Read the following letter.

To the Secretary to the
Board of Revenue
Fort St. George

Sir,

(14)

From the Collr. of Vizagapatam
Submitting his annual Report on the Extra Sources of Revenue in his district for fasly 1250.-

Para 1. I have the honor to submit my annual Report on the Extra Sources of revenue in the district of Vizagapatam for Fasly 1250 together with the following Accounts.

A.- Statement shewing the demand Collection and Balance under each head of Extra Revenue in the District of Vizagapatam for fasly 1249/50.-

B.- Statement shewing the demand Collection and Balance of arrears of Extra Revenue in the District of Vizagapatam on account of former fasly for fasly 1249.-

C.- Statement shewing the gross Collections charges and net Revenue of all branches of Revenue land,

Revenue

14927- Fort St. George 1st November 1849.

Receivers accounts for fourth Qrtr 1249/50

D. Statement shewing the quantity of Salt manufactured, sold and the amount thereby derived to = =ge thereof with a comparison of the quantity manufactured in different Cutcherries in the Guilds of Vizagapatam for fourth Qrtr 1249.

E. Statement shewing the Salt duties or Sayer for the supply of which Commands have been issued for the trans= =port of Salt from the Cutcherries in the District of Vizagapatam for fourth Qrtr 1250.—

F. Statement shewing the Amount receivable and irrecoverable balances of Protarkha up to fourth Qrtr 1249.—

G. Statement exhibiting Abstract of Payment of the Amount received in the Cutcherries in the District of Vizagapatam for fourth Qrtr 1250.—

file

3 The district suffered severely during the fusly under review from a very severe drought this however does not always cause an immediate falling off in the Extra sources of revenue and it has not done so in the present instance. A great deal of grain has been imported into the District from Arracan, and this has created a demand for the manufactures of the district in return.

Salt. 4 — There has been a decrease in this source of revenue in the fusly compared with the preceding fusly amounting to Rupees 380-2-10. When the large increase in the sales of salt during the last few years and especially in fusly 1249 is taken into consideration this result will I trust be considered very satisfactory.

	Fusly 1249	Fusly 1250	Increase	Decrease
Home Consumption	12488 15 6	13584 11 8	5387 12 2	" " "
Inland Do.	971 1 6	1343 3 7	" " "	537 15 "
	13459 5 6	14927 2 8	5925 12 2	537 15 "

5 — The details of the sales for home and inland consumption are exhibited in the Margin. The severe drought and consequent scarcity of water

water and pasturage deterred the Brinjaries from coming to the Pass. The consequence was that the inhabitants of the district conveyed the salt to the frontier and there resold it to the Brinjaries. — This is apparent from the large quantity of salt destined according to the Rawanahs to frontier stations most of which are wild hilly places where there could be little demand for salt on the part of the inhabitants. — Thus 499 Garces have been taken to Jeypoor which is the high road to the Nagpore territories 252 Garces have been taken to Saloor which is another route to Nagpore. All this salt is entered in our accounts as sold for home consumption, whereas I do not suppose a twentieth part of it is consumed in our own territories. —

6 I fear there is some chance of a falling off of revenue in

in this source in the present Fusly. The manufacture was prematurely brought to a close at the two Northern Pans Coopilly and Conadah (where the demand always comes fully up to the supply by the seviere storm on the 18th of May and the monsoon set in before the manufature could be re-commenced. —

7. — There was increase in the charges on this source in the past compared with the preceding fusly amounting to Rupees 5,665-7-4. owing partly to the increased quantity of salt purchased in fusly 1250 and partly to the expense incurred in erecting new plat forms at Coopilly and Nelly mookoo.

8. — The advance for manufacture

	Fusly 1249	Fusly 1250
Demand	4600 " "	2880 " "
Collection	4600 " "	" " "
Balance	" " "	2880 " "

manufacture in the past year has been much smaller than in the preceding year in proportion to the reduced quantity of salt manufactured. The details are exhibited in the Margin and the balance will be recovered so soon as the present storing is completed. —

Sayer 9. — I beg leave to annex an abstract statement exhibiting the comparative Demand Collection and Balance under this source of revenue in fusslies 1249 and 1250 which shews an increase of Rupees 6913-10-11 in the latter year Viz. Rupees 440 in the Bulle rent and Rupees 6473-10-11 in the Aumany Collections

Fusslies

Decrease " " " " " " " " 670 5 4

14934. Fort St. George 1st November 1841

10. The increase in the Sumary Collections is to be attributed to the increased demand for the staple manufactures of the District the cause of which has already been explained

The balance of Rupees 670-5-4 outstanding against the Beetle renter to the end of the fasly is now reduced to Rupees 270-5-4. This will be realized shortly.

11 There was an increase of Rupees 7147-1-11 in the charges on this branch of Revenue occasioned by the exportation of Cloth to Calcutta and the consequent repayment of the duties levied on it which appears as a charge in the accounts.—

12 Specimens of the Jaggery made in this district have been forwarded to Calcutta and declared to be very superior to any procurable there, so that Struck before another year has elapsed the manufacture of sugar will be fairly commenced upon, and they would be of the utmost service to this District

14936.

Fort St. George 1st November 1841.

Number	Fusly	Names of Renters	Names of Securities	Balance at the close of Fusly 1249	Collections in Fusly 1250	Remission	Total Collections	Balance up to the close of Fusly 1250

+ Of this balance Rupees — 3,008 8 "
have been subsequently received
leaving a balance of Rupees, - - - - - - - 4,500 " "

Fort St. George 1st November 1841.

17 The Right Honorable the Governor in Council was pleased in para 7 of the Minutes of Consultation under date the 20th of March 1841 to declare that a remission of Rupees 4,500 will be granted on the Cr renter making good the remaining Rupees 4,500 or on his tendering adequate security to pay that sum within a limited period - The renter and his security have now paid the above sum into my Cr treasury - and I therefore request sanction for writing off the remaining Rupees 4,500 -

18 The indulgence thus granted has been duly appreciated - The balance accrued during a year when the renter was a considerable loser by his rent and the punctual realization of this year's revenue is I trust a sufficient proof that the interests of Government have not suffered thereby. -

19 There was an increase on this source of Revenue in the past year compared with the preceding Cr jusly amounting to Rupees 12,592-7-8 composed as follows

Sayer and Sea Customs Rowanaks	640-10-2
Stamps - - - - - - - - - - - -	11,951-13-6
	12,592-7-8

Stamps

Fusly 1249 - 18,346-4-10
" 1250 - 30,938-12-6
Increase 12,592-7-8

The

Fort St. George 1st November 1841

The increase on the former Cr item arises from the increased Collection in those branches of revenue. The increase on the latter item is only an apparent one it arises from many of the suits struck off the file of the Provincial Court and Zillah Courts and in which the stamp duties were refunded to the parties having been refiled before me in my capacity of Agent to the Governor in Vizagapatam.

20 There has been an increase

21. - in the charges of Rupees 4,371-1-11 of which the following are the details.

Increase in the Commission Paid to venders of Stamps - - -	532-7-11
Amount returned to the parties in Civil suits agreeably to Sec. VIII of the rules framed by Government for the guidance of the Agent. - - -	1,120-11-11
Amount of Stamp duty returned to the parties whose cases have been struck off the file of the Zillah and Auxiliary Courts. - - -	2,698-10-11
	4,371-1-11

There

14939 Fort St. George 1st November 1841.

Moturpha 22 There was a small de-
crease of Rupees 39-7-11 in the demand
under this head in the last year, ow
owing to the adversity of the seasons
and many of the artizans having
in consequence left the district.

23 From the same ow
Fasly 1249-6-12-7-9 cause the Collections fell ow
" 1250-5-9-8-13-4 short in the sum of Rupees
113-10-5 113-10-5.

24 There was an increase
of Charges in this source of Revenue
of Rupees 32-14-6 owing to a ow
vacant situation having been
filled up.

25 The annexed statement
exhibits the particulars of
the arrears outstanding on
account of Moturpha and
Irequests sanction for writing
off Rupees 140-4-3 which I
have ascertained to be irrecoverable.

Order.

14961.

Fort St. George 1st November 1841.

Order thereon.

(Proceedings 29th Nov.r 1841.)

14 - 15

Ordered to be sent again in Circulation.

Read the following Letters

To the Secretary to the

Board of Revenue

Fort St. George.

Sir,

Para. 1. With reference to the instructions, noted in the margin, directing the survey of the lands in the Government Estates in this District, I, on the 24th January 1839, applied to the Board, and obtained sanction, under date 4th April 1839, for employing a certain Establishment† for the purpose of commencing operations and establishing the principles, on which they could be continued. In consequence of the Monsoon and the storm, which visited this District in November 1839, it was impossible to commence immediately, but in the month of April 1840, Mooperaulah Streenevasiah, the Nair Sheristadar of my Cutchery was appointed to the charge of the undertaking, and the following Establishment

16

From the Coll.r of Rajahmundry.

Submitting Report on the Survey commenced on the Government Estates of this District, Part of the Vaudsal and Palacoddaroo Villages of Woondy Taluck, together with several Accts. related thereto, per Bd's Proc.s 7th & 21 affording the necessary informations as called for in Bd's Proc.s of 4th Nov.r 1839 & 11th Feb.y 1841, together with general Establishment proposed for the Survey in general.

† Rupees 184 per Mensem.

14962.

Fort St. George 1st November 1841.

Establishment has since been employed.

2.	Pymaishdar or Surveyor	Employed from 6th May 1840.	
	Dumpoory Bojjayah

		184. " "		184. " "

Although there are some slight differences in the details of the Establishment employed and that proposed, the expenses incurred have been for within the Estimate, and the Number of Accounts necessary to be prepared will show that, some little adaptation of my means to accomplish the purposes required, was necessary. The numerous forms also, which were kindly supplied me from the Office of the Board, took some

Vide Bd. letter Dd. 20th August 1840.

some little time to prepare, and as these only reached me in the Month of September 1840, I trust it will not be considered that there has been any want of attention on my part, to the wishes of Government, though I am fully aware of their anxiety that no unnecessary delay should occur.

2. Although the accounts for the Villages only accompany this Letter, the Survey of fifteen [illegible] been completed, and the advantages of the undertaking to Government are already showing themselves, but the abuses which have prevailed in the misappropriation of a good deal of the Inregular land, will naturally cause every obstacle which the most vexatious opposition can devise to be thrown in the way of the operations, to overcome which the most steady and unflinching perseverance will be necessary.

3. From the assistance of

Marked A B and C

Servants engaged in the Survey, the Instructions, as noted in the Margin, were prepared, with reference to those formerly adopted by Sir Thomas Munro, and the different local circumstances of the District, but directly the duties were entered on, a difficulty presented itself, which it was necessary to overcome immediately. All the land Accounts of this District had been kept in Cottics, Tooms and Maunikahs, twenty Tooms being equal to a Footy, and sixteen Maunikahs to a Toom, and eighty Cubits or One hundred and twenty feet was the understood length of the Puggum, which had been generally in use, one square measure of such Puggum being equal to one Coontah, and twenty Coontahs to one Footy. On applying this mode of measurement, however, the excess was found so great, that other Statements, that Puggums of 90 & 96 Cubits had been used, were obliged to be tested, and the following Statement shows how completely at variance each of these measurements was found, with reference to the Original Bhoobund Accounts.—

Villages

Under

4. Under these circumstances, the only conclusion, which could be come to, was that an original opinion, entertained that no actual measurement ever took place in this District, and that the Permanent Settlement was only formed on a rough Estimate of the quantity of Land, was correct, and that therefore, the easiest mode of overcoming all difficulties was to treat the subject De Novo, by adopting the mode of measurement, prevailing at Madras and in other parts of these territories generally of Acres, Coontahs and Veesums, forty coontahs being equal to one Acre, and Sixteen Veesums to one coontah, thus securing every incumbent from any interference with the proportions of land to which his claim might attach Accordingly a chain of thirty three feet was adopted, one square being equal to one coontah, and forty coontahs to one Acre, and the following Statement shows the proportions borne by the present to the former Measurement in the Villages

of Vandrah and Palacoodaroo of the Woody Talook, of which the Survey has been completed.

No	Names of Villages	Land according to the Permanent Jhoobund	Land as per Bhoobund accounts rendered by Curnums during Summa 1249	Total Quantity Land	Land as per present Survey: Deduction account of Poorstah and Goota meddy not included in the Permanent and subsequent accounts	Remaining Land	Average No of Acres Per each Pooty of land as per Permanent Jhoobund	No of Acres per each Pooty of land as per Bhoobund accounts rendered by Curnums accounts up to fasly 1249.

The

6. The 1st Account is the Pymash Chittah or Account particulars of the Survey, shewing the fields of Jeroyettee Enams &c., both dry and wet, indiscriminately measured according to the Numbers, the Lands of this District not being divided, that is dry Lands on one side and wet on the other. This Chittah does not shew the total quantity of Jeroyettee Lands, Enams &c. but this is shewn by the account No. 3 called Abstract of Pymash Chittah. The Columns No. 1 of the Board's form, shewing the date and names of the Surveyors &c. is struck off in this Chittah, as those particulars are entered in the heading of the account. The Columns No. 6, 7, 8. of the Board's form shewing the number of fields, produce, and clapes of the Land, up to last fusly, are also struck off, as the accounts of those items were never kept in this

District

District, but they are entered under the head of the present survey in Columns 9, 10. and 11 of this Chittah—

7. The 2nd account showing the Land on account of the boundaries not entered in the Permanent Bhoobund, or in the subsequent Bhoobunds produced by the Curnums up to fusly 1249, is newly prepared here, in addition to the Board's forms. This account exhibits the Quantity of land as per Permanent Bhoobund and Bhoobund Accounts produced by the Curnums up to fusly 1249, and the gross Quantity in Acres as per present Survey, and the deductions therefrom on account of the †moiety of the Boundaries, (which were not entered in the former Accounts, but in the present Survey), leaving the remaining actual quantity of the Survey in Acres, with the proportions borne by it to the Quantities of permanent Bhoobund and subsequent Bhoobund

† The other moiety having been left for the other Villages in the neighbourhood.

Bhoobund Accounts.—

8. The 3rd account is the Abstract of Pymash Chittah, showing the total quantity of Seroyettee and Enam lands, both dry and wet, under Cultivation and pasture the Parempoke or land originally deducted as unfit for Cultivation, the portions of the said Enams, entered in the Permanent accounts, and those not so entered, held by Village Servants and others In respect to these two latter, the portions held by the Village Servants are very small and necessary, and they have been accordingly treated as Doombalah, whether they existed before the Permanent Settlement or not, but with respect to the others, those only, which have been proved by Documents produced to have been held before the Permanent Settlement have been treated as Doombalah, the others have been considered liable to a recommendation that a certain Cuttoobody should be imposed as shown in the account No 11—

9. The 4th Account is the Ajmayesh Chittah prepared by the Ajmayeshdar or Examiner, showing certain fields examined by him, upon the Surveyor's measurement duly prepared with reference to the form of the Board, of which the following is an Abstract Names example.—

14973

Fort St George 1st November 1841.

10 The 5th Account is the Tarum Chittah showing the Clasification of the fields for the Serayettee and Enam lands &ca both dry and wet, entered indiscriminately (as in the Pymash Chittah No 1 without showing the total extent Clasification &ca of the lands) according to the numbers in which they were measured by the Surveyor. The Columns No 5. and No 6. of the Board's form, showing the Clasification and produce, according to the former usage, are omitted in this account, as those items were not found in the former Accounts of the District. The rest of this Account is prepared according to the form of the Board.

The 6th Account is the

11 Tarum Awarjah, showing the total extent and Clasification of the Serayettee Lands, Enams &ca according to the Abstract of Pymash Chittah No 3, above

14972

Fort St George 1st November 1841.

Fort St. George 1st November 1841.

abonia alluded to. This Account is prepared according to the Board's forms, with the exception of Columns Nos. 10 & 11, which are omitted, as the former Classification and produce cannot be ascertained by the Accounts of this District.—

12 The 7th Account is the Estimate of produce, shewing the Ryots and Circar's shares of produce, per each Acre of Jeroyettee lands and Enamsa both dry and wet, according to those Classes, The Columns Nos. 2, 3, & 4 of the Board's form, in which the Estimated produce of the Year 1813. was entered, are omitted, as no Estimated produce of any former time can be ascertained from the old Accounts. In lieu of those Columns, however, some additional Columns have been opened for entering the produce Estimated, according to the present circumstances consisting of Paddy, the produce and Cundoolas, Grain, Cotton &c., the second,

† By the Villagers Tarumdar and Superintendent of the Survey accompanied by the Punchayetdars.—

J.G.B.

Fort St. George 1st November 1841.

second produce, capable of being produced, with reference to the classifications of the lands.—

The 8th Account is the Statement

13. shewing the Swatantrums and Marahs to be allowed to the Village servants and cultivating servants of the ca= Ryots, upon the Grass produce (that is both shares of the Ryots and Circar) of the land.—There are several Columns in the Board's form shewing certain items of those Swatantrums and Marahs resumed, and those still in continuance, but in this account, only one Column has been opened, shewing the Marahs to be allowed to the Village Servants &c., according to the pre= vailing usage of the District, at the rate of 3 Tooms per Pooty, upon the Gross produce, as above.—

The 9th Account is the Nerook=

14 =namah, or Statement shewing the cu= price Current of Grain. Two Columns are opened in the Board's form, for white and black Paddy, but in this account, certain

* This item is not allowed in this District.

certain other Columns have been added, in order to enter the prices of some other Grains produced by the Lands of these Villages. The prices of the Grain in question are based upon the average of 21 Years, exclusive of years of famine and those of high prices.

15. The 10th Account, is the Statement shewing the mode of converting the Estimated produce of an acre of Land into rent or Cist. Some Columns are open=ed in the Board's form, for entering ex= certain Swatuntrums and Marahs, which were resumed under Circar, but they are omitted in this account, as there are no such resumed items in this Dis= trict. The Board's form exhibits the Estimated produce of white and black Paddy only, but in this account, some additional Columns have been open=ed for entering the produce of various grains severally estimated by the Villag= ers, the Tsiumdar and the Superintendent of

Survey, accompanied by Punchayetdars. As the first of the said three Estimates was found too low, and the second too high, the third one or that of the Superintendent and Punchayetdars was adopted, and out of the Gross produce, (that is both shares of the Ryot and Circar.) therein entered for each acre of the lands of the several classifi= =cations, a deduction was made at the rate of 3 Tooms per Pooty, on account of Marahs, with reference to the account No. 8, and then a moiety of the remain= =ing quantity was deducted for the share of the Ryot, leaving the other moiety of the produce as Umbarum or Circar's share, for which the value was fixed, with reference to the average prices insert= =ed in the Account No. 9, and out of the value so determined, one fourth being deducted, as Compensation for the labour of irrigation, and as a Counter-balance to the actual uncertain= =ty of the Seasons, the remaining value was fixed as

as Cist, per each acre of land according to the classi-
fication. There is also a last Column in this Account,
with reference to the Board's form, shewing the accurate
Amount of Cist so assessed, for each acre of land,
according to the classification, inclusive of the
difference of the small fraction below the piece,
remaining due in the Calculation of the Contents.-
16.

The 11th Account, is the Statement shew-
-ing the extent of Jeroyettee and Enam Lands, in
field wast, both dry and wet, charged with the com-
assessment, according to the classification.
The Board's form of this account specifies
only the Abstract of the classification for
the Jeroyettee and Enam Lands, but the
account now prepared is enlarged, so as to shew
the portions now under Cultivation and
the dry and wet, the Number of products
classification and the assessment in fields
-wise. The Cist for all the Jeroyettee and
lands has been entered here, with reference to
rates fixed per each acre in the Accounts No. 1
total amount of Cist so fixed for the
Jeroyettee Lands and the other Items
payable to the Circar as inserted in the
account are as follows.-

Jeroyettee

	Amount of Vandrale Village.	Amount of Palaccaroo Village.
Jeroyettee Cist.	C Rs. A P.	C Rs. A P.
Amount of Cist upon Jeroyettee lands	1,730 11 "	2,476 " 9
Amount of Jeroyettee lands held by the Moonsiffs	" " "	16. 6 2
Total Jeroyettee Cist.	1,730 11 "	2,492 8 11
Cuttoobady Cist.		
Amount of usual Cuttoobady as per permanent account	26. 15 3	" " "

Total Jeroyettee and Cuttoobady Cist.	1,766. 15 "	2,545. 15 1.
Tax on Palmira Trees	16 " "	14 " "
Total	1,782. 15 "	2,559 15 1.

Sl.o

The Jeroyettee and Cuttoobady Cist now as-
=sessed for the Lands of the Vandrak Village
nearly approximates to the former Average
Collections entered in the Account No. 14.
and is adequate to the present state of the
Village. The usual Cuttoobady upon certain
Enam lands of this Village, entered in the
Permanent Accounts, having been subse=
=quently charged, in the Summabundy Ac=
=counts, in a fluctuating, and capricious
manner, the error has been rectified in
the present Survey, and all these Lands
are charged with the Cuttoobady precisely
as stated in the Permanent Accounts, which
appears consistent with their present
state. The Enams duly entered in the Permanent
Accounts, those not entered in the Perma=
=nent Accounts but held by the Village
Servants, and those, though not entered in
the Permanent Accounts but held
by certain Persons with Documents ex-
=proving their occupation previously to
the Permanent Settlement, as stated in
Para 8 of this report, have been treated

as

as Doombalahs. All the other Enams
Styled Darimlah Maniums, held as
Doombalah without being entered in the
Permanent Accounts, nor supported by
any substantial Documents, are charg=
=ed with an adequate Cuttoobady above
alluded to, which appears more equitable
than the entire resumption of lands,
which have been enjoyed for a long time.
The Cuttoobady, so charged, has been calcu=
=lated at one-fourth of the full Cist of
the present survey, as it is a known fact
that, lands of this description are gener=
=ally let out at a far reduced Cist. The
details of Enams of all these descriptions
will be seen in the account No. 15. The
tax on Palmira Trees for this Village
is charged as usual, it being amply
sufficient. The Jeroyettee and Cutto=
=bady Cist now assessed for the
Lands of the Palacodaroo Village
also approximates to the
former Average Collections enter=
=ed in the Account No. 14, and is equal
to their present state, but it is far below the

Permanent

Fort St. George 1st November 1841.

Permanent assessment of this Village, but which Permanent assessment does not appear to have been warranted by any of the old accounts taken for the purpose of framing it.—

	Cht. A.C.
Circuit Committee account	2069-1-0
Skinner's 13 years account	2580-5-6
Ravel's Average account	2718-1-9
Skinner's proposed Permanent assessment	2887-8-0
Average assets on which the Permanent assessment was fixed	2327-8-0
Actual Permanent assessment	3472-0-0

Looking at the former accounts the present proposed Permanent assessment of Rupees 2559-15-1 appears in accordance with what the Village was ever capable of bearing, and the following are the details, by which the result has been worked out.—

				Grand Total	2559 15 1	

The

The Assessment in question amounts to Pottas 31.17.8 per Cent of the Gross produce, and the share of the Ryot to ₹ 42—10—" as will be seen in the account No 10.

For example

	Pottas	F.	M.
Estimated Gross produce	100	"	"
Deduct the Marahs for the Village Servants &c. at 3 Toms per Pooty	15	"	"
Net produce remaining for Division between the Circar and the Ryot	85	"	"
Circars share at 50 ₹ Cent	42	10	"
Deduct one fourth allowed for the labor of irrigation &c.	10	12	8
	31	17	8
Share remaining to the Ryot viz. Half share of 50 ₹ Cent.	42	10	"

Thus it is seen that the share proposed for the Ryot is ₹ 42—10—" out of one hundred and that of the Circar 31—17—8 out of the same Amount, portions which appear adapted to secure the prosperity of the former and the interests of the latter as far as circumstances which can be foreseen will admit of. With regard to

to the usual Cuttoobady upon the land of this Village, it is to be observed that a sum of Rupees 54—4—2 was entered in the Permanent Accounts under this item for 3/4 Pottas of Land belonging to the Curnams but as they were unable to pay so heavy a tax, they abandoned 1 Pooty 14 Toms and 15 Mannikahs of Land keeping the other 1 Pooty 10 Toms and 1 Mannikah under their enjoyment free of Cuttoobady. Upon enquiry into this subject the said Cuttoobady was found to belong and the land retained by the Curnams free of tax, to insufficient for the remuneration of their services that it has been considered proper to recommend that the whole 3/4 Pottas of Land, as inserted in the Permanent Accounts, should be enjoyed by them, and that the Cuttoobady thereon, payable by them be fixed at one fourth of the full Cost under the present survey, or Rupees 11.4 as

as above entered. There are 2½ Toons of Land in the Permanent Accounts for the Mitty of this Village, while he actually holds 12½ Mannikahs only; under the present Survey the remainders having been gradually included under Jeroyettee. As what he holds is not sufficient for his services the remainder of 1 Toom and 11½ Mannikahs is recommended to be allotted to him, so that he may enjoy the whole 2½ Toons as Doombalah, as entered in the Accounts now under review. With reference to the Permanent Accounts in the year 1822, 10 Toons of Land were allowed to the Moonsiff of this Village, which were not entered in the Permanent Accounts. In 1835 on the removal of that Moonsiff, that Land was resumed under Jeroyettee and the present Moonsiff was allowed 12 Toons and 10 Mannikahs of other Jeroyettee land for Maniums. This having been brought to notice upon enquiry the

land in question has been treated as Jeroyettee, and it appears right that an allowance equal to the Cist of the land in question, Amounting to Rupees 16-8-2 should be continued by a remission of Cist rather than by the alienation of the land. With respect to the Maniums elapsed under Doombalah and Darimlah Enams the latter are charged with Cuttoobady as in the case of Vendrah Village. The Account No. 15 also shews the detail of all these Enams. The tax on Palmira trees for this Village is entered as usual.

17. The 12th Account is a Statement shewing three descriptions of Cists, Viz.th the Original Cist of the lands of the Villages, the Amaraeum and Summuk=thnoy Cists of twenty years, as also the Collection of the same period, as well as the average of the same for both Villages. Also the Average of 18 years, after deducting 2 years

of

of scarcity.—

18 The 13th. Account is the state-
=ment showing the Village Charges and
and peacy Money allowances. It has
been usual, up to this time, that
the Amount of these items be deducted
out of the Cist of the Villages, and
distributed by the Villagers thems-
=elves, without interference of the
Circar, but in consequence of no fixed
principle having ever been adopted
it has been a fertile source of dispute
and abuse, and has operated most
unfavorably in respect to the payment
of the Village Servants. To prevent such
abuses in future, these items of charges
have now been definitely fixed, and it
is proposed that the correctness of the assess-
=diture should be ascertained in the
same manner as every other item
connected with the administration of
the Revenue.—

19 The 14th. Account is the
Statement

Statement showing the former average
Collections of the Villages taken by the
Circuit Committee and Messrs. Read
and Skinner, the Assets, the Permanent
Assessment, the average Collections of 20
years from fusly 1230 to 1249 since the
Estate came under Aumanie and the
average Collection of Eighteen years ex-
=cluding two of famine.—

20 The 15th. Account is the Statement
showing the details of the Enam Lands
held previously and subsequently to the
Permanent Assessment under Doombalah and
Cuttobady, the names of the former
holders, when they were granted and
the names of the present holders, together
with the relationship &c. the extent
of the Lands the nature of the tenure-
=ments held and the remarks as to
the rules adopted in the present survey.

21 The 16th. Account is the
Statement showing the Goodeecuttoorai

the

Fort St. George 1st November 1824.-

the whole extent of land forming the
Village.- In the Accounts Nos 5 and 6 above
alluded to, the detail of the fieldwar
was shown for the Jeroyattee and Cuan
lands and in this Account, the items
and fieldwar of the Parumpoke Lands
are also shewn, together with the
total extent and numbers of the Jeroyattee
and Cuan Lands.-

22 The 17th Account is the State-
ment, showing the Khawaishwang or
premises, population &c. of the Village-

23 The 18th Account is the
Statement, showing the rules, under
which the Village Curnums are
to be paid the ready Money
allowance, alluded to in the
Account No. 13 (in addition to their
lands) in lieu of batta for attend-
ance during the annual Summah-
bundy and for Sauderwaree, the principle

on

Fort St. George 1st November 1824.-

on which it has been fixed being
as follows.-

	At what per Cent the ready Money allowance is to be paid.		
	Rs.	a.	P.
For a Village bearing the Cist of within 500 Rupees under the principles of the present survey	2	"	"
For Do. Do. of exceeding 500 to 1000 Rupees Do. Do.	1	12	"
For Do. Do. Do. 1000 to 2000 Do. Do. Do.	1	8	"
For Do. Do. Do. 2000 to 3000 Do. Do. Do.	1	4	"
For Do. Do. Do. 3000 to 4000 Do. Do. Do.	1	2	"
For Do. Do. Do. 4000 to 5000 Do. Do. Do.	1	"	"
One per Cent only is to be paid for any Cist exceeding 5000 Rupees	"	"	"

24 The 19th is the plan showing the
form of the Village and every field, with
the numbers thereof, according to the
measurement. A considerable portion
of the present Government Estate of
this District consists of black soil, many parts being
upholed

exposed to the inundations of the Godavery and therefore requiring some not easily obliterated means of rendering lasting the results of the survey. In order to show the fields of the present survey, posts of strong Toonmacarrah wood have been placed for all the fields of these two Villages at the rate of one post per field, with the numbers of it cut thereon but these posts (were it possible even to procure them for all the fields) would only last for a limitted period. The raising Embankments on four sides of each field, (which has also been ordered to be done by the Occupiers thereof as both a means of marking out and retaining water in the fields) will not be perpetual, as the very heavy freshes which occasionally come down in this District would certainly

certainly wash away the Embankments and leave no vestige by which to ascertain the marks of the fields. If a stone be placed for every field with its number cut thereon, as is the usage I believe in some Districts to the Southward wherein the survey has taken place it would be perpetual but the expense of procuring such stones in this District would be very great from the distance they have to be procured. To meet these difficulties therefore it is proposed to keep in my Office a plan of each Village and to mark each field by an Earth Embankment and to fix stones or marks to about twenty fields or whenever any definite point may appear to require such a distinction.

Having thus referred in
25. detail to the different Accounts which

which have been prepared in Gentoo the native language of the District. I beg leave to submit an *Abridgement of them in English and to recommend that the Assessments obtained from them for the Villages of Vaudra and Paulacodaroo, be approved the former being Rupees 1782 – 15 – " or Rupees 65 – 4 – 7 above the former Assessment, and Rupees 51 – 7 – 10 below the average Collections of Eighteen years and the latter Rupees 912 – " – 11 below the former Assessment and Rupees 418 – 7 – 8 above the average Collections of Eighteen years but which decrease in the former Collections is sufficiently accounted for by the ruinous height of the Assessment.

*Marked D

The Assessment proposed for

for the Vaudrah Village was, from the first approved of by its Inhabitants and in the case of Palacodaroo, the Inhabitants, twice in my presence first at Cocanada, and afterwards when I went into the Talork to examine the proceedings declared their full acquiescence. Subsequently however, after I had quitted that part of the Country four persons Viz.t Cornatharauze Venkataramraauze who had been formerly Moonsiff, Ettapilly Ramrauze, Ettapilly Lutchmepattyranze and Indoocoory Tripatyraauze, made a complaint to me that there were some errors in the measurement of the Manium lands. Immediately on this representation I instituted a re-examination when I found that the first measurement was perfectly correct, and Indoocoory Tripatyranze

Tepatyranze admitted that the Petition had been presented with the view of stopping the survey generally, and if the actual result of the survey is considered, that out of the Original Maneium lands Potties 8—x—, only Pottias 7—12—8¼ have been found by it now in possession of the Maneium dars there certainly is no fair ground for doubting its correctness.—

27 As I have stated above besides the two Villages now reported on the survey of sixteen others, including the whole Pipharah Mootah, has been completed, and directly the principles I have gone on have received the consideration of the Board, I shall be prepared first to submit my report on the survey of the whole Pipharah Mootah and afterwards the Wandy

Wandy Talook will be completed, to accomplish which, as well as the survey of the whole Government Estates in obedience to the Orders of the Board of 4th November 1839. I beg leave to submit a Statement of the estimated expense Amounting to Rupees 38157—x—x

Vide concluding Para of the Board's Proceedings of 4th November 1839. Marked E.

By a comparison with the expense of other surveys the Board will be able to correct me where I am wrong in this Estimate, the only point which appears to require special remark from me, is the salary of the Superintendent Mooperandah Streenevasiah, which I have proposed at Rupees one hundred

Pr Monsom

hundred and fifty, which I do not think higher than is required by the importance of the duty. The Superintendent was formerly employed in the Southern Division of Arcot and came to this District in the year 1836 under Mr. Grant and has conducted the duties of the Survey under me up to the present moment the result of which I think indicates his acquirements as fully equal to the accomplishment of the task.—

Vide Boards Proceedings Para 2 11th February 1841.

Instructions to Pymayeshdars or Surveyors

1 All your measurements of every description of Lands wet. Dry. Bagayet and Garden of the Villages allotted to you are to be made with a chain of 33 feet— All your accounts for the Seroyaty Enams &c. lands are to be kept in acres, boontahs and Vecsums One square Chain is one boontah and 40 such boontahs are one acre you are to enter each field with its number of acres, boontahs and Vecsums, sixteen of the latter are equal to one boontah you are to repair the chain when you find its links are broken and compare it with the standard measure entrusted to you.—

2 When you arrive in a Village you will previously to beginning the measurement take a Muchilka from the Moonsiff Curnum and Pettendar thereof stating that their accounts of

Fort St. George 1st November 1841

of the Jeroyaty Cranns Vcn. lands, the number of Moturpha Ryats with the extent of profession severally exercised by them, and all the other sources of Revenue are true, and that if they are found to be false in any point they will forfeit their Offices and be liable to punishment You are further to receive from them three detailed statements duly attested by them: one shewing the Bhoolund or extent of land Jeroyaty Cranns &c. with their fieldwar and names of the occupants or Ryots one shewing the asamewar of the Moturpha with the extent of the profession exercised by each Individual and one shewing the detail of all the other sources of Revenue payable to the Circar.—

3 The Moonsiff, Curnums, Pettendars Naikwaly Vasak and Watty of the Village must attend you during the measurement; and you must always make the Ryots or Cranndars to be present

Fort St. George 1st November 1841

present at the measurement of their own fields.—

4 In measuring a Village you will begin at one side and proceed regularly on marking the field first measured No. 1 the next No. 2 &c.—

5 In numbering the fields as above you are also to specify their names, together with their descriptions such as Lunkah, Ravada, Red soil Masakah &c. The numbers will serve to distinguish fields when there are several of the same name in one Village.—

6 When you begin to measure at one side the fields of the Jeroyaty of dry land, if you meet some intermediate fields of wet land whether Jeroyaty Bagayet Garden lands Cranns Of Boombalah or Cuttoolady for Ashumenahalands, You are to mark the succeeding numbers for them.—

7 In the account of the measurement of every field whether dry

dry, wet, Bagayet, Garden, Dumbalah or Cuttoobady Cniams or Akunmeenahs land, you will always specify the names and number of the fields by which it is bounded.—

8 When you measure the field No. 2 you will first mention the side on which it lies to No. 1 and then the other three sides and so on you will continue for every successive field.—

9 It has been usual in this District to enter in the accounts of the lands in three Denominations namely Dry, Wet and Garden lands. the Dry lands are partly Cultivated with Poonasah 2nd crop or Paddy and Pyrah and partly (under the appellation of Bagayet lands bearing a large Crop with the Plantain, Tabacco, Turmerick, Sugar Cane, Chilly &c. Gardens The wet lands are cultivated with transplanted Paddy crops. The Garden lands are planted with the Gardens consisting of Cocoanut Betel nut, Mango, Palmira Trees &c. But in order to enter them in the present

present survey accounts in an uniform manner you will attend to the following instructions

Descriptions of the soil to be entered under the Dry Lands.—

1st Land sown at first either with Paddy or Jonna and then with the Pyra crop of Anoomoolos, Lamp Oil seeds, salagaloo grain, or Gingely Oil seeds.—

2d Land sown at first either with Paddy mixed with Jonna, Cundoolos, Grain and Cotton.—

3d Do— Do— at first with Poonasah consisting of Cornah, Kutchnies, Gunjay, Gingely Oil seeds, &c and then with the Pyra Grain.—

4th Do— Do— with Poonasah mixed with Cundoolos Grain and Cotton.—

5th Inferior land sown either with Poonasah Paddy or Pyra Grain.—

In addition to the entry above stated you are to write, whether each field measured yields one or two Crops as above, and if you find at the time of measurement, that any fields which may be productive of two Crops yielded only one, either for the past or Current fusly,

inconsequence

as Pullums or wet Bagayets as being productive by means of irrigation either from springs, or wells &c. by which the water can be drawn by Pr. cattahs yielding sugar Cane. Betel Chillies &c.

As these two sorts of soil also yield Pyra Crop, you will make proper enquiry into it and enter for each field whether it produces two crops or one As this sail of Bagayet bears a large Cist, you will take care to determine the fields of it as small as possible If you find, at the time of measurement, that any fields of the said sail, which may be productive of the said valuable articles, have been sown with some other inferior Crop either for the past or Current fusly, inconsequence of the adversity of the season, or for want of means of irrigation, you will then make proper enquiry and enter what articles they may actually produce.

The following descriptions of soil are to be entered under the

inconsequence of the adversity of the season, or for want of repairs, you will then enquire into the real description and products of such lands, and enter whether they produce one or two Crops

The Lunkah lands which are situated both in the vicinity and Centre of the Godavery, and which are usually entered in the accounts as Dry lands and which are cultivated with Tobacco, Brinjals, Plantains, Country Yam, Turmerick, sugar Cane, Betels, Chilly &c. should be entered in the present Survey accounts under the Bagayet lands The descriptions comprised under this soil are as follows.—

1st Godavery Lunkahs &c. which are to be entered as Mara Kad or Dry Bagayets as being productive without the means of irrigation) yielding Tobacco Plantains, Brinjals &c. and Country yam &c. Bulbous Vegetables You are also to enter whether these lands yield one or two products respectively

2d Do. — Do. (which are to be entered as

the wet lands. —

1st Land to be sown at first with Poonasah namely chamah &ca producing in a short period and then with the transplanted white Paddy and afterwards with the Pyra. —

2 Land to be sown at first with the transplanted Paddy and then with the Dalvah Paddy. —

3rd Do. to be sown at first with the Poonasah and then with the transplanted white Paddy —

4th Do. to be sown at first with the transplanted white Paddy and then with the Pyra namely Gingely Oil seeds &ca —

5th Do. to be sown only with the transplanted white Paddy. —

You will be particular in entering for each field whether it produces one or two Crops as above. If you find that any of the fields of this sort are sown with the crop applicable for dry lands, in consequence of the adversity of the season or for want of repairs

repairs you will upon due enquiry of it enter the same under the wet &s lands. —

The lands occupied by Cocoanut Betelnut; mango. Palmira &ca productive trees are to be measured and entered in fieldwar under the Sota Bhoomooloo or Garden lands specifying the means of irrigation required for the Betelnut gardens &ca Thus, you should be very careful in entering in the accounts under several items alluded to, the fields of dry, wet and Garden lands, as well as Bagayet lands which are now to be separated from the dry lands in the course of the present measurement you are likewise to take care to enter the said 4 sorts of lands as under in the Goshwara or abstract account according to the forms furnished. —

10 In preparing the &s Pymayesh Chittah accounts, you will enter the names of the present Ryats

of

of the fields of Jeroyaty lands, — of
Dry, wet, Bagayet &c descriptions together
with their names and numbers, also as
whether each field is under Cultivation
or left for pasture; and whether it is
not held by a Ryot but become waste
and in such case for what period
it was in that state. If the field
is Enam, you will enter the name of
the owner, and whether it is held
under Dumbalah or Cuttoohady, and specify
the other particulars regarding its as
Cultivation or waste as the Jeroyaty
land where fields (in the course as
of your measurement) whether as
Cultivated, Uncultivated or waste
under Jeroyaty Enams or ashurm as
Menaha have no names, you will,
in concert with the Villagers, give
them some names. —

11 You are not to allow
a field to be larger than may be
Cultivated by one plough. If a
field not being larger than may
be Cultivated by one plough is plough-
ed in part only, and the rest waste, you will

will not divide it but measure it as one
field. —

12 If a field is too large to
be Cultivated by one plough, you will
divide it into two or three fields as may
be necessary, and put separate numbers —

13 As the extent of land
Cultivable by one plough depends upon
the nature of the soil, you are will be
guided by the Custom of the Village
and the opinion of the Village Moonsiff
Curnum and Pttendar and Ryots in
regulating the size of fields. —

14 As the subdivision of
a large Cultivated field is ordered
to be made solely upon the supposition
that if thrown up by the present occupant
it may be left waste, from there being
few Ryots in the Village who have
the means of Cultivating it, yet if
from the state of agriculture in the
Village, there is no danger of its being
left uncultivated, it will not be ne-
cessary to divide it even though
it

it, should be too large for one ex
plough.—

15 If a field under ex
Cultivation is too small for a
plough, you will measure and
number it without altering it.—

16 If a quarter only of
a field is Cultivated, enter the
whole field as waste, If half only
is Cultivated, enter half as Cultivated
and half as waste and if three ex
quarters are Cultivated, and one
quarter is waste, enter the whole
as Cultivated.—

17 In measuring un=
cultivated lands if you meet a
field which is too large for one
plough even with old marks or
Bunds, you will divide it accord=
ing to the nature of the soil into
portions, each Cultivable by one ex
plough—You will also make due
enquiry and enter how long ago such
lands were cultivated; whether they
are

are now with some small banks or
occupied by grass, whether they are
now occupied by some Ryots, (whose
names are also to be specified) or
not and whether they are now fit
or unfit for Cultivation.—

18 You will Class un cultiv=
vated lands of 1-2-3-4- and 5 years
standing under fallow of from ex
5 to 10, 10 to 15, 15 to 20 years under
waste, and land which has either
never been Cultivated or not been
Cultivated within 20 years, under
Anaudy or a long time waste, you
will take care to divide such lands
into fields Cultivable by one plough
only, to enable the Ryots to hold ex
them in future.—

19 When a field contains
a few Tamarind, Mango or other
productive Trees, you will make no
deviation for the land under them
sake, because the Ryot derives

profit from them but enter the as
number and species of those Trees
specifying how many of them are
now producing and how many young
Ones — where there are unproductive
Trees forming a shade, you will
measure the land occupied by
it, and enter the same, together with
the other portion of the field in
detail. —

20 In measuring into
fields as above, the lands Cultivated,
uncultivated and Enams, if you
meet some fields containing Pits,
wells, Channels, stones, barren land
which is impracticable of Cultivation
you will deduct such part from
the total extent of the field, as
entering the detail of the same. —

21 When you measure
the Topes of Palmira Trees comprised
in the Sevoyaty waste or Enam lands
you will insert them as follows

the

the numbers, names and extent of the
fields, together with the number of
Trees classed as male, female, young
old, productive or unproductive you
will also enter separately the divisi-
ons or parts of the Tope occupied by
different Ryots. You will follow
the same course in point of the
Gardens consisting of Cocoanut, Betel-
nut, Tamarind Trees &c. and specify
the quantity of land between the
Rows of Trees, of land to be cultivated
where the Trees are thinly scattered,
and of Cultivated land where there are
no Trees — noting at the same time
whether it is dry or wet. —

22 In measuring the Viddoo
Chervoos or Lakes, you will measure
the bank and the bed thereof separately
and enter the former under the heads
of ashunomenah or Lands and the
latter, which will answer for
Cultivation as the water thereon shall

subside,

subsidey as Jeroyaty under the Villages which are allotted to you / to which it may be proportionately attached according to the existing bounds.

23 Should it be brought to your notice that the Moonsiff, Curnum and Pettendar of a Village clandestinely hold some lands under their enjoyment or have given others as Onams or appropriated in some manner without the payment of the Tax, you will immediately report the same in writing to the Superintendent of the Zillah to enable him to take the necessary measures.

24 Where Onam lands of persons deceased without heirs fraudulently occupied by the Villagers or others who have no right to them you will institute strict enquiry on the subject and report it to the superior

as directed in the preceding para.

25 Where Onam lands under decayed Pagodas and Mosques are fraudulently occupied by persons not entitled to them, you will enquire into the matter thereof and report the same as above.

26 In measuring the fields of Jeroyaty lands, both Dry, wet, and Bagayet, you will enter, if they have means of irrigation, such as springs, lakes, wells &c. whether they yield one, two or three products, and what sorts they are.

27. Where wet Lands, from the adversity of the season in a particular year were Cultivated with dry grain, you will enter them under the head of wet land only, and where dry lands from the heaviness of the Monsoon were Cultivated with wet Crop, you will enter them under the head of Dry land only. You will

will follow the same course in point of the Bagayet lands notwithstanding their fluctuating Cultivation, according to the circumstances of the season.

28. With regard to the Ashum Menaha or Parrimpoke lands that cannot be Cultivated, you will respectively specify (according to the numbers.) the extent of the spots of Pagodas, Mosques, Chutrams, Salt marshes, sites of Villages, banks Tanks, wells, Ponds, Watercourses, burying places, &c.

29. In measuring the Gramapacuntum or the extent of the Village which also forms the Parrumpoke you will specify the extent of Forts of Cottahs, of open Villages; of the Court yards, of houses, and of streets &c. with the number and kind of Trees in such yards &c. you will put for the Grammapacuntum the last

last number (after the measurement of the fields of the Village.) specifying therein the subordinate numbers for the buildings &c. above enumerated, as "No. 1, 2 or 3 in No. such" but if any of those buildings are situated not upon one but several spots, you will then put separate numbers. Where the vacant grounds or dwelling grounds of some persons deceased without heirs may have been possessed by Certain persons who have no right to them, you will report such circumstances to the Superintendent of survey and obey his instructions thereon.

30. The Curnum should accompany you in the measurement of the fields, which daily takes place, under the above instructions, and keep a Counterpart of your Chittah &c. Accounts. you will examine those accounts with the

Curnum

Curnum on the close of the day and transmit to the Superintendent an Abstract of the same -

31. As the Cist of the fields will be assessed according to their classes and it will lead to inconvenience if any of them be partly left uncultivated, you will particularly desire the Ryots to cultivate their fields - in full -

32 You will keep lists for the Male and female Cattles possessed by the Ryots of the Jeroyaty lands - also for the Buffaloes, Cows, sheep Goats &c. of the Gollah people and for the Looms, shops &c. of the Weavers Banians and others, paying Motupha - You will obtain in your daily - rough accounts of the Measurement, the signatures of the Curnum, Moonsiff, and Pattendar, as well as the Ryot of the field, who were

were present at the time of your - Measurement.

33. It is brought to Notice that the Poontahs or boundaries existing between two Villages were not entered in the Bhoobunds &c. accounts in consequence of their being joint limits - But you will measure such limits - and enter them proportionately under the several Villages to which they are attached, taking care to set marks for the distinction of those limits -

34. Where disputes may arise about land marks of any Villages you are to measure, you will - make proper enquiry and report to the Superintendent and await for his instructions -

35 You are to keep with you two persons from among the - Village servants to measure the lands with the chain, and pay them in

presence

presence of the Villagers one anna each per day, from the amount advanced to you, taking their receipts for the same.

36 If the Ajmaysdar or Examiner finds any mistakes in the Accounts produced by you, you will Correct them with your own hand writing.

37. You will be allowed Rupees ... per Month for defraying the Charges and sunderwarees - you are to prepare at night the fairs of the rough accounts which you draw in the day.

38. Where the fields are Crooked as termed, Lokoonloo or Valekoonloo, you will pay great attention in measuring them into divisions, and take a total measure of them under the principles above determined.

39. As you receive a fixed salary, you will not neglect to measure acres

..... acres per day or .... per Month, because the lands in this District, whether dry, wet or Bagayet, are nearly of the same description. If your measurements prove less below the number of acres above limited, your pay will proportionately be reduced.

40. If there are two, three or four Hamlets under one Village, you will measure them separately with reference to the boundaries, and put separate numbers, and then make an abstract of their several items to be entered under the one Village.

41 In preparing your chittah accounts of the survey of a Village you will enter the Dry, Wet, Bagayet &c. lands comprised under the heads of Jeroyaty, Enam and ashum Inenaba according to the order in which they are measured, and numbered, and then insert the abstract of each item according to the forms furnished - You will transmit these accounts to the Superintendent of the

the survey, together with the lists of the Cattle &c. of the Jeroyaty Ryots, and of the professional implements of the Melum the Ryots, also a plan of the fields of the Village so measured.

42. In order to distinguish constantly the marks of the fields under several heads above enumerated, you will cause wooden posts to be set with the number of each field, and pay in presence of the Villagers the hire to the Coolies who set the posts, and obtain their receipts for the same.

43. If it be brought to notice that you have acted fraudulently or irregularly in measuring the lands you will be dismissed and punished.

44. You will not receive any thing in money or in any articles under the name of Batta, during the time of the measurement of lands of the several Villages, but pay reasonable prices for the Articles you may receive in the Bazar, and obtain receipts for the same.

Zillah Rajahmundry,
Collectors' Office,
Cocanada, 24th July 1841.

B

Instructions to Pymayeshdars or Examiners of the Survey.

1. As you are appointed to the superintendence of a party of Surveyors, you will regulate their Surveys as follows.

2. You will take the Rham Chettah accounts of the Pymayesh from the Surveyors and make by them all your comparisons of measurement of every field; if you have a doubt in the measurement of any field you will examine their dimensions. In your examinations of measurement you will attend particularly to the fields of the Village Monigaffurnum, Pettanadars and substantial Ryots.

3. You will examine by measurement daily as follows.

Dry
Wet
Bagayet
Garden.

You will prepare your Pymayesh Accounts in the following forms.

No.	Names of the Ryots	Names of the Fields	No. & Divisions of the Fields	Measurement of the Surveyors.	Measurement of the Pymayeshdars or Examinors.									Remarks.
					1st Chain from East to West.	1st Chain from West to East.	Square.	Contents.	2nd Chain from East to West.	2nd Chain from West to East.	Square.	Contents.		

4- In your examination of measurement you will keep with you the Village Moonshiff Curnum and Pettanadary, as well as occupant or owner of the field.-

5- You will send your Ajmayesh Kham Chettah accounts (duly attested by the Village Moonshiff, Curnum, Pettanadar & ca) to the Superintendent of Survey along with your letter.-

6- In examining the measurement if the excess of the land on trial is at above 10 Pc Cent in dry 7½ Pc Cent in wet, and 5 Pc Cent in Bagayet, you will add the difference to the field. If the deficiency is more than the above rates, you will deduct

7- If in any Village, you find the measurement of the whole or the greater part of the fields incorrect, and that a new survey is required, you will state the circumstance to the Superintendent of the Survey and obtain leave before you begin

8- If any Ryot complains that the measurement of his field is not fair, you will measure that whole or part of it again, enter the difference in your Chittah, with a remark in detail and report the same to the Superintendent.-

9- You are to make occasional repairs of the Chain, with which you measure and take care that it may be correct. you will take two persons among the Village Servants to bear the Chain the measurement, and pay them, before the Villagers, the hire at one Anna each out of the money advanced to you. you will take receipts for the same, and transmit them every month to the Superintendent along with your letter.-

10- You are to try the measurement of the Villages surveyed by the Pymayshdary, within the same Month you are to remain near the Surveyors, because unless you are with them, you cannot compare with them the false measurement which you may discover.-

11- You are not only to try the measurement

measurement of the Surveyors, but discover,
if they enter the dry lands under wet, and
vice versa and dry Bagayet under wet
vice versa and the lands of two products
under one, you will report such differ-
-ences to the Superintendent and obey his
instructions thereon-

12- Where the Jeroyety Lands of
Circar or Enams of persons deceased with-
-out heirs, and of the Pagodas and Mosques
decayed, may have been encroached by the
Village Moonsiff, Cranum, Pettanedar or
others, and where such clandestine possessi-
-ons may not be discovered by the Pujona-
-yeshdars either from their ignorance or
clandestine agreement with the Villagers
you will discover such frauds and
immediately report the same to the Su-
-perintendent and await for his instruc-
-tions-

13- In addition to your Monthly
Salary you will receive an allowance
of Rs. Pr. Month for
Saderwared-

14- If it is brought to notice that

you have committed any irregularities in
any Villages in the Course of your trying the
Measurement or not revealed the irregularity of
the Surveyors either from ignorance or fraud
you will be dismissed and punished-

15- You are not to receive any-
thing from the inhabitants Vca. of the
Villages but are to pay reasonable prices,
and obtain receipts for all the Articles
you may take in the Bazar-

Instructions

To The Tarumdars or Assessors

1- When you arrive in the
Village, whereof the lands should be
classed by you, you will send for
the Carnum, Moonshiff and
Pettanadar and obtain from
them a Mutchilkah stating
that

that they will render a true account of
the Jeroyetty and Enam lands com-
=prising the dry, wet, Bagayet —
and Garden, together with their
classes and number of products,
specifying the quantity of produce
per each Acre, as well as the means
of irrigation, such as Tanks, water
Courses, Wells &c., and of the other
Sources of Revenue payable to the
Circar and that if it be proved upon
examination, by means of the Servants
of the Circar, of their having produced
false accounts in point of the classes
or products of Lands and irriga tion,
in order to reduce the Revenue of the
Circar, they shall be liable to pu =
=nishment, beside being held answerable
for payment of such cist as may be determined
by the Circar. —

2. After you obtain Mootchilkah
from the Villagers, as above, you will
receive

receive a Statement from them, shewing
the Jeroyty and Enam Lands comprising
the dry & wet and Bagayet, together with
their number of Classes and products, specify=
=ing the quantity of produce for each Acre,
you will get this account duly signed by =
them. — If the Villagers hold an account of
Cast Fusly, shewing the produce of the Lands
in field war, you will likewise receive it —
from them. —

3. When you receive from the
Villagers the Muchilka and Statement
above alluded to, you will repair and in=
=spect all the fields of the Jeroyty and —
Enam Lands, (measured by the Surveyor)
accompanied by the Curnum, Moonshiff and
Pettanadar of the Village, as well as the occu=
=pants of those fields, and determine the Classes —
thereof upon due consideration of their descrip=
=tions, positions, as dry, wet, and Bagayet, means
of irrigation, number of products and quantity of pro=
=duce for each Acre, and prepare the Tarum Chittah
according to the forms furnished to you — you will —
take care to insert under each field, whether it
yields

that they will render a true account of
the Jeroyetty and Enam Lands com=
=prising the dry, wet, Bagayet —
and Garden, together with their
classes and number of products,
specifying the quantity of produce
per each Acre, as well as the means
of irrigation, such as Tanks, water
Courses, Wells &c., and of the other
Sources of Revenue payable to the
Circar and that if it be proved upon
examination, by means of the Servants
of the Circar, of their having produced
false accounts in point of the classes
or products of Lands and irrigation,
in order to reduce the Revenue of the
Circar, they shall be liable to pun=
=ishment, beside being held answerable
for payment of such Cists as may be determined
by the Circar.—

2— After you obtain Mootchilkah
from the Villagers, as above, you will
receive

receive a Statement from them, shewing
the Jeroyty and Enam Lands comprising
the dry & wet and Bagayet, together with
their number of Classes and products, specify=
=ing the quantity of produce for each Acre,
you will get this account duly signed by
them; — If the Villagers hold an account of
Cast Fusly, shewing the produce of the Lands
in field wise, you will likewise receive it
from them.—

3— When you receive from the
Villagers the Muchilka and Statement
above alluded to, you will repair and in=
=spect all the fields of the Jeroyty and
Enam Lands, (measured by the Surveyor)
accompanied by the Curnum, Moonshiff and
Pettanadar of the Village, as well as the occu=
=pants of those fields, and determine the Classes
thereof, upon due consideration of their descrip=
=tions, positions, as dry, wet, and Bagayet, means
of irrigation, number of products and quantity of pro=
=duce for each Acre, and prepare the Jarum Chittah,
according to the form furnished to you — you will
take care to insert under each field, whether it
yields

Fort St. George 1st November 1841.

yields one or two products — you will prepa
the Tarum Awerjah with reference to the clas
=sification of the fields and send these two acco
duly signed by yourself and the Villagers to the Sup
=tendant of the Survey together with the Muchilka
and accounts obtained from the Villagers
4. As you will keep with you the occupa
of the fields in classing them, you will in case
any one of them may dispute with the classifie
of his field ascertain (along with the Villagers) and
his Statement is grounded, and satisfy him you
the just measures you have adopted, and report
same to the Superintendant of the Survey. If any
does not attend during the classification of his fie
as above required, you will declare, that any comple
which he may bring afterwards will not be taken into
Consideration.
5 If any Ryots state that he holds the like a
=count of the produce of his fields for past years, you will pro
from them. In cases, where the Pymayshdar or Ryo
=yshdar or both of them may intentionally or accidenta
Commit irregularities in measuring and examining

Yours

J. A. B.

Fort St. George 1st November 1841.

very you will take care to discover it and re=
=port the same immediately to the Superin=
=tendent of the Survey.—

7. If it be brought to notice that you have committed irregularity in the classification of the Lands, contrary to the instructions above alluded to, you will be dismissed from your situation.—

8.— You are hereby enjoined not to receive any thing as batta or other=
=wise, during the time you are engaged in classifying the Lands of a Village, but take care to pay the reasonable prices for what you purchase in the Market, and obtain receipts for the same.—

Jellah Rajahmundry

Deduct Increase					6697	5 8		
Net Decrease							52040	1 6

3 The decrease in the Home Consumption of Salt has arisen from two Causes, first the general depressed state of the District from three consecutive bad seasons, attended by a great deal of Sickness, particularly the Small pox, and Second, the excessive production of Spontaneous Salt, inconsequence of the late setting in of the rains in fusly 1250, and again their entire early cessation in September. The effect was aggravated by the gross neglect of the Salt Servants at the Pittapoor Pans, which was noticed in a report Dated 7th December 1840.

4 The Increase in the Inland Consumption has arisen from the Brinjaries having resorted to this District, in greater numbers than in the preceding fusly, when there was a deficiency of Salt, adapted for their trade, as explained in my report of 30th September 1840. Para. 4.

5 The Amount Sale of Smuggled

Smuggled Salt produced in the several
Swamps of the District in fusly 1249, togeth
with that seized in the fusly under revie
making an aggregate of Rupees 11864-11-10
as shewn in the above abstract, was
brought to account in the fusly under
review.

6 The sale of Salt for exporta
=tation to Pulo-Penang was the same as
in the preceding fusly, Eight Garees
35 Rupees per Garee Rupees 280, with re
=ference to the instructions of the Board
of Revenue under date the 17th April 1828.

7 The Demand of the French
Settlement was increased in fusly 1249
inconsequence of the Salt in Store having
been destroyed by the Storm and inunda
=tion of the Sea in November of that year.

15 The following Abstract shews the Sayer Charges for the fusly under review Compared with fusly 1249.

Items

The decrease in the salaries of the Huzzoor and District servants and Saudewared, has arisen, principally, from the abolition of the Cotapilly Chowkey, the Collections of which were hardly equal to the charges and the decrease in the Extra charges is owing to the less expenditure of coarse papers for Rowanahs, and the Huts of Sayer Peons &c. not having required such extensive repairs as in the preceding Fusly. The increase in the Drawback needs no remark.

Sea Customs 16. The Collection of this branch of Revenue shews a Decrease of Rupees 4,760-3-5.

Items 1	Fusly 1249 2			Fusly 1250 3			Decrease 4

15068

The decrease in the Customs of the Hoogly and Diviket districts arises, principally, from the abolition of the Custom Charges, the Collections of which were handed over to the Chaukeydary Department, and the decrease in the Export charged and is owing to the less expenditure of Europe Stores for Steamers, and the Out Port Establishment not having been employed such extensive repairs as in the preceding Fasly. The increase in the Drawbacks proceeds no remarks.

The Collection of this Branch of Revenue exhibits a Decrease of Rupees 4,760 - 3 - 5.

Fort St George 1st November 18

In consequence of the famine in Fasly
and storm and inundation in fasly 1249
renters of the latter fasly sustained gre
loss, and the compation for the coll
the Fasly under review was consider
decreased. As however the Divisions
under Amanie are situated near the
on the western side of the District
which the storm did not extend w
great force as to other parts of th
trict, there was a slight increase in
portion of this branch of Revenue.
the net decrease in the Demand is
579-15-. out of the Demand of Rs
Rs 9.386-3-. above shown, Rupees Rs 8,8
were realized within the Fasly leaving B
5303-7-1 of which Rupees 1074-- 5 have
been collected up to 30th September 1841. The
der Rupees Rs 228-15-8 is principally due
certain Renters, who have suffered some
this Fasly, and therefore require a little
ation in its realization though it is expected
whole will be collected.

The following Abstract shews the collection of stamp revenue, for the Fusly under review compared with Fusly 1249 -

Fuslies	Collection			Charges			Net Revenue		
1	2			3			4		
	Rs	a	p	Rs	a	p	Rs	a	p
1249	20,479	8	-	1144	6	7	19,335	1	5
1250	23,010	12	-	1,209	6	5	21,801	5	7
Increase	2,531	4	-	64	15	10	2,466	4	2

The

15077 Fort St George 1st November 1841.

The increase in the sales of Stamps has arisen from the increased demand in the Court during the Fusly under review.

	Amount of decrease CRs. a. p.
In the Sales of Sayer Rowanahs	63 - 5 - 4
Do Sea Custom Do	204 - 3 - -
Do Stamps for the deeds of the Servants	" - 12 - -
	268 - 4 - -

In Sayer and Sea Custom Rowanahs there was a decrease - The increased charges were consequent on the increased Sales -

Moturpha - - 25 -

The distressing nature of the three last seasons has had a very material effect on Moturpha branch of Revenue, and though there is no decrease in the Demand, it has not rallied since the calamitous storm of Fusly 1249 of the Demand of Rupees 40935 - - 1 Rupees 34699 - 13 - 8 were collected within the Fusly, leaving a balance of Rupees 6235 - 2 - 5 of which Rupees 2325 - 7 - 4 have since been collected up to 30th September, and measures have been adopted for realizing the remainder as far as practicable -

	CRs.	a.	p.
Fusly 1249 - - -	40906 -	15 -	3

15113 Fort St. George 1st November 1841

Order thereon

Ordered to lie on the table

22. 23

Read again report from the Principal Collector of Cuddapah dated 24th September and entered in Consultations 4th Octr.

Ultimo.

Ordered that the following letter be sent in reply.

To

The Principal Collector of Cuddapah

24

To the Princ. Collr. of Cuddapah

Sir,

In the Report on the Extra Sources of Revenue for July 1249 submitted by your Predecessor under date the 15th September 1840 the charge in the Layer Department are stated for that year at Rupees

In Cons. 28th Septr. 1841

15114 Fort St. George 1st November 1841

59570-13-6 and in the Printed
Statement which accompany your
24th Septr. in Consy. Report for July 1230. the same
Octr. 1841 charges are entered at Rupees
16,527-13-7 being a difference
of Rupees 43042-15-11. The
Board are aware from your
Cons. 8th April 1841 letter of the 23rd March last
that this difference consists chiefly
of the amount refunded to the
Jaghiredar of Bungunpully, but
as it is desirable to ascertain
the exact sums forming this difference
the

15115 Fort St. George 1st November 1841

the Board request you will furnish the
particulars thereof

Sicca

4

The commencement of the Dry cultivation in May was very unfavorable in as much as the small quantity of rain that fell was only available for tilling the Grounds The Month of June was no better the Grain sown, with difficulty, was much injured by Insects and the greater part of it coming to nothing in consequence of the entire failure of the rains in the subsequent Months of July and August. September was more favorable the land tilled and sown in that Month thrived well from the supply of rain in October and November, beyond which Month nothing further was attempted with the Dry Cultivation Cawnies
The Total decrease being 10,165-13 2/16 as stated at Rupees 26,123-4-6 below the preceding Fasly. of which Rupees 11,859-14-7 was in the Principal Division and 14,263-1-11 in the four Talooks of the Sub Division great

Great as this reduction in the dry cultivation is, comparing it with the previous year, it bears an increase of 73179-9-11 over Fasly 12480 Rx as p

5

The season beginning and ending so badly for the dry Crops the Kar, Sumbalo and Nowrabo Wet cultivation of course suffered in a double degree From June to August the Tanks remained nearly Dry-Wells, Channels and other sources of irrigation were put in force to bring forward what Kar Crop could be raised and all that could be effected for the Sumbalo in September, was done, the return nevertheless being much below the previous Year-

6.

All the Talooks did not suffer alike, there were exceptions in Sutwaid Poloor and Wundiwash. The Tanks there got filled by the November rain, and the large ones of Caveripauk and Chedapary from the Palar River. Had the Season continued on as from appearance

appearance it promised, the Nunjah cultivation generally would have succeeded but in December not even a shower fell throwing out of cultivation land to the extent of 1743.6.cs as assessed at Rupees 18578-9-10 Sutmaid Poloor and Wundiwash were the favored Talooks and in them there is an excess in the Wet cultivation over even last Fusly which was the best the District had experienced for a number of years of Rupees 22,457-9-10 but taking all the Talooks together, the Wet cultivation falls short of Fusly 1249. in Rs. 94,991-15-9. of this deficiency Rs. 7,982 is in Tank irrigation cs alone and if a comparison is made with Fusly 1248 the present decrease will exhibit an increase Rs. 11,574-11-9 as cs

There is a small increase in the Totacal cultivation of the year cs 65-5 12/16 assessed at Rupees 1,605-11-11 as

Statement

7. Statement No 5 which accompanies has reference to Baga=yaustee or 2nd Crop raised on one Crop land, and although the Nunjah and Totacal Crops raised on Poonjah land by means of Tanks and channels was greater in the preceding year, yet in consequence of some Ryots leaving their Puttut land waste to raise Poonjah Poovasee, they were required to make good the Seerwah proportionate to the extent neglected, and the amount brought thereto account is Rupees 2,564-15-11 as Still the decrease in this branch of cultivation is Rupees 12,559-12-11 as below that of the preceding year cs Although there is cs an Increase of Rupees 19,231-1-10 as in

Nunjah Poonjah	15,103-13-10	
Totacal	20-15-"	
	15,124-12-10	
Bagayaustee	2,564-15-11	
	12,559-12-11	

Fort St. George 1st November 1814.

in the Poonjah, Nunjah, Totacal, Boga=
=zanatee and Cheekerpooldee in the
Talooks of Sutwaid, Palcor and Wun=
=diwash, yet in the rest of the District
there is a large decreave amounting
in the Net to Rupees 1,32,069-1-3. The return
in Poonjah averaged from 8/16 to 10/11 the
same in the Sumbah and Nowrah
Crops - The Kar was a little better
from 10 to 12 and although the esti=
=mated price of Grain was Rupees
85-6-5 per Garce and the Market
price Rs 88-14-2, the growers never
obtained this for their produce, as
they were obliged to dispose of it before
it was off the ground to enable them
to meet the Sircar demand, and the
failure in Crops to them was certainly
not made up in price.

9. The revenue under the
large Cavery Jaut Jauk amounted
to Rupees 42672-7-5. That of the
preceding

Fort St. George 1st November 1814.

preceding year to 42,074-8-8 shewing
an increase of Rupees 597-14-9. The
revenues of the three years previous
to the repair of the sluices of this
Jauk were as follows:-

Fasly 1244 Rupees 47,360-
" — 1245 Rupees 43,041-
" — 1246 Rupees 43,440.

The cause of the revenues of the year
falling short of the above was in
consequence of the drought during
the period of the Kar Crop - For
the Sumbah and Nowrah the Jauk
received a sufficient supply, and as
of this produce there is a small
increase over the preceding Fasly.

10 The following is
the Statement of the Increase
and Decrease of the Crops
cultivation

Abstract of

Chic Nurpooldy 11. The total remissions allowed under this head was Rupees 23,152-14-7 being 5,719-10-5 in excess of the preceding year. The whole extent of land ploughed in the anticipation of future rains was Rupees 23,507-8-4 of which Rs. 354-9-9 was taken to account for neglecting the cultivation, while means of doing so was available.

Stulla Cummy 12. Of this description of land Rupees 25,072-3-2 remained uncultivated of which 1,260-10-4 was taken to account as it did not come within the usual rule for allowing remission under this head. The remaining sum of Rupees 23,811-8-10 which was struck off is 4,710-15-11 above the previous year.

Boganooty 13. The Boganooty or loss of 2nd Crop amounts to Rupees 26,208-10-2 and Rs. 1,496-4-2 was taken to account for actual neglect on the part

part of some Ryots, and remission granted for the remainder. —

Rupees 24,712-6-11, which is 3,689-13-5 below the previous year. The Statement annexed will shew that the chief loss is sustained in Kar or first wet Crop Cultivation, which was owing to the want of the seasonable rains, and the total cessation of rain from December likewise proved materially detrimental to the growth of the Nowrah or Second Wet Crop Cultivation.

Chic Nursoolay - 11.

The total remission allowed under this Sha

15132 Fort St. George 1st November 1841

Shaver No.

Of the Crops sown in September and November where water was available, and in the expectation of a future supply, Shāvee, as per Table subjoined, occurred in five of the Talooks of the Principal Division and in three of the Sub Collectors.

No rain fell, as before stated, after the Month of November and the consequence was, the Crops on the ground suffered greatly. Some when about coming to ear and others earlier. The remission was not granted until a careful examination had been made, and then a Sum equal to 10 per Cent of the produce was added, calculated on the whole and

various

15134 Fort St. George 1st. November 1841

various extent of harvest reaped
by each Ryot. On referring to the
Pymash Jerrum Accounts of
this District it does not appear
that the Assessment was
fixed with reference to the
average produce of each field,
but on an Estimate of each
and description of land rendering
it necessary at times to deviate
from the principles by which
claims to remission are to be deter-
-mined. The total amount allowed
under this head was Rupees 3091-8-8
as exhibited in Statement No 1 and
being satisfied from a due considera-
-tion of price and produce the Ryots
were unable to pay, it was struck out

The Revenue from this head is from Dusbundams and other Enams, Topes, Tank Fisheries, Cawelly Candayem &c. and is Rs. 2786 – 7 – 1 below the preceding year and owing to the decreased Collections of Jodee on the maniem Cultivation.

19.

The annexed Statement exhibits the corrections made in the Jamabundy Statement A and which has reference to some Villages being deducted and others added to the Ryenoo-

Description

Teasgaree or remission of 10 per cent to Brahmins and muselmen

15.

Great care has been exercised in granting the remission under this head. It amounted in all to Rupees 14,942 – 3 – 6. making the sum remitted 5½ per cent short of the previous year. Land to the extent of Rupees 2174 – 14 – 9. less than the preceding year, was left uncultivated for want of rain besides which a sum of 522 – 9 – 6. (land cultivated but allowed to remain waste for ten years) was refused the privilege of the remission.

Ryetwar remission of 17½ per cent

16.

This remission extends only to the Vine Talooks North of the Palar and is Rupees 17,146 – 3 – 4. less than the previous year owing to the decreased cultivation.

These

17.

These Villages have fallen short in their revenue – Rs. A. P. 92 – 3 – 5. Mostly all the Cultivation is dry and the Crops raised depending entirely upon the quantity of rain. The revenue notwithstanding has never been so low as in Fusly 1234, when they were rented.

18.

The Revenue from this head is from Dusbundams and other Enams, Topes, Tank Fisheries, Cannelly Candayem &c. and is Rs. 2786 – 7 – 1 below the preceding year and owing to the decrease Collections of Jodee on the maniem Cultivation.

19.

The annexed Statement exhibits the corrections made in the Jamabundy Statement A and which has reference to some Villages being deducted and others added to the Iyen-

Description

Nageereddy Kandigay in Kotary=coopum in the Sutteraid Talook	"	1	1	This is a newly Established Village by one Nageereddy.
	4	1	5	
Total as per Columns 78, 79 and 80 of the Jamabundy Statement A for Fusly 1250.	4731	2284	7,015.	

Tuckavy. 20. The amount sanctioned in Fusly 1250 was Rupees 30,000 of which 26,300 were disbursed, and has been since recovered.

Maramut. 21. The expenditure was Rupees 50,090 – 3 – 3 and comprised repair of 195 Tanks, 26 Caingalas, 68 Sluices, 74 Channels, 6 Aqueducts, 5 Drains, 3 Bridges and 19 Dams.

22. The charges of the year in Comparison with those of the preceding will be found detailed in No 9 prepared according to the Circular letter of the 29th November 1830.

23. The total Summah, with the exception of the Extra Sources of Revenue was Rupees 29,76,053 – 3 – 0 of which 19,37,655 – 7 – 0 was realized within the Fusly, leaving a balance of 1,38,397 – 12 – 2 since which time 1,21,694 – 7 – 2 has been brought to Account.

24. With respect to the observation of the Sub Collectors in his last general

report and to which the Board refer in the 19th and 20th Paras of their Proceedings (having reference "to the refusal of Puttahs in his Division to "be the denial on his part to grant remission to Brahmins to the extent demanded, and the dissatisfaction at the "rates of Assessment on lands newly "brought under Cultivation") there has been no change made in Villages where the Assessment has been permanently fixed. The four Talooks, in the Subdivision have never been surveyed and assessed as the rest of the Talooks, they formed formerly part of the Southern Collectorate, and in Fusleis 1213 and 1215 the arable and Punjer lands attached to them were assessed on mere guess, or on conjecture of what the land might yield. Each Village in these Talooks it is true bears an

Estimate

Fort St. George 1st November 1841

Estimate, but not a permanent assess=
=ment. Much money was expended to
to introduce into them the same system
as prevails in the Talooks North of
the Palar; but the survey was never
finished, and the Suggestion officially
bringing the whole under one general
System was proposed and submitted
to the Board for their approval on the
25th May 1839.—

25. "The accounts from the
Sub Collectors Talooks do not show
any change of the assessment or classifi=
=cation of lands up to the end of
Fusly 1249, and he admits this
in his present report, but in the
Fusly under review he has altered
both the Assessment and the
Classification of Seven Villages
and he explains in detail his rea=
sons for so doing from Para 22 to
28. However satisfactory the reasons
may be that urged him to this mea=
=sure, it is desirable always that it

Should

Fort St. George 1st November 1841

should be undertaken without full
explanation to the Board of Revenue
and their previous sanction obtained. In
the present instances there appears to
have been no change in the assess=
=ment made but what the Board
would have acquiesced in, and the Ryots
appear to have accepted their Puttahs
readily.—

26. "The practice of refusing
Puttahs at the time is not uncommon
and prevails more or less during every
settlement. It is not a permanent
refusal, the Ryot does not perhaps
understand the contents of his Puttah,
he has some complaint to make of
the assessment entered being on arable
in place of waste land, or that the
Tahsildar has altered the classifi=
=cation, or that he has been refused
the water he is entitled to, or a thou=
=sand other objections which are urged
every day, but which are satisfactorily

adjusted

Tahsildar has altered the classifi-
=cation, or that he has been refused
the water he is entitled to, or a thou-
=sand other objections which are urged
every day, but which are satisfactorily

adjusted

adjusted by Common investigation.—
There does not appear to be any good
reason why the Sub Collector should
introduce matters of this kind—
into his report, he refers to the
same subject again on the —
present Settlement of his Division,
and admits at the same time,—
"that many of the Cases were friv-
"lous and absurd, or totally incon-
"nected with the Puttah or its —
"Contents."

27. In Paras 19 and 20 of his
report he states that many indi-
viduals are in the habit of accept-
ing, on Durghast, more land than
they actually want or are able —
to cultivate, in order to keep —
the land out of the hands of —
others, and he proceeds to explain at
length the arrangement he has made
to check the practice. This is also an innovation
and is not altogether in accordance —
with

with the general practice of remitting
the Teerwah altogether on Bunjer land
when not brought under Cultivation. It does
not appear either from the report of —
the Sub Collector — whether the Ryots on
whom he has imposed this additional
Teerwah had fully cultivated their
Puttoot land, if they had not, and
left in like manner the Durgast land
uncultivated, then there might be —
some reason for introducing the System
he has done. As I before remarked,
it would on all occasions, be more
in accordance with rule to await —
instructions before carrying into effect
any measure of this kind.—

28.— The Board in the 22d —
para of their Proceedings of the 26th —
July 1841 have called for information
as to the tenure of the Village of Peran-
-ganapootoor, the Chatoor Bhagum —
Village in the Wunduash Talook. —
The Origin of the Chatoor Bhagum is not known. —

The

Fort St. George 1st November 1841

The Village formerly belonged to the Dasoor Jaghire, which was resumed in Fusly 1226- There are three other Villages held on the same tenure and have been so since the assumption- In the Village of "Arnoogonda" in the Chittoor Talook, where a remission of 20 per cent prevails, it belongs to an Individual named Soobarow who states that he possesses no document in support of the privilege, but that the same was made over to his Ancestors by the Nabob. It is entered in the account as "Penchum Dah" and likewise in the Curnum's accounts- "Nullungaud" is another in the same Talook, a Chatur Bagum Village or a remission of 25 percent granted to two maharatta Soodras on their Puttent cultivation- These Individuals in like manner received it from their Ancestors who had it made over to them by the Nabob for service rendered. The third is "Asfoor" in the Vellore Talook, on Chatur Bagum tenure and enjoyed by the Meerasdars-

It

Fort St. George 1st November 1841-

It is entered in the Accounts of Fusly 1201- The Meerassedars of this Village are also indulged with a Teazgary remission of 5 per cent in addition- The fixed Teazgary being 10 per cent. as to the other Bramins, but in consideration of their being allowed the Chatur Bagum indulgence 5 per cent Teazgary remission was deducted in Fusly 1213-

The whole amount of remission granted under the head of Chatur Bagum for the present year is Rupees as 103-8-5- which is Rupees 33-14-6. below the previous year-

29. In the 23rd Para of the Board's Proceedings information is called for regarding the land granted on cowl in the Arcot Talook, the assessment appearing to be raised without explanation in Fusly 1249- The following will explain the reason- One Vencobachary gave a proposal to cultivate C A 12-14 3/14 of Nunjah land in the Village of Agramungalum which was never assessed-

In

15145. Fort St. George 1st November 1841.

In fusly 1248 the proposer cultivated 1 C. 10/11 and the land was entered in the 1st class but as this assessment was fixed on inadequate data, he, the proposer was informed that the final assessment of the land was left to be settled at a future period. In fusly 1249 certain portions of the land cultivated was placed in the second and third class assessment, calculated on the Capabilities of the soil, this gave rise to the Petition presented to the Board by Vencobacharry, to which I replied on the 22nd October 1840, stating matters in details and the Petitioners' claim was rejected, as per Extract from the Board's Proceedings dated 12th November 1840.

30. My Acting Head Assistant Mr. Owen has had the charge of two Talooks, Tripulty and Pennoorry, since he joined the District in February last, and having the Nair Sheristadar attached to him he made the settlement of these two Talooks, distributing all the Puttahs in his presence, and in the different divisions of his charge.

J.S.

J.

15146 Fort St. George 1st November 1841.

31. I beg to mention in the highest terms of commendation the able assistance I derive from the Head Serishtadar Soobarow. He has now held his present appointment for two years and has in every respect fulfilled the estimation I had formed of his fitness for the Office.

32 The Settlement of the District was commenced in January and closed in July. The total number of Puttahs distributed by me were 45,769. and in different places. Viz. in the Talooks of Chittoor, Caverypauk, Sholinghur, Trivellum, Sautghur, Cuddapanuttum, Vellore and Sutwaid, concluding the settlement of Chittoor at Chittoor, Velcoor, and Yadamurry, of Caverypauk at Caverypauk and Wallajanuggur, of Sholinghur at Sholinghur and Wallajanuggur. of Trivellum at Trivellum, of Sautghur at Sageeneegoontah, of Cuddapanuttum at Palmanair and Bypagarry pully, of Vellore at Vellore and of Sutwaid at Oblapooram.
