Fort St. George 6th March 1885

No 1 in No 3.

To

C. R. Cotton Esqre

Madras

Sir

1 I do myself the honor to submit the information called for in your Circular letter dated the 28th August last, and for convenience of reference shall prefix the Questions and annex my replies opposite to each—

1 Do you consider the District under your charge in a declining or improving condition with respect to its Land revenue—2

2. The Land Revenue of Malabar has for its basis a Summary or Paimash which was fixed on the Lands under the Mohomedan Government, and on Trees (Cocoa-nut Betelnut and Jack) agreeably to the survey made under the instructions of, and on the principles established by Mr. Commissioner Groome. The only portion of revenue annually fixed according to the extent of Cultivation is that assessed on the lands in the Wynaad and Neilgherry Talooks and on the upland Cultivation. that is. the Rice Cultivated on Hills and high grounds under the denomination of Poonam and Mondom, and all Seed Seaman

3. In July 1873 Government

intro

Fort S. George 6th March 1843.

introduced, with the concurrence of the Board of Revenue, the Annual Settlement (which has been regularly carried on ever since) as the only means of retrieving the finances and at once ascertaining the internal resources of the Country. This measure has been attended with the most beneficial results, as shall be hereafter shewn.

4. Columns 2, 3 and 4 in the accompanying Statement A shew the Gross Collection and Balance on account of the Land Revenue of Malabar since our acquisition of the Province. The improvement however which Column 3 exhibits as regards the annual Collections, added to the facility with which the same has been effected during the last six years that I have been in the District furnish conclusive grounds for declaring that Malabar, so far from being in a declining state, is in an improving condition with respect to its Land Revenue.

5. It must also be borne in mind that the Revenues of this District have been gradually augmented by new Taxes, such as the Salt and Tobacco monopolies, the abolition and Stamps the increase in the rates

Fort S. George 6th March 1843.

of Customs &c. these new imposts however have not affected the Land Revenue this fact added to the progressive increase in the Extra sources of Revenue afford further proofs of the internal resources of the Country being in a state of improvement.

2 What trade is increasing and what is decreasing and to what extent.

6. The Revenue derived from Sayer and Sea Customs as exhibited in Columns 10 and 11 of Statement A and the abstract Statement B which exhibits the total value of Imports and Exports by Sea during the last thirty four years, shew, beyond contradiction that the General trade of Malabar is on the increase. Statements C and D particularize the quantity and value of the staple Articles annually imported and exported by Sea during the above period. I could wish to have submitted similar Statements of the trade by Land but the Accounts furnished by the different Sayer Farmers for the last

15 years that the Land Customs have been rented out, are so palpably false that I am afraid they would only serve to mislead you in your present inquiry: as above stated, the revenue derived from the Sayer affords sufficient evidence of the improvement which has taken place in the general trade of the District. I may however add that as far as regards the inland trade the Articles which have in a more conspicuous degree contributed to its annual excess are Cotton Piece Goods (imported for re-exportation by Sea) Pepper Betelnut and Rice (the produce of Malabar) exported for the consumption of the Eastern Districts.-

See Column Statement D

7. By a reference to Statement D it will be seen that the rise in the trade of Piece Goods has been very considerable In 1804 the value of Piece Goods exported was merely Rupees 4.363. Fourteen years after viz. in 1819/20 it attained the sum of 85.000 Rupees, which we find doubled in 1829/30 the amount for that year being Rupees 162000 and in 1833/34 this sum is raised to Rupees 228.000.-

In

Exportation by Land and Sea	Candies.
1821/22	7.293
1822/23	9.028
1823/24	9.296
1824/25	9.632
1825/26	10.744
1826/27	8.187
1827/28	10.261
1828/29	8.195
1829/30	8.696
1830/31	11.462
1831/32	15.224
1832/33	14.269
1833/34	10.646
1834/35	13.269
1835/36	8.854
1836/37	14.253
1837/38	12.971

In Despatch also there

8. has been a very favorable improvement. It ap[pears] not to 1842/43 the quantity exported by Sea has varied from 2.400 to 6.000 Candies, but the extent increase which has subsequently taken place has come up to 15.224 Candies — Duty which is the quality exported by land and Sea in 1831/32 and the exportation of the following years varies from 14.269 to 8.854 Candies. One of the causes of this fluctuation is the extent of produce which depends entirely upon seasonable falls of Rain. The same is applicable to Cocoanut and Betelnut.-

3. What manufactures are improving and what are on the decline?- Malabar has never been famous for manufactures Coarse Cotton Cloth is manufactured in the Palghaut and Tirnalpooram Talooks and here and there on the Coast the vast quantity of Europe Piece Goods imported and which are procurable at very cheap prices have discouraged the branch of industry so much so that the poorer Class find it

it more profitable to turn their Lands to agriculture.-

4. Is the price of agricultural produce (of irrigated and dry land) generally greater or less than during the early period of our administration?-

5. Are the profits of agriculture generally greater than they were in those Lands where the Revenue has been for some time paid in Money or in the reverse the Case.?-

6 Is there generally an increase or decrease of Wet land Cultivation-

7 The same of Dry land Cultivation-

8 The same of Garden Land Cultivation-

10. The price of agricultural produce has been decreasing in proportion as the produce increased. The difference may on an average be stated at 100 per Cent.-

11. In Malabar the Revenue has always been paid in Money. The progressive increase in agriculture warrants the conclusion of its being still attended with a corresponding profit.-

12 An increase decidedly. The produce of the Country when the company acquired Malabar and for several subsequent years, was not equal to its consumption now it supplies not only its own increased population but many other Districts to a large extent as shewn in the Statement E.

13. With respect to the Dry land Cultivation the abstract given in the Margin shews that this branch of Revenue though not considerable is also in a progressive state of improvement.-

14. With respect to the Garden land Cultivation I would after premising that the only items assessed to the revenue are Cocoanut Betelnut and Jack Trees beg to observe that every species of the Garden Products are increasing. Independent of the staple articles entered in Statement some improvement has of late years, taken place in the cultivation of Cinnamon Coffee Dry Grain &c.

o See 139th para of Mr. Groenes Report in Malabar and Mr. Browns Report on Trade under date 24th January 1804

Would

9. Would a considerable outlay in the construction or improvement of Works of irrigation be generally beneficial?

15. In Malabar the Cultivation depends entirely upon the Natural Rains and not on Tanks and reservoirs as in other Districts. Wherever the Cultivation depends upon Artificial means of irrigation and wherever there exists a deficiency of such means to the detriment of the interests of both the Ryots and Government. I think there can be no question as to the policy of extending those means to the full extent of the demand. Although the undertaking would involve a large outlay of public money, it would, under judicious supervision, secure to the Government a gradual increase of Revenue and would be the most feasible way of preventing what I imagine is much dreaded viz. a deterioration of the public Finances; for, it is obvious that if we do not lend our assistance in promoting agriculture the revenues of Government must fall.

The

10. Is the Ryotwary or the Zemindary System of Revenue administration best suited to the Circumstances of your District?

16. The present Summa of Land assessment amounts as shewn in Statement 4 to Rupees 1622883. 2. 2. the number of Jonmakars or Proprietors to about 45000 and the number of persons paying revenue direct to Government to about 16000: according to the existing assessment therefore each proprietary Estate bears to the whole land assessment a revenue of little more than thirty six Rupees per Annum. Moreover the property of some of the Jonmakars is dispersed in different Talooks. A few of them only pay the assessment direct to Government: many derive but a nominal rent on their property. Numbers of the Jenmakars reside in the Cochin and Travancore Districts, some of whom have their agents to collect what they can of the Rents due to them and there are others who have no agents and who have not therefore

Commo-

come to any settlement with their tenants for years.—

17. Such being the state of the landed property in Malabar it may justly be said that the greater proportion of its proprietary right is vested in the Tenants in profession who again are more numerous than the Proprietors. Under these circumstances I am of opinion that the Ryotwary system of administration is best suited to the interests of both the Government and the Ryots.—

18. In further illustration of the subject I would here beg to observe in connection with what is stated in the latter part of Para 3. that during the five Fusles that the annual Junmabundy has been carried on in this District independent of several Rice fields no less than 20311 Gardens were inspected and though it was found necessary ultimately to reduce the Demand to the extent of Rupees 11004. 12. 6. this was more than covered by the assessment on new

Gardens

Gardens and Plantations added to the Junmah the sum on the latter account being as shewn in Statement Rupees 25865. 4. 8. yielding an increase of Rupees 14860. 8. 2. Relief was thus granted to many who were unduly saddled with a higher assessment than they could afford to pay, whilst the underassessed have been made to account for what was justly due to Government.—

The former indulgence will by encouraging industry increase in due course of time, the revenues of Government.—

11. Is the price of labour and the expense of conveyance of Goods (with reference to Grain or money) greater or less at present than they were twenty or thirty years past.—

19. The augmentation in cultivation may at first view indicate a corresponding increase in the price of labour but such is not the case the increase in the population on the one hand and the cheapness of Grain

† See Note at Para 12.

Grain (compared with the prices which existed twenty or thirty years ago) on the other have had the tendency of reducing rather than increasing the price of labour. The above circumstances added to the present improved state of the roads the increase in the means of river navigation the introduction (tho yet upon a small scale) of pack Bullocks and Carts have reduced the expence of conveyance of Goods to more than 50 per Cent below what it was 20 or 30 years ago.

12. Is landed property becoming more or less valuable and are transfers by sale more or less common?

20. The value of Lands being regulated by the value of the Net Rent derivable therefrom it follows as is the case, that landed property has become less valuable in proportion to the cheapness of Grain. The maximum value of Lands assessed to the Revenue may be stated at 40 fold of the clear net annual income derived by the Possessor on the Medium at 25 minimum at

at 15 average 26 2/3.

21. I have no reason to think that transfers by sale are now more common than they were 20 or 30 years ago.

13. Has the consumption of Luxuries among the higher and middling clapes increased or decreased. Is the condition of the lower orders improved or not?

22. Cheap prices have had the effect of increasing the consumption of Luxuries among the higher and middling clapes and the cheapness of grain added to the increase in agricultural and other occupations have greatly ameliorated the condition of the lower orders.

14. Is money now more easily procurable on loan than formerly?

23. From the best information I am able to procure on the Bazar rate these points it would appear that of interest generally greater or less? What security there is not any material difference was formerly preferred and what is preferred now? as regards the facility of

Fort S.t George 6.th March 1843.

of procuring money on loan the rate of Interest and the nature of security required now compared with former times. The Standard rate of Interest which has prevailed in Malabar for many years as testified by old Deeds, is 12 per Cent per annum, but where security is inadequate or precarious advantage is often taken of the means and necessity of the borrower and higher Interest is then charged. On the other hand it is not uncommon amongst the higher classes, and where good security in Gold or Silver is tendered to lend money on interest varying from 6 to 9 per %

The established rate of interest when money is lent on the security of real property has also always been 12 per % but where the management of the land is made over to the Mortgagee and where the land is of a productive quality, the interest as specified in the Deeds varies from 2½ to 8 per Cent; this is however nominal, for the difference is fully compensated in some cases more than compensated by the advantages the Mortgagee derives from the land being entirely in his hands; and

where

Fort S.t George 6.th March 1843.

Fort S.t George 6.th March 1843.

where land is transferred from the possession of a needy Ryot to that of a substantial person. the latter reaps the additional gain which a better and more expensive mode of culture would ensure to him.

15. In the trading part of the population of your District increasing or decreasing and to what extent?

24. The bulk of the external trade of Malabar is carried on by the agents of Merchants residing at Bombay, and the increase appears in the trade itself affords grounds for concluding that the trading part of the community is increasing though it is difficult to say to what precise extent. During the last two years we have had one English House of Commerce established at Calicut.

16. The same with the

25. The expense in agricultural

respect to the agriculture, already adverted to, demonstrates that the

cultural part of the

Fort St. George 6th March 1843.

13.

Fort St. George 6th March 1843.

7. Is the price of Gold and Silver (relatively with Grain or labor) greater or less now than in 1806.—

26. In consequence of the scarcity of Gold Coin (which shall be prevented by explained) the price of Gold may be said to be now 8 or 9 per Cent above what existed in 1806.

the price of Silver may be stated to have fallen about 5 per Cent

Until the assimilation of currency which will be noticed in the answer to the next question, Silver in Bullion was taken to Coimbatore and other Eastern Districts and sold there for Company's Rupees (old Madras currency) so much was this coin in requisition for the purchase of Cloth.

18. What changes have taken place in the currency of your District since our acquisition of the Country and what are the causes and results.—

27. The Currency of Malabar has never undergone any change the coins peculiar to the District are and have always been as follows.—

the Bom

Fort St. George 6th March 1844.

the Old Gold fanam 4 of which is 1 Dito
the Silver fanam 5 of which is 1 Dito
the Bombay Copper Pice 30 of which is 1 Ditto

Until fifteen years ago

28.

1/2 to 1 R.
2/ to 1 5 R.
3/ to 4/8 R.
4/ to 5 R.

a great deal of Gold Coin such as old and new Gold Mohurs Bahdary, Sultany and Ikery Pagodas. Venitians were Current in the District, but they have gradually disappeared and are so very rare that a few that are now and then found in the Markets are not procurable without the payment of a Premium. In 1820 a remittance of

Rs. 1,00,000

ten Lacs of Rupees was made from this District to the Bombay Government composed entirely of Gold Mohurs. The disappearance of Gold Coin, however has not been attended with any baneful consequences to the resources of the Country and the introduction to an extensive amount within the last two years of the Company's Rupees of 1835 (whole half and quarter) has greatly added thereto

recal

715. Fort St. George 6th March 1843.

Bombay Pice which is to be replaced by half and quarter anna and Pice pieces. is I apprehend a measure that will give dissatisfaction to the people I have brought the subject to the notice of the Accountant General and for your information beg to enclose Copy of the correspondence with that Officer.

See C

29. The local Coins of Malabar above designated not being current in any other Districts except the Rupee at Bombay. the Madras coins such as Star Pagodas the Gold Mohurs the Company's or Madras Rupees, always bore a high Premium in this District. Indeed I am credibly informed that once it was as high as 14 per % the current rate was from 3 to 10 per % No sooner than coin of this description appeared in the Province they were eagerly bought up for transmission to Coimbatore, Salem &c. with which Districts an extensive commerce in Cloth, has always been carried on [illegible] manner By [illegible] Madras

or on the adjoining Districts bore a high Premium but since the enactment of Act XXII of 1835 and the publication of the orders of Government declaring the Rupees of the Bombay Mint anterior to the Coinage prescribed by the above act to be current in all the Treasuries under the Madras Presidency the profit derived by those who trafficked in Coins and Bills has not only ceased but Bills on Madras or Bank Notes are now cashable at a discount of 2 or 3 per Cent.

30. Transactions upon an extensive scale, are carried on between the Merchants residing in the Districted and those at Bombay the adjoining Districts of Coimbatore and Salem, and Mysore in Bills and Specie. Independent of remittances made from Bombay by private Bills as well as Specie the Bombay Government draw Bills upon my Treasury in favor of Merchants to a large extent During the last Official Year 1837/38, the aggregate of the Bills so drawn

Fort S.t George 6.th March 1843.

drawn amounted to Rupees 310000 and up to the present period of the current Official year it amounts to Rupees 388000.

31. A great portion of Cash sent in the first instance to Malabar goes to Coimbatore and Salem for the purchase of Cloth and as Bills are not always procurable, Money is sent by the Coast Merchants to their Agents in those Districts by trusty persons. this practice may be said to be increasing with the increase in the quantity of Piece Goods brought down from these places.

32. Mercantile transactions are also extensively conducted on credit and if there be any difference in this respect between the former and present time, I should think it to be in favor of the latter.

19 What are in your opinion at present the desiderata with respect to the Currency?

33. Adverting to the existing state of things in this respect as above explained it does not occur to me that any thing further is required.

With the

Fort S.t George 6.th March 1843.

34. With reference to the concluding part of your letter to the Collector of Masulipatam. Copy of which accompanied your Circular dated the 25.th October last. I beg to observe that the Cultivation of this District appears to have been always carried on unaided by loans from the Public Treasury. As a general measure I should think that Government could not employ their Surplus Fund in a more advantageous way than by assisting the Ryots with loans, where they may be found to be requisite.

Malabar,
Princ.l Coll.rs Office,

Extract

Fort St. George 6th March 1843.

G in No. 1.

Extract from a letter from the Principal Collector of Malabar to the Accountant General Fort St. George under date the 19th February 1838.

1. With reference to your Deputy's letter under date the 6th Ultimo I have the honor to state, that if the proposed measure of calling in the old Bombay Pice, now in circulation in this District, is to be effected by paying an equivalent in Copper Money, about one lac of Rupees worth of Copper Coin of the description lately received from the Bombay Government, will, I think, be required. otherwise, that is, if the payment is to be made partly in Silver and partly in Copper Money; which I believe will be more acceptable, about half of the amount above alluded to, will be sufficient.

2. Accustomed, however, as the Inhabitants of Malabar have been to the old Bombay pice. (a convenient component part of the Silver Fanam, and the only Copper Coin hitherto current) the introduction of Half and quarter Anna and Pie pieces are not at all acceptable to them from the difference in

Fort St. George 6th March 1843.

in their comparative value with the old Pice. The quarter anna is only received in the Bazar as a threequarter Bombay Pice, and the Pie as a quarter Bombay Pice, entailing a loss of two Bombay Pice upon each Rupee. The proposed measure of withdrawing the old Bombay Pice will therefore be productive of much dissatisfaction."

Extract of letter from the Deputy Accountant General in charge to the Principal Collector of Malabar under date the 30th April 1838.

3. "With respect to the 2d Para of your letter under reference, I have to observe, that as the Bombay Government has intimated that not only have the old Bombay Pice been declared uncurrent throughout the Districts of that Presidency, but, as a precaution against their introduction from without, the Mints of the adjacent petty States have been suppressed, and that consequently to circulate the same in any District would contravene the arrangements and embarrass the proceedings of that Government, it has been considered advisable to displace the old pice in question by new copper Coins, which are component parts of the new small silver coinage, and as the whole of the old Bombay Pice will be gradually displaced by the new Copper Coinage no

no inconvenience, it is apprehended, will arise from the relative value of that coinage with the old fineo

To

The Principal Collector of
Malabar

Sir,

I have the honor to request you will be pleased to inform me, as soon as practicable, at what exchange the Copper Coins in your District pass, Vizo, what amount in Pice a Rupee will exchange for, and on the other hand, what amount in Pice, will procure a Rupee in the Market generally in your District. The Par exchange is 192 Pice, or 64 Quarter Anna Pieces, or 32 half anna Pieces per Rupee.

Fort St. George,
Accountant General's Office,
20th October 1838. } Signed J. G. Turnbull
Accountant Genl

Extract of a letter from the Principal Collector of Malabar to the Accountant General Fort St. George under date the 9th November 1838.

1. "I have the honor to acknowledge the receipt of your letter of the 20th Ultimo and to

to transmit herewith a Statement shewing the rate of exchange of the new Copper Coin in the principal Towns of this District.

2. I would take this opportunity of requesting to be informed whether the issue of the old Pice is to be altogether prohibited. I have since the receipt of the new Copper Coin, discontinued doing so but the measure, from the reasons stated in my Letter dated the 19th February last. is felt as a grievance, the more so, as it has likewise affected the local value of Silver Fanams, so current in Malabar. For instance a silver Fanam is only received now in the Bazar, even in payment of articles purchased as equal to 9½ old Pice, whereas the established value is 10 Pice. thereby involving a loss of 5 Per Cent in a Rupee, which to the poorer classes is really severe. In my opinion, the currency of the old Pice in this District, particularly as long as the silver fanam and new Gold Fanam are current, will not in the least interfere with the arrangement introduced in the Districts under the Bombay Government whilst the measure will be received as a Boon by the Inhabitants of Malabar, and save the Government

See para 3 of my Letter dated the 2nd Augt 1838.

Fort St. George 6th March 1843.

Government from the loss contemplated in my Letter dated the 2d August last."

Extract of a Letter from the Deputy Accountant General to the Principal Collector of Malabar under date the 8th December 1838.

1. "With reference to your letter of the 9th Ultimo I am directed by the Accountant General to observe, that the old Bombay Rice which have accumulated in your Treasuries are to be remitted to Bombay, in pursuance of the orders of Government communicated to you in a letter from this Office of the 7th Instant, and that such of the same Rice as may hereafter be received into your Treasuries are to be reserved for a similar purpose, since their issue would evidently counteract the expressed wishes of the Bombay Government in respect of them."

Fort St. George 6th March 1843.

No. 2. in 3

To C. R. Cotton Esqre

Madras

Sir,

24th January 1839.
1st March "
9th July "
10th October "
21st Ditto "
11th January 1840.

With reference to your letters noted in the Margin I have the honor to forward the information therein required as far as I am able.

24th January 1839. 2. The price of rice &c received by Ryots paying revenue to Government during the last 10 years is in some Talooks higher, and in some others lower, than the commutation price as will be seen from the accompanying Statement.

3. Under renting is adopted to a great extent in this District. Few actual proprietors Cultivate their lands themselves. There are several Systems of under renting adopted, which to explain minutely would swell the present communication to a very great length. The principal of these, however is varum Patom, that is, rent for a limited period of one or two years. Kanom Patam is another which includes Money payments

4. Land generally &c

returns.

returns about 5 per Cent profit and therefore is worth 20 years purchase. In North Malabar it does not yield so much — and from 30 to 40 years purchase is the average.

5. Capital accumulated in trade is frequently employed in trade again. At other times the trader invests his Money in land, but the determinate trader who is subject to frequent change of place and circumstances prefers keeping his Capital actually employed in trade to investing it in land.

6. The cost of conveying one ton of goods a hundred Miles is 26. 8. Rs as by Cart — 46. 8. by Bullocks. 53. 8 by Coolies and 2. 8. by water.

Letter 4th March.

7. I do not apprehend that any reduction in the Establishment under my authority can be made with advantage and at the same time preserve efficiency. The Financial Committee in 1828 made considerable changes, but whether those changes have tended to advance the interests of Government is a question which admits of much doubt.

8. The accounts in all collectorates are prepared for three different years Viz. the Calander, Official, and Fusly year, and in Malabar there was a fourth which however has lately been discontinued. There seems no good reason for retaining all the other three, and two might be sufficient for all useful purposes.

9. I have not forwarded a list of the several ledgers and accounts sent to the several Offices at Madras as they are the same in all Collectorates, but an examination of the Catalogues will show that many of those now dispatched might be dispensed with, without diminishing any of the necessary checks at present imposed.

10 To abolish at once the use of the Mahratta language in the Accounts might be attended with inconvenience but I see no objection to a gradual policy tending to that end. Mahratta has been adopted because the forms of Accounts in that language are singularly concise and well adapted for revenue purposes, and

the

the people generally employed as Gomas-
tahs particularly quick and good Ma-
thematicians, whereas the tamul and Te-
gentoo Systems are complicated and
cumbrous and the tamulians peculiarly
bad at figures. The marattah System,
and forms might be retained with the
language of the districts.

11. The most desirable change
however that could take place, as
whether the marattah is discontinued
or not, would be the introductions
of the English numerals in all accounts
instead of those now in use. There
would be no difficultty in this for
any child might learn them in a
half an hour, and I am certain many
abuses that now exist would
be got rid of.

12. In Malabar until Fusly
1242. the Demand of each Village on
account of Rice lands was almost
a fixed one and since Fusly 1243, when
an annual Settlement was introduced,
very little variation has taken place,
as will be seen by the accompanying
Statement

6th July 1839.

Statement. as no Village has decidedly
improved or decidedly deteriorated no State-
ment according to the form received has
been prepared.

13. In the Garden lands there
has been an increase of 11,63-15-6 for
the whole District compared with the
Demand between Fusly 1242 and 1248,
which is not owing to any decided im-
provement but to the inspection which
was made of the Gardens from Fusly
1243 to 1248.

14. There are very few or no
instances of the Ryots having abandoned
their cultivation and turned their
means into trade or any other more
profitable and enriching employment.
The possession of land in Malabar is as
much desired as in other districts and al-
though persons who hold lands may have
other means of employing their time
and capital, yet a total relinquish-
ment of land for the purpose of bring-
ing all their resources to bear upon
other professions seldom takes place.

15. There are now Jaghire
lands

Fort St. George 6th March 1843.

lands in Malabar. The annual income of all Survamaniem lands allotted for the support of the Pagodas does not amounts to more than Rupees 27,178. 7. ..

16. It cannot be said that the Ryots who cultivate these lands are in a more prosperous and improving condition than those who cultivate the lands that are liable to assessment, because they do not get more than two thirds of the gross produce which generally speaking is a standard rate.

21st Oct. 1839.

17. The district Establishment in this Zillah I should say, was equal to the realization of the company's dues at most seasons, but it ought to be remembered that from the peculiar tenure of land there are few lengthened Statements and detailed accounts which occupy so much time of the Servants in other Zillahs, and therefore the Officers here have leisure and opportunity to apply themselves to the collection of the Revenue which is not the case elsewhere.

18. The rates of pay of the Servants employed in framing the Original Accounts

Fort St. George 6th March 1843.

accounts on which the Amount of the Government demand annually may depend, average from 107 Rupees to 114 Rupees: that is, the Tahsildar receives the first sum and the Oldeshadigaries the latter.

19. The period fixed for the payment of the Kists in Malabar might with advantage to all parties be materially altered, and better proportioned. The Kists in some Talooks commence on the 15th September in others not to the 16th October: in some they cease in June, in others not to July. The latter Kist fall due when the ports are closed and the people have no means of getting rid of their produce, and they are consequently driven to the necessity of coming into the Market at a disadvantage.

20. In some Talooks the proportion of Kists paid in one Month is 20 per Cent, and in others, exactly and similarly situated, only 6 during the same period. These differences may be arranged so as to meet the convenience of the people to a great extent.

In No. 3

C. R. Cotton Esquire

Madras

Sir,

1 I do myself the honor to acknowledge the receipt of your letter dated the 3rd Ultimo requesting me to describe the several modes of payment observable in this District by which the kists due by the Ryots find their way into the public Treasury- through what Hand- whether those of Village servants, Shroffs, Sowcars &ca they pass- and at what expense to one party and at what profit to others.-

2 In Malabar the kists due by the Ryots are collected direct from them in specie by the Village or Umshom servant called "Deshathee karee" who transfers his collections to the Tahsildar of the Talook by whom the whole is monthly remitted to the Nuzzoor Treasury at the public expense-

3 The Revenue not being received in kind but in money I have no doubt but that many a Ryots are obliged to raise the required amount by the sale of their produce or by borrowing money, both on terms highly disadvantageous to themselves. This measure is more resorted to at the time that the last two or

~~Fort St.~~ George 6th March 1843-

three kists of the year become due- The trading season is then closed- the produce of the year is all sold- the needy Ryot has no other alternative but to forestal his ensuing Crops by borrowing money (generally from the grain Dealers residing on the Coast) on condition of repaying it by a given quantity of grain-

4 It is impossible to determine the extent of the sacrifice made by the one and the advantage derived by the other party by such transactions, but I should think that from 10 to 20 per Cent will be within the mark-

5 Fortunately for the District this state of things exists but to a limited extent as the bulk of the assessment stands against Proprietors and others who are more or less men of property- many of whom can even afford to keep their produce in store if the Markets are not favorable enough to admit of their disposal without a loss, which, however seldom occurs.-

6 The information called for in the 2d Para of the letter to which I have now the honor to reply, appears to have been furnished by Mr. Clementson in Para 27 & 32 of his letter to your address dated the 31st December 1838.-

Ain No. 3.-

To

The Accountant General

Fort St. George.-

Sir,

1 I have had the honor to receive Mr. Crawfords letter of the 27th Ultimo with its enclosures regarding the balance of Chuckrums in the Residents Treasury at Quilon.-

2 There is little or no trade between the ports in this District and that of Quilon but there is some little with Alleppee To make the balance of Chuckrums available for bills drawn by me in favor of individuals who would pay into this treasury the value of such bills, it would be necessary first that the amount should be payable at Alleppee, and secondly, that the rate of exchange be lowered. The bazar rate of exchange in Travancore is now, I am given to understand from 29¼ to 29½ Chuckrums per Rupee, and that mentioned in your letter is 28½. If, however, the amount was payable at Alleppee instead of at Quilon and the exchange reduced, I do not antinpate that any large sum would be required in this way.-

3 If the Chuckrums were sent to this Treasury, they could not be disposed of

Fort St. George 6th March 1813-

of without great inconvenience, and perhaps injury to the people. Malabar has its small local Coins peculiar to the District, and to force another into circulation at an undue valuation would certainly not be agreeable to the inhabitants. The Silver of the Chuckrum is said to be very bad, and this alone would be a great objection against the proposed measure. If Chuckrums were declared current here, and received into the Treasury at the rate of 28½ per rupee it is clear that the Travancore Country where they circulate at 29½ per rupee, would soon be dr and this District overwhelmed with them.-

4 From what has been sta above it may be unnecessary to say that th Merchants in this District would not rece payment in Chuckrums for the value of drawn by the Bombay Government.-

5 In the Extract of the lett from the Accountant General in Bombay Crawford says "if by any means the balance "of Chuckrums could be made available for the "use of the Bombay Government in this (the Malabar) "Collectorate, he should not find any difficulty "in drawing against it to the full amount "and should gladly avail himself at this time "of such aid to their finances from the Madras "Residency."

I

Fort St. George 6th March 1843-

6.

I would observe in reply that 4 lacs and an half of Rupees were shipped to Bombay during last July, all of which might have been drawn in bills if the Accountant General had thought proper - and there is now a balance in the Treasury of more than 4 lacs which will be shipped for Bombay on the 1st February, which might also be remitted in the same manner so that it would appear that the Accountant General has not availed himself to the full extent of the resources of this District. If, however, further aid to these finances were required, it might be very readily obtained by the Accountant General drawing bills on the Treasury of Coimbatore - A great portion of the money paid from this Treasury is intended for and is actually sent to Coimbatore

and

Fort St. George 6th March 1843-

and Salem, for the purchase of cloths and other things and if Merchants could obtain their money on the spot without the risk and trouble of a long journey, they would undoubtedly prefer it.-

With regard to the

7

Chuckrums in question, I think it is impossible to expect that any - and if any, but a very small quantity can be advantageously disposed of in this District, even if the suggestions above mentioned are carried into effect.-

To

The Chief and Council of Tellicherry

Gentlemen,

I am directed by the Right Honble the Governor in Council to transmit to you the accompanying Statement shewing the amount of Bawlut Duty collected in Malabar in the official year commencing from 1st May 1838 to 30th April 1839.

2 You will observe that there is no Entry in the Statement of Bawlut Duty collected at Tellicherry, but that there is an Entry of Land Customs collected at Tellicherry to the amount of Pagodas 999 under the head of Sea Customs.

3 You will please to explain the reason why no Bawlut Duty has been collected at Tellicherry, and to state the Rate at which Bawlut Duty is levied on the Articles of Pepper, Cardamoms and Sandalwood.

I have &c.

(Signed) H. Stokes

Secy to Govt

Fort St. George 6th March 1843.

To

The Chief and Council of Calicut

Gentlemen,

I am directed by the Right Honble the Governor in Council to transmit to you the accompanying Statement shewing the amount of Bawlut Duty collected in Malabar in the official year commencing from 1st May 1838 to 30th April 1839.

2 You will observe that there is no Entry in the Statement of Bawlut Duty collected at Calicut, but that there is an Entry of Land Customs collected at Calicut to the amount of Pagodas 2952 5 5 under the head of Sea Customs.

3 You will please to explain the reason why no Bawlut Duty has been collected at Calicut, and to state the Rate at which Bawlut Duty is levied on the Articles of Pepper, Cardamoms and Sandalwood.

I have &c.

(Signed) H. Stokes

Secy to Govt

and reported the circumsta
to Mr. Sullivan the Principal
Collector of Coimbatore, who thereup
sent a man with a summons requiring
the Waranore Kariasten Kospen Putter
others to attend at the Neilgherries, the Karia
Kospen Putter, Myself, who am called Goodal
Coolly, and certain other Koodians proceeded
thither, when Mr. Sullivan remonstrated again
our making any further opposition to the
Soddurs digging up and searching for Vayamb
as above stated in the aforesaid tract, adding
that it belonged to the Coimbatore District,
whereupon we observed that the tract in questio
belonged to Nambalacotta and said that the
Koodians of the Neilgherries had no right what
=ever to search for Vayamba therefrom that time
up to this period, we have gathered and taken po
our ownpose all the Vayamba grown in the above
=mentioned tract. The Engineer Captain Ward
came in the year 1001 for the purpose of surveyin
the Country and pitched uh his Tents on this
side of the Piakara River on that occasion
we sent a man to fetch some milk for that
Gentleman from the Inhabitants residing
on the other side of the Piakara River but they
refus

refused to supply it
saying that the District
on this side of the Piakara River
belonged to Nambola Cotta which
is situated in the Province of Malabar.
the Gentleman noted down the circumstance
of the refusal. In the year 1002 (1826/27) when that Gentle
=man came again to Goodaloor to survey the
country some of us went with him and upon our
arrival at Piakara and pointing out the true bounda
=ries dwiding the Neilgherries from the Malabar
Province some of the Koodians residing on the
other side of the Piakara River came up and
affirmed that the country on this side of that
River belonged also to the Coimbatore District,
the Gentleman then said that that assertain
was not founded on truth, that if it was really
the case they would not have denied the fact
as they have positively done the year before
as above mentioned. Captain Ward then
questioned them whether they were disposed
to put their assertion to the test of an oath
Vizt. that the tract in question which was
situated on this side of the Piakara River
belonged to the Coimbatore District, to which
they said they would not they were then again
questioned whether they would attend and
hear the oath which we were ready to take
to

Fort St. George 6th March 1843

to the truth of our
assertion, to this they said
they would, and a day was accord-
=ingly fixed for administering the
oath and we entered into a Kychit
declaring that we would attend accordingly
on the day fixed for taking the oath, we
attended at the appointed place but the
other party did not attend, upon which the
Gentleman said that the tract of Country on
this side of Piakara River belonged beyond
a doubt to the Nambola Cotta District and
accordingly made a note to that effect- there
was no other dispute- the Kychit which we
executed before the said Gentleman declaring
that we were ready to put our assertion to the
test of an Oath is now in the possession
of the Waranoor's Kariastan Koopan Putters
younger brother called Kristna Putter-

3 To whom does the privilege of grazing Cattle between Nuddoo watlum and the Piakara River appertain-

The privilege appertains to the deity called Vettakara Iragan Bharade-watha and to the Waranoor-

4 In there any fee or tax paid by the party pasturing his cattle between

The Toddars of Tarranad and Nootanad offered in the month

Fort St. George 6th March 1843.

between Nuddoowattom and Piakara, if so to whom is it given and how is it appropriated-?

of Loolam of every year to Vettakara Iragan Bharade-watha for the Potta Ceremony by Guni-dies of Ghee and 126 old Gold fanams and when they returned after having attended at the Potta Ceremony the usual present of cloth under the denomination of Onom podda was given them from the Cotta they used to receive the same and go away, this custom prevailed until the year 978 after which in consequence of the Potta Ceremony having been interrupted the offering was also discontinued- after this owing to this neglect the wrath of the Deity being excited against the Koodians of the Neilgherries who pastured their cattle on this side of the Piakara some of them got sick and some of their cattle were seized and carried off by Tigers they therefore in the month of Meddom 1002. April, may 1827. came to the Nolla Cotta and offered 10 Guindies of Ghee, a brass hand bell and 23 Rupees to the Bharadewatha praying for its protection against any further visitation of sickness and declaring that they would continue making the usual offering

offerings in future and
then went away the offerings
thus made were appropriated for
lighting up the shrine of the Bha-
=radewatha and for the performance of
the necessary ceremonies-

5 Is there any Cultivation carried on in the tract of the Country between Nuddowatta and Piakara, if so, do the Ryots pay any tax for the same and to what particular person or authority-

There is no Cultivation car-
=ried on the tract in question con-
=sequently no Revenue is de-
rived there-
=from-

6 Is it usual for the Toders and other Inhabitants of the Neilgherries belonging to Coimbatore to present offerings to the Padda Karupa Sawmy's Temple, if so on what particular account are such offerings made-

The Inhabitants of the Heelkoonda both in and Heelkoonda on Malabar - always the Neilgherries of-
offer every year 120 Gold fanams and 120 Gundies of Ghee to the temple in question - We understand from tradition that on a former occasion when some persons of the abovementioned Hamlets

Hamlets had wounded
a Wild hog on the East side
of the River the animal crossed
over and fell down on the west
side of the River and within the li-
=mits of the Nambola Cotta District and
when the Inhabitants of the said Hamlets
intended carrying away the Hog the Koodians
residing in this District went and made objection
to their carrying it off and demanded the
share or Jenmom avagasom due to the
Proprietor when the Neelgherry people re-
=fused to give it saying that they would
continue under the protection of the Bharade-
=watha and make the annual offering as
abovementioned whereupon they were allowed
to carry off the Hog even to this day, they donot
give any share of the Hogs killed by them
to the Bharadewatha at Nambola Cotta
however they have continued making the
offerings until the year 1002 - 1826/27 though they
have brought only 8 or 10 fanams for last two
years- besides the above they do not make
any other offering-

7 Can you adduce any written evidence or any other positive proof in support of what you have affirmed to the effect that the tract of the country situated between Nuddawatta and the Peakara River appertain to Nambola Cotta?

In consequence of no offering having been made for the period of 8 years on account of the tract of land between Naddawatta and Piakara River Kothan and other Todows of the Karikal mandal executed in the year 969 1783/84 at the shrine of the above mentioned Temple a writing acknowledging their omission - a copy of it as also the original Kyehit which was extended on the 9th Kombom 1082 in the presence of the Engineer Captain Ward are now forthcoming we have no other written Document to adduce - We know that the original Declaration which was executed in the year 969 1783/84 is now at Coontta Cotta but we do not know at what particular place it is kept and access to it cannot be obtained until the arrival of the Waranoor Karianten Koopen Patter-

Questions

1st Do you consider the District under your charge in a declining or improving condition with respect to its Land Revenue.-

Answers.

I consider it improving - The accompanying Statement No. 1 exhibits the average settlement of the last five years compared with the first five years after our acquisition of the Province which gives an increase of about 20,000 Rupees.- During this period the resources of the District have been augmented, the population has increased, and there has been a considerable extension of cultivation but as the greater part of the waste land newly brought into cultivation, has been on estates previously paying the full Sarrow Beriz, it has not produced a corresponding increase

increase in the Jummah.

Statement B exhibits at one view the present condition of the Land Revenue of the District from which it will be observed, that there remains a sum of Rupees 255,336 to bring the Revenue up to the Sarrow or standard Beriz of Rupees 2,05,645-8-0 a D of this sum, Rupees 38,029-1-5 is to be brought up by fixed instalments as specified in the Statement. In some instances it will probably be found that these additions to the Beriz cannot be collected without distressing the Proprietors, or at all events not within the stipulated period.

Of the sum of Rupees 159,330, not more than one tenth, or 17,000 Rupees, can with any certainty be reckoned upon as a future addition to the Revenue. Of the remaining sum, a great part is the Assessment on lands which from various causes can never be collected, and the remainder can be expected only under such a considerable increase of population, as may lead to the clearance of Jungle lands in the interior Ingaries now too unhealthy to be inhabited permanently.

The following therefore may be taken, as an estimate of the future land Revenue of the District in round numbers.

Present Settlement	1810000
To be brought up by instalments	38000
Future additions from waste lands	17000
Total	1865000

The land Revenue of Canara has probably fluctuated less than most other Districts under the Madras Presidency. Possessing a ready export by sea for the surplus of its staple produce, Rice, it enjoys the advantage of a never failing monsoon, and has not, therefore been subject to those disastrous seasons which have frequently rendered necessary large remissions of Revenue in Districts situated in the Coromandel Coast.

The system of granting remissions at the Jummabundy for partial failure of Crops has been discontinued in lower Canara since July 1803, and the improvement generally in the circumstances of the agricultural classes, it is hoped, will render this less required every year. For the Balaghaut, especially in those Ingaries bordering on the Mysore Territory, which occasionally suffer severely from drought, remissions will in such seasons become necessary but they are never of any large amount as

and with these exceptions, and in cases of individual calamity, which among so numerous a body of Petty proprietors must always be expected to occur, the Land Revenue of Canara may be considered permanent.-

2. What trade is increasing and what is decreasing and to what extent?

The accompanying tables C. & D exhibit a comparative view of the state of the Trade in the principal articles of export and import between the first 5 years after the throwing open the trade, and the last five years. From this it will appear, that in the staple articles of the District, Viz. Rice, Betelnuts, Pepper and Sandalwood, there has been an increase as indicated in the Margin. most of the other articles also exhibit an increase in the average of the last five years. In Cotton there was a remarkable increase in the four years preceding the last, but the great falling off in the exports of this

	Average of 5 years from 1838/39 to 1842/43	Average of 5 years from 1833/34 to 1837/38	Increase in favor of the latter period	Percentage
Rice Measures	1054048	1073409	19421	1¾
Betelnut Candies	5520	5142	1016	19
Pepper ———	2091	2480	389	15
Sandalwood ———	774	1207	433	40

this article during the past year, proves it liable to great fluctuation, owing to its dependance on the state of the Market in Europe and China.-

The export of Sandalwood and Sandalwood Oil is also subject to fluctuation being affected by the sales in Mysore, where it is chiefly produced.-

		Percentage of Increase
Piece Goods ———	Rs.	71
Coffee ———	Cs.	1481
Cotton ———	"	495
Sandalwood Oil	"	110
Sugar ———	"	102

The articles in the Margin in which there has been a considerable increase, are brought from Dharwar Bellary, and Mysore on the Cattle of those Districts, and chiefly, therefore, affect this Province indirectly, by giving employment to a number of people at the sea Ports, and to the Coasting Vessels- They have had the further effect however of inducing Merchants from Bombay to settle in the Coast which may be expected to give a stimulous to trade generally.-

In the imports the variations do not call for any particular remark. The chief falling off has been in Woollens and raw Silk, which is attributable to the diminished demand for these articles in Mysore since the Country has been taken out of the hands of the Rajah.-

In

Fort St. George 6th March 1843.-

In the internal trade of the Distric
a considerable increase has taken place, though
its extent cannot easily ascertained.- The addition
Shop keepers to be found in the Villages scattered
throughout the District, are not owing solely to an
increase in the population, but also to an improvement
in the means of the lower classes. It is generally to be
observed throughout Canara that wealth is more equally
distributed now than formerly.- There are
not the same number of rich individuals
but the generality of the people are in better
circumstances.- A similar change is observable
in the commercial class. Trade is not now so
much in the hands of a few leading men
and there are many smaller traders where there
used to be one monopolist.-

3d What manufactures are improving and what are on the decline.-

Strictly speaking, there are no manufactures in Canara. The workmen are of the worst description, and if good artificers, such as Carpenters, Blacksmiths or Masons are required, they must be obtained from Malab

Fort St. George 6th March 1843.-

4. Is the price of agricultural produce of (irrigated and dry land) generally greater or less than during the early period of our administration?

It is less. This is to be accounted for, I conceive, from the extended cultivation throughout our territories on the Bombay side, and the native States bordering thereon, having enabled those countries formerly depending on Canara for their Rice, to draw their supplies partly from other quarters.-

5. Are the profits of agriculture generally greater than they were in those lands where the Revenue has been for some time paid in Money or is the reverse the case?-

The Revenue on all lands in Canara has been invariably paid in Money- since our acquisition of the Province. The actual profits of the Cultivator, as far as they are affected by the price of agricultural produce, cannot be said to be greater than they

they were finally, but more later and capt
has been employed in improving estate
as the demand for land has greatly
creased, land holders are generally unable
to get better rents for their lands than formerly
6th Is there generally
an increase or decrease
of wet land cultivation?

There has been un
questionably a gre
increase in the ex
tation of wet lands
banara, though there are
means of ascer
the extent of the increase, nothing
indeed but the barrenness of the cha
in certain parts along the skirts of the
or excessive assessment could induce a Ryot
banara to leave waste any portion of his
land, which he had the means of cultivating

St. Rains are stated to commence
into Mayul, and Mayul into Kyle land, when
ever the situation admits of the change bein
made, by which means the value of estates
is annually becoming enhanced by the cultiva
tion being rendered more ce

This fact is worthy of notice as
a striking evidence of the advantages arising
from fixed private property in land, with
a limited Government demand; under no
other system, I imagine, could such persevering
industry be called forth as is continually
to be met with in banara.-

7 The same of Dry land. The cultivation
cultivation:- of dry land -
below the Ghauts in
banara is very trifling,
being chiefly confined to what
is called bonery, carried on
on the sides of hills on which the
jungle has been previously burned-
There appears to have been little or no
variation in the cultivation during the
last 15 years. the whole amount of the
Assessment in it has never exceeded Rupees
4,899-0-10.-

In the Balaghaut, a variety of dry grains
are cultivated, but this species of cultivation, there
called Kokal, has been nearly stationary.-

8 The same of Garden There has been a very
cultivation? considerable, extension of

Fort St. George 8th March 1843.

of Cocoanut plantations, and almost all waste spots along the coast adapted for the species of garden produce, have been occupied and planted.

There has also been an increase in the cultivation of the Betelnut in the Payenghaut Talooks. But the principal plantations of Betelnut is in the Balaghaut, and there the gardens generally have been on the decline for the last 20 years. various causes have been assigned for this falling off, but the reduction that has taken place in the price of this commodity as exhibited in the accompanying statement E is sufficient to account for the reduced circumstances of the cultivators, and to their poverty, and the recklessness which it has induced, must be attributed, the neglected state into which many of the gardens have fallen of late years.

Q. Would a considerable outlay in the construction or improvement of works of irrigation

Fort St. George 8th March 1843.

irrigation be generally beneficial, artifical irrigation in this province, for the peculiarly uneven and irregular surface of the great part of the land of Canara, precludes the possibility of any extensive works of irrigation being used advantageously. In certain situations where the levels would admit of it, it is probable that dams judiciously placed, might render the Cultivator more certain; and an outlay in the repair of some of the tanks in the Balaghaut might also prove very beneficial, but these do not, I imagine, come within the meaning of the works contemplated in this Query.

With respect to the question of the effects of granting annual loans from the Government Treasuries to assist the Ryots in the season of cultivation, I am inclined to believe, from the experience I have had in Revenue matters, that in the manner in which it is administered in many Districts, it is productive of much evil when given to a Ryot as it very frequently is to enable him to discharge a

a balance due to the Circar, it is virtually a suspension of the demand attended with the mischievous effect of inducing him to delay payment of his kist, in hopes of this assistance, which he too often claims by giving part of it as a bribe to the talook servants through whose hands it passes, the most effect of the system is, I think prejudicial in more ways than one. It opens a door to corruption on the part of the Tahsildar and other Revenue servants who have the distribution of the Government advances, and it encourages in the Ryot that natural indolence and improvidence which in very many cases is the sole cause of his standing in need of any assistance from Government.-

In a political point of view it may be questioned, I think, whether it is desirable, by extraordinary assistance from Government to enable a pauper Ryot to continue to hold land as a proprietor, which he has neither the means nor the industry to cultivate properly, and who without such assistance would sink into the class of a labourer, and his land in due

into the possession of a person with sufficient capital to do justice to it.-

There are occasions no doubt where the issue of Taccavy is absolutely necessary, such as after seasons of secure drought when the Ryots may have lost their whole produce of the year, and are without the means of replacing their lost cattle, and also in individual cases of serious loses by fire or other unavoidable calamity.-

Mr. Edward Maltby is of opinion, that a liberal advance of Taccavy re-payable in 3 or 4 years to enable land holders to repair their small tanks in the Balaghaut on which their Betelnut Gardens, Suga Cane and rice fields depend, would be very advantageous; and that had such assistance been given some time ago it would have prevented many valuable Gardens going to decay from which they can never recover. I coincide with Mr. Maltby in this opinion, and I am inclined to think that in all irrigation works not of an extensive nature, it is desirable to

Fort St. George 6th March 1843.

to induce the Ryots to undertake the repairs by such means, rather than that the work should be done at the Government expense.

10th Is the Ryotwary or the Zemindary system of Revenue administration best suited to the circumstances of your District?

The Ryotwary is the system which has always obtained in Canara and is the only one suited to the peculiarity of its land tenures.

11th Is the price of labor and the expense of conveyance of grain (with reference to money) greater or less at present than they were twenty or thirty years past?

There are no means of ascertaining accurately the price of labor generally 30 years ago. The regulated price of labor is less now than it was for the first 6 years of our Rule. It was then 9 pice per diem, it is now 6, but considering that all the necessaries of life, excepting salt, are cheaper now than they were 30 years ago, the laborer is perhaps better remunerated than he was formerly. The price of labor must of course be always affected by the demand, and

Fort St. George 6th March 1843.

during the Moonsoon Months good laborers may be had for 6 pice. With respect to the conveyance of goods, owing to the improvement (small as they are) that have been made in the roads and passes, the increased supply of Carriage Bullocks and the greater number of boats in use the expense of the transport of goods both by land and water is less than it was formerly. When the new roads now making, and the improvements of the old ones are completed, the cost of Carriage will be still further diminished.

Hitherto the use of wheel carriages in Canara has been utterly impracticable owing to the want of Bridges and the wretched state of the roads, the best of which have been little better than Bullock tracks. The new Road now making from the top of the Sumpajee ghaut through Lower Coorg to Mangalore, will be easily passable at all Seasons for wheel Carriages and an excellent communication will thus be opened with the Southern part of the Mysore Country and with Salem, from the latter of which there is a

Fort St. George 1st. March 1843.

a considerable traffic in Piece goods to the coast. This will remove a serious impediment that has hitherto existed to the improvement of the trade of Canara and the new Road will confer on the Country through which it passes, advantages that have been hitherto engrossed by the Coast districts and the Magazines in the vicinity of Towns.

Houses and Shops are already being erected in different places along the sides of the Road and as the traffic in it increases it will create a greater demand for the produce of lower Coorg and by bringing the people of that part of the Country into more frequent intercourse with the rest of the District do away, in a great measure with the feeling of a separate interest that exists among them and which the difficulty of access to their Country, has hitherto tended to keep up.—

Fort St. George 1st. March 1843.

12th Of landed property It has increased becoming more or less in value in a valuable and are remarkable transfers by sale degree. more or less common. It may fairly be stated that land which was —

Sold at 8 years purchase, 25 years ago, could not now be obtained for less than 12 or 14 years purchase subjoined is a comparative statement of the Sale of price of five estates twice sold within the last 20 years.—

The

Fort St. George 6th March 1843

The increase in the value of land, with the exception of certain unhealthy tracts at the foot of the Ghauts, and in the Coimbatore Talook has been generally throughout the District.—

Although the price of agricultural produce generally, as stated in reply to a former Query is less than it was formerly yet there has always been a steady demand for Rice, the staple of the District. The landholder under our rule has been relieved from many vexatious imposition he was formerly subject to. The Government demand is known to be limited, and the cultivator feels sure of enjoying all the advantages of any additional labor and capital he may bestow upon his land. These causes have contributed to raise the value of land, and the demand for it is further increased owing to the utter want of confidence in each other in all money transactions, inducing persons who have surplus funds to prefer the moderate return from investments in land, to the higher rate of interest obtainable

Fort St. George 6th March 1843.

obtainable on loans.

Transfers of land by sale have always been common in Canara. They are perhaps more frequent now, as the trading classes generally seek to invest their gains in lands.—

With the exception of Europe Piece goods, it does not appear that the consumption of luxuries among the higher and middling classes increased or decreased. Is the condition of the lower orders improved or not.—

any other article which may be called luxurious are in greater demand now than they were formerly

For some articles particularly silks and the more valuable cloths there is probably less demand owing to their being fewer individuals of large property. The condition of the middling and lower classes has however undoubtedly improved. there is a greater demand for labor owing to the extension of cultivation, and there is less oppression on the part of the Heads of Villages.— Money

Fort St. George 6th March 1843.

14th Is Money now more easily procurable on loan than formerly? Is the Bazar rate of Interest generally greater or less? What security was formerly preferred and what is preferred now?

Money is not now so easily procurable on loan as formerly. It has been stated to me by persons well acquainted with the state of society among the native community at Mangalore that whereas formerly, in any respectable person could have obtained a loan of Money on his Note of hand it would now be difficult for a man of the fairest reputation in the town of Mangalore to obtain a loan of 500 Rupees without a regular bond or a Mortgage. This is to be attributed to the lamentable extent to which fraud and deceit have pervaded the whole native community, causing an utter want of confidence in each other and a total absence of self respect even among the highest classes.

It would be found [illegible]

Fort St. George 6th March 1843.

of forgery is more common in Canara than in any other province under our rule. This may be accounted for by the great value here put upon land, which leads to the fabrication of deeds of sale, mortgages &c, and makes the occupation of every disputed piece of land a matter of life and death.

It may be a question whether a system of our Courts, by the encouragement which the great latitude of appeal holds out to dishonesty has not greatly tended to increase that disposition to trickery and falsehood in all its shapes which may well be called the characteristic vice of India.

The Bazar rate of interest was formerly from 15 to 24 per cent. it now rarely exceeds 15 per cent. Jewels were formerly the most usual security for loans, but since the great increase in the value of land, that is preferred to any other security. When land is mortgaged for a sum of Money it is usual for the Mortgagee instead of paying Interest to obtain possession of the land and the produce, and owing to the security which

Fort St. George 6th March 1843.—

which this affords for the interest of this Money
the Mortgagee is generally contented with 8 or
10 per cent profit on his capital advanced.

15th Is the Trading part of the population of your District increasing or decreasing and to what extent?

There is an increase in the aggregate number of persons engaged in trade, but fewer Merchants with large capitals. Under the Native Government the exactions, and vexatious interference with the traders, confining nearly all commercial transaction to people of influence and of large capital, the removal of town and transit duties, and all their attendant evils which were abolished in Canara in 1825 have increased the number of petty dealers, and consequently the general traffic of the country.—

The trading towns in the Coast are Honore, Coonta, Bundapoor, Mangalore and the inland towns of Sirsy, Sedapoor and Buntwal. These have been rapidly increasing of late years, and the improvement in the state of the roads,

Fort St. George 6th March 1843.—

and communications with those towns, now being made, will tend still further to increase their commercial prosperity.—

It is greatly to be regretted, I think that the cultivation of Sugar Cane has been so much neglected in Canara, and that Coffee has never been attempted to be grown as an article of export. There is no other District perhaps which possesses greater advantages than this does for the successful cultivation of both these articles of commerce, and nothing in my opinion would tend to more increase the commercial prosperity of Canara, than that a portion of the land now annually employed in producing Rice, should be converted to the cultivation of other valuable products.—

16th The same with respect to the agricultural?

It has increased as shewn by the population returns in Table No.

17th Is the price of Gold and Silver (relatively without Grain or Labor) greater or less now than

The price of Gold has increased owing to this currency having been almost entirely withdrawn from

from circulation, the premium now pa
for Gold in the Bazar is 9 per cent.

There does not appear to have
been any variation in the price of silver
for the last 10 years. the quality of silver
formerly in Dollars but for the last 20
years in Rupees, brought into the Distric
in payment for Rice and other products
of the Country amounting to not less than
fifteen lacs of Rupees, on an average
annually, has kept the supply of silver and
money always sufficient for the purpose of
circulation.-

18th What changes have
taken place in the currency
of your District since
our acquisition of the
Country and what are
the causes and results?

In the early
period of our ad-
ministration variou
Coins, both Silver
and Gold, struck in
Native Mints, were in
circulation in the Distric
but the depreciation in their rate
of exchange, from the reduction of the Curren
to the intrinsic value, caused most of these Coins

gradually to disappear. The community
at large have been greatly benefitted &
by the introduction of a uniform currency
and the shroffs are the only persons who
have permanently suffered by the withdrawal
of the former local Coins.-

Money transactions by means of
Hoondees among the mercantile community,
are much more commonly in use now than
formerly. And the practice of transmitting
any considerable sums by Gollahs is
comparatively rare.-

The convenience and security
of the trade between Dharwar and
Canara has been greatly promoted by
the sanction lately granted to the
Collectors of the two Districts of granting
Bills on each others Treasuries to the
Merchants engaged in the trade.-

The saving of expense and the
convenience to the Mercantile community of
this mode of making payments where
private Bills are not procurable in
sufficient

sufficient quantity, can scarcely be estimated too highly, and should be extended wherever it may be done without detriment to the interest of Government.-

19th What are in your opinion at present the desiderata with respect to the currency?- An increase to the supply of Copper currency is still a desidera: -tum in the District a sum amounting to Rupees 83,300 in new Copper price was received from Bombay in 1247 and has since been in course of distribution throughout the District but a further supply of at least 1,00,000 Rupees is required to meet the wants of the country, a scarcity in the smaller currency is chiefly felt by the lower classes, whose purchases are necessarily made in that Coin at present the new Copper money is at a

a premium of 2½ to 3 per Cent in the Bazars a supply of Copper currency fully equal to the demand would no doubt give a stemulous to the petty traffic of the Country, and considerably increase the comforts of the poorer classes.-

No. 6.

3867

Fort St. George 6th March 1843.

15th No. 3

To,
C. R. Cotton Esqr.
Commissioner.

Sir,

Para 1. I have the honor to acknowledge your letter of the 24th January last, and to make the following answers to the questions which it contains.

1st Question Are the prices of Grain — higher or lower than the Commutation price on which the existing Settlement was found? —

2. Previous to our acquisition of Canara, the land revenue throughout the Province was fixed in money, and it appears that — grain was only taken from a few cultivators in each Talook, for the supply of the Forts and Military establishments. But in these instances — the original money assessment was retained in the Accounts of each Estate, and a Memorandum shewed the quantity of rice which was — received in lieu of a certain portion of it. When therefore the Collection of grain ceased at the commencement of our rule, the assessment in money, as exhibited in the accounts, was demanded from the different landholders.

3. From such records as are now extant, it appears that 3766 Corges of rice were thus annually received on account of the land revenue, and that this quantity represented a money assessment of Rupees 166951 - a & -

The

Fort St. George 6th March 1843.

The average price of a Corge was therefore Rupees 45-4-2 as you will perceive from the accompanying Statement A, that the rates varied much in the different Talooks. In Mangalore 5½ Moodahs were received as equivalent to 1 Hoon or 4 Rupees while in Honore only 3 Moodahs were demanded. The price of a Corge in the former Talook was consequently Rupees 29-15-10, and in the latter Rupees 60-8-0. 4 It is not at present possible to ascertain with exactness the causes of the above difference. It may however partly be attributed to the Land in the Northern Talooks being less productive, and more heavily assessed than in South Canara, which would render it less able to pay its Assessment in grain at a valuation probably below the market price. It also appears that the ryots of Cundapore and Honore had to convey part of their rice to Nuggar and allowance was perhaps made in fixing its price for the expence of its conveyance. 5 But although the differences in the Statement cannot now be fully explained they will serve to show the effects of the resumption of money payments. As the average price for which the ryots received

Fort St. George 6th March 1843.

rice to the Sircar, was Rupees 45-4-2 and the average Market rate of the last 10 years is Rupees 53-a-0 the measure has been on the whole beneficial. In the Southern Talooks especially it has been equivalent to a large remission in the Assessment. 6 In Barcoor, Cundapore and Honore the Land holders according to this Statement have suffered by the change, though I am not aware that they have ever made it a subject of complaint. Some incidental expenses in conveying the grain to the Government Depots of which there is now no record, may have made them glad to return to money payments, and even if they deemed a profit by the delivery of grain they must have been aware that it was a temporary indulgence, and that the measure did not relieve their estates from their former liabilities. 7 There is probably no Indian Province in which a system of Tenancy has existed to so great an extent as in Canara, or where the rights of the tenants have been more clearly defined by the usages of the Country. This has been the natural result of the land having been for centuries strictly private property. The system is increasing, as much land

2 On what terms is land under rented and is the system increasing?

land has lately been purchased by the Commer=
=cial classes, whose mercantile avocations oblige
them to employ tenants, and it is often a stipulation
in the purchase that they are to subrent to the former proprie=
8 Considerable difficulty exists in
ascertaining with exactness the proportion of
the land occupied by tenants. Judging from the
population returns and personal observation, I am
induced to think that throughout the whole
Province the portion would be 45 per Cent. Sub
=tracting from this the Betelnut plantations, which are rarely sub=
=rented, are deducted, it would perhaps be found
that in the Payenghaut Talooks 60 per Cent of the
rice lands are cultivated by tenants. The proportion
is however to be observed varies much in the different
Talooks and is larger in South than in North Canara.
9 The tenants in Canara are divided into
two principal classes, the Chalgueny or temporary
who have either to give up the land, or obtain a
new lease at the end of each year and the Moolgueny
or tenants in perpetuity who pay a fixed rent and
cannot be ousted except on failing to discharge
it. This occupancy is hereditary in families, and
the Courts have I understand, decreed that it can be
sold, or otherwise transferred. In addition

two classes I have lately met with some instances
in which land has been subrented to a tenant
for his life and at his death reverts to the pro=
=prietor. Leases for a certain number of years
are also occasionally granted.
10 The agreements which are entered
into between the tenants and landholders
are of various descriptions. In North Canara
the Crop is often divided equally between the
two the tenant undertaking all the charges
of Cultivation, and the landlord paying the
Government Assessment. In other cases the landlord
supplies the seed and bullocks, and then the Crop after
a portion is put aside to replace the seed advanced
by the landlord, is divided into 5 portions of which
he receives 3, and the tenant 2 shares. But the most
usual practice especially in South Canara, is for
the tenant to receive the Crop, and pay a stipulated
rent either in Money or grain or partly in each. The
landlords prefer this course, as the least trouble=
=some, and as securing them against losses from the
Season, which in these cases fall upon the tenants.
11 Your request to be furnished
with Statements shewing the rates of private rent
comparatively with the rates of the Government

assessment applies I believe to the districts settled on a survey, where the Government assessment is fixed on each field or portion of land and can be compared with the rent at which the ground is sublet. In Canara the assessment is as you are aware on an Estate in the aggregate, not on particular fields, and it varies so much in relation to the produce or rent, from frauds in the accounts, from collusive transfers of land, and changes or improvements in the cultivation, that a Statement of the rental of any particular estates would convey no correct information of the comparative rates of private rent, and the Government assessment throughout the Province.

12 I have therefore limited the Statement **B** which accompanies this letter to an Account of the rates paid for the different descriptions of land, which may be useful in showing the rent which land fetches by the acre in Canara. The rates you will observe fluctuate much, as they depend not only on the fertility of the land and its situation, but on the population of the Villages, tenants in some parts not being procurable on any terms. The deductions which are to be made from the rent on account of the Government Assessment

found to vary from 10 to 90 per Cent.

13 I have already observed that the Betelnut plantations are seldom rented it being usual for the proprietors to Cultivate them assisted by hired labour. It only therefore remains for me to speak of the Cocoanut gardens on the Coast. In South Canara single trees are often rented by the year, and sometimes the whole garden is made over to a tenant, the rent agreed upon between the parties being paid either in kind, or Money. In North Canara two singular, and in practice inconvenient tenures, termed Neddige, and Soolige, prevail to a considerable extent. Under the former the proprietor of a garden plants young trees, and makes them over to a tenant, who waters and guards them until they arrive at maturity. He then shares the produce equally with the landlord and possesses a distinct right in the trees. The term "Soolige" is used when grown up trees are made over to a tenant, who in this case receives ⅓ of the produce for his labour. The landlord in both instances pays the assessment, but these tenures appear to be declining, as it is found that they give rise to numerous disputes.

Formerly

3 What was and what is the general mode of employing Capital?

For 8th George 6th March 1843-

14 Formerly money was generally employed in loans, and occasionally in the purchase of land. But as the reputed possession of wealth was dangerous, the great body of the inhabitants who had acquired small sums, and did not possess sufficient interest to secure themselves from molestation, shunned a display of wealth and buried their gold and Silver- At present the purchase of land is the general mode of employing capital, as this investment is secure against the risks to which trade is liable and experience has shown that land can almost invariably command the sum for which it was purchased-

15 It is however to be observed that wealth is nowless hoarded, and is often exerted in augmenting the comforts of its owners family by the purchase of better Cloths- and food, or in the gratification of pride by expensive marriages and the purchase of Ornaments- The Christian population in particular set an example, which must be beneficial, by building better houses and living in a more respectable manner as their means extend-

16. Land is however the chief

For 8th George 6th March 1843-

investment which is sought after, not only for its security but perhaps also for the importance and influence which it bestows on the possessor- This is evident from the increased prices now given for estates, which in some instances amount to 18 and 20 Years purchase, and I am inclined to think that no change in this employment of Capital is likely to occur until the people see examples of the various methods in which private European skill and energy employs capital or until an increase of wealth leads to various artificial wants in supplying which labours and money are found to be profitably employed-

17 In reply to the question contained in the 5th Para of your letter, I have the honor of forwarding an account C, of the rates usually paid in this Province for the conveyance of goods- The account is made out for 100 Miles according to your request, but no deduction is made on account of back Carriage (which would generally cause some abatement in the rates when bullocks boats or Carts are employed) as the allowance to be made on this account cannot be accurately ascertained-

No. 16 to No. 3

To

C. R. Cotton Esqre

Commissioner Vizn Yzn

Madras.

Sir,

I have the honor to acknowledge your letter of the 3d September and to offer the following remarks on the subjects alluded to therein.

2. The kists in the Province are collected by the Village Officers, the Potails and Shanbogues, and remitted by them bi-weekly to the Tahsildars. In some instances the ryots or the Merchants to whom they have assigned their produce make their payments in the Talook Cutcherry, but the chief portion of the assessment passes through the hands of the Village servants. When persons pay money in the Talook Cutcherries it is for their own convenience and either to save time or the trouble of proceeding to a greater distance the circumstances under which the money is received are the same in both instances. It is also to be observed that it makes no difference to the ryot whether he pays the kists himself or through the Merchant to whom he has sold his produce, as his bargain is affected only by the

Fort St. George 6th March 1843.

state of the market and the urgency of his want of money, and to the merchant it is indifferent whether he pays the price of his purchase to the seller or on his behalf to the Government servants.

3. When the Village remittances reach the Talook treasury, they are examined by the Government Shroff and the Potails are bound to replace any bad coin found in them. This loss is probably in some instances made up to the Potails by the ryots of their Villages upon a mutual agreement but where this is not the case the Potails have it in their power to indemnify themselves by refusing to receive on account of the kists any suspicious coins, except at a per centage proportionate to the risk of their proving bad.

4. The advantages which the Village officers obtain by being collectors of the public money, are chiefly the importance which they derive by being able to shew consideration or strictness towards the different land-holders in realizing the kists. Any further profits which they make at the escpense of Government, or the ryots

must, it appears to me, be very inconsiderable as their remittances reach the Salook treasuries with remarkable punctuality and the land holders in Canara are so well aware of their rights and so prone to complain of any injury that the almost total absence of complaints against the Potails, connected with the collection of the public money, is a fair presumption that their dealings are straightforward and just. In some instances I understand that the Villagers maintain a Shroff to examine the money brought to the Cutcherie, and the absence of complaints seems to shew that the parties act on a mutual good understanding.

5. The Shroffs at the Cutcheries of the Sahuldars and Peshkars are the remaining class of public Servants who have opportunities of deriving emolument by the public money passing through their hands. These Servants were formerly a source of much petty annoyance and loss to the ryots by rejecting coins as bad and purchasing them from the owners at inferior prices. [illegible]

have been much checked by the improvement in the currency and by the more vigilant control which is now exercised over these officers. At present the Company's Rupee is the principal coin in circulation and as the Bazar rate for shroffing them varies from one to 2 annas per 100 the Shroffs at the public treasuries can seldom derive a sufficient profit to make it worth their while to risk dismissal by attempting their former impositions. I may here observe that the occupation of the Shroffs in the different towns is becoming daily less by the increasing circulation of the Company's Rupee and that the profits which they formerly received may be regarded as a saving in the income of the ryots, and the rest of the community.—

6. The principal changes in the cash transactions of the ryots during the last few years are the introduction of the Company's Rupee - and the receipt at the Government

treasuries of Surat Rupees of the description called Chappa and Sulaki. The former as already observed has lessened the frequency of resort to Shroffs by introducing a coin which is seldom found counterfeit and bears an admitted an invariable value. The second change viz. the receipt of Chappa Sulaki Rupees at the Government Treasuries and their transmission to the Bombay Mint to be melted down, has put an end to a grievance which formed a ground of just complaint.—

7. These Rupees acquired their name from having been either notched or drilled to ascertain if they were of Silver, and their value had sank so much that the Bombay Government refused to receive them at par in the remittances from Canara. They were consequently at one period not received at all in the District treasuries, and at other times only at a discount of 2 per Cent. The result was very unfortunate for as the difference between a good Surat (Sahit)

Rupee and a Chappa or Sulaki one was quite arbitrary, the ryots were thus placed in the power of the Shroffs in their cash transactions both with the Government and the merchants. The loss of the records prevents my referring to the correspondence to which these Rupees gave rise, but the representations of the Officer in charge of the Province in Fusly 1242 obtained their reception at par in payment of the Government revenue and thus saved the Ryots from a loss in their money dealings of from 2 to 4 per Cent.—

8 Another change to which it appears proper to allude has benefitted the land holders in the District of lower Coorg. They now pay their Kists in Silver while under the Rajah they were required to pay gold and Silver was only received at a discount of 3-5 as p to the Bahadry Hoon or 5½ per Cent.

9 The new copper currency of annas and half and quarter annas pices has also effected a slight change in the situation of labourers and their employers to the disadvantage of the latter. As 80 of the old pice were considered equal to a Rupee

Fort St George 6th March 1843.

Rupee and 3 price to one anna, a person could formerly obtain 17 labourers (at 6 price or 2 annas each) for two Rupees, while in the new currency he can only procure sixteen.—

10 In conclusion I beg to remark that Silver is annually brought into the District by Sea from Bombay and Arabia, and by land from Hoobly and the Deccan towns in payment for the Canara rice and betel nut. As sixteen lacks of Government treasure are annually shipped for Bombay and the import trade is very petty compared with the export the annual importation of Silver must be very large to meet the wants of the District and pay for the produce exported, but it is brought with so much secrecy that I could furnish no Statements which would approach at all to the truth. Judging from the general trade of the District and the Government collections, and remittances to Bombay the importations must annually amount to between 25 and 30 Lacks.—

17 para 3

To C. R. Cotton Esqre
Commissioner &c &c &c

Sir/

1. I have the honor to acknowledge your letter of the 20th June last, and to offer the following remarks on the points alluded to therein regarding which you request further information.

2- I concur in opinion with Mr Blair that there has been a large increase in the Cultivation of rice in this Province &c The want of stalwar accounts does not enable me to state the extent of this increase, but it is very considerable, and ought not to be estimated by the Kosagam Berez or the addition which has been made to the assessment of the Province on account of waste land newly taken into cultivation. The additions to the assessment under this head since the commencement of our rule including both garden and rice lands amounts to only Rupees 31397-4-1.

3- The increase to which I allude, as attributable to the cultivation of estates which formerly were let waste, and to the conversion of high gardens into rice fields by levelling or

Fort St. George 6th March 1843.

or improvements in irrigation, but principally to a spirit of encroachment which exists throughout the Province, and induces the landholders to add to the value of their estates by secretly extending the boundaries or increasing the number of their fields when they adjoin unoccupied Government land. This practice is universal, and I am inclined to think that from it and the other causes which Mr Lane enumerated the extent of rice land now under cultivation is greater by one tenth than during the first period of our rule.

4 To account for the export of rice by sea not exhibiting a corresponding and steady increase I beg to observe that even if the same extent of land continued under cultivation the exports would be found to vary considerably, as they are affected not only by the extent of land under culture, but by the state of the crops, and by the demand at the ports, which regulates the consumption within the district. Another circumstance, which appears entitled to weight, is that formerly the Sea Customs were under the Superintendence of a separate European Officer, when a more vigilant control could be exercised than is practicable at present when they are under the charge of the Principal Collector whose attention is necessarily engaged by other

Fort St. George 6th March 1843

superintendence of the Native servants which has thus arisen would be most liable to affect the exports of rice as it is chiefly sent to the Persia and Arabian Coasts, where our Certificates and Port Clearances are not required and the custom house servants have consequently opportunities of embezzlement.

5. But the principal cause which has prevented the exports increasing to a greater degree is the large addition to the population of the District, and the consequent increased home consumption of rice. And it is here necessary to observe that the exports, large as they are, are only a fractional portion of the produce of the District not exceeding I believe, one third. The returns show that in Canara, omitting Coorg, the population has increased since Fusly 1210 from 5,92,635 to 7,91,732, and if each person on an average consumes daily 1/4 of a seer of rice the addition to the Home consumption would thus annually amount to 4,36178 Moodahs. Part of the increase in the population as shewn in the return is no doubt less owing to the census being now made with more accuracy, but allowing for deductions on this account the actual increase is still so great as to materially add to the home consumption of rice, and prove that the cultivation must have extended when this demand is supplied without the export being diminished.

Fusly.	Census
1210	5,92,635
1225	6,70,335
1239	7,07,571
1245	7,26,680
1248	7,91,732

6- The account of the exports marked C which accompanied Mr. Blairs letter included as you observe, Canara and Mysore products under one head and was therefore less valuable as a Criterion of the increase of Cultivation within this Province- I regret that the records of my Office do not enable me to forward a Statement distinguishing the produce of the two countries from the commencement, but I enclose an # account exhibiting in detail for the last 13 years or from 1826/27 to the present time the export of Canara and Mysore rice, and the other principal Articles entered in the Statement- C- This account shows that notwithstanding the additional quantity required for home consumption the export of Canara rice has latterly increased, and if the records admitted of a full statement being prepared it is probable that a similar result would be apparent from an early period of our Government-

A.

7 It only remains for me in connexion with this subject to allude to the exports of 1824/25 which require explanation as you will observe that they amounted to 14,61,771 Moodahs and exceed the exportation of any other year even of the present when the foreign demand

Exports of rice	by sea
Year	Moodahs
Average of 1833/34 to 1837/38	10,73,469½
In 1824/25	14,61,771
In 1838/39	13,61,767

quantity cannot be ascertained was doubtless the produce of Mysore, but still the difference in the exportation of that and other years support the observation which I have made that the exports are in a great degree independent of, and do not therefore shew the extent of land under Cultivation- When rice is cheap it is extensively consumed within the district, but when an active foreign demand raises the price, the mass of the people sell large portions of their stock and either limit their consumption or subsist on inferior descriptions of grain. The exports thus vary Considerably even when the cultivation remains the same, and it is to be observed that in 1824/25 the exportation was carried to such an excess that rice was brought from Malabar to Mangalore to supply the home market, a circumstance which has not been known except on that occasion and in the present year.

8 It appears to me that the experience of 1824/25 and the past season is of great value in shewing the resources, and prosperity of the Provinces. The unusually large exports of these years were owing to an active foreign demand, not to any peculiarity of the season, indeed in the past year the crops did not exceed the average, and they shew in conjunction with the steadiness with which the revenue has been realized in ordinary years, that food is plentiful and

their assessment, or by a trifling sacrifice for which they receive due profits, add largely to the stock of grain available for their markets

9 I shall now proceed to offer such observations as occur to me on the present and past state of the Betel nut-gardens in the upper and lower Salooks, and regret that this description of Cultivation forms an exception to the improvement which is otherwise visible throughout the Districts, Colonel Munro in 1801 found the gardens in a very depressed state which he attributed to the existing disorders of the Country and vexatious restrictions on the part of the Government in the disposal of the produce. The abolition of these restrictions and the tranquillity and revival of trade which followed our assumption of Canara, proved very beneficial to these Cultivators, but their prosperity was only temporary and a continued fall of prices has latterly deteriorated their condition.

10 The Statement **E** which accompanied Mr. Blair's letter shows the prices of Betelnut, Pepper, and Cardamums, the produce of these gardens, but as this Statement was made upon the average of the whole Province, I forward an account prepared for the Salooks of Sondah Bilghi and Sirsah in which they are chiefly produced. The great decline

B

in the case of Pepper and Cardamums by the European market being now partially supplied from other countries. The causes which have affected the value of Betelnut are less apparent but the decline in its price is attributed partly to considerable quantities being imported at Bombay from Malacca and partly to the demand being diminished in Neggoor, Wyrag and other interior districts which are supplied from this Province. To account for this falling off in the demand it is stated that the dissolution of the large Native Courts and Armies which were assembled in the neighbourhood of this frontier during the Mahratta empire, and the diminution of the currency throughout India has checked the consumption. These causes appear sufficient to affect materially a luxury used at festivals and state occasions, and it is observable at present that the demand for Betelnut is brisker in those years which according to Hindu ideas are propitious for marriages.

11 This decline of Prices has affected very unfavorably the condition of this class of ryots, and has caused considerable changes in the cultivation. The exports do not yet exhibit a falling off as the prices are still sufficiently high to repay the cost of production in favorable districts but the profits of the cultivators are generally

C & D

diminished

diminished, and in those places where they have to contend against an inferior soil or high assessment many of the gardens have been deserted and others are annually thrown up. This result has been hastened by the thoughtlessness of the Cultivators themselves who did not lessen their expenditure in proportion to the decrease of their income. They have thus become so embarrassed as to be often merely the labourers of their creditors to whom they assign their produce. In this state they are easily led to throw up their gardens, as their Brahminical caste ensures them a subsistence and Potails or principal inhabitants secretly accelerate such a result in order that the gardens may be valuable as rice land which in the Balaghaut Talooks is scarce and valuable.

12 The Districts which have suffered are the Talook of Supah and the Naganies situated under the range of Ghauts in lower Canara. The Betelnut in these places is of an inferior description, and the soil does not admit of Cardamums being produced. In Supah especially the gardens appear to have been introduced against an unfavorable climate and soil when the cultivation was attended with large profits, and they are now fast falling into decay. In the Talooks

Bilghi where Cardamums are extensively grown and the Betelnut is in more request on account of its finer quality, the cultivation has rather increased and the Ryots are in a less depressed condition.

13. As the opinion which I have above expressed regarding the decline of the Betelnut gardens in the Payenghaut Naganies differs from that stated by Mr. Blair in his answer to your former questions, I beg to remark that Mr. Blair appears to me to have been misled by the entries of the exports at the Sea Custom Houses. As the export duty on Payenghaut Betelnut is less than on the Balaghaut and the absence of Chowkies between the coast and the Talooks of Supah Sondah and Bilghi enables the Betelnut to be brought down without observation, a portion of the quantity shipped as the produce of the Payenghaut, is in reality brought from above the Ghauts, and the accounts thus appear to show that the cultivation in the lower Talooks must have extended in proportion of the increase in the shipments but any personal observation and the inquires made by me at the annual settlements satisfy me that the cultivation of Betelnut below the Ghauts is on the decline except in the Vittal

Fort St.e George 6th.e March 1843.

Vittul Division of the Beeul Taluk. I am not aware of any instance of gardens being newly planted while every Mogany contains several which have fallen into decay and are now mixed with the Jungle. It is also to be observed that this result would in some degree have followed the late migration of the inhabitants from the inland districts to the coast even if thise gardens which do not yield Cardamums and produce an inferior description of Betelnut had not been the first to suffer by the decline of prices.

14. I regret that the want of Stalwar accounts to which I have already alluded in the case of rice lands does not enable me to forward a statement shewing the extent of land now occupied by gardens in comparison with former periods. I therefore send in its stead a Talu=war Statement of the Exports of garden produce by land, and by sea throughout the Province and detailed accounts for the 3 Balaghaut Taluks of Supah Sondah and Bilghi. These latter accounts shew the Jummahbundy and the annual Exports, and by comparing them with the Statement of prices the condition of the ryots and the causes of the Chang=es in the settlement either from low prices or bad seasons are to a considerable extent apparent. To ascertain in any degree the increase or

C & D

E F & G

Fort St.e George 6th.e March 1843.

decrease of cultivation it is necessary to take the average of the exports for several years as the gar=dens are so affected by the seasons that the produce of different single years varies considerably.

15. These Statements shew that the exports have on the whole increased and that low prices and a consequent diminution of profits have caused the distress under which this class of rayets labour. In explanation of the increase in the exports when so many of the gardens as described by me, have fallen into neglect, I beg to observe that I attribute it chiefly to the check now given to smuggling but partly also to those cultivators who continue unembarrassed in their circumstances having endeavoured to make up for the lowness of price by gradually extending their gardens and increasing their produce. In Sonda and Bilghi the increase of the Haig population has tended to this result, and the additional care which is bestowed on the gardens remaining under culture is visible in the increased production of Cardamums and Pepper.

Haig population of Sonda	
Fusly.	Population.
1212	10,284
1220	11,365
1231	11,842
1236	11,472
1248	12,133

H

16. The accounts of the exports from the Balghaut Taluks will shew you that in Pepper there has been a considerable increase. The cultivation of Cardamums has extended in an equal

Fort St. George 6th March 1813

equal degree but the great difference in the Hawlut duties of Canara and Mysore on this article, and the convenient situation of the Chundergooty Taluk in Nugger which lies between Sonda and Bilghi, causes a large portion of the produce to be smuggled across the frontier, instead of being brought to the Canara Chowkies. I annex a memorandum of the Mysore and Canara hawlut rates, and consider it advisable that the smuggling should be stopped and the Cardamums of Canara placed on a more equal footing with the produce of Mysore, by our present high duty being modified.

17 The attention of the officers employed in the province has been continually turned to the situation of the Garden cultivators, and different means have been suggested for the improvement of their condition. The general opinion appears however to be that while it would be a needless sacrifice of revenue to oppose the conversion of inferior gardens into Paddy land when abandoned by their owners, as there is no prospect of their being replanted, the tendency to throw up gardens might be checked and the general condition of the cultivators improved by lessening the land assessment. For this purpose

Fort St. George 6th March 1813.

to assess gardens at the rates fixed on rice fields and such a measure would act beneficially in two ways. 1st. by its affording a direct remission and 2d. its enabling the cultivators in consequence of the diminution of the demand against them, to watch the markets, and dispose of their stock to more advantage.—

The advocates of this measure, and I include myself amongst the number, would wish the Government revenue to be collected indirectly as at present by the Hawlut duties which, you are aware, are heavy, and yield a much larger revenue than the land tax. According to Colonel Munro's calculation the duties collected on the produce of a well cultivated garden amount to 6 times its assessment. These duties are at present, I understand, under consideration by the Committee of Customs, and though I should be glad to see the Tariff prices of Garden produce brought nearer to the market rates, I hope these duties will not be given up. As they are paid entirely by the foreign consumer, their abolition would confer no benefit on the cultivator, and it would appear a waste of the revenues of Government to abolish them while other taxes which are really burdensome

and

and injurious in their operation are retained - I annex
I for your information a statement shewing the Land
Tariff prices of Garden produce compared with the
market rates, the per centage of the Hawlut duties,
and the collections of the past fusly under this head -

19. To illustrate the advantages of a light
J assesment, I forward a statement of the Summah-
bundy of 3 gardens - Maganies in the Vittul Division
of the Betul Talook, in contrast with the garden
Maganies of Honore, and Ankola - In the former the
settlements are realized with ease and regularity and
these districts form an exception to the observations
which I have made regarding the decline of this
cultivation below the Ghauts - In the latter as well
as in the interior of Buntwal the Collections are
made with difficulty, notwithstanding that the
settlements fall much below the Beriz and the
gardens are in a declining state, a result as much attri-
butable to the difference in the assesment, as to the
comparatively unhealthy situation of these Maganies -

20. In accordance with your request I forward
K L M. separate accounts for the Magany of Sial Bunneer in
the Cundapoor Talook exhibiting its land assesment,
its exports and the prices obtained by the ryots for their
garden produce - From this Talook not having been under
my superintendence I am not personally acquainted

with the state of the gardens, but the favorable cir-
cumstances in which the Bunner Magany is placed
give its inhabitants considerable advantages in the dis-
posal of their produce, and render their condition more
prosperous than the generality of the Betelnut cultivators -

21. This Magany is properly a portion of the
Sauger Kerry Talook and was formerly granted in
Ular by the Sovereigns of Nuggur to the Devastan
at Coloor below the Ghauts - Consequently when Canara
came into our possession in 1799 and the Devastan
Enams were resumed, endowments of money being
granted in their stead, a tusdeek was assigned
from this Treasury to the Coloor Devastan and
the collection of the land revenue and the general
management of Bunnur were undertaken by the
Canara authorities - The accounts of the Province
therefore shew the annual settlements from fusly
1210 until the present year -

22. The Hawlut and Sayer duties
remained however under the Mysore Government
until fusly 1234 when a correspondence commenced
on the subject and these duties were finally made
over to Canara - The loss of the Nuggur records
renders me unable to detail the correspondence,
but it appears that a Custom House was not establish-
-ed, and the Canara system regularly introduced until
fusly

3901

Fort St George 6th March 1843.

fusly 1237 since which period I am able to send an account of the yearly collections.—

23. The inhabitants state that their condition has deteriorated since the fall of the large neighbouring city of Nuggur which formerly afforded a market for their produce and contributed to the prosperity of the surrounding country. But notwithstanding this circumstance which has doubtless had unfavorable results, this Magany exhibits a solitary instance of the cultivation of Betelnut having been encouraged by higher prices being now obtained, than at the commencement of our rule in fusly 1210. The variations in the price are exhibited in the statement, and I attribute their increase to the transference of the Hawlut duties from Mysore to this District joined to the excellent quantity of the Betelnut—

24. The Betelnut of Ikerry Sauger is of so superior a description that it successfully competes with the produce of Soraba and Bilghi in the Bellary and Cuddapah markets notwithstanding that it is burthened in the first instance with a heavier Hawlut duty and has to pay customs a second time on entering a Company's district. The difference in the Nuggur and Canara Hawlut is exhibited in the margin and you will perceive that Hunnar

Betelnuts per maund	2					

3902

Fort St George 6th March 1843.

advantages to its Pepper and Betelnut by its annexation to Canara. These advantages are two fold 1st the actual difference in the Canara and Mysore duties and 2ndly the exemption from a second demand in Bellary and Cuddapa on the production of a Canara Pawannah circumstances which are amply sufficient to account for the comparative high prices which these ryots obtain.—

25. Under these favorable circumstances the cultivation of Betelnut has doubtless had a tendency to increase rather than diminish especially as the annual settlements have been made with much indulgence, but the absence of accounts puts it out of my power to forward any statements shewing the extent of land occupied by gardens at different periods. I regret this inability, as the extent of ground under cultivation cannot be judged of by the exports, which vary according to the season and the success with which smuggling is carried on from the neighbouring Mysore Villages. The representations of the Nuggur authorities shew that large quantities of Betelnut are clandestinely imported in order that it may be finally sold as the produce of Bunnur and subjected to the Canara instead of the Mysore Hawlut.—

26. In concluding my remarks on the gardens I beg to observe that the only change on their permanent

permanent land assessment has been the introduction in some Talooks of the Tahrow, and consisted of an entire or partial remission of the shamil or additional assessment which had been imposed by the Government preceding our own. This remission was common to the rice as well as garden lands and was made in reference to prior collections rather than to the produce of the different estates- In the Balaghaut Talooks a survey has been made and accounts prepared for introducing an assessment framed upon it, but as much difficulty was found regarding the gardens and the realization of the new rates appeared in some Maganies impracticable the survey assessment has not yet been formally introduced —

27. The variation in the prices of Betelnut, and the decay of some of the gardens has however, caused fluctuations in the Collection of the Land Revenue, and I have therefore forwarded statements shewing the annual settlement of Rumeur and the Garden Maganies in the Balaghaut- The changes which have occurred in the Tariff and the land and the Sea Customs are exhibited in the enclosed N.O Statements and will explain the Sayer receipts not being always in the same proportion to the produce exported —

28. In reply to the questions contained in the 5th Para of your letter I beg to observe that the increase in the

value of land within this Province is most observable in the Coast Maganies of the Southern Talooks where the population is numerous, and the assessment is generally light The increase is also more visible on rice lands than in Cocoanut plantations which require greater labour and yield slower returns- The improvement is not however confined to South Canara but extends throughout the whole sea coast and those parts of the interior which are healthy and free from jungle —

29. The chief causes of this improvement are an increase of population and a confidence on the part of the people both in the limitations of the Government demand and the security of property which induces persons to vest, instead of hoard their capital. Land, as I have already observed in my letter of the 20th July last, is the favorite investment, for money, and the profits acquired in trade are generally applied to its purchase- As an evidence of the increased value which land now bears I enclose a Statement exhibiting the prices given P for 55 estates, situated in different parts of the District, which have been twice disposed of by private sale- Numerous other instances might be collected if deemed necessary —

30. But the principal evidence of the increased value of land is to be found by comparing the present state of the Province with the descriptions given of

of it by Colonel Munro in 1800 who observed "the lands which are now saleable are reduced to a very small portion and lie chiefly between the Cundapoor and Chendragerry rivers, and within 5 or 6 miles of the sea. It is not to be supposed that the whole of this tract can be sold - but only that saleable lands, are scattered through every part of it, thicker in some places and thinner in others particularly in the Mangalore District - There is scarcely any saleable land over on the sea coast to the Northward of Cundapoor or any where inland from one end of Canara to the other excepting upon the banks of the Mangalore and some other great rivers." In contrast with the above description it may be observed that all the rice land on the coast, and in those parts of the interior which are free from jungle, are now saleable, and that the readiness with which the revenue is realized and the numerous suits which are filed before the Courts shew the value in which land is generally held —

31- The lands which have absolutely deteriorated in value consist principally of inferior Betelnut Gardens, and rice lands situated in the unhealthy and jungly Maganies under the line of Ghauts - The latter were formerly cultivated in consequence of the seat of Government being above the Ghauts, and the coast being exposed to piratical incursions - The ruins of several large towns are still visible, but latterly the security of the coast, its superior salubrity and its advantageous

have led the population to throng towards it - The other estates whose value has declined consist of decayed Cocoanut Gardens, and lands exposed to injury from floods - In some instances the unsuitable heavings of the Beriz has prevented money being expended on these estates when once they have fallen into disorder, but this obstacle to their improvement is now in the course of removal by the introduction of a Modified Assessment -

32- In reference to the 6th Para of your letter I beg to observe that the situation of estates, similar in extent and fertility is found to affect their value in proportion to the comparative expense of conveying their produce to market - The precise difference would vary according to the description of labour employed and its being abundant or scarce - It is not therefore possible to give a general answer to your question but in illustration of my remarks - I beg to instance the case of two estates in the neighbourhood of Mangalore yielding each in rent a corge of rice and assessed at 32 Rupees, one on the bank of the river, and one at 20 miles distance - As it is customary for the Mangalore Merchants when purchasing rice from the ryots to enclose their bargains at the prices prevalent at the port and to deduct the cost of conveyance from the village to the coast the difference in the value of these estates arising from their situation would be as follows. —

1st Estate			2d Estate		
Price of 8 corge of rice at the port		64 " "	Deduct assessment	32 " "	64 " "
Deduct assessment	32 " "		Boat hire	2 " "	
Boat hire for conveying rice	2 " "	34 " "	Land Carriage for 20 miles at 2 annas per Moodah	5 4 "	39 4 "
Net profit to Landlord		30 " "	Net Profit to Landlord		24 12 "
Value of Estate at 10 years purchase		300 " "	value of Estate at 10 years purchase		247 8 "

Fort St George 6th March 1843-

Excess in the value of Cestate on the river Rupees 52/ps or 17½ per Cent-

33. In reference to the concluding part of your letter I have the honor. to observe that the principal obstacles which prevent the cultivation of Sugar Coffee, and other more valuable articles than rice appears to me to be, 1st. the want of any prominent and regular demand in consequence of there being no enterprising and wealthy merchants on the coast 2nd. the scarcity and dearness of labour which discourages farming experiments and 3rd. the poverty of the greater portion of the Cultivators and their dependence for subsistence on the yearly returns from the land - The latter cause affects estates belonging to even rich proprietors as they are in most instances subrented, and it is generally difficult to dispossess the tenants - I am happy to observe that the cultivation of sugar is extending and that it is now produced in villages where it was formerly unknown - an active local demand alone is wanting to increase this cultivation the soil, climate and plentiful supply of water allow Canara to be a Sugar-Country -

Acting Principal Collector

Memorandum

Fort St. George 6th March 1843.-

Memorandum

The Acting Principal Collector regrets that in consequence of alterations in the Talooks, the abolition of different Choukies, and the absence of perfect Accounts, he is unable to send the Statement D (Talookwar account of the exports by land) alluded to in Para 11, and is obliged to limit the Account C. to an abstract of the total exports of the Province by Sea. He trusts that the Accounts H and L which shew the exports by Land from the Garden districts will supply the place of the intended Statement. D.-

	Coppa	2540 5 2	2173 7 2	1830 8 -	1878 2 -	26 1 "	be procured - The average
	Hadvelli	9838 13 7	7674 15 5	7323 12 5	7713 4 -	22 " 1/3	of the remainings Ma-
An Kola	Nagoor	9789 2 5	6652 13 -	5533 3 10	5885 " 10	39 14 1	ganies from 1209 to
	Haritta	9148 4 5	6350 1 7	5498 " 5	5745 15 2	37 3 2/3	1213.

It is to be observed that the slight difference in the former and present Collections of the Be Rul Maganies arises from the introduction of the Tahrow Beriz which lowered the Assessment. In the remaining Maganies the Settlements would have exhibited a greater decline, but for the extension of rice cultivation. The State of the garden is most visible in the difference between the Beriz and the Settlement.—

Mangalore, 26th November 1839.

No 19 in No 3

To

C. R. Cotton Esqre

Commissioner &c &c &c

Madras

Sir,

In reply to your letter of the 19th July, I have the honor to express my regret that it is not in my power to forward accounts in the form transmitted by you to illustrate the condition of villages which have decidedly deteriorated or improved in their circumstances.

In this province the assessment is fixed on Estates in the aggregate, and in the early part of our rule the annual settlements were made chiefly in reference to former collections and enquiries were seldom held regarding the manner or the extent of the cultivation. It has also always been usual to abstain from interference or examination regarding the internal management of Estates of which the proprietors pay the full Beriz and the records do not therefore contain the information necessary to prepare the accounts which you wish to receive. I have made enquiries to ascertain the extent of information which it is possible to collect regarding the details of the land at different periods, but it proved so scanty and of such questionable authenticity that the transmission of accounts founded upon it appeared useless.

Fort St. George 6th March 1843.

3 The returns of the population and Cattle, and the progressive increase or decrease of the Revenues are the only proofs which it would be in my power to adduce of the comparatively prosperous or depressed state of different Villages, and these afford but imperfect evidence and would in some instances lead to wrong conclusions, as an increase in the population and the revenues is not inconsistent with a decline in the circumstances of the Landholders. But although it is not in my power to forward detailed accounts, I beg to offer the following remarks as the result of my personal observations.

4 The Revenue system throughout Canara is the same. A limetted Beriz is fixed on each estate, beyond which the demand of Government never extends, while at the same time, the settlements are made in reference to the capabilities and produce of the estates where the Beriz appears sufficiently high. No interference is made with the Landlords, and they are allowed to subrent or cultivate their estates entirely at their pleasure. It is necessary therefore to attribute the comparative decline and prosperity of different Villages to other causes than the Revenue system which

in

en itself has many advantages and is uniform thoughout the Province. The Principal cause will be found to be the relative situation of the Villages and the demand which exists for their peculiar produce.

5. In the case of the Beetel= =nut gardens a decline of price has caused many of the estates to be thrown up, and in the rice districts the migration of the inhabitants from the interior to the coast as described by me in a previous letter has benefitted the latter portion of the Province at the expense of the former. These are the princi= =pal causes of the charges which have occurred, but in some instances injuries from rivers and the ravages of small pox and Cholera have caused Villages to reto= =grade. Occasionally the heaviness of the Beriz has acted detrimentally but as no increase of assessment has taken place under our Government this cause has seldom in itself led to lands being deserted, though it has had an influe= =ence when other circumstances tended to the same result. Enquiries are now being held to ascertain the cases in which this cause prevents the Cultivation of land

and

Dated 26th Novr 1839. Para 31

and it will be gradually removed.

6. That the heaviness of the assessment is rarely in itself a cause of land being left uncultivated appears from the facts that the Government assessment seldom equals the rent paid by tenants to the landlords and that highly assessed lands, on the coast are not deserted for Estates in the interior which are often lightly taxed and can be obtained upon application without purchase. The alterations in the state of Villages are therefore chiefly to be ascribed to their position the population having for= =merly been induced by circumstances to reside in the interior while they now prefer the coast where labour is cheaper the climate is more healthy property is equally safe and they have greater facilities in dis= =posing of their produce. Their superstitions also lead to the same result as the inhabitants of the interior districts attri= =bute the sudden attacks of illness and fever to which they are liable, to the lands being haunted by evil spirits and many of the Estates in the Ghaut Maganies have been deserted under this impression although the inhabitants lose in their circumstances

circumstances by a change of place.

7. In reply to the question contained in the 2d Para of your letter I beg to observe that the community in this Province is so exclusively agricultural that few changes occur in the extent of land annually under cultivation. The increase which takes place is to their benefit as it arises either from encroachments on the unassessed waste or the cultivation of high fields which are only occasionally sown when the rains are abundant and seasonable. In the frontier Maganies of the Balaghaut Talucks where there is a large quantity of unoccupied land the influence of the season is considerable in inducing the inhabitants to extend or contract their Cultivation, but below the Ghants the Cultivation although gradually on the increase is more steady. It is to be regretted that in Canara few instances exist of the inhabitants turning from agriculture to other more profitable pursuits. The absence of Manufactures is disadvantageous to the District and of the two clases into which the inhabitants

inhabitants are divided the changes are most frequent from the commercial to the agricultural.

8. In reference to the questions at the close of your letter I beg to state that Villages where the Assessment is light are usually observed to be in a decidedly prosperous state, the revenue is collected with comparative facility, and the Landlords are generally more considerate to their tenants. At the same time it has not been found that the lightness of the assessment induces the people to abstain from demands for remission, and the Landlords adduce the losses of their tenants, and the necessity of leniency to them as a reason for a reduction in the Government demand. I have already mentioned in my letter of the 8th instant that few Enams exist in Canara and that they have little influence on the Cultivation which I attribute to the lands on which they are granted generally yielding a rent which would leave a net profit to the proprietor after the payment of the Sircar demand and would consequently ensure their Cultivation if

no

no exemption from assessment existed.

9. In conclusion I have the honor to express my regret that it has not been in my power to furnish more detailed information but as the land is private property, and the Sircar demand has been annually paid on most of the estates without demur, or enquiries being necessary the local authorities of the Province are as unacquainted with the internal management of the Estates as the Government is in England regarding the arrangement which private proprietors make regarding their lands.

Footoor
Canara,
28th January 1840.

Signed/ C. Maltby
Acting Sr Coll.r

Extract from Mr Grant's report respect=
=ing Tobacco Monopoly—

With the inferior disproportion of public Servants to the population, the controul over weights and Measures seems little more than nominal especially in places remote from the eye of the Magistrate and the perfection of any system of Monopoly cannot with safety be allowed to depend upon the probability of such a check being effectual— The highest quantity of Tobacco consumed in Malabar since the Monopoly to the end of fusly 1228 has been 2544 Candies the average for the whole period from Fusly 1216 to 1228 inclusive is 1854 Candies — 15 Mds — 68 3/4 tbs valuing this at 220 Rupees the Candy the price which it cost the population may be reckoned to be 4,08,852 Rs — 2 — 25 —

By a population of 7 Lacs of souls the quantity consumed by each individual is 5 Tulals and 3 Rupees weight and the value of that quantity " — 2 — 33 3/16 — 7 — 39 — Of the whole population however Childrenes to the Number of 2,00,418 may be deducted who do not consume tobacco and there remains 499,582— But a further deduction from them of one fourth may be made for Brahmins Women and many nair Women who do

tobacco and Men of different Castes who are not in the habit of it and the consuming population will be 374,687 whose consumption may average Talals 9 and Rupees Weight 9 per annum or 1 — 0 — 36 or 14 — 1 — The consumption before the Monopoly may be reckoned at 42 per Cent more than that since and the Total will Candies Mds Talals
be 2639 — 16 — 14 · or Talals 9 and Rupee weight 5 3/4 for each person of 7,00,000 Souls the value of which at 60 Rupees the Candy the price at which it is said to have been formerly procurable

Rs as Mds Cash
will be " " 90 — 2 — 73 —

The difference between the present and former price is therefore " 1 — 42 11/16 or 4 — 46 —

Report from Principal Collector 12th March 1839 Para 1.

3. "Of the last 10 seasons in the District of Coimbatore nine have been bad ones." a bad season affects to a certain extent the Cultivation of every description of land, but particularly those which depend for their produce on the falling rains Viz.t the Punjee or dry lands, the Garden or well lands, and the lands under Tanks. The degree in which lands watered from the Rivers that are fed by the S. W. Monsoon are affected in a bad season, depends entirely upon the locality of the Rivers. If the sources of these Rivers are far to the westward, the lands under them yield an abundant Harvest, in what may be the worst of Season, for other lands.—

In Coimbatore, the Rivers which possess this advantage in the greatest degree are.

1st The Cawvery.
2nd The Bhowany.
3d Allyoor.
4th Minor Streams.

In a less degree "The Umbrawatty" partially the "Noel."

4. It will be seen from the accompanying Statement, that comparing the good season of Fusly 1236, with the very bad season of 1246, there was an actual increase in the latter year in the Revenue from the Land

watered by the River "Bhowany" and "Allyoor" a very trifling decrease only on the Revenue dependant upon the "Umbrawatty" and an immense defalcation from the lands of every other description. With this incontestible proof, that the prosperity of the Revenue of Coimbatore depends entirely upon the degree in which the District can be brought within the influence of artificial irrigation it is very extraordinary to hear an opinion from the Acting Principal Collector that it would neither be for the interest of the Government or the people that any considerable expense should be incurred in improving or extending the works of irrigation. His reasons are, that

Report parag. as "regards the Ryots a considerable "extension of Cultivation would by reducing "prices be detrimental to the interests of those "who did not share in it, and with respect to "those who have the means and inclination "to extend their Cultivation there appears to "be quite sufficient waste lands in the "District both wet and dry which they bring "into Cultivation without Government incurring "any expence to enable them to do so."

5. For nine out of ten years, this fine District has been reduced to a state of

extreme misery, simply because the usual supplies of water for the Cultivation of the land have been withheld; whenever these supplies have been furnished, the Country is in a flourishing state - the Revenue of Government is steadily increasing - the value of land is enhanced, and there is a total absence of that misery which prevails in every other part of the District, and yet the Collector thinks it would be better to risk the periodical return of this misery, than to do any thing that might hurt the interests of the favored few, who thrive upon famine prices, while the bulk of the people are in jeopardy for food.—

Statement C and D.

6- The Collector shews that there has been a steady increase in the prices of the principal articles of agricultural produce since the first Cession of the Province to the British Government "and that the rise of price during the last 12 "years, is to be attributed to deficiency of "produce from bad seasons." Comparing the prices of paddy which prevailed in 1802 when the survey assessment was introduced, and in the 5 succeeding years, with the prices of the last 8 years, there is an increase of upwards of 20 per Cent upon the average in the last peri-

notwithstanding the very large increase that has been made in the interval to this species of produce, in consequence of improved irrigation - In some of the late years famine prices have prevailed, the produce of the Country has been quite insufficient for the population, and yet the Collector doubts whether any attempt should be made to increase the quantity of food.—

7- He seems to forget, that at all events, population is likely to keep pace with increase of produce - that the produce therefore of Coimbatore might be made as large and certain as that of Tanjore, without any permanent effect being produced upon prices - famine prices being left out of consideration -

8- Every fourth or fifth year the Government lose a large Revenue, the people suffer from scarcity of food, and the Cattle perish for want of water; if we are to do nothing to supply this want it is evident that these evils are irremediable; When the people of Coimbatore are starving, the people of Malabar to west and the people of Tanjore to the East, have abundance, simply because their lands are well watered.

9- The Collector appears to forget that the waste land, wet and dry, which he

extreme misery, simply be-

Subsist-

speaks of an unreliable for an uncertain supply to be cultivated without water. The more certain the supply of water the better the cultivation but no supply can be certain that depends upon the falling rains - when dry land is converted into wet the produce is increased fivefold, if the supply of water be never failing this increase is certain, and the Revenue of Government increases in nearly an equal proportion.

10- It is quite clear therefore, that instead of standing still, the Government should never relax their efforts until they have succeeded in turning upon the land all the water that is now permitted to run waste to the sea, When all has been done that can be done in this way, by far the largest portion of all the Districts, Tanjore alone excepted, will remain dependant upon the Monsoon rains for its produce, liable therefore or rather sure to be visited periodically with scarcity, and not certain in any one year of yielding a full harvest-

11- The records will shew that there is not a single District, Malabar Canara and Tanjore excepted in which a failure of Crops to

extent does not occur every year. The people of the Northern Districts have suffered severe privations for several successive years. In Ganjam scarcity prevails at this moment and yet in that and in the other Districts Rivers are rolling through them, filled with water, for many months in the year, which if turned upon the land, would ensure them abundance at all seasons.—

Report from Principal Collector 4th January 1841 Para 2.

12- In Coimbatore "the great fall "in the Revenue derived from the Nunjai lands "in Fusly 1246 was owing entirely to a defi- "cient supply of water in the Riverlands "bearing the assessment of Rupees 29,847 "were not Cultivated - and on lands which "were cultivated and assessed at Rupees "13,487 - remission for Shavi was granted to "the amount of 11032".-

"The decrease of Rs 256 was occasioned "by lands situated in the Village of Rumioor "in the extreme limits of the irrigation of the "Nunjah Pogaloor (Cavery) Channel not being "Cultivated owing to the want of water".-

"The decrease of Rupees 7896 was "owing to lands dependant on the Codavairy "Channel (Bhwany River) in the Village of

speaks of as available for Cultivation, cannot be Cultivated without water. The more certain the supply of water the better the Cultivation. but no supply can be certain that depends upon the falling rains - when dry land is converted into wet the produce is increased five fold, if the supply of water be never failing this increase is certain, and the Revenue of Government increases in nearly an equal proportion.

10. It is quite clear therefore, that instead of standing still, the Government should never relax their efforts until they have succeeded in turning upon the land all the water that is now permitted to run waste to the sea, When all has been done that can be done in this way, by far the largest portion of all the Districts, Tanjore alone excepted, will remain dependant upon the Monsoon rains for its produce, liable therefore or rather sure to be visited periodically with scarcity, and not certain in any one year of yielding a full harvest.

11. The records will shew that there is not a single District, Malabar Canara and Tanjore excepted, in which a failure of Crops to

extent does not occur every year. The people of the Northern Districts have suffered severe privations for several successive years. In Ganjam scarcity prevails at this moment and yet in that and in the other Districts Rivers are rolling through them, filled with water, for many months in the year, which if turned upon the land, would ensure them abundance at all seasons.—

Report from Principal Collector 4th January 1841 Para 2.

12. In Coimbatore "the great fall "in the Revenue derived from the Nunjai lands "in Fusly 1246 was owing entirely to a defi- "cient supply of water in the Riverlands "bearing the assessment of Rupees 29,847 "were not Cultivated - and on lands which "were cultivated and assessed at Rupees "13,487 - remission for Shaui was granted to "the amount of Rs 11032."

"The decrease of Rs 266 was occasioned "by lands situated in the Village of Rumnoor "in the extreme limits of the irrigation of the "Nunjah Pogaloor (Cavery) Channel not being "Cultivated owing to the want of water".—

"The decrease of Rupees 7896 was "owing to lands dependant on the Codavairy "Channel (Bhwany River) in the Village of

"Perindaloor of Sallemengal Talook and to lands
"dependant on the Calingarayen Channel not
"being cultivated from deficiency of water."

"This decrease (of 19757) arose from
"lands assessed at Rs 9529 in 19 Villages depend-
"ant on the Umbrauvilly River in the Caroor
"Talook not being Cultivated, and from re-
"mission being made to the Amount of Rupees
"10228 in lands the Crops in which failed from
"deficiency of water."

"The decrease of 652 is the assess-
"ment of lands left waste in the Talooks of
"Danaickenkottah Cheyoor and Pullachey
"owing to the failure of these (the Jungle
"streams)."

"The decrease (22589) from lands
"being left waste and from remissions having
"been made for withered produce."

13- No one who reads these details, can hesitate, I imagine, as to the expediency of expending money upon the improvement of the irrigation of this District - it is by such expenditure alone indeed, judiciously made, that we can hope to see it restored to its former prosperous state - the means of making this improvement are obvious Viz. the

formation of reservoirs in the most favorable positions for storing the surplus waters of the Rivers which are filled from the S. W. Monsoon, as proposed by the Engineer Colonel De Havilland and Captain Cotton.

14- The facility of doing this has been proved as far as the Bhowany River is concerned, by the experimental Reservoir which was constructed many years ago at Ootacammund, another such reservoir would give water enough to bring into cultivation the land assessed at 7079 Rupees dependant on the Codewairy Channel, adverted to in the preceding Para which is now left waste for want of water - an estimate for this work amounting to little more than 4000 Rs has been prepared by the Engineer, but in consequence of the unfortunate arrange-ment which has placed the Neilgherries and with them the streams upon which the Revenue of Coimbatore depends, under the control of the Collector of Malabar, nothing has been done in furtherance of the project.

15- Neither have any effectual steps been taken to ascertain whether sites

exist for the formation of similar reservoirs for the supply of the Cultivation under the other Rivers although this measure was recommended as long ago as the year 1828.—

The importance of such aids may be judged of from the fact that the defalcation of Revenue from the lands under the River Noel alone amounted in one year to upwards of 33,000 Rs.—

16— Next to the cultivation under Rivers, the land which is irrigated from wells is the most valuable in this district. It is a property that requires the most watchful attention from the Collector, as its value depends exclusively upon the water, and this value is created solely at the Ryots expense; any attempt therefore to levy the full assessment upon these well lands when the water fails is followed by consequences most disastrous to the Ryot.—

Para 12 "Should the water in the well of "a Garden field fail (the Collector observes) its "conversion from Poonjee into Garden land "has considerably diminished its value to "the Proprietor. It is saddled with a "higher rent than it will bear, a fact the

"Collector will not be willing to be convinced "until he finds that it has been lying waste "for several years in succession or until it "is thrown up altogether".—

17— But instead of an unwillingness to be convinced it is the duty of the Collector to search at once into the truth of every complaint that is made of the failure of water in a well, in order that this ruin may be averted, by a timely remission of the high rent, with which the land is saddled; this remission should only continue so long as the deficiency of water or its bad quality continues, it is better therefore to make it in the shape of a Cowle, which shall guarantee such a reduction in the standard assessment as may be considered necessary, than to change the classification of the land, because when the evil is removed, by greater depth being given to the well, or by the land being left fallow for a few years, it regains its original value, and no further alteration of the accounts is necessary.—

18— The acting Collector says that in the conversion of dry land into garden by excavation of a well "the assessment being

proportionally raised the profit is to the Government rather than to the Ryot. But the very reverse of this is the fact. the profit is so much greater to the Ryot notwithstanding the enhanced assessment as to give him a strong inducement so to improve his land. what else should induce him voluntarily to sink his own capital in such an interprize. he certainly does not do so with a view to increase the profit of the Government.

19. That it is highly profitable to the Ryot to incur the outlay, is proved by the fact, that the Revenue from this description of property had gradually increased from 2,08,446 Rs, its Amount when we first got the Province in 1800, to 5,47,348. the amount to which it had reached in 1826. This improvement was effected by the spontaneous and undided exertions of the Ryot the only indulgence accorded to him being an abstinence of demand for increased rent for such a period as was considered ample for the recovery of the outlay incurred in excavating the well. Of the necessity which exists for upholding the practice of making well lands, tho the wells may have been dug by the Ryots, [illegible]

20. The Revenue from well lands in Coimbatore has gradually declined of late years under the influence of bad seasons and of the high rate of assessment for such lands in the Southern Talooks of the Districts in which the Punjee rates of assessment are very low as compared with those of the Northern Division; where a Ryot holds land of both descriptions, the high rate of one is made up by the low rate of the other. but if assessment is without such alleviation it operates also to thraw Capital upon the lowly assessed land, and to check the excavation of wells upon which the prosperity of the Country so much depends. a revision therefore of the assessment in the Southern Division of the Districts with a view to its Equalization with that of the Northern. is urgently called for.

21. It has been already stated that a failure in the rains for 9 seasons out of 10 is the obvious cause of the present depression of the Revenue of Coimbatore. But although the main cause of the depression is obvious it is still necessary that a searching local enquiry should be instituted in order to ascertain

whether all that has been collected from the people has found its way into the public Treasury, and whether the large remissions which have been made of the public demand, have been made to those only who actually required it, or to those who did not require, & but who could afford to pay for it.—

22. Because it is well known to persons of Revenue experience, that bad seasons give opportunities for the perpetration of the greatest frauds, and that while the public Revenue suffers, those who most require relief are frequently not benefited. Pressed down as the Collector is by current busines, which is daily (from the complex system of our rule) becoming more onerous, it is impossible for him to make these enquiries, at the time which are necessary to prevent the occurrence of such abuse. and when many bad seasons occur in succession, the chances are that it abounds.—

23. The late acting Collector having stated that the system of granting Cowles for over assessed land had been

very prejudicial to the interests of the Cultiva= =tors of the land paying the full assessment, I requested the Principal Collector to favor me with any instances that might have come to his knowledge of this result. His answer is that the remark it was presumed, had, re= =ference to the inequality of demand occasioned by such Cowles, and to the loss which was in consequence sustained by those Ryots, who & paid the full assessment for lands bearing similar assessment. as the Cowles were & granted for the express purpose of equalizing the assessment, it appears difficult to & conceive that it could have had the effect attributed to it by the acting Principal Collector. Evidence in the abandonment of land paying the full assessment would have been forth-coming, if the practice had really & produced the effect attributed to it by Mr. Babington. But as Government is already & in possession of all that can be said on the subject pro and Con, I will only & venture to remark that much injury may be done to the Revenue, and much

Fort St. George 6th March 1843

injustice to individuals, if the practice is abandoned without a thorough understanding of its Merits.—

Enclosure No 4.

Referring to what I have said of the advantage to be derived from a judicious Expenditure upon works of irrigation. I beg to enclose a Statement which has just reached me from the Principal Collector, and which shews that from Fusly 1209 - up to Fusly 1249 a period of 40 years the sum Expended in improving and extending the works dependant upon the "Bhowany" and "Umbravotty" two of the Rivers which are well supplied by the rains of the S. W. Monsoon, was Rs 100,405 - and that the actual net gain from this Expenditure, has been Rs 10,60,340, that is gain, after deducting the Charge of the works, and the Revenue which the land was capable of yielding when it was dependent upon the periodical rains for its produce - This is an Increase of more than five fold to the Revenue, and of more than double that amount to the proprietor.

Dolacamund ----
2nd Febuary 1841 -

(Signed) S. Sulivan.

Fort St. George 6th March 1843.

To,
C. R. Cotton Esqre
Dyo Dyo Dyo

Sir,

I have the honor to reply to the Queries contained in your letters of the 28th August and 25th October 1838 and 24th January 1839-

1st Do you consider the District under your charge in a declining or improving condition with respect to its Land Revenue? - Coimbatore nine tenths of the last seasons in the District of have been bad ones and the Land Revenue has been much reduced in consequence - It is not easy to judge whether the resources of the District has been permanently impaired - A good season would shew this - As it is, the cultivation has been carried on every year to the fullest extent that the state of the season would admit of - It must however be noticed that the Revenue has of late years been raised with more difficulty than it used to be; that there have been heavier balances at the termination of the Fusles and more land sold by Action in satisfaction of the Government demands. Column 57 of the annexed Statement marked A exhibits the total Land

Revenue

Revenue Settlement of each Fusly since the District has been in our possession- the Land Revenue reached its highest point in Fusly 1236, Viz.t, Rupees 22,21,201-15-5 and sunk to its lowest in Fusly 1246, Viz.t Rupees 17,12,019-1-5-

2d- What Trade is increasing and what is decreasing and to what extent.-

2nd The only materials procurable for answering this question are the accounts furnished by the Renters of the Inland duties on the correctness of which little reliance is to be placed- The annexed Statement B prepared from those accounts exhibits the trade of the District from Fusly 1229 to Fusly 1234 and from Fusly 1240 to Fusly 1246- Accounts for the intermediate Fuslies were not furnished by the Renters and are not now procurable- It appears that the trade in

Fusly 1229	Value Rs	Fusly 1246	Value Rs
Candies-	1682-18-34000-	Candies	576-5700.

Chillies has increased to about five times what it was in Fusly 1229- The trade in Saltpetre and Raw Silk does not appear to have existed at all before Fusly 1240- The trade in Saltpetre amounted in Fusly 1246 to Candies 181-3. Value Rupees 37,840. and in Raw Silk to Candies 53-10-23 value Rupees 16064

trade in Lamp Oil has risen from Mercals 23,680 value Rupees 74,000 to Mercals 58,095 value Rupees 79,880- There is not much variation in the value of the trade in Piece Goods. The trade in Coarse Piece Goods exported to Bombay has improved and that in fine Piece Goods has been annihilated by the introduction of the English manufacture- The Value of the Trade in Fusly 1246 appears to have amounted to Rupees 19,39,380- A great falling off took place in the trade in Piece Goods prior to the period for which this Statement is prepared but I cannot procure materials for framing a Statement regarding it- The trade in Cotton has much increased but as it does not pay duty except on export over the frontiers of Foreign Native States I have not the means of shewing to what extent.-

3d What Manufactures are improving and what are on the decline?

3d The Manufacture of the finer description of Piece Goods which used to find a market in Mysore and Coorg has almost, if not entirely, ceased; that of Coarse Cloth and Canny (blue cloth) has increased. the former is exported to Bombay and the latter

Fort St. George 6th March 1843.

Revenue Settlement of each Fusly since the District has been in our possession- the Land Revenue reached its highest point in Fusly 1236, Viz^t, Rupees 22,21,201-15-5 and sunk to its lowest in Fusly 1246, Viz^t Rupees 17,12,019-1-5-

trade in Lamp Oil has risen from Mercals 23,680 value Rupees 74,000 to Mercals 58,095 value Rupees 79,880- There is not much variation in the value of the trade in Piece Goods. The trade in Coarse Piece Goods exported to Bombay has improved and that in fine Piece Goods has been annihilated by the introduction of the English manufacture- The Value of the Trade in Fusly 1246 appears to have amounted to Rupees 19,39,380- A great falling off took place in the trade in Piece Goods prior to the period for which this Statement is prepared but I cannot procure materials for framing a Statement regarding it- The trade in Cotton has much increased but as it does not pay duty except on export over the frontiers of Foreign Native States I have not the means of shewing to what extent.-

3d- What Manufactures are improving and what are on the decline?-

3d- The Manufacture of the finer description of Piece Goods which used to find a market in Mysore and Coorg has almost, if not entirely, ceased; that of Coarse Cloth and Canvy (blue cloth) has increased. the former is exported to Bombay and the

latter

latter to Canara.—

4th Is the price of agricultural produce (of irrigated and dry land) generally greater or less than during the early period of our administration? 4th Generally greater as shewn by the annexed Statements marked Cand D Rice, Cumboo Cholum, and Ragee of all which the principal food of the Inhabitants of this District. The rise of price during the last twelve years as shewn in Statement C is to be attributed to deficiency of produce from bad seasons.

5th Are the profits of agriculture generally greater than they were, in those lands where the Revenue has been for some time paid in money or is the reverse the case? 5th I cannot give a satisfactory answer to this Question.

The prices of agricultural produce have generally risen but the Crops have been scanty ones. The wages of labor are also said to be higher than they used to be. In any other Country but India if the profits of agriculturalists rose their general habits would become more expensive but in India a favorable change in the circumstances of the people produces this effect to a

limited degree. If their expenses are increased the circumstance does not shew itself by their adopting a more luxurious style of living, but by their feeding a greater number of poor relations and spending larger sums on marriages and religious Ceremonies. It is easily ascertained whether a man's general habits are more expensive than they used to be but it is not so easy to tell whether he spends rather larger sums than he used to do on particular great occasions. I do not think that any one is qualified to answer this question without having had long and intimate intercourse with the people much more intimate than can ever be obtained by a European Functionary. The more the subject is considered the more difficulty of coming to any satisfactory conclusion on it appears to increase. The Cowle system adopted by Mr. Sullivan has been very prejudicial to the interest of the Cultivators of land paying the full assessment. On the other hand the recent orders permitting the Ryots greater freedom in the throwing up of lands have been favorable

to them - Again the inland duties levied as they have been under Regulation X. of 1812 must have pressed heavily upon them both directly and indirectly -

6th Is there generally an increase or decrease of wet land cultivated?

6th 7th & 8th There has been a considerable increase in the cultivation of all these descriptions of land since the first year of our administration but a decrease since the 1241 attributable to a succession of bad seasons Col.s 2. 11 and 20 of Statement D. shew the increase and decrease of cultivation in each year in each description of Land since the commencement of our administration excepting during the period of the Triennial Lease.

7th The same of dry land cultivation?

8th The same of Garden land cultivation?

9th Would a considerable outlay in the construction or improvement of works of irrigation be generally beneficial?

9th I do not think it would be for the interest either of the Government or the Ryots that a considerable expense should be incurred in this District for the construction or improvement of works

irrigation - Two works involving a very heavy outlay have been mentioned to me as likely to answer but as far as I can judge from my limited knowledge I possess on the subject it is very doubtful whether they would not be losing speculations as regards the Government - As regards the Ryots a considerable extension of cultivation would by reducing prices be detrimental to the interests of those who did not share in it, and with respect to those who have the means and inclination to extend their cultivation there appears to be quite sufficient waste land in the District both wet and dry which they may bring into cultivation without Government incurring any expense to enable them to do so - there is not much wet cultivation under Tanks in this District - wherever there are Tanks the Ryots are clamorous to have them dug out - I believe there is no doubt that this would not answer and that the increased cultivation would not have repaid the cost before it would become necessary to perform the operation over again -

By

10th Is the Ryotwary or the Zemindary system of Revenue administration best suited to the circumstances of your District?

10th By a Zemindary system I do not suppose such a system is meant as that introduced into Bengal by Lord Cornwallis by which the property in the land was transferred from the real proprietors to men who previously had no proprietary right in it, but a system under which the rights of the existing proprietors would be strictly preserved - a system that would in fact be a perpetual lease - I should say such a system would be equally injurious to the interests of the people and the Government - I believe the Triennial and Decennial Leases did not answer in any part of the Madras territories - The only practical experience I have had of the working of a Zemindary system has been among the Mootahdars of Salem and the Poligars of this District - The state of things in their Estates both as regards Police and Revenue is not such as to make it appear at all desirable that there should be any increase in the

The Polipats of Coimbatore are with few exceptions nests of Smugglers and thieves - The perpetual quarrels of the Poligars among themselves are another source of unceasing trouble to the Magistrate and annoyance to their own tenantry - If the question refers to such a system as the Zemindary system of Bengal it is sufficient to remark that though the land tax raised on 40 Millions of People in Bengal falls short of the land tax raised on 14 Millions in Madras - the Ryots according to the Official reports of the Bengal Collectors are in a state of poverty much more abject than is the case in any part of this Presidency, and this notwithstanding Bengal is one of the richest Countries in the whole world and possesses every possible advantage of water carriage.

11th Is the price of labor and the expense of conveyance of Goods (with reference to Grain or money) greater or less at present than they were twenty or thirty years past?

11th All the Natives with whom I have communicated agree in considering that the price of labor actually as well as nominally is higher at present than it was twenty or thirty years ago, especially as regards their own

own Domestic servants - I have not however been able to obtain Documents corroborative of this and one of the subjoined Statements makes it appear that the rate of Cooley hire for the conveyance of Goods has fallen instead of risen - I am inclined to think, notwithstanding that the nominal price of labor is in general rather higher than it was - It is less certain whether the actual price has risen - The Natives maintain that it has, but I doubt it - It is said that many agricultural labourers having of late years become petty land holders the wages of labor have risen in consequence -

The subjoined Memorandum shews the comparative expense at the present time and twenty or thirty years ago of the conveyance for ten Miles of a Bullock load and a Cooley load of Goods - Thirty years since Bandies were not used by merchants - The particulars have been obtained from Native merchants and I believe are correct -

	Charges in former years	Charges at the present time	Increase	Decrease
Bullock hire	" 5 "	" 4 "	" "	" 1 "
Hire of one Cooley	" 2 6	" 2 "	" "	" 0

The subjoined Statement shews the comparative cost of conveyance for 100 Miles of one Ton or 35 Maunds of Goods by Coolies Bullocks and Bandies -

	Number	Amount of Charge	Amount for 100 Miles.
1 Ton or 35 Maunds per Cart	1	" 14 "	8 12 "
At 8 Maunds per Bullock	4 1/16	" 4 "	10 15 "
At 2 Maunds per Cooley	17 1/2	" 2 "	21 14 "

The improvement in the roads under our administration has by bringing Bandies into use much reduced the cost of conveyance, but the vexations of our Sayer system as establish=ed by Regulation II of 1812 in my opinion far counterbalance this advantage -

12th Is landed property becoming more or less valuable and are transfers by sale more or less Common ?

12th Under our administration the value of much of the land of the District has been enhanced by its conver=sion from Poonjee into Garden - But the assessment

assessment being proportionally raised the profit is to the Government rather than the Ryot- should the water in the well of a Garden field fail or become of bad quality its conversion from Poonjee into Garden land has considerably diminished its value to the Proprietor- It is saddled with a higher rent than it will bear- a fact of which the Collector will not be willing to be convinced until he finds that it has been lying waste for several years in succession or until it is thrown up altogether- Land that has once been converted from Poonjee into Garden is under no circumstances carried back again to the head of Poonjee- If it is clear that it cannot be cultivated as Garden it is charged with half Garden rent- The Garden lands of Coimbatore are not like those of most other Districts- The crops are generally merely Poonjee crops watered from wells- It is not the superior value of the crop but the certainty with which it may be raised that enables the land to bear a higher assessment than common Poonjee

Sheristadar of this District has estimated the amount of saleable Poonjee land in the District at one Eighth of the total Poonjee cultivation, of Garden lands at three fourths and of wet lands at one fourth- Transfers by sale are very common, more so it is said, than they used to be-

13th Has the consumption of luxuries among the higher and middling classes increased or decreased, is the condition of the lower orders improved or not-

13th Little change appears to have taken place with regard to the consumption of luxuries- subjoined is a Memorandum shewing the comparative extent of the consumption of certain articles of luxury in Fusslies 1229 and 1246-

	Valuation of articles in Fusly 1229-	Valuation of articles in Fusly 1246	Increase	Decrease
	Rs a p	Rs a p	Rs a p	Rs a p
Betel	12706 " "	9558 " "	" " "	3148 " "
Betel Nut	1600 " "	2238 " "	638 " "	" " "
Gunjah	2 " "	" " "	" " "	2 " "
Opium	" " "	411 " "	411 " "	" " "
Tobacco	8202 " "	8508 " "	306 " "	" " "

The

The decrease in the article of Betel leaf in the latter Fusly was owing to temporary causes- As far as I can judge the condition of the lower orders in Coimbatore is more comfortable than in Cuddapah, North Arcot, Salem or Trichinopoly but I have no reason for supposing it improved as compared with former times-

14th- Is money now more easily procurable on loan than formerly? Is the Bazar rate of Interest generally greater or less- what Security was formerly preferred and what is preferred now?

14th- Money is said to be procurable on loan more easily than formerly- I doubt if it is so- Interest on loans depends so much on the nature of the security that it can hardly be said that there is any general rate- Annexed are copies of Bonds for loans without mortgage marked E executed some years since at an interest of from 24 to 30 per Cent- Money it is said is now lent by Merchants at an interest of from 12 to 18 per Cent on the security of Jewels or landed property- The mode in which money lenders evade the usury laws is well known

therefore the amount of interest entered in Bonds does not at all shew what the real interest is- Merchants are not willing to shew their accounts and I have not obtained any satisfactory information on this subject- The Records of the Courts would probably afford much better materials for ascertaining the existing rates of interest than those of the Cutcherries- Jewels and good landed property are as formerly preferred as security but I have no means of saying in what relative estimation they are held-

15th- Is the trading part of the population of your District increasing or decreasing and to what extent?

16th- The same with respect to the agricultural?

15th and 16th- The annexed Statement marked F shews the total population of the District from Fusly 1210 to Fusly 1247- The Statement marked G shews the number of Ryots who have annually taken out Puttahs during the above period- The population appears to have reached its highest point in Fusly 1238 in which year it amounted to 870,866 double what it was in Fusly 1210-

Since

The decrease in the article of Betel leaf in the latter Fusly was owing to temporary causes - As far as I can judge the condition of the lower orders in Coimbatore is more comfortable than in Cuddapah, North Arcot, Salem or Trichinopoly but I have no reason for supposing it improved as compared with former times -

14th Is money now more easily procurable on loan than formerly? Is the Bazar rate of Interest generally greater or less? what Security was formerly preferred and what is preferred now?

14th Money is said to be procurable on loan more easily than formerly. I doubt if it is so - Interest on loans depends so much on the nature of the security that it can hardly be said that there is any general rate - Annexed are copies of Bonds for Loans without mortgage marked E executed some years since at an interest of from 24 to 30 per Cent - Money it is said is now lent by Merchants at an interest of from 12 to 18 per Cent on the security of Jewels or landed property - The mode in which money lenders evade the usury laws is well known

therefore the amount of interest entered in Bonds does not at all shew what the real interest is - Merchants are not willing to shew their accounts and I have not obtained any satisfactory information on this subject - The Records of the Courts would probably afford much better materials for ascertaining the existing rates of interest than those of the Cutcherries - Jewels and good landed property are as formerly preferred as security but I have no means of saying in what relative estimation they are held -

15th Is the trading part of the population of your District increasing or decreasing and to what extent?

16th The same with respect to the agricultural?

15th and 16th The annexed Statement marked F shews the total population of the District from Fusly 1210 to Fusly 1247 - The Statement marked G shews the number of Ryots who have annually taken out Puttahs during the above period - The population appears to have reached its highest point in Fusly 1238 in which year it amounted to 870,866 double what it was in Fusly 1210

Since

Fort St. George 6th. March 1843.

Since Fusly 1238 it has fallen off above 100,000
The Returns of the number of Puttadars in each
Fusly do not afford a criterion by which to
judge of the comparative numbers engaged
each year in agriculture. The people are
in the habit, more than used to be the case,
of taking out Puttahs for very small portions
of land which are often left waste - the object being
to obtain exemption from the Motturpha tax. It is not
in my power to furnish Statements either of the total
agricultural population or of the number of resi=
=dent Traders. The latter are only partially taxed
and those not taxed are not distinguished in the
Population returns. I was not made aware of this
soon enough to supply the want.

17th Is the price of Gold and Silver
(relatively with Grain or labor)
greater or less now than in 1806
to be correct, shews the price of Gold and Silver
relatively with money during the early part
of our administration and at the present time

17th The subjoined
Statement, of
which I believe

Value of Gold weighing one Star Pagoda or 52 Veeray Fanams and of 9/12 Touches			Value of Silver weighing 10 Rupees and of 9/12 Touches

During the administration of Tippoo
During the early part of our admi=
=nistration
At present

The

JSB

Fort St. George 6th March 1843

The cause of the rise in the price of both
metals I cannot undertake to explain.
It is attributed to the circumstance of
the late bad seasons having obliged the
Ryots to dispose of their Gold and Silver
ornaments to the Bombay and other
Merchants who have exported them, but
a depreciation in the currency, if such
exists, would be a more probable cause.
Both the price of Grain and labor
and the price of Gold and Silver having
risen relatively with money, it would
appear that they had maintained nearly
the same position relatively with each other.

18th What changes have taken
place in the currency of your
District since our acquisition
of the Country and what are the
causes and results?

18th The quantity
of foreign Coins
now in circulation
is very much
smaller than
it used to be. The subjoined Table shews
the rate of conversion of foreign Coins into
Company's Rupees at different periods
during the English administration.

	Half and quarter Do.	
	Bombay Rupees.	
	Half Do.	

Fort St. George 6th March 1843

There is no change in the rate of Company's Gold Silver or Copper Coins but there is difference in the fineness of them. Company's Rupees burnt are superior in fineness to Company's Rupees old but they are 6 per Cent less in weight. The fineness and weight of Company's Rupees and Company's Rupees new are equal but in fineness they are inferior to Company's Rupees burnt, in weight they are 2 per Cent. heavier. The actual value of a Gold Mohur of 15 Rupees is said to be 13½ Rupees if melted. The Public accounts were kept in Star Pagodas, Fanams, and Cash until the 1st May 1818. Since which they have been kept in Rupees, annas, and Pice. It is said that the Trade in money which used to be carried on extensively in this District has nearly, if not quite ceased. Subjoin a Statement of the amount of money disbursed from the Collector's Treasury on account of Government Bills since Fusly 1225.

Fort St. George 6th March 1848

Fusly	Amount in Rupees
1225	14,34,78 6
1226	1,37,379 54
1227	1,00,959 11
1228	2,55,016 158
1229	67,783 14
1230	5,78,157 27
1231	6,50,031 89
1232	6,28,907 99
1233	8,61,671 124
1234	7,55,246 29
1235	11,83,185 4
1236	11,68,954 27
1237	3,74,926 44
1238	6,85,333 411
1239	5,05,402 128
1240	9,83,488 65
1241	8,68,712 121
1242	12,02,542 69
1243	10,08,746 18
1244	15,70,086 84
1245	5,51,854 87
1246	4,04,467 99

These payments have been made principally on account of Goods exported to Bombay.— The falling off of late years in these disburse= =ments is not imputed to a falling off in the trade of the District but to the price of Bills in Bombay being higher than it was and to the circumstance of Bombay Rupees which were formerly sold at a dis= =count in this District being now at par for both which reasons the merchants import specie from Bombay for the purpose of trade. I confess I do not at all understand the subject. Very little Cash is at present transmitted by Gollahs comparatively with former years it is hence to be inferred that payments are made by means of Hoondies to a much greater extent than used to be the case formerly.—

19. What are in your opinion at present the desiderata with respect to the currency.

19. I am not aware of any desiderata with respect to the currency there is at present a bundance of Copper and small silver Coins.—

Para 2. The Queries contained in your letter to the Collector of Masulipatam of the 25th October have been replied to in the above

above answers as far as it is in my power to do so excepting as regards Tuccavy.— The ob= =jections to the system of making these advances are so well known. I need not recapitulate them.— Under a Ryotwary system Tuccavy appear nevertheless indispensible. The Govern= =ment stand in the place of Land-lord to the Ryots and only discharge the duty of a Land lord and consult their own interests by extending moderate assistance to such of their tenantry as adverse circumstances may have rendered unable to carry on their cultivation without it.— The amount granted should be kept within as narrow bounds as possible to avoid encouraging improvidence.— If entirely withheld the effect in my opinion would be, not to check the notorious improvi= =dence of the Ryots, but to throw them into the hands of money lenders.— I believe the necessity for these advances in this District has very much increased of late years owing to a succession of bad seasons.— If it were possible to regulate the dis= =tribution of Tuccavy so as to prevent abuse I should think a moderate increase in the amount granted might be expedient.— Subjoined is a Statement shewing the amount granted from Fusly 1228 to Fusly 1248.—

Para 3. I now proceed to reply to your Circular of the 24th January 1839—

1st Has the price (received by Ryots paying revenue to Government) of rice and other grains during the last 8 or 10 years been greater or less than the commutation price on which the existing settlements in different parts of your District were formed?—

I shall be greatly obliged by your forwarding to me comparative Statements containing this information.—

1st I have not been able on an examination of the Records of my Office to ascertain what the commutation price was on which the existing Settlements were formed. The following passage occurs in a letter from Colonel Macleod to the Board of Revenue dated 18th September 1801—Para 19—

"To convey to your Board a general idea of the nature of lands in these Districts "under the three heads Ponjee, Garden and "Sunjee by which the rates of assessment "of all cultivation are regulated—the examples in appendex № 6. are submitted to your perusal. The quantity "of produce therein stated is taken from the opinions of the Curnums and the prices

"prices of the productions are rated at the averages of sale in plentiful years." Appendix No. 6. is not to be found among the Records of this Office but will probably be among those of the Board of Revenue and may possibly supply the information required - Annexed is a Statement Marked H of the average price of grain for five years taken in 1802 in which year the assessment was concluded compared with the average price of the last Eight Fusslies shewing a considerable price in the latter period

2nd I shall also be obliged to you to inform me to what extent and what terms the system of under renting assessed land exists in your District and whether it is extending or the reverse & any statement which you can forward to me shewing the rates of private rent comparatively with the rates of Government assessment on the same or adjoining (if Enam) Lands I shall be glad to receive, shewing also the number of years purchase of the net rent at which such lands may be considered saleable -

2nd It is impossible to do more than form a very rough Estimate of the extent to which underrenting exists in this District

The subjoined Estimate has been furnished by the

Naib Sheristadar

	Ponjee	Garden	Nunjee	Dhroopie
Lands under the immediate management of the Pattadar	12/16	12/16	10/16	12/16
Land under rented	2/16	2/16	2/16	4/16
Lands held on warum tenure	2/16	2/16	4/16	"

The terms of Under rent or Oolgotta for land subject to the Government assessment are that the tenant shall give the land holder a certain quantity of the estimated produce of the land or its value - This quantity he is bound to give without reference to the outturn of the Crop however scanty it may prove to be - The terms of warum are that the tenant shall give to the Pattadar a certain share of the produce with reference to the outturn of the Crop and the share is accordingly greater or less according as the crop is more or less abundant - Ponjee, Garden and Nunjee lands are generally rented for a share in kind and Dhroopie for a money rent - The share in money or kind to be received by the Pattadar from the Oolgotta tenant is on Ponjee Garden and Nunjee land one half of the Estimated net profit and on Dhroopie lands two thirds. The share in kind to be received by the Pattadar from the tenant holding a warum is on Ponjee and Garden land one half and on Nunjee land two thirds of the net profit. Subjoined is an Explanatory Statement -

Description

Fort St. George 6th March 1843.

The practice of Under-renting assessed land is said to be extending rather than the reverse-

The practice of under renting Inam land prevails to a much greater extent than is the case with other land. It is estimated that 8/16 of the Inam lands of the District are held on Colgotta tenure— 4/16 on warum and 4/16 are under the immediate management of the Inamdars- I am informed by the Serishtadars that the rent of Inam lands is generally equivalent to the survey assessment of assessed land of the same quality- Therefore a Renter of Inam land receives a greater share of the produce or profit than an Under-renter of assessed land but as a set off to this he receives no Succour from the Inamdar whereas the under-renter of assessed land is usually assisted by the Pattadar- It is impossible to get a Statement prepared without very great delay corroborative of the fact that the rent of Inam land is generally equivalent to the assessment on Sirkar land of the same quality- It could not under any circumstances be done under several months and at present my Cutcherry is so weakened by sickness and

Sir,

I have the honor to acknowledge the receipt of your letter dated 27th November 1840.-

It is not known to what particular instance Mr Babington referred in his letter to Mr Cotton of the 12th March 1839- it is supposed that he alluded generally to the inequality of demand occasioned by Klaim and Discretionary Cowles, and to the loss which was in consequence sustained by those Ryots who paid the full assessment for lands bearing similar assessment, and frequently situated under similar circumstances as those held upon Cowle.-

I beg to forward ten Statements of the Nunjah Revenue derived under the Rivers Cauvery Bhawany, Amravaty, Nayel and Auliar; and of the Revenue derived from Tanks which are filled by Jungle streams during the last ten years, from Fusly 1240 to Fusly 1249 inclusive.-

To,

John Sullivan Esqr.

Sir,

1.

In reference to your letter of the 23d December 1840, I have the honor to forward a Talookwar Statement in the Hindoovee language of the cultivation and Revenue of Garden and Punjah lands from Fusly 1240 to 1249 the Cowle and grass being distinguished from the lands which have paid the full Assessment.-

2 The great fall in the Revenue derived from the Nunjah lands dependant on the Noyel River in Fusly 1246 was owing entirely to a deficient supply of water in the River. Lands bearing the Assessment of Rupees 29,847-10-4 were not cultivated: and on lands which were cultivated and Assessed at Rupees 13,847-13-8, remission for Shavi was granted to the amount of Rupees 1,032.2.8.-

3 The following is an abstract of the actual Settlement on the Noyel.- Nunjah lands in Fusly 1246.-

Settlement of Lands cultivated with Dhruppee and Plantain Sugarcane & Cowle Lands.	}	22,426-10-9
Nunjah turn Punjah.		2,694-7-3
Settlement of Lands on which remission for failure of Crops was made.		142-4-4
Grass Lands.	}	2,815-11-9
		24-4-8
		28,103-5-9

The

Fort St. George 6th March 1843

"Caurery" Rs. 266-4-7.

4 The decrease of Rupees 266-4-7 was occasioned by lands situated in the Village of Nunnioor in the extreme limits of the irrigation of the Nunjah Poyaloor Channel not being Cultivated, owing to the want of water.-

"Bhawany" Rs. 7,896--3

5 The decrease of Rupees 7,896--3 was owing to lands dependant on the Codivairy Channel in the Village of Parvadaliour of the Sattimangalum Talook, and to lands dependant on the Calingarayen Channel in the Villages of Cheema-samoodrum and Avedeapauray of the Errode Talook not being cultivated from the deficiency of water, and also to the necessity of granting remission for failure of Crops thus..

Lands left waste	7,079-2--
Remission for failure of Crops	816-14-3
	7,896--3

"Amravatty" Rs. 19,757-8-9

6. This decrease arose from lands assessed at Rupees 9,529--8 in 19 Villages dependant on the Amaravatty River in the Carvor Talook, not being cultivated and from remission being made to the amount of Rupees 10,228.8-1 in lands the Crops in which failed from the deficiency of water.-

"Jungle Streams" Rs. 652-11-1.

7 The decrease of Rupees 652.11-1 is the assessment of lands left waste in the Talooks of Danaikencottah, Cheyoor and Pulachy, owing to the failure of these streams.-

"Tanks" Rs. 22,589-4--

8 The decrease arose from lands assessed at Rupees 18,923-14-10 being left waste; and from remission to the amount of Rupees 3,665-1-6 having been made for withered produce..

(Signed) G. D. Drury
Principal Collector-

J C-

4038. Fort St. George 6th. March 1843.

To the Secretary to
Government.—
Fort St. George.—

Sir,

With reference to the remarks in my report upon the Suits which have been instituted against the Principal Collector in South arcot by certain proprietors. I have the honor to forward Copy of a letter to my address from the Principal Collector, in answer to a call made by me upon that Gentleman for information on the subject.

The facts stated by Mr. Ashton and his reasoning upon them seem to deserve the serious consideration of Govt. and it appears, I think quite clear that this litigation in which the Principal Collector is involved has been produced not by any innovation made by Mr. Ashton but in consequence of his adherence to the rule laid down and practice followed by his predecessors.

(Signed) J. Sullivan

Negapatam
2nd March 1843

To,
John Sullivan Esqre
Sir,

Para. 1. I have the honor with reference to your letter of the 2nd Instant to enclose the accompanying Copy of a letter addressed by me to the Board of Revenue & an Extract from the Proceedings of the Board.

2. With respect to the Civil Suits the defence of which at the public expense was requested, I have nothing to urge beyond the prompt liability which acting entirely in conformity with rules & practice of my predecessors, but the questions on which a decision is called for are of greater importance both with respect to the interests of the people, and the Revenue of Government.

3. Under the system which has been followed in this District of the Ryots abandoning their arable lands according to their convenience without any formal relinquishment being made to the Officers of Govt. after the lapse of a year, if the lands remained waste any other Ryot might cultivate them & was entitled to a Patta from the Collr. by which his right of occupancy was confirmed to him. He was thence forward considered to be entitled to hold the lands so long as he paid the Govt. demands. The principle was, that the land being declared to be the property of the Ruling Power

4039. Fort St. George 6th. March 1843.

from time immemorial the Ryots were only tenants, and on their ceasing to occupy, and pay the tax the land, having reverted to Government, was tacitly rented out to another. More frequently this transfer took place with the cognizance, and under the authority of the Government Officers, though not of necessity. The above principle has regulated the practice from the commencement of the British rule.

4. At various times claims to a proprietary right in the Soil have been brought forward by individuals both to the Revenue Officers, and in the Civil Courts, in the applications to the Revenue authorities the claims being made to those whose special duty it is to guard the rights of the Government from being infringed, have been uniformly disallowed; in the Courts from the Suits being brought between private individuals, the Government right appears in some cases to have been lost sight of, which was occasioned by the Government not being made in any way a party in the Cause. Varying decisions have therefore issued from the different Courts, but however injurious to individuals from their want of uniformity, they were not sufficiently numerous or important to affect the general

rights

38.

rights of the people, or Government, in the
tenure of the lands.

5 In consequence of the discussions
which have arisen between the Board of Rev
and myself, many suits have been brought
the inferior Courts, between native parties, on the
side claiming lands as their hereditary property, & on
other maintaining their right, from having taken poss
sion, or having been placed in possession by the Re
Officers, in consequence of the lands having been
abandoned and left waste by the former occup
and it has come to my knowledge that several o
the district Moonsiffs, if not all of them, are
deciding such suits in favor of the former occup
Having conversed upon the subject with two of
the Moonsiffs they both declared that a law
for their guidance was absolutely necessary.

6. Individuals have come forward to
state their apprehension of taking lands lest suit
should be brought against them and have n
doubt but that considerable quantities of lands
now under Cultivation will be given up, unl
a greater feeling of security is established.

7. Whatever may be determined upon a
to the mode of disposing of waste lands in future
it appears to be necessary that these Pattah

who have acquired possession of lands abandoned
by others should be protected by a legislative Enact
ment declaratory of the legality of the tenure by
which they occupy, or they will be liable to actions
for the recovery of those possessions by former
occupants, until the expiration of 12 years undisput
ed occupation should have confirmed their right.

8. The grievance supposed to be suffered
by those Ryots who have once held a Pattah for
land but which they may afterwards abandon
and which under the hitherto existing practice,
is thereby liable to be transferred to another, the
Board of Revenue propose to remove by making
a reference in each case to the former occupant,
and on his expressed renunciation only permitting
the land to be rented to another - and this mode
of proceeding being included in the general concur
rence expressed by the Right Honorable the Go
vernor in Council would be considered the final
decision on this part of my reference, but it is further
declared in the Minutes of Consultation that "it is
"the duty of a Ryot, who wishes to relinquish his
"land, to give notice of the same to the Revenue
"Officers within a certain period of the year, and
"if he fails to do so, he is answerable for the
"assessment for that year and if no demand is
"made upon him the fault is with the public officers."
It is also laid down as a principle that a

Fort St. George 6th March 1843.

demand must be made of the assessment from the former occupant and refused, before the land can be made over to another - And for these reasons" it was not permitted to defend the suits at the public exchequer -

9. The Board of Revenue have communicated to me the orders of Government in their proceedings but have given me no detailed instructions for carrying into effect the above view and on my representing the necessity of promulgating a rule for the introduction of the change directed, still decline any specific notice of this part of the subject -

10. Under these circumstances if it is the intention of Government that the system of Puttah, or declaration by each Ryot at the commencement of the Fasly of the lands he intends to occupy, is to be carried into effect it is necessary that I should be empowered to form subsidiary rules for the purpose, which need not be acted on, until confirmed by the Board of Revenue -

11. In conclusion I trust that I shall be excused in making an observation on the repeated assertion that the system I have followed has been inoperative, although I have shown that it was in full operation at all times since

Fort St. George 6th March 1843.

since the cession of the Carnatic - It appears necessary that I should advert to it, lest it be supposed, that I in any degree retract my former statements.

12. The primary disposal of unoccupied or waste lands having been committed to the Village officers, with the written instructions of the Collectors annually given for their guidance, it is improbable that they should have invented and combined together to act upon a system contrary to those instructions. It is impossible to suppose they could have done so without the knowledge of the Collectors, or that the latter would have persisted in annually issuing instructions which they knew would not be enforced - I have however shown by the decisions of my immediate predecessor, that his practice was in conformity with my own, and I can confidently refer to the Village accounts for proof by cases of instance, that no reference to former occupants has ever been made on the renting out to new ryots, lands formerly cultivated but afterwards abandoned.

Madanadomboor,
South Arcot,
Pr. Coll. Cir. Cutcherry

(Signed) W. Ashton
Princ. Collector

To

Fort St. George 6th. March 1843.

To,

The Secretary to the

Board of Revenue

Fort St. George

Sir,

Para 1. I have the honor to acknowledge the receipt of an Extract from the Proceedings of the Board dated the 8th. November containing Copies of letters to Government and of Extracts from the Minutes of Consultation.

2. By the instructions contained in the above proceedings I am directed implicitly to follow the orders contained therein and in the Proceedings of the Board dated the 7th. October 1839 and the 5th. March last and to refrain from further comment on the subject. It is therefore with great regret that I again venture to address the Board, but trust that the necessity of my doing so will appear from the importance of the subject and the great difficulty of at once carrying into effect the wishes of the Board and of Government.

3. The immediate dependence of the prosperity of the inhabitants of the District upon the decisions that may affect the tenure of the lands is so evident that it is most extraordinary after the lapse of forty years that any material

Fort St. George 6th. March 1843.

difference of opinion should exist upon the subject. It is however a fact (and much to be lamented) that the greatest differences do exist in the opinions of the people of the Revenue Officers, and also in the practice of the Courts respecting it. There appears to be no guide generally recognized for the establishment of a consistent and uniform practice and it is therefore absolutely necessary that an act of the Legislature should be passed for its better regulation.

4. In the meantime however, it is no less necessary that I should perfectly understand the course to be pursued by myself in order that I may not fall into errors alike injurious to myself and the people, and for this purpose I proceed to lay before the Board the rules which I conceive to be necessary on the introduction of the change now ordered, and at the same time to recommend that, if approved, they may be made public as soon as possible, and commence to take effect from the beginning of the Revenue Fasly.

Proposed Rules.

1st. All lands occupied in any manner by a ryot that are not specially exempted, liable to the payment of the regulated Assessment whether cultivated or not.

4048 Fort St. George 6th March 1843.

the teermah -

9th - If any ryot has a puttah for teer in teermahput waste land, and a proposal is made by another ryot to rent the land the renter of the teer shall first be allowed the option of renting the land, and in the event of his refusal only shall the land be made over to the proposer in which case the teer will also be transferred to the renter of the land -

10th - No ryot shall be entitled to a puttah for any waste land which he cultivates without previous permission from the Tahsildar, if at the Summahbundy settlement or at any previous period any claim is brought forward and substantiated by another person on the ground of occupation, purchase at public sale or renting trees from the Circar in such land -

5 - These rules have been prepared to the best of my judgment, in conformity with the instructions contained in the Proceedings above referred to, & as they will, if carried into effect, have a considerable influence on the welfare of the people, and upon the future revenue of the Districts I beg to offer the following remarks

difficult to ascertain what constitutes "Occupation" where there is no Cultivation, of Crops liable to teermah, but it is presumed that planting bamboos, thorn trees (or keeping straw heaps) or buildings, are sufficient evidence of Occupation, and as it is intended to benefit the ryot on the one hand so it is necessary on the other to secure the right of the Circar.

Rule 3d - Orders nearly to this effect were issued on receipt of the Board's Proceedings 17th October 1839 and proposals for Puttum land are forwarded - but if any one takes possession of Puttum land waste and unoccupied for one year I imagine he can only be turned out by the decree of a Civil Court - accordingly rejected whenever a claim is brought

Rule 4th 5th & 6th - There can be no difficulty in acting for the future upon these rules from any fixed period, but they cannot have a retrospective effect as purchasers have heretofore only conveyed the right of occupancy enjoyed by the former tenant, which ceased after the land had been left waste one for one year -

Rule 7th - Following the opinion in the Extract from the Minutes of Consultation under

date

Fort St. George 6th March 1843.

date the 7th October 1840 this rule is submitted for consideration In this District however the Settlement has never been made on a Patcal, but always when in currency a Rajeenamah or notice of relinquishment, when they wished to give up their land, they simply ceased to Cultivate, were not charged with Teerwah, and after one year (lately two under my orders) the land was made over to the first applicant. The most perfect freedom has for some years been established under the orders of the Board, and Government, approved by the Court of Directors, by which the Ryots Contract or extend their Cultivation at will, and I apprehend the change will be considered a hardship by the inhabitants. A patent account has indeed been prepared at the beginning of the fasly, but has only served to regulate the amount of taccavy advances to individuals.

Rule 8th. No Remark.

Rule 9th. This Rule is required, as the course now ordered is contrary to the Rookumnamah of the District and former decisions of the Board. I fear also it will occasion many disputes. In case of a ryot taking possession of an uncultivated field in which a tree may

be

Fort St. George 6th March 1843.

be planted by another, the renter of the tree will claim the patta for the land; but according to the existing law & Custom it should be given to the Cultivator of the land. The party to whom the Patta is not given will enter a suit against the Collector.

Rule 10th. This rule is framed to meet the irregularity which would arise under the new system from the former practice remaining in part, but it appears to require the sanction of an act of the legislature to render it valid.

6. If the 7th rule is not confirmed, in order to carry out the views of the Board it will be necessary to substitute another providing that land which has been long in the occupation of any ryot and afterwards left waste by him for (one or) two years or more shall not be given to another ryot to Cultivate without the option being first given to the former occupant. but I must state my firm conviction that either measure would cause much land to be immediately thrown out of Cultivation and occasion a corresponding decrease of Revenue.

7. The Board in their letter to Govt. dated 10th September last stated their belief that it had not ever been the practice in South Arcot to enforce the system contended for by me &

in their proceedings of the 5th. Ultimo direct that
the system introduced "by me" which has led to all
the present litigation be discontinued - In order to
shew that the practice adverted to has always existed
since the cession of the Carnatic, and that no new
system has been introduced by me, I am under
the necessity of making extracts from the
records to a considerable extent and I trust it will
be perceived that the suits which formed the
Original subject of this correspondence were
not instituted in consequence of my infringing
the law or Customs but from my acting consis-
tently in accordance with them -

8. The following extracts will shew that
it has been the practice from the year 1803 to
dispose of waste land to the first applicant
without giving the option to the former Occupants

Translated Extract from the Muchilka
or counter-agreement executed annually by the
Puttahmonigars or Heads of Villages since Fusly 1213 -

"Para 8. As it is declared in the Puttah
"that although a Ryot may have Cultivated his
"land and paid the teerwah upon it for a period of
"10 years, if he afterwards leaves it uncultivated for one
"year he loses all claim to it, we will according to
"this order and conformably to the rules laid

"down in the 10th. clause of the Putta give such land
"only to another Ryot to Cultivate"

Translated Extract from the
Mootta putta given annually to the Putta-
Monigars by the Collector since 1803 -

Para 8. "Although a Ryot may have
"cultivated land for a period of 10 years and
"paid the teermah upon it, if he afterwards leaves
"it uncultivated for 1 year, he loses all claim to it.
"for this reason, that as long as a Ryot continues to
"cultivate the land and pay the teermah of the Circar
"it is considered to belong to him, but when he ceases
"to cultivate, and pay the teermah to Government, and
"allows the land to become waste, he has no longer
"any Claim to it - You are therefore at liberty to
"give such ground to another Ryot for Cultivation,
"according to the terms hereundermentioned" -

Translation of an Extract from
the Cultivation Hookumnamah by the late Principal
Collector Mr. Ravenshaw in Fusly 1215 -

Para 3. "When lands are given to others the
"Ryots often state that the land belongs to them,
"and if it is ordered to prepare a puttah, they do
"not agree - In the event of such objection the Putta-

must

"must be prepared in the name of the person
"who has given the proposal for such lands."
Para 4- "Where two proposals are given for
"Lands which has remained waste four or five years
"preference should be given to the Coleoody &
"not to the Paracoody proposer. If the two proposals
"be Coleoody it must be given to the first
"proposer"-
Para 5- "In cases where the Heads of a
"Village retain in their possession any Lands
"which they would not Cultivate themselves or
"allow others to do so, but leave them waste without
"paying rent for them, if any other individual re-
"siding in the same or another Village present a
"proposal for such Lands, a puttah is to be issued
"in the name of such proposer, if the individual
"in whose possession such Lands have remained
"waste offer to receive a Puttah for them arrange-
"ment should be made to issue the same in his name."

Translated Extract from a Proclama-
tion by Mr. Hyde in Fusly 1234-

"The Puttahmonigar, Curnums and con-
"siderable Ryots continue to leave some of the
"Lands uncultivated and to interrupt others in
"Cultivating them under the plea that those lands
"are their hyput or occupied by them- In order
"to put a stop to these malpractices, it is notified
"that all lands which may be left uncultivated &
"for which puttahs has not been obtained by such
"Ryots, may be freely Cultivated by other Ryots ac-
-cording to their inclinations- The land held by each
"ryot is his property as long as he continues to Culti-
"vate the same and to pay the tax thereon- If he
"lays it waste for one year without paying the
"tax it reverts to the Circar- So such lands therefore
"those who may have Cultivated them for a long time
"previously have no longer any right at all- Consequently
"those lands that are laid waste by the Ryots that
"formerly Cultivated them freely, be cultivated

by

Fort St. George 6th March 1843.

"by another ryot - This rule has been inserted in
"the Moochilica executed by the Puttahmonigar
"of each Village and in the Puttah given to him —
"by the Circar - Wherefore the Ryots may freely
"Cultivate such lands and the former Occupant
"must not offer any Molestation upon the —
"pretext of their being his Ryots —

by Mr. Cunliffe Fasly 1240 -

Para 4 - "Notice is hereby given to the Ryots
"in general, that if any Ryot after the completing
"the Cultivation of his lands, tender a proposal for Cul-
tivating lands of one or more than one years waste he will
"be allowed to occupy the same, as the Ryots are entitled to
the

Fort St. George 6th March 1843.

"the claim of waste lands as Puttamonigars are,
"they are therefore at liberty to cultivate them upon
"obtaining a permit, or todloo chit." —

By the following Extract it
will appear that trees rented in waste lands are
according to former practice transferred to any
person who cultivates such land — —

From the Dummahkundy or
Hookoomnamah of 1236 still in force. —

"If any man shall cultivate
"Bunjer or Poodoo-cul or fallow lands upon —
"which there are any fruit trees of the above
"description, he shall enjoy the produce of the
"said trees, and they shall be included in
"his puttah without his paying any thing addi-
"tional beyond the teeroah upon the land, it
"being understood that crops situated under
"the shadow of such trees are much deteriorated,
"provided always, that if the said trees should
"have been rented out before he cultivated the
"land, the Renter shall enjoy them until the
"expiration of his rent, after which they shall
"be included in the Puttah of the man cultivating
"the same." —

9. The following Extracts from notes
of decisions on settlement disputes by my —
immediate

immediate predecessor will shew, the produce to be unchanged during his management—

No 32 of Villapooram of 1243-

"Mootoocomaraipa Moodely claims that he cultivated kait No 204 Punjah 1-7 c a teeroah Rupees 10-1-" "which had been waste for 3 years but that "the Curnum has entered in one Iyahsawmy "pillay's name- this Iyahsawmy has not cultivated "the ground since 1240 it must be entered in the "Complainant's name the Curnum is fined one "Rupee for not doing it before"—

No 37 of Do of 1243-

"Complains that his land is entered in the "name of Iyencooty Counden, the land in "question is situated in kait No 7149 Measuring "3 c and the Complainant Nunny Counden had "3 3/4 in this, (Teeroa 1-1-3) he advises that it "has been waste from 4 years and that he made "it over to Iyencooty Counden who cultivated it "and in whose name Putta is properly given"—

No 59 Villapooram of 1243-

"Complains that his kyfut lands have been "entered in the Puttahs of 3 other persons the "lands are as follows

"3 1/4 as teeroa 10 annas- Cultivated by complainant in 1240- "3 years waste in 1243 the Monegar gave it to "Chinna Sooba Iyen to cultivate and he must "have the puttah. kait No 5057 Punjie 3-12 c 1/2 as of "this the Complainant had 9 annas Teeroa 2-11 Rs as "cultivated by Complainant in 1242 in this year "as the Complainant was not found at the "time of making Putcut to give security, it "was given to the Notagar Ramasawmy puttah "to be given in Ramasawmy's name. kait No 3992 "Punjie 2-12 c as teeroa 24-1 Rs as the Complainant "cultivated in 1241, in 1242 waste. this year as "the Complainant was not in readeness at "the time of making Putcut- the land was "given to Puttadoor saib, to whom a Putta "must be given. I have been induced to give "this decision because according to the Hookoom "namah and because the Complainant had no "means of cultivating as out of 6 cs that he "cultivated in 1241. the whole was left waste upto "august last and would now if it had not "been made over to others as shewn before and "the remainder of his land 2-11 c as is waste this "year—

Fort St George 6th March 1843.

No. 1. of Villaporum 1244.

"Seeroocawmy Pillay Complains that 3 Cawnies
"of land which he this year Cultivated with a
"Cumboo Crop has been taken by the Puttamer
"gar and entered in his puttah. The land in
"question consists of Poonjie kait No. 148 — 6 as
"Tarum 2 c — 2½ a and No. 147 — 5 as Tarum 1 c — ½ a
"this land was formerly cultivated by Eydelinga
"pillay the Monegar and formed part of his
"kyputt, but kait No. 148 was waste during 1242 and
"1243 and as the Complainant Cultivated it, it should
"be entered in his puttah. Kait No. 147 having been
"cultivated by defendant's brother must be kept in
"his name. The Defendant alleges that he made
"over kait No. 148 to one Ramasawmy who however
"is represented as his servant, but be this as
"it may the land having been left waste for
"2 years, the defendant ceased to have any power
"over it, and therefore the defendant having 20
"cawnies and upwards waste, which he would
"allow no one to cultivate he shall not now be
"permitted to deprive the Complainant of
"it as without his having

Fort St George 6th March 1843.

"Land would not have been cultivated at
"all: — No. 238 of Villaporum of 1244.
"Complains that he cultivated 1 c — 2 a of Poonjie
"waste / No. 190 kait / but it is entered in
"the Puttah of Padyall Venkatachellum as the
"son-in-law of the Monegar, the ground was
"cultivated upto fusly 1241 by one Ramacounden in
"1243 it was waste, complainant first cultivated
"it this year by order of the Monegar Seenevasa
"Iyah, when Venkatachellum the nephew of Rama
"Counden was set on to cultivate by the father of
"the other Monegars Ringier Complainant having
"first cultivated a Puttah to be given to him
"and not to Venkatachellum whose Puttah is
"to be destroyed" —

No. 10 of Chellumbaroom of 1244.

"Complains that 8 annas of his kyputt is entered
"in Govindapillai's Puttah. Govindapillai's
"father cultivated the land in 1238 since which
"it has been waste until this year when Govindoo
"himself cultivated it and it has properly been
"entered in his Puttah — Complainant has no claim
"whatever" — No. 93 of Do. of 1245 —

"he Cultivated has been included in Paramarey-
"pillas name, the land has been waste for 8
"years for which the Government have not
"got one Rupee of Teeva, but still Peramarey-
"pillas claims it in his Putcut having been
"8 years waste, his Putcut is forfeited, and the
Complainant Nelagerry an having Cultivated
"it in 1245 he shall have a Putta for it."—

Nos 16-17-18-19-20 & 21 of Villapooram in 1245-

"The parties in these numbers Complain that
"having been prevented from deficiency of
"water from Cultivating certain of their kyputs
"Lands they have been Cultivated this year
"by one Kistnamachetty and entered in
"his Puttah pray that they may be taken out
"and entered in their Puttahs respectively. the
"lands in question which it is unnecessary to
"enumerate have been waste some of them for 6 or
"7 years but all upwards of 4 years with the
"exception of one kait. No. 361—13 Tarum 3½
"this man Kistnamachetty in November last
"gave a proposal to Cultivate the whole of the
"lands in dispute which was approved because the
"late proprietors had [illegible]

"Cultivate when there was abundance of water
"both last year and this particularly. Kist-
"namachetty accordingly did Cultivate the land
"and they have all been entered in his Puttas
"accordingly and most properly - the fields
"are specified opposite each Number."—

No. 49 of Villapooram of 1245-

"Complains that he only sowed ¾ Cawnie of his
"kyput consisting of 3 Cawnies and prepared
"the remainder 2 c ¼ a for Cultivation but the Curnum
"has entered it in the Putta of Vencataramar-
"reddy - the land is situated in Yary Penumbaka
"kait No. 1054 measuring altogether 42 Cawnies
"of which 6 c — 12 a ¼ is Cultivated this year out
"of this 2¼ is in dispute, and it was waste
"last year and is no ones kyput it must
"remain in Vencatarayamareddy's Name."—

10- The above are taken at random from many others which bear upon the question, but I trust that it be now sufficiently established that it has always been the custom to treat all land left waste for one year as having reverted to the Circar, and to give it to the first

Fort St. George 6th March 1843.

If a reference be made to the Village accounts it would be seen by lacs of instances that lands, cultivated by one ryot for years, have been transferred after being one year waste to another without any renunciation of the former.—

Proceedings 5th March.

11 The Board have desired it to be distinctly understood that they have no "intention whatever to interfere with the right of "the Government thro the Collector to the disposal "of the waste in South Arcot, a right which "from time immemorial the Government has "always exercised and which they believe has "never been questioned", but stated that "their "observations had arisen out of a number of Petitions "which were presented to them regarding small "spots of land occupied as backyards or straw "yards or for the sites of houses, which parties "claimed either from previous occupancy, or in right "of purchase but which had been made over to others "without their Consent". From this I inferred that no change was to be made in the mode of disposing of the uncultivated lands, not included in the Nuttum (except they had been purchased at a public sale) but it appears

Fort St. George 6th March 1843.

to be now intended that no lands which have been long occupied by one person, and afterwards left waste, shall be given to another without the option being given to the former occupant. If several persons come forward to claim the same land as having been formerly in their Puttahs, it will be difficult to decide equitably to whom the land should be given, as the claims of each would be founded on the same basis as the others. It appears particularly necessary therefore that the alteration in respect to claims from former occupation should have only a prospective effect.—

12 Under the different rules and decisions of my predecessors, the mode of obtaining lawful possession of waste land has been threefold. First, any person of his own will taking possession, and Cultivating such lands has been always admitted to be the legal Occupant or renter. By the second mode, he might apply to the Village Officers, and obtain a permit in writing (Coolloo Chit) previous to cultivating and by the third, he might offer a proposal in writing to the Tasildar or Collector, after which

if the lands were found to be waste for one year, the party was put in profession.

13. I would respectfully request that the claims in the Suits now instituted against me in the auxiliary Court be examined, with reference to the Custom of the Country as shown above, and for this purpose I have made the following abstract of the different cases.-

No. 99 of 1840 Principal Collectors letter 31st August 1840. Plaintiff sues for 1. Cawny of Poonjah land formerly Cultivated by him but left waste for two years. He continued to rent some trees in the same land.-	The land being abandoned by the Plaintiff was on application from another ryot made over to him, and the trees were also transferred in accordance with the Hookumnamah.-
No. 217 of 1840 Sub. Collector's letter 11th September 1840.- Plaintiff sues for 2 annas of Total land which has been immemorial	The land was never occupied by the Plaintiff except that he rented a tree upon it when it was given to a ryot to Cultivate, the tree

waste, but in which he had rented a Tamarind tree.	was transferred as above.-
No. 312 of 1840 sub Col. Collectors letter 12th September 1840. Plaintiff claims 3 Cawnies 10½ annas of Punjah land which had been waste for 20 years, first on the ground that it was entered in the Survey Accounts in his father's name, second that he has himself made seed beds in it in the early part of the season.	If the name of the Plaintiffs Father is in the survey account it merely shows that he was the renter of the land in the year the survey was made having been waste for 20 years, it was at the disposal of the Circar By an order of the late Principal Collector ryots are permitted to make seed beds in any waste lands without renting the lands such a permission however does not exclude any person

wishing to cultivate the lands, after the Plants were remov= it was clearly= available for Cult= =vation, as if the indulgence of tem= =porary use had not been permitted to the Plaintiff.

It was given to the first appli= =cant, who under= =took to cultivate it for Teervah.-

The land was waste for 20 years and was given to the first applicant, the Plaintiff's claim is precisely the same as in suit No. 312.

No. 314 of 1840 sub= Collector's letter 16th= September. Plaintiff claims 4 Cawnies 12¼ annas of Punjah land which had been waste for 20 years under precisely the same circumstances as are detailed in suit No. 312.

=ca= has been immemorial

No. 197 of 1840. Sub= Collector's letter 19th= September 1840. Plaintiff claims 1 Cawny 8 annas of Poonjah land which has been 30 years waste. He states that he has long occupied it.-

The land being 30 years waste was available to any ryot of the Village. The Oc= =cupation by the Plaintiff is denied, and some trees in the land have been rented by another person for the last ten years from the Circar. It was made over to the first= applicant.-

No. 313 of 1840. Sub Col= =lector's letter 19th= September 1840. Plaintiff sees for 1 Anna of Puttum land on the plea of former occupation by his family and the exemption from tax on the land during their occupation.-

The land was waste and un= occupied for 15 years, and was made over to the first= applicant, offering to rent it.-

No. 176 of 1840. Sub. Collector's letter 24th September 1840. Plaintiff sues for 3 Annas of Perumbokke Nuttum land with trees and ponds therein, on the plea that he purchased the land from another person.-

The land was waste and uncupied for many years. The Plaintiff never had a putta for it, or held it as exempted from teerwah and for several years some trees upon it have been rented from the Circar by the Defendant.-

No. 213 of 1840. Sub. Collector's letter 26th September 1840. Plaintiff claims 1/2 a Cawney of Punjah land on the plea of its being his hereditary property.-

The Plaintiff in Fasly 1248 himself gave a proposal to Cultivate the land alleging that it was 50 years waste, but it was found to have been previously cultivated by the Defendants and his proposal

Defendant who is the Plaintiff's father and Monigar of the Village, in defiance of the orders to reject the proposal, had the putta prepared in the Plaintiff's name, and on the complaint of other defendants after the Jummahbundy the putta was Cancelled and renewed in the names of the actual Cultivators. In this Case the land was not made over to the other defendants under the Principal Collector's authority, but the Putta was made in their name when they were found to have Cultivated the land

The defence proposed by the Sub Collector has not been adopted by me as the decision was judicial under the provisions of Regulation V of 1822.

No. 195 of 1840. Sub Collector's letter 29th September 1840. Plaintiff Claims 3/8 of a Cawney of Perumboke Gramanutum land, on the plea of its being his paternal property.—

The land was long waste, and in Fusly 1249 the Plaintiff himself gave a proposal for it, and he was put in possession. It was afterwards proved to have been previously in the occupation of the Defendant tho' not so entered in the accounts, and in conformity with the Orders of the Board of Revenue

to him.

No. 290 of 1840. Sub Collector's letter 10th October 1840.—

Plaintiff claims 5/8 of a Cawny of Punjah land, on the plea of its being part of a Share in a Pungoo-Karry Village, and part of his Kyput.

The land was waste of 3 years. The Plaintiff says there was not sufficient water in the tank, but this is a circumstance which cannot be ascertained, it is often a mere matter of opinion. If the Plaintiff had any special reason to adduce for a deviation from the general rules, by which he might secure his right to occupy, it should have been brought forward when he left the land, and not after another ryot had undertaken to cultivate it. The Pungoo-Kurry agreement can only affect the cultivated land, but does not enable

No. 291 of 1840 — Sub Collector's letter 10th October 1840. Plaintiff claims 9/2 annas of Punjah. The grounds of the claim are the same as those in suit 290

any ryot to keep his lands waste.

The land was waste for three years, and was made over to the first proposer. The grounds of the claim are the same as in suit No. 290.

No. 278 of 1839. Sub Collector's letter 10th October 1840. No. 139. Plaintiff claims 7/2 annas of Punjah and Poonjah as having held the same for many years under puttahs.

The Plaintiff had formerly cultivated the land, but had left it waste for two years. In the 3d year a proposal was given by the 1st Defendant, after which the Plaintiff cultivated it. It was proved at the Punnahbundy that

and the putta was therfore given in the name of the proposer.

No. 125 of 1840. Principal collectors' letter 28th July 1840. Plaintiff claims 1. Cawny and 1 Anna of Malgoozarry Poonjah land for which she had obtained puttahs for some years, and alleges that he had planted some trees on the land.

The land had been left waste by the plaintiff for 4 years and was given to the first applicant. The trees went with the land according to the rule.

No. 78 of 1840. Principal Collector's letter 5th august 1840. Plaintiffs claim 4 annas of land with some trees upon it alleging that it is

The land is actually Malgoozarry Totacal land, it was waste and unoccupied for more than 10 years, and was made over to the first

Fort St. George 6th March 1843

Gramanuttum land in their Occupation, and that they had received puttahs for the trees up to Fusly 1248.

for Cultivation. The trees previously rented by the Plaintiff were in accordance with the Hookumnamah and the Custom transferred to the renters of the land.—

14— After the enjoyment of Peace and quiet Government for forty years, it is a remarkable circumstance, that one half of the clays of irrigated lands and three quarters of the dry lands in this district should still be waste, and among the causes that contribute to produce this unfortunate state of things, I believe that the power of disposing of the waste being placed in the hands of the Village officers has taken a prominent place. At the first annual settlement I undertook, I perceived that the greatest obstructions were thrown in the way of persons desirous to Cultivate waste land, by the Village Officers, and large quantities of Valuable Land were kept waste by themselves and other influential ryots under the name of their "Kyput". If the poorer ryots were desirous of Cultivating such lands, they were refused under various pretexts or sometimes they were allowed to Cultivate, upon the understanding that the Puttah should be given them, but it was afterwards made out in the name of the oppressor, and after the poor man had incurred the expense of improving the land, he was at the mercy of the Puttadar who could eject him at the end of the year, or reduce him to the hardest possible terms of underpaying. It was in vain, that on Complaints being made punishment was inflicted on the Officers

Fort St. George 6th March 1843.

would be found hardy enough to brave the resentment of the heads of their Village, and some further measures for their protection were evidently called for.—

15— The rule for the disposal of land waste for one year being quite clear and defined, I had merely to provide for its being carried into effect — without partiality, and with this view directed that applications for waste should be made in writing only to myself or the Tahsildars, but I did not in any way interfere to prevent a person cultivating waste land, without such an application, if he chose to do so.—

16— The date of receipt of the proposals being entered, as well as in a Register, the lands are secured to the person who first Cultivates or who first proposes for them, and much greater regularity is thus obtained, but no change affecting the rights of the people to lands has been introduced.—

17— On receipt of proposals the Tahsildar sends for a measurement account of the lands with a report from the Village Officers showing how they appear in the Village accounts, as to occupancy &c., on receiving this if no objection occurs, the proposer is put in possession by the Village officers under an order from the Tahsildar.

18— In the event of a claim to the land being set up by a former occupant or any other

person, the Tahsildar previously to ordering the land to be given to the proposer, enquires into the claim, and disposes of it under the same rules as he would have done if the proposal had been first made to the Village Officers, instead of to himself.—

19. It has been supposed that the additional trouble of giving a written dirzast at the Huzzoor or the Taloob Cutcherries, would be in some degree a check to the extension of cultivation but it has not been found to have that effect.—This trouble is trifling while on the other hand the facility afforded by removing the deciding authority in the first place to the Tahsildar is very great, and I have from my Communication with the people upon the subject, every reason to believe that the measure has given almost universal satisfaction, though the Village Officers and their friends, whose authority is affected, of course are averse to it.—

20. The Number of Puttahs and the amount of the Revenue in the last five years, are entered in the Margin, and do not appear to support the opinion of the Board "that no advantage is derived from the practice.—

Fasles-	Puttahs- Nr.	Revenue Cr.
1245	90093	2,05,049-15-2
1246	88,427	1,943,662-5-4
1247	90,865	2,096,665-10-5
1248	100,060	2,257,414-11-1
1249	114,967	2,504,708-13-5.

21. The practice of the district having been such as I have described, and the suits instituted against me in consequence of some decisions on petitions preferred to the Board and not on account of any partial deviation from the formerly existing system, it is evident that if these suits were compromised, thousands of a similar nature would have been brought for the same purpose and I have therefore with much regret been compelled to proceed with the defence on my own responsibility. but I confidently hope that the Government will direct that whatever may be the decisions of the Courts, the responsibility may not be borne by me otherwise, than in my Official Capacity.—

22. The number of proposals for waste land received have been in Fusly 1248- 83401 in Fusly 1249- 20042- and up to 15th. November in the current year 15883 which have been disposed of according to former rule and practice, and I humbly submit for the Consideration

of the Board that the mere declaration of an opinion by superior authority that my proceedings are disapproved, because they are inconsistent with the rules and customs hitherto inforce, is quite sufficient reason for many suits to be brought against me, and probably to affect the decision of the Courts also- It is already stated in the pleadings in the Court that I am not supported by the Board and Government, and that the disposal of waste lands in the manner heretofore practiced, is therefore illegal- I venture also to state that I had no legal power or authority to alter the practice, even if I could have foreseen the change that the present opinions of the Board

involve, and that I cannot therefore be equitably held responsible for the consequences which have occured—

23- Before concluding this report I beg to express my own opinion that the introduction of a Putcut Settlement would be attended with no advantage in this district, the land tenure being considerably higher than in the neighbouring Districts, it would undoubtedly be much objected to by the Ryots- The risk of loss to them would be very much increased and the hardship of severe Execution much aggravated by their being obliged at the commencement of the Fusly to make themselves responsible for the rent of lands, which the failure of the season might prevent them Cultivating, and it would entail the necessity of the uncertain and arbitrary system of remissions which under

Fort St George 6th March 1843-

the existing system is not required except in extraordinary season of distress.—

24- Having thus again ventured to offer fuller information upon the subject, which it did not before appear to me was necessary, I hope that the Board may be induced to make a more favorable representation of the case to Government, that they will take such steps as may be considered proper to relieve me from the responsibility which I have unnecessarily incurred, and that the present practice may be continued without the introduction of the Patent system, or that if any modification of it is decided on, due Notice may be given, and a period fixed for commencement of the change.—

No 1 in B.

Extract of a letter from the Secretary to the Board of Revenue dated 28th July 1819.

3. "It would be satisfactory to the Board to learn which of the various Ryotwar settlements alluded to in my letter of the 29th April, you may consider best suited to the local peculiarities of your District."

No 171

To The Chief Secretary to Government,

Sir,

Para 1.. With reference to the various papers that have been laid before the Government, at different periods, respecting the progress of the Village Lease settlement, and the Ryotwar System of revenue administration to be introduced on its termination, I am directed by the President and Members of the Board of Revenue to submit to the Government the following summary, as the result of their various deliberations, which are contained more at length in the papers in question.—

2. In the first place, the Board think that where, as in Tanjore, the whole of the Ryots in a Village are, or may consent to

to be, parties to the collective Village settlement, that settlement should be renewed for a further term of ten years, the quota payable by each individual being defined by agreements amongst themselves, of which copies shall be lodged in the Office of the Collector.

3. In the second place, where this cannot be effected, the Board think that the Putcut Individual Ryotwar settlement explained in their General Report of the 25th January last, from para 408 to 458, and from para 632 to 688, should be introduced, for such period as may be agreed upon by the Ryots.

4. In the third place, where neither of these settlements can be effected, the Board are of opinion that the annual field assessment Ryotwar, where it may have been introduced, should be resorted to, under such modification of the Ryotwar as may be requisite.

5. In the last place where neither of the two first mentioned settlements can be effected, and the field assessment Ryotwar has not yet been introduced, the Board propose to take the necessary steps to establish it.

6. After an attentive re-consideration

of the Reports which have been submitted to Government, from time to time respecting the progress of the Village base settlements in the different districts, and of the sentiments recorded by the Board in their General Report of the 5th January 1818 from para 858 to para 907, including their Minute of the 5th of January 1818, and also in their General Report of the 25th January 1819, from para 408 to 455 para 632 to 685 and para 796 to 919, the Board beg leave to submit to the Government the foregoing propositions, as a summary of the result of these discussions.

7. The Board believe that Colonel Munro concurred in the opinion that where every Ryot is or can be included in the collective Village settlement, such settlement would in fact become Ryotwar, by merely defining the quota payable by each. This the Board propose should be done.

8. The Boards' Minute of the 5th of January contains the grounds of their opinion against Ryotwar surveys and field assessments, and their proceedings recited in their General Report before quoted. Also the grounds upon which they prefer a periodical

Fort St. George 6th March 1818

Ryotwar.—

7 Where neither of the two first named settlements can be effected, it remains only to ... to or to introduce the annual settlement of Ryotwar, on the improved principles explained in the Board's Minute of the 5th January 1814.

10.— In submitting this summary, the object of the Board is to bring under review the means which they consider best calculated for carrying into effect the orders of the Honble Court of Directors, for entering into direct settlements with the Ryots. This may be effected by different means in different districts, and those suggested by the Board will enable them to adopt that which is best suited to the local peculiarities of each.

Extract from an Extract from the Proceedings of the Board of Revenue under date the 12th December 1825.—

5. "In the 17th Para" of the report under consideration the Principal Collector refers to the proceedings of the Board on the settlement of 1732 and to a letter addressed to him under date the 31st March last, and takes occasion to observe that no compulsory measure to increase the Cultivation has been authorized or permitted. He states that it is the practice in his district to enter into Cabooliats with the Ryots for such lands as they might be able to cultivate, and the duty and the responsibility of the Tahsildars is confined to a Superintendence that such voluntary agreements are duly performed," and it is proof of the

Fort St. George 6th March 1843

are enforced he observes that "the Cabooliatnamah will shew that there is a considerable annual deduction made to those inhabitants who have not been able to cultivate to the extent of their Cabooliats." The Board find on reference to the Statement D. that the extent actually cultivated in 1234 was less than the extent of land agreed for by the Ryots by 80,188 Cawnies. This circumstance may be considered as a proof of the leniency of the Principal Collector's administration, and that a liberal consideration is given to the actual circumstances of the Ryots at the conclusion of the settlement and so far it will doubtless be deemed satisfactory by the Government. But the Board are not sure that it implies the absence of constraint on the Ryots in regard to their cultivation at an earlier stage of the proceedings of the year. On the contrary the very fact of their having entered into Cabooliats to cultivate to an extent which eventually proved so far beyond their means, would seem rather to shew that the Talook Officers had in the beginning exerted an undue influence to induce them to take more land than they wished.

Extract

Fort St. George 6th March 1843

No 5 in B.

Extract from an Extract from the Proceedings of the Board of Revenue under date the 19th February 1807.

20.— It is proper here to state with reference to the observations of the Principal Collector in the 8th Para of his report that the Board consider the practice of collecting taxes by "kuttee" or difference of assessment very objectionable, and are of opinion that it should be entirely abandoned. The Stock of many Ryots consists only of their ploughing cattle and the seed saved from the produce of former Years, or purchased with the annual advances from the Collector; and if death, sickness, or other misfortune deprives them of the services of such members of the family as have been accustomed to labour, they must of necessity leave part at least of their fields untilled, and that part will not unfrequently be in the higher classes for, altho' good lands will always yield the best returns the consequences of failure are more serious and the culture is generally more expensive and laborious. To tax the inferior lands retained under such circumstances with the assessment of the superior would only augment the distress and the practice is altogether in-

Fort St. George 6th March 1843

interests of the Government.—

24.— The Principal Collector reports that the orders for withdrawing all restraint upon the cultivation have received every attention from him, that he states that the "Shroistadars are divided "in opinion with respect to the effect the "sudden discontinuance of an old usage of "the district might have upon the cultivation, "they both, however are of opinion that less "land would be brought under cultivation "than if the usual forms were gone through"— The Board have no doubt that the relaxation of a rule which bound the Ryots to occupy more lands than they would do, if left to themselves will have a tendency to throw some fields out of Cultivation and are therefore disposed to think that M. Cumliffe is too sanguine in his expectation "that the cultivation of 1236 will be "little short of that of the most favorable "years" but as this measure will likewise have the effect of imparting greater confidence to the People, and improving their means and condition, they look forward with a well grounded hope to the gradual increase of prosperity throughout the district".

2.— With regard to the observations made by Mr Campbell, that the Hookumnamah, as it stood in Fasly 1234, operated to the "gradual casting of the Meerassidars", I beg to observe, that I do not conceive that these rules have inflicted the injustice noticed by that Gentleman. That meerasy right in land is in greater force in the Talooks of Mummargoody and Chellumbrum than in any other in the Zoobah, is not to be denied, still if these lands, or any part of them, are left Waste by the Meerassidar, and they refuse to make good to the Circar, the rent of the same, they unquestionably lose all right and tittle to such: and if the Circar can find hands to cultivate the same, they have the power of putting such in possession

3.— That the Lands formerly in

Fort St. George 6th March 1813

in possession of one Meerassidar have passed into that of others, in, even to the extent specified by the *Tahsildar, correct: but when this is to be considered, it must be divided into two heads.—

*of Chellumbrum

1st. Lands now in possession of other than the original Meerassidar from the circumstance of the Meerassidars having left them Waste, of their own free will.—

2d. Lands formerly in possession of Meerassidars, at present, through the Operation of the Rules, laid down in the annual Hookumnamahs, in those of their (Meerassidars') under Tenants and Slaves.—

4.— Of these two heads, I shall speak of the latter first, indeed I may say, of that alone, because the observations here made, will shew that the Lands held under the circumstances mentioned in the former, are alone in being.—

5th. On questioning the Tahsildar mentioned by Mr Campbell, relative to the information, he gave to that Gentleman, he stated that he spoke generally of the effect of the Hookum Namah Rules upon Meerasy tenure

N.B. in B

Extract of a letter from the Principal Collector Mr Cruttiffe to the Board of Revenue dated 6th October 1827.—

Copy of Paragraph 38-39-44-47 & 50 Mr Campbell's Minutes.—

Para 1. I have the honor to acknowledge the receipt of your secretary's letter with enclosures, under date the 30th July.—

2.— With regard to the observations made by Mr Campbell, that the Hookumnamah, as it stood in Fusly 1213, operated to the "gradual ousting of the Meerasidars", I beg to observe, that I do not conceive that those rules have inflicted the injustice noticed by that Gentleman. That meerasy right in land is in greater force in the Talooks of Munnargoody and Chillumbrum than in any other in the Soobah, is not to be denied, still if those lands, or any part of them, are left Waste by the Meerasidar, and they refuse to make good to the Circar, the rent of the same, they unquestionably lose all right and title to such: and if the Circar can find hands to cultivate the same, they have the power of putting such in possession

3.— That the Lands

in possession of one Meerasidar have passed into that of others, is, even to the extent specified by the *Tahsildar, correct: but when this is to be considered, it must be divided into two heads.—

*of Chillumbrum

1st Lands now in possession of other than the original Meerasidar from the circumstance of the Meerasidars having left them Waste, of their own free will.—

2d Lands formerly in possession of Meerasidars, at present, through the Operation of the Rules, laid down in the annual Hookumnamahs, in those of their (Meerasidars') under-Tenants and Slaves.

4th— Of these two heads, I shall speak of the latter first; indeed I may say of that alone; because the observations here made, will shew that the Lands held under the circumstances mentioned in the former, are alone in being.—

5th On questioning the Tahsildar mentioned by Mr Campbell, relative to the information, he gave to that Gentleman, he stated that he spoke generally of the effect of the Hookum Namah Rules upon Meerasy tenure

tenure, that in consequence of those many persons held lands which once formed a part of the Meerasy of others, which they now considered themselves permanently entitled to, in virtue of holding the Puttah for the same, but that he did not state that any under tenant or Slaves, had, because he cultivated, obtained possession of, or Puttah for, such portion of land on the contrary, he observes that he knows of the instance of possession of land having been obtained in this way; all the land he alluded to, having been given up to the present holders, because it was left waste by the Meeraddidars. That in many cases they, Meeraddidars, had sought the recovery in a Civil Court, but that there they had failed to obtain a decision in their favor, not because the Puttah was in the name of the Defendant, but because they themselves had left their lands Waste.

6. The whole body of Land holders of those two Talooks are at present with me; and con-

cerning all whom any questions relative to Meerasy rights are put to them, they have in the most unqualified manner asserted "me, that the Meerasy lands belong to them, "that been through the power which the "Circar has, and which they do not for an "instant question, of settling other than the "Original Meerasidars in possession of lands "left Waste, and not from their Under-Tenants "and Slaves, through the rules laid down "in the Mookuma Namah, assisting them, "because they held the plough."

7th. I could point out in those two Talooks, Meerasidars or Land holders paying a yearly rent to Government of from 1,000 to 12,000 Rupees, who do not cultivate 20 Cawnies of Land by their own plaughs; but who rent the remaining lands to Under Tenants; some upon Warum, and some at the full Teerwah, retaining to themselves, in the latter case, what is termed the Soondoor, Warum, in fact a token of proprietary right to the land.

No. 7 in 63

Translation of a Tamil Decree passed by the Register in the Adalut Court of the Tallak of Tirduchellame in Suit

No. 1456

Plaintiff

Mootapundarum of Tallaova caste of Shedumbrum by the Court Vackeel Gnanamboranar

Defendants

Venalachariar of Penual Coil in the said Village, Venatachariar, Seeniengar, Sathiengar, Kithiengar, Iyangengar, and Vaitheyar, Appoviengar by Court Vakeel Krishnamachariar and Sayed Roxane Saul Deen Khan

That the Plaintiff has a claim against the Defendants on the following grounds, for a piece of ground of 150 feet valued at Rupees 13 1/2. They were called upon to answer for it although they ought to give him the piece of ground they unreasonably delay to do so. Whereupon the Plaintiff Complains that the land in which that Mutteum or building is situated measures 130 feet from South to North, by 200 from East to West that when he was raising a wall in that piece of ground the Defendants

it that they therefore ought to give up to him the said piece of ground worth 13 1/2 Rupees but as they have not given it to him this suit has been instituted.

The Defendants in their answer filed by their Vakeels state that the Plaintiff neither possessed Mutteum or piece of ground near the gate of the Pagoda, that he has no kind of title to it, that he never had house nor any thing else therein, but that the Defendants enjoyed the said piece of ground by planting trees therein, that when they raised wall for building house the Plaintiff prevented it, and that excepting that the Plaintiff has no kind of connection with it.

The Plaintiff in his reply filed by his Vakeel states that the Defendants never enjoyed the said ground by planting trees therein, that there were two persons of his caste in the said place by name Teroo-manalappovar and Pollam Sambar well known in the Pagoda of Sri Subbah Naicker by whose the Mutteum was erected in the said ground in the name of the said Teroomanal Appovar and the Charity of distributing

distributing food was continued therein, but that the Mutthum was taken down when the boundary wall of Veeraja Warehouse adjacent to the said ground was made use of as the wall of the Fortification, and that it being a Charity Mutt generally of the Pariahs in the Country, the Defendants have no right to it.

The Defendants in their rejoinder filed thro' their Vakeels state, that no Mutthum was ever built, nor the Charity of distributing rice, ever carried on by a person called Veeramaulliappanar - that many persons have been building Houses there since the Fort was enlarged, and that the Plaintiff has no grounds for the suit according to clause 4th Section XVIII Regulation II of 1802 as since 300 years several persons have built their houses there after the wall of the Fort was taken down.

A Document No 18 was filed by the Vakeel of the Plaintiff in support of his claim, and the undermentioned Witnesses Vizt Chelumbara Pundaram Para-maundapundaram, Sooba Pundaram, and Chawry appen were examined. There were two more Witnesses produced but they were not

not examined.

The Defendants in support of their defence filed thro their Vakeel the Document No 17. The Witnesses examined on their part were Veeratachella Naiken, Veeraperu Naga pellay, Coopspachary, Veeratachary, Runga Chary, and Mohomed Ebadullah said There were 5 more witnesses but they were not examined. The last mentioned Witness gave his deposition on oath before the Dubash of Chellumbrum.

This action was brought to recover a piece of ground situated close to the Pagoda at Chellumbrum. In the year 1807 or 1808 one person of the disputing parties intended to erect a building on that ground, the other party interfered in it stating that the ground belonged to him. Both parties had a dispute on account of the said ground and without being peaceable they persisted in the quarrel - They were thereupon accused of causing committed disturbance and quarrel & forwarded to the Court. The present complainant and others were punished by the Criminal Court for having disturbed the peace upon this both parties were told to institute Suits in the Civil

Fort St. George 8th March 1843

Civil Court of they had claim to the ground according to which this suit was brought by the Plaintiffs.

although many depositions were taken in this suit three fourths thereof are entirely unconnected with it some evidence was selected with great pains but even that is by no means clear nor satisfactory to both parties and does not go far back. The dispute has arisen on account of a piece of ground. There is no grant or any other document nor any thing else to ascertain the owner thereof. It appears in fact to be Circar land. Neither the Plaintiff nor Defendant has title to it. The Plaintiff alleges that it belongs to him because a Mutturn was built there by his ancestors and consecrated to the Deities Pattan and Sanban. The Defendants state that it is theirs, it being situated close to the Pagoda not being connected with No. 21 in the Duffer of this Court as also as they have disputed regarding it and the Plaintiff and others have been punished by the Criminal Court. The reasons alledged by the Plaintiff were

Fort St. George 8th March 1843

not at all established by Evidence. He produced no document to shew that he has right to it thro inheritance. Nor is it to be concluded that he is entitled to it by long enjoyment, as there is no proof of his having at any time really enjoyed it.

The Court on a careful examination are most decidedly of opinion that neither the Plaintiff or the defendant has any more right to the ground in dispute than the hand which guides the pen that writes these words. If both the parties desire to have the ground, let them represent to the Collector who alone appears authorized to settle it. The Court cannot pass a decision respecting the ground to which neither of the parties appear entitled. The Court therefore comes to the decision that as the parties quarrelled and disputed about the ground to which they have not the least right, each of the parties must pay his own Costs respectively, and accordingly decree that the costs due by the Plaintiff, Viz^t Court Charges fan. 9 Takeel fees at 5^p per Cent on Rupees 13 4 the

amount

amount of Compliant under Clause 2 Section VIII Regulation X. of 1802 is Rupees 6 and annas 4 Earnest or retaining fees to the Vakeel 4 annas. Batta. paid to the Witnesses Rupees 2 Fees on Exhibit as per Regulation 5. of 1808, annas 4 Fees for 6 Witnesses Rupees 1½ Institution fees paid by the Plaintiff under Regulation XVII of the above year is Rupees 8 four annas and on 3 Stamp Papers for the decree Rupees 3 In all amounting to Rupees 24 and four annas 6 should be paid by the Plaintiff Mootteya pundarium and that the Costs due by the Defendants viz. Court Charges four annas 13 and Cash 40 Vakeel fee Rupees 6 and annas 4 Retaining fee formerly paid annas 8. Batta to the Witnesses Rupees 2. Fees as above for an Exhibit annas 4. Fees as above for 12 Witnesses Rupees 3 Stamp duty on 8 Papers of Decree Rupees 3, amounting in all to Rupees 19 four annas 11 and Cash ¾ to be paid by the Defendants Venatachurrie, Venatacharrier, Seringar, Sathiengar, Kistiengar, Iyangengar and Vaitiar ahpaviengar. Syed Hoosane Vod Deen Khan Court Vakeel.

The Defendants are 9 pieces of ground valued at 375 Rupees to the Plaintiffs and they were summoned to answer the claim. They have those pieces of ground but they delay unreasonably consequently the Plaintiffs complain stating that the Defendants did in company with a Mob of some other persons on the 9th of June in the year Pujotsurty annoy and take possession of by force the grounds situated on the both sides of the front of the western Gate of the Easwara Coil at Chedumbrum, which the Plaintiffs

Fort St. George 6th March 1813

continued to enjoy as Kundevanmme and Mullum attached to the said Easwara Coil that the ground on the south side of the front of the western gate of the said Easwara Coil amounts to 4 pieces measuring 213 feet from East to west by 170 from North to South, that the ground on the North side amounts to 5 pieces, measuring 213 feet from East to west three of which on the East side measures 30 feet from South to North and the remaining 2 pieces 170 feet, that the Value of the 9 pieces aforesaid is Rupees 375, and that the Defendants being engaged in constructing Houses thereon they pray that the same may be recovered and restored to them.

In the answer filed by Syed Hoosane Vod Deen Khan the Vakeel on behalf of all the Defendants except Sathiengar, it is stated that the ground in dispute was not occupied by the Plaintiffs, that it was not converted into a flower Garden, that they have no right to that ground, that many years previous to the invasion of Hyder, a small Pagoda was constructed

for Ramasamier in that ground and erected by them / the Defendants /, that during the said invasion the said Pagoda was destroyed that the ground round about the said Pagoda which was waste, was subsequently taken possession of by them / the Defendants / who converted it into a flower Garden erecting a Hut and planting on summe thereof that when they intended to found an agrahara on both sides of the road leading to the west gate of the said Pagoda, which was on the 3rd of Iye in the year Subhanu the people of that Pagoda presented the same and disturbed the peace; that they complained about it to the Criminal Court, that security was taken from the disturbers for their good conduct; that afterwards the said people of the Pagoda set up one Mootiapundaram to prevent the Defendants from building the House, that then the both parties were sent to the Court by the Darogah, that the Court ordered the said Mootiapundaram to sue in the Civil

ground he claimed; that according to which a suit was instituted No. 7456. of the Registers Court; that it was decreed that the ground in dispute the property of Government it being circar land; that on both parties making their appearance before the Collector, the matter was there investigated and Taked issued to Narrainpilly Tahsildar of Chellumbrum directing him to make over the land to the possession of the Defendants; that when the Defendants were erecting the Agraharam, they found the image of Ramasamier which was not forthcoming; that a considerable sum of money was expended for building the House; that these Plaintiffs alone have no concern to dispute for the ground, while there are 200 persons more that have equal right with the Plaintiffs for the same; that the dispute regarding the land having been decided in No. 7456 of the competent Court of Register, the present suit should be dismissed under section X Regulation II of 1802 and that the road of the western Gates has been fixed

fixed for passing and repassing from and to the Pagoda of Perual appertaining to the religion of the Defendants.

The said Sashingar states in his answer that he has not deprived the Plaintiffs of any of their property, and that they have no right to the land in dispute.

Annathatchetur in his reply filed by his Vackeel Goolam Hoosane states, that the Defendants have admitted their being in possession of the land in dispute, that he will prove the land to be appertaining to the Pagodas, that the suit instituted by Mookaspundaram was not for the land now in dispute, but for another which is situated on the South side thereof; that as the Decree passed in suit No. 1156 is regarding another land, it has no concern with this suit, that the Defendants stated falsely before Mr. Collector Ravenshaw that the said land was waste and belonging to the Linga and that thereupon, order was issued to

the land to them provided that their statement is true, that it is belonging to the Pagoda as appears plainly from the figures sculptured upon the Tower of the west Gate, that there being no practice of carrying on a suit by all the people of the Pagoda, two particular persons only were appointed for the purpose, and that as the said land was not formerly enjoyed by the Defendants, they have no title to it at present, and therefore they should be compelled to give up the land.

The other Plaintiffs Ganapathy Theatchetur states in his reply that the Defendants have no title to the land in dispute and prays therefore to remove them from the possession of the ground.

The 8 Defendants aforesaid in their Rejoinder filed by their Vackeel Syed Hoosane and Deen Khan that prior to breaking down the Bund at Chedumbrum most part of the land in dispute belonged to the Ditch, that subsequent to

to its destruction they occupied a part thereof by converting it into a Garden; that until the commencement of the dispute, the other part of the land was waste, and that they will prove all that they have stated in their said answer and pray to be relieved from this suit.

Sashiengar also filed his Rejoinder to the same effect.

Plaintiffs filed no document to establish their claim to the land in dispute except the Plan N.o 15. The undermentioned witnesses on the part of the Plaintiffs were examined Viz.t Seroomal Cooly Iyen Pillanaigapundarum, Sedumpillay, Meenatchy pundarum, Soobroya pillay, Meeratarau, Ramien barapilly, Soobroya pillay, Appoopillay annulien and ammiappen.

The undermentioned Witnesses Viz.: Mootoocaroopapundarum, Sedumbandapundarum and Soobramanyapundarum were also summoned on the part of the Plaintiffs but no depositions were taken from them as their evidence

to corroborate the statements of said witnesses.

The Defendants filed in the Court the undermentioned Documents Viz.t N.o 34 a Plan of the land in dispute N.o 15 a copy of the Decree passed by the Register of the Jillah Court at Verdachellum in suit N.o 2456 on 17th February 1812. N.o 34 a Map of the land which was disputed in suit N.o 2456 N.o 32 a Takeed issued by Mr. Ravenshaw to the Tahsildar of Mummorgoody dated 24th April 1812. The undermentioned witnesses on the part of the Defendants were examined Viz.t Appoocoodty pauy, Pavaday Naicken, Mahomed Rahimmoodollah, Nagapillay, Fader Ood Deen Saib, Veerapen Nattud Cauvi Vengodasetty, Nalhanoomy, Coopacharry and Rungacharry another Witness Cassim abdoollah was summoned but he was not examined.

In the examination of this suit it appears that the Evidence given on both sides evinces a gross partiality and the Court plainly perceives that on

Fort St. George 6th March 1813

no side the truth has been brought to light,
but however the land in dispute is clearly proved
to have belonged to the Pagoda of Chedumbrum
as its Gate or Ditch round about it, and it
should be considered a Circar land until
it is made over by competent authorities.
It appears that there is an agraharum
for the Plaintiffs at the East Gate by
which Easwarn / the Deity / passes during
the annual festivals and the Defts wish-
ing to found a similar agraharum at
the west Gate by which the procession of
their Deity Annual passes; commenced
to construct it, when the Plaintiffs
and Canilgars of the Pagoda quarrelled
with Defendant regarding that property.
at last one Valloova Moottaspundarum
commenced a suit in No. 2145 against
the Defendants for a certain land which
clearly appears to be a part of the land
now under dispute and by the Decree No. 15
which was passed in that suit the land
has been declared to be the Circar property
and neither the Plaintiffs nor the Defs

Fort St. George 6th March 1813

have any title to it, whereupon the Defendants
proceeded to the Collector, who issued a Takeed
No. 32 authorizing the Defendants to take
possession of the land, and to have an agrah-
rum constructed thereon. It does not appear
from any document or Witness or by any writing
whatever that the Plaintiffs have established
any good and strong right to the land, although
it was at any time occupied by Plaintiffs
on account of the Pagoda and taken pos-
session of by the Defendants in any manner
without their permission, yet it is proved
that they obtained the permission of the
Collector to occupy it and that they have
constructed an agraharum thereon expending a
large sum of Money.

The Court therefore having perused
the above Documents and fully comprehending
the above circumstances dismiss the suit brought
by the Plaintiffs annatheatcheder and Ganapatty
Theatchetor on account of the said land, and the
Defendants Vencatacharry, Seroomalacharry, ap-
-puracharry, Seenoo Iyengar, Iyavyengar Chinna-
-iengar Coopiengar Rutniengar and Sharbiengar
are fully relieved from this suit and also
as the land is reasonably occupied by them, it is

ordered

Fort St. George 6th March 1843

ordered that they may enjoy it with peace and comfort
and it is also decreed that the Plaintiffs annathalaiter
and Ganapathy Theatchetor shall pay the costs viz^z.
Court Charges paid by the Defendants Fanams 28
and cash 40 Ds. paid by the Defendants Fanams 18
Fees of the Plaintiffs Vackeel on Rupees 575 at
5 per Cent authorized by Clause 2d Section VIII
Regulation X of 1802 is Rupees 28 3/4 Retaining fee
dants Vackeel as a aforesaid Rupees 28 3/4 Retainer
Rupees 1/4 Batta paid to the witnesses on the part
of the Plaintiffs Rupees 1 1/2 Batta paid to the
witnesses on the part of the Defendants Rupees 5 1/2
Fees for a document filed by the Plaintiffs under
Regulation V of 1818 Rupees 1/2 Fees for their 11
witnesses 15 in number Rupees 7 1/2 Fees for 5 documents
filed by the Defendants Rs. 2, Fees for their Witnesses
12 in number Rs. 6 Institution fees paid by the
Plaintiffs according to the Regulation XVII of the
above years Rupees 27 Fanams 6 and cash 35 Stamp
duty for 8 Papers given by the Plaintiffs Rupees 6 1/2
Ds. for 6 Papers for copying the Decree Rs. 6 amounting
in all to Rupees 130 Fanams 11 and cash 29 Thus the
Decree of Justice has been passed.

Gillah Court of Verdachellum — No. 107 of 1812
Provincial Court of Appeal — No. 10 of 1815.

Appellants — Annah Dietchether and Ganapathy Dietchether —

Versus —

Respondents — Venkatacharyer — Tirumalachenjer — Appanacharyer — Seeno Iyengar — Thackayengar — Iyahoyengar — Linapaengar — Son of of Conapacharyar Coperiengar & Kistnien -gar. —

Read in Court & a Copy of this Decree is delivered to the Respts. Vakeel but the other Copy is not delivered owing to the absence of the appellants Vakeel this 23d May 1817 — / Signed / J. B. Puddleston Register.

Appellants Vakeel — Ellapa Moodeliar.

Respondents Vakeel — Seenevasiengar —

Decree of the Provincial Court.

The Appellants were Plaintiffs in the adalut of the Gillah and sued to recover Nine Parcels of Ground situated in both sides of the Western Gate of the Daswaren Coil at Chettumbrum and valued at Rupees 575 which Appellants state to have been forcibly occupied by Respondents who have built houses thereupon —

The Respondents assert that Appellants have no claim whatever to the Ground in question — That a Dispute

having

Fort St George 6th March 1843.

having formerly arisen relative to a Portion of the said Ground, a Suit was instituted No 2450 in the Adawlut of the Zillah and after a full examination thereof it was decreed that the disputed Ground was the property of the Circar, and that neither party had any claim thereto. That in consequence of this Decision Respondents then made application to the Collector, to be allowed to build Houses, on the said Ground, who issued a Sakeed (No 32) to the Tahsildar Narrain Pillay containing his Permission for Respondents to erect an agraharum on the said Ground. —

The Provincial Court having considered the Proceedings held in this Suit in the Adawlut of the Zillah as well as the Pleadings of the Parties in appeal are of opinion that Respondents are entitled to hold and enjoy the ground in dispute by virtue of the authority of the Collector contained in Exhibit No 32. The Decree passed in the Adawlut of the Zillah is therefore confirmed and it is further adjudged that appellants shall pay all costs in appeal

Fort St George 6th March 1843.

according to the following Statement within one Calender Month from the date of the Delivery of this Decree —

Fees of the Appellants' Pleader at 5 per Cent on Rupees 575 are according to Section VIII Regulation X of 1802 is ----------	Rs 9 [illegible] 28-9-57
Fees of the Respondents' Pleader as above ----------	28-9-57.
Value of Stamp Paper for Pleadings and Exhibit Government Fees together with the retainer disbursed by the Respondents to be paid to them by the Appellants ----------	6-9-57.
Stamp duty for Stamp Paper used for two copies of the Decree to be paid in the Provincial Court by the appellants	6-0-0
Total Rupees ----	70-3-17

Total Rupees Seventy Fanams three and Cash Seventeen —

dated 25th January 1841.

Read again the following letter from the Principal Collector in the Southern Division of Arcot dated 20th December 1840 —

Here enter No 103

Para 1 — The question to which the foregoing communication refers has already formed the subject of so much discussion, and been considered so fully in all its bearings, that the Board feel it unnecessary to notice at length the various topics brought by Mr Ashton under review more especially as the Board's views and orders have received the entire approval of the Governor in Council. —

2 — Their orders were simply that small parcels of land acquired by purchase of long occupancy, enjoyed with or without payment of Assessment by individual Ryots and desirable rather as affording convenient sites for Cattle Grain &c —

than for purposes of cultivation, should not
be summarily handed over, if temporarily
left waste to the first proposer who express
his willingness to pay peishcush without the
option having been given to the ancient
occupant of retaining the Ground and
paying the Government demand, if such
was properly demandable - Reason and
equity seemed to require that this course
should be pursued to prevent cases of indi-
vidual hardship and injustice - For it
appeared to the Board, from an attentive
examination of the several cases which ha
become the subject of litigation, that the
proposers, to whom the spots of land had
been made over, were actuated more by
motives of private pique than public principle
in seeking to deprive their opponents of land
long in their enjoyment, convenient to them
from its situation, and on which in some
instances much cost and labour had been

3. The course pointed out
was known to have been that practically
followed both in South Arcot and through
out the Southern Peninsula - as shewn in
the absence of all litigation until recently
ly in Mr. Ashton's District - If any
local Rules circulating an opposite
practice had been at any time promul-
gated, these had, at any rate been
suffered to be inoperative -

4. The practice indicated above
is generally followed in all districts, is of
easy enforcement, and is besides agree-
able with local usage and the feelings
and wishes of the people - The details
are best left to the discretion of the local
officers before whom each case will natu-
rally come in review, and the usage does
not require, the Board think, to be
fortified by strict regulation or legal
Enactment - Many of the rules of
suggested by Mr. Norton

for future promulgation are exceedingly objectionable and unnecessary and the Board are not disposed to sanction their publication.—

5- As before observed the course pointed out by the Board has no reference to the disposal of Poromboke or immemorial waste and is therefore in no respect calculated to restrict cultivation, or injure the extension of the Government Revenues for none of the spots of land, the subject of actions before the Court, are properly describable as immemorial waste.—

6- With these impressions the Board must decline submitting any farther reference to Government on the subject of these actions, which if pursued must be done at the Principal Collectors own risk and on his responsibility. It matters little whether the course he has pursued is held to be legally justifiable or not. In the opinion of the Board it is not so, but even if it was, the system seems fraught with individual hardship and injustice and the cases brought before them are not such as they would recommend to be defended in a court of law.—

(A True Extract)

Official Memorandum.

The accompanying letter on the subject of Garden lands in Coimbatore with a statement enclosed was left on shore by Mr Sullivan when he embarked at Nagapatam and I was desired by that Gentleman to see that it was transmitted to Government; but it appears that on the Survey of embarkation Mr Sullivan had omitted to affix his signature.

Mail Muddumboor 9th March 1841.— } Signed A. J. Cotton.
Actg Civil Engineer 6th Division.

To
The Chief Secretary to
Government.
Fort St George.

Sir,

Para 1. In my report upon Coimbatore I ventured to call the particular attention of the Government to the subject of the wells in that district from which nearly one third of the whole revenue is derived and to point out the necessity of great forbearance towards the holders whenever from a failure of water in the wells the usual Cultivation of such lands is prevented.

2 I stated at the same time that a remission of the assessment in the Southern

Division

Division appeared to be necessary with a view to an equalization of the assessment in the two divisions, and to remove the great disproportion which now obtains between the Ponjee and garden assessments of the Southern Division.

3. Since writing the above I have had an opportunity of visiting some of the garden lands and I find the opinion given by Mr. Babington to be completely verified, viz.t, that the Collector is loath to believe that the proprietor of a garden is unable to pay the assessment, and that under the influence of this feeling, the demand of payment is urged until the truth is forced from the notice of the revenue authorities by the ruin of the owner, and the abandonment of his property.

Report from Asst. Princ.l Coll.r Coimbatore.

4 When it is considered that the difference between the Ponjee and garden assessments in the Southern Division is as 6 to 1 and in the Northern as 5 to 1 that the value of the land depends entirely upon the water [the soil of garden lands being often of an inferior description] that the quality of the produce grown in both descriptions of land is the same [the advan-

tage being rather in the quantity and certainty of the produce than in the quality] it is evident that ruin to the owner must be the result of a demand upon them for 6 times more rent, or 3 times, or even twice the rent that is levied from the owner of the Ponjee field.

5 The talooks which comprise the Southern Division are.

Pallachy
Cheekragherry
Dharapoor
Kangeyam
Pulladum and
Karoor — and the Government will see from the enclosed statement that of a total decrease in the Revenue of well lands amounting to Rupees 59,554 which has occurred since the Fusly 1240, no less than Rupees 47,600 or upwards of 17 per Cent has arisen in 5 of the 6 talooks abovementioned while the decrease in the other nine talooks has been under Rs 12,000 or less than 5 per Cent as the owners of well lands usually hold Ponjai lands also, the effect of the heavy demand upon them

Fort St George 6th March 1843

them for their unproductive gardens is seen in the general decline of their Cultivation, so that of a total decrease in the revenue from Poonjee lands [comparing the years 1240 & 1249] amounting to Rupees 209,585 nearly two thirds [122,986] or above 24 per Cent has arisen in the Southern Division while the decrease from the same description of land in the other talooks has been under 12, unless therefore prompt measures are taken to arrest the progress of this evil viz. an attempt to collect garden revenue from lands which will not yield garden produce, we must expect to see the entire ruin of a numerous class of land holders the well lands, so long as there is water in the wells are one of the main stays of the revenue of Coimbatore. they are a valuable private property, and one to which the people are so greatly attached, that they will pay to their last farthing rather than abandon them.

6. It has hitherto been the practice to levy ½ or a ¼ of the garden assessment upon garden lands that cannot be irrigated but no remission, can be sufficient that does not place the

Fort St George 6th March 1843

of Poonjee Cultivation because only Poonjee produce can be raised upon such lands, and for the inferior nature of the soil that species of produce is often deficient. I would therefore venture to recommend that the Collector should be instructed only to levy the garden assessment upon the quantity of garden land that can be irrigated on the average of seasons charging the Poonjee rates of the Villages upon garden lands which the water cannot reach. The best way of doing this is by a Cadle which shall guarantee the remission only so long as the water shall be found insufficient. a considerable loss of revenue will be the immediate consequence of this measure but I have no doubt that the Government will eventually be gainers by it. some persons not entitled to the indulgence may get it but it is better to risk the chance of abuse than persist in a rigid system which is gradually receiving a large body of valuable proprietors.

7. These wells are excavated entirely with private capital and as they vent

on increasing for many years, there was obviously no need for assistance from the Government. a long continuance of adverse seasons however and a demand for a heavy rent when there has been no produce, has trenched so seriously upon the means of the people, as to make it advisable that Government should come forward with advances to enable owners to repair and deepen their wells - they require moreover instruction as to the best means of effecting such repairs - much money being now wasted in their crude attempts to blast rock and such assistance can only be given by a resident Officer of the Engineer Department, a non Commissioned Officer of the Sappers with a salary of from 100 to 150 Rupees a month as a resident assistant Engineer in each District, would, I am persuaded pay his salary ten times over by the constant attention that he would be able to give to works of irrigation in which the "Stitch in time" is of the utmost importance.

8.

In illust-

informed by the Sub Collector Mr. Bird whose zealous attention to his duty, and kindness to the people cannot be too much commended, that by the attention which he has been able to give to the water courses from the Anaicutty, which lie near the usual place of his residence, Karoor, he has been able to raise the revenue of four villages which are irrigated from them from Rupees 13018, the amount realized in Fusly 1246 to Rupees 21,574 the revenue of the current Fusly 1250, and this large increase has been produced by an outlay of no more than Rupees 550 this improvement has been effected entirely from the personal superintendence which Mr Bird has been able to give to the water Courses, and similar effects might be expected in every other part of the district if the exclusive attention of a qualified individual could be devoted to the work.

Extract to be brought forward at a future

L134. Fort St. George 8th March 1843.

From the Sy. Chief Sec. to Govt.

Requesting that an Extract from the Min. of Cons. in the Military Dept. dy. 8th inst. on the Board's letter of the 22d. December 1842 relative to the supply of cur. rency &c. for the use of troops be communicated to Mr. Petty the Sub Collr. of Bellary for his information & guidance.

Extract from the Minutes of Consultation under date the 28th. February 1843.

Read the following

Extract from the Minutes of Consultation in the Military Department, 10th February 1843.

The following Paper is ordered to be recorded.

Extract from the Minutes of Consultation in the Revenue Department.

(Here enter 25th January 1843 No 392)

The Most Honorable the Governor in Council directs that the foregoing Extract be communicated to the Commander in Chief (Quarter Master General's Department) with a request that His Excellency will cause the Officer Commanding the 5th Regiment Light Cavalry to be called upon to explain the reasons of his having on the March of that Regiment from Bellary after making a requisition upon the Civil Authorities for 300 Bandies employed 194 only of that number, & proceeding in consequence of which a charge of Rupees 42 and Annas 12 for Batta to 101 Carts has been incurred - and,

ORIGINAL DESTROYED

should

should the reasons not appear to be satisfactory he will be ordered to pay the amount.

His Lordship in Council further directs that His Excellency be requested to cause the Government to be furnished with a report upon the rules proposed by the Sub Collector of Bellary in his letter dated the 7th November 1842 No. 3316 and the observations of the Revenue Board thereon.—

With reference to the statement of the quantity of carriage required by Corps and Detachments, received with a letter from the Quarter Master General of the Army dated 28th March 1842 No. 1841 His Excellency will be requested to direct that a revised average allotment for general adoption be forwarded to Government, not to be greatly exceeded except in cases of emergency, which may seldom occur, and then upon due notice being given.

It is observed that in the statement above referred to, 65th Dragoons are entered for a Regiment of Cavalry in the Ceded Districts, 300 having been first called for and 194 only required on the March

March of the 5th Regiment Light Cavalry.

Resolved that the observations of the Revenue Board, contained in the foregoing Extract, be communicated through the Revenue Department to Mr. Pelly with a view to his being requested to draw up a concise set of rules for procuring carriage &c. for the use of Troops moving out of the Bellary District, for which from the praiseworthy interest he has taken in the subject, he appears to be well prepared.—

(Signed) J. W. Steele Lt. Colt.
Secretary to Government

Ordered that the foregoing Extract with the letter from the Board of Revenue dated 22d of December 1842 be communicated through that authority for the Sub Collector Mr. Pelly's information and guidance.—

(Signed) J. F. Thomas
Jr. Chief Secretary

Resolution thereon,

Resolved that a Copy of the foregoing Extract from the Minutes of Consultation with Copy of the Board's letter dated 22d December 1842 be sent to the Collector of Bellary with instructions to communicate the same to the Sub Collector Mr. Pelly for his

From the Asst Chief Secretary to Govt

Transmitting for report an Extract for the Minute of Consultation in the Military Department &c. &c. &c. with a copy of a letter from the Quarter Master General of the Army relative to the limits of the Military Cantonments at Manantoddy.

5

This is information and guidance.

Extract from the Minutes of Consultation dated 28th February 1843.

Read the following Extract from the Minutes of Consultation in the Military Department 7th February

The following paper is ordered to be recorded.

To

Lieutenant Colonel Stoke C.B.

Secretary to Government &c. &c. &c.

Sir,

I have the honor by direction of His Excellency the Most Honorable the Commander in Chief to transmit the annexed Copy of a letter from the Officer Commanding Malabar and Canara, with its original enclosures, being a reference from the Officer Commanding Manantoddy relative to the Military Limits of that out-post within the Boundary of which and the Limits of the Detachment several persons have hitherto had their abode and cultivated Land with Coffee Plantations.

1138.

Fort St George 6th March 1843.

observe that it does not appear by the Records of this Office that any Military Limits have ever been fixed for the Post of Manantoddy, where more ground is not required to be under Military Controul than what is necessary for the Pitting and Parade of the Detachment and in the immediate vicinity of the Barracks. The question therefore of the right of enclosing Fields for Coffee Plantations would, His Lordship is of opinion, come under the adjudication of the Collector rather than the Military authority, and with this view His Excellency has ordered the enclosures to be laid before Government.

Dr Mr General's Office,
Fort St George,
6th February 1843.

(Signed) W. Strahan Lieut. Colt.
Quarter Mr General

To

Lieutenant Colonel W. Strahan
Quarter Master General of the Army
Fort St George

Sir,

I have the honor to transmit an original letter from the Officer Commanding at Manantoddy, together with a

"Roll

4139. Fort St George 6th March 1843.-

"Roll of persons residing in the Lines and within the surfaced Military limits."

It is stated in the Roll that some of the inhabitants have resided twenty and even forty years in these limits, a statement which I imagine is at variance with fact, as the Wynaad Rangers ceased to be a separate Corps only in October 1834. I request you will have the goodness to furnish me with a plan of the Military limits at Manantoddy for my guidance.

Read Dy. Asst. Adjt. Genl. Malabar, and Canara, Cannanore, 2d January 1843.

To

The Collector of

Masulipatam

(7-8)

To the Collr. of Masulipatam

Sir,

From Govt. 2nd March 1843 In Govt. 6 Do No. 731.

I am directed by the Board of Revenue to inform you that the Most Honorable the Governor in Council has been pleased to sanction the law charges reported in your letter

In Cons. 13th Feby. of the 4th Ultimo No. 15 amounting to Rupees 5.

Revenue Board Office, Fort St. George, 5th March 1843.

(Signed) C. C. Lovell
Actg. Secy.

Read again letter from the Collector of Masulipatam dated 25th November and entered in Consultation 15th December last.

Ordered that the following address be submitted with the abovementioned letter

To

The Acting Chief Secretary to Government

(9)

To the Actg. Chief Secy. to Govt.

Sir,

Parás. With reference to an Extract from the Minutes of Consultation No. 57

1145 Fort St. George 6th March 1843.

In Cons. 27th Jany. 1842. I am directed by the 14th January 1842, Para 2, referring Petitions No. 1519 and 1610 of 1841 from Venkatadry Apparow and Lemhadry Apparow for the consideration and report of the Board of Revenue I am directed to submit the

25th Novr. in Cons. 15th December 1842 accompanying report of the Collector of Masulipatam for the consideration of Government.

2. Under the orders of Government communicated in an Extract from the Minutes of Consultation of the 6th December 1842 the Collector was

In Cons. 22 Dec. 1842. instructed to purchase the Nedadavole Zemindary on account of the Government to relinquish the heavy arrears of Government Revenue outstanding against it and to satisfy the demand of the Noozeed zemindar by delivering to him the portion of the Nedadavole zemindary which he had agreed to receive in satisfaction of his claim thereon, and to restore the remaining portion to the Zemindar of Nedadavole on a new settlement, he undertaking to satisfy all further private demands against him and of these the claims of the Petitioners in question form part. The Petitioners receive also part of their stipends from the Zemindar of Noozeed and are desirous that their allowances from both the Zemindaries may be paid directly

from the public Treasury and the Collector recom-
that their wishes may be complied with as the
payment of the allowances of the Petitioners is guar-
-teed by the Government it appears a simpler
and better arrangement in every respect
that the amount should be collected
and paid to the Petitioners by the Collector
of the District and the Board therefor
recommend it for the sanction of
Government.

3.

The question regarding the
arrears due to the Petitioners from the Nedadavole Za-
-mindar which the Collector observes appears "for the
present in abeyance being dependent in a great mea-
-sure upon the result of the reference which has been
made to the Home authorities regarding the Nedadave
debts" the Board consider to be already disposed of
the date of the Collector's report under the orders of
Government above referred to.

Paras 8-9.

4

The Collector has further recom-
-ed that the arrears of Permanent Jumma due by Petition
on the Village of Streeramavaram be remitted to the

amount of Rupees 2,023 — 4 — 1 and that it
be continued to him on the same terms Rupees 532
— 8 — 9 half the Permanent Assessment Rupees 1,064
— 1 — 6 for 5 years longer.

5. In this recommendation the Board
concur. It will, however be in the recollection of Govern-
-ment that these favorable conditions were accorded
at the recommendation of the Board on the ground
that it was "highly advisable to give Simhadry
Apparow the means of bringing his Village into good
condition by granting Cowles for the extension of
cultivation and making the necessary repairs."
So far however from having done so he has
little more than paid the reduced Peshcush
for one year, while it is stated that the Village
has yielded still less. but Mr. Porter has
omitted to mention whether the Zemindar has made
any efforts to restore the resources of the Village. Under
these circumstances it is for Government to determine
whether any farther indulgence shall be
granted to him.

Go. Govt. 25th October 1837 Para 6 Ext. Min: Cons: 17th Nov. 1837 in Cons. 27th Dr.

6. I am further directed with reference
to an Extract from the Minutes of Consultation

4148 Fort St. George 6th March 1843.

Acknowledging the receipt of his letter No. 895 dated 18th July 1839 to Accounts for the establishment and orders of Government thereon.

Sir,

I have the honor to transmit herewith a letter from the Collector of Chingleput, with its enclosures, on the subject of granting a bounty for the encouragement of the manufacture of salt.

2. The Board observe that the Collector has not stated the quantity of salt which he proposes to grant a bounty upon, nor the rate of bounty which he proposes to allow, and they request that he may be called upon to furnish the information.

I have the honor to be,
Sir,
Your most obedient humble Servant,

From H. Morris Esqre Supt of Stamps } Sir,

24

With reference to Extract from the Proceedings of the Board of Revenue dated 10th November 1842 desiring me after communication with the Collector of Malabar to furnish the further information required by Government in the Minutes of Consultation in the Revenue Department Nº 1301 dated 7th idem, relative to the deficiency in the stamps of that District, I have the honor to forward copy of correspondence with Mr Conolly, from which it will be observed that that officer has been unable to collect from his records any precise information as to when the deficiency in question was detected, altho' he presumes that it must have been between the 12th July and 31st October 1817 as the quantity deficient was omitted from the Returns furnished to this Office from the latter date.—

As far as I can find, no notice was taken of the discrepancy by this Office at the time the earliest call for explanation being

To,
H. V. Conolly Esqre
Collector of Malabar.

Sir,

With reference to my letter of the 17th November last, I have the honor to transmit copy of a letter dated 26th Instant which I have just received from the Board of Revenue and to request that you will be good enough to use all the despatch in your power in furnishing me with such further information as you can collect relative to the deficiency in the Stamps in your District to enable me to make the report called for by Government.—

Fort St George.
General Stamp Office,
31st January 1843.

/Signed/ J. C. Morris
Supt of Stamps.

To, J. C. Morris Esqre
Superintendent of Stamps
Fort St George.—

Sir,

I have the honor to acknowledge the receipt of your letters dated respectively the 17th November 1842 and 31st Ultimo calling upon me to state for the information of the Board of Revenue to what

Fort St George 6th March 1843.

what period the deficiency in the amount of Stamps reported upon by me on the 22d August last, was first brought to notice in the Cutcherry of the Principal Collector of Malabar, and what was the earliest report made on the subject to the Board of Revenue —

2.

In reply I beg to inform you, that although a diligent and careful search has been made in the records of this office, I have not been able to trace any information which will enable me to answer the first query satisfactorily - it is however to be presumed that the deficiency must have been discovered in the Principal Collector's Cutcherry some time between the 12th July and 31st October 1837 - as by the copies of the Returns in this Office, it appears to have been excluded from the Quarterly Statements forwarded to the Superintendent of Stamps, not the Board of Revenue for those periods —

Calicut - 21st February 1843. } I Signed H. V. Conolly Collector.

To the Sec. to Govt. Revenue Submitting the replies of the Revenue Officers in the Provinces to a Circular addressed by the Board relative to the draft of Passport Regulations prepared by the Superintendent of Police together with the sentiments of the Board on the subject.

Read 22nd January 1843.

therein referred to.

To The Acting Chief Secretary to Government.

Sir,

I am directed to acknowledge the receipt of an Extract from the Minutes of Consultation of Government under date 16th December 1842, transmitting a letter and Enclosures from the Chief Magistrate and Superintendent of Police and calling upon the Board of Revenue, after communication with the Local Collectors and Magistrates to suggest any modifications or additions which may appear to them necessary with regard to the draft of the Passport Regulations prepared by Mr. Elliot.

2. In conformity with these instructions a Circular has been addressed to the subordinate Officers in the Provinces, whose replies are herewith forwarded.

From the Collector of Cuddapah 24th January 1843.
From the Collector of Chingleput 17th " "
From the Collector of Salem 16th " "
From the Collector of North Arcot 17th " "
From the Collector of South Arcot 10th " "
From the Collector of Tanjore 12th " "
From the Collector of Trichinopoly 14th " "
From the Collector of Tinnevelly 17th " "
From the Collector of Canara 2nd " "
From the Collector of Malabar 13th " "
From the Commissioner of Ceded Districts 14th " "

3 It does not appear to the Board of Revenue

Fort St. George 6th March 1843.

their bearing on the revenue and commerce of the country. Under this point of view they would advert to the necessity of fixing by some specific definition who are the Asiatic Foreigners contemplated by the projected rules the force of which phrase has, it will be seen been the subject of doubt and discussion among several of the local authorities. The Board cannot doubt the correctness of the view which they have taken in their reply to the Principal Collector of Nellore, viz. that the term cannot be understood to apply to the subjects of States in a subsidiary alliance with the British Government. To hold otherwise and subject to the operation of the Passport rules Lumbadies, Brinjaries and all the various tribes of wandering Merchants who are in the habit of resorting from the Dominions of the Nizam and other Native Princes to the Coast Districts for Salt and Grain, would in the opinion of the Board add nothing to the security of the Country, while it would seriously hamper an important branch of traffic. Indeed it does not appear practicable even were

among these persons any more than town
the Pilgrims and others who from motive
of devotion or superstition, proceed from c
countries under Native rule to the most
celebrated Pagodas and places of worship
within the Company's territories and whose
expenditure forms frequently a considera
item in the retail trade of the Towns in whic
such objects of resort are situated.

4. The above remarks apply
only to Natives of states which tho' not direct
under British rule may be considered to
be immediately under the influence of our
Government but in reference to the distinc
tion taken in Para 2 of the letter from the
Commissioner in charge of Madura; the C
Board cannot doubt that parties of
pure or mixed European descent not being
natural born subjects of her Majesty are
to all intents and purposes Foreigners and
liable to the operation of the regulations
contemplated.

5. The rules now under review
apply only to parties proceed
from one station

stated routes. In the case however of
foreigners residing in Foreign Settlements
and owning factories &c. in the Company's territories,
whose business compels them to pay frequent
visits to these Establishments moving from
one to another, and remaining a longer or
shorter time at each as their affairs may
require, the proposed system of provisional
passport, and strict adherence to fixed
routes is obviously inapplicable. In such
instances it will seem advisable to invest
the Magistrate or other officer with a
discretionary power to grant passports
available for a certain time and within
stated limits - within which the bearer, if
his conduct be correct and orderly will be
allowed to carry on his business without
question or molestation.

6. The suggestions of the
Collectors of Malabar and Canara for
the preparation of Passports in the Malabar
and Canarese as well as other Native
Languages seem also worthy of attention
and the more so as the ports at which

Fort St. George 6th March 1843.

prevail are those usually first visited by foreigners repairing to India by the overland route.

Revenue Board Office,
Fort St. George,
6th March 1843.

} (Signed) E. C. Lovell.
Acting Secretary.

Resolved that the following letter be dispatched.

(68)

From the Acting Collector of Vizagapatam.. Return of alterations

(69)

than for purposes of cultivation, should not
be summarily handed over, if temporarily
left waste to the first proposer who express
his willingness to pay peishcush without the
option having been given to the ancient
occupant of retaining the Ground and
paying the Government demand, if such
was properly demandable - Reason and
equity seemed to require that this course
should be pursued to prevent cases of indi-
vidual hardship and injustice - For it
appeared to the Board, from an attentive
examination of the several cases which ha
become the subject of litigation, that the
proposers, to whom the spots of land had
been made over, were actuated more by
motives of private pique than public principle
in seeking to deprive their opponents of land
long in their enjoyment, convenient to them
from its situation, and on which in some
instances much cost and labour had been

3. The course pointed out
was known to have been that practically
followed both in South Arcot and through
out the Southern Peninsula - as shewn in
the absence of all litigation until recently
ly in Mr. Ashton's District - If any
local Rules circulating an opposite
practice had been at any time promul-
gated, these had, at any rate been
suffered to be inoperative -

4. The practice indicated above
is generally followed in all districts, is of
easy enforcement, and is besides agree-
able with local usage and the feelings
and wishes of the people - The details
are best left to the discretion of the local
officers before whom each case will natu-
rally come in review, and the usage does
not require, the Board think, to be
fortified by strict regulation or legal
Enactment - Many of the rules of
suggested by Mr. Norton
