To

G. S. Forbes Esqre.
Secretary to the
Board of Revenue
Fort Saint George

Sir

Dr. No. 1350
From the Collr. of
Chingleput

1. I have the honor to forward a List of weights and measures and of Land measures known in this District with the name of each by the side of its usual English spelling as required by Para 7 of the Acting Secretary's letter No. 4476 of the 15th December last

2. The names of the weights and measures furnished by the Board are those that are known in daily use in the District; but as observed in Para 4, though of the same name, they differ very much as regards exactness in different Talooks, and a prevailing average by which I would mean an average found to be more or less in general use, can scarcely be said to exist though, of course, one

weight

Fort St. George 30th March 1858.

weight be struck, and be called an average by adding and dividing all the discrepancies that might be discovered such an average would, however I think, be of no use, and would certainly be no guide to the dealings of the people among themselves, or with strangers

3. If a uniform standard is to be established and acted on it must be enforced by a legislative act with attendant penalties for now attention any efforts by Proclamations and by showing the advantages of recognized standards short of an act of the Legislature, would in my opinion, end in failure.

4 I see no objection to the Board publishing the weights and measures contained in their Paper as the weights and measures of the District; as they would be endorsed by all parties: it is only by actual measurement that they are found to differ practice in the different Bazars, and Talooks, and without any

intention

Fort St. George 30th March 1858.

intention of fraud. An examination of the measures used in Conjeeveram and Outramalore shews that they contain 8½ Pullocks while those in Poonamally and Caroongoly contain only 7 3/4 instead of all containing exactly 8. As regards the Viss in some Talooks it has been found to contain 41 Pullums, and in others only 39: while if tried by weight some have equally Rs. 121 & others Rs. 119 all go by the same name, and pretend to be correct.—

B. C. No. 1328.

From the Acting
Collector of South
Arcot

} Sir,

As requested by the Board in their Circular letter No. 4476 dated 15th December 1857 I have the honor to furnish

furnish for their information, the result of the investigations which I have made to ascertain the correctness or otherwise of the statement made in the paper prepared in the Board's Office, in regard to the weights and measures of this District. I desire to obtain actual results from every Talook of the District has delayed this report longer than I could have wished I have been aided in the investigation by my European Subordinates who have personally scrutinized the measures in use in the several talooks under their charge, and the results of our experiments are given in the accompanying tabular form.

2. With respect to weights of the two tables given in the Board's paper, the first which is said to be the result of an investigation in 1852 gives 3/8 to the Pollum; the told is supposed to have been the old Arcot Rupee of 175 grains. The present Company's Rupee is Estimated at 180 grains, and would seem to be the most convenient standard for calculation I observe that the Pollam of

of 3 Company's Rupees was recommended for general adoption by the committee of 1841 / Board's Circular Order page 365 / The Pollum in use in the Bazars of the Sub Division is found by Mr Donell to weigh 3 Rupees 2 annas, and that used by Goldsmith to weigh exactly 3 Rupees, of the Coinage of 1840 Those tested by me however weighed in the Goldsmiths scales 3 Rupees 1 Anna, and in the ordinary bazaar scales, exactly 3 Rupees.

3 With regard to grain measures the statements given in the Board's paper agree almost entirely with the results of a personal scrutiny which I have already communicated to Mr. Bayley in a private form those which are now submitted in the tabular statement are to be understood as in addition to the information already supplied I was particularly anxious to ascertain something more definite in regard to the half Mercall or Vellum as the same measure is called in different talooks of this District, but my endeavours have not been very successful. The local half Mercall and the Vellum appear to be the same measure, and contain somewhat more than the Madras half Mercall The Vellum is certainly of older date and the half Mercall a recent introduction, but nothing positive can be ascertained on the subject. The results of the examination in different talooks seem only calculated to mislead. I found however

Division is found by Mr. Donell to weigh 3 Rupees 2 annas, and that used by Goldsmith to weigh exactly 3 Rupees of the Coinage of 1840. Those tested by me however weighed in the Goldsmiths scales 3 Rupees 1 Anna, and in the ordinary bazaar scales, exactly 3 Rupees.

3 With regard to grain measures the statements given in the Board's paper agree almost entirely with the results of a personal scrutiny which I have already communicated to Mr. Bayley in a private form those which are now submitted in the tabular statement are to be understood as in addition to the information already supplied. I was particularly anxious to ascertain something more definite in regard to the half Mercall or Vellum as the same measure is called in different talooks of this District, but my endeavours have not been very successful. The local half Mercall and the Vellum appear to be the same measure, and contain somewhat more than the Madras half Mercall. The Vellum is certainly of older date and the half Mercall a recent introduction, but nothing positive can be ascertained on the subject. The results of the examination in different talooks seem only calculated to mislead. I found however

+4 Madras Measures ——— / Vellum
2 Vellums ——— / Mercall
12 Mercalls ——— / Candy
100 Mercalls ——— / Garce

however in a letter written by Mr Hyde to the Board on 18th October 1822 the table entered in the Margin, from which it would seem that the Vellum was considered to be equivalent to half a Madras Mercall, as the local so called / Madras Puddie is actually a larger measure than the true Madras Puddie - so the Vellum which contains 4 Puddies more capacious than the Madras half Mercall. But the capacity of the Vellum, or ½ Mercall, varies apparently in every Talook, in a greater degree than can be accounted for by the mere difference in the mode of measuring or weights of grain used.

4 The form of most of the measures in the District, which are not true Cylinders, renders it impossible to calculate with accuracy their cubical contents. The weight of water contained in each is given however, and care was taken to see that each vessel was sound. Uniformity in the measures of the District is most desirable. The great variety which now exists serves no purpose but to confuse and mislead.

5 The Board's statement regarding the liquid measures is correct. A list of the names of each weight grain and land measure written both in Tamil and English accompanies this letter as required by the Board.

To

G. S. Forbes Esqr

Secretary Board of Revenue

Fort St George

Bd No 7032
From the Collr
Sea Customs -
Madras

Sir,

I have the honor to enclose copy of a letter from the Collector of Customs of Calcutta and to report upon the papers noted in the Margin.

The communication from the Trade Association to the Board of Revenue arose out of a purchase of skins which were undervalued which induced the belief that a change in the Sea Customs Regulations would be beneficial to trade, and accordingly the Trade Association solicited that Merchants might be permitted to amend their valuation where no prima facie evidence of fraud exists. To give force to this request the Secretary Trade Association quoted Sections 20 and 22 Acts and 9 Vic: chap: 86 as given in Clements' Customs guide.

3 Nil.

Referring to the letter and to the

Fort St George 30th March 1838

the Extracts from the Orders of the Commissioner of Customs and the act of Parliament the Secretary to the Trade Association, it will be seen, refers to 8 and 9 Vic: Chap: 86 whereas the Customs consolidation acts are 16 and 17 Victoria Chap 107 and 18 and 19 Victoria Chap 91.

The Law referring to undervaluation is 16 and 17 Victoria Chapter 107 Section 57 which differs from the Law quoted by the association and is in fact very similar to the Law prevailing in Calcutta. The rule prevailing in London is when Officers detain goods as under valued, they shall forthwith give notice to the party entering the same, stating the value thereof as estimated by them, personally or by Post, reporting the circumstances of the case within 24 hours to the Board and the Commissioners shall within 7 days determine either to deliver them on the entry or retain them for the use of the Crown. By Boards Order 21st November 1841 the Collector and Comptroller may permit the amendment of

Extract from Waterside practice extracted from Bradell's British Tariff

Fort St. George 30th March 1858

of entry where the duty does not exceed 10 £ taking a deposit not exceeding 2 £ to abide the Boards decision, or the Commissioners upon application may allow the importer to amend his entry upon such conditions as they may see fit.

5 This latter clause is not contained in the Calcutta rule which Respectfully recommend may be adopted here, the Collector being required to report the detention of the goods within 24 hours

6 Under the practice which prevails in this Office a margin of Twenty five Per cent is allowed Unless the undervaluation exceeds this the Officers of the Department take no cognizance of it and when the undervaluation is in excess of this, it is reported to the Collector. Unless the undervaluation exceeds 50 Per cent he never detains any article. The practical effect of this Rule has been that in every instance in which a reference has been made to authority respecting goods purchased as under-valued the Collectors decision has been confirmed

7 The Board are aware that no inconvenience

Fort St. George 30 March 1858

inconvenience has been sustained by a decision upon this subject not having been given at an earlier period no case of detention has occurred to call for notice and the [illegible] purchase of goods on account of Government has been for years so rare an occurrence that I have not considered it advisable to make any reference to Government on the subject. It is however satisfactory to learn that in consequence of the present application some period will be fixed within which a final decision will be given

Read the following letter from the Collector of Ganjam

(Here Enter No. d/17th Feby 1858)

To,

Colonel C. E. Faber
Chief Engineer D. P. W.
Fort Saint George

Sir,

I have the honor to forward a letter from Lieutenant Blagrave with plan and Estimate for a new Tank at Boary. I have not as yet seen the site but hope to do so next week but from all I have heard I have no hesitation in giving the plan all the support in my power and express-ing a hope that I shall hear that it has been sanctioned before

I

Fort Saint George 30 March 1858

I leave the District no part of which has been more neglected than Goomsur and in no part are works of irrigation more wanted or more likely to prove profitable to all concerned.

2 From all I can learn from the Tahsildar the work will be most advantageous one, but I fully agree with Colonel Cotton that till the Collector of this district has better data to go on than he now has the real value of these works of irregation will never be known and with a view to remedy this I have written to the Board and to Mr. Newill begging in Justice to the Engineer as well as Revenue Officer that a survey and Assessment

District

Fort Saint George 30th March 1858

District may be undertaken without delay and I hope you will give your assistance in this good work. I believe the Government would benefit immensely and I believe the Ryot would also for it frequently happened when I first came to the district that ryots paid the whole of their first crop as Cist and even their profit was on the second.

3 The high prices now raling have corrected this but if they fall the same evil must occur again and therefore I am averse to Mr. Blagraves proposition to raise an Assessment on the second Crop particularly in a country like Goomsur even just struggling out of difficulties

induced

induced by poverty and ignorance and lengthened disturbance and misrule.

4 On the other hand there is I regret to say every prospect of a scarcity of water in these parts a few good showers fell about the 21st. of last month but the Country is in great need of water and I am told that on the south of the Sohurkundy and towards Sooradah the want of water is still more severely felt for this reason alone as a matter of humanity and good policy to keep the people quiet and feed them I would beg of you to obtain permission for the immediate execution of

of this work should it appear to the Collector to be necessary for the support of the population in the neighbourhood.

5 The Tahsildar's report and Memo: translate of which I send with this gives a return of 18 Villages to which water would be supplied these contain acres 1670-24- of land yielding a cist of Rupees 4869-2-4 and Enam land of 689¾ acres on which there is a Cuttoobady of Rupees 76-12-0 the greater part paying nothing whatever and on this there could be no possible objection to putting a water tax the spread of water on the other hand would cover 6 Acres of Jeroyate land of Bullepato paying 8 Rupees Cist and

Fort Saint George 30th. March 1838

and 21¼ Acres of land the enam of some Samasthanum peons producing them 37½ Rupees or thereabouts for which compensation would be required. He also reports that some land in Deggy would probably be submerged this belongs to the Daracotta Zemindar.

6 The returns from the work would be in the first instance the sum agreed on by these Villagers Rupees 1148-14- to this must be added 50 Rupees for ex waste land brought under cultivation and the Cist to be levied on Enam lands of this I cannot speak positively not having received the promised report I think a tax of 1 Rupee per acre might well be paid by the

Fort Saint George 30 March 1838

the holders of all Mokasa and Agraharam enams this would give about 300 Rupees allowing half of the land to be service Enam which it is not and putting the very moderate assessment of 4 Annas on each acre of service Enam there would be Rupees 97-7-" or altogether in round numbers a yearly return of Rupees 1600 upwards of 21 Per Cent on the outlay a return which fully justifies the outlay and is I believe below what will be the real profit when the work is completed and it is seen how many Villages may obtain water from this grand reservoir.

Ganjam District
Collectors Office
Chitterpor 17th February 1838

Signed J. W. Knox
Acting Collector

4769 Fort Saint George 30 March 1838.

PS

Since this was written I have been to the site in question which is a very promising one even to a non professional I could have wished that the Nullah had water in it all the year round but it is evident from its depth and breadth and from the statements of the ryots that very considerable volumes of water come down it during the rains and there is ample room to store this for after distribution

/Signed/ W. Knox

Acting Collector

№ 2.

Translation of an Urzee addressed by G. Babiameah Acting Jahsildar of

4770 Fort Saint George 30 March 1838.

of Goomsur to W. Knox Esquire Acting Collector of Ganjam dated Nowgam 4th February 1838 № 26.

In obedience to your orders of the 1st instant № 46 I beg to report that I proceeded to the spot where the Boary Reservoir is to be constructed and ascertained the extent of land that may be irrigated by it together with the Cist from the Curnams Dolabahaias and Ryots of all those villages which may be influenced by this work a Statement shewing the extent of land and the Cist is herewith submitted together with the Mochelkas taken from the Jenoyety villages from which it will be

Fort Saint George 30 March 1858.

be seen that the land now under cultivation and the proposed increase are as follows.

	Extent of Land acres	C.V.	V	A	P
Jeroyetty land now under cultivation	1670	24	1869	2	"
Proposed increase of Assessment on the above.	"	"	1148	14	"
Waste land that may be brought under plough	20	"	30	"	"
Enams	689	30	Income 1851	13	Cuttobady 76 14

The villagers state that the above lands may be irrigated by the proposed work. I told them that the executive Engineer has written to your Hoozoor that 4000 acres of land may be irrigated &c but they say that the Engineer &c

Fort Saint George 30 March 1858

did not ask them nor did they tell him any thing on the subject. The account which accompanied my Urzee of the 28th Ultimo N° 20 was prepared according to the Statement of the Curnums but the present one is drawn up according to the Moochilkas taken from the Curnums Dolabaharas and ryots as to the exact extent of land that may be influenced by the proposed Reservoir. It is not known that it will irrigate any more land than is given above. The accompanying account includes all the Enams i.e Service Enams of every description Cuttobady and exempted Enams. The particulars of which will be sent in a short time i.e. in 2 or 3 days more.

To,

The Chief Engineer

D. P. W.

Fort Saint George

Sir,

Rev.e Irrigation

1 Survey
1 Sketch Map
1 Plan of Sections
1 Do. Masonry works
1 Detailed Estimate
1 Abstract of Do.
1 Report

7 Seven

In part continuation of my Late Letter No. 11 dated 2d Instant forwarding Estimates for work proposed by Captain Harington on the Mahanaddy I have the honor to forward the accompanying Plans &c. &c. for the proposed new Reservoir spoken of by Captain Harington in his Diary for the past month.

2 The entire Area proposed to be submerged with the exception of a few acres paying about 8 Rupees Rent consists of dense jungle land the sides of the Hills enclosing the area of proposed water spread being of the same nature has also prevented any very accurate Estimate of contents or body of water to be stored &c. &c. to be made but the Estimated quantity is in my opinion less than what the actual storage will be found to be.

The

4

4775

Fort St. George 31st. March 1858

The lands to be benefitted are shewn in Plan and the Tanks now supplying these or which are supposed to do so are all dry or nearly so the Country is as parched and dry as is usual in May and in the event of a drought only too probable it would be as well to be ready with Some Project of a useful and profitable nature to give the Inhabitants employment or instead of when it is necessary to supply Such at no Comments notice working for a time in the dark already all chance of a dry withered Crop to these Villagers is beyond a possibility and it is a matter of uncertainty unless we have a timely fall of rain whether there will be enough water even for drinking purposes Under these circumstances and considering the double object in view in the construction of this Tank I do not hesitate either in forwarding or recommending to the favorable consideration of Government the works contemplated Captain Harington states that there would be little difficulty when once such a work is taken in hand in collecting

Collecting 4 or 500 Coolies to work with if 51,000 the work was found necessary to be commenced in the hot weather there would be little difficulty in completing the same by the setting in of the Rains thus its effect on the floods near Ashta might be noticed

3 The intention in forming this Reservoir is to store the water and let it into the Tanks below when emptied or taken up by means of proper direct Channels the Cultivation below each as may be thus avoiding great waste from evaporation by exposing a Succession of large surface of the Tanks were filled but this would be a point for future consideration

4 The supply Captain Warrington calculates as the drainage over 3 Square Miles or more and this with Colonel Cotton's Data and a rain fall on an average of 65 inches will without doubt yield a full Supply to the Tank which he considers capable of holding 1,000,000 Cubic yards this at the rate

* Not likely to be much owing to the small area drained E. M. 13.

x Lower

rate of 500 Cubic yards per Acre for a dry crop would be sufficient for 8000 acres now the Area to be thus supplied Amounts to about 6,400 Acres thus leaving a large margin for evaporation and drinking water for cattle &c. another beneficial effect it might have would be to cause the Wells of the Villagers in the vicinity to retain and Collect a Constant Supply of water We should also consider the effect of Such a work in bringing the eyes other Villages when they See its advantages in Coming forward to point out Sites for Similar works in other parts of this country a subject which it is extremely difficult to obtain any reliable information at present and thus eventually all chance of a drought or famine from partial failure of rains would be avoided I may thus Sum up the advantages from such a work to be as follows:

x Small but indirectly in preventing injury to Landsan Bank of Nullah where its waters are damaged back by a river flood 1st Jany & R. S.

1 x 2/6. The effect in lessening the floods in the Mahanuddy near Ashta

2 Securing a 2d. and dry weather crop or enabling the Eyots of Villagers to benefit and

and to cultivate sugar cane which they are somewhat chary of now attempting for fear of failure of supply of water as in the present year in these parts

3d. Securing a full and ample supply for drinking &c. purposes for cattle and man and removing all cause of serious alarm for drought

4th. The indirect effect of executing works of such magnitude upon the servile labourers inhabitants of these parts

5th. Being but a short distance from Aska the benefits that establishment would derive from the Cultivation of sugar cane in its proximity

5 I would propose some slight alteration in the Masonry works but refrain from delaying the estimates for this purpose as all such can be done hereafter without entailing any additional cost or excess over estimate and may be reported or sent in for sanction while the works is in execution The alteration I propose consists in the substitution of stone Bayads

Boary near Pilpandoo on the Road between Aska and Russelkondah

Bayals and the lengthening inwards of sluices to allow of erection of such in place of estimated and proposed wing or front walls as these in two instances would be for sometime submerged it might also be advisable to increase the thickness of Masonry in sluices to resist the great pressure there would be

6. Should the Project in its present state be approved of and I would urgently recommend that it be so I beg that conditional sanction be given for the works to be undertaken with the sanction and approval of the Collector in the event of any emergency rendering it necessary to give the Ryots employment occurring

7 I at present refrain from fixing or recommending any Assessment to give a return for the proposed outlay but taking it at the very moderate Amount of 8 Annas. per acre this would be the direct return for the outlay as the land Assessment would already have been incurred for the last Crop whatever that might have been & the return at this rate upon the Amount of estimate Rupees 7,500 would be for 6,400 acres at 8 Annas.

Rs. 3200

Fort St. George 31st March 1858

Rs 3200 or merely 50 per cent of only 1/2 Annas were imposed the return would still be very handsome or early 25 per cent but as for a portion of this 6400 Acres the supply of water might not be used the return would be dependent but under any probable circumstances which with advantages are seen the return would not be likely to fall short of 12 & 1/2 per cent as by the use of the water the Ryot by being able to command water his fields can obtain a return of about 8 Rupees or 8/2 Rupees (the profit Captain Upperton by careful inquiry and investigation has found the Ryots derive per Acre only of Cultivation oil seeds. Vide)

8 The rates allowed are those usual for works of similar nature that for earth work 1/2 Annas I consider by no means excessive as allowance must be made when Earthworks of such height has to be done

No. 81

To J. D. Forbes Esqre
Secretary to the
Board of Revenue

Rd No. 1053
From A. Newill Esqre
Director of Rev. Settlement

Sir

Reporting on the Survey in the South Arcot and Trichinopoly Districts as regards its adaptation for settlement operations proposing certain remedial measures with suggestions as to the mode of Procedure in future

Para 1 Having availed myself of the interval between the submission of the Estimates for the survey and settlement Establishments for sanction, and the receipt of orders for the contemplated extension of operations in making myself acquainted with the Survey as practically carried on in the South Arcot and Trichinopoly Districts with the view to its adaptation to the new Assessment. I have the honor to submit the following results of my observations and investigations as far as they relate to the connection of the two operations of Survey and Settlement

2. Unfortunately missed seeing Captain Priestley the Superintendent of Revenue Survey in my tour, as he had started for Madras a few days before I left Arcot

his Assistant Lieut Hervey accompanied me thro' many of the Villages that I inspected and afforded me every possible assistance from the Survey Department

Cariapudielonda Codaruvanai Ram Tripapolwar

3 On my arrival at Cuddalore I selected a few Villages in that neighbourhood and with Lieut Hervey proceeded to trace out the new Survey fields from the maps, field book and registers and to compare with them the existing fields and holdings as they actually appeared I then encamped for a few days at Coodeecund in the Cuddalore Taluk and went over almost the whole of this large Village containing upwards of 3,000 acres with the maps and Registers This Village was the one selected by Mr Grant Additional Sub Collector for the restoration of the marks of the new Survey fields, and therefore afforded some facilities for my purposes

Cumbipovrum Pelunajeya Pillow

4 I then proceeded to the Chellumbrum Taluk, and encamping at Unnapettah selected 4 or 5 Villages in the neighbourhood and went over the whole of the boundaries of the

Nabipovrum Ennyatipovrum

with the Maps and Registers Thence I went to Mannargoody and selected 2 or 3 Villages in the same manner in that Taluk, and also 2 Villages as specimen of the Pallimally Zughire which lies in that neighbourhood I then passed through the Mannargoody Taluk to the Lower Coleroon Anicut which afforded me the opportunity of inspecting a few Villages of the Codiarpalliem Taluk of Trichinopoly surveyed last year Thence I moved into the Palliemcottah Zughire and encamped in one large Village of it and passed on to the Vellore Anicut from which I inspected some others belonging to the same Estate

Vanamadeny Illeiver Boothungoody

5 I thus afforded myself the opportunity of becoming acquainted with the Survey in all the principal localities to which it had been applied in South Arcot, and also in one of the Trichinopoly Taluks, and seeing to prolong my tour beyond the probable period of the annual sanction for the organization of the Establishments I returned after an absence of 5 weeks The inspection of the Cuddalore Taluk of Trichinopoly in

in my tour is not of much consequence, as the mode of operations carried on there is precisely the same as that observed in some of the localities I scrutinized.

Having thus sketched the means which I took for forming a judgment as to the adoptation of the Survey to settlement operations, I shall proceed to record my observations on the several localities in the orders in which they were surveyed, noticing the different systems of details measurement adopted in each.

In discharging what I consider to be my duty in pointing out in some instances what appears to me to be modes of operation not the best suited for the purposes of the settlement I must disclaim any intention of generally disparaging the Survey, the merits of which as a whole I have now had eminent opportunities of observing, and it needs not any testimony to be pronounced, the best Revenue Survey that has been introduced in any of the Presidencies for the purpose of field

Assessment. It does not fall within my province to pronounce commendation upon the higher professional parts of the Survey in its connection with Trigonometrical operations and the accurate deduction of areas from the Major and minor traverses but it is mostly with the details of field measurements, in which the greatest amount of difficulties has been experienced that I am concerned and if in the secondary, though in some respects not less important part of the survey, it should not appear that in every case the most perfect results have been obtained for settlement purposes, this must not be allowed to detract from the general character of the Survey, and the fault moreover does not seem to be with the Survey Department, for it is only fair to add that while a most indomitable spirit of preserving energy has been exerted to overcome all obstacles as they arose in the earlier stages of the

the survey due regard seems to have been paid to the approved orders and directions of the Revenue Department, although in some cases misapprehension has occurred and in others there has been the want of that definite expression of what was required from the Survey Department, which was essential to its operations being carried on with the certainty that they would produce the results best suited for the superstructure of the Assessment.

8 Having thus, I hope guarded any remarks from misapprehension I shall proceed to comment on the several Villages, which came under my observation and which I believe may be taken as fair specimens of the whole and to propose such measures as seem called for the perfection the Survey and render it available for the purposes of Assessment concluding with a few suggestions as to future procedure.

Palamcotta Zaghire

9 The Palamcotta Zaghire was the

the first locality selected for Survey, and the work was carried on in 1833 and 1834. It contains 44 Villages and has also been assessed by the Collector judging from the Villages Pattas, the survey appears to be perfect and exactly suited for revenue purposes. Every field has been measured and mapped according to existing boundaries, which in this locality appears to be particularly regular and a person may rapidly go over the fields comparing them with the delineation on the map without the least difficulty or uncertainty. This estate may I think be held up as a model of Survey observation adapted to revenue purposes.

Vanamadeny
Ullicor
Boothungoody

10 In some places there are good substantial fences which are the best possible boundaries, in others where all the lands are cultivated the outer many ridges of the fields are all appurtenant and have been carefully regarded by the ryots. In such cases and where the fields

fields are small, the planting a simple shrub, of which there are several varieties suited for the purpose, on each Corner will be a popular and sufficient means of perpetuating the boundaries. In more scattered cultivation, the planting or ridging for a few yards at the Corners as prescribed in the demarcation rules is necessary. I have Communicated with the Acting Collector on the subject and trust he will be able to make arrangements for completing the marking of the fields where necessary, which at the early stage of the Survey operations was not much attended to. To this circumstance of the fields being measured according to their distinctive boundaries is to be attributed the fact of the Survey retaining a permanent Character notwithstanding the omission of any special mark to be inserted the perishable page hereafter for the measurement.

11 The Survey through most

	Villoor	Boothergoody	Comarapoody
Area	605	547	658
Deduct for Roads &c	213	91	187
Cultivable	392	456	471
No. of Survey fields	400	411	458
Average in Cawnies	97	1.1	1.09

most successful in its results appear to have occupied an disproportionate length of time owing to the Survey department being at first only imperfectly organized. The size of the fields although bearing a favorable Comparison with those in other localities is somewhat small for Poonjah lands. In the 3 Villages noticed marginally the fields average a trifle above or below were there being no poonjah lands under regular irrigation.

12 The following Statement shows the particulars of holdings in this locality

	Villoor	Boothergoody	Comarapoody
Cultivation of fasly 1266 in Acres	341	409	2297
Number of fields	333	371	298
Number of holdings	354	382	603
Average holdings in Acres	96	107	49
Number of puttadars	73	65	42
Average aggregate holding of each Do in Acres	467	629	707
Average Number of holdings of each puttadar	5	6	14

On the first two Villages the number of fields held under more than one puttah is

in considerable, in the last the average is more than 2 holdings to a field, but even this forms a favorable comparison with the Villages of Chellumbrum which will be presently noticed

Kollamally Vaykire

13 The Villages of the Kollamally Vaykire 30 in number were Surveyed in 1854 upon somewhat different principles as regards the details. The new Survey fields were laid out in large quadrilateral figures in an arbitrary manner without much regard to existing boundaries of fields or holdings, and the several holdings were roughly Sketched in the new Survey fields. In Sevvoomalaxtunum which is one of the Villages I went through as a specimen it was found in many places that scarcely one of the 4 Corners of the Survey fields delineated in the Map fell upon a Corner of any existing holding and

and through some unaccountable confusion It was also evident that in the majority of cases the holdings had been Sketched in wrong as regards position shape and numbers in the Survey fields. Some Changes may however have taken place since the Survey was made Scarcely a single mark of the new Survey fields was discernible so that to trace them out it is necessary to measure out the sides from the fieldbook which can only be properly done by the Survey department This Village is Shaped in extreme case, though in some measure an example of the mode pursued in others of this Jaykire, and it would be quite impossible for revenue servants with the Maps and field registers to trace out the delineations for assessing purposes without aid from the Survey Department—

14 In some of the Villages of this Jaykire the holdings have not been Sketched into the Maps. The Village of Ramancolum is one of this Kind, and in it the Abl— boundary lines seems to have pretty well

well regarded and from its small size and a large well defined mamicum running thro' the midst of it, there was no difficulty in tracing out the Survey fields with a chain in the absence of any marks. In no part of this Taykire have the Village boundary pillars been built The theodolite stations are marked with earthern mounds, but the pegs in the centre to show the exact point must have long since rotted as the Survey was made in 1854. The Ryots have no accounts of the Survey and as no marks whatever of the new Survey fields are to be found and they do not generally follow the lines of the old fields, the Village Officers know little about what has been done and the fields will have to be measured out from the field books not marked before any tangible basis is afforded for assessing operations. The remedial measures for this Taykire will be similar to those required for the Cuddalore Salem R

Salem Road will be noticed presently in connection with it.

The Survey in the Cuddalore 15 Villages 37 Villages

The Survey in the Salem R was made in 1855 on the same plan as in the Kallacurchy Taykire except that no attempt was made to sketch the holdings in the Survey fields It has already been brought to notice by Captain Priestly in his report on the Survey for para 70

1855 quoted in my letter of 10th October para 20

last that the boundary marks of the fields have been entirely obliterated They consisted of little wooden pegs or small mounds of a handfull or two of earth, and no arrangement seems to have been made for perpetuating them after the Survey Officers left the work In the Villages Examined near Cuddalore there was no trace to be found of the marks but the Survey Ameens who originally measured these happened to be at hand, and with their assistance in previously going over the ground, I was enabled to

to trace out all the Survey fields.

16 It would seem that in this locality the Survey proceeded on the principle of throwing over the Villages a net work of graduated lateral figures ingenuously contrived with the primary view of making them all meet in their proper places in the Village maps. A glance at most of the maps will indicate this state of things. This however I believe was carried to a much greater extent by the Subordinates of the Department than was contemplated by the Survey Officers and the extremely scattered localities of the Survey in 1855 prevented that perfect Supervision which might have controlled this practice. Subdividing out these new figures constituting Survey fields, some respect has been shewn to existing boundaries of holdings but it is equally true that in numerous instances the holdings have been arbitrarily cut thro' so as to retain more

more convenient forms of the Survey fields.

17 The lines of the new Survey fields have in many instances also been drawn irrespective of the nature of the lands whether Punjah or Sunjah for example portions of the punjah fields of irregular shapes have been measured into Sunjah fields. In some cases it happens that manians have been thus mixed up with Government lands which complicates the matter still further. Again in the

B. J. Cockburn

parts of the country not fully cultivated are Surveyed in some places in very large fields of 15 to 30 Acres. In these there are perhaps 2 or 3 puttahs or patches of cultivation making up 3 or 4 Acres out of the whole field. The whole of these large fields are colored as punjah cultivation and they are not thus correctly represented. The patches of cultivation in this Nos. do not always lie together and their being clubbed together in so wide a range leaves great room for concealing cultivation which can only be

be checked by the Curnums frequent mea-
surement. In numerous instances
pernimbo Re. such as roads Channels
jungle &c have been included in the
same field as cultivated without any
clue to enable the revenue authorities
separate it in the accounts. This how-
ever is contrary to the printed Rules
of the Survey Department.

18. The fact is that the new
Survey does not as a rule delineate the
natural boundaries now existing tho'
there are perhaps sufficient instances
of these coinciding with parts of the
new Survey fields to trace the connection
between the existing state of things
and that laid down on the Maps
Could a radical change have been
effected by getting the ryots to abandon
their old limits and to form more con-
venient fields in the way laid down
in the Survey, the result would have
been admirable, but this is simply impractic-
able where fields within Ryotwar
natural limits have been used
sufficient

sufficient value for the ryots to maintain their
right of occupation. The arrangement of survey
fields simply in a professional view of securing
successful results in plotting and mapping is
worthy of every commendation. But as before
observed the settlement Officer must often
find the greatest embarrassment in basing
his operations on this frame work.

19 That the cutting up of holdings in
the manner above described should have
caused a great outcry on the part of the ryots
and excited opposition on the part of the Village
Officers is not surprising. They seem however to
have been in a measure pacified by the explanation
of the Survey Department that altho' their holdings
were cut up into parts and they would have two
or more entries instead of one in their puttahs
and in the accounts the intersecting survey lines would
not disturb their occupation.

20 Instead of the ryots sympathies being
enlisted

enlisted in the demarcation by the new survey perpetuating their existing boundaries, they are naturally averse to fixing marks which split up their holdings and cannot be appreciated by them. This course is seriously opposed to the success of the survey as regards its permanency. I am also disposed to doubt whether act XX of 1855 contemplated the perpetuation of arbitrary marks of the nature, tho' they will probably be included in the general terms employed in

21 The survey officers in splitting up holdings in the formation of new survey fields no doubt considered themselves, acting in accordance with the revenue usage of the South Arcot District, puttas being given for holdings as parts of fields of whatever size, but it has been lost sight of that has tended greatly to aggravate the evil of the multiplicity of the subdivisions of fields, and one for which the survey should afford some remedy or alleviation. To what how far the evil in question exists

how far it has been aggravated by the new survey fields, I may mention that the Acting Collector's letter dated 30th January 1858. informs me that at least in one Talook no less than one third of the fields are subdivided into separate holdings, and that I find in the single Villages of Coodecaud containing 3000 acres no less than 220 holdings have been cut up by the mode pursued in the Survey.—

Former proprietary fields ... 3494
Holdings or subdivisions of the 3 of these cut up 220. ... 1115
new survey fields ... 3964

22 In dwelling upon what I consider to be the greatest defect in the survey, I shall not I hope be understood as imputing blame to the Survey Officers, whose Zeal and Skill in the professional conduct of the Survey have been deservedly commended, and whose arrangements in the demarcation of the lands unguided as they seem to have been by proper revenue authority were doubtless well intentioned. At the same time, it is due to the settlement department to point out the great difficulties under which it will have to carry on its operations. These observations also

are

are mostly restricted to the work of 1855 in which however the same plan was extended to about 100 Villages of the Sumcarapoorum and Chec Kadj Jaghires lying in the Talooks of Calla coorchy Trikalore Yellavanasore Perovumnamully

23 The rule of clubbing together small patches within 1 acre of punjah and 2 acres of punjah requires notice here. This has been widely departed from in the Cuddalore Villages, and holdings making 3. 4. 5 or even nine acres of punjah have been clubbed into one survey field. In some cases the holdings thus clubbed have themselves each or several of them exceeded the prescribed limit of 1 acre.

24 The condition that the clubbing should only be admissible were the details of the Cusmum account corresponded in the aggregate with the Survey Area has been necessarily disregarded, as the comparison of the two accounts was simply impracticable, in as much as the survey areas are not calculated

calculated till the out door work of the season is completed, and the ameens could not be expected to go back to the Villages to pick out for remeasurement the fields for which the cusmum account and the survey account should not be found to agree.

25 The Pymash fields and their component holdings have formed the subject of much correspondence and also of misapprehension, and I may briefly allude to them here - A Pymash field is a piece of land whose dimensions and area are recorded in the accounts, with a note also of its relative position to other fields the dimensions are generally given in only two measurements one being from East to west and the other north to South. The fields are of various sizes. Sometimes they bear consecutive numbers, ... Some times they have names without numbers - A holding may be a Pymash field in its integrity or it may be apart of it, several holdings making

making up the field. Each holding is described in the puttahs in which it is included, as part of the pymash field to which it belongs, the name or number of the latter being given. Each holding or subdivision is also separately measured by the curnum for entry in the Adungul account. The total of the details of a pymaish field gathered from the adungul account do not always correspond with the area of it in the Pymash account. The puttahs are numbered consecutively according to the puttadars, and not according to the lands held by them, that is one ryot, may have 20 patches of land but they will all be included in one puttah which however as above observed particularizes the pymaish fields to which each patch belongs.

26 The old Pymaish accounts will now give place to the new survey accounts and all that is necessary to preserve a connecting link between the two so as to trace out former any rights that may be contested in suits in the Courts

Courts is the entry in the new field registers of the Pymaish numbers or names to which each new survey number or its constituent parts belong. This has been done in some instances, but has been omitted * in others. The Government have already directed that any attempt to trace out entire pymaish numbers for survey should be discontinued. Every good purpose will be served by making the separate holdings into which they are divided the basis of the survey.

* Cuddalore
Palamcottah
* Chellumbrum.

28 It remains now to consider what remedial measures should be adopted for rectifying the defects above pointed out in the Cuddalore Villages and the Kolliedmully Jaghire above noticed. That the survey fields can in most instances be traced out by the Survey Department is not to be doubted but as the lines will have to be almost throughout chained from the entries in the field books the labor will be considerable, but this will save the further trouble and expense of newly plotting and mapping the whole in the alternative of a

a resurvey denovo. I have requested the Acting Collector to make the experiment by employing a few extra servants in the manner contemplated in the Demarcation Rules and engaging one or two persons from the Survey Department to aid them. Two of the Villages I went thro' and also a third had been retraced and marked with suitable ridges when I passed thro' Cuddalore on my return, and there seemed a prospect of success particularly in the smaller Villages as the exterior boundaries form definite points from which to fill in the lines of the survey fields. In the larger Villages the matter will be more difficult as may be judged of by Mr Grant the additional Sub Collector taking more than a month for this work in Coodicaud. The above

Specimens

Specimens of retracing and marking the fields which came under my observation are satisfactory and I trust the Government will approve of the expenditure which will be incurred not exceeding Rupees 30 a month until the new establishments are sanctioned

28 I have given the above subject consideration in connection with the Superintendent of Revenue Survey and Captain Priestly maintains the feasibility of retracing the survey fields generally, admitting also the probability of a few of the more complicated Villages having to be resurveyed particularly where the survey fields are arbitrarily laid out.

In other cases he proposes also that the maps and field books should be corrected On the Spot, where great deviations have been made from existing boundaries

29 To accomplish this, it will be

be necessary that some hands from his department should be detached on this duty and associated with the classifiers of the settlement department who would take care that the boundary marks are attended to. It seems hardly fair that the survey should be charged with the cost of retracing the fields as it was not in the power of that Department to enforce the perpetuation of the boundary marks and if the charge is incurred under the head of demarcation I fear it will absorb much of what is required to prepare new ground for future operations. As the ryots are partly to blame in not marking their fields as they were generally directed to do and as the charges for boundary pillars will not be considerable in these localities, the cost of this additional works may I think be fairly recovered in the same manner as the expenditure for the pillars by a deduction from the amount of assessment to be reduced in the first year of the new settlement.

30 The survey fields being thus retraced, it becomes necessary to provide for the adjustment of the details of the holdings composing them. The Curnums accounts in most cases do not give the details of holdings sufficiently accurate to make up the aggregate of the survay fields, and the discrepancy has been much increased by the arbitrary cutting up of holdings and the curnums entering the area of these partitions only by guess. Recourse must be had to detail measurement in many cases and this must be left to the Curnums as a matter of revenue account. The Curnums should be provided with copies of the field books and registers, and make their detail measurements simultaneously with the retracing of the survey fields above described. This will give them an interest in and acquaintance with the work, which they had not before, and will I hope enlist the

the Sympathies of the ryots in it as they will
thus have some definite idea of the survey pre-
sented to them associated with their
exciting holdings. To employ the survey De-
partment on the details of holdings will be
out of the question on the score of expense.

31 Not only for present purposes but
also for future use, it will be necessary that
the Cumums should be supplied with measur-
ing Chains of the acre standard The simplest
and Cheapest
form of these is to Bamboos joined together by
iron ferrules and swivel joints. The graduation
into links may be marked on the bamboos
which will thus be each 10 links These were
Successfully tried by the Survey class in
Guntoor, and have the advantage of
Stretching less than iron chains as well as
that of economy I have ascertained that they
can be made up in Trichinapoly in large
numbers at the cost of 2 Rupees each and
conclude

From Colln
3d February
1858. No 26.

Conclude they would not cost more in south
Arcot. The Villages surveyed in 1855 on the
plan above described and those of the Rolli
mally Taghire surveyed in the same way
in the previous year are about 174 and in most
of these the detail holdings will have to be
measured by the Cumums. It may also
be necessary to adopt the same course in
a few villages of Munnargoody. I would
therefore request sanction for Rupees 400,
for the purpose of furnishing the measuring
Chains now required. This Charge may per-
haps be dealt with in the same way as the
cost of boundary pillars.

32 Another matter which requires
rectification in the Cuddalore Taluq Panel
probably in some of the other localities
now under consideration is the boundary
pillars, which in many instances have been
built by the Talookdars on the wrong spots
Instead of being placed on the Theodolite
Stations, they have been in some cases put on
the offset angles and in others at random
on

on the boundary line. They thus do not fulfil the purpose originally intended of affording the means of accurately connecting the different part of the survey though to they form Village boundary marks even generally. I have conversed with Captain Priestley on this matter and concur with him that it will not be necessary to rectify such Villages, as the trouble and expence would be considerable, but that the pillars on the external boundaries of the Talook and Zemindaries should be examined and rectified. This will probably prevent any serious difficulty in connecting future work with what has been done.

Chellumbrum Talook + Villages

33. On the Chellumbrum. For this Talook another system of measurement was pursued. The survey fields were laid out as before in large quadrilateral forms which seem to have succeeded better with boundaries of holdings than in Cuddalore though in some cases the new lines run arbitrarily through holdings. Every holding was then measured and mapped in, so that the evil of cutting up the holdings in places was not so serious as their component parts were accurately recorded in the new numbers to which they

they were allotted. There is however this inconvenience that some of the Major lines of Survey fields depicted in the maps have no corresponding boundary ridges on other well defined marks on the ground. The Survey fields and also the holdings were marked at the time by small mounds, but these are lost in places and are of a very evanescent nature. Steps were taken by the Collector in this case the Mannargoody Talook to restore the marks and with some degree of success, but the simply mounds of earth will not be easily distinguished after one or two monsoons, as they were not planted with grass.

34. The reason for the survey Department entering into the details of every holding however minute has been hinted at above, viz. that the conditions of the Currency account of the aggregate area of holdings clubbed together corresponding with the new survey areas could not be tested at the time of measurement, in as much as the computations are not made till all the fields

field work is completed for the season.

The Cavrunnix accounts were in many cases not sufficiently accurate and the alternative adopted by the Survey Department was the course which has led to the minuteness of detail above described.

35. On the Villages which I examined the holdings averaged in several instances for the whole Village only ½ Punjah lands, and ran on an average from ½ Acres to 1 Acre in Poonjah. I found also that the aggregate holdings of the Ryots or Puttahdars averaged 6 & 10 Acres in 2 of these Villages and that the number of holdings of each Puttahdar averaged 16 & 17. I have no reason to think that the Villages from which these results were deduced are exceptions, but that they are fair specimens of that part of the Country. In some places a single holding was split up into 2 or more new Survey fields (not Subdivisions) of so minute extent of as little as 02 or 01 of Acres.

The

The rule seems to have been observed of making these subdivisions of a single holding into separate Survey fields while several holdings are clubbed together for a Survey field and are all marked as such in the Map. This unnecessary multiplication of fields and holdings is accounted for by the Survey Department (though this does not appear upon record) in an objection taken by the Collectors department to the insertion in the accounts of the forms x 1, x 2, x 3 &c for holdings measured in 2, 3, 4 &c taks on subdivisions respectively which induced the Survey Department to put these subdivisional taks into separate fields. Thus for one holding, which required 3 taks in its measurement the account was taken at first No 101 ——— 52 ac

101+1 ——— 22

101×2 ——— 86

Total 1.60

but this plan afterwards gave place to the Constitution of the parts 3 fields, thus,

Munargoody Taluk

36 Of the Munargoody Taluk about 36 Villages have been Surveyed in the

Fort Saint George 30th March 1858.

the same way as in Chellumbrum the greater part (123 Villages) have however been measured according to the existing boundaries, but holdings have been subdivided into 2 or more fields in the way described above, in paras 35 relating to Chellumbrum. In the two Villages I went through with the Maps and accounts, I found that generally the existing boundary ridges had been respected, though in some cases an arbitrary line was drawn to form the new fields where the land belonged to one man. This unnecessary subdivision of Rymaish fields and single holdings into small numbers is the chief defect here, and though it does not disturb existing boundaries, it multiplies the details of accounts belonging not only to the Survey but to the Assessment and revenue administration generally. In the two Villages in question

	Coopumgoody	Oodiyarmelavally

Coopumgoody
Oodiyarmelavally

Fort Saint George 30th March 1858.

some care seem to have been taken in Munnurgoody to keep up the boundary marks laid down by the Survey Department, but the simple mounds of earth are scarcely sufficient, and measures must be adopted in this and the Chellumbrum Talook for perpetuating the marks by ridging and turfing at the angles of the fields or planting them with shrubs. This may be attended to by the Assessing Purtys.

37 To correct the evil of subdividing the existing fields in Chellumbrum and Munnurgoody, it will be practicable for the Assistants in going over the fields with the Maps to collect the subdivisions of the holdings thus unnecessarily made, by bracketting them together in the Register the numbers constituting one and the same holding. The fields may then be renumbered before the Maps are lithographed and the corrections may be made in red ink in the Field Registers. It will require some care to prevent confusion, but it seems very desirable to take this step to prevent the aggravation of the evil already too seriously felt of the Multiplicity

multiplicity of instances of holdings. On this view the Superintendent of Revenue Survey concurs.

Cadiss pollem Taluk of Trichinopoly

38. While at the Lower Cauberoom Aiyant Stock the opportunity of two Days at a few of the Cadian pollam Villages of Trichinopoly in that neighbourhood last surveyed last year. The plan observed in this Taluk resembled that in Mannargoy existing boundaries being generally respected and small fields are also subdivided together. The Maps and papers of this Taluk were not completed, but those of 1 or 2 Villages were forwarded to me for inspection by Lieutenant Dewey On the Villages of Sirtoor mostly throughout the whole of which I went, the field marks were in good order and likewise in several other Villages which came under observation, and I am informed that most of the 278 Villages of the Taluk, 238 have been marked in the same manner, and that the remaining 40 are in progress. So far this is satisfactory. But I return to Sirtoor mostly the

the fields seem to have been laid out with regard to the limits now existing and are generally admirably well defined by fences, but great laxity has been shown in places in including 20 or 30 or 40 feet of waste or portion of fields already well defined. This occurs frequently and in one instance with regard to a mariem No. 98 to which a portion of waste has been added in the East. The mid of one Ring one field into two when measured in two portions all subject to observation is also found here. Having an insufficient number of Maps I took Rupa Villages without one, and got the Curnum who was an intelligent man and happened to have a copy of the field register, to go through it with me and point out the numbers. This he did successfully which is a good test of the Survey being so far understood in this locality as to enable the Revenue Officers to work upon it in making the Assignment.

Nos 50, 59, 60, 57, 58, 59

Tenamanallur

Sirtoor Taluk

39. The Sirtoor Taluk of

Trichinopoly

Trichinopaly which I had not an opportunity of visiting was surveyed in 1855 in the same manner as Shellumbrum Dry in large squares with the detail measurement also of each Component holding. The minutiæ of the Survey has been extreme in some places; the following instance out of many such may be given. A dozen Consecutive Survey fields in the Village of Streeponambaum Nos 998 to 1009 Contain an aggregate area of 6¾ Acres subdivided into 90 holdings averaging -07 of an acre each the average number of holdings to a Survey field being 8½ and the average size of these Survey fields being -54 Acres

40 The Survey having been noticed as far as the circumstances of my tour allowed me the opportunity of judging of its suitability for the formation of the Assessment and the remedial measures which appear to be required having been pointed out it remains now to draw some general conclusions from

from what has already been done as to the mode best suited for future operations.

41. The Survey so far must be considered experimental. It has passed thro' different phases in the various modes of detail which have been above described. The difficulties the Department has had to contend with have been considerable in the rapidity of training from the first every hand that has been employed, their inconvenient position held by the Survey Officers with regard to the local revenue authorities upon whom they were dependent for the information requisite to the progress of their work, and over whom they had no official Control, the impossibility of any European Revenue Officer being deputed to accompany the Survey Camps and the general want of a definite expression of what was required from the Survey Department, the many vexatious annoyances from the Village Servants, who not being interested in the mode of survey adopted but Red upon the Surveyors as interlopers, and lastly in the extreme complication of

Fort Saint George 30th March 1858.

of the land tenures of the District in the minuteziges of the holdings, but the measure of success with which it has proceeded thro' the ordeal warrants the conclusion that it will be found fully competent to the extended task now before it, whose as far as can be foreseen will certainly be attended with more favorable Conditions.

42. As regards the work of the present season in Trichinopoly the former evils above noticed of diverging existing boundaries and cutting up holdings into parts of new Survey fields the mingling pormuttah with cultivable lands &c the necessity of observing the prescribed minimum size of holdings for measurement with the view to meeting the orders of the Government of India contained in Extract Minutes of Consultation dated 11th January 1855 have been brought to the notice of the Superintendent of Revenue Surveys and will doubtless meet with due attention in the arrangements for the year and any further radical changes in the modus operandi for these

No. 40

Compd ER

Fort St. George 30th March 1858

commenced would not be expedient.

43. In the organization of new Survey parties for Rajahmundry Masulipatam or elsewhere the case is different, as the local circumstances of tenure &c are not the same as in the Carnatic, and in extending the Survey, the plan of operations should be so formed as to embrace all the essential objects of a Revenue Survey and assessment as well as the accurate geographical delineation of the country with its topographical features in connection with the grand Trigonometrical Survey.

44. It seems unnecessary here to expatiate upon this subject, but the following may be mentioned as some of the chief objects to be kept in view. The perpetuation 1st, of Village boundaries 2nd of the minor circuits within the larger Villages and, 3rd of the field measurements. The first has already been sufficiently provided for except that as suggested by the

the Superintendent of Revenue Survey the trijunction boundary pillars should be somewhat increased in size and special care and accuracy be employed in fixing the two pillars adjacent to them.

15 The minor circuits within the larger Villages are at present intirely lost for future purposes, as they are generally employed to give the contour of tracts of waste and to check the field measurements, but have never been permanently marked on the ground. It is obvious that they would be of immense advantage for regulating the detail measurement of waste which may hereafter be brought into occupation and where they form the subdivisions of extensive tracts of cultivation, the perpetuation of these limits will be a valuable basis for any re-measurements that may be hereafter required from any extra-ordinary disturbance of

of the existing boundaries of fields on their being thrown out of Cultivation, by inundation famine &c. I pressed the importance of thus extending the permanent boundary marks in my Report of 16th October last, but the Subject has been noticed neither by the Board nor by the Government in their review of the same. The Superintendent of Revenue Survey concurs in this proposition for the general adoption of minor circuit of Villages as facilitating the plotting and the requisite arrangements Para 18 can be made in connection with him, the additional expense of marks will not be considerable, as it is proposed to employ Stones or to have small masonry blocks made for the purpose which can be transported to their places. The perpetuation of the professional Survey in Such a manner as to be considered certain and permanent cannot extend to the field boundaries as these in many parts of the country

must

must necessarily be only of a temporary character and be subject also to change under transfers of land and other circumstances, and to make the limit of the permanent demarcation as wide as the exterior Village boundaries would be, to stop far short of what is requisite and what is easily attainable in the Subdivisions now projected. With these permanently marked, the re-measurement of fields at any future period would be simple and easy and such as an ordinary agency could accomplish whereas it would require much more skill to fill up the detailed field measurements of a large Village from the exterior boundary alone.

by pillars

46 With regard to the field boundaries it may be observed that with the innumerable petty holdings in South Arcot and Tuchinopoly it would be too much to expect that under the ordinary changes of occupation continually taking place

place the outline of the maps would after a period of 10 years be found to accurately represent the actual details of the fields, notwithstanding their demarcation at the time of survey. The expediency also of perpetuating the present minute subdivisions of lands with rigid attention, even if it were practicable, may also be questioned, as its tendency is to check the growth of holdings of a larger and more reasonable size. Such means as are available should doubtless be employed in giving the demarcation of fields as permanent a character as possible but it is to the permanent marks of the minors Sub Divisions that we must look, as the basis both of Stability of the details of fields – and as likewise of the expansion of holdings into moderate Sized farms.

46 The regulation of the size of Survey fields with reference to the convenience of Cultivation in suitable plots, the facility for transfer of land for the growth of moderate Sized farms and the absorption of the

must necessarily be only of a temporary character and be subject also to change under transfers of land and other circumstances, and to make the limit of the permanent demarcation as wide as the exterior Village boundaries would be, to stop far short of what is requisite and what is easily attainable in the Subdivisions now projected. With these permanently marked, the re-measurement of fields at any future period would be simple and easy and such as an ordinary agency could accomplish where as it would require much more skill to fill up the detailed field measurements of a large Village from the exterior boundary alone.

× by pillars

46 With regard to the field boundaries it may be observed that with the innumerable petty holdings in South Arcot and Tinnevelly it would be too much to expect that under the ordinary changes of occupation continually taking place

place the outline of the maps would after a period of 10 years be found to accurately represent the actual details of the fields, notwithstanding their demarcation at the time of survey. The expediency also of perpetuating the present minute subdivisions of lands with rigid attention, even if it were practicable, may also be questioned, as its tendency is to check the growth of holdings of a larger and more reasonable size. Such means as are available should doubtless be employed in giving the demarcation of fields as permanent a character as possible but it is to the permanent marks of the minor Sub Divisions that we must look, as the basis both of stability of the details of fields - and of liberation of the expansion of holdings into moderate sized farms.

46 The regulation of the size of survey fields with reference to the convenience of cultivation in suitable plots, the facility for transfer of land for the growth of moderate sized farms and the absorption of the

the numerous small holdings prevalent in the South into fair sized fields is another essential object of a Revenue Survey. In the course hitherto pursued, this point has been practically lost sight of the Survey has cut up numerous holdings already too small, and in other cases the new Survey fields have been laid out with out any definite plan and embrace more holdings than are likely to be consolidated under one occupant, and again in a few cases are too large for the convenience of transfer without Sub. Division. The permanent demarcation as above proposed will be a Suitable basis to Subserve this object but the question arises as to how far the detail measurements Should be carried out professionally and what rules Should be laid down for forming Survey fields. For the present operations in Pachimpotz where the holdings are Small, the present Rule of a minimum of 1 and 2 acres for the Survey of wet and dry

dry lands and the maximum of 4 & 20 acres for the same will probably be found sufficient to Regulate the Survey details for the present season; but circumstances may require a modification of this in Rajahmundry and elsewhere, The variety of tenure and of local usages renders it impracticable to make Rules arbitrary for all districts alike, but further particulars cannot be laid down at this stage. The Sub Division of land as far as their Revenue Responsibility is concerned will hereafter be checked by rules applicable to the new Settlement, but I would Suggest for the consideration of the Board that it would be very desirable to check the further progress of this evil, which has yet much time to extend itself, before the Survey reaches many of the Districts by prescribing a certain limit within which

× Perhaps 10 or 12 acres will be better suited to this Country.

which no Revenue responsibility of the land should be divided and also by prohibiting the taking up of land below a fixed minimum. I should not I hope, be considered as going beyond any proper province in this suggestion, as the evil to which it refers is one that I shall have to meet in the Course of future operations. In the Salem District, as the Board are aware, no field is allowed to be sub-divided into separate holdings under distinct Puttahs, although this plan could not be arbitrarily enforced now in some of the southern Districts, it seems to me to be the mode of Ryotwar tenure, and to be kept prominently in view in the Revenue Survey and administration, In Kurnool also the present practice is not to allow land

land to be taken up in smaller divisions than 5 acres for Poonjah. In Guntoor, I believe a still larger extent has of late been observed for the minimum of new occupation. In South Arcot also the Hoo Kummah prescribes a limit but I am not sure that this is observed in practice

47 It will be expected that I should notice the preliminary arrangements of classification and assessment, directed to be made in the Chellumbrum and Mannargoody Talooks and for which an additional Sub Collector was appointed to South Arcot on 6th January 1857. The correspondence on the subject shews that the Collector looked for some definite plan of procedure to be laid down by the Board of Revenue, and applied for an

Encs: Mr. Cons. dated 7th February 1857

* 7th 9th 26th February and 7th April 1857

an Extra Establishment for the purpose-
X Board's Rec. 7th March 1857 the subject was submitted for the orders
of Government which were conveyed in
Extract Minutes of Consultation 2nd
April 1857, but no further steps appear
to have been taken. No preliminary
operations were conducted with the
View to assessment, but Mr Grant, the
additional sub collector seems to have
been engaged in Reviewing the field
dated 24th September 1857 boundaries and submitted a Report
Encl. in letter from Collector South Arcot dated 24th Instant of a Village which he had taken
up as a specimen for ascertaining
how far the survey fields were to be
found or traced out, and he was event-
-ally transferred to Salem as sub
Collector on the 29th September 1857-

Sundry Sources of Revenue.

Vizagapatam. 17th December 1857. E. E. Jr. / Signed C. W. Reade
Collector

So

Fort St. George 31st March 1858.

No. 13.

To

I. D. Sim Esqre

Acting Secretary to the

Board of Revenue.

A. after No. 556.

From the Collector of Vizagapatam.

Sir

Fort St. George.

1. I have the satisfaction to report for the information of the Board that the manufacture of new Salt in this District has sufficiently advanced to admit of the entire removal of the restrictions on the sale of the old which I duly reported in my letter of the 14th December last.

2. The Collectors of Masulipatam and Rajahmundry have both informed me that they can supply me with any quantity of Salt. I might require though not of the best kind but the cost of freight would be very great and

before

Fort St. George 31st March 1858.

before the Salt could reach this District there would be an ample supply of new Salt for both Inland and foreign consumption. I have therefore again written to say that I shall not need to indent on their Depots.

3. Should any delay occur in receiving sanction for either of the 3 projects for increasing the manufacture of Salt in the present season, there will be full time to lay in a store from other Districts to meet any prospective deficiency and after the month of April, the conveyance of the Salt on Native Craft will be both cheaper as to freight and more expeditious in transit.

Vizagapatam Salt Collrs Ct. Cutchery 22d January 1858.

To

Fort St. George 31st March 1858.

No. 24.

To

J. D. Sim Esqre

Sub Secretary to the

Board of Revenue

Fort St. George.

B. No. 829.

From the Collector of Vizagapatam

Sir

In acknowledging the receipt of your letter of the 27th Ultimo No. 347 I have the honor to state that on several occasions I have brought to the Notice of the Board the insufficiency of Salt in this Zillah mainly owing to the abolition of the Curra Sedh Cotaur near to Vizagapatam and to the great demand for Salt at the other cotars. The whole quantity of Salt manufactured in Fusly 1265 not having been received into store within the close of that year 47,191 Indian Maunds were received into

Fort St. George 31st March 1858

into store in Fusly 1266, that is in September 1856, but as the entire quantity manufactured in Fusly 1266 was stored within that year and the price was paid off, no Salt appears under the head of Igeu Salt in the Monthly account Current of September 1857 or Fusly 1267.

To Surgeon J E Mayer
Professor of Chemistry
Madras.

Sir

I have the honor to request you will favor me with your opinion as far as you can form one on the facts I am about to narrate I trust that you will not deem

Fort St. George 31st. March 1858

deem my letter unnecessary when I assure you that Government are loosing hundreds of acres of land from some chimical change in the constituents of the soil about which you probably will have little difficulty in affording me an explanation and at any rate can direct me to produce facts on which you could ground an opinion

2 Since the construction of the Anicut across the Godavery and the consequent spread of water over lands hitherto only moistened by rain there has appeared in very many places a salt in the soil which by the third year renders the ground perfectly made of all vegetation and it is supposed in a few years the land will recover its power of production I use the word salt in its popular sense the soil becomes saltish and there are at times a white efflorescence visible on the surface

3. The evil has now become so extensive that it is desirable to know its cause tho' on a very small scale it is well known to the Ryots.

Fort St. George 31st. March 1858.

4. So far as I can judge it occurs generally in the lands of Villages where salt petre is procured and my idea is that the great increase of water dissolves some constituent in the soil destructive to vegetation which was innocuous as long as it remained in a mineral state the rain being insufficient either to dissolve it or perhaps to reach it for I find there are great differences in the depth of soil which is affected

5 My opinion however is formed on no knowledge of Chemistry for I do not even know the constituents of Salt petre but I would be much obliged if you would send me your opinion and any experiments you think should be made I will carefully attend to I presume you will be able to form some opinion as to the land recovering its fertility with or without fears of a relapse

Mas. Inspector Salt Collectorate & Cutcherry at Rajahmundry 22nd July 1858

I am Sir
Your most obedient Servant
(Signed) T. I. Rhose
Acting Collector

My dear Sir

If you will have the goodness to send one two or three samples of the salt alluded to in your letter of the 22nd Instant I will examine the salt and report to you the result

Fort St. George 31st March 1858

result which I have not the least doubt will explain what it is that acts so very injuriously to the soils you have remarked on

However the last of the causes in operation will I fear do but little even when ascertained to put a stop to an evil of such magnitude as that you have described and of force sufficient to render sterile hundreds of acres of land

I have little doubt that your opinion is correct and that the salubility of some portions of the soil hereinafter increased greatly by the standing water operates determentally when the water evaporates in other words strong saline and valuteous are formed and left to evaporate on the land the result of such actions will be the death of all former kinds of vegetation while after a time a series of plants will appear - i.e. such plants only as can grow in the peculiar soil that has been unintentionally formed so what ever any new plants will grow must depend in a great measure on the nature of the saline substances left on the soil we all know that the soil around the Dead sea bears no vegetation or scarcely any and we also know what are the constituents of the water of the Dead sea it is not improbable that constituents taken up by the Godavery may be somewhat similar to those which have been found in the Dead sea speculations we however not with much especially when we can clear up the doubts attaching to the question I will therefore conclude by saying that as soon as possible after receiving such samples as you may forward to me I will proceed to examine them and

I remain

Statement shewing the amount of arrears of allowance due to the undermentioned deceased individual in the District of Masulipatam.

Number of Certificate	Name of the Pensioner	Amount of Pension per Annum	Date of Government Authority	Nature of the Grant	Period for which the arrears due	Total amount of Arrears	Explanation of the cause of suspension of payment	Remarks of the Board of Revenue	Orders of Government
1	2	3	4	5	6	7	8	9	10
	Aurudula Canara Charloo ——— / deceased / of Tiggaswamy in Masulipatam District	R A P 36 8 0	18th September 1812	Roosoonm in the Salt Department	From September 1886 6 12 to March 1857 at Rs 3-8 per Month	19 6 10	The deceased individual Aurdula Canara Charloo was the heir of Teerdhacharloo one of the Salt Poossondar transferred to this from Guntoor District, under the authority of Government dated 18th September 1812 conveyed in the Boards letter of the 21st January 1813, As this allowance was granted solely for subsistence as appears from the list which accompanied the Boards letter alluded to above, the Government in their Extract Minutes of Consultation 10th October 1848 No 1112 after objecting to the renewal of the allowance in favor of the heirs sanctioned the continuance for life of the allowances. This allowance was undrawn by the deceased Canarachar loo from September 1886 6 12 to March 1857 being 6 Months and 12 days the cause of which is chiefly attributable to the severe illness of the party, who used to attend in person at the Hoozoor Treasury to receive the allowance. He died on the 13th March 1857. The sons of the deceased who appeared before the Acting Collector claiming the continuance of the allowance to them and the payment of the arrears were duly informed of the Government order of 1848 and that the allowance could not be continued to them. As more than six months had elapsed since the last payment of the allowance to the deceased the Acting Collector requed the Board will be pleased to sanction the payment of the arrears of Rs 19-6-10 to the recognized heirs of the deceased Canarachar loo —

Enclosure No 1
Case No 5 of 1857.

Complainant — Defendant

Djedavelly Mulliah — Cuttamony Venkatasawmy

Suspended Tahseldar of Juggiahpett

Charge

With having on one occasion about a month or a month and half previous to 31st December 1857 in the Town and Talook of Juggiahpett received from the complainant a bribe of Rupees 50 on the condition that the Defendant Tahseldar would afford aid to the complainant in deciding a dispute between him (complainant) and his co-partner Sembiah regarding the Agraharum lands of Anlopand in the Talook of Juggiahpett as well as to cause the said Sembiah to pay the sum of Rs 105-6-8 due by him to complainant for fasles 1265 and 1266 as per a separate account filed in the Record on account of the said Aggraharum

being

Being an offence of 1st Class

Complainant states as per tenour of the charge and admits that he paid a bribe of Rupees 50 to the Defendant which he is able to prove by 1st and 2nd Witnesses —

1st Witness states he was aware of the dispute existing between Complainant and his Co-partner Sembiah regarding an Agraharum that he (Witness) accompanied complainant to Juggiahpett when he went to see the Defendent (Tahseldar) that on this occasion complainant paid Defendant a bribe of Rs 50 as the condition of Defendant deciding Complainants case in his favor Witness describes the position and dress of Defendant the time when and the manner in which the Rupees were given to him by the complainant.—

2d Witness corroborates the statement of 1st and explains his reasons for going on the date in question to Juggiahpett.—

Defendant closely cross examined the two witnesses as to the time when he is alleged to have received

Fort Saint George 31st March 1858

received the bribe the dress he wore at the time the place where he received it his position and on almost every particular but without effect for in no one instance did the testimony of the two witnesses disagree I have to observe that complainant came to me on the morning of the 4th December as I was riding to Panoogunchepole and narrated to me a portion of these circumstances I told him to come to my tent at Mahl with his witnesses when I would make a full enquiry. The Witnesses made their appearance but the complainant was no where to be found. However on the Deputy Tahsildar representing to me that the Complainant had been kept from coming to me, I examined the witnesses and called on the Defendant for his reply. His defence was a simple denial of the charge and the usual plea that it had been brought against him through enmity, he named no witnesses the case was then postponed until the arrival of the Complainant whom I summoned I was subsequently absent from that part of the District and Engaged in the settlement of the Tervoor Talook but on my return to Bezwarah the Complainant came before me and made good his charge and

Fort Saint George 31st March 1858.

and tho' closely cross examined by the Defendant no discrepancies in either his statement or in those of his Witnesses occurred. The Defendant then stated he could produce 100 Witnesses to prove that the whole was a conspiracy brought against him by his enemies and he implicated my Revenue Moonshee in the accusation. In his defence he cited no witnesses to disprove the charges I therefore told him that if he brought a charge of conspiracy against my Revenue Moonshee or the Complainant or Witnesses or any other persons which he could substantiate by proof to the effect that they or any one of them had conspired against him, I would make a close investigation into the matter but as I considered this case proved and 4 years acquaintance during which many similar charges have been brought against him had taught me that Defendant was one of the most corrupt of the native Officials of the Subdivision I would fine him under Class 1st Section V Regulation IX of 1822 in the sum of Rs 100 he / Defendant / being kept in custody until the same was paid

Bo. No. 4488.
From the Collr. of
Bellary ---

Submits as called for by the Bd in their Pro. under date the 12. Augt. 1856 a Plan for organizing the Village Talliary Force in the Talook Viz. that of Bellary

† From Collr. of Bellary dated 26 May 1858

Sir

I have the honor to acknowledge the receipt of the Proceedings of the Board of Revenue under date 12th August 1856 No. 2548 in which with reference to my report† on the Village Police, I am instructed "to "organize one Talook as a model "without however carrying the measure "into effect until duly sanctioned" for the reformation of the Village Police. I am directed to make careful enquiries into the real value of the Enams and Fees of the Taliaries &c and to follow the

the principles laid down in paras 6, 7, 9, and 11 of the Proceedings under reply. These principles and one mentioned in para 3 appear to be as follows.—

1st That one Talliary, as a general rule modified by circumstances will suffice for a village with 800 inhabitants

2d That 30 Rupees per annum partly in land partly in money or fees is a sufficient remuneration.—

3d That measures be taken to prevent a continuance of the system of subdividing Enams among the heirs of deceased holders.—

4th That the surplus Emoluments in some Villages be made available for the deficiency of

of present Emoluments in others as the Board claim the right of Government to dispose of Emoluments of this nature in such manner as the public service may require.—

5th To realize the fees now paid by the people and to carry them to the General fund for the payment of the Village Police.—

6th The gradual resumption of Gyemissal Enams and the making available to the public service all the Emoluments, that have been set apart for the support of the Village Police.—

7th The retention of the services of the said Talaries and Cavilgars only when it may be necessary to employ them as Talaries.—

8th The retention or dispensing with the services of the Cattobady and Cundachar

Fort St. George 31st March 1858.

Cundachar Peons.-

2. I have the honor now to submit in the first place a scheme for organizing one Talook Viz.t. that of Bellary on the plan proposed the accompanying statement containes the information required It is made into two Divisions the first division shows all the Villages (114 in Number) in which the present Emoluments in land are sufficient at the rate of 30 Rupees for each Talary for the future Establishment as suggested by the Board - The second Division exhibits the Villages (51 in Number) in which the present Emoluments are insufficient for the support of the Talaries and in which it will be necessary to supply fresh funds either in land or Cash.

No. 1

There

Fort St. George 31st March 1858.

3. There are at present in the Talook 506 Talaries including Rand Talaries / who are in this scheme reckoned with the Talaries / who do duty though there are 1584 who are Talary Meerassidars, and take their turn of duty more or less with those actually in office and share in the Enams - The Land that has been held for many generations as Enam by this body of Talaries amounts to 24,289 Acres - the present / assessment on it (as per the survey assessment reduced by the general remissions given in 1824 in all Circar lands) is 24092 Rupees, averaging about 1 Rupee per acre

Assessment 31,740
Deduct estimated amt. of Reduction allowed on Circar Land Assessment 7648
Net proper Assessment 24092

4. It is very difficult, I may say impracticable, to obtain a correct estimate of the real value of these Enams to the holders of them - On entering

Fort St. George 31st March 1888

entering into an investigation into this point I took the opinions of the Village authorities, but I could not rely on them— The Village valuation of the real receipts by the owners is / except in a few trifling instances) much below the nominal assessment of the land in Col. 9— That this is in a great measure true I have no doubt, in most villages—as Enam = dars seldom get the Circar assessment on their lands paid to them. On the whole the village valuation + Col. 10 amounts to only 10151 Rupees or less than half the present survey reduced assessment of the land but this I think is too low an estimate.—

5. Finding it impracticable to obtain a really trustworthy valuation of the Emoluments obtained from the land

Fort St. George 31st March 1888

land I have adopted an estimate which for the purpose in hand will I think a generally fair valuation of the actual Emoluments derived by the Enamdars from their Talary lands— It is two thirds of the present assessment of the lands, and Col. 11. amounts on the whole to 16074 Rupees which is 6000 Rupees above the village valuation. The amount of Talary land actually under cultivation is only 17,839, Rupees, and the assessment will be reduced by the operation of the revision of the assessment (now in course) to about Rupees 6000 so the valuation I have given above of the real receipts by the Talaries is not perhaps too high on the whole. Upon this valuation of available Emoluments I have made my Calculation for

for the future proposed establishments

6. The Establishment for the future is shown for each village in the statement - There are 168 Villages in the Talook with only 15 Hamlets - The population is 98,804 persons - and the revenue 192,473 Rupees For this / Carrying out the principle of giving Salary to a village of 800 inhabitants as a general rule modified as when circumstances would seem to require it / I have allowed 260 Salaries - The cost at 30 Rupees per annum would be 7,800 Rupees To meet this charge there is a total amount of Land the Estimated value of which / on the calculation of 2/3ds the present assessment before alluded to / is 16,074 Rupees - There is thus a surplus

Cols. 14 to 18.

Cols. 2 to 3.

surplus of 8274 Rupees - But there is not a surplus in every Village - In 114 Villages there is a surplus of 9553 Rupees but in 51 Villages there is a deficiency of 1286 Rupees, the Land being on 814 Rupees whereas the amount required is 2100 Rupees - It has been suggested that the Salary emoluments in future should be made up by giving up two thirds in land and one third in money, if this plan is adopted in the Bellary Talook the result shows that 558 Rupees worth of land, and 728 Rupees in Cash would be required to complete the sum requisite to pay the Salary at the rate of 30 Rupees per Annum. -

7. In the first Division of the statement which exhibits the Villages in which there is an abundance of Enam Land to meet the proposed

Fort St. George 31st March 1858

proposed charges, it will be seen that the number of Talaries required is 190 and the cost is at 30 Rupees each, Rupees 5,700 and that as the valuation of the Emoluments (Col. 11) now available amounts to Rupees 15,223; there is consequently a surplus of Rupees 9,553 — In the second division where the Emoluments derived from the Land are calculated to be less than are required, the number of Talaries is 70; and the cost would be at the same rate, Viz^t. 30 Rupees each, Rupees 2100 — while the valuation of the present Emoluments (Col. 11) is only 814 Rupees being the deficiency before noticed of 1286 Rupees —

8 But there is an important item

Fort St. George 31st March 1858

item of Emoluments the Murah and Vurliah Fees, yet to be noticed — These on a calculation amount to about 4179 Rupees — The Board

Col. 12. have in view the realization of these Fees from the ryots and carrying them to the general fund for the payment of the Village Police — But I cannot recommend that the collection of these fees by the Government should be made in the manner they are now paid by the ryots direct to the Talaries — These fees are paid in kind for the most part by the people to the co Talany — The people will not willingly pay these fees to the Government as they now pay to the Talany and to collect them in

in kind would be vexatious and lead to much annoyance if made by the Government Servants.—

9.— In this Talook the supposed value of the fees is sufficient to pay almost half the cost of the Village Talary Establishment now submitted on the scale proposed by the Board. The value of the Fees amounts, it is supposed to about 4,179 Rupees and though they may not be paid with great regularity, varying according to the outturn of the harvest and being different in almost every Village, yet the sum set down is probably pretty correct.—These fees having been exacted (where they exist) from time immemorial the Government have a right to take them into consideration

Compd. R.

consideration in fixing the Emoluments of the Village servants.—

10.— But in order to collect the Fees on the part of Government for general purposes, it would be necessary and would, I think be in itself a good measure to compound them, and to collect them in a different shape, fixed on a scale to be universally applicable throughout the District.— The ryots constantly complain of the payment of these fees they press heavily on the ryots in some places, and are generally a source of petty oppression and interference with the ryots.— In lieu therefore of continuing the present system of collecting ill defined Fees for themselves by the village Officers, I would recommend that all

all fees of every kind, and not only the Talary Fees, be collected by a direct money assessment on the ryots and the amount carried to credit of Government for meeting the cost of the general village Police and Revenue duties.—

No. 3

11 I beg to submit a Memo showing the amount that would be relized by a general uniform rate for the whole talook as compared with the assumed valuation of the fees now levied, not only by Talaries but by all village officers. It will be observed that the valuation of the Fees of all kinds paid to 9 classes of village servants, who perform Circar duties, amounts to 14,397 Rupees. By levying a general rate

rate of one anna in the Rupee upon all circar and Enam land under Cultivation, the sum to be realized would be 20,392 Rupees or 5995 Rupees in excess of the estimated value of the Fees now paid to the Village servants. This does not include the fees paid to certain members of the Village Community who, can hardly be called Government servants such as the Barber, Carpenter, Smith &c. with whom and the ryots as respects their private arrangements the Government, need not interefere. The 9 classes of servants above alluded to strictly speaking perform public duties and with their fees alone it seems necessary to interfere. Though the amount by the one anna cess in this Talook will realize

realize more than the estimated valuation of the fees, yet for the whole District the one anna cess will exactly correspond with the whole amount of Fees.

See Enclosure No. 4.

12. From the Fees thus realized can be made up the salaries of the Talaries in those 61 Villages where it has been shown that the Emoluments are too small.

13. The entire abolition of the present system of Fees will no doubt cause some dissatisfaction but as will be general, and as the commutation system will be accepted rather as a boon by the ryots, as it will free them from numerous petty exactions and interferences on the whole I think it will give satisfaction, and undoubtedly unless the Government relinquish entirely all

all claims on the Fees, it seems the only satisfactory method of determining the Government rights and realizing their demand.

14. Modifying the present system of Fees and adopting the suggestion of the Board of maping them applicable for the general services of the village I have excluded the sum now collected by the Talaries from the estimate of their future Emoluments

15. There will be seen that after provision is made for the limited number of 260 Talaries for village duties of this Talook there remain 246 Talaries who now do duty, and there is a large excess of available funds amounting on the calculation before made (and exclusive of Fees) to a sum of 8,274 Rupees. It may be questioned therefore whether the proposed number

number and pay of the Talaries is sufficient when it is taken into consideration that so many more have been employed from time immemorial, and their Emoluments in the Bellary Talook are so far beyond the amount now proposed to be given to the body on the Board's scale of 30 Rupees per year.

16 My opinion however is that the salary of 2½ Rupees per Month on the land valuation will not be a sufficient remuneration for the Talary; and I should prefer to make it 3 Rupees a Month as recommended before by myself and as laid down by Colonel Munro; especially as the sum is not payable in cash but in land — I do not care about increasing the proposed permanent

number of Talaries for the immediate Village duties - but I would turn the surplus to good account by employing them to watch the highways - Indeed this is very necessary work and in a District where the villages are so distant from one another, it is more necessary than it would perhaps be in a thickly populated district. —

17 I propose therefore to establish 20 Ghauts or stations as per the accompanying List on the principal roads in the Talook each station will consist of 5 Talaries whose duty it will be to patrol in parts of the road where passengers are most liable to be molested by high way men and foot paths and at night to congregate at a neighbouring

See Enclosure No. 5.

Village

village- For this duty I propose allowing about 300 of the Talaries including 42 Canalies- Their salaries are calculated at the same rate as the other Talaries- These Talaries now perform duty with the proposed number of Village Talaries in the Village But I propose that they should be made to watch the roads wherever their services within the Talook may be required- But this service will not be required of them for the whole year round but only for a period of 6 months Viz: 100 men at a time- and when not on this duty, they will have to render assistance in their respective Villages as may be required- There are 67 Canalgars in the Talook whose peculiar duty it is to perform this kind of

of work, but their Enams are small- I have taken 42 of this of this class to complete the number of 300 for Ghaut duties.-

18. I took upon this establishment of 20 Road Stations as very important- If well superintended it will be very efficient in checking and putting down high way robbery and Gang robbery also.-

19. I do not propose the resumption of the existing hereditary Enams. They have been held for a very long period by the owners- and a very great discontent would be the consequence of resuming the Talary Enams and it would deprive many men who are chiefly of the Beder or Boya Caste (a class

class much given to robbery es-
pecially when in need of their
present means of livelihood - But
I do not think they have a right
to claim to be exempted from the
services I would now require from
them. - But still I anticipate
not a little opposition from them
in requiring them to perform any
duties out of their Villages, not
hitherto customary. I do not how-
even think that the Government
are called upon to yield to them
and I would recommend that they
should have the option of accepting
the service now to be imposed
in consideration of the Enams
they enjoy, or of relinquishing such
parts of their Meerasy as is in
excess of a fair remuneration for
the ordinary Village Talary duty.

The

20. The Talary Enams
in the Bellary Talook are undoubt-
ly very large greater than in any
other Talook - They are considerable
in a few other of the Black Land
Talooks; but in the rest of the
District they are not large - In
a few villages of the Bellary Talook
the Talary Enams are exorbitantly
large and far beyond the requirements
of the Village - But these Enams
have been held for many generations
perhaps, and have not been interfe-
fered with by the British Government
for a period of upwards of half
a Century - should it therefore even
be in contemplation to resume these
Talary Enams, the measure should
be deferred until a general in-
vestigation into the titles of all
Enams of the District is determined
on - and in the mean time at least

the

the most should be made of the existing Meerasy Emoluments by exacting service from the holders of them. On this principle therefore I have made my proposition

21 The following Items will show how the existing Emoluments will be disposed of in payment of the service to be performed. In the former part of this report I have assumed the remuneration suggested by the Board Viz. 30 Rupees per Annum as the payment of the Talary in order to show what the result would then be. But as stated above I think 30 Rupees insufficient and would recommend 36 Rupees and on this scale is based the following scheme for the Bellary.

Bellary Talaks

The Emoluments available in the Talaks are as follows—

	No. of Persons doing duty	Shares	Total	Rupees
Value of the Talary Enam land at 2/3ds the Assessment	506	1/8	1584	16,074
Value of a Share in ten Shetriums				725
Villages			Total	16,799
Fees				4,179
				20,978
Value of Enam of Cavallies No. 67				819
Do Fees				594
Total available Funds				21691

Proposed future Establishment

	No. of persons	Amount Rupees
No. of Talaries for Village duty with pay at 36 Rs. per year	260	9,360
No. of Ghaut Do. duties	258	9,288
Do. of Cavilgars	42	1512
Total Sums required	560	20,160
Of which available in Land		16,869
Do. in Cash payment from Fees		3291
Surplus		451

22 I mentioned in the former part of this report that there were 111 Villages in which the present Enam Land was sufficient for the proposed Establishment and 51 Villages in which the land was not sufficient for the proposed remuneration at 30 Rupees per year. In fixing the pay at 36 Rupees there will be a few more Villages thrown out of the first into the second Division and it will be seen (Statement No 2) that now there are 93 Villages in which the land is sufficient for the maintenance of the 161 Salaries required for the Village duties of those Villages and that there is a surplus Amounting to 8511 Rupees in all in those Villages. In 72 Villages the Land is insufficient to the Amount of 1807 Rupees. To make up the deficiency of Sum

Sum of 1807 Rupees should, in my proposition, be taken from the Inam Funds.

23 In arranging for the Extra duties of Ghaut Stations I have gone on the principle of requiring that the Villages having an Excess of Enam should supply one or more Salary for that duty in proportion to the Amount of the Excess of Enam Enjoyed by the body of Salaries. In some Villages the Amount of Excess is not quite sufficient to pay for the Service of the Ghaut Salary and as the Enam of one Village cannot be taken and given to the Salary to make up this deficiency in another it will have to be made up from the general Inam Fund and the Extra Small Sum required for this purpose for the payment of the

See Col 2 of Statement No 2

the Syces Salaries is Rupees 762 and for the present Cawlgars Rupees 722 in all Rupees 1484

24 And it will be observed in the Statement that in some Villages there is only a small surplus over after payment of the Village Salary and not at all sufficient to meet the payment of an Extra Gleaut Salary such Village will therefore be required to supply a Gleaut Salary and the Excess of Cuan amounting in the aggregate to Rupees 249 may be perhaps reserved or allowed to remain in the enjoyment of the present holders subject to resumption on or on lapse of heirs

25 The proposed plan provides for the Services of 560 Salaries at

at present there are 1651 Salaries and Cavalies of which 575 are supposed to do duty in turns So that the Government will now have to dispence entirely with the Services of 1154 Salaries who at present more or less perform service in turn and Share in the Cuans But it will be difficult to put a stop to the present practice of dividing the Cuans among the Sharers But it must be done by peremptory orders The Salary actually in Office must have the full enjoyment of the Cuan Shareholders may be permitted to arrange between themselves for taking a course of duty in turn (Subject however to the permission of the Collector which will be necessary to ensure the services of proper men)

Note

Total No of present Salary and Cavalies ——— 1651

And 45 Salaries are to be newly entertained in proportion to the Excess of Cuans in a few Villages where the present number is found insufficient ——— 45

Total ——— 1694

men; but the party in Office must receive the full remuneration now to be granted while he actually does duty

26 It should be understood however that except in peculiar cases none but a Necessary day should be employed in the Office of Salary as provided for in the Regulations (See sections 17 and 18 Regulation XI of 1816)

27 The Land Salaries are included in this report with the Salaries. Regarding the disposal of the Cawlgars I have also stated the plan I would propose there are at present 67 men their Enam is valued at Rupees 819 and fees at 391 Rupees in all 1,213 Rupees I have proposed to retain only 42 and to require their

their services with the Salaries in the Plant Stations There are no Cuttwabady Peons in the Bellary Talook and as respects the Cundachar Peons this class of Servants is found only in 100 Villages The Cundachar remission allowed to these men (226 persons) on their puttah Lands as a remuneration was Rupees 3363 but the Amount of the general remission on all Lands would give them Rupees 1712 so that their real emoluments on the whole have been of not more value than 1651 Rupees and the late new reduction of the assessment in the Lands of these Villages

	Rupees
Survey Amount of Salary assessment	6,824
Cundachar Remission	3,363
Net payment	3,461
Survey assessment	6,824
General Remission	1712
Net payment	5112
Now reduced Assessment	3550

Villages would reduce the Assessment on the
Lands of these Cundachar proves to a Sum that
leaves but a trifling Sum only 89 Rupees
over as a Cundachar Remuneration Some
of these Cundachar proves have already re-
linquished their Claim to Remission and have
exempted from service in accordance with the
Orders of the Board and the rest may
be allowed to do the Same

28 By changing the present system
and interfering with existing interests opposition
must of Course be expected and some diffi-
culties will be met with I doubt not when
carrying out the above plan of Pensioning the Village
Salary system of the Bellary Salooke would
I have now the honor to submit for the
Boards

Boards consideration but I have not
taken any measures to carry it into operation
until it is fully approved

29 With the Distant Salary Esta-
blishment now proposed there
will not be any need for Samah
Stations of regular proves located
in the Salooke except perhaps at
the large Village of Seerogoopah
Situated on the frontier on the River
Toombadra where under the Peishcar
a body of Peons should be located But
there should be a small body of mounted
Police 12 in number to patrol the Salooke
but

but this belongs more immediately to the Salook general Police Force and will not be included in the present calculation

30 There should be a separate Police Officer whose duty would be to be continually on circuit inspecting the Ghaut Stations and making enquiries every where and he should have a small Establishment of a Duffadar and six Peons attached to him

31 An Extra police during six months in the year when the Coombadra is fordable has generally been employed to watch the frontier but this is not now so necessary but it is sometimes required and may be employed when needed The number in Bellary Salook as sanctioned by Government on the 12th August

August 1845 is 24 peons with batta Amounting to Rupees 309 6 0 for the 6 months

32 The plan of organization therefore for the Bellary Salook is as follows:

	No.	Rate of pay per mensem Rupees	Amount per Annum
Villages Salaries	260	3	9,360
Ghaut Salaries to be employed on Ghauts for 4 months and for the remaining 8 months to do duty in Villages	300.	3.	10,800
Superintendent	1	35	420.
Establishment			
1 Duffadar		8	96
6 Peons		6.	432
Saderwared		2	24.
Batta to Superintendent and to Duffadar and Peons at 3 Rupees for every 10 Rupees of their salaries per month for 9 months when actually marching		15.	135.

For payment of which as I have shown above

Fort St George 31st March 1858

above there are funds Amounting on a valuation to 21691 Rupees I am sanguine that this Village Police force under proper Control and Subject to Some severe rules for negligence would prove of great advantage to the Talook.

33. At present there is a sum of 995 Rupees paid as Jodie or Quit Rent by Some of the Talary Meeravsidars Put on the plan now proposed this will necessarily be relinquished

34. I have on the Board will observe endeavoured to make the most of the existing Talary Emoluments appertaining to this Talook I fear that the emoluments in this Talook are not sufficient to make such a complete organization as that now proposed for Bellary Talook But I beg to submit an Estimate shewing to what Extent

Ret

Fort St George 31st March 1858

extent on the same principle the funds of the other Talooks could be advantageously availed of and what would be necessary to meet the deficiency.-

Collector

Board

Fort St. George 31st March 1858

Enclosure 1

No. 70

To

C. Pelly Esqre

Collector of Bellary

Sir

1 With reference to your letter dated 28th September 1856 requesting me to furnish you with a report on the state of the Village Police of one of the Talooks in the Sub Division and the measures necessary to render it efficient with a view to enable you to reply to the Boards Proceedings under date 12th August 1856. I have the honor to submit a Report founded on the investigation made by me in the Anantapur Talook during the Jummabundy of Fusly 1266

2 The Talaries who appeared before me gave a preference generally to the system at present in forse and are averse to any Change. They neither wish the resumption of the enams enjoyed by their Hejsoodars nor are they willing to relinquish any portions of their enams not even those that have been waste for

Fort St. George 31st March 1858

for many years. They are equally averse to be employed in other than their own villages even on additoal remuneration.

3 The statement herewith sent will shew the number of Talaries actually doing duty and of their Hejsadars the net Assessment of their enams after deducting the general remission and that of the lands actually cultivated as also the estimated produce of their enams and the value of marah and nurtanah.

4 It is not however easy to ascertain the actual quantity of the produce of their enams as required in para 16 of the Boards Proceedings as the Talaries get their lands cultivated as they can or as it suits their convenience and no account of the produce has ever been Kept by them The estimate here given is made up from the statements of the Talaries and village officers the value of the fees has also been estimated in the same way No uniformity is observed in the payment of the Marahs. It varies in different years

It

It is paid both in money and grain and sometimes in the latter in an unthrashed state as soon as the Crop is cut. The Vurtanah is also collected on different occasions in different ways. In short these fees are not in many Villages paid according to the fixed rates in the Rezarpatty but are settled between the parties themselves.—

Assessment of the whole Enam	5205	5
Deduct waste	1668	
Actually cultivated	3537	
Dry lands	10098-3104	
Irrigated lands	268-2101	
	10358-5205	

The produce of the Enams of the Enams cannot be Estimated in this Talook at half of the assessment for the following reasons 1st there are no fertile Regud lands in this Talook. 2d The greater portion are poor red lands changeable every three years 3d The irrigated lands are too highly assessed. The holders of these Enams being unable to cultivate themselves are

are obliged to give them to other Ryots at such rates as they may choose to pay. The annexed Statement shows the produce estimated at half of the Survey assessment on the whole of their Enams as well as of that under actual cultivation.—

6 The Survey assessment of Talary Enams in this Talook Amounts to Rupees 5205 and leaves a net assessment of Rupees 4231 after deducting the usual remissions The produce of the Enams under Cultivation is Rupees 1407 estimated on the Statement of Talaries and the Village Officers which about equals one third of the assessment of the whole Enames. This Amount at half of the Survey assessment of the whole Enams is Rupees 2601 and that of the cultivated

Cultivated lands Rupees 1764 the difference Rupees 837 being for the waste. The assessment of waste lands for fusly 1266 is Rupees 1668. and is higher than what appears in the accounts prepared in fushes 1249 and 1260 as is Marginally shown. The cause seems attributed to the heavy rains in fusly 1260 and the consequent destruction of lands thereby.

	Rs.
Fusly 1249 –	1385
" 1260 –	1514
" 1260 –	1668

7 I see no reasonable objection to the resumption of the Enam waste lands by Government as they are of no use to the Salaries but the resumption should take place gradually as casualties occur

8 The marahs or grain fees are given by the Ryots to the Salaries for watching their Crops and if these were resumed by Government and ready money granted in lieu thereof the Ryots not only loses his marah

hold on the Salary but the latter also suffers to a considerable extent as by this means he is prevented from taking home such grain as is cultivated in the season I think it however impossible to carry into effect the orders of the Board until an uniform system in this respect is establish= =ed throughout the District.–

9 The present Emolu= =ments of Salaries are estimated in two ways I at the half of the survey Assessment of the whole Enam and II at the same rate on cultivated lands including Marah and Vurtunah and these have been compared with the proposed

proposed salary of 30 Rupees a year to each of the Talaries as is shown in the above Statement.—

10 The total number of Talaries is 440 of whom those in the service are 218. The number of Villages in which Talaries perform their duties by turns exceeds those in which they are permanently employed. In the event of certain numbers being permanently employed the other Shareholders will be deprived of the means of livelihood.—

11 The Board consider that one Talary is sufficient for a village consisting of a population of 800 inhabitants. This restriction I think should be limited only to villages having no Hamlets

N.B. The Police of London (exclusive of detectives) guies one policeman to about 1,50. inhabitants—

Hamlets. There are 153 Hamlets in the Anantapoor Talook and some villages are situated on the sides of high roads in which the service of a single Talary is insufficient I would therefore propose to employ 67 persons in excess of the number recommended by the Board. This increases the number to 202.—

12 The Talaries at present perform both Revenue and Police duties. On prissing occasions and when there is much work they avail themselves of the assistance of the other share holders. In the event of the whole of the Cranns and Marahs being apportioned to those actually performing duty the others will not only withhold their assistance but being deprived of lawful means of livelihood will I fear betake themselves to theft and robbery. I would therefore

therefore propose that the Talary Meerasedars be permitted to hold their Offices by turns or if this plan is not approved of that the other sharers be allowed to retain their shares of Enams during their lives and as the shares lapsing by casualties such orders as may be necessary may be issued.—

13 The Amount of Enams held by Talaries in service as well as those enjoyed by the other sharers are here under shown.—

	No. of Villages	No of Talaries: Those on duty	No of Talaries: Those on do. not on duty	No of Talaries: Total	Assessment of Enams: One cultivated Land	Assessment of Enams: One Lands in waste	Estimate of produce: Total	Estimate of produce: 1/2 of the above Enams	Estimate of produce: 1/3 of the assessment of cultivated Enam	Pagoda & Fanam	Sicca Rupees 11 3/12 Calcutta
Enjoyed by Talaries performing duties alone Enams enjoyed by the Talaries performing duties alone though there are several sharers	23	35	44	79	389	190	579	288	196	305	381
Enjoyed by the Talaries performing duties who have no shares	39	83	"	83	1308	447	1755	878	653	798	1000
	62	118	44	162	1697	637	2334	1166	849	1103	1381

Enjoyed by Talaries actually in duty	59	100	"	100	758	456	1214	606	380	829	1037
Enjoyed by Talaries who are not in office	2	"	178	178	1076	581	1657	829	530	"	663
	59	100	178	278	1834	1037	2871	1435	910	829	1700
Grand total	121	218	222	440	3531	1674	5205	2601	1767	1932	2419

The difference between the Enams held by the Talaries performing duties and those possessed by persons who are not in office is owing to the excess in the Enams that have fallen to the share of the Talaries who are actually doing duty for Fasly 1266. The fees are received only by those who perform the duty but as all the Meerasedars take it by turns each of them enjoys the fees when he is in office.—

14 The information called for in the 9th Para of the Boards Proceedings regarding the Enams of the Talaries not in Office cannot be given, as all the Talaries perform duty and enjoy the Enams by turns should the proceeds of the entire Enams be given to the Talaries actually performing the duties an additional Expense to Government will be incurred as shown below.—

Fort St. George 31st March 1858

	No. of Talaries	Average per each Talarie = dual	Amount of Enam	Fees	Cash payment	Total
Present Emolument	218	20 12	2601	1932	"	4533
Proposed for the future	202	30 "	3636	"	2424	6060

If half of the assessment of the whole Enam be deducted from the proposed salary it leaves the amount of Rupees ——— 3,459

If the marah be added to the Estimated produce of Enams as above stated the remainder will be ——— 1,527

If it be the half of the assessment of the Enams actually cultivated the amount will be ——— 1,293

If Marah and Vurtanah be added to it will be reduced the amount to Rupees ——— 2,361

The Estimated produce at half

of

Fort St. George 31st March 1858.

of the assessment of lands under cultivation together with the Marah and Vartanah will, I think, be a reasonable remuneration to the Talaries. But the above is only for the Talaries in Office and not for those who are out of Office.—

15. In five Villages Viz.t. Singanamallah, Checkroyettah, Coodoor, Caracoor, and Ahlmoor the Talaries are in the enjoyment of extensive Enams some of them are now nominated for village Service and the remainder for Services at the Ghauts near their villages.—

16. It appears from the Proceedings of the Board that the Enams held by sharers are resumable as casualties occur. This has not been put in force up to this time I have however given in the Statement the produce

of

of the Enam, and the Inam and Vritti Inam received by the Salaries who are actually doing duty and the amount of proposed Salary at Rupees 30 each per year as well as that of probable extra expense. An abstract is given below.—

No. of Salaries	Those whose Salaries may be disposed with	Enamies	Not to be employed after 1st July	Total	Half of the right of the Enam resumed	Half of the Inam & Vritti resumed & the Inam finally confiscated	Mirasi & Assistant	Total Cols. 7+8	Proposed Salary at 30 Rupees per Annum	Additional expense Col. 6+8	Ditto Col. 9
1	2	3	4	5	6	7	8	9	10	11.	12
218	31	197	5	202	1772	1229	1932	3161	6060	2356	2899

It will be seen that the amount of additional expense is higher by Rupees 829 or 538 respectively than that which is shewn in the foregoing paras.—

17 The present emoluments of

21. Salaries whose services are not required as above stated amounts to Rupees 304 as now estimated and as this amount also is to be allowed to

to the Salaries who are to be employed for the future the former will have to be deprived of their Enams. They might however be employed in Ghants on the same rate of Salary Viz. 30 Rupees each. The Salary to be so conferred amounts to Rupees 630 but the Surplus fund of Rupees 190 remaining in the 9 Villages Singanamallah &c. as I have already mentioned being taken for the purpose will reduce the amount to be paid by Government to Rupees 440.—

18. The Jodie payable by the Salaries is Rupees 169 from the payment of which I recommend that they should be exempted as the sum at this important to them is a mere trifle to Government.—

19. The Cavilgars whose service is

is similar to that of the Talaries are 21 in number. The assessment of their Enams amounts to Rupees 1035 and the Marah received by them is Rupees 380 making an aggregate of 1315 Rupees as remuneration. There are no Talaries in three Villages of this Taluk Viz: Sungananmullah Chettypettah and Muttgoody and Cavalegares perform the duties of Talaries - They have consequently been entered in my Statement as Talaries and their Enams have also been included under the same head. There are some other Cavilgars enjoying Enams to an Amount of 46 Rupees in the Villages of Koratand and Santerchetlah and to an Amount of 155 Rupees in Amandapettah and Medhanavadah. The holders of the Enams in the two former Villages reside in the Village of Oodanapoorah of the Gootty Taluk and the others

possessing the Enams in the two latter Villages reside in the same village I propose to employ these persons for the future in this Taluk. -

20. There are 42 Cattonahdies in this Taluk they appear to have been employed by former Government in Villages where there was a deficiency of village Servants in Revenue and Police but not in Military duties. -

21. In all the Villages the duties of watchings at nights have been partly performed by other Murassidars Such as Washermen, Barbers and others and the practice should be allowed to continue for in some Villages these persons constitute the only police. -

22. With regard to the existing System of Village Police - these

there are several objections.-

I Men who like Talaries have lands to cultivate and are obliged to labor in their fields by day must of necessity be indifferent guards at night

II. Their Office being a Hereditary or Birthright is apt to be looked on as a mere property without any corresponding duty on the part of the holder.-

III The difficulty of replacing them by different class of men when the Talaries have been removed for misconduct.-

IV The impossibility under the present System of removing them to other Villages where their Services are more required or for the purpose of bringing a through

through a confederacy when they are suspected of harboring thieves.-

V. In seasons of scarcity when their Enam Lands are worthless their poverty drives them to league with thieves and robbers.-

VII In the Amuntapore Talook there are upwards of 160 Men of Corichaware Caste who are all robbers to a Man - These men are scattered through the Talook and reside in about 40 Villages That these and other robbers receive assistance and countenance from many of the village Officers is beyond all question, in fact no robbers could exist for any length of time without such assistance.-

23 To break up any combination between the Village Police and

Fort St. George 31st March 1858.

and robbers or to watch narrowly the Proceedings of the Coreeh and other robber castes would require a much larger force of Police peons than are at present maintained.—

24. In Anantapoor Talook there are 46 police peons and Daffadars and these about 29 are required on duty near the Tahsildar leaving only 17 for general duty in a large extent of Country containing 133 Villages and with an area of about 900 square miles.—

25 Village Talaries are chiefly useful for their intimate knowledge of every one in their own villages and for this information they could give if so inclined, but as a police force to put down gang robberies they are nearly useless.—

26. I have mentioned that the Talaries could give valuable information when so inclined. The concealment of knowledge of crime by parties perfectly innocent of any participation is an evil of the most calamitous endeavour and to such an extent does it exist that the detection of crime is almost impossible.—

C.B.

Fort St. George 31st March 1858

27. Apathy and the wish to escape all trouble is one cause but the chief reason is the dread of having to go to Bellary Courts.—

28. The distance of course in many cases is very great and to avoid the troble of the Journey not only will witnesses deny all knowledge of a case but even the sufferers the very men who have been robbed will deny their own property when the value is small rather than run the risk of being sent to Bellary and I have had the question actually put to me by the owner whether in case the property was recognized he would be sent to Bellary.—

29. I have long been of opinion that in Districts like Bellary and Cuddapah where the robber castes are numerous the suppression of gang robbery can be effected only in one of two ways either by a very large permanent increase to our present police force or by Employing a separate force on the principle of the Thuggee Department.—

Sir,

B. No. 945

From the Collector of Bellary

I have the honor to acknowledge the receipt of Extract from the Proceedings of the Board of Revenue under date the 16th Instant No. 637 communicating Extract Minutes Consultation of 10 Idem No. 179 and with reference to para 14 thereof directing me to inform what measures are used to secure a proper observance of the terms of the remission granted for the maintenace of the old Topes.

In reply I beg to state for the information of the Board of Revenue that in the abstract account annexed to para 10 of my report of the 24th August last, it will be observed that the amount of Rupees 64,192-6-0 forward post of the expenditure incurred from the commencement

Fort St. George 31st March 1858.

commencement, on Topes on which all expenditure had ceased up to Fusly 1265. During the time those Topes were being watered and tended, this sum was allowed to the persons who took care of them, by remissions of land rent or Duit rent &c. but this mode of remuneration ceased some years ago, and these Topes now incur no expenditure none of these remissions are allowed, nor are they necessary.-

3. With regard to the views of Government that the existing Government Topes should be let or sold on terms providing for their perpetuation. I beg to state that Measures will be taken for carrying out the wishes of Government.-

4. I have addressed the conservator of Forest regarding the proposed formation of Nurseries.

B No. 502.
From the Collector
of North Arcot.

Sir.

I have the honor forward for the orders of the Board copy of a letter from the Acting additional Sub Collector which tho' dated the 4th Instant did not reach my Office, now on circuit, till the 12th The subject of that letter is the expediency of rewriting the Register A.

2. From the late date at which this reference is made, it would seem that Mr. Bonbury considered that the orders of Government contained in para 10 of Extract Minutes Consultation under date the 3d June 1857 No. 545 authorized the postponement of rewriting that

that Register till the general Survey
In fact such seemed to be his impression
when towards the end of December last,
I mentioned the subject to him. Yet the
Government only say that "such exact-
ness only should be aimed at as may be
necessary to secure the object stated, and
that the preparation of Register A on
a More perfect model would be a work
more properly left to be undertaken
at the period of the general Survey"
It seems therefore to have been intended
by Government that the Register A
should be prepared from existing
materials.

3. I have already stated[x] my
own opinion on this question and the
grounds on which it was founded I
will therefore only advert to the points
noticed by Mr. Banbury, as showing
the utility of the Register. If the
traverse system of Surveying be employed
in this District, as it has been in South

[x] letter to Bd 28th Feby. 1857.

Arcot, it will probably be accompanied by
the same system of improved Khusrah
measurement which was used there, in
which case, the new numbers of the fields
or survey blocks will follow each other con-
secutively round the boundary of the village
till the circuit has been once completed.
This mode of measuring and numbering
is rendered necessary because in that
system the diagonals of fields are not
measurement, and they could not therefore
be mapped unless the fields lying on the
boundary were measured first. This alone
would prevent the new number and the old
agreeing. What therefore will be required by
the Surveying Officer will be that he should
have the means of ascertaining what old
numbers fields correspond with his new
number, and what is the extent and class
of such old number. The preparation of
Register A is not, in my opinion, necessary
to furnish this information. It will be
found in No. 4 of the new Forms of Village
accounts

accounts which I have directed should be prepared this year with fuller information regarding waste lands.

This account gives the bearing the No. of the fields, the description of the soil, the class, the number of crops, the extent, the assessment, and whether Circar or Cnam. Lineal measurements are alone wanting but these would scarcely be required by the Surveyor and if wanted, could be found in the Pymash accounts. In the account No. 4, which has now been in use for 4 years, the discrepancies between the Pymash and Tarum Chittah accounts have been practically reconciled. By what method this reconciliation has been effected I am at present unable to state, but a comparison of the Pymash and Tarum Chittah accounts, in which the variation amounted to so much as between 2 and 20, with the account No. 4 of the same village, would, with the assistance of the carnum, explain the matter.

4 The

CB.

4 The second point noticed by Mr. Bambury is the prevention of any fraud by the Karnams in applying the new rates to each field. This will I believe be best effected by the preparation of the account No. 4 in the manner mentioned in my letter to the Board of the 30th ultimo. This account can be checked by the similar account prepared in the Peishcar's and by the Tarum Chittah. It will show not only the tarum or class, but the old assessment and will afford a ready means of detecting the mis application of a new rate.

With reference to the observations in the latter part of para 1. of Mr. Bambury's letter I beg to mention that in the early part of November last I issued orders for the preparation in the Northern Talooks of which alone the rates were then sanctioned of an account giving the field numbers contained in each new class, but that on further consideration I was satisfied that the preparation of No. 4 the Adangal account, ought to precede that account

account and therefore permitted its post:

Encl: 1

To The Collector of
North Arcot -

Sir,

I have the honor to request now that the new rates of assessment are sanctioned you will let me know whether you are of opinion that the preparation of the Survey Register should Commence -

1 See the last para of the Minutes of Consultation dated 3d June 1857 Govern-ment express as their opinion "that the preparation of the Register as an more perfect model would be a work more properly left to be undertaken by the general Survey -"

2 This subject has likewise already engaged your attention and although I have not by me the Correspondence which took place regarding it still I remember you expressed strongly your disapproval of the proposed measure, and pointed out the incorrectness of the account in question The expediency of spending Pagodas 16,000 in copying out a manifestly faulty account certainly appears doubtful, and I will argue with what you have already expressed upon the subject there are however the following points to be considered Viz. its aiding the general Survey and its preventing any frauds being Committed by the Burmans in applying the new rates to each field -

3 As Regards the first point If the Survey about to be undertaken is based upon our old accounts and measurements, the fields being taken as they now exist in the Haitnary accounts

then

accounts them the "a" Register proposed to be prepared would be a most valuable Reference and if five additional Columns with one for Remarks were opened as shewn in the accompanying Statement the new details ascertained at the Genral Survey might be entered therein and no new accounts be required The Register would then shew old and new measurements as well as the existing Peimash and that newly fixed as the general assessment - Thus however supposing that the Survey operations are to be Conducted on our present Raytwary system if the new existing fields are to be broken up or Clubbed together at the Paymashdars discretion the newly written "a" Register will be useless

4 With Regard to the 2d points when the Copying Goomastahs office the Rental assessment

assessment now sanctioned to each field they will be able to detect whether the Runnums have correctly applied the new rates or otherwise they would doubtless be a great point gained as we should have a Comparison made field by field Should it however be determined that the "a" Register is not Required for the present the instructions issued to the Runnums in the draft of the Circular forwarded for your approbation enjoining them to prepare an account shewing the new rates and their assessment Varam per so that we can Check them with the new existing Varam Chittah will serve as a great preventive to any tricks as we can see whether such and such old Varams have been properly brought to the new rates and whether the totals are correct - If in any instances discrepancies are found to exist we can make a fieldwar Comparison and the errors will be thus brought to light -

16th November 1857 No. 3967 and to Extract Proceedings of the Board of Revenue dated 9th December 1857 No. 4407 to submit the information therein called for by the Board:—

2 Mr. Potters Statement is that in Fusly 1261 some waste Poonjay land situated under the Annaitangal Tank was taken up by a Bramin for Nunjay Cultivation for which he was charged at the reate of 6—7—3 per Cawny.—

3 In Fusly 1260 a person named Ragaviengar cultivated with Nunjah 1—12—4 of the Punjah land under that tank: tho' the tank was then out of repair he managed to obtain sufficeent water for that small extent of cultivation. The rule of the Hoobroommanah then in force was, that if a Nunjah crop was raised on Poonjah land, whether by means of Circar water or not it should pjaya Nunjah rate. The rate fixed in this instance was the fourth Nunjah rate of the Village of Arrumbaukum in

which the Annaitangal tank is situated. The rule was that the rate fixed on the Poonjay should be the rate of the Corresponding class of Nunjay as the Poonjay is of the third class, the rate of the 3d class Nunjah should have been fixed and not of the 4th as was done. The assessment should therefore have been 9—3—1— and not 6—7—3—

4 The amount of assessment therefore fixed on the land referred to by Mr. Potter was not authorized by the rules of the Hoobroommanah then in force, and was the result of an error on the part of the Sheristadars office at that time.—

From the Actg Collr of
Tindevanum . . . . .

Mins of Cons.
25th Novr 1857
No. 2179

Sir,

Adverting to the Proceedings of your Board noted the 27th November last. No. 4176 transmitting the instructions of Government relative to the future occupancy of Miss Walker's house at Negapatam now rented for the Sea Custom Department.

I have the honor to forward copy of a letter from the proprietress who you will observe accepts the terms offered by Government but would prefer that the house be now brought outright.

2. Miss Walker with whom I have personally communicated seems a very helpless timid female who will be unable to do any thing connected with the approaching repairs without the assistance of some friend. I gather that this friend will be Mr. Jensen the Sea Custom Manager who has always I believe been very kind to Miss Walker and whose son in law Monsieur Soulie of Karical will

4th Decr 1857

Fort St. George 31st March 1858

will advance the money she must now lay out-

4. The interest payable on the advance will not be less than 8 per Cent and if Rupees 3000 be the aggregate sum expended on repairs, Miss Walker's ever with the enhanced rent which Government are willing to pay will be in a worse position than at the present time with only 24½ Rupees of Monthly income.

5. To avoid this result she will probably arrange to keep the cost of repairs under the sum estimated for by the Engineer Department but nothing in my opinion short of a throughly good renovation of the entire premises will preserve the house so as to render it a few years hence worth the sum now agreed to be paid for it-

6. Entertaining these views I desired the Hd. Assistant Collector, to ascertain from Miss Walker whether she would be willing to allow the Government to undertake the repairs on condition that the building be given to them on a lease of 7 years renewable for 14 or 21 years at the enhanced rent

* Vide to Hd. Assistant Coll. 5th January 58

Fort St. George 31st March 1858

rent of 40 Rupees minus the interest at 5% on the outlay to be incurred for repairs it being open to the Government to purchase the building eventually for 5000 Rs. It was pointed out to her that taking the probable expenditure for the necessary improvements at Rupees 3,000 the interest upon it at 5% would amount to Rupees 150 which deducted from 12 × 40 = 480 Rs. would leave the amount payable to her as rent at Rupees 330 a year or 27½ Rupees a Month or nearly 7% on 5000 Rupees. In reply Miss Walker has submitted a proposition which as involving the question of a District Pension decided by Government so far back as 1828 seems to me to be inadmissable.-

From Hd. Assist. Coll. with enclosure 15th Jany 58.

7. I am fully sensible of the importance of checking public expenditure at the present time but under all the circumstances of the case I cannot abstain from submitting with all respect the

the expression of my opinion that in this instance the rule should be relaxed and the house purchased at once.-

8. Without reference however to the adoption or rejection of my suggestion I beg to report that I purpose fixing the duration of the lease now to be entered into with Miss Walkers at seven renewable at the lessees option for fourteen and twenty one years.-

Sir,

In acknowledging the receipt of your letter of the 3d instant enclosing a Communication from Government dated 25th November 1857 No 2179 I beg to state that I communicated the proposal now made by Government to the person with whom the prearrangement was made on the property for my future good and that he has left the matter to my entire concurrence and disposal I beg therefore to

to inform you that I accept the proposal of Government but to relieve me from the trouble and expense of repairing if arrangements could be made for taking it up at the Government cost it will be preferable.-

I also beg to state that after the property is sold at once and the creditors paid off I will be left in total distress as it was in consequence of this property the Dutch Pension I was entitled to was stopped in 1828 I must therefore throw myself wholly on the benevolent consideration and disposal of Government

Negapatam. . . . .
4th December 1857 } I / Signed / M. A Walkers

To
Jn L. M. Grenfell Esqre
Head Assistant Collector of Tanjore

Sir,

With reference to an Extract from the Proceedings of the Board of Revenue dated the 27th of November last No 4476 Communicating

communicating the orders of Government relative to Miss Walkers building at Negapatam and to the accompanying Copy of a Communication from her, I have the honor to request you will be so good as to ascertain from Miss Walkers whether she would be willing to allow the Government to undertake the repairs on condition that the building be given to them on a lease of 7 years renewable for 14 or 21 at the enhanced rent of 40 Rupees demanded by Miss Walkers minus the interest at 5% on the outlay to be incurred for the repairs it being open to the Government to purchase the building eventually for 5000 Rupees. Taking the probable expenditure for the necessary improvements at Rs. 3000 the interest upon it at 5% would amount to Rs. 150 which deducted from 12 × 40 = 480 Rs would leave the amount payable to her as rent at Rs. 330 a year or 27½ Rs a Month - under the terms therefore now proposed whilst Miss Walkers would at once be relieved from the trouble and expense of undertaking the

the repairs she would secure an increase upon the present Amount of the rent and be certain of having the building eventually purchased by Government for 5,000 Rs. It will be observed too that the rent of 27½ Rs above referred to would be nearly 7% on 5000 Rs.

You will be good enough to explain to Miss Walkers at the same time that I am far from certain whether the Government would sanction the repairs being executed at the public expense but in the event of her acceding to the terms proposed I should feel at liberty to recommend it to the favorable consideration of Government as a desirable measure.

Bd. No. 1148.

From the Acting Coll.r of Tanjore - - -

With reference to an Extract from the Proceedings of the Board of Revenue No. 1214 under date the 26th November last directing an appeal to be made to the Civil Judge of Combaconum against the order of the Sub Judge who had declined to sell the lands of a Revenue defaulter, I have the honor to forward for the Boards information a copy of an Extract from the Proceedings of the Civil Court on my appeal which it will be observed shows the Sub Judge to have taken an erroneous view of his Judicial powers and has cancelled his decision—

Tanjore Collectors Office On Circuit, Trivalore, 11th March, 1858.

/Signed/ H. D. Phillips

Acting Collector

Extract—

Encl. No 1.

Extract from the Proceedings of the Civil Court in Zillah of Combaconum under date the 6th. February 1858.

Read. Petition of the Government Vakeel appealing from an order of the Sub Court date 12th October 1857.

It appears that the acting Collector has moved the Sub Judge to bring the Inerasy right of one Ramien in 18-66 of land in Rorundamangalum in the Nunnilum Talook to sale in satisfaction of arrears of Revenue due for Fasly 1265 and 1266 amounting to Rupees 224-15-3.

2. The Sub Judge has declined to accede to this application on the ground that there is a more convenient and summary course open to the Collector than one which he now wishes to pursue and that it could not have been the intention of the Legislature to throw upon the Court a mass of work that is calculated to put a stop to the progress of all the regular business.

3. Looking to the provisions of act XXIII of 1856 and Section XXXVIII of Regulation

Regulation XXVIII of 1802 it is clear that the application is a legal one and therefore whatever inconvenience it may entail upon the people or the Courts it must be complied with by the Sub Judge.

The application to the Sub Court should in the opinion of the Civil Judge be framed in accordance with clause second Section XXXIII Regulation XXVIII of 1802 The Sub Judge on receiving it should follow the course prescribed by clause third and on the party appearing before him making the summary enquiry specified in Clause fourth and if satisfied that the arrears are due detain the defaulter in confinement or release him at the instance of the Collector and forthwith proceed to sell his tenure as provided by clause seven.

Ordered that Extract from these proceedings be forwarded to the Sub Judge for his information.

Ordered also that Extract from these Proceedings be granted to Govt Vakeel.

I have the honor to acknowledge the receipt of Extract from Proceedings of the Court of Wards dated 28th January 1858 at No. 377, and have the honor to submit the information and explanation called for by the Court on the several points therein referred to.

2 With reference to Para. 15 of the above Proceedings, observing that the education of the Minors, especially of those whose Estates are under the charge of their own relations, should have been noticed in my report, I beg to state that it has not been customary hitherto to report upon the education of the Minors in the Jummabundy report, nor has the Court ever called upon

upon the Collector to do so. Now as the Court wish this subject to be mentioned in the report, the same will be attended to in future

3 In regard to Para 16, I have the honor to state that the collections from Sundry Sur=veyors of Revenue were included in Statement No. 2 as was done in July 1265, they will in future be excluded from it as directed by the Court.

4 In answer to the enquiry of the Court in Para 17 as to what tenure the 5 Villages entered in column 6 of the Statement No. 1 are held I beg to inform you that of the 5 Villages re=ferred to I belong to Parapoor and 3 to Vanjeloor. Of the latter 3, one is an endowement to ascertain Pagodas, and pays a quitrent of Rupees 21-3-4 Cs to the Estate as explained in Para 8 of my report and the remaining 2 as well as the 2 Villages in Parapoor, Surva Maniam or rent free Villages granted for the support of certain Pagodas in the above Estates.

The

5 The Quitrent on the Jody= Villages of Somptoor referred to in Para 18 of the Proceedings under reply, will in future be excluded from Statement No. 2, and a foot note showing the "Subsequent" collections, both on account of arrears and current, separately for each Estate, will be entered below column 13 of state=ment No. 4 as required in Para 19.

6. The Government communica=tion will in future be separately noted below Column 7 of Statement No. 5 as directed in Para 20.

7. The discrepancy of Rs. 15-15-10 pointed out by the Court in Para 21 is the pay of the Gungany Gomastah employed for preparing the Jummabundy accounts, which has erroneously been included in Column 20 instead of in Column 22 of the Statement No. 6 as it ought to have been. The entries in Columns 20 and 22 should be Rupees 5,625-5-5 and Rs. 3037-4-4, instead

instead of Rupees 5,872-3-3 and Rupees 3,020-4-6 respectively They to request that the fair copy may be ordered to be altered accordingly.-

8. With reference to Para 22 of the Proceedings under reply, requiring explanation as to the course of the difference of Rupees 4-6-" between Column 7 Statement No 2 and Column 10 Statement No in the Collections of Sumptoor, I have the honor to state that the sum of Rupees 4-6-" above referred to, which belongs to the Sundry sources of Revenue, has been erroneously included in Column 12, hence arose the difference above pointed out. The entries in Columns 12 and 10 Statement No 6 should be Rupees 13,290-14-4 and Rupees 13,301-4-4 instead of Rupees 13,301-4-4 and Rupees 13,305-10-4 respectively.

9. The amount referred to in Para 18 of the report, is the Peishcush for Fusly 1206 while that entered in Column 12 of the Statement No 5 includes also the arrears of Peishcush for Fusly

Fusly 1205 hence the difference of Rupees 1,068-6-7 pointed out by the Court-

10. In reference to Para 24 requiring explanation for the difference of Rupees 117-10-2 between the subsequent collections as entered in Para 14 of the report, and Column 13 of statement No 4, I have the honor to state that the discrepancy of Rupees 117-10-2 above pointed out, has arisen from the Amounts entered in Para 14 of the Report, having included the collections made on accounts of the current Fusly 1207.-

11. The Minor Zemindar of Velpuchy is now 9 years old and the manager in charge of the Estate has been required to state what steps have been taken for the education of the Minor. On the receipt of his reply such orders as may be deemed proper, will be given, by me on the subject.-

12. With reference to Para 27 (a) beg.

Fort St. George 31st March 1858.

beg to state that the Manager of the above Estate has been required to report whether the balance in favor of the Estate can be invested in Government Securities his reply when received will be communicated to the Court

13. With reference to Para 28 of the Proceedings under reply, I have the honor to state, that the price per grain Col Rs. entered in Column 6 of the Statement No 4 of the Pottoomaley Estate should be Rupees 3-14-4½ instead of Rupees 3-1-5- hence arose the error pointed out by the Court

Statement

Fort St. George 31st March 1868.

Statement regarding Board Petition No. 869 of 1855.

Abstracts of the Petition — Remarks.

Petitioner states that the — As the Ryots and

Mailwarem grain should — Curnom of each Village

Government share — would not render a true

be valued at the price, at — account of Village prices

which paddy sells in the — and as the former gene-

Villages and not at the — rally take their paddy

selling prices of the — for sale to those places

town as is now done. — where there is a brisk

demand, the exact price

at which they dispose of their

paddy cannot be known

Consequently the market

price of the nearest town

is assumed. From which the

Carriage hire due for the

distance between the Village

and the town is deducted, and

the remainder taken as the

current

Fort St. George 31st March 1868.

Current selling prices, after

making some discretionary

allowances thereo from

for wastage and Merchants

profit. From this, the

current selling price,

the Jummabundy price

is fixed, with the addition

thereto of 5 per cent of the

Olavgoo price, if the

former current selling

price happens to be less

than the latter, or with

a deduction therefrom

of 10 per Cent of the

Olavgoo, if the former exceeds

the latter.

2. The Petitioner requests — As this request is con-

that remission for Drought — trary to the practice and princi-

and short produce be allowed — ples directed by the Board

on such lands as suffer — of Revenue to be observed in

without reference to any per — granting remission, it cannot

Centage — be

centage be complied with.

3 : Nunjah lands As the request
cultivated with Poonjah pro- of the Petitioner is contrary
duce are now assessed at the to the spirit of the
Nunjah rate, which being Board's orders it is
high Petitioner requests inadmissible
that they may be assessed
with reference to the de-
scription of produce raised.

4 The Petitioner The waste lands
complains of tax being here referred to, are those
charged on waste lands included brought to account agreeably
in Muramut Moochilikas - to the terms of the Moochil-
kas executed by their Pro-
prietors binding themselves
to pay the assessment thereon
whether cultivated or not
in condition of their tanks &c
being repaired at the public ex-
pense. If the lands engaged for,
be left waste on any account other
than the want of water it is subjected
to the payment of tarwah

5. A land termed Tank
murah Cor th

Murah is created for repair Cor th wor Rs connected
of tank Rs and water courses by with the irrigation not exceeding
deducting something from the in value 10 Rs are usually done
grass produce before it is divi- by Village labour. Important
ded between the Government wor Rs are of course executed
and the Ryots. While on the at the expense of Government
Government without under-
taking all the repairs required
to tanks &c call upon the ryots
to perform at their own expense
all repairs with 20 Rupees.-

6. The demand Application has been
on the 3d Crop due one Crop already made for sanction to
land instead of being fixed rectify this.
at half the Village rate of 3d Crop on 1 or 2 Crop
assessment on the crop of the is exempted from payment
season, in which it was raised, of any tarwah -
is made at half the rate of
whichever of the two, Corn, or
Peshanom is highest in the
Village According

Village. Besides this, the 3d Crop also is charged with half the full Teerwah

7 The Petitioner complains that in resuming in the death of certain Pottom dars, the lands under wells held by them on Pottom tenure in the Tunjahmaul Talook, a heavy rate of Assessment has been fixed thereon.

8 He prays for the remission of the Deshacavel, and the refund of the money hitherto collected under that head.

9. The clearing of the hills has prevented the fall of

According to the practice prevailing in the District of proper Sevarom Assessment with reference to that on the adjoining Jyer lands, has been fixed on those Pottom lands, whose holders have cheerfully rate has been fixed as Complained of.

The remission of Deshacavel fees has already been recommended to the Board of Revenue

The request for the refund of the money already collected is inadmissible.

Needs no reply

as

of rain errors should therefore be issued prohibiting the same,

10. In Sevadureolum and Anbureolum Villages, the Dry crop raised under wells dug on wet lands at the Ryots' own expence is charged with ½ the Nunjah instead of the Poonjah Teerwah either Poonjah tax should be charged as compensation allowed for the additional labor and expense incurred in raising water from wells.-

As the lands in question are situated under Tank Kept in repair at the Public expense, it is but just to charge the Dry crop raised thereon by means of well water with ½ the Nunjah Assessment

11. Petitioner requests to remission for the sale of Palmeras

Need no reply.

12. Notwithstanding the Palmeras and the ground occupied by other trees forbidden but Rs is used in distilling arrack

Needs no reply as regards the abolition of the Abkarry.-

are needs.

are subject to Seerwah, the
Toddy and Arrack yielded
by them, are also rented.
Either the Seerwah laid
on the trees or lands, or
the Toddy and Arrack rent
should be relinquished.-

13 The Petitioner prays — Need not reply
that the affairs of the
Pagodas should be again
taken under Circumvan-
agement.-

14 The Moturpha — The question of
demand should be remitted — Moturpha is before
in this District as in the — the Supreme Government
case in the neighbouring
District of Madura

15. Petitioner complains — That settlement of
that 400 Tamarind trees in the Fasly 1263 has been
Village of Cudaneolum which concluded.
yielded Cutch are no produce and
were therefore not liable to tax
have

have been in Fasly
1263 charged with Ser-
wah.-

16 The lands in — A separate letter
the Village of Mallian- — on the subject
coilum lately acquired — has been addressed
from the Travancore — to the Board of
Circar, are contrary to the — Revenue.
Revenue system, which pre-
vails in that state, now
charged with heavier rate
of assessment.-

Board of Revenue
Fort St. George

Bd. No. 1375
From the Collector of
Coimbatore . . . .

Sir

I have the honor to acknowledge receipt of Circular No. 371 dated 29th January calling for a report on the operation of Act XXVIII of 1855 which repealed the usury Laws. The influence of the act in question can best be judged of by the Courts as its operation is confined to matter of Civil Suits, which are very seldom or ever brought directly to the notice of the Collector and in this District during the last 2 years very few cases have been disposed of under Regulation V of 1822. Speaking in general term however, I do not think the repeal of the usury laws have been on the whole beneficial, It has removed a just and equitable barrier against oppression by the moneyed classes the rich will be able to grind the poor, I cannot on the whole say I deem the operation of the

men

/Signed/ W. Robinson
Acting Collector

No 30

To,

J. Pycroft Esqre
Chief Secretary to Government
Fort St. George

Sir,

I have received through Captain Pearse the Commissioner's

D/16 Instt. No 6

a copy of a letter to your address from the Commissioner for the Government of the Territories of H. H. the Rajah of Mysore adverting to a letter of mine to the address of the officiating Superintendent of Astagram Division, in which I observe that the Commissioner takes serious exception to the Style of the Communication..

I have referred to the letter again and must admit

2.

acknowledge that I have allowed myself to be betrayed into a very hasty style & much regret it on reconsideration and my hearty apologies are due to that Officer if these can now be made.

3. The letter was written hastily and has no doubt justly given offence. I trust that the Commissioner for the government of the Territories of H. H. the Rajah of Mysore will see ground, under this explanation, to withdraw the serious Censure he has passed.

4. I venture to submit for the information of Government an explanation of the circumstances of the case. Some time in the latter end of last year the Head of Police of the neighbouring Talook of Mysore, wrote to the Talook of Wynaad to send certain individuals from the Poolpally Desoms of Coopatode Nusthom of the wynaad Talook to his Office on business. This was accordingly done and the individual named in the Margin was forwarded by the Head of Police to Heggada Cottah. His statement of what occurred is as follows "On his arrival at Heggada Cottah he was required by the Tahsildar to grant a

Kapalode Kongapow nair

"Deed for the whole of the Poolpally Forests for "2000 Rupees, which however he refused, pleading that "there were the Seniors of the family and other people "whose assent was required to give validity to any such "Deed, that he had no right to execute the required "lease and that he could not enter into the Deed with "out the consent of the Senior Members of the family "The authorities however refused to let him go till he had "done so. A paper was drawn up in connexion by the people "in the Office and as he saw no hope of getting away without "affixing his Signature to it he did so. But that he did "not know that he executed a Deed for 10 years Vizt having "as he felt no right to execute Such an instrument he "adds, I signed Something because they troubled me" This "is possibly a mis- Statement or exaggeration it is the version I have before me.

5. About the middle of last month a requisition was sent by Captain Pearse for this individual to proceed again to Heggada Cottah to fulfil a promise he

he had threw made of getting the Deed ratified by the individuals who were the right persons to grant such a deed. his Karnavers he being only a Junior member an and Craven of a large and influential family on being required by the Head of Police of Wynaad, he refused to proceed to Mysore. This requisition was accompanied by a notice that if the necessary Signatures were not obtained within one month, the Mysore Forests Establishment would enter in possession without further form.

Subsequent correspondence as the Papers were returned to Captain Pearse

6. With regard to the Public right to the Forests the Pollipully Jungles were undoubtedly the ancient property of the Pychy Rajahs who took refuge in these strong holds there when pressed hard and was over taken and Killed in this very Hills and Forests. Unfortunately they were not ascertained at the time and now the Trustees of a Pagoda of that Name shew advanced a Jenm Claim to the whole a claim which perhaps the Government will be unable to defeat in the Civil Court, Still one which the transfer to the Mysore Prince of the title for a long lease of years by the individual proprietors

proprietors would tend greatly to embarrass. I may add that the whole family are opposed to any dealing with the Mysore Forest Establishment.

Malabar
Collectors Office Calicut
23d February 1858

/Signed/ W. Robinson
Acting Collr

P. S.

Since the greater part of the above was drafted, I have received a Severe Censure by the Board of Revenue for the tone of my letter to Captain Pearse on the subject of the Forest boundary of 29th December last. It is I see likewise open to the exceptions taken to the one under consideration I can only say that it was drafted during the evenings of very long and very severe days spent in traversing the Country So transferred and under perhaps a too jealous feeling for the interests of the Government which have suffered by the change here and elsewhere in Wynaad Had I to write it again, it would be in this Courteous Style So necessary in Official correspondence As regard to this I have to beg leave to offer my apologies and to express my regret
