Seniority

2 December 1854

E.E. 7r (1/4) C. J. Reid
Collector

Proceedings

Bd's No. 47

Proceedings thereon - (43-44)

From Enclosure 1 of the Collector's letter to the Board under date 19th September 1821, the villages of the Mootah are given as 32, but in the Statement B now forwarded as 30. The Collector is requested to explain the discrepancy -

2 The Board would also wish to know from the present Estimated value of the Villages Rupees 10,517 - a - p is arrived at, as the accounts particular C - and D shew the average Berij for five years to be Rupees 9,656 and the Collections 9,400 -

3 The Collector will also state how he would propose to recover the expences incident on the subdivision with reference to note 15 Appendix I.O. Supplemental Volume.

45.

Bd's No. 101

From the Collector of Coimbatore

To E. B. Thomas Esqre.
Collector of Coimbatore.

Sir,

I have the honor to request that you will be good enough to forward my application for 3 Months leave of absence on private affairs to which I am entitled under Section XIII of the Absentee Rules -

It

2 It is my wish to proceed to Madras, Bangalore, and the Neilgherry Hills during my absence -

December 28th 1854

(Signed) J. G. Thompson
acting Head of Collectorate

The Collector of Coimbatore begs to recommend the application for leave of J. G. Thompson Esqre. for the favorable Consideration of Government with reference to Section XIII of the absentee Rules.

Coimbatore
2d January 1855

(Signed) E. B. Thomas
Collector.

45-46.

Order thereon - Ordered to be submitted through the Channel of the Civil Auditor for the favorable Consideration of Government.

No. 128.

47.

To The Secretary to the
Board of Revenue
Fort St. George

Sir,

With reference to the Circular letter of the Board dated the 4th September last, I have the honor to forward three Statements, one showing the number and Cost of the

the Police Force, one the Revenue Establishment of the district, and another of armed Silihendy -

In para 2d of the Board's letter, it is stated that there are many Peons employed both in Revenue and Police duties, and it is required that I should distinguish which should be entered as Revenue and which are actually paid as Police - Shall I enter them according to the Department in which they receive pay for in fact all the Peons are employed on Revenues or Police duties as emergency requires -

Collector's Cutcherry,
Mangalore,
14th December 1854

(Signed) J. A. Maltby
Collector

To,

B: Cunliffe Esqre

Acting Secretary to the

Board of Revenue

(49.)

Fort St. George.

Bo. No. 44.

From the Collr. of Canara

Sir,

I have the honor to request the confirmation by the Board, of the appointment of Boniface Fernandez the Hail Sheristadar, to the Office of Head Sheristadar of this district, in lieu of Boojinga Row, who has been dismissed under orders of the Board, conveyed in their Proceedings dated the 30th Ultimo -

2. Boniface Fernandez has been acting in the Office from the 8th September, or from the day subsequent to the suspension of Boojinga Row as reported in my letter of 7th of the same Month.

x Rs. 414-6-10.

3. A Moiety of the Salary of the Head Sheristadar has been disbursed to the several servants appointed to conduct the duties during his suspension, the other moiety is in deposit. The duties of the Office of Head Sheristadar

Sheristadar having been discharged by Boniface Fernandez, I request that his appointment may be considered to date from the day on which he entered on the duties of his Office, so that the servants who filled the several Offices in gradation may receive the balance of salary now in deposit.

4. The Board are aware of the services of Boniface Fernandez, which have been brought to their notice in many Summaburdy reports, and on the occasion of his being appointed to act as Head Sheristadar during the leave of absence of one year granted to Boojinga Row -

Collectors' Cutcherry, Mangalore 19th December 1854.

(Signed) F. A. Malthy, Collector.

Bo. No. 59.

Proceedings thereon -

(49-50.)

The Board of Revenue sanction the appointment of Boniface Fernandez to the Office of Head Sheristadar of the District of Canara - the appointment to take effect from the date of the Board's sanction to Boojinga Row's dismissal, Viz. 20th Nov. 1854. -

---

No. 2.

To,

B: Cunliffe Esqre

Acting Secretary to the Board of Revenue.

(51.)

Sir,

Bo. No. 70.

From the Acting Collr. of Madras

With reference to my letter of the

Fort St. George 8th January 1855.

the 18th Ultimo, I have the honor to report that by the last Shipment made by Vencatareddy per the "Affghan," he has reduced the balance against him according to his engagement to Ship Salt on Public Indent to Calcutta from this District to Indian Rupees 22,380 and in obedience to the instructions of the Board contained in the Proceedings of the 21st Ultimo, orders have been issued to close all transactions on this account with the Contractor.-

Madras, 3d January, 1855.

(Signed) W. E. Cochrane.
Acting Collector.

51-52
Order thereon-

Ordered to lie over.

No. 86.

To,
The President and Members of the
Board of Revenue.

Gentlemen,

53.

B. No. 4326.
From the Chief Engineer-

With reference to the 3d Para of your Secretary's letter to my address dated 6th Instant, I have the honor to state, that the suggestion for having the boundaries of North and South Arcot and Chingleput inserted in the Sheet of Map is feasible, if surveyors can be spared

Fort St. George 8th January 1855.

spared, but this question must then again be referred to the Department Public Works-

2- By this opportunity if the interior or Talook Boundaries are also traced, it will render the Survey Maps of those Collectorates more complete-

3- On the completion of the above work, it will be necessary for this Department to be furnished for record and Public reference, with a descriptive Memoir of the bearings and distances of the several boundaries and land marks, that may be determined by this Survey.-

Chief Engineer's Office,
Late Deptt. Surv: Genl's Deptt,
Fort St. George,
13th November, 1854

(Signed) C. E. Faber
Lieutenant Colonel of
Engineers
Chief Engineer
In charge of the late
Deptt. Surv: Genl's Deptt.-

Ordered that the following letter be sent in reply.-

To,

Fort St. George 8th January 1855.

53-54.

To,

The Chief Engineer

Sir,

B. No. 68.

To the Chief Engineer

To Chief Engineer 6th November 1854.
From Do. 13th Do.
In Cons. 18th Jany. 1855.

With reference to the correspondence as noted in the Margin, I am directed by the Board of Revenue to observe that to carry out your suggestion of having the Taluk as well as the District Boundaries traced, and a descriptive memoir prepared of the bearings and distances of the several boundaries, it would be necessary to have a regular survey made of the three Districts alluded to,* instead of which the Board intended that sheet maps should be sent to the Collectors with a view to their marking off the outer boundaries of their Districts - This they think would answer the required purpose, and enable you to compute the areas of those Districts accurately enough for all practicable purposes -

* North Arcot.
South Arcot.
Chingleput.

59.

Bd. No. 65

To

The Acting Collector of Nellore

To the Acting Collector of Nellore

Sir

I am directed by the Board of Revenue to forward for your information the

calling for an early

Fort St. George 8th January 1855.

report on the measures taken to lessen the influence of the Gootoor family in the Collectors office that the Board may finally dispose of the subject forwarding a Petition from Pooroshottum Row and stating that ifhis connection with the Gootoor family is as distant as represented therein a specific recommendation should be made for his exemption from the order of Government dated 7th February 1854 regarding the transfer of Servants.

From Collr of Chittoor dated 8th Jany 1855 forwarding a Petition of Pooroshottum Row dated 5th Novr 1854

the accompanying Petition bearing an Endorsement from Government and to request that you will report at your earliest convenience the measures which have been taken up to the date of your reply to lessen the influence of the Gootoor family in your office as directed by Government and the Board.—

Extract Minutes 7th February in Cons 19th March 1851. Boards Proceedings 18th November

2 The subject has been long under consideration and the Board are desirous of finally disposing of it without further delay. They therefore request that you will state in regard to each of the Nail Sheristadars' relatives, what you have already done or propose doing to carry out the object of Government. You will also report whether you have succeeded in arranging the transfer of the Nail Sheristadar.

3 The Board wish the subject to be now laid before them with full information, in order that they may at once decide what particular individuals shall be transferred to other Districts, and whether in the case of those who are retained in Station, their promotion shall in any case be retarded

Fort St. George 8th January 1855.

retarded, until the influence of the family is sufficiently diminished. To the latter course the Board are very averse and they think its necessity may be obviated by a judicious selection of persons to be transferred to other Districts.—

4 I am directed to take this opportunity of forwarding to you a Petn bearing your endorsement from P. Pooroshottum Row one of the servants affected by the order of Govern: ment dated 7th February last. The Board are of opinion that if as would appear from your endorsement, you are satisfied that the Petitioner's connection with the Gootoor family is as distant as he represents it to be, you should make a specific recommend: dation for his exemption from the operation of the orders of Government.—

No. 2587 of 1854

5 The same course should be adopted in the cases of others similarly situated.—

6 A Petition No. 2621 of 1854, from

S.

Fort St. George 8th January 1855

S. Yellapah asserting the relationship of C. Pooroshottum Row with the Gootoor family and bringing various charges against him is also forwarded for your information and for such notice as you may deem fitting.—

B. No. 4563.
From the Secretary to Government.—

Extract from the Minutes of Consultation, in the Revenue Department, Under date the 8th December 1854.

Read the following letter from the Sub Secretary to the Board of Revenue.— Here-

Reviewing the report of the Board

The Board on the present Condition of the law for the recovery of arrears of public revenue and the necessity of mending it, permitting them to issue a Circular Cancelling all restrictions in the law of distraint and sale whether imposed by themselves or by the Government and requesting that they will in Communication with the Government Pleader prepare and lay before Government the draft of the Act which they would propose

(Here enter 9th November 1854, No. 536)

Para 1 In the above letter the Board of Revenue reply to the reference made to them in Extract Minutes Consultation of the 27th October last, for their sentiments on the present condition of the law for the recovery of arrears of public revenue and the necessity of amending it.—

2 The Board report that a difference of opinion has existed as to the Regulation under which arrears of revenue under annual Ryotwar Settlements are recoverable and whether they should be recovered under Regulation XXVII or Regulation XXVIII of 1802. It has however usually been held that they are recoverable under the former Regulation XXVII and this is the Boards own view. The processes prescribed by this enactment are dilatory. Under it personal property is not liable until the lands of the defaulter have been sold, unless, which rarely occurs, he thinks proper to yield it up in preference to the sale of his lands and opportunity is thus afforded for the removal or secreting of personal effects. This non liability or at least limited liability of personal property, the

the doubts which have prevailed as to the meaning and application of the law, and the variation of practice existing alone in the judgment of the Board furnish sufficient ground for advocating more exact and perspicuous legislation.—

Para 5 3 Dilatory however as the law is, its operation has been rendered still more tedious in practice. Although proceedings may be taken immediately on a single Kist, or any part of it being a day in arrear, it has become usual to take no legal proceedings till after the close of the Fusly year. The inconvenience arising from this mode of administering the law has been represented by the Collector of Tanjore and similar results are experienced in other Districts. A Ryot considers it to his advantage when an Order is issued to distrain his land, because he knows that this means a delay of six months in enforcing the demand against him.

Para 6 4 Again the distraint and sale of land which have been prescribed by law as the Ordinary means for recovering arrears have come to be regarded as harsh and fit to be adopted only in special instances - to be had recourse to only in extreme cases and after every other means have been tried without success. The Board state their

Para 9 full

full belief that "the tenderness and forbearance thus exhibited by the authorities, as to enforcing the demands of Government by legal means, prompted, as it certainly was by humane consideration for the Ryots, has in practice operated powerfully to promote or perpetuate the use of those other coercive measures, the existence and and nature of which is now engaging so much attention"

5 Under these circumstances, the Board recommend that measures be taken without delay to obtain a legislative Act for remedying the doubts and embarrassments incident to the present law, and for conferring on the revenue Officers more prompt and effectual means of realizing the public dues — They propose that "as at present the failure of a single Kist should constitute an arrear; that the Collector should thereupon be empowered to take proceedings without any delay, and that after certain notice, he should be empowered to attach and sell any part of the land of the defaulter to the extent of the arrear without the previous sanction of any higher authority — The Collector should have equal power over the defaulters personal property, and it should be at his option to attach and sell either that

Para 8

or the land, or both, as he might see fit, only taking care that the whole distress should not be excessive, i.e. not disproportionate to the arrears. The particulars of all sales whether of land or of personal property should come before the Board with the annual Report of the settlement. The right given to a Zemindar &c. by Section XVII Regulation XXVIII of 1802 to regard the Crop as mortgaged to him for his demand on the land should also be given to the Collector in the case of Government Ryots. In practice this power is now exercised; but it should be recognised and confirmed"

6 The Board believe that "the enactment of prompt and effectual legal provisions for realizing the Revenue will go far to put a stop to the use of "Torture" for that purpose; even under the present high assessments, while they believe also that no means whatsoever will stop it, so long as the law remains unchanged and the collection of a revenue is insisted on"

Para 9

7 As the procuring of a legislative enactment must of necessity occupy some time, the Board suggest intermediately that all existing restrictions on the exertion of the full

Para 11

powers

powers given by Regulation XXVII of 1802, II of 1806 and III of 1830 should be rescinded. Conjointly with stringent orders for the discontinuance of personal illtreatment, a Circular should be issued to Collectors informing them of the wish of Government that the provisions of those Regulations should be strictly acted upon; that beyond careful enquiry to ascertain the justice of the demand in cases wherein it may be contested, no forbearance should be exercised in applying them; and that when satisfied on that point, the Board will not hesitate on any other ground, to authorize the sale of land. The Collectors should be instructed to commence proceedings promptly, whenever they might deem it fit to do so, even without waiting for the close of the Fusly year, and every practicable means should be taken, such as abridging the form of the Notification prescribed by the Regulation, and supplying the Districts with printed copies of it, to diminish the mechanical and Office work involved in attachment and sale under the present law.

Para 12

8 Further as respects "Torture" if the means taken for its suppression are to be successful it

it is absolutely necessary that the Ryots should positively know that it is condemned by their Rulers and that every proved instance of its use by any Officer, will be severely punished, and as regards the more stringent application of the law, it is only right that they should be made aware what the law is, which very few know at present, and that its provisions will be enforced.

The Right Honorable the Governor

9 in Council has very carefully weighed the suggestions of the Board of Revenue as set forth in the above paras. He entirely agrees with them that the checks and impediments which from mistaken views have been interposed to the full and immediate application of the present law for the recovery of arrears of Revenue should be at once withdrawn. The Board will, as they propose, issue a Circular to the effect stated in para 11 of their letter cancelling all restrictions on the law of distraint and sale, whether imposed by themselves or by the Government. They will also revise the form of the sale Notification, and cause copies of the new form, with translations, to be struck off at the Government Press and sent to the several Collectors.

The

The Board will likewise submit for the approval of Government the draft of a Notification, such as that proposed in para 12, which should be in a simple style and such as will be readily intelligible by the common people. On approval, translations of it in the Vernacular languages will be made, printed at the Government Press, and distributed throughout the Country.—

10 The Right Honorable the Governor in Council is further of opinion that the uncertainty which now obtains as to the Regulation by which arrears of land revenue under annual settlement are recoverable, and the descriptions of property liable - and the inadequate means for protecting the public revenue afforded by the Regulation which has usually been held applicable, sufficiently evince the need of more plain and explicit legislation and that the existing law should be superseded by one of a more simple character, and less dilatory action, to embrace the distraint and sale not only of land but of its produce, as well as of personal property - he therefore requests that the Board will, in communication with the Government Pleader, prepare and lay before Government

Government for their consideration, the draft of the act which they would propose - The draft should apply to the arrears of Extra Sources of Revenue no less than to those of the Land Revenue. It should also carefully define the extent to which the actual Cultivator of the soil is to be considered answerable to Government in cases where the land may be in the occupation of a Ryot holding under the Puttahdar - The draft will be primarily applicable to the recovery of arrears of land revenue under annual Settlement - but it will be open to the Board also to introduce into it any provisions which they may see fit for amending the law for realizing balances of permanently settled revenue.—

To The President and Members of the Board of Revenue. } (Signed) T. Pycroft. Secretary to Government

Order thereon

Ordered that the following letter be sent in reply.—

(2-3.)

To The Chief Secretary to Government

B. No. 84

To the Chief Secretary to Government

Sir,

In accordance with the orders of Government in Para 9 of Extract Minutes of

Submitting for Approval draft of a

Fort St. George 11th January 1855

a Notification for general publications declaring the resolution of Government to put a stop to torture and to enforce the legal means of recovering arrears of Revenue and draft of a Circular to Collectors as directed in Extract Minutes of Consultation dated 8th December 1854 as well as a revised and briefer form of Advertisement of the sale of land agreeably to section XI Regulation XXXI of 1802 and requesting if approved that the translator of the four languages within mentioned may be instructed to prepare translations.—

In Cons. 11th January 1855

A

B

C

In Consultation December 18th 1854, I am directed by the Board of Revenue to submit draft of a notification for general publication, declaring the resolution of Government both to put a stop to torture and to enforce the legal means of recovering arrears of Revenue—To save time, the Tamil and Telugoo Translators en have been requested to prepare translations of it, and on its approval by Government, the requisite number of Copies in those languages will be struck off and issued without delay—

The Board request that the Right Honorable the Governor in Council will be pleased to cause translations to be prepared also in en Canarese and Malayaulum.—

2. The Board have prepared a draft of Circular to Collectors, as directed by Government in the same order and as it en contains some directions not comprehended in the order of Government, they think it proper to submit it for approval before it is issued—They have also prepared a en revised and briefer form of advertisement of the sale of land, agreeably to Section XI Regulation XXXI of 1802, which is herewith sent up

Fort St. George 11th January 1855

up for the approval of Government—When so approved, the Board request that the Translators in the four languages, abovementioned may be instructed to prepare Translations.—

Revenue Board Office,
Fort St. George,
11th January, 1855 ———

/Signed/ B. Cunliffe
Acting Secretary

A

Proclamation

To all Ryots and other persons in the District of paying Revenue to en Government or paying Rent or Revenue to any Zemindars, Palegars, Enamdars, Renters, of any en branch of Revenue, or, any other persons.—

It has come to the Knowledge of en Government that the Subordinate Talook and village Officers have used personal ill treatment towards Ryots and others, for the purpose both of obtaining payment of Government Revenue and of extorting illegal exactions for themselves, and likewise that Zemindars, Renters, &c., use similar means for enforcing their demands on their Ryots, Subrenters and others.—

2 The Government therefore hereby declare to all persons that such acts are utterly illegal, and

and are punishable by the Criminal Courts.
and that the Government are resolved to
do all in their power to suppress them -
and all persons are hereby informed that
all complaints of such illegal violence
will be strictly investigated by the Magis-
trates and the Police, and that on conviction
the offenders will be severely punished, e
whether Servants of Government or any other -
and all persons who have suffered or hereafter
may suffer, such illegal treatment are in-
vited to lay their complaint before the Magis-
trate of the District, or one of his Assistants,
by whom it will be strictly investigated
and he dealt with, according to the law. -

3. Further it has come to the Know-
ledge of Government, that since the positive
prohibitions, of personal violence in recover-
ing arrears, certain ill disposed persons have
taken advantage of that order to withhold
their just payments. Therefore it is e
hereby further notified, that the Right Honorable
the Governor in Council has directed that all the

legal

legal means of collection shall be rigorously
put in force against such fraudulent defaulters,
and that their land and their personal property will
be attached and sold without delay and without
favor, for the recovery of arrears due, together
with interest thereon. Therefore all Ryots
should pay their Kists punctually, and without
default, to avoid such loss and extra charge

Collector's Office,
January 1855.

Collector

B

Circular to all Collectors

Sir,

The processes now in use for
the recovery of arrears of Land Revenue as
distinguished from those authorized by the
Regulations, have been recently under the con-
sideration of Government; and their atten-
tion has been drawn to the fact that e
the latter are much modified in practical
application, by various orders restricting
their use to extreme cases. The Government
have concurred with the Board of Revenue
in the opinion that this laxity has been

injudicious

injudicious, and that, though humanely intended it has operated to promote resort to illegal means, and in particular to personal ill-usage, the practice of which has recently attracted the special notice of Government.

2 Deeming more prompt and vigorous legal means of recovery to be necessary than the existing Regulations afford, the Govern-ment intend to apply for a new Legislative act on the subject. But meanwhile they have directed that all restrictions on the full exercise by Collectors of the power given by the existing Law, shall be immediately removed and that those powers shall be used to their full extent. It has been ruled by the Court of Sudr Adawlut that arrears of Land Revenue due on annual as well as on permanent set-tlements are recoverable only under Regulation XXVII of 1802, which has been held to direct that the land shall be sold before the personal property of the defaulter, unless he prefers to give up the latter, and requires the special

previous

previous sanction of the Board to the sale. But it is not necessary under this Regulation, to defer the attachment or the sale of land till after the close of the Fasly, and the Government have now directed that this practice shall cease.

3 Under the views of Government now declared, I am instructed to desire that you will take full advantage of Sections II, III IV, V, of Regulation XXVIII of 1802, attaching land in all cases wherein you may consider it necessary, immediately on the occurrence of an arrear and transmitting the prescribed advertisement for publication in the Board's Office, without delay. The only point on which you need satisfy yourself, and on which the Board will require to be satisfied, is that the arrear is really and fairly due by the party and this being shown, the Board will not delay or hesitate to authorize the sale. You will understand that the object of the present order is not to lessen the consideration shown to cases of unavoidable or excusable balances, but to strengthen the hands of Collectors in dealing with wilful and contumacious

defaulters

Fort St. George 11th January 1855

defaulters.

4. In all cases wherein you may find necessary to attach land for arrears, you will hereafter charge and exact interest from the day when the arrear accrued, to that of payment or of sale, agreeably to Section VIII Regulation XXVII of 1802

5. In some Districts it is the practice when land is put up to sale for arrears, to adjourn the sale from day to day till the receipt of what is deemed an adequate bid or till the sanction of the Collector is obtained. The Board regard this practice as objectionable in many ways, and they direct that it be wholly discontinued. The land should be put up punctually at the time and place fixed in the advertisement; and knocked down peremptorily and without reserve to the highest bidder. If there is no bid whatever, the sale may be adjourned to a fixed day; and if there is no bid at the second sale, the land should be purchased on account of Government at a nominal price

Land

Fort St. George 11th January 1855

Land so purchased for Government should be given for cultivation to Ryots applying for it, or if it really has a value and the failure of buyers was the result of a combination, it may be sold But in no case should it be given to the former defaulting holder or to persons connected with him on any terms whatever. Further, when the land first attached fails to produce a sufficient price to cover the demand, other land may be attached, and be sold after the same formalities and if after the sale of the whole of the defaulters land a balance should still remain his personal property may be attached and sold.

6 It is believed that the plan of adjourned sales is in use in some Districts as respects personal property likewise. Wherever it is so, it should be at once put a stop to, and the sale of all property attached for arrears should be peremptory and without reserve. It will of course be the duty of the Collector to take care that the sale shall be under such supervision as shall prevent collusion. They should also make it distinctly known prior to the sale that adjournments

and

and delays will no longer be permitted, but that the sale will take place peremptorily according to the terms of the notice.

7 For the diminution of the mechanical labour involved in applying the present law, the Board will as soon as possible send to you a number of printed copies of a form of advertisement. They will also at an early date, in accordance with instructions from Government transmit to you a number of copies of a notice to be published in every village of your District, announcing both the determination of Government to protect the Ryots from illegal coercive measures and also their resolution to use to their full extent the means of coercion afforded by the law; meanwhile you will not delay to act on the present order

From the Acting Collr. of Ganjam.

Explaining the cause of certain difference in the Demand Collection and Balance Statement returned.

With reference to the Extract from the proceedings of the Board of Revenue dated the 9th. Ultimo, I have the honor to state for their information that no space having been left open in the new printed forms of Demand Collection and Balance Statements for any new items the head "Advances on account of sequestered Zemindaries" was omitted in it and included in the Memorandum of "Particulars of Extraordinary Revenue" accompanying it. I have caused the necessary alterations to be made in the accompanying Statement of Demand

Fort St. George 11th. January 1855.

Demand Collection and Balance to 31st. July last as directed.

2. I take the opportunity to forward a Memorandum containing the necessary alterations to be made in the Statement of Demand Collection and Balance for August last, and to request that you will have the goodness to order the head "advances on account of sequestered Zemindaries" to be erased from the Memo of "Particulars of Extraordinary Revenue" and alter its total accordingly.

Bd. No. 1620.

From the Collector of Rajahmundry.

Requesting to be supplied with 20 Mercals in addition to the 15 of which he acknowledges the receipt and 6 scales and twenty four weights of one Indian Maund each.

Sir,

I have the honor to inform you that the 15 Mercals of the despatch of which I was informed by your Official Memorandum of the 14th August last arrived here about a fortnight ago, having been a long time on the road. I was of course obliged to effect the storing of the last season's Salt, with the old Mercals, and this was done with difficulty by patching them up, though they were not worth repairs. I have now been obliged to condemn nearly all the old Mercals some forty in number, and they will be sold as old metal. As however a very large quantity of Salt will have to be manufactured and stored in the coming season, for which not less than 35 Mercals will be absolutely required, I have the honor to request that the Board will be good enough to give early instructions for the preparation

Fort St. George 11th January 1855.

preparation at the arsenal of 20 Mercals in addition to the 15 lately received.

During the late extensive export of Salt to Calcutta, both on Government indent and on private trade, much inconvenience was experienced from the paucity of large scales, and had not the Government contractor and the private traders aided, by bringing scales and weights of their own, it would have been impossible to have loaded the Vessels without vexatious delay. It is probable that the exports in the coming year will be fully as large as in the last, and it is therefore absolutely requisite that I should be furnished with Six sets of large scales and weights, which I solicit may be procured and sent to me as soon as possible. I would suggest that the weights should be of one exact Indian Maund each, and of these there should be twenty four, Viz^t. twelve for the six sets of scales indented for, it being customary to weigh two Maunds at once, and twelve for the scales now in use.

In conclusion I have the honor to request that these articles may be sent to

Cocanada

Fort St. George 11th January 1855.

Coconada by Sea, for experience has shewn that it is much better (even if there be no ship bound for Coringa in the roads) to wait for a sea opportunity than to despatch heavy articles by land for so long a distance.—

Bds. After No. 121.

From the Collector of Rajahmundry.

Sir,

1. Having received an application for Salt for exportation to Moulmein, I have the honor to request that I may be informed whether I am at liberty to comply with it and at what rate.—

2. In the Board's Proceedings of 2d February 1854 it is laid down that Salt may be supplied for shipment to the Eastward at the rate of Rupees 35 per 100 Maunds, but that such Salt may not be landed at any British Port, in the Board's subsequent Proceedings of 1st May 1854 it is stated that there is no objection to the export of Salt to Pulo Penang (although a British Port) I am therefore doubtful as to the export to Moulmein.—

B. No. 1685

From the Agent to the Governor at Kurnool

Sir,

With reference to the Extract from the Proceedings of the Board of Revenue dated 15th September 1853 I have the honor to report that the parties alluded to in those Proceedings and Mr. Conway's letter having been called upon by the Agent for explanation pleaded ignorance and employment on other duties.—

There is little doubt that if a proper surveillance on the part of the Thasildar had been exercised by the

* Thasildar. Cutroms. Peishcar. 12 August 1853

the reason for so large a decrease
as under the head of sheep tax
would have been traced and
remedied by that authority
with the assistance of the Cartoons
and that in not having
done so they have at least been
guilty of neglect. The assistant
Agent distrusting the report made
of the decrease and the reasons
assigned for it employed a man
a shepherd himself who under
the late Government had farmed
this tax and who therefore knew
exactly where the flocks were to be
found and the means employed
to conceal them whenever any enquiry
was made. An Oomedwar of respect-
able character was attached to him
to keep accounts which were sent

having verified them sent

The hope of reward to the informer
and also of employment to the
Oomedwar were: guarantee that
they would as they did exert
themselves to trace the causes
of the decrease and bring the
concealed sheep tax to the credit
of Government instead of conniving
with and abetting those who
practised the frauds.—

By this enquiry a conciderable sum+ was recovered in this Talook
alone and I hope the Board
will under the circumstances
sanction the disbursement of
a reward of Rupees 150 to the
parties who brought the fraud to light.—

+ Rupees 906-12 =

Kurnool
Government Agents Office

Signed C. D. Daniell
Agent to the Governor

B. N. 76
Proceedings thereon
(18-19)

Under the explanation
afforded in the second letter above
recorded, the Board agree with the
Agent that the failure to discover
the

the fraud committed in the collection of the Revenue of the Shanar Palook in Fasly 1264 without the intervention of an Informer is justly attributable to the negligence of the Tahsildar Carkoons and Peishcar, and that their plea of ignorance of the concealment of so large an amount of sheep tax and employment on other duties cannot be admitted as an excuse for such remissness.

To,

W. H. Bayley Esqre
Secretary to the
Board of Revenue
Fort St. George

(22.)

B. P. No. 4501
From the Collector of North Arcot

Sir,

Para 1. Before quitting this District to take up my appointment as member of the Board of Revenue, I am anxious to reply to the Board's order of the 31st August 1854, respecting the reduction of the assessment, although I must necessarily do it in an incomplete manner, from want both of time and of some necessary information. The order in question refers to two separate objects, First that of giving immediate relief in cases where the excessive pressure of the assessment has tended to keep valuable lands permanently out of Cultivation;* and second, a more general and systematic revision and reduction of the assessment. For the first of these objects, measures were to be taken at once by Collectors; while for the second, they were to report for the orders of the Board the arrangements which they

With reference to the Board's Circular order of the 31st August 1854 details the measures adopted for giving immediate relief from over assessment in certain cases, and makes certain propositions for a more complete and systematic revision of the assessment also replies to the Board's Proceedings of February 20th 1854 respecting the Survey & Assessment of the five Southern Talooks of this District.—

* Para 15 of Extract Minutes of Cons. July 10. 1854 & Rec. Depart. No. 806.

Fort St. George 11 January 1855

they would recommend. I propose now to report on both, to state what I have done under the former order, and to set forth briefly and generally, the measures which I would propose under the latter. I shall at the same time reply to the orders of Government of the 3 February 1854, respecting the survey and assessment of the five Southern Talooks of the District, received with an Extract from the Proceedings of the Board of Revenue of the 20th idem

2. There is no doubt that the heavy assessment has actually kept valuable lands out of Cultivation in every part of the District. But its operation in keeping waste whole classes, or large proportions of whole classes, of the best land, is seen most in the five Talooks south of the Palar. In those Talooks it is the general rule that the best lands are permanently waste. I have stood on the bounds of numberless tanks, and seen the land immediately contiguous to the land waste, and the cultivated land commencing at some distance and for no assignable reason why the best land were thus abandoned

Fort St. George 11th January 1855

abandoned, the reply has been that those were first class, or first and second class, as if that were of course a natural and sufficient explanation. This is not the case to the same extent in the Talooks North of the River, where even in the highest classes some part is most commonly under cultivation.

3. This difference is, I believe, in some measure due to the greater energy and industry of the Ryots in the Northern Talooks, but there are other causes in the Revenue arrangements also. In the Southern Talooks the highest class lands were probably assessed for two Crops, but under the System prevailing there, the amount for each crop was not distinguished, nor was remission given for the second crop when it was not cultivated. Consequently as it often happened that the water was insufficient for the second crop, it became necessary to throw up the land as the risk of loss was too great. In the North Talooks, on the other hand, each crop has only to bear its

its own burden, it has been practicable to cultivate a part of the best lands in almost every Village. Again the System in use in the Southern Talooks allows second crop to be grown on the inferior lands, which were certainly assessed for one crop only without any additional charge; and this circumstance has tended to promote the abandonment of the best lands; the water available for a second crop being in many Cases taken to inferior lands, which have thus been able to pay the assessment, often too high to be paid from a single crop. In many cases also wells have been dug to aid in watering the second crop.—

4 The object of the present reduction being immediate relief, and there being a prospect of a much more complete measure at no distant date, I thought it best to deal with whole classes only. To have discriminated between parts

parts of the land in the same class, reducing some and leaving the rest untouched, would have involved the necessity of preparing detailed field Statements, as without such precaution much room would have been given for fraud. This would have caused much delay; so that immediate relief would have been impracticable, and the present measure would hardly have been in actual operation before the more complete one was ready to supersede it. This method of proceeding by whole classes had indeed its inconveniences; but it could not be expected that a temporary and immediate measure, carried into effect too by means of the ordinary Establishment only, could be complete. On the one hand it made it necessary to reduce the assessment in many cases on some cultivated land as well as on the waste, while on the other

where the proportion of land in a class

Kept

Fort St. George 11th. January 1855

Kept out of cultivation was not large, no reduction could be made on it at all.

5. As to the former of these circumstances, indeed I think it is not to be regretted. For the effect of reducing the assessment on the waste only and leaving contiguous and similar land at the old rate, would certainly be simply to transfer labour and Capital from the latter to the former, the former waste would be cultivated, and the former cultivated would become permanently waste. Indeed though that result will be avoided now as regards land in the same Village; yet it will still follow as respects lands of different Villages; unless the more complete measure is speedily carried into effect. For if the Ryots who have fully cultivated their lands see them on that very account continue under their old burden, while those of neighbouring Villages where the Ryots have been less industrious and frugal

Revenue

Fort St. George 11th. January 1855

receive relief, they will certainly throw up their own high class lands also, as a means of ultimately obtaining a reduction of the assessment.

6. This dealing with classes only, unavoidable as I believe it to have been, had the further effect of making the reductions rarer in the northern than in the Southern Talooks. In the latter, as already said, whole classes of 1st. and 2nd. class land are permanently waste in many Villages, or only a very small per centage is cultivated; and here therefore very little Revenue, is given up, even for a time, by reduction. But where half or more of the land of any class was under cultivation, and paying perhaps from 25 to 35 Rupees a Cawny, I did not think myself justified by the present order in making a reduction, however certain that it would be followed by the cultivation of the whole, because of the large Amount of actual Revenue which such

such reduction would involve - In the Northern Talooks therefore I selected only a few Villages in each Talook, where the extent of waste was largest and where the assessment was notoriously the most burdensome, and for the present made reductions in those Villages only - In the four Talooks of Converipauk, Sholinghur, Suttiveid, and Cuddapanut-tum, I made no reductions - In these Talooks, and more particularly in Suttiveid (which was surveyed and assessed while it formed a part of Chingleput) the assessment is less burdensome than in the other Talooks; and it did not seem necessary to apply the present order to them. I should add that with one exception to be noticed presently my reductions were on Nunjah only, (including tank and channel Tatacal,) where indeed relief is much more wanted than on Punjah. I may also explain that, as respects the extent of cultivation and waste, I used the

the accounts of Fusly 1262, that was a year materially above the average in extent of cultivation, and it would have required much time to prepare the necessary detailed accounts if or a series of years. -

7 The foregoing Paras: explain my mode of proceeding under the order in question. I will now briefly notice the results on the Revenue - Enclosure 1 gives these at one view and in a convenient form: It shews for each Talook the number of Villages untouched, with the extent of Nunjah land both waste and cultivated, and the total assessment on each; the number of Villages to which the present order was applied, with the same particulars of the land and assessment in the classes untouched; and lastly the extent of land, waste and cultivated, in the classes of which the assessment has been lowered, with the amount

and

and proportion of the reductions made

It will be seen that the whole Hunjah
ayacut of the nine Talooks in the Sta
=ment is 117889 Cawnies, bearing a Gove
=ment assessment of 15,10,914 Rupees of
which the extent cultivated is 73917
Cawnies or 62 3/4 per Cent; bearing an
assessment of 9,19,609 Rupees or 60 3/4
per Cent of the whole - Thus three e
Eighths of the land is waste and e
unproductive - Out of the whole extent
5,725 Cawnies of Cultivation, and 12,300
Cawnies of waste were brought e
under the present reduction, the
assessment being 1,12,612 Rupees on
the former and 2,3d,9 6.9 on
the latter. The reduction
on the cultivation e

Ey

amounted

amounted in the whole to 17,993 Rupees
averaging 16 per Cent of the present a
assessment that on the waste amounted
to 54,390 Rupees being 23 and a fraction
per Cent on the present assessment -
8 Thus about 18,000 Rupees of
present Revenue is given up, but in
return there is the reasonable prospect
of a large accession of Revenue from the
waste land subjected to the reductions -
The total assessment charged on that land
at the reduced rates is 1,80,579 Rupees being
just ten times the amount of the Revenue
now given up - The whole of this land
is now waste and unproductive, and
supposing that only half of it is brought
under Cultivation as a Consequence of
the reduction of the assessment there will
be an increase of 90,000 Rupees to set off
against the loss of 18,000 Rupees - Thus
even as a mere question of Revenue, I
think there can be no doubt that the
present measure will be one of gain
and not of loss, while as regards the taxe
payers the present measure of Relief

Scanty

Fort St. George 11th January 1855

I

From Ft St George 11th January 1855

10 I am now speaking of the Poonjab- It will be seen that out of 295 Cannies in Ringumpettah only 50 was Cultivated while 21.5 was waste, and in Goondlapully, that out of 363 Cannies, only 97½ was Cultivated and 265½ waste It was fully clear that this lamentable state of things was owing solely to the exorbitancy of the assessments which in both villages alike ranged from 5-6 a Rs Rs Canny to 3-1-a in this remote jungle villages after deducting the Customary Remission of 12½ per Cent from the Jaram rates- This had Compelled the abandonment of the land, which had now been waste for many years, and the Ryots and labourers without occupation or means of living had emigrated, or Remained in poverty on Contracted holdings even if they had not as not unfrequently happens in such cases, Resorted to occasional Robbery in the neighbouring haunts- much of even the land actually Cultivated would have been waste also, but that some private wells aided in the Cultivation of the greater part of it

I

From Ft St George 11th January 1855

I had no hesitation in applying the present orders to this case, I lowered the rates as shown in Enclosure 2 and there is no doubt that Cultivation will speedily be extended- The state of the Poonjab was much the same as of the Poonjab, and it will be seen in the Statement that I reduced the rates on that also- I may add that these new rates in these villages are not to be subject to the Customary remission they are still higher than I think they ought to be

11 I must not omit to notice another and distinct measure which I have adopted under the rule now in question- It has long been well known to the Revenue authorities of the District, and has repeatedly come under the notice of the Board that in the five southern Talooks, which have never been settled on survey the extent of the lands in many villages is far less than that which appears in the accounts and on which they are assessed- In some cases the real extent of the land is not more than

than 70 or 75 per cent of the nominal
extent- This Circumstance of Course
makes the assessment more burdensome
in reality than in appearance, and this
Cause operates not less than the nominal
high rate of assessment to keep land waste

12 I have seen to have at hand a
a Memorandum of the deficiency in two
villages of the Arcot Taloob, viz.t, Chuckra-
-mullore and Irundialum, both fine
villages- In the former out of an extent of
229 Cawnies of Punjah land shewn in the
account, there is no more in Reality than 182,
leaving a deficiency of 47 Cawnies or 20 per
Cent- The assessment of the deficient land
amounts to above 650 Rs.- In Irundialum
there is a deficiency of 40 Cawnies out of 167
or 23 1/2 per Cent, and the assessment of the de-
-ficient land comes to about 500 Rs.- If the
whole land were Cultivated these large
sums would have to be paid over and above
the nominal assessment, and it is no wonder
therefore that a large extent of land in
the villages is permanently waste- The
same state of things is found in various

degrees

degrees in many other villages- Last year
the Ryotwarry Inhabitants of three villages in
Wandewash Taloob petitioned the Board,
and that not for the first time, that they
might be Charged for only the actual
extent of their lands- The Petition being
sent to me for enquiry and disposal,
I looked into the matter at the Immanabundy
and finding the Complaint well grounded,
I gave the relief sought by charging for the
extent according to the Survey of the vill-
-age made under Mr. Nisbet, the same
relief is needed in very many other
villages, and Concerning that the present
order might be taken to authorize the
measure- I have directed that Mr. Nisbet's
Survey shall be adopted universally in the
five Taloobs to which it extends, in all
the villages for which it was Completed,
in the Settlement of the Current Fusly-
This measure will remove standing
grievances and a great deal of discon-
-tent-

See Endorsement on Petition 1860. of 1853

13 The foregoing is a brief detail
of the measures adopted by me
under

under the order for giving immediate relief from over assessment, in those cases only where land is actually and manifestly kept permanently out of Cultivation by that cause - I now proceed to the second part of the subject and to state those which appear to me advisable in the more general and systematic Revision of the assessment - This Revision, if I rightly understand the intention, is to be directed to other and larger objects, is not to regard solely the increase of the Revenue or even the preservation of it from some present diminution, but is to assist also at relieving the Ryot from burdens which impede or press down his exertion and effectually prevent his growth in wealth, intelligence and Comfort, so as to enable him at no distant time to pay the same or a still larger amount with much less inconvenience and privation. The want of time at present, as well as the absence of the particular information necessary to a minute and detailed exposition makes it necessary that I should deal

deal with the subject briefly and in outline only, but I think it desirable that it should be done thus, rather than not done at all - The Extract from the Minutes of Consultations of Government which accompanied the Board's Proceedings above quoted materially shortens and facilitates the task, for the merits of Government there expressed render it unnecessary either to produce proof that the assessment is burdensome, or to argue in favor of immediate proceedings without waiting for a Correct Survey, I shall therefore proceed at once to explain the state of the assessment at present and the alterations which I would propose -

Extract Minutes of Consultation Revenue Department July 10th 1854 No. 806

14 I will first speak of the Punjab land, and I will begin with the Northern Talooks of the District, excluding Putmaid Inamees for the present, as the assessment of that Talook was fixed upon an entirely different basis from those of the Northern Talooks - In my letter + replying to the

+ August 28th 1854 No. 99 Board's questions respecting the Commutation Rates

rates, I stated (Para 9) the proportion of the Crop taken as the Government share in forming the present money rates. The Government share in all was taken at 50 per cent, and in all except Palnaud Nairs and Vencatagherry Cottah the prop.n portion taken from the Ryot was further increased by fees to village servants, so that the share really left to him was no more than from 46½ to 48½ per cent, there being some variation between Taloofs and Taloofs. These proportions were those for land watered by tanks or Channel; in the case of land watered by wells (the extent of which however is but small) the Ryot was allowed two thirds of the crop (except in Palnaud) in Consideration of the Cost of raising the water.

15 The quantities of grain as thus obtained were Commuted into money at the average selling price of ten years; the average price in each village was taken, but as stated in Para 4 of the letter above Referred

† August 28th 1854 Referred to there is nothing to show what were the prices thus averaged, and it seems likely that they were those of the sales of Government Paddy (the Revenue of Punjab land being then taken in Kind) and the Government grain as a general rule, was certainly sold at the times when the Market was best, thus the average would not be a fair one. The money rates thus fixed were soon found to be very exorbitant, and their pressure was so severely felt that the case being represented to the Board of Revenue a general remission of 12½ per Cent was granted and still Continues.

† Letter from Government to the Board of Revenue March 18th 1823. The reduction authorized was 12 per Cent but for Convenience sake it was made 12½ or one eighth.

16 Supposing the quantity of Produce originally assumed to be Correct and supposing the Commutation price

Fort St. George 11th January 1855

price to have been fair at first and to have still continued so, the actual shares of the crop left to the Ryot including this Remission is 56 1/2 in Palmanair and from 52 to 54 per Cent. in the other Talooks - But it was well known that the Conditions have not so Remained unchanged - Having but very imperfect data, I will not hazard any opinion as to the fairness of the two elements of the Commutation viz quantity and price at the time beyond the Remarks made above in the preceding Para, but indubitably the pressure of the assess-ment has been very greatly augmented by the subsequent fall in the price of grain - I entered into this question also in my letter above cited, and gave a table shewing the prices prevailing in each Talook during each

+ August 28th 1854

Fort St. George 11th January 1855.

of the last ten Faslies on comparison with the Commutation price and making some correction though I believe not to a sufficient extent/on the prices of those ten years which were the Town prices for comparison with the Commutation averages which were Village prices. I found that the fall of price in the several Talooks/omitting Palmanair and Vencatagherry Cottah where it is less/ranged from 17 per cent to 60 per cent.-

17 If this fall were natural resulting from the cheapening of the process of agriculture or from a lowering of the cost of bringing grain to market through the improvement of the roads or from increased skill obtaining heavier crops, then it could not be held to increase the burden on the Ryot but would in fact be itself the result of that burden being lightened and so would be the restoration of the equilibrium. But there is no reason to suppose that improvement of any of the three kinds specified or any other has tended in any material degree to produce a natural depreciation. I think the cause must be sought elsewhere and without stopping to enter at large into this subject, I think it may be accounted for partly by the demand of the non agricultural

non agricultural classes not increasing and perhaps in some quarters even diminishing and partly by an increase in the value of silver being so far a nominal and not a real cheapening.-

18 With regard to the former cause I would observe that some branches of the Country manufactures have certainly verye greatly declined during the last half century under the pressure of the Motwpha tasc, and Competition both at home and a broad with much more lightly taxed importations from other quarters, and further I would remark that this view seems in some degree supported by the fact that in the Talooks of Palmanair and Vencatagherry Cottah, where a considerable and lately much increasing estent of land has always been devoted to the growth of the sugar cane, the fall in the price of Paddy is much less than in any other Talook - As to the second of the causes above mentioned I would observe that not only would the demand for silver to pay the Government List increase its price to the Ryot; but there is proof from official documents that

that the escport of silver during the last thirty years has very greatly exceeded the imports and this to so great an estent as seriously to affect the whole quantity of silver in so poor a country-

19 If there is any truth in the preceding observations as to the causes of this fall in the price of grain it follows that it has not been accompanied by any compensation to the Ryot, but that it has simply increased his burden by augmenting the share of his crop taken from him by the Government. I feel no doubt at all that this is really the case, if not to the full estent of the fall itself, yet very nearly so and the result cannot but be very disastrous to the Ryot- It has also certainly been injurious to the Government Revenue-

In support of this assertion I beg to request attention to enclosure 6 which shows the Revenue from the Nunjah lands in a number of Villages for a series of years. Had there been more time the list could have been much enlarged as it is however it is of some value Having only received it at almost

the

Fort St. George 11th January 1855.

the last moment of my time, I cannot offer much remark on it, but it deserves attentive examination. It will be seen that in many of the Villages the Revenue has sunk in the course of the half century of British Rule, or rather in the thirty years of Ryotwar field settlements to one half, and even to one third of what it was formerly. It is my full belief that the cause of this lamentable decline, implying as it inevitably does a more than corresponding fall in the comfort and resources of the people of those Villages, is due almost exclusively to the exorbitancy of the Government tax though the neglect of works of irrigation has no doubt operated to some extent and in some cases. I beg also to appeal to enclosures 3, 4, and 5, showing the cultivation and waste and to the large proportion of the latter in proof of the same fact.—

20 In their Proceedings on a report from the late Collector of South Arcot in view to a reduction of the assessments there the Government have adopted the principle that one third of the crop or 33 1/3 per cent is as much as can properly be taken from the Ryot. In the Talooks of this District of which I am now speaking the present assessments as already said nominally take from 12½ to 18 per cent, but in reality they take much more. The rule just referred to if put in force here would make very extensive reductions. Thus in the Tripulty Talook there are lands assumed to produce 10 Cullums of Paddy and assessed at the enormous rate of 6–7 or 22–8–0 a cawny for a single crop, and even after deducting the permanent remission the net assessment is 19 3/4 Rupees. But if instead of 12½ per cent the Government share were reduced to 33 1/3 and this diminished quantity of grain were commuted into money at the rate of 5 3/4 Cullums to a Pagoda, instead of 3 Cullums, the rate for a single crop on this land would be only about 2 1/4 Pagodas or less than 8 Rupees. This would be a reduction of 60 per cent on the present net assessment. But so large a reduction is not called for, the Ryots do not expect it and do not even

† See Para 21 of letter of august 28th 1854.

Extract Minutes of Consultation of Government 5th of 1854 No 7.18.

Fort St. George 11th January 1855.

even ask for it. Even the premises do not involve so large a sacrifice for I must observe that the assessments here and every where else so far as I have seen, are based on the value of the grain only to the exclusion of the straw, though this latter is in reality no inconsiderable item— a Cawny of land producing forty Cullums of Paddy will yield also about forty bundles of straw, worth in ordinary times an anna each or on the whole 2½ Rupees— This added to the rate obtained as above by taking one third of the grain would give a total of nearly 10½ Rupees.—

21 I will now briefly explain the state of the Nunjah assessment in the five Talooks South of the Palar— The existing assessments in those Talooks were settled while they formed a part of the South Arcot District and there is no information on my records to show the bases on which they were framed with the single exception of the amount of the Commutation price— I gather however from some papers obligingly placed at my disposal by you, that in the Settlements made by Mr. Garrow in Fusly 1212. the Government share was taken according to the Custom at different proportions varying according to the Talooks, according to the mode of irrigation, and according to the caste or tribe of the Ryot, Mussulmans and Brahmins being allowed 10 in the hundred more than Soodras. On the average of the whole, however, including the low and the high proportions the Government share amounted to no less than 57 per cent on the assumed produce— The quantity of grain thus determined as the share of Government was commuted into money at the rate of four Rayaee Cullums to a Pagoda. The rates thus obtained were very exorbitant, they were somewhat reduced in the succeeding year by Major Macleod but still the highest rate was no less than 16½ Pagodas a Cawny. In Fusly 1215 Mr. Ravenshaw made still further reductions in the most highly assessed Villages only by reducing the average of the several rates to five Pagodas a Cawny where it exceeded that

From collector South Arcot to Board July 12th 1802 Para 69-

To Board
July 8th 1805 Para 17

Fort St. George 11th January 1855.

sum. He calculated that this reduction would leave the Ryot about 24½ per cent of his crop, 75½ being thus taken by the Government. He adds that the share thus given to the cultivators was 25 per cent less than in his opinion it ought to be.—

23 The excessive rates then fixed have been maintained to the present day, for the remission of 12½ per cent granted in the Northern Talooks has not been extended to the Southern. Bramins and Muselmans in those Talooks however still enjoy the privilege of paying only nine tenths of the Taram rate on their usual holdings though this privilege is not permitted in the case of land reclaimed from waste. But though thus nominally still in operation, those rates have been materially modified in practice, but so unequally and irregularly that it is quite impossible to say what proportion of the crop is now taken by the Government. These disturbing causes. I will briefly notice. In the first place in Fusly 1215 Mr. Ravenshaw with the view of promoting the cultivation of the waste ordered that such lands [illegible] up for cultivation should pay certain [illegible] portions

Fort St. George 11th January 1855.

portions of their Taram assessment according to the time for which they had been waste, increasing gradually to three fourths of the Taram rate, which was to continue the permanent assessment of such lands. Under this rule which seems to have continued in operation till the Village leases, much land was brought under cultivation, and such lands still remain at the three-quarter rate.—

24 Again in Fusly 1217 the same Gentleman made another rule respecting the cultivation of waste namely, that whenever land not assessed / for only the lands under cultivation in Fusly 1213 were assessed by Major Macleod / was brought under cultivation it should be charged at the average rate of all the classes in the village. This rule as acted on at least was by no means favourable to the Ryot for the average taken was not the average the whole collections on the whole paying area, which would be the real average rate, but it was simply the average of the several rates without any reference to the extent of land in each class. Thus the average rate was some times nearly as high as the rate

Fort St. George 11th January 1855

of the 2d class, and yet it was applied indescriminately to the land uncultivated in Fusly 1213; though the greater part of that land was undoubtedly of very poor quality inferior to the worst of that then under cultivation. Afterwards however the foregoing rule as to three quarter Teerwah was applied to this average Rate also, and there is a good deal of land in the three quarter average rate. Even that however is in general too high.—

25 Another prolific source of confusion is the uncertainty as to one crop and two crop lands. At the original assessment a very small extent of land was espressly charged as two crop and other as one crop; but in general there is nothing whatever to show whether the exciting rates are rate

Fort St. George 11 January 1855

to apply to two crops or only to one. Even where the rates were espressly stated to be for one crop they have not been so regarded, but such lands have been allowed to be cultivated with two crops without any additional charge. In most cases the land actually entered as two crop is so heavily assessed as to be incapable of Cultivation, and very nearly the whole of it is waste; on the other hand a considerable extent of the one crop land now bears two crops, in many cases Ryots have dug wells on their low class land, and have so stocked out the deficient supply of water, and raised a second crop But still by far the greater proportion of lands bears only a single crop.—

26 In the absence of any record or Register showing the lands which do and which do not bear two crops, which have or have not irrigation for a second crop in the great majority of cases one crop land could not be so cultivated without the aid

aid of a well and wells in such land are few, it requires more local enquiry to decide as to the bearing of the present rates, and therefore as to the proper and just reduction to be made in this part of the District than in the northern Talooks. On some of the land which now usually bears two crops a systematic revision of the assessment will increase the demand; but this will be more than compensated even in every Village by the remission on the high dry land now waste, and on the lower dry land not capable of bearing two crops and on which the present kisswah is too high, even to the extent of keeping much of it entirely out of cultivation.—

27 The fall in price has affected the assessments in the Southern as Talooks as well as the Northern It will be seen on a reference to

to enclosure 4 in my letter of the 28th August, that comparing the average of the ten Fuslies 1253 to 1262, with the commutation rate there is a fall ranging from 28 to 50 per Cent and this is on the average of the Town prices of the later period because I have no information as to where or how the average for the commutation rate was taken. If as is most probable it was the average of Village prices, & was corrected so as to represent them then the real fall is much greater than is here shown probably by 8 or 10 per Cent at least.—

28 Before closing this view of the present state of the Nunjah assessments I beg to refer to enclosure 3, being a Statement showing the Nunjah ayacut cultivation and waste in Fuly 1262 for each Talook, with the average rate per Cawny in each and the proportion of waste and cultivation respectively. It will be seen that the average assessment of the whole on the cultivation is 10-2-2 but omitting

omitting Sutwaid where the assess-
ments are allowed to be generally
very moderate and where they average
only Rs. A. P. 4-8-9 the average is Rupees Rs. A. P. 1-2-9.
9. The average in the Kooloor Talook
of South Arcot in which the Govern-
ment have authorized a remission
of 25 per Cent. is Rs. A. P. 9-7-6, on the culti-
vation of July 1261. It is justly said
by Mr. Malby that the circumstances
of Districts vary and that the assess-
ments of each must be judged of
by its own. still these comparisons
have a use and the circumstances
of South Arcot much resemble
those of this District in various
respects.—

Extract Minutes of Consultation Revenue Department No 748. June 26. 1854. Para 26.

Collector to Govt. December 17th 1853 Para 12.

Enclosure 3

29 Referring again to the State-
ments I beg to point out how greatly
the rate varies in the several Talooks,
and how nearly the proportion of the
ayacut under cultivation varies in-
inversely with the rate of assessment.
This is even more strikingly the case
than the figures show if regard is
paid to the local circumstances of
the several Talooks. Thus the largest
proportion

proportion of waste is in Poloor, while
the average assessment of that Talook Rs. A. P. 9-9-10
P. 4) though high, is much lower than in
some other Talooks as for example Chittoor,
Chendraghiry or Vellore. But the Poloor Talook
is remote from any great Town, and consists in
great part of Hill and Jungle, it is also without
the advantage of much River irrigation. Thus
the rate is really as heavy probably in Poloor
as in any Talook in the District again the
average assessment on the Cultivation of
July 1262, in the Talooks South of the Palar
excluding Sutwaid, is Rs. A. P. 9-15-7, while in
the Southern Talooks it is Rs. A. P. 11-5-2; and in
correspondence with this difference it is
seen that in the former the per Centage
of waste is 36. and in the latter above
41.—

30 With reference to this Statement
I beg to revert once more to the circumstances
noticed above as to the abandonment of the
most highly assessed two crop land in the
Southern Talooks, and the application
of the available water to raise a second
crop on one crop land. It might
hence be inferred that the Ryots having
thus relieved themselves as it
were

were from the pressure of the high rates little or no reduction is needed in those Talooks, and indeed this view was taken by the late Acting Collector† and apparently adopted by the Board†. They to point attention to the fact however that notwithstanding this abandonment of the highly assessed lands and the division of the irrigation to lower class lands, still the average assessment on the actual cultivation is considerably higher in the Southern Talooks than in the Northern. In the latter it is under ten Rupees while in the former it is Rs 11-5 being a difference of above 13 per Cent against the South. Again in the twelve Kooloo Talooks of South Arcot the average assessment on the Cultivated Punjah lands is Rs 9-7-6 as already noticed; the average in the Southern Talooks of this District being Rs 11-5 is 19 per Cent higher than that average on which however a reduction to the extent of 25 per Cent has been sanctioned.

31 The remarks in the paragraph specified in the foregoing Report, notwithstanding the alleged complaint of over assessment in the Punjah

† To Board April 15 1853 Para 8.

* Proceedings October 10 1853 Para 20.

Revenue of the four Talook composing the Sub Collectorate has increased during the last sixteen years. Considering that the irrigation has certainly been improved within the period in question, this increase is not surprising and the absence of it would be unsatisfactory and discouraging. But in connection with it they to drew attention to another fact viz. that during the same period the average assessment of the land under cultivation has been continually becoming lower, showing that the abandonment of the best lands has been extending. This progressive decrease in the average rate will be clearly seen in enclosure 7, which gives the cultivation, Revenue and average Rate per Cawny for the last twenty years. There is a great desire in the Southern Talooks, greater even than in other parts of the District, to get lands, and in consequence of the lowering of the assessment on much of the assessed lands, the Ryots incur the Cultivation and expense of reclaiming and cultivating Punjah Corumbooks, unassessed lands of which there is much in

in those Talooks,) on the chance of getting a moderate assessment imposed. If successful in this they continue to cultivate the land; otherwise they often abandon it after all their labour.

I think all the foregoing circumstances will be admitted as proving that the assessment in the South of the District are even more burdensome than in the North, and that the reduction made should be greater there.—

32 Such is the condition of the Punjab lands. Whether we look to the North or to the South, a reduction of the assessment is certainly necessary. We find extensive tracts of land waste including much of the very best quality especially in the Southern Talooks, and the chief cause certainly is the heavy pressure of the Government tax and though the fact that the assessment is so heavy as to keep land out of cultivation is a proof that it ought to be reduced, the converse is far from being true, that where land is cultivated the assessment must be moderate.—

There

There are villages in which the owners of the land have become so utterly impoverished that their whole land is mortgaged, and they now cultivate for the Mortgagees who allow them just sufficient to maintain them. In very many other cases the Ryots have contracted their holdings to what is just enough to give them the means of living, and cultivate that less for profit, than because they must do so or starve, no other means being open to them to gain a living.—

33 There is one incident of high assessment which ought to be noticed, viz. its tending to promote fraud in concealing cultivation. I have no doubt that it does operate in that way in this District to a large extent, and it appears almost self evident that in the wild and hilly Talook of Chendragherry such enormous rates of assessment as 39 Rupees a Cawny could not be really paid out of the produce of the ground nominally paying it. In this way exorbitant assessment defeat their own object, while they have also a still more pernicious operation in the tendency to lower the moral tone both of Ryots and Officials, by habituating them to perjury and bribery. In illustration of this point I beg to recall to the Board's recollection my

letter

letter of the 10th June 1850, bringing to their notice cases of concealment in only five Villages, to the aggregate amount of 2039 Rupees, being above 12 per cent on the amount of Revenue previously stated in the Examinations accounts. In two Villages of the number of which the Village Officers had given in the Revenue as 1144 Rupees, the concealments amounted to 822 Rupees being 72 per cent of jamabandi. I stated in that letter that I fully believed extensive frauds to have been carried on systematically in those Villages and to be general though not to the same extent throughout the Talook. The punishment inflicted in those cases had a temporary effect probably in checking them, and in the two worst villages means were adopted to guard against their recurrence. But as regards the Talook generally I cannot suppose that the effect of those investigations and punishments was more than temporary.-

34 As a remedy for that state of things I recommended a new Survey of the Talook with a reduction of the high assessments. But I afterwards came to the opinion on further consideration, that it would be better to postpone the Survey till it could be made effectually by Examination and under personal superintendence of the whole District [illegible] to [illegible] at once, even including the Southern Talooks in great part surveyed by

but particularly the Northern Talooks, very imperfectly surveyed in 1805. I am still of the same opinion, urgently as the Survey is required, I still think it would be a great pity to have it done imperfectly, and I still think that a perfect Survey at last will be cheaply purchased by some delay. I think however that the reduction of assessments now proposed should be accompanied in this Talook in particular by an inspection and measurement of the lands wherever fraud may be especially suspected, and I would beg to recommend that a small temporary Establishment should be placed at the Collector's disposal for that purpose. The mere preparation of these measures would cause much concealed land to be correctly brought to account.

35 I beg to refer to the letter above quoted (Paras: 3 to 8) for an illustration of the small value of the Inspection of the Village Officers, acted on as a check on the Village Officers' accounts. Of the five

five Villages three had been inspected by the Tahsildar in person, and the Village accounts passed by him; while in the other two, the circumstances of the Inspection as detailed in the letter, clearly show connivance in the fraud on the Tahsildar's part. The more the assessments are reduced, the less becomes the likelihood of this kind of fraud; because the risk of detection and punishment is the same, while the profit to be gained is lessened, whether to the parties immediately concerned, or to the Salook Officers.

36 I now proceed to state the measures of relief which I think should be given, and the mode in which it should be applied. The enquiries that I have made lead me to the belief that five Pagodas a Cawney is quite as much as can be regularly paid on good Land well provided with irrigation, and not remote from a market, if the owner is to retain more than a mere [illegible] existence. And if I am rightly informed

the highest rates of assessment in the adjoining District of Chingleput, which has the advantage of vicinity to the Presidency, rarely exceed that sum even now. In order to be on the safe side, and to ensure the cultivation of the best lands, I would propose that the highest rate for one crop in this District should be ten Rupees a Cawny, and if to this is added five eighths, or ten annas in the rupee for the second crop, being 6¼ Rupees, the total assessment for two crops will be 16 as 4 — I think this should be the highest rate in any part of the District, it should of course include other classes of land besides those now paying the highest rates.

37 I think the facts adduced above justify me in thinking a large reduction of the present rates necessary. I would propose a total of 30 per Cent over the whole District and including both cultivation and waste. And by this I mean a reduction to that extent on the rates.

rates actually paid, exclusively of, and in addition to the permanent remission of 12½ per cent already granted in the Northern Talooks. In the Southern Talooks it should be the same on the lands of Bramins as Soodras. I see no reason for a greater reduction on the lands of the former, because the existing difference is not in consequence of the burdensomeness of the tax, but from mere personal considerations. I am of opinion that such privileges and exemptions should merge in the general reduction, and the Government have declared the same opinion in the Proceedings on the reduction in South Arcot. For the reasons stated above in Paras 30 & 31, the reduction should be greater in the South than in the North; but the difference would be partly equalized by the abolition of Teauzgaury and the imposition of a second crop Teeruah in some cases. I think that the reduction on the whole District should be not less than 30 per Cent, on the present net demand clear of the general & Riayet, and of Teauzgaury

Teauzgaury and including the second crop assessments to be imposed in the Southern Talooks on two crop land. I beg to draw attention to the fact, that even so reduced, the average assessments here will still be above that in South Arcot under the new rates. See latter part of Paras 28 and 30 above.

38 As to the mode of applying the reduced rates. In the Northern Talooks the lands have been regularly classified; and on the whole, though not free from errors, I am of opinion that the classification is very tolerably correct. I certainly think it would be inexpedient to meddle with it now. I think that as a general rule the existing classification should be adopted and that the new rates should be applied to it. In all the Northern Talooks (omitting Sutmaid,) a set of rates were framed for each Talook. The villages were arranged in Circars classes (generally three but in some Talooks more) according to means of irrigation & quality

quality of land and distance from a market, and there was a scale of rates for the Villages of each Durjah. On the whole I think the classification and apportionment of the assessment was very tolerably equal, though certainly some Villages in each Talook were assessed much more heavily than others, and in some whole Talooks the assessments were much more burdensome than in the others. I may mention Trivul-lum in particular as a Talook where the assessment presses with extreme severity.

39 One advantage of moderate rates is that slight inequalities are then unimportant, and in general, with the proposed reductions, it will not be necessary to make exception in favor of particular Villages, because the general reduction on the Talook or Durjah to which they belong will give them sufficient relief. In some cases also, it may probably be unnecessary to preserve the distinction between different

different Durgahs, which on the reduced assessments would be extremely small; as for example in Caiveripauk where there are now nine Durgahs, and a separate scale of rates for each. But it will be necessary to correct in part at least the great difference between Talooks. The exorbitant rates in the Trivullum, Chittoor, and Chendraghiry Talooks should be certainly lowered in a greater degree than those in the Sholinghur and Caiveripauk Talooks, and still more than those in Palmanair and Vencatgherry Cottah. This operation will need care and judgment, but by testing the result on the whole Talook it can be effected without much difficulty. In general the object should be to bring the average of the whole rates in the several Talooks pretty nearly to an equality, with a slight difference in favor of those most remote from a market, and possessing least of the advantages of River Irrigation. Certainly there is no reason why the assessment should be higher in the remote and wild Talook of Chendraghiry or in Trivallum of which

× See Enclosure 3

a

a large part is very precariously sup:plied with water than in Canneripauk:-

I have not been able to go into the existing rates sufficiently to ascer:tain positively whether it will be prac:ticable to have a single uniform scale of rates for the whole District, but, desirable as such an arrangement is, I am disposed to doubt whether it will be feasible here. The difficulty arises from the fact that the present distribution of the assessment varies in the several Talooks in two important particulars. In the first place the number of classes is not the same in all the Talooks, and secondly the existing rates not only vary in amount, but descend by different gradations, in some by 9 annas of a Pagoda, in others 11, in others 12 &c. This would render it difficult to have a uniform scale for the whole District, unless one with a very large number of classes descending by very minute steps, only a few of which classes would be found in any one Talook; but this would be a uniformity

uniformity in name only. This point must be determined after closer exa:mination, if not practicable to have one scale for the whole District there may certainly be a separate scale for each Talook, or perhaps one for two or more Talooks.

41 In the Southern Talooks, though the existing assessments are in great confusion. yet there is fortunately a means at hand, by which the new rates may be readily applied. I allude to the Survey and classification begun and carried nearly to completion thirty years ago, but left unfinished. The rates of assessment determined by Mr. Nisbet were exorbitant, even more bur:densome than the old rates, and this seems to be the reason why the Ryots were so un:willing to receive his survey assessment, the three Villages of the Vellore Talook in which they were introduced are among the most impoverished in the District. But I fully believe that his survey of the Cultivated Land was carefully made, and that if, no:-fault it contains errors, I have reason to believe that it will every

where

where be readily accepted in supercession of the existing uncertain measurements. The classification of the land also I believe to have been carefully and judiciously made, and I think it may properly be adopted.-

42 Mr. Nisbet did not fix a uniform scale of rates either for the whole of the five Talooks or for each Talook; his rates were framed independently for every Village. But still those rates, though certainly much too high, yet having been determined carefully under the superintendence of a very able Officer, will be found a useful aid in determining the new rates. I apprehend that the best course will be to arrange the Villages of each Talook in Durjahs, as was done in the Northern Talooks, according to means of irrigation, quality of soil, and vicinity to a market; and then with the aid of Mr. Nisbet's classification and assessment, and of the existing rates, to determine the new rates. Effected and tested by an examination

of

of results on the whole, I think this may be done in a satisfactory manner without great difficulty. The rates of reduction in different Villages should vary much more in the Southern Talooks than in the Northern, because the comparative rates there are much more unequal. I think it probable that a uniform scale may be applied to the whole five Talooks; but the assessment on the Southern should certainly be heavier on the whole in Great, Trichinopatoor, and Vellore, than in Poloor and Wandiwash. I have said that I would advocate a total reduction of about 30 per cent in these Talooks, it would be larger in the higher classes than on the lower, but in none except where 25 per cent on crop Tirwah Cess to be added / it will be less than
