back of between 2 and 300 miles to make a declaration in writing according to schedule A.-

The document No 2 departing from the letter of the Act, only requires me to send an authorized person to Cuddapah to make the same declaration which to my great inconvenience I have consequently done.-

Had I purchased sugar in the Bellary district which was close adjoining I should have had either to have gone or sent to Bellary, and after having reached either Bellary Cuddapah or Bangalore, I might have found any or all of the public officers appointed to grant Certificates absent in the district.-

I would therefore earnestly request from the Most Noble the Governor in Council that that clause in the act XV of 1839 which makes the personal appearance of the professor of sugar necessary for the procuring a certificate of growth

growth may so far be relaxed as that a written application from the parties professing sugar, containing the required declarations and specifications, shall be entitled to a Certificate the same as though such professors had applied in person from those appointed by Government to grant Certificates.-

Ordered that the following address be submitted in reply.-

To

The Chief Secretary to Government

Sir,

I am directed by the Board of Revenue to acknowledge the receipt of an order of Government forwarding for their consideration and report Copy of a letter with enclosures from Mr. A. N. Groves in which that Gentleman represents the inconvenience to which purchasers of sugar are exposed from the terms of Section II act XV 1839 which require that the declaration, schedule

6-7

To the Chief Secy to Government

Stating with reference to the order of Government forwarding for report a letter from Mr. Groves representing the inconvenience to which purchasers of sugar are exposed from the terms of Section II act XV of 1839 &c &c &c

Extract from the Consultation dated 30th October 1845.

Fort St. George 30th. October 1845

Schedule A attached to that Enactment, be made and subscribed by the possessor of the Sugar to which it relates in the presence of the officer by whom the Certificate of origin (Schedule B) is to be given. Mr. Groves solicits that this clause may be relaxed, and that a written application from parties possessing Sugar and containing the required declarations and specifications be held sufficient to entitle them to a Certificate.

2 In reply the Board direct me to state that it does not appear to them that the term "persons being in possession of Sugar" used in Section II of the act must necessarily be confined to the actual owner of the Sugar - nor why it should not, under a liberal interpretation, be extended to any respectable agent having the Sugar immediately under his charge, and competent to speak to its origin. In reference more immediately to the present application the Board would remark that they are fully alive to the inconvenience represented by Mr. Groves but it seems to them to be doubtful whether a declaration executed as he has proposed by a party distant perhaps 100 or 200 miles from the Sugar to which it relates can be acquainted with the place of manufacture of the article only from the repo-

Fort St. George 30th. October 1845

parties at a distance should be considered a sufficient voucher on which to grant a certificate of origin. If however the Government should take a different view of the case and consider that the "declaration" might properly be made before any Judge. Magistrate or his assistant or generally before any officer duly empowered for the purpose and certificate be granted on such declaration, it appears to the Board to be necessary that the terms of Section II and III of the Act should be modified, the provisions of those Sections as they now stand expressly requiring the execution of the declaration in the presence of the officer by whom the certificate is to be granted.

× × ×

Para 1. Agreeably to the recommendation of the Board of Revenue conveyed in para 10 of their letter dated 25th August 1845, the Most Noble the Governor in Council grants authority for writing off in the accounts of the Nellore Collectorate the Land Revenue and other Balances outstanding in that District from Fusly 1240 to 1252 and for years anterior to Fusly 1240 now reported to be irrecoverable, amounting as per Margin, in the aggregate to Rupees (1096561-2-7) Ten Lacs Ninety six thousand, five hundred and sixty one, Annas Two and Pice Seven.

	Rs. a. p.
Land Revenue prior to Fusly 1240	2235-0-4
Do. from Fusly 1240 to 1252	962543-8-7
Motturpha	12095-3-11
Tirecany	535-14-0
Shulk Cumums Rusoomes	79311-14-1
Wortanars	24459-1-2
Chittatewars	15330-8-7
Rupees	1096561-2-7

2. His Lordship in Council concurs in the views expressed by the Board in para 7 in regard to the Course to be followed in respect of the balances due on accounts of

Para 11.

of Quit rent on Enam Lands, and a proper attention of the Collector being directed to those arrears which are classed as "Recoverable" and "Doubtful" in view to their early adjustment.

3 His Lordship in Council also directs that the Report of the Board of Revenue together with the Communication from Mr. Monhouse and the Minutes recorded by the Members of Council be transmitted to the Honorable the Court of Directors with reference to paras 4 and 5 of their Revenue Dispatch dated 29th January 1815. Not a strong expression of the hope of Government that the explanation furnished by Mr. Monhouse, as to the delay in Reporting upon the old Balances of the Nellore District will prove perfectly satisfactory.

4 His Lordship in Council does entertain a very high opinion of Mr. Monhouse's efficiency as a public officer, but he deems it essential as a General rule that Revenue balances should be reported upon and adjusted as early as possible to render the exercise of effective Control practicable and useful.

5 Ordered that a Copy of the

the above Resolution be furnished for the information and guidance of the Board of Revenue, and that paras 3 and 4 be communicated to Mr. Monhouse in reference to his letter of the 17th July last.

(12)

Extract from the Minutes of Consultation under date the 18th October 1845.

Read the following letter from the Secretary to the Board of Revenue.
(Herewith enter 22d September 1845 No. 575).

The Most Noble the Governor in Council cannot learn from the foregoing letter if it has been heretofore usual to bring Bricks by the Canal, and if so, how the present rate of Toll has operated, and if the rate has been usual why a reduction shall now become necessary, before therefore complying with the recommendation conveyed in the foregoing letter he desires that fuller information may be furnished on the subject.

2 His Lordship in Council requests also the attention of the Board to the mode of levying the toll on the Cart load, which in his opinion is objectionable inasmuch as the amount of case now depends not on the number of bricks passing the toll but on the strength and capability of the Carts to hold a larger or smaller quantity. His Lordship in Council apprehends that it is the Custom at Madras to sell and buy bricks by the number and not by the Cart load which is an additional reason for modifying the present mode of levying the tase.

To The President and Members of the Board of Revenue.

Head Quarters Northern Division
Waltair 25th August 1815 } (Signed) J. Welsh
Major General,
Commanding Northern Division

No. 3.

To The Deputy Assistant Qr. Mr. General A.D.

Sir,

Para 1 As I find that it has for a long time past been the Custom amongst the Inhabitants of the Fort of Masulipatam to

Fort St. George 30th October 1815

to buy and sell pateches of ground granted by Government to individuals so long ago as 1779 and 81 without any reference to any authority whatsoever, I should wish to be informed whether para 40 section 1 of the Quarter Master Generals Regulations be not applicable to Natives as well as officers holding a grant of land from Government within Military limits.

2 From the oldest General orders which I can find upon the subject of grants (18th May 1812) which is copied in the 37th para of Quarter Master Generals Regulations it would seem that at that time grants were allowed for no longer a period than 21 years in which case it becomes a question whether these grants of ground made within the limits of this Fortress have long ago lapsed to Government.

3 I should also wish to know whether an individual does not forfeit his right to ground by allowing it to remain for 1 year or more without a habitation upon it.

4 These points I should be obliged by your referring to the Quarter Master General of the army with the permission of

14222 Fort St. George 30th October 1845

of the Major General Commanding the Division, and Shaw for further elucida-tion of the matter enclosed a Copy of a grant of a piece of ground which has lately been purchased by one Native from another, the purchaser having pulled down the house which stood upon it with the intention as I understand of selling the materials, and amongst his other acts of demolition has commenced an attack upon the brick wall of the Medical Store Room com-pound stating it to be within the limits of the grant - this Shaw ordered him to rebuild as it is full 45 yards from the road No. 12 of the Plan and about the place indicated in pencil - Shaw also stopped the sale of the Materials of the old building until an answer to the reference may be received -

From the Collr. Rajahmundry.

To J. Dyer Esqr. Secretary to the Board of Revenue Fort St. George.

Sir,

Pars. 1.

With reference to the Proceedings of the Board under date the 1st September 1845 wherewith I received the orders of Government requiring me to report whether the Head Assistant Collector in this District has the usual charge of Head Assistants Elsewhere with a distinct Establishment in attendance upon him, I have the honor to state that Mr. T. J. Hesse has had the revenue charge of the Nagaram and Amalapoor Taloks yielding a Surge of Rs. 8,1920-12-11 and Rs. 122146-3-8 respectively ever since the 12th of July 1843. that as a Magistrate he presides over all, but the Taloks immediately adjoining the Hill Country, that he has the sole charge of the Salt Department, the Post office, the District Cutcherry, the Frontier, the Stamps the Registry of Shipping, and the Sea Custom Department. Besides these duties he conducts enquiries into any other matters that may be referred to him. The Establishment required for these duties consists of 2 Shirestah Mud dutgars. 1 Salt Gentoo Accountant, 1 Salt Writer, 2 Magistrate Assistant Jawaubnevisses, 1 Sea Custom Writer, and 1 Frontier Writer, who are attached to the Head Assistant Collectors Office, and are always at his disposal Notwithstanding the efficient aid thus afforded me by Mr. Hesse the duties of my office are so laborious that I consider it essential to the interests of Government, that I should speedily be relieved of a Considerable portion of them, by the appointment of a Sub Collector.

2 The remodelling of the Taloks and the appointments and dismissals consequent thereupon, will form the subject of another communication.

Rajahmundry District. Jalasweram, 23d October 1845.

/Signed/ J. Prendergast Collr.

Ordered

Fort St. George 30th October 1845.

Ordered that the foregoing be submitted with the following address.

To The Chief Secretary to Government.

Sir,

I am directed by the Board of Revenue to acknowledge the receipt of Extract of Minutes of Consultation under date the 30th August last, requesting information as to whether the Head Assistant Collector of Rajahmundry has the usual charge of similar offices elsewhere, comprising the revenue and Police of one or more Talooks with a distinct Establishment, or whether his duties are confined to assisting the Collector in the performance of his general duties, and if the latter calling upon the Board to submit their opinion whether by increasing the Establishment of the Cutcherry of the district, so that the Head Assistant may be furnished with the requisite number of servants to enable him to undertake a separate charge, the more costly expedient of appointing a Sub Collector might not be avoided.

2. In reply I am instructed to submit the accompanying answer from the Collector of Rajahmundry to a reference made to him upon the subject, from which it will

21*25
To the Chief Secy. to Government
Submitting with reference to Extract Minutes of Cons. dated 30th Augt. last a letter from the Collector of Rajahmundry reporting the duties performed by his Head Assistant & stating that notwithstanding the efficient assistance which he derives from him his duties are so still so laborious that he considers it essential to the interests of Govt. that he should speedily be relieved of a considerable portion of them by the appointment of a Sub Collr. and adding that the Board would refer to Para 6 of their Proceedings of 14th July last suggesting the transfer of the Madura Sub Collr to Rajahmundry stating also that on the recommendation of this measure the Senior Member does not fully concur & has recorded his sentiments in a separate Minute.
28 Oct 1845

Fort St. George 30th October 1845.

be perceived that the present Head Assistant Collector W. Knox is vested with the revenue administration of two Talooks with Magisterial management of the greater portion of the district and has at the same time other duties, trust and has at the same time other duties his charge being fully commensurate with that generally held by a Head Assistant Collector and Magistrate. He has also a separate Establishment of the usual strength. Mr. Prendergast however States that notwithstanding the efficient assistance which he derives from Mr. Knox his duties are still so laborious that he conseives it essential to the interest of Government that he should speedily be relieved of a Considerable portion of them by the appointment of a Sub Collector. The sentiments of the Board on this subject have been already laid before Government and they would beg to refer to Para 6 of their proceedings of 14th July last as suggesting an arrangement by which the measure may be carried out without involving any additional charge. Viz. by the transfer of the Madura Sub Collector to Rajahmundry.

To Govt. 26 Nov. 1845 No 6.

I am however directed to add that

Fort St. George 30th October 1845.

that in the recommendation of this measure, the Senior Member who was absent from Madras when the above Proceedings were written does not fully concur, and has recorded his sentiments in a separate Minute.——

Revenue Board Office,
Fort St. George,——
30th October, 1845.——

(Signed) T. Pycroft.
Secretary.

Ordered also that the following Minute be recorded.——

24 - 26

Minute by Mr. G. D. Drury.

Minute by Mr G. D. Drury

I do not concur in the propriety of recommending to Government the removal of the Sub Collectors Establishment from the District of Madura, when we have never received information to the effect that it might be dispensed with.——

Revenue Board Office,
Fort St. George——
30th October 1845.——

(Signed) G. D. Drury.

Read

Fort St. George 30th October 1845.

Read again the following letter from the Collector of Masulipatam reporting on the general condition and resources of the Vinnacottah and Goodewadah Estates, with information in regard to the large amount of arrears which had accumulated under the Officers of Government.

From Collector of Masulipatam
with Enclosures dated 21st July 1845.

In Con. 28 Augt. 1845
27

(Here enter No. 78)

Proceedings thereon.

Recording observations on a letter from the Collector of Masulipatam reporting on the general condition & resources of the Vinnacottah & Goodewadah Estates & stating that the Board are of opinion that the restoration to the former Proprietor is not only not called for but would be otherwise impolitic and unjust.

The Estates in question were sold in November 1843 for arrears of Revenue amounting to about 5 lacs of Rupees. The sale was accelerated partly in consequence of the embarrassed position of the Ex Zemindar, arising from the litigation of his Brothers, who had instituted Proceedings in Court for shares in the property, and partly from the unwillingness of P. Venkatachellum the Principal Creditor on the Estate to become a party to such terms of compromise, as would justify an adjustment of his claims with the assistance of Government. In this position of affairs His Lordship in Council saw no alternative but to bring the Sharmahal Zemindary to sale on account of the arrears of Public Revenue against it. In their letter to Government recommending the sale of this Property and its purchase on behalf of Government the

"the Zemindar did incur Debt as is alleged for the payment of Peishcush but to what extent this necessity arose, from his private expenditure being unnecessarily profuse, it is not easy to determine. The account furnished by the Zemindar is not to be altogether depended upon for while it is drawn up to shew with precision the Balance of Cash at the close of the 5 years the realization of arrears &c. are not brought to account for the last four years of the series. It is clear that the account probably in the main true has been prepared for the occasion."

6. Following the results of the management as exhibited in the report of the Collector it is seen that the assets were greater under the Zemindar than under the Officers of Government - after deducting all charges and excluding the sums borrowed for the alleged Payment of Peishcush the deficiency of assets to meet the public demand was Rupees 117,458 or Rupees 23491 per annum during the 5 years of the ex. Zemindar's management and during the 8 years of the Collectors series the deficiency was Rupees 286,870 or Rupees 35,833 per annum. The charges under the officers

Peishcush for 5 years exclusive of Rupees 8000 borrowed	40,583	
Supplies after deducting charges	28,9207	
	117,458	
Average	23491	
Peishcush for 8 years under the Officers of Government	450,934	
Paid towards the liquidation of Peishcush during this period	353,994	
Balance	286,870	
Average	35833	

Officers of Government were larger than during the first series, arising chiefly from large sums having been expended for improving the irrigation.

7. Thus a deficiency of assets is observable both under the Zemindar and Collector arising from distinct causes, but the Income drawn from the property under the Zemindar was larger than the results obtained under the Officers of Government.

Paras 7 & 13. 8. In these Paras the Collector notices the results during 13 years embracing both the Zemindar's and Collector's management & the Statements from 2 to 5 - the condition of the Estate is exhibited. The following tabular view drawn from these statements exhibits the condetion of the 2 Purganahs and the settlement for each year during the 13 years under consideration.

The

9

The falling off in Fusly 1242 A.D. 1832/33 is accounted for by the Famine in that year, since that period Population and Stock have gone on increasing and during the last 3 years or Fuslies 1251 1252 and 1253 1841-42 1842-43 1843-44 the numbers of Ploughs and Pyto were greater than at any former time - But the Revenue has not been commensurate with this improvement in agricultural numbers and stock; latterly it has decreased considerably and in Fusly 1253 A.D. 1843/44 the settlement was less than one half of that for Fusly 1241 A.D. 1831/32 in which year the Estate was made over to the Zemindar.

	Ploughs	Pyto	Settlt.
Fusly 1241 1831/32	4473	2403	98,672
" 1253 1843/44	5009	2571	47,349

Settlement.	Rs	A.	P
Fusly 1241 1831/32	98,672	5	0
" 1242 1832/33	52,803	5	10
" 1243 1833/34	77,508	7	0
" 1244 1834/35	82,517	12	6
" 1247 1837/38	77,224	4	8
" 1248 1838/39	82,981	4	1
" 1249 1839/40	90,130	12	1
" 1250 1840/41	33,225	11	4
" 1251 1841/42	55,820	12	1
" 1252 1842/43	59,510	0	3
" 1253 1843/44	47,349	11	3

The Settlt. was made over to the Zemindar.

The extensive outlay for repairs seems to have yielded a return though small, for a short period only viz. during Fuslies 1247-1248 and 1249 since the last mentioned year the revenue is greatly below what was realized before the repairs - an average drawn from these results it is obvious is of little use in determining the Government Demand.

Expected Outturn.		10- Rupees
Fusly 1247	1837/38	95,000
" 1248	1838/39	120,000
" 1249	1839/40	140,000
" 1250	1840/41	140,000
" 1251	1841/42	165,000

The difference between the actual results as noticed above and the outturn which expected on the completion of the works of irrigation is very considerable

considerable, circumstances, as the partial failure of the Kistnah Freshes, and depressed state of the market for agricultural Produce may have operated to distort the realization in full of what was expected; but are not sufficient to account for the great difference noticed. Particularly the decrease during the last 4 years of the 2d. Series of management - The Board will expect at an early date a special report from the Collector on this subject and he is requested to state particularly with reference to the Civil Engineer's Diary for the month of February 1836 what Tanks have been put into complete repair to receive the supplies from the Kistnah, with the extent of land under each Tank fit for cultivation, and the extent actually cultivated - also what Tanks remain to be Repaired with the land under them - The Collector will further be pleased to report on the state of the Pooloroo and Boodemair, by which the Kistnah supply is received - The Board apprehend that the projected improvements in the irrigation have not been fully carried out, and that the reduced state of the Revenue is to be attributed in part to this cause - It is important not only that the supply from the Kistnah should be abundant but that the reservoirs intended to receive that supply should be in an efficient state.

The

Fort St. George 30th October 1845

"cultivation on the Zemendars Errors in the details
"of the account form no more ground for reducing
"the original assessment than they would for raising
"it and the question to be considered is not whether
"the calculations were correct in all their details
"but whether the assessment thence resulting is
"such as the Country can bear - even supposing
"the assessment to be excessive it does not follow
"that the Zemindar has a right to reduction a
"permanent settlement once concluded must
"be regarded as inviolable, and any abatement
"that it may be considered proper to allow in
"a particular case, must be conceded as an
"act of grace and not as a matter of right."

12.

Under the foregoing consideration and adverting to the deteriorating effects of Zemindary management as exhibited throughout the Northern Circars and especially to the claims of the Ryots on the protection and care of Government, the Board are of opinion that the restoration of the Estates to the former Proprietor is not only not called for but would be otherwise impolitic and unjust.

13.

The Family are in receipt of an allowance from Government of Rupees 500 per mensem - As lapses occur the conditions of Family and their claims if any on Government should be specially reported.

Ordered that a Copy of the foregoing Extract from the Board's Proceedings be submitted to Government.

So

Mr. of Ltr. 21st Augt. in Sec. & Govt. 18th Sept. 1845

Fort St. George 30th October 1845.

Read the following letter

To J. Pycroft Esqre Secretary to the Board of Revenue

Fort St. George.

Sir,

With reference to your letter of the 17th July last, requiring information as to the probable result of placing restrictions on the importation of Paddy and Rice from Arracan and other Ports, as regards the export trade from this Port, together with Statements of trade for the last

I have the honor to forward the accompanying Statements exhibiting the particulars of the Import and Export Trade at the Port of Masulipatam from 1834/35 to 1843/44.-

2.-

It will be observed that the principal articles of import from Arracan and Chittagong exhibited in Statements Nos. 1 & 2 consist of Paddy and Rice, the annual average of these for the period under review being £ Rs. a. p. 233442 — 8 —, while the value of the other articles is comparatively small

28.

From the Collr. of Masulipatam

Submitting the information called for by the Board as to the probable result of placing restrictions on the importation of Paddy and Rice from Sea Ports

		Value of Import. £ Rs. a. p.
Arracan	Paddy — 1499609 — — —	
	Rice — 719980 — — —	
Chittagong	Paddy — 944 — — —	
	Rice — 1,13892 — — —	
	Total 2,33,4425 — — —	
	Average — 2,33,442 — 8 —	

11. The nature of the accounts furnished by the Zemindar and the reduced state of the Revenue during late years would not justify a reduction of the Peishcush based as suggested by the Collector on the actual Jamabundy sist during the 13 years under review. This sist does not represent the real capability of the Estate and cannot therefore be received as affording correct data for adjusting the Government demand supposing the proposition for a modification of the present Peishcush to be entertained - The proposition to reduce the Peishcush to Rupees 48000 for Six years, till the ex-Proprietor is relieved from his pecuniary obligations is in fact to impose upon Government the liquidation without repayment of the Zemindars Debts and the proposed permanent reduction of the Peishcush from Rupees 81,333 to Rupees 60,000 is a needless sacrifice of Public Revenue - The proposed reduced amount it is seen is considerably below the resources of the Estate as shewn in the Margin drawn from Statements 2 and 3 (Col.25) which accompany the Collector's Report and involves a total abandonment of the large increase expected from

Fusbes	Berij
1241 — 110,191	- 13 - 9
1242 — 38,419	- 4 - 10
1243 — 85,336	- 2 - 3
1244 — 88,458	- 2 - 0
1245 — 73,984	- 15 - 3
1246 — 77,008	- 3 - 11
1247 — 87,774	- 5 - 2
1248 — 83,053	- 4 - 1
1249 — 90,258	- 12 - 1
1250 — 33,353	- 11 - 4
1251 — 65,948	- 12 - 1
1252 — 59,638	- 0 - 3

961880	- 7 - 4
Average 73990	- 12 - 10

from the restoration of the irrigation from the Kistnah - The Government have already made large sacrifices for the benefit of the Family by foregoing its own demands for the satisfaction of private debts and by a former reduction of the Peishcush from Rupees 92,729 to Rupees 81,333 the present amount - It must be borne in mind that the former reduction of Peishcush was conceded "as an act of grace and not as a matter of right."

Extract from Bd. Rev. 20th June 1831 Para 16-17-19
From Govt. 8 in Cons. 14th Novemr. 1831 Para 9.
Para 36 of Board's Proceedings quoted above.

The argument used on that occasion is of such importance that it is proper to transcribe in this place the observations of the Board at that time - They were not disposed they said "to admit "that errors or oversights such as these in the "Settlement of the Permanent assessment constitute any right on the part of the Zemindars to claim "a reduction of their Peishcush - The permanent "assessment of the Northern Circar although "founded on the accounts of the Circuit Committee "was not regulated exclusively with reference to "them but upon a consideration of the general "resources of the different Zemindaries and of "the revenue they were thought capable of yielding "under a system which limited the demand "of the state and conferred all advantages from "increased Population and extended cultivation

Fort St. George 30th October 1845

small -

3 Statements Nos. 3 to 5 shew the particulars of Exports to Arracan, Chittagong, and Moulmein which comprize Painted and white Piece goods, Pepper, Gingely Oil, and Ghee, and which give but a small average per year as compared with the value of Imports, the amount being only Rupees 3924. -

Value of Exports of sundry articles C. Rupees	
Arracan	18,934.
Chittagong	7,050.
Moulmein	13,256.
Total	39,240
Average	3924.

4. - The average value of Imports and Exports of all articles for the above period amounts to 233780 - and 3924. Rupees respectively as shewn in the accompanying Abstract No. 6. -

5. Statement No. 7 exhibits the quantity of Rice and Paddy imported during the last Official year 1844/45 as well as the amount of duty which under Act No. VI of 1844 has been collected - The imports of this year shew a decrease below the average of the preceding 10 years while there was a rise in the prices of Rice & Paddy in 1844/45 above that of 1843/44 by Rs. 2 - a. 0 — 2 and a. 8 — 11 per candy respectively. -

Judging

Fort St. George 30th October 1845.

6. - Judging from the results above shewn it would appear that while by the imposition of restrictive duties on the importation of Grain and Paddy, the small coport trade at present existing is not likely to be affected, these duties may doubtless be expected to have the effect of checking importation and thereby keeping the prices of Grain above those now obtaining and thus securing a fair return for agricultural produce of the Country but it must at the same time be recollected that in seasons of drought or failure of produce the proposed restrictive duty might operate injuriously on the people, particularly the poorer classes, as, notwithstanding the late depression of prices in the market value, this District appears to draw from the Eastern Ports large supplies of Rice and Paddy both for its own consumption, and sometimes for exportation by land into the interior for the supply of the Carnatic Dominions -

Masulipatam Zillah,

(30)

From the Asst Coll. of Guntoor, Para 1.

Sir,

Requests further instructions as to what particular Regulation the Board think that the Deputy Sheristadar and Totah Kistnamah may be put upon their trial the Acting Collector being of opinion that their case cannot be tried under the provisions of Regulation IX of 1822

I have the honor to acknowledge the receipt of your letter of the 2nd instant directing me to put Soobrow the Deputy Sheristadar of this district and Totah Kistnamah ameen of Chaybrole formerly, upon their trial under Regulation IX of 1822 on the two cases reported in my letter dated 12th August last and upon some few of the other instances of malversation referred to in para 14 of the same communication.

2.- The offence charged against these individuals is the receipt from Curnums and servants attached to the Tanah Cutcherry of certain sums of money to be employed in the erection of a Choultry at Mungulgherry - It appears by the evidence already submitted to the Board that the parties from whom the money was received were in all instances told

the

Fort St. George 30th October 1845

nature and no more proof can be reasonably expected to be forth-coming in the remaineng than in the present one/ I trust the Board will hold me excused in requesting their further instructions as to the particular provision of the Regulation under which I am to proceed.

6. I beg to assure the Board that I am quite convinced of the necessity of examples of punishment in this district and that if I were satisfied that I had the legal power and the means of conviction I would immediately proceed against these two individuals.

Fort St. George.

32

Sir,

From the Coll.r of Nellore. } Para 1.

Recommending the case of Vejella Comara Venkataparauze to the favorable consideration of Govern.t

With reference to the endorsement of the Board on Petition No. 442 of 1845 from Vejella Comara Venkataparauze of Goodloor praying for the continuance to him of an allowance of 150 Rupees per mensem and certain lands in the enjoyment of his father Comara Kristnamrauze deceased and since resumed, I beg to offer the following account of the circumstances connected with the Goodloor family gathered from a correspondence of former Collectors with the Board and Government.

2. It seems that long previous to the assumption of the Country by the English one Casavarauze enjoyed the Goodloor Purganah as a Jaggire together with certain Manians and Cavely Roosoons in some Villages of the Cavally and Buddapoody Talloohs.

3. The Purganah was thus held for some time and afterwards on a favorable rent till the time of Pedda Narrainrauze the brother of Petitioner's grand father with whom some misunderstanding having arisen the Nabob Wallajah resumed the land and Pedda Narrainrauze went to Vejaya Nagarum where he died. subsequently the Purganah was granted on a favorable rent together with an allowance of 100 W. Pags. to Chinna Narrainrauze younger brother of the grand father of Petitioner, who was succeeded by his ... adopted

adopted son Pedda Kristnamarauze and he again by his brother Coomara Kristnamarauze Petitioner's father Coomara Cristnamarauze was deprived of the Purganah and Pension after a time by the then Foujdar and confined at Arcot.

4. On an enquiry made by Mr. Travers the Pension of 100 Pagodas formerly enjoyed by Coomara Cristnamarauze was conferred on four widows of the Goodloor family and in a note appended to the report on the subject dated 20th July 1802, it is stated "these Pensions given by the Nabob in consideration of the claim of this family to the Zemindary of Goodloor, the amount was 100 Pagodas monthly owing to dispute in the family it has been divided into 4 shares to 4 widows of the former Zemindars."

5. On the release of Coomara Kristnamarauze he returned to Goodloor and being on friendly terms with all the widows except one Bootahamah he lived with them enjoying a part of their share of the Pension. Bootchamah named one Lutchmenarsummah rauze as her heir and shared her Pension with him.

6. It appears that the two Individuals above mentioned represented their distressed circumstances to Mr. Travers and their claims to the lands formerly held by their ancestors, and that Gentleman granted to Coomra Cristnamarauze, 2,170 Gortoos and to Lutchmenarasimarauze 1,320 Gortoos of land. On the death of the latter the grant was continued to samarauze

-rauze. These lands are alluded to in the 14th Para of the Boards' Proceedings on the Jummabundy report of fusly 1234 in reference to a suggestion of the then Collector that they should remain rent free with the present occupants. "Part of the land consisted of Jungle and was granted as Cuttoobady and part of arable land granted on the condition of paying rent in future. tho' this condition was never fulfilled the lands being held under "Doombala" or rent free tenure. In consideration of the connection of the present occupants of the lands in question with the former Zemindars of Goodloor, and the length of time they have held the Lands free of assessment with the knowledge and permission of the local authorities, the Board admit of the propriety of the Collector's suggestion as to the inexpediency of any change for the present, and accordingly recommend it for the sanction of Government, but as the original grants were made without any authority, it must be understood by the parties that they are considered to be invalid and are continued now as an indulgence which will not be extended beyond their lives." This suggestion was confirmed by the sanction of Government dated 8th November 1825, and the lands held rent free during the life time of the occupants and on the death of V. Surarauze in fusly 1236 those allotted to him were resumed and included in the Coroo Villages and Venkata Kristnama rauze dying on the 11th

11th. February 1840 his lands have since been under the Circar Management and the net receipts amounting to Rupees 7,866-8-8 held in deposit the restoration of these lands is now the prayer of the Petitioner the adopted son of the last holder.

7. Adverting to the Pension and the circumstances connected with it reference has been previously made to the division of 100 Pagodas originally granted to Coomara Kristnamarauze between the four widows of the Goodloor family. After the death of 3 of them who were on friendly terms with Coomara Kristnamarauze he petitioned Government thro' Mr. Travers for an allowance and in a letter dated 10th. July 1818 it was recommended that a Pension of 150 Rupees per mensem should be granted to Petitioner as "he is now reduced to much distress from the want of any allowance while his caste and rank in life preclude his having recourse to any ordinary occupations."

8 The Pension of 150 Rupees was accordingly granted by Government as communicated by the Secretary to the Board of Revenue under date 17th. September 1818 in lieu of all claims on the original allowance of 100 Pagodas, and the present Petitioner prays for the continuation of the same to him together with the land held by his late father, or the restoration of the original Pension of 100 Pagodas per mensem.

9 The above are the particulars connected with the ancestors of Petitioner as far as can

14263 Fort St. George 30th. October 1845.

be gathered from the Records of this Office, tho' a more repetition of what has already been written to the Board and a desire to save the trouble of a reference must hold me excused for so lengthy a detail.

10 With regard to Petitioner himself and the many dependants who have subsisted on the products of the lands now under Zuft, I find from enquiry that they are suffering the greatest distress, the family of Petitioner mainly dependant upon him consists of a hundred persons in addition to others mentioned in the accompanying list: and since the death of Coomara Kristnamarauze they have been reduced to the sale or mortgage of much of the personal property they possessed and have further burthened themselves with unavoidable debt. The family appears always to have been respected and respectable and the present head bears a very good name. His claims on the bounty of Government as a matter of right have been clearly disallowed in their decision regarding the tenure of the lands granted by Mr. Travers, a decision of which the Parties were aware, but from long occupancy (nearly 60 years) a hope has existed that the evil day would be stayed and with the too Common improvidence of this class no preparation has been made to meet it when it has come: thus leaving them in the present instance literally

penniless

penniless and dependant on the bounty of others for support.

11- Should the Board in consideration of the respectability and distress of Petitioner's family and dependants be inclined to recommend their case to the favorable consideration of Government, I venture to suggest that the grant of land should be given for their support rather than an allowance of money.-

From the Collr of Nellore — Submitting his report on the Settlement of the District for Fusly 1254 A.D. 1844-45

Sir,

1. I have the honor to transmit No 1. the Summahbundy and Kistbundy Statements for fusly 1254 A.D. 1844-45 with a detailed Summahbundy statement, and a Statement of the Beriz of that fusly Compared with the previous one both in English and Mahorattan.

2. Of the 17 Talloocks Composing the District. 10 Viz. Survapully Cotta, Nellore, Talamunchee, Sungum, Cavelly, Coommulut= =poor, Goondavole, Calegherry, and Sydapoor were settled by myself. Mr Cochrane the Head Assistant settled the Talooks of Ravoor and Woodiagherry, and the five Talooks Composing the Sub Division were settled by the late Sub Collector Mr Maltby. Copy of the Report on which by Mr Pringle is forwarded.

3. The total Number of Villages and hamlets in the Zillah is as follows.

Fusly	Villages	Hamlets	Total
1253 — A.D. 1843/44	727	599	1326
1254 — A.D. 1844/45	727	602	1329
	0	3	3

4. The following are the particulars

Fort St. George 30th October 184[illegible]

particulars of all the Villages in which there has been no change in the mode of settlement from that hitherto observed

	Fasly 1253 1843/44	Fasly 1254 1844/45	Comparison Increase	Decrease
Villages settled According to Mr. Smalley's Mustaks	384	384	"	"
Do Do according to the new Jurrums	67	67	"	"
Do held by Gungoolawar Velin = gar paying certain Amt of rents	8	8	"	"
	459	459	"	"
Do Settled according to Mr. Chasser's Mustaks	129	129	"	"
Do Do Do to Mr. Smalley's Survey	86	"	"	"
Do Do according to Amany	53	53	"	"
	727	727	"	"

5. There is an increase of 3 hamlets in the Current year arising from the formation of fresh hamlets under the Villages of Munaly-o-ttah and Caukaloor in the Bud = dapoody Tallook, and under Iravagoor = tah in the Ongole Tallook.

Season

6. There was no rain in the Tillah during the Month of April when the Cauroo Cultivation should have been Commenced upon neither did the River receive any freshes. In the Months of May and June there were partial falls of rain and the River also received a supply of water. The Villages under river Channels taking advantage of this carried on the Magany Cauroo Cul. = tivation and the Metta Poonasa Vig. Punja

Fort St. George 30th October 1845.

Vegs in proportion to the supply of water that was received. In the Month of July there was no rain at all excepting a very trifling fall in the Tallooks of the Sub Division, and there is inconsequence a decrease in the Metta and Magany lands Cultivated with the first series of Crops. In the Month of August the fall of rain was very partial and of little benefit for the purposes of Cultivation. The River also received no freshes in this Month. In the Month of September there was a welcome fall of rain and the River received two tolerable freshes which enabled the Ryots to Cultivate Guddavary Crops and to some extent Peskanum on the Magany lands. Of the Moodooroo Jonna, Vateraghee - Auroogu, Lamp Oil seed Vegs Crops of the second series cultivated on the Metta lands in the Months of July and August, those which were Sown early were productive, tho' some which were sown later in the season sustained injury more particularly in the Sub Division from the greater quantity of rain which fell in those Tallooks in September. In the beginning of October there was a general fall of rain in the District and the Pennar received a fresh to

the

Fort St. George 30th October 1815.

the extent of ½ its full supply. The Tanks also received a supply of water tho' only from 1/16 to ⅜ of their full quantity and the Cultivation of the 3d Metta and Magany Crops was Commenced. In all November there was no rain, and the prospects of the season wore a very blank appearance till the middle of December when a plentiful fall throughout the District and a full fresh in the Pennar filled the Tanks under River Channels and gave a considerable supply of water to those depending on local rains. In the Sub Division however the quantity of rain was much less than in the Principal Division and as the greater portion of Magany land Cultivated in the Sub Division Tallooks depends upon Tanks supplied by rain, and not by River Channels the extent has fallen off in proportion to the want of supply, and in round of the Villages of Ongole and Davagondroo Tallooks wet Cultivation was not attempted. With regard to the dry Crops, the Pyru Jonna growing in December received considerable damage from the heavy fall of rain in many parts, and to

such

Fort St. George 30th October 1815.

such an extent in some as to render a second sowing necessary.

7. The state of the season as above represented will prepare the Board for a considerable falling off in the extent of land cultivated, tho' every exertion was made to encourage the Ryots to carry on as much as possible in the hopes of a favorable change. For the Commencement of the early Car to any extent, water was not to be had, and until the beginning of September scarcely any rain fell. Early in October the opportune supply gave great hopes of a favorable season for the large harvest, but these hopes were not fulfilled in consequence of the total failure of rain in all November which no subsequent supplies could ever make up for the proper time when water is most required having passed over. The rains of December which commenced falling on the 15th were taken every advantage of, the great apprehension was felt by the Ryots last from the lateness of the seasons no subsequent rain would fall to bring these Crops to maturity in some instances their fears were realized and it became necessary to

resort

resort to the use of Pecottahs to save their Crops, while in others far removed from the source of supply, the Crops failed entirely. On the whole the Season under review tho' better than at one time expected, has been far less favorable than the preceding one. The Mooloom lands undertaken were mostly brought under Cultivation as also the Jareeb lands with the exception of a small portion, the particulars of which will be detailed in other part of the report.

Wet Crops. 8. The produce of the wet lands as may be supposed was a good deal affected by the variableness of the season and the irregular time at which much of the Cultivation was commenced, tho' on the whole when the Crops came to maturity the produce on the average was tolerably good those lands short of water yielding proportionably less.

Dry Crops 9. The produce of the first series of dry Crops was in many Villages but ordinary and in others the failure was extensive, and in the Sub Division they are said to have yielded not more than a half produce. The Moodooroo Jonna Vera being the second Series of dry Crops sustained some

some damage from the insufficiency of the rains, tho' the early sown Crops produced a good return, while those sown at a later period yielded but half from the injury sustained from the attack of insects Vera. In the sub Division where this Cultivation is extensive some of the young Crops Viz. Auroga, Raghee Vera were burnt up, and those which had not suffered so severely yielded not more than 3/4 prod:. duce. The other Crops Viz. Oil seed Vera of the second series were generally productive. The heavy rain of December as before remarked caused considerable damage to the young Cyra Jonna the principal dry Crop of the 3d. series but generally speaking the Crops which escaped and those which were resown gave a fair return. The pulse Viz. Bengal gram, green grain and in the Dry lands yielded a tolerable produce, and the Mooloom & Jareeb lands were also ordinarily productive.

10. The accompanying statement No. 5 shows the prices of several grains, the highest average rate of dry grain is Rupees 20-5-4. and the lowest Rupees 15-3-7, the highest rate of wet grain is Rupees 20-6-4 and the lowest Rupees 13-13-4. giving an average rate of about Rupees

17-4-11.

fusly.

13. In fixing the assessment Ditto two things are mainly to be regarded, the interests of Government are to be protected, and the Ryot is not to be overburthened with more land than he has the means of cultivation or paying for; and nicely to adjust these

two

two points, is very difficult. The Board are well aware of the propensity of the Ryots in this District to throw up or leave waste land in order that their Cattle may Graze upon it and for the protection of the Crear, all such wet lands taken up and left waste, are assessed in full if there be water and means to cultivate them, in this there is no great hardship, for altho the supply of water is often artificial it is more certain than rain. But as regards the dry land taken up the general System is to allow no remission on that left waste, tho in making the settlement cases occur continually in which this rule cannot be enforced in consequence of the inability of the Ryots to pay or from unforeseen circumstances of the season. Still the general System includes all dry lands in the Settlement whether cultivated or waste and this liability to pay under ordinary circumstances makes Ryots the More urgent in their endeavors to contract their extent of cultivation Against this inclination on the part of the Ryots to throw up land, the authorities have to contend Strenuously for the maintenance of the Revenue, and in the year under report much care has been taken that no unnecessary extent should be given up tho' the distressed State to which many of the cultivating Ryots have been reduced from the continuance

of

of bad seasons and low prices, rendered it impossible for them to retain the full extent of land previously held by them, or to cultivate in full that which they undertook. In the quantity deducted from the Dittum of the year is also included land left unoccupied in consequence of the death or desertion of the late holders, as well as that which has deteriorated or become uncultivable from flood &c.

14. The Talloks in which the chief decrease has arisen are enumerated below.-

Talooks	Metta	magany
Surnapully	256	332
Nellore	"	193
Sungam	250	57
Cavelly	"	40
Poomaultulpoor	187	"
Goondavole	133	16

Enamanamelloor	166	"
Chendaloor	497	"
	1388	22
	2687	681

The

15. The following exhibits the total decrease in each of the Divisions-

	Principal Division Gorloos	Sub division Gorloos	Total Gorloos
Metta	1361	1386	2749
Magany	702	19	721
	2063	1407	3470

16. In the Sub Division the decrease in the Magany is small and that in the Metta principally from the inability of the Ryots to undertake its Cultivation.-

17. The following shows the total extent of decrease in the Gillah in the Mooloom and Jareeb lands-

	Gorloos
Mooloom	"
Jareeb	15/38

18. The Talloks in which the decrease has occurred are-

	Mooloom Gorloos	Jareeb Gorloos
Buddapoody	"	2
Davagoodoor	6	1
Ongole	43	10
Enamanamelloor	3	"
Chendaloor	12	2
	64	15

19 In the principal Division there is an increase in the extent of Mooloom and Jareeb

Lareeb and Mooloomonly in the Baddaspoody Tallook tho the decrease from the reduction in the Sub Division more than counter balances it as above shewn.

20. The decrease in the Mooloom and Lareeb lands in the Sub Division has arisen from many of the wells being out of repair, as also the Pecottas in the banks of Rivers and from the lands having deteriorated. The Ryots of those lands which were thus left to be waste, were induced in some instances to take up Mettah lands in lieu of them, but this measure also from the extreme poverty of some was of little avail. Attention having been directed to the impaired state of the wells &c. in the 7th Para of the Board's Proceedings on the Rebut of fusly 1253 this subject will be taken into consideration and reported on.

21. The following Statement exhibits a comparison of the actual cultivation between fusslies 1253 and 1254.-

Davagoodoor	11,586
Ongole	4773
	39,362

33. In the other Talooks the deductions have been small. The Net Amount 71812 is larger than that of the previous year and caused principally by the less favorable nature of the season as shewn more particularly in the Sub Division where the Magany Bunger remission in 3 Talloaks exceeds that of all the

the Principal Division. Besides waste for want of water, deterioration of the land &c. the amount of Bunger is swelled by the practice which prevails of including in a Ryots Dittum all lands which he has long held, that they may be brought under cultivation if the season permits or assessed if left waste when there are means of cultivating them, but it often happens that tho' the season is favorable the Cultivator had not the means of carrying on his cultivation to the full extent of his Dittum, and in such cases remission on the waste becomes an act of justice as well as necessity, but when the land has been clearly left waste for grazing ground the assessment is properly enforced. The deduction on account of Mooloom and Sareeb Bunger are as follows.-

	Mooloom Bunger deducted from Inundation.- CRs a ℗	From other causes.- CRs a ℗	Total CRs a ℗
Fusly 1253	348-13-8	3566-4-4	3915-4-1
" 1254	982-5-6	2544-2-7	3526-8-1

Decrease ——— 1,940 — 13 — 11

39. The Board will remember a reference on the subject of Sooktee remission dated 26th July last the reply to which left a good deal to my discretion according to the circumstances connected with the claims for such indulgence &c the broad principle "a combined consideration of produce "and price derived by a Ryot on his productive "lands" was to be my main guide in granting remissions for Crops dried up. To ascertain the actual produce on lands previously cut and carried was out of the question, and in lieu of such information, I assumed the product of all lands which had been cut to be an average one, and comparing the Sist payable on this land at the Settlement price with the price the assumed produce would fetch in the market at the selling prices of the year, the ability or inability of a Ryot to pay for his dried up land was decided according to the profit or loss he has sustained in the disposal of his grain, keeping at the same time in view any other circumstances of a Ryot, which might lessen his claims to remission, and disallowing them on small portions of land, where the extent of productive land was considerable In the Woodingherry

Woodingherry Tallook where the commutation price is lower in calculating the claims for Sooktee it was found that the Ryots had derived a trifling profit by price, and in such cases it was deducted from the amount of Sooktee allowed. Statement No. 10 will shew the deductions, which tho not in exact accordance with the orders of the Board will I trust, meet with their approval under the difficulty attending their application as before brought to notice. The following are the Tallooks where the chief deductions under this head were made.—

Total ——— 104-7-0
294-2-0

Fusul Cummy. 42. The deduction on account of Fusul Cummee
for fusly 1253 was Rupees ——— 1159-6-5
" 1254 ——— 1044-4-6
Decrease ——— 115-1-11

43. The following is a comparison between fusly
1253 and 1254 of the deductions made on this account.
A.D. 1843/44 A.D. 1844/45

	Fusly 1253	Fusly 1254
	Rs. a. p.	Rs. a. p.
Magany Mooloom and Sureb lands Cultivated with Crops of lesser Value	323-1-5	568-10-5
Two Crop Mooloom land Cultivated with only one Crop	836-5-0	475-10-1
Total	1159-6-5	1044-4-6

44. From this it will be seen that there has been a large decrease in the item of two crop Mooloom land cultivated with one crop, but that the difference has been partly made up by an increase in the item of land cultivated with Crops of lesser value, the net decrease being Rupees 115-1-11. The increase in the first item is chiefly in Ravoor and Woodiagherry Pallocks in the former it was occasioned from certain betel lands having been cultivated with a wet crop and from a certain extent of Tobacco land being cultivated with a dry crop and not

not followed up with a Tobacco crop which if grown, would render the dry crop liable to no assessment. the difference between the original assessment, and that of the less valued Crops has been deducted under this head. The increase in Woodiagherry Pallock is in consequence of my permitting a certain extent of long unused Tobacco land to be cultivated for the year under report with Mooloom rather than it should be waste, like much other land of the same kind, the time for planting Tobacco having gone by and the inclination to do so wanting from the highness of the assessment on the land, tho the Ryots promised to cultivate the proper crop in the present year. The decrease in the two crop Mooloom land cultivated with one crop is Rupees 360-10-11 occasioned from some lands which it was practicable to [illegible] having been mostly under water in fusly 1254 A.D. 1844/45
1253 A.D. 1843/44
and also from wells decaying.

Palevasy. 45. The deductions under this head were as follows:-

	Fusly 1253	Fusly 1254
	Rs. a. p.	Rs. a. p.
Palevasy on account of Payacaries	239-11-4	219-8-6
Do. on account of irrigating lands by Pecottahs	755-12-2	1226-11-9
Total	995-7-6	1466-4-3

46. The increase in the Palevasee on lands watered Pecottahs is as follows - Viz.t.-

	Rs. a. p.
Principal Division	202-11-2
Sub Division	288-4-5
	490-15-7

47. The above increase has arisen from the greater use of Pecottahs in consequence of the

the smaller supply of water in the Tanks &c.a the Sub Division owing to the failure of early rains the lands situated in the bed of the Carardoo Tank were cultivated with the first Crop and brought to maturity by the use of Pecottahs.

Moonasib Cummy.

48. The deductions under this head in fusly 1253 were Rupees 2,650-5-6
in fusly 1254 3,472-3-6
Increase 821-11-0

49. There are included under this head the deductions that were made on account of fusly pausty allowed for Cunnabhavooloo, and sums reimbursed on account of the repairs of Old wells as well as sums remitted to distressed Ryots Panoobutty in Curvapully Cauvelutty in Nellore, Gruddgoontah in Talamunchee Roolocotta and Threeporum in Cavelly Ramiapully in Ravoor and Annavarum in Coleahery &c.a Villages are notoriously too highly rated and it has been the practice hitherto as occasion seemed to demand to make some remission to the Ryots. In the year under report the produce being little and the Ryots in a poor condition indulgence was shewn and the amount entered under the head of Moonasib Cummy" hitherto the amount remitted, has stood as a balance and is inclosed in the list of old balances outstanding.

50. The Net settlement of fusly 1254 Rs. 18,24,440 after making the above deductions amounts to Rupees 13,12,788-8-11 Viz.t.

Principal Division 9,28,543-1-6
Sub. Division 3,84,245-7-5
13,12,788-8-11

Shewing a decrease in the current year of Rupees 104,511-4-6. Viz.t.

In the Principal Division Rupees 52,948-15-9
and in the Sub Division 52,262-4-9

51. This decrease tho large is very far short of what was expected. From the

the unfavorable nature of the season as before described, much land was uncultivated, the rains having fallen at too late a period and other land was left waste from an entire want of water, particularly towards the Northern part of the District, which accounts for the large extent of Magany waste in the Sub Division; the Tanks in Danagoodoor and Buddapoody where wet Cultivation is principally grown, having been almost entirely dry. The decrease in the extent of land taken up also, has tended to lower the apparent Beriz, tho it's retention would not have added much to the Collections. The amount of Dittum given up in the Principal Division is Rs. 20,797-15-0 the decrease in the Cultivation 35,753-0-7 of which the decrease in the Magany Cultivation alone is 32,678-3-7. The deductions for Palavasy Moonasib Commee and other small items being Rupees 1556-10-2 and forming altogether a decrease of Rupees 58,017-9-9 from which deducting 5968-10-0 on account of a smaller remission on Sooktee, inundation and an increase in Poollary and Chayroot &c.a and the net decrease in the Principal Division is Rs. 52,048-15-9 compared with the Settlement of fusly 1253 A.D. 1843/44. In the Sub Division the decrease in the Dittum is Rupees 14,695-8-10 and in the Magany Cultivation Rupees 39,134-2-9. In some minor items there is an increase and in others a decrease, making the net decrease Rupees 52,462-4-9.

In

14295 Fort St. George 30th October 1845.-

In the Talooks of Ravoor and Sydapooram there is a slight increase in the Beriz while there is a decrease in all the other Talooks - The increase in the Ravoor Talook being only Rupees 984-8-3- no remark appears necessary - The increase in the Sydapooram Talook is Rupees 5416-1-2 Of which Rupees 5102-14-10 are on the different description of lands and Rupees 313-2-4- in the Nagadeat or ready Money Collection - The Beriz of this Talook has been hitherto settled on an estimate of the quantity of produce the lands is supposed to have yielded and this method appearing to me to add considerably to the many objections already attending the Amany System I had all the Crops Cut and thrashed under Circar Management a difficult and tedious work from the variety of grains and the scattered position of the fields, but as the object was to ascertain as nearly as possible the real produce of the lands with a view to their being finally Money assessed I thought it could be done more satisfactorily by actual measurement of the crops, rather than by estimate and with a more favorable season the out turn probably would have shewn a greater difference than that now exhibited, between the Amount formerly assessed on estimate and that ascertained by actual Kyle - The prices at which the Settlement were made having been higher causes the increase in the Beriz The following are the particulars -

	Fusly 1253		Fusly 1254		Increase		Decrease

Respect

Rupees 38-11-9- the Sale of pasturage on certain Amanut fields in the Cusba of Survapully were last year included in the Poollary payable by the Village, and as an annual Muctah of 900 was settled for the Village it was deemed advisable to allow them these lands also as pasturage without additional Peerwah.

55. The Cusba of Nellore where the Poollary is collected under capitation a number of Cattle having died there is a decrease in the Poollary Collections, but this has been partly covered by the increase derived from a capitation in a certain Cundrega in the Indoor-coorpetta Village resumed under orders of the Board the Muctah Poollary of which has not been fixed; leaving a Net decrease of Rupees 72-10-" The increase of Rupees 320, in Toomnaltulpoor, Goondavole and Colegherry arises from its having been agreed at the time the Muctah tenure was fixed, that this enhanced rate of Poollary was to be paid from Fusly 1254 in consequence of some of their Cattle having been lost by a mortality amongst them in the year in which the Muctahs were fixed- In the other Talooks Viz.t Cotah, Talmunchee, Sunguem and Ravoor there is no difference in the Muctah Poollary amount between Fuslies 1253 and 1254.-

Fee

14295 Fort St. George 30th October 1845.-

56- The following is a Comparison between Fuslies 1253 and 1254 of the Poollary tax in Woodiagherry and Sydapooram Taloo[k]s which are under Amany.-

	42,355	6	10	41,885	14	"	"	"	"	469	8	10

61- The late Sub Collector having recommended the propriety of reducing the Muctah rates that were fixed in some of the Villages of the Division, the late Principal Collector submitted a Statement to the Board which they approved of in their proceedings dated 19th August 1844 and the Changes brought into operation in Fusly 1254- This, and a decrease in some Villages which are settled by Capitation has occasioned the falling off.-

62- The following is a Comparison between

between Fuslies 1253 A.D. 1843/44 and 1254 A.D. 1844/45. of the Sales of Pasture Lands of the sub Division

Fusly 1253 ——— 6378-8-3.
" 1254 ——— 7113-3-7.
Increase —— 734-11-4.

63. The following exhibits the net Settlement, the Collections, and the balance in the Zillah.-

	Principal Division	Sub Division	Total
	Rs. a p	Rs. a p	Rs. a p
Netryetwary Settlement	9,20,543 1 6	3,91,405	13,12,038 8 11
Collections up to the end of Fusly 1254	8,69,312 5 8	3,79,344 10 10	12,48,657 " 6
Up to the 15th September	31,111 14 9	2,179 15 10	33,291 14 7
Total	9,00,424 4 5	3,81,521 10 8	12,81,945 15 1
Balance	20,118 13 1	9,973 12 9	30,092 9 10

64. The balance outstanding Amounting to Rupees 30,000 is less than that exhibited of late years and is composed partly of sums due by poor and distressed Ryots who have no means left to satisfy the demand against them, every thing available having been given up to meet their abilities & without depriving them of the necessary means of

of future cultivation. The large Number of petty Cultivators in the Nellore District is quite astonishing - men who have literally nothing to depend upon but the return from their small occupations, which failing leaves them completely unable however willing to pay their sists. Enough has been said by my predecessor of the reduced state of the cultivating community in the District from the lowness of prices &c. but their readiness to pay their revenue when they have the means has this year been shewn, the trifling rise in the Market and the immense relief afforded the poorer Classes by the Suspension of the demand which was last year pronounced irrecoverable on the enquiry authorized by the Board, has restored a degree of Cheerfulness which is gratifying to witness and in a pecuniary point profitable to the Circar. Included in the above balance are sums due on jufted Cundrekas the produce of which has not realized the demand thereon, and Bazegas standing against Enam lands left waste, tho the demand still stands against the holders. Of the Amount standing as a balance in the Principal Division it

14295 Fort St. George 30th October 1845

Chittaleras Poligars Peishcush for fusly 1254 is Rupees 3576-2-6. The collections up to the 18th September were for fusly-

1254 / A.D 1844-45	—	3079-2-0
1253 / 1843-44	—	409-7-3
1252 / 1842-43	—	56-15-7
1250 / 1840-41	—	11
1248 / 1838-39	—	28-14-1
		3574-7-10

73 The sum was disposed of as follows -

On account of Peishcush for fusly 1254 — 2684-5-8

" — 1253 — 27-15-1

" — 1248 — 28-14-1

2741-2-10

Amount credited to the head of advances on account of the Salaries of Peons employed in the Hoozoor and in the Talloks on the part of the Poligar — — — — — — — — — 833-5-0

3574-7-10

74 The instructions of the Board conveyed in their Proceedings of former years have this year been carefully attended to and the distinctions of the Collections under their separate heads has been duly observed as will be seen by a reference to the Collections of Peishcush &c. which exhibit but little balance in comparison with former years.

75 The following Statement exhibits the total Land Revenue and cetra sources &c. with a Comparison of the increase or decrease between fusles 1253 and 1254

The

76 The Statement of the total charges &c of the District for fuslies 1253 and 1254 in &c which the per centage of different branches &c of Revenue distinguishing the charges of general management from that of particular items of account is exhibited as called for in the Board's letter under date 29th November 1830. The percentage on the land and Extra sources of Revenue for fusly 1253 is Rupees 15-1-2 and in the present fusly Rupees 17-6-2 exhibiting an increase in the latter fusly of Rupees 2-5-4

77 With reference to the Board's letter dated 27th February 1845 in the margin I here beg to insert the amount advanced on account of Jaghire and the Collections and balance.

	For fusly 1254.	Collections upto 15th September	Balance
Demand on account of advances for Cultivation	2705-4-4	2692-8-4	12-8-4

78 The balance due on account of land Revenue for fusly 1253 at the date of the Report for that fusly was Rupees - - - - - - 1195-28-10-8

	Vizt 1st Division Cht a D	Cht a D	2d Division Cht a D	Cht a D	Total Cht a D
1 Balance - - - - -	710-35-2-8	18493-8-4	1195-28-10-8		
2 Amount then classed as recoverable	20000-4-4	3000-4-4	3000-4-4		
3 Do actually collected upto the close of fusly 1254	26492-1-7	4781-5-4	31273-6-11		
4 Balance due at the close of fusly 1254 after deducting No 3 from No 1	14543-1-7	17712-2-8	88255-3-9		

From the above it will be seen

79 that the amount actually realized has been Rupees

Rupees 8273-6-11 more than what was estimated principally owing to the rise in the prices.

A statement distinguishing the balances &c recoverable, doubtful and irrecoverable under the several Heads of Land Revenue and other sources prepared in the form which accompanied the Board's Proceedings of the 18th July 1836 is submitted exhibiting the balance under all heads except those of Mirotriums as follows.

	Cht a D
Amany - - -	88255-3-9
Double Ejapta - - -	161-1-3
Molurpatta - - -	130-5-9
Stale Carnums Rayssoums - Pattahs	2-15-9
Moortawaur Peishcush balance	2967-3-3
Chittatawaur Do - - -	10127-12-4
Add difference between the Peishcush balance and that due on account of Rayssoums of Stale and Moortawaur the latter being in excess of the former balance	10357-11-2

80 Much has already been said regarding the balances of fusly 1253 in the Samabundy Report for that fusly and further to dilate on the subject would be but a repetition of Circumstances brought to the notice of the Board by myself and the late Principal Collector, every care has been taken to reduce the amount of balance as much as possible and the amount outstanding considering the late losses of the Ryots will not I trust be looked upon as excessive.

81 The following exhibits the balances of fusly 1253 outstanding at the close of fusly 1254 and that classed under Irrecoverable and other heads.

Items

14295 Fort St. George 30th October 1845

The

14295 Fort St. George 30th October 1845.-

82. The amount stated as doubtful includes a large sum classed by the Talook Officers as recoverable, with that due from Cundrygas and Enams and other such items, These therefore will require adjustment at a future period after recovering all that can be realized- The orders which may be given regarding the balance due on account of Bhalarow's Roopoonus belonging to the former Fusles, will also be applicable to that of Fusly 1253.-

83. The amount therefore to be written off is as above shewn Rupees 81,910. 8—10.-

84. I have much pleasure in recording the assistance I have received from Mr. Pringle the Acting Sub Collector Mr. Lushington and Mr. Haggard the Assistant Collectors have at all times rendered me every assistance in their power in the efficient discharge of the duties entrusted to them.-

E. E. F. E. Signed J. F. Bishop
Collector

14389 Fort St. George 30th October 1845

To,
J. F. Bishop Esqre
Collector of
Nellore.

Sir,

I have the honor to submit

1.

Nos. 1 to 5 herewith the usual Accounts Connected with the Settlement of this Division for Fasly 1254. A.D. 1844/45

Number of Villages and Hamlets.

2. The number of Government Villages was the same as in the previous Fasly Viz. 235, but in Consequence of 3 hamlets having been Established Viz. one in the Village of Trovagoon: = tah of Ongole Talook, the other two in that of Buddapoody within limits of the Villages, Munnatecotta and Lankoor, the total Number was increased to 194.

Season and Crops. Dry Cultivation.

3. The Commencement of this Sea= =son was exceedingly unfavorable - In the Months of May and June when the Poonasa or 1st Crop is sown no rain fell in any part of the Divi= =sion saving a small quantity in the Talook of Chendaloor - In the Month of July also suffi= =cient rain did not fall to admit of the land being fully prepared for receiving the seed - Notwith= =standing however some lands in different parts were sown during this Month - In

September

Fort St George 30th October 1845.

September a considerable quantity of rain fell which brought the Crops then in the ground to maturity, but the Poonsa Cultivation owing to the want of rain at the proper season was not carried on to such an extent as in last year. In the Talook of Buddapoody from the abovementioned reasons, the later sown crops yielded not more than half produce and in the other Talook with few exceptions, such was the average produce obtained throughout. In the Months of July and August, when the Jonna and other Crops are generally sown it only rained in certain parts and then not in any great quantity. But in the following Month of September a considerably quantity of rain fell. The early sown Crops by this rain were brought to Maturity, but those sown later not being sufficiently strong were entirely destroyed when they were attacked at the same time by a disease called Doompategoolo, which contributed in a great measure to their destruction and obliged the Ryots to resow the lands. Up to the 13th of December no rain fell in any of the Talooks and during that period many of the Young Crops of such as aurooga, Raugy &c were burnt up and only those which had not suffered so severely remained to benefit by the seasonable rain which then fell. From those which come to maturity not

Fort St George 30th October 1845.

not more than 3/4 produce was obtained. The early Jonna produced a good return and those Crops sown at a later period although injured by insects 8/10ths and yielded but half. Oil seed green grain 8/10ths produced also tolerably, although having to contend with the same difficulties. The 3rd Crop notwithstanding the season being unfavable, was sown by the Ryots in October and November, but being young and weak some portion of it was destroyed by the rains which fell in December. The loss sustained on this account induced the Ryots to sow the lands a second time with the abovementioned grains. Those lands which were resown, in lieu of the portion of the Crop which was destroyed as well as that which was early sown by the Ryots and reaped at a later period, with the exception of that in a few Villages produced a fair return. The Pulse Senagee Pyra Pesara &c Crops yielded a tolerable produce.

Wet Cultivation 4

Up to the end of November no wet cultivation was commenced owing to the want of rain. In some places however where springs existed, cultivation went on to a considerable extent and Guddavary was also cultivated under the hope of soon receiving a supply of water. This however did not take place till the 13th of December and then only in a few tanks a quarter or 1/8 supply was received. In a few Villages of Angole and

Davagoodoor

14392

Fort St. George 30th October 1845.

Davagoodoor Talook, Cultivation was entirely abandoned, from the total want of water in the Tanks. The Cultivation under those circumstances was necessarily on a limited scale, but was carried on to as great an extent as the supply of water would admit of. In some Villages where the water Received was not sufficient, the crops were dried up before they came to maturity From those also which did ripen in some few places a full produce was not obtained. The large decrease of this Cultivation which is observable in the Talook of Buddapoody is to be attributed to the want of a full supply of water in the Tanks of Carudapoody, Chavoor, Mopand Matchuvaram Mooloom 5.

In all the Villages where this species of Cultivation under wells is carried on, the Crops sown were Raugy and Cuzza. They both yielded a fair return. Indigo where it was cultivated turned out to good advantage. The Cuzza sown in lands where it could not be irrigated yielded but a small return

Sareeb 6. All the Crops under this Head which were irrigated by means of wells produced plentifully but those dependent on rain falling yielded a poor return.

There

14393

Fort St. George 30th October 1845.

Prices of

There was an increase in the price of all denominations of grains in the Sub Division Talooks as will be seen from the Marginal Comparative Statement but it still will not bear comparison with the prices of Commutation or even to the prices of Fusleei 1248 and 1249. Statement No 3 also shews the prices of all the various species of grain in the Talooks of the Sub Division

Dittum-8-

From

The Dittums for the fusly under review in the Talook of Angole, Enamanamellore and Chendalore were framed under the immediate superintendence of the late Sub. Collector Mr. Purvis, and the remaining two Talooks were made by their respective Tahsildars. The Statement A shews the extent of land of all descriptions taken up for Cultivation. The unfavorable Commencement of the season, and the depressed state of many of the Ryots, owing to the Continued low prices of grain from fusly 1250 to 1253 as well as owing to the want of produce in their Cultivation during the previous fusly deterred them from extending their Cultivation, and even induced many to relinquish a portion of their former lands exhibiting a net decrease of Gor = toos 1388 9/64 in dry land, 9 45/64 Gortoos in wet land, 50 39/64 Gortoos in Mooloom and 15 28/64 Gortoos in Jereb respectively. These lands have been relinquished in the 5 Talooks as shewn in the accompanying statement from the above = mentioned causes, and more particularly those under the head of Mooloom and Jereb. Those latter it became impossible to Cultivate from the ruined state of many wells and river banks being destroyed, and also from many of the Gardens having become totally unfit for Cultiva = tion. Much care however was taken to induce the Ryots whose lands were waste under the above heads to Cul = tivate a proportionate quantity of dry land but the depressed state of many would not even admit of this and hence the decrease as shown above.

The

Alterations and waste.. 9

The annexed Statement & co
mar'kd B. shews the extent of Land Cultivated
and left waste of the whole taken up. Of the
nett waste 49 11/64 Gortoos were deducted as left
uncultivated from unavoidable causes and the
remaining 47 51 and odd Gortoos amounting to
Rupees 24, 514-4-5 were included as usual
in the Settlement as they were left waste
by neglect of the Ryots. Only 980 39/64 Gortoos
of the Magany Dittum were cultivated and
2823 9/64 Gortoos left waste. Of these 33 48/64 Gortoos
were assessed to the amount of Rupees 789-6-5
as the Ryots had neglected to Cultivate as much
land as the water received would admit of
2789 25/64 Gortoos were deducted as having been
unavoidably left waste from the failure
of water in the Tanks &c.a. It will
be

14396 to 98. Fort St. George 30th October 1845.

be seen that in the Chendaloor Talook there is an increase in the wet cultivation of 20 Gorloos more than last year, this may be attri-buted to the fact that the Mayavanny lands in the Village of Kheerala which are generally Cultivated from water received from Springs has not been inundated by floods as

14397 Fort St. George 30th October 1845.

as was the case in the preceding Fusly. The Moolom Waste amounted to Gorloos 88 27/64 of which Gorloos 9 23/64 were deducted on account of the want of water in the Tanks under which the cultivation was to be carried on and as well as from the depressed state of the Ryots. The remainder 79 and odd Gorloos to the amount of Rupees 1569-13-10 was assessed as their non cultivation arose from neglect of the Ryots although they had ample means to carry it on. The Jeraeb waste 1 2/64 Gorloos was deducted from unavoidable reasons and the remainder 62 7/64 Gorloos amounting to Rupees 1573-15-5 was assessed having been left waste where means for cultivation had been afforded.

Mode of Settlement. 10. The mode of Settlement was the same as in the previous years 79 Villages were settled according to Mr. Travers turums and in the remaining 156 the usual remissions or additions to Mr. Travers turums were made. These last are commonly classed as Mustah Villages and the Settlement of the Fusly under review was made by the Sub Collector Mr. Maltby.

Result. 11. Annexed is an Abstract of the Settlement in money for Fusly 1254 compared with that of the previous Fusly with the deductions made in each

From

12 From the above it will be seen that the Gross Assessment on the land amounted to Rupees 394370-10-6 from which deductions to the amount of Rupees 71652-13-7 were necessarily made leaving as Net land Revenue Rupees 322717-12-11 or 52169-11-1 below the Settlement of the previous fusly. The total including the Cattle tax and other items being Rupees 411934-5-4 or 53010-9-8 less than that for the fusly immediately preceding.

Dr. Fusul and Fusul Jastee- 13- The Decrease in Fusul Jastee and Dr. fusil arose from the Tanks not having received a sufficient supply of water and which explanation was stated in Para 4

Deduction Dry waste- 14- The deduction under this head was Rupees 291-10-8 being less than that of the former fusly by Rupees 1626-6-9.

Wet Waste- 15- The amount of deduction admitted on this account was Rupees 69741-10-11 exceeding that of last year by Rupees 39135-2-9 and that of Fusly 1252 by Rupees 4512-5-3. In the latter also greater opportunities were afforded for cultivation than during the fusly under review. This cause will be found mentioned in my remarks on the Season. In certain Villages where it was evident the Ryot had neglected the cultivation of their Magany lands according to the

the proportion of water received in the Tanks the Wet waste was assessed at Rupees 739-6-6 in accordance with the usual practice included in their Puttahs and in order if possible to prevent a recurrence of the same neglect.

Mooloom and Jarcib Waste- 16- The deduction for Mooloom and Jarcib Waste amounted to Rupees 282-1-0 being principally on account of lands dependant on tanks for irrigation and owing to the poverty of the Ryots. The amount is less than that of last year by Rupees 963-8-3.

Inundation 17- The deduction under this head amounts to Rupees 88-12-8 and is attributable to a partial inundation of some small portions of lands in the Village of Cheeralah.

Withered Crops- 18- A sum of Rupees 739-9-8 was deducted on account of withered Crops. This exceeding by Rupees 146-3-9 the remission on this account made in the preceding fusly. This was necessary from the insufficiency of water which remained in some of the Tanks to bring the whole extent of cultivation to maturity.

Wundra Remission 19- The remission on account of Wundra Cowle was allowed to the amount of Rupees 28-3-7 being Rupees 338-13-6 less than last fusly from the fact of all the Cowle lands having come into full sheist according to the rules laid down.

Owing

Pauleasy. 20. Owing to the failure of early supplies of water the land within the bund of the Coraikoo Tank was cultivated to the extent of Gortoos 30 and odd amounting to Rupees 1057-1-1 and a crop obtained therefrom, — consequently the Pauleasy was granted to the extent of Rupees 288-4-5 according to the practice which obtained in former fusties.—

Discretionary Remissions. 21. The remission granted under this head does not require particular remark as it was less than the previous fusly and a detailed Statement was forwarded in Gentoo to your Office

Ready Money Collections on Pollary and pastoke land. 22. The Marginal Statement will shew under this head an increase of Rupees 734.—11—4 — which is to be attributed to the high proposals received for pasture lands during the fusly under review Under the head of Pollary a decrease of 469-8-10 is perceptible but in this amount according to the sanction of the Board of Revenue a remittance of Rupees 439- was made and the remainder deducted in one or two Villages where the

See Boards Proceedings 19 August 1844

the Capitation system still exists. Regarding the present system which now obtains for the collection of Poollary tax the late Sub Collector has explained in his report on the last Fusly.—

Enam Badegas 23. A small decrease appears under the head of Enams Badigas as the Wet land Enam cultivation was limited for want of water in the Tanks. The amount realized under the head of firewood tax depends entirely on the external demand for that article the quantity exported during the Fusly was considerably less than that of last year.

Money Settlement 24. The annexed Statement shews the amount of the Money Settlement in each Talook for Fusly 1254.

An abstract Comparative Statement of

1405. Fort St. George 30th October 1845.

Sir,

I have the honor to forward herewith a Statement of the Revenue of each Talook in Fusly 1253 and 1254 will also be found below.

Balance 26-

The total balance outstanding on those Talooks amounts to Rupees 9969-14-11 and it does not appear probable that more than 1500 Rupees can be realized and no further collections can be made without seriously distressing the Ryots and materially impairing their means of cultivation for the ensuing year. A comparative Statement of the Collections and balance for this Fusly and two former years will show a vast increase in favor of the Fusly now under review. The Acting Sub Collector begs to state that every possible care has been taken from the commencement to realize the Collections in due time and as near as can be to the full of the Government demand. Much of the above increase in the Collections is to be attributed to the excess of Indigo cultivation which has induced the merchants to erect several vats for its manufacture.

manufacture throughout the five Talooks in this Division, and also to make large ready money advances to the Ryots for its cultivation there enabling them to pay up their Rists in due time.—

Shrotriums 27. The number of Shrotriums in possession of the Shrotriumdars is 76 paying a quit rent of Rupees 14942-13-4. It became necessary in the course of the Fusly under reference to bring the Shrotriums of Vaura nawsywawy Cundeiga in the Buddapoody Talook under attachment, the number of attached Shrotriums being therefore increased to 8 assessed at Rupees 865-8-5. Of the amount due on Saury Shrotriums a sum of Rupees 14635-6-11. has been collected up to 15th September, leaving the small balance of Rupees 307-6-6 only for the immediate collection of which amount necessary measures have been adopted. Of the balance outstanding on the Shrotriums under attachment up to the above date Rupees 397-14-7. there are no reasonable hopes of recovering much at present as the settlement was framed as usual on a division of produce.

28. Up to the date of the late Sub Collectors' report for Fusly 1253 a balance of Rupees 602-12-8 was outstanding on account of the Bereiz for that year of Saury Shrotriums

Of

14410

Fort St. George 30th October 1845.

Of this amount Rupees 450-14-4 has since been collected leaving still a balance of Rupees 151-14-4. The amount of the Settlement on attached Shrotriums for Fusly under review has since been realized to the sum of Rupees 81-6-8 leaving still a balance of Rupees 399-11-1.

Motursha 29. A comparative Statement of Motursha Revenue for Fuslies 1253 and 1254 is entered below.

No.	Names of the Talooks	Fusly 1253	Fusly 1254	Increase	Decrease
		Cs as Cs as	Cs as Cs as	Cs as Cs as	
1	Baddapoody	11886.	12234.	358.	" "
2	Bavagoodoor	15283	15461	43 176.	" "
3	Ongole	3255 4	3300 5	3 44 6	11 " "
4	Enamanamolloor	9325 6	9677 6	352.	" "
5	Chendaloor	5087. 2	5443. 10	356. 8	" "
	Total	11993 2 3	12481 9 10	488 7 7	" "

From the above it will be seen that under this head an increase of Rupees 488-7-7. has arisen. The chief cause of this increase is a greater degree of traffic and a large number of looms being established in the Talook of Chendaloor on both of which it has been necessary to fix an additional Assessment. Under this head Rupees 12203-13-7. were collected up to the 15th Sept. leaving

Fort St.e George 30.th Octoter 1845.

Leaving a balance of Rupees 277-12-3. Of this a Sum of Rupees 148-0-0. is due by the Oryole butchers and some other parties who have disputed their liability to the tax from the time it was first imposed on them and who have never as yet paid it. The remainder is due principally by a few poor weavers and some others who are now absent from their Villages. The Acting Sub Collector feels himself compelled in consequence of the difficulty always experienced in collecting the Motwipha tax from the Merchants of Cottapatam again to call your attention to this subject in order that in compliance with the request made by the late Sub Collector in last years report some decision with regard to their complaint may be granted by the Board of Revenue. He also begs to state that measures are being adopted for the collection of the Motwipha of Cottapatam Merchants in accordance with the regulations as they still continue obstinate regarding the tax imposed on them.—

Balance Fusly 1253. 30. The late Sub Collector Mr. Purnis has mentioned in his report for last Fusly that about Rupees 3500 of the balance of land revenue outstanding upto 15.th September might be collected in the course of the year now reported on. The

Fort St.e George 30.th October 1845.

The total sum since brought to account is Rupees 4953-14-4. It will be here seen that the collections actually made have exceeded the expectations of the late Sub Collector by Rupees 1453-14-4 and besides this it appears from the reports of the different Tahasildars that an additional sum of 1,856 Rupees may be brought to account and the necessary measures for its collection have accordingly been adopted.

Total result of all heads of Revenue. 31. I beg leave in conclusion to annex a Statement shewing the amount of all items of Revenue under my management for Fusly under review as compared with the one immediately preceding.

Order thereon.

Ordered to be recorded:-

36 - 37

To

J. Bycroft Esqre

Secretary to the

Board of Revenue.

Fort St. George.

38

From the Collr of Nellore ---------

Sir,

Para 1. It is with regret that I am called upon to report the death of my late Head Sheristadar Poroshottum Puntoloo, a Servant of long Standing and unblemished reputation, whose zeal and fidelity in the discharge of his Public duties, had deservedly secured him the confidence of his employers and by his removal, the District has lost a valuable Servant.-

Reporting the death of Poroshottum Puntolu the Head Sheristadar, and requesting to sanction the appointment of Ram Row as Head Sheristadar of Nellore.

2. The precarious State in which the late Head Sheristadar was for some time previous to his death, gave me opportunity of considering who would be a fit person to recommend, as his successor, in case a vacancy occurred, and I have the honor to request you will bring to the notice of the Board of Revenue my desire for the nomination of Ram Row, at present Sheristadar in the Sub Division Cutcherry at Tinnevelly. I have known Ram Row since 1831 as Sheristadar, and

3.

11,416 Fort St. George 30th October 1845.

and have never heard a whisper affecting his character. He has several times acted as Head Sheristadar and was some years since called down to the Revenue Board Cutcherry when the Tinnevelly Survey question was under consideration. He has been very unfortunate in promotions and I have selected him, as, one well qualified, and in whom the greatest confidence can be placed, and I trust the Board will meet my wishes by sanctioning his appointment as Head Sheristadar.-

3. I have not a Statement of Ram Row's services by me, but the Records of the Board's office will, I believe, furnish this; in the mean time a list has been written for, from Tinnevelly.-

Read the following letters.

To F. Pycroft Esqre
Secretary to the
Board of Revenue
Fort St. George

(40)

From the Collr of Bellary ------ Para 1

I have the honor to acknowledge the receipt of an Extract from the Proceedings of the Board of Revenue dated 21st August 1845, together with the correspondence with Government to which it was annexed, relative to the Medical Officer attached to this Collectorate.

2. In answer, I beg most distinctly to state that the removal of the Medical Officer attached to this Establishment would be most injurious to the Public Service. The transfer of the Sudder Station from Annuntapoor to Bellary has very little reference to the General residence of the Collector. I find on referring to my account of Tent allowance that I am out more than half the year.

3. The Civilians of the Revenue Department if deprived of their Medical Officer will not be entitled to apply to any one in this Garrison. The Surgeon of the Station is attached to the Jail and would not attend to a Summons, indeed he could not. The Medical Officers attached to Corps have of course their Regimental duties to attend to, and are not in any way at our disposal,

I

Acknowledging the receipt of an Extract from the Proceedings of the Board of Revenue dated 21st August together with the correspondence with Government to which it was annexed relative to the Medical Officer attached to the Collectorate and informing that the removal of the Medical Officer of the Dept would be most injurious to the Public Service & requesting to continue the appointment in consideration of the Constant breaking out of Cholera and its ravages.

× H.M. 83 Regt
24 Regt N.I.
5 Regt N.I.

I believe a Medical Officer was attached to this Department in consideration of the immense distances rendering it impossible to send for Medical aid with any prospect of its arriving in time to be of any avail. Cholera has located itself in the District - It is always present with us. The Cuttackery last year was driven from place to place the Ryots refusing to remain - Mr. Arbuthnot's Head Servant died of Cholera in the same Shoulbry with him while delivering Puttahs at Cumalapoor. On the 1st of December, I quit Bellary to commence the Settlement at Adwanie - My Assistants accompany me for most of the way. We shall be surrounded by many thousand Ryots besides a very large body of Public Servants; It amounts almost to a certainty that Cholera will make its appearance, at least it has never yet failed to do so, and without Medical aid we and all our Camp are in an utterly helpless State if attacked - It will be nearly 5 months before the Settlement is completed and during all that time we are absent from Bellary. The year before last I was attacked with Jungle Fever at Hurponhully 88 Miles from Bellary. It will be evident that I had little chance of recovery had I not had immediate Assistance for in 24 Hours from the time I was attacked I was delirious - Mr. Robertson the late Principal Collector was attacked in the same way. I believe

there is not a doubt that he died for want of Assistance - All the Members of the service are at times thrown in the way of Cholera, but I may be allowed to question whether any run the gauntlet of such exposure to it as the Revenue Civilians of this Province. I therefore, in my name and theirs entreat the Government to pause ere the only aid is taken away from them.

There are also other considerations,

4.

The Medical Officer attached to the Department attends to all those to whom his advice can be any way useful, and the Company's Ryots have the advantages of Medical advice, in remote Villages where, under any other circumstances no European Medical Officer would ever be seen. The Hospital Tent is pitched and notice is given in every Village in which my Camp halts, that at a certain hour the Medical Officer will be there.

5.

It may be observed that an Apothecary or Dresser would be available in the case above alluded to, (the death of Mr. Robertson) a Dresser was in attendance, but was too timid to take the only steps that could have saved him.

The

6. The same thing nearly occurred again the other day in the case already reported to Government which has occasioned this reference. Under all the circumstances I think it will be allowed that the situation in which we are placed is peculiar and surrounded with difficulties which others are not called upon to encounter. For myself I can only say that for 6 years I have never known the District free from disease for any length of time, and the best proof of this will be found that all are anxious to escape from it. I think every encouragement should be given to authorities who have to struggle with a hot climate, constant labour, and a disease, the ravages of which are beginning to attract universal attention, and I may say universal fear. It can be no exaggeration to say, that we are more exposed than others, for the returns yearly made in my Immunabundy Vcr Reports, are sufficient to establish the fact.

Deaths by Cholera since Fasly
1251 – 8431
1252 – 5374
1253 – 1591
1254 – 6825
22741

7. It is to be remembered that my returns do not embrace the Population of Bellary Troops Vcr and yet the last 4 years exhibit upwards of twenty thousand deaths by one disease alone. I might enter into further detail in allusion

allusion to the great assistance of a Medical officer being attached to the Magisterial Department of such an extensive Provinces as this but I trust that I have said enough in proof both of the utility and necessity of the appointment.

Bellary Collrs Office
8th October 1845 } (Signed) A. Mellor
Collector

Order thereon,

Ordered to be sent again in Circulation.

Fort St. George.

42

From the Collr of Bellary Para 1

Forwarding for the information of the Bd copy of a letter addressed by him to the Accountant General on the subject of the season & the probable difficulties.

Sir

I have the honor to forward for the information of the Board copy of a letter addressed by me on the 30th Ultimo to the Accountant General.

2. I regret to state that the time that has since elapsed has not in any way relieved us from the calamitous prospects there alluded to. The rains have failed. The whole country is burnt up, many of the large Tanks are quite dry and some of the Wells. The great Tank at Darajee usually holding a 4 years' supply is Dry. To
T. V. Ironhouse Esqre
Accountant General &c.
Fort St. George

Sir,

Referring to the 2d Para of Mr. Swintons
Circular letter of the 4 July last and to my re-
marks, on the expected Collections of Land Revenue
in the Regular Estimate for the Current Official
Year 1845/46, I have the honor to inform you, that
under the present state of the Season, I am induced
to modify my original anticipation as regards the
Land Revenue and reduce the probable Collections
specified in that account on the average of the past
5 years to the extent of Rupees 165000, in consequence of
the insufficiency of rain up to this date by which
the crops on the Dry &c. Lands have withered in
many places and the Tanks have received no suf-
ficient supply of Water - While in this State of
failure, the sowing season for Monsary has expired, &
the season for the Hingary has far advanced, the expiration
of the Monsoon being near at hand. -

2. Under these disastrous circumstances, I have the hono
to request that you will consider the Estimate of Land
Revenue as originally given altered & reduced from Rupees
22,15000 to Company's Rupees 20,50,000. -

/signed/ A. Mellor
Collector

Bellary Collr's office
30th September 1845.
Order thereon. -

Ordered to be recorded -
