From the Chief Secretary to Government—

Read the following Papers.

No. 1592.

Extract from the minutes of Consultation under date the 7th December 1854.

Read the following Extract from the Proceedings of the Board of Revenue

(Forwarded 22d October 1854 No. 498)

The report of the effects of the Godavery work upon the District of Rajahmundry accompanying the foregoing letter has been laid before Government without any opinion from the Board of Revenue The Right Honble the Governor in Council is desirous that the statements submitted by the Sub Collector of Rajahmundry should be carefully tested by the Board and that from them Abstract statements should be prepared exhibiting the results in a clear and concise form The Government take the opportunity of forwarding to the Board statements which have been received from the Collector of Tanjore as also a Memorandum with statements from Mr. Stokes Collector of Guntoor on the subject of the advantages derived

derrived from the Anicuts in those Districts. The Governor in Council proposes to publish all these reports for general information and is therefore very desirous that they should exhibit with the strictest accuracy possible and the utmost impartiality the results of the outlay on the important works under notice. The Board are aware that the correctness of the accounts given by Colonel Cotton in his publication have been impugned and others of writers have argued that the large returns anticipated from the outlay on these works have not been or cannot be realized. It is with a view of clearing up all doubts on this subject so far it is possible, that the Government have called for these reports and it is therefore of the utmost importance that their accuracy should be rigidly tested by the Board both in the Revenue and Public Works Departments. The Board will give their earnest and early attention to the subject and lay before Government their opinion.

Referring

2 Referring to the views which have been advanced in a recent printed pamphlet entitled "Modern Hydraulic Works in Tanjore and Rajahmundry examined" the Government would further wish that before submitting their report the Board will communicate to the author of those remarks, their views and the result of their examination for any further observations he may have to offer.

3 The Board should also obtain from the Collector of Masulipatam a statement of the effects of the Kistnah anicut on that District, as it will be observed that Mr. Stokes Memorandum and Statements refer solely to Guntoor.

B.d No. 822 (3.4)
Proceedings thereon

The Board are anxious to give to the subject here brought before them their attentive and close scrutiny which its great importance demands, but Government are aware that the Districts benefited by

by the Godavery and Kistna amients have been for the last 5 years under the separate control of the Commissioner for the Northern Circars although therefore the Board can show from the records of their office the general revenues of those Districts from the commencement of our rule to the present time they find that they do not possess that detailed and connected information as to the progress and condition of the districts during the past 5 years which is requisite for the full consideration of the subject under review.—

2 The subsidiary works connected with these amients are still incomplete and arrangements have yet to be made for remodelling the land assessment or introducing a water tax on the lands newly brought under irrigation. Returns of the revenue hitherto collected would not therefore be a fair standard by which alone to judge these amients and Lt. Colonel Cotton evidently includes in his estimation of their value the additional revenue which they may be expected to bring to Government when the irrigating channels are completed and the assessment has

has been revised upon the lands which are converted by them from dry to wet cultivation.

3 The Board therefore think that besides an account of the Revenue previous to and after the construction of these works, information should be laid before Government showing the time when their full benefit is likely to be felt and the account of the additional revenue which may hereafter be expected from them. The Board have necessarily only imperfect information regarding the circumstances which have delayed the remodelment of the assessment and the taxation which it is expedient to place upon the newly irrigated lands, they have also no opportunity of testing by personal enquiries the opinions of the local officers on this point, or of observing the effects which the amients already shew upon the people by brightening their prospects and stimulating their manufacturing and commercial as well as agricultural industry.

They

4906 Fort St. George 2d April 1855.

They therefore request permission to transfer the papers regarding these 2 amicuts to the Commissioner for the Northern Circars, whose means of collecting accurate local information on all branches of the subject are so much superior. As the Commissioner is a Member of the Board, this step might perhaps have been taken without requesting special permission, but the importance of the subject has led the Board to explain the grounds on which the proposal is made and request the authority of Government for its adoption.

5 The Board are engaged in scrutinizing the details of the Coleroon amicuts and hope to submit their report on them at an early period.

No. 1

Circular.

To prevent the rights of Govern-
ment and of individuals being injurious-
ly affected by the construction of Tanks
by private parties under the recent orders
of Government and the Honorable Court,
granting to ryots the benefit of all improve-
ments made at their own expense, the follow-
ing rules are passed with the sanction
of Government for observance on such
occasions.—

I Any Ryot wishing to construct
a tank with the benefit of the new rules
must in the first instance apply to the
Collector of the District for permission
to do so.—

II On the Collector receiving such
an application he will immediately direct
the Tahsildar of the Talook or other
competent officer, to inspect the locality,
and ascertain by careful inquiry whether
the proposed Tank will cut off the
supply

supply of any other public or private
tank, or interfere with the cultivation
drainage or irrigation of any lands in
its vicinity so as to give just cause for
complaint.—

III If this enquiry shows that
no injury will be caused to existing
interests the Collector will grant
permission to the applicant to proceed
with the works.—

IV. In remote and thinly peopled
taluks Ryots may sometimes be led to
commence the construction of a tank without
the previous permission of the Collector In such
cases, it is to be clearly understood that the
work will be liable to be stopped on
complaints being made against it, or on
it being found to interfere with the
rights of Government, though in the absence
of any such objections the want of previous
sanction will not deprive the party who
makes the tank of the benefit of his improvement
under the new Government rules.—

V A Ryot who constructs a
tank is to pay the assessment of all lands
covered by its water spread provided
they have been cultivated within the
previous

previous ten years should any of the lands so submerged belong to other parties the constructor of the tank must first obtain as their consent by agreeing to give land in exchange or by other measures.—

VI All private tanks shall be subject to the inspection of the Officers of Government and if the Civil Engineer or one of his Assistants shall at any time declare that any such tank requires to be strengthened in its bund or to have a new or larger calingulah, the improvements which are thus pronounced necessary for its safety shall be executed by its owner or owners. For this purpose a suitable time not exceeding one year is to be allowed by the Collector and if the tank is not put in a safe state within that period, the exemption from extra demand will be withdrawn, and if necessary, the tank will be repaired and taken under the control of Government.

VII The previous inspection of the site of a proposed tank by the Civil Engineer or one of his Assistants shall not be necessary unless the Collector sees cause to ask for his professional opinion.

VIII Collectors are required to give the utmost publicity to these rules within their respective Districts.

Revenue Board's Office
Fort St. George

B. No. 555 (7)

From the Secretary to Government—

Requesting in Communication with the Civil Auditor to submit a draft of Rules regarding the Commutation of pensions based on those of the Circular order of the Board of Revenue, North western Provinces—

No. 239

Extract from the Minutes of Consultation Revenue Department, under date the 17th February 1856.—

Para 1 The Government have observed in the Agra Gazette 26th December last, a Circular Order of the Board of Revenue, North Western Provinces, No. 18, dated 15th December on the subject of the Commutation of Pensions.—

2 From this it appears that the Board have been authorized by the Government of Agra to sanction on the reports of the local authorities and with the consent of the recipients the commutation of certain Pensions now payable from the Public Treasury, Vizt.—

1 Hereditary and transferable pensions of Rupees 100 and less, held under Section 2 Regulation XXXIV 1795 and Section 2 Regulation XXIV 1803 Bengal Code at the rate of 20 years purchase or Rupees 200 for every 10 Rupees of annual Pension:—

2 All other personal pensions of Rupees 100 and less which do not fall within the above Regulations, but have been declared hereditary by Government on distinct references the Commutation being made at the same rate.—

Life

3 Life Pensions of Rupees 12 per annum and less on the reports of the Local Officers and consent of the parties, according to a scale ex varying with the age of the Pensioner.—

3 Pensions not personal, as annual allowances to Mosques, Temples, and religious objects, may, if they have been clearly declared perpetual by Government, be recommended for Commutation at the same rate as those authorized for the two first Classes, viz. 20 years purchase, but cannot be commuted without the express orders of Government.—

4 The Governor in Council doubts whether there are any Pensions payable from the Local treasuries in the Madras Presidency which precisely tally with those in the first of the above classes, inasmuch as he does not think that this Government have ever recognized any Pensions as transferible. Among those however which have usually been regarded and treated as Hereditary may be noticed.—

Poligar Pensions in the Ceded Districts which have generally been consider-ed as hereditary to lineal heirs and during good behaviour—

Mali Rana

Mali Rana to the dispossessed Poligars of Madura and Dindegul. These allowances were granted to be enjoyed as long as the Estates enjoyed on account of which they were given were in possession of Government, and the lands have subsequently been permanently resumed or resigned on the understanding that the Mali Rana would be continued.—

Mali Rana to the pensioned Rajahs of the Districts of Malabar and Canara.—

5 With respect to the Classes of Pensions referred to in para 3. Those allowances which have been conferred for the benefit of institutions of a permanent character, as Mosques and Pagodas have usually been regarded as perpetual. Those bestowed on institutions or for objects of a more ephemeral nature—as for service in a tomb—burning a light in a Durgah &c. have not been so considered, but are liable to resumption or reduction on Lapse.—

6 The Right Honorable the Governor in

in Council is of opinion that the principle for the Commutation of small pensions acted on by the Government of Agra might with advantage be adopted in this Presidency. Effect has indeed already been given to it as regards Pensions in the Political Department. The inconvenience complained of by the Board of Revenue at Agra is no less experienced here. These petty payments, the correspondence, accounts and references connected with them, occupy much of the time both of the Collectors, Revenue Board, Civil Auditor, and, it may be added of the Government itself, which might be much more profitably employed. Many of the allowances or the shares into which they are split up are so small, only a few rupees a year, as to be wholly insufficient for the subsistence of the recipient who would probably be in many cases glad to commute them on favorable terms. The relief which would thus be occasioned, especially to the Audit Office, would be great.

7. The Governor in Council resolves to forward the Circular, with these remarks, to the Board of Revenue, and to request them, in Communication

Extract Minutes Cons. Public Department 14th November 1855 & 19th December

communication with the Civil Auditor, to submit a draft of rules based as those of the Circular adopted to the Circumstances of this Presidency.

/A. True Extract/
/Signed/ T. Pycroft
Secretary to Government

Ordered that the following letter be sent in consequence.—

7.8
B. No. 812

To the Acting Civil Auditor

To
The Acting Civil Auditor
Sir,

With reference to para 7 of Extract Minutes of Consultation dated 17th February 1855, I am directed by the Board of Revenue to forward to you the accompanying draft of a proposed Circular based on that of the Board of Revenue in the North Western provinces; and to request that you will be pleased to favour them with any suggestions you may have to offer on the subject.

Revenue Board Office
Fort St. George
2d. April 1855.

/Signed/ B. Cuthbert
Secretary

No. 1
Circular Order.

The Government being of opinion that the principle

principle laid down in the Circular of the Sudr Board of Revenue, North West Provinces, dated 15th December 1855 No. 18, on which certain pensions payable from the Public Treasuries may be commuted should be introduced into this Presidency, the following rules are, with the sanction of Government, published for the guidance of the Revenue authorities and for the information of pensioners generally.—

2 The Board are authorized to sanction on the reports of the local authorities, and with the consent of the recipients, the commutation of all hereditary pensions and Malikanas to dispossessed Polygars or pensioned Rajahs, of the value of Rupees 100 and less per annum, at the rate of 20 years purchase, or Rupees 200 for every 10 Rupees of annual pension. Allowances granted for the benefit of Institutions of a permanent character, as Masques, and Pagodas, and which have usually been regarded as perpetual, will also be commuted at the same rate, but with the previous sanction of Government.—

3 The Board may also authorize in the same manner and at the same rate, the commutation of all personal pensions of Rupees 100 per annum and less, which may have been declared hereditary by Government on distinct references

4. With regard to grants for the support of Durgahs Tombs, Tuckeyas, or Makans, which are not considered hereditary, but are liable to resumption or reduction on a lapse, the Board will be prepared to recommend to Government the commutation of the same at a rate depending on the ages of the incumbents and the prospect of the continuance of the allowances beyond their lives, but not exceeding in any case, the maximum of 15 years purchase.—

5 The Board are also authorized to commute on the reports of the local officers, and with the consent of the recipients, all life pensions of twelve Rupees per annum and less, at the rates entered in the Subjoined schedule.—

Age of pensioner—	No. of years purchase
Under 10 years	13
10 to 20	12½
20 to 25	12
25 to 30	11½
30 to 35	11
35 to 40	10½
40 to 45	10
45 to 50	9½
50 to 55	9
55 to 60	8
60 to 65	7
65 to 70	6
above 70	5

With

6 With the view of preventing the fraudulent or erroneous re-issue of pensions commuted in whole or in part under the foregoing rules, the Collectors are required to keep a separate Register in their offices of all pensions so commuted. This Register should be kept in the form subjoined and must be referred to on every application for a Commutation, and in every case submitted for the orders of the Board, it should be distinctly stated that the Register has been examined.—

Number	Number of District Register	Name of Pensioner	Monthly	Yearly	Amount of pension.— Nature of the Grant	Date of sanction	Date and amount of Commutation paid	Remarks

7 By the term recipient of any pension is to be understood the person or persons whose names are registered in the District lists without reference to other Members of the same family who may participate therein. The consent of the head of the family or, of the registered recipients shall alone be deemed sufficient for the purposes of the commutation authorized by these rules;

rules, but the Collector may, if he see cause, order the distribution of the purchase money among the Members of the family in the proportion in which they may have been accustomed to participate in the pension.—

8 These orders are to be made known to all pensioners, and Collectors are instructed to endeavour to pay up all pensions of trifling amount at present. These petty payments, the correspondence, accounts, references connected with them, occupy much of the time of the Collectors, Revenue Board, Civil Auditor, and of Government, which may be much more profitably employed, and many of the pensions or the shares into which they are divided are so small as to be wholly insufficient for the subsistence of the recipients; and would therefore be gladly commuted, in many cases, on the favorable terms authorized by these rules; while the relief which would ensue thus be occasioned to this and other offices, would be great.—

B. No. 578

No. 240

From the Secretary to Government } Extract from the Minutes of Consultation in the Revenue Department under date the 17th February 1855

/ From Board 25th January 1855 /

On the grounds mentioned by the Board of Revenue, the Right Honorable the Governor in Council will not object to the money allowances entered in the Collectors' Statements being enjoyed by the parties for their lives, but he would prefer the allowances being commuted for round sums on the principle of the Circular sent to the Board with Extract Minutes of Consultation of this date No. 239.

Until this can be arranged, the allowances may however be disbursed, to commence from July 1st

Read again Extract from Mins of Cons dated 1st March and ref. No. 23.

To, B. Cunliffe Esqre Secretary to the Board of Revenue. Fort St. George.

Sir,

11

B. No. 668.

From the Collector of Rajahmundry Submitting Copy of the Sub Collector's report on the progress of the Survey Class under his Superintendence and requesting renewed sanction.— (24th February 1855)

I have the honor to forward Copy of a report from my Sub Collector on the progress made by the Survey Class which, under the sanction of Government of the 6th February 1854, he was authorized to entertain.—

The results of the measure, after

2- trial for a single year, are, the Board will be gratified to learn, highly satisfactory, and the progress made by the pupils under the able Superintendence of Mr. Taylor most encouraging.— I feel sure the Board will not hesitate to recommend that the grant should be renewed with the addition proposed by the Sub Collector in the concluding Para of his letter of two Surveyors on a Salary of 10 and 15 Rupees each. The total expense per Month will then be but 93 Rupees-a very insignificant sum in comparison with the advantages obtained.—

I beg to recommend that the

3- disbursement

Para 13. disbursement of a sum not exceeding 150 Rupees for the purchase of 20 plane tables may also be sanctioned, and that the instruments asked for in para 16 of the Sub Collector's letter may, if possible, be supplied.-

4. I hope in communication with Mr. Taylor to be able to make some arrangement, whereby a knowledge of Surveying may by degrees be extended to the Native servants in this Division.-

Rajahmundry District,
Collector's Office,
Gunnaveram, 3d. March 1855.

(Signed) A. Purvis.
Collector.

No. 1
No. 26.

To,
The Collector of
Rajahmundry.

Sir,

The period of one year having nearly expired for which I obtained the permission of Government to entertain a Survey class in the Sub Division on a Monthly Salary of 68 Rupees, I have now the honor to report the results of the measure; and to request that you will be so good as to solicit the sanction of Government as

for

for the renewal of the Grant.-

2. On the receipt of the Extract Minutes of Consultation dated 6th February 1854, I chose from among the Volunteers who had hitherto attended the class those who had shewn themselves most active and intelligent. The allowance has been disbursed from the 1st March 1854, and the following are the pupils who first composed the class.-

Surveyors.

	Names.	Salary	Names.	Salary
1	A. Bracasarow	5	1. Y. Mahdavaroydoo	3
2	C. Bhemarow	5	2. K. Ramasawmy	3

13	Venkiah			
		50		

The

The three last were scholars of the 1st. class in the Nursapoor school who had already made considerable progress in English, and as they showed an evident aptitude for Geometry and Surveying, I admitted them among the pupils of the class, giving them half the allowance sanctioned for each Surveyor. There are now only two lads in the School, who receive this allowance of 2½ Rupees. The stipend being conferred as a scholarship for superior attainments, subject to discontinuance should they be outstripped by others of their class - Of these two lads, one promises to be an excellent draughtsman and the other has already partially surveyed the lands of a Village.-

3- The class being thus Established, I notified that I should henceforth consider it a door by which entry could be obtained into the Revenue service of Government; a surveyor being preferred to other candidates for employment, provided he were competent in every other respect for the duties of the vacant post. Accordingly the five first on the list have obtained situations as follows-

Names.	Date of appointment.	Situations.
1. A. Sooria Bracassirow	14th. Octr. 54	Acting Deputy Tasildar of Pengond and Maramut Muddutgar
2. C. Benarow	Do.	Acting Maramut Muddutgar
3. A. Appaih	26th. Decr.	Samutdar of Potaveram
4. S. Streenevasarow	18th. Janry. 55	Muddutgar of Tademulla
5. P. Narsimharow	1st. Febry.	Ameen of Gosttendivi in the Talook of Amalapoor.

The present Judge of Rajahmundry, Mr. Copleston, anxious to further a scheme having for its object the improvement of our Native servants has been good enough to appoint the last named pupil, an Ameen of the Court, on a temporary salary of 12 annas a day, assisted by another pupil who receives an addition to his allowance of 5 Rupees a Month. His duty is to Survey and Map a village in the Amlapoor talook, the lands of which are disputed by two claimants in the Civil Court.-

4. Two of the remaining youths whose names are entered in the first list have since lost their allowance owing to inattention and want of ability, and their places have been supplied by others. The class at present stands as follows:- Names

	Names.	Caste	Age.	Knowledge of English.	Competent to Survey with- Compass Circumferentor and Plane Table.	Compass only.	Plane Table only.	Plotting and plan drawing
1	D. Basavaliah = gum	Mootchy	25	Numerals Geometrical figures	1	"	0	Very neat and skilful.
2	M. Venkajee	Brahmin	22	Ditto	1	"	6	Neat and accurate.
3	S. Venkatarut = num	Ditto	22	Ditto	1	4	6	Indifferent
4	S. Soobbiah	"	30	Do reads	12	4	1	Ditto
5	P. Ramalingum	Moodelliar	25	Do reads & writes	1	4	"	Tolerable.
6	V. Nursimmoolo	Telugu	20	Do Do & speaks	1	0	"	Neat and accurate. Do
7	M. Mungiah	Ditto	20	Do Do	1	1	0	Indifferent.
8	C. Vencatachary	Brahmin	28	Numerals	1	1	0	Indifferent.
9	P. Nursimharow	Ditto	20	Do reads, writes and speaks	1	4	4	Good neat and accurate.
10	Noorulddeen	Mussulman	22	Scholars	1	0	4	Making good progress
	P. Vencata = chellum	Brahmin	18					

With the exception of the two last and No 8 in the above list, all the young men of the Survey Class, have for the last two Months been employed as Goomastahs on a salary of 15 Rupees, to Estimate and Ryle the crops, and to measure the land watered by the Godavery Channels- their appointment was sanctioned as a preliminary measure to the imposition of Teervajasthee- The names of the Pupils chosen from among the Volunteers

7. A. Gungaraw
8. S. Kristamacharry
9. C. Vencatacharry
10. Noorulddeen and
11. Venkatachellum

Volunteers to act in the Class during the above period are given in the Margin. All of them are competent to Survey with one or more of the instruments in use, and from among the numerous Volunteers anxious to learn, there are perhaps some 6 or 8 more, who are equally fast advanced-

Those pupils who belong to the 5th Class are instructed in first principles, the definitions and Elementary rules of practical Geometry, the computation of areas, English numerals, names of figures in use, Viz. square, circle, Triangle, &c and the English terms employed in their work. Some of them, it will be seen, are acquainted with English, and some are not, but it often happens that greater activity, equal intelligence, and neater hands are to be found, among those who are unacquainted with our language; deficiency in one respect being compensated by superiority in another. The pupil who excels in every respect is the first promoted,- a rule which is productive of the best effect in stimulating to industry and activity; the same rule obtains with regard to the Survey people who are promoted to Police and revenue employ as vacancies occur, and in the absence of others possessing prior claims- The

The following is a list of the Government servants of the Sub Division, who have attained to a greater or less proficiency in land surveying.—

Specimens

Specimens of the work of Durmarows Modelliar & acting Thasildar of Mogultoor, of K. Sashiah, & Soory apracasarow and Adoory Appiah, have already been before the Board — It is perhaps needless to & say that when the Thasildar of a Talook takes an interest in any measure of the kind a spirit of emulation and activity is infused into the whole body of his subordinates — Durmarow's example & has now been followed by K. Vurdacharry the & Thasildar of Tamuk, who has himself acquired the use of the plane table, and whose brotherinlaw promises to become a good Surveyor.—

6. The great advantage possessed by the & Native Revenue Officer who has acquired a knowledge of Surveying and plan drawing, is sufficiently obvious — A revenue Surveyor is not simply a measurer of land, he ought to become experienced in the Estimation of produce and the classification of soils, and to obtain a thorough acquaintance with the & value and productive power of the lands. The & Talook Officers' ability to Survey instead of interfering with his other duties simplifies his labour & increases the interest of his work. This is especially the case with Officers of the grade of Samutdar, who being

being placed over 10 or 12 Villages, have the power of obtaining in a very short time an insight into their every detail and a knowledge of their wants and capabilities only to be acquired by walking over the fields.—

7. The very favorable terms in which the Board of Revenue in their communication to Government under date 11th October last No. 478 have noticed the specimens of their work, which have been from time to time submitted, render it perhaps unnecessary to forward with the present report Survey plans and Village Maps in further proof of the progress that has been made. I think it right however to submit one or two papers as peculiarily illustrative of the advantage of instituting a Survey class for the training of Native revenue Officers, showing how their services and skill may be employed to simplify the Proceedings of the European Officer, and to enable him to determine between the rights of Government and of individuals. The Survey plans of the Towns of Nursapoor, Cocanada, and Rajahmundry, were all made with this view. The latter will enable the Civil Engineer, in communication with the Collector, to mark out at once the improvements which

which are urgently required to the streets and thoroughfares. I would point also to the plan of Tessipoody in the Happaravum Taluk as exemplifying the value of a survey of watered villages.—

8 The 1st paper now submitted is a plan of Ayodaruntka one of the islands of the Godavery. These lunkas constantly change their form and dimensions often losing at one extremity what is gained at the other. The action of the water during the freshes frequently carries away large masses of soil without any corresponding advantage accruing and sometimes a large portion of the Island is covered with sand deposit rendering it totally unfit for cultivation. The strengthening of the river embankments subsequent to the construction of the annicut for the protection of the main land and irrigating channels has had the effect of increasing these fluctuations and much valuable land previously out of reach of the water has been completely swamped by the high freshes of the last few years.

9 The assessment having been originally

originally fixed upon their lands with refer-
ence to the fertility of the soil it has been
necessary after the freshes of the year, to
make an annual examination and &
measurement of the Islands to ascertain
the extent of accumulation or loss which
they have undergone and to assess or ti
remit accordingly.—

10 The island having been once accu-
rately surveyed and planned this vexatious
interference can be dispensed with. If the
renter is unwilling to hold it for a short
term of years at his own risk, nothing
more is necessary than to examine the few
exterior fields of the island and compare
them with the former measurement;
and a decision can be at once formed
as to whether he is entitled to a re-
duction or whether the same rent may
be fairly demanded. The plan marked
A will illustrate this: it shows the
mode in which it was surveyed, the
particulars as contained and recorded and
is a fair specimen of the ingenuity of the
draughtsman in adopting various
signs to distinguish particular soils
and Crops.—

11 The Plan marked B is the
record of the survey of the lands of a Village
in the Jungle near the Hills which has
lately been gifted by Government for
default; I found it impossible to come
to any proper understanding in regard
to the lands which were claimed by the
former Proprietor as Jeroyty, and by the Enam-
dars as rent free land. But the survey makes
the matter clear. The difference between
the extent entered in the accounts as
the total Ayacut of the Village and
the present measured area is no less
than 3,882 acres 161 yards.—

12 The 3d Plan is the survey of
a Delta Village in the Mogultoor Talook
and is forwarded to exemplify an ex-
periment made by the amildar of that
talook to unite the European and Native
Methods of land measuring. From one
corner of a field, bearings were taken
with the compass to each of the other
corners, every side being accurately measured
with the chain. This was done with
the view of showing the people the
use of the instruments and proving to
them that our method of measurement
and

and calculation of areas only differs from theirs in being more accurate. The field book is forwarded with this plan but I fear it will scarcely be found intelligible. This method is perhaps too complicated and liable to error to be universally adopted; but a mistake is at once detected and unless the bearings and measured distances correspond, the work must be done over again and a second party can then plot the plan from the field notes. This has been done in my presence in the case of two portions of the large Village of Asoutah which are also sent as specimens. This Village was surveyed with chain and circumferentor. The fields are very minute and number 2417. The survey of two thirds of the entire area has occupied 3 months. Drawn to the scale of 6 inches to the mile the area of each field could not have been computed. The portions submitted are on the scale of 16 inches to the mile.—

13 Of the remaining Plans now sent which have been selected out of about 25 now before me as being the work of the present Pupils, two were made with the plane table;

It is requested that they may be returned after inspection by the Board of Revenue no Copy having been taken in this Office.

and the original papers are transmitted as without attempt at embellishment. It will be remarked that the size of the fields varies much in different Villages and the scales have to be adopted accordingly.

14 It only remains to notice the number and condition of the instruments which have been placed at my disposal. Those supplied by Government are as follows.—

1 Prismatic Compass ——— In good Order
1 Circumferentor ——— Do
2 Tripod Stands ——— Do
2 Chains ——— Do:
1 of hundred feet length ——— Do:
½ of Sixty six — Do: ——— Do:
1 Parallel Ruler ——— Do:
1 Plane table with sight Vane — Do:
1 Fish skin of instruments — Do: { Some instruments slightly injured.
2 Do: of Protractors (and Compass — Do:
1 Box of Scales ——— Do:
1 Do: Marquois — Do: ——— Do:
1 Large Color Box ——— Do:

It will scarcely be supposed that these Government instruments and two chains have sufficed for the performance of all the work

work that has been done. In addition to a few instruments of my own, which have been in constant use, I have caused to be made some four or five tables as the necessity for them arose. Their construction is as simple as possible, and their average estimated cost is between 6 and 7 Rupees. The brass screws and metal bolts required have been made at the Government workshop, and the account of their cost has not yet been rendered. I believe however that the price of each table will not be higher than is stated above, and the additional Cost of a sight vane will be about 1½ Rupee. There are altogether 20 tables now in progress and I beg to request that authority may be given to me to purchase them on account of Government, their entire cost not exceeding 150 Rupees.—

15 Without endeavouring to introduce Captain Erskine's System which as far as I understand it does not appear to be suitable for these Provinces, I have

The table is made of teak wood, but is smaller and much lighter than the Bengal tables.—

Captain Erskine's table appears to be provided with a Compass a graduated metal edge and prepared litho-graphed papers.

nevertheless encouraged the acquisition of a knowledge of surveying by the Village Curnums and in several instances they are likely to prove very apt scholars. Our operations indeed are generally viewed with interest by the Villagers and I have received many applications from the Ryots to have their lands surveyed. Though I have always advocated the regular scientific and topographical survey of this District, to be conducted by a professional man, I have no doubt that for purely Revenue purposes a sufficiently correct survey of the village lands might be effected by means of those Curnums who are found competent, with the assistance of trained native surveyors. Their work would be inspected by the Government Officers, who have qualified in surveying, and would be superintended by the European Revenue Officer

I

situations Vacancies in the regulus line are of rare occurrence and it will be seen that two of those conferred on the Pupils are temporary, the measure I now venture to propose will prove a great encouragement to the industry and attention of the class.

Bd No 838. (11. 12)

Proceedings thereon.

Submitting with observations a letter from the Collector of Rajahmundry forwarding Mr Taylor's report on the progress of the Survey Class under his superintendence.

To Sec Cons 20 Feby 1855.

In the enclosure to the above letter, Mr Taylor reports on the working of the "Survey Class" of Native youths sanctioned by Government in Extract Minutes Consultation

10 Pupils at 5 Rs 50 per Mensem

6 Peons at 3 Rs 18 per Mensem 68 Rs

dated 6th February 1855, vide and also forwards Eight Maps and a Field Book as specimens of their work

2. There appears to have been no difficulty in forming the Class and some of the Pupils were selected from the Narsapoor School, which the Board believe was founded and has been mainly kept up by Mr Taylor, assisted in a pecuniary view, by the respectable inhabitants of the Town- Mr Taylor has also notified to his subordinates that 'ceteris paribus' a Knowledge of Surveying will carry a preference among candidates seeking public employment. He observes that 5 of the Survey Pupils have already obtained employment in the Public Works Department of the District or else as ameens and Samuldars. The Judge of Rajahmundry also has appointed two of the Pupils to Survey and Map a Village where the lands being disputed form the subject of a Suit in the Civil Court.

The

3 The Survey Class, as it present consists, comprises Bramins, Mosdelees Mussulmans, and other castes; so that there is no distinction in this respect, all being put forward according to individual merit, and the whole seems to be working zealously and well.—

4. The Board are glad to observe that this Survey Class is not a mere party of boys furnished with a little theoretical smattering, but that they have been made use of for the public service and that their Knowledge can be turned to real practical account. This was the aim and object of the Board in proposing to Government to establish such classes throughout the Presidency, and if this is not the result, the sooner they are broken up the better. The Board are fully aware that every thing depends on the Covenanted Officer who undertakes the supervision of these classes, and it is to Mr Taylor's energy and judgement that the experiment has proved so successful in Rajahmundry. The most experienced officers of the profession have stated that native youth are remarkable for accuracy of eye, and neatness of hand, and make excellent surveyors if instructed and supervised by an European Officer.

5. Besides the transfer of two to the "Maramut" Department, and the use made of two

two by the Civil Judge, several Pupils have been specially employed on 15 Rupees a Month to estimate Crops, and measure lands lately brought under the irrigation of the Godavery which will now be liable to a water rate, according to the extent of each field or farm.

6 Mr Taylor mentions (para 7) that the Pupils with others now in the Public service who have qualified themselves, more or less in surveying, have made surveys of the Towns of Narasapoor, Cocanada and Rajahmundry, with a view of determining disputed rights of property, and assisting in making out proposed Municipal improvements.

+ There are 17 of these, of whom 6 can survey with Plane table and compass.

7 The "Lunkas" or Islands formed in the bed of the Godavery afford a constant field for Survey. These Lunkas are always affected by heavy freshes, which sometimes add new deposit, and sometimes wash away part of the old, and since the River embankments have been constructed, these fluctuations are even greater than they were before. The parties who rent any one of these lunkas or portions thereof, from Government, of course have a right to expect a diminution of rent when their land is swept off, at the same time it is not improbable some has been added by deposit. In claims of this kind,

† This is a Plan of about 35 × 10 inches on a scale of 16 inches to a mile. The Unka is 78 g acres, and the assessment 3,100 Rupees

Kind, the Survey Pupils have been usefully employed, and the plan of Ayoda Unka† submitted by Mr Taylor affords an example of proficiency in Plan drawing as well as of a practically useful application of knowledge attained - Every field is laid down and the eye can see at one glance what is Circar and what enam, what is cultivated, and what is waste, and even every variety of crop on the ground. The Board however must remark that the large size of the fields* in the Rajahmundry District makes the work of the survey, and of detail in colouring, far less laborious than it is in South arcot for example where there are so many fields of a quarter acre or thereabouts, entangled in each other.—

8.

The 2d specimen Plan† is of the Village of Pandapooram apparently a large "clearing" in the Jungle, the rights to which were disputed, and explanations unintelligible without a Map - and this has not only simplified the question of right, but shewn that the Government accounts are no less than 2962 acres deficient as to extent of land - It is probable the village accounts are those of the first clearing, and subsequent extensions has never been brought to notice.

9

It is not necessary to notice the remaining Plans, farther than to remark that they all

* Generally 2 or 3 acres and often much more. The scale (330 feet to 1 inch) is the same as that adopted by Captain Priestley - Even in the plans of "asumta" the fields of which Mr Taylor states "are very minute. The smaller fields appear to be about 1 acre"

† B

all bear marks of being carefully, and the Board trust, correctly, executed - The area of each field seems to have been accurately computed, and the whole of the work is such as to reflect credit on the Pupils and to satisfy the Board their recommendation to Government has been to good purpose -

10. No doubt there is room for improvement, both as to the introduction of a uniform method of survey, and of keeping the field Books and the Board hope that their Proceedings reviewing Captain Priestley's experimental Survey, now printed by Government for distribution, will assist Mr Taylor on introducing the same method adopted in the Carnatic, as far as the ability of his class, and the instruments they possess, permit - They would recommend him to use no other Scales but those of 16 inches and 8 inches to one Mile - The former may be adopted when the fields run small, and the same plotting scales will do for either one being the half /linear/ of the other - The acre should also be subdivided into decimals after being computed in Square feet† instead of into square yards -

Vide Selections from the Records of the Madras Govert No IX Revenue Survey.

† That is supposing Gunters chain but Gunters is used. With that chain the area is given at once in acres and decimals

11 With regard to the remark of Government in Extract Minutes Consultation 1st March 1855 as

In Cons. 26th March 1855

as to the introduction of the Method proposed by Captain Erskine, which is what the Board suppose is meant by the Bengal "Putwarree System" Mr. Taylor does not seem to find it suitable, though as far as employing Village Officers, he has been successful in a few instances. The Board are not inclined to urge the adoption of Captain Erskines method of measurement, to the supercession of others that have been found to answer, or at all events they would give no decided opinion till they know how it has worked, in practice, under Captain Erskine, and till they have seen more of the Maps and accounts that have been prepared by that method. The one specimen given by Captain Erskine is not sufficient to judge by; and there are several points connected with his method which require explanation.—

12. The Survey of Bundapuram † seems to be partly after Captain Erskines Method, but the plan generally adopted by Mr. Taylor is to use the Plane table assisted by the compass, and each field measured for content separately. It appears to the Board that this system is more laborious, and not more accurate than the "Khusreh" of the N. W. Provinces, adopted with

† No 2. of Mr. Taylor's list.

with some improvements, by Captain Priestley-

13. Mr. Taylor submits a list of Instruments with which he is now furnished, but they are by no means sufficient, and he has, as the Board are aware, supplied some instruments at his own expense. He states that he is now having some Plane tables made up, which though rough, will answer the purpose and be much cheaper than those made at Madras. He requests sanction for 120 Rupees the cost of 20 of the above Plane Tables which the Board trust will be approved by Government. He also requests to be furnished with some of the articles named in the Margin. In consequance of Mr H. Sullivan's removal from Trichinopoly, the instruments supplied to that District under sanction of Government dated 24th October 1854 will not be immediately required, as there is no one to take charge of the class, and the Board will with the permission of Government, send Mr. Taylor the spare set which will now become available. They may observe that these "sets," six of which were sanctioned by Government, are a better assortment than those which Mr. Taylor has been working with, and they consider his Division as much entitled to a set as any of the 8 Districts for

Chains Cross Staves-I. Square Offset Scales Proportional compasses Pocket Sketching instrument Cases.

In Cons. 29th January 1855

Fort St. George 2d April 1855

for which they have been sanctioned - They would also ask the permission of Government for Mr. Taylor to indent for pencils, paper and such articles as generally come under the head of "Stationery".

Mr. Taylor is at present under the orders of Government 6th February 1854 permitted to entertain the Establishment as per margin the Six Districts above alluded to are permitted to employ 10 pupils at 6, and three at 4 Rupees or a total of 72 Rupees per month, Mr. Taylor asks to be allowed to employ 18 persons as named in the Margin on the Monthly pay of 93 Rupees or 11 Rupees above the amount sanctioned for other Districts - The Board beg to recommend this and they have reason to hope that all Villages now surveyed by Mr. Taylor Pupils will not require resurvey when the general survey of the Northern Circars takes place, and thus there will be so much saved - Should Government sanction the instruments and the establishment, the Board would propose to Mr. Taylore to attempt Captain Priestley's method and keep them informed of the results - He will of course have to lay down with the Prismatic compass, the Boundary outline whilst in South Arcot the angles are taken with the Theodolite, but it is possible that an opening may be made for introducing a real practical survey to progress with Captain Priestleys, and perhaps

perhaps on a less expensive scale -

Considering the other important and multifarious duties that Mr. Taylor has to perform, the Board cannot but express their satisfaction at the success that has attended his efforts to introduce an employment, affording remunerative and useful occupation to the natives, and at the same time results useful to Government and they quite concur with Mr. Taylor that a Talook officers "ability to survey, instead of "interfering with his other duties simplifies his labor, and increases the interest of his work".

No. 896.

Extract from the Proceedings of the Honorable the President of the Council of India in Council

in

in the Financial Department, Under date the 21st February 1855.-

Read an Endorsement from the Home Department No. 155 dated the 31st Ultimo, forwarding for consideration and orders a Despatch from the Government of Fort St. George No. 84 dated the 15th Idem, with enclosures, soliciting the views of this Government on a point connected with the allowances of Captain Priestly, Superintendent of the South Arcot Survey, who having been previously on half pay unattached has lately been brought upon full pay as a Captain in Her Majesty's 74th Highlanders now serving in the Madras Presidency.

Resolution.

The Honorable the President in Council observes that in September last an establishment was sanctioned at a cost of Rupees 4179 per annum for the survey operations in the District of South Arcot for 2 years, subject to a full report of progress at the expiration of that period, and that in part of the above sum, a

Rupees 300 per Mensem + 75 Rupees for travelling allowance, immediately to be raised to Rupees 350 + 75 when his second surveying party was made up; and to Rupees 500 + 75 for the pay of an Assistant superintendent at Bombay after 2 years service on his third party being completed.-

a scale, of allowances, as per Margin was sanctioned for Captain Priestly for Superintending the work.-

In the abovementioned Despatch, the Government of Fort St. George reports that Captain Priestly having been previously unattached, has lately been brought upon full pay as a Captain in Her Majesty's 74th Highlanders now serving in that Presidency; and claims full Indian Military Pay and allowances from the date of his appointment to that Corps; but the Military Auditor General hesitates to admit the claim on the ground that, Captain Priestly's half pay when unattached being a debit to the Home Government the grant to him of Civil allowances may be viewed as a special and consolidated personal salary, entirely dependent upon his position as an Officer of Her Majesty's Service on half pay; and that, as it did not appear to have been contemplated at

at the time when his special [i.e. Civil] allowances were conceded, that he might hereafter come upon full pay, no provision had been made for such a contingency.

The Madras Government did not concur in this view. The fact that Captain Priestly at the time when the Board of Revenue made a recommendation in his favor was on half pay, was indeed incidentally noticed by the Board as also by the Government of India, but the grounds on which the increase to his Civil allowances was asked and granted was irrespective of his position in the Army, whether on half or full pay, and had regard only to the nature and extent of the Civil duties which, on the extension of the Survey, he would be called upon to perform. The Military Auditor General had admitted that under other circumstances Captain Priestly would be entitled to the allowances

which he seeks, and the Madras Government cannot think that the circumstances as they now are can in any way invalidate the claim.

The Madras Government solicits the views of this Government upon the point as one of general importance, affecting not only Captain Priestly but any other Military Officers who may be charged with the Superintendence of Revenue Surveys under the Madras Presidency, and observe, that if notwithstanding Captain Priestly's transfer from half to full pay his Military allowances, so long as he may be in Civil employ, are to undergo no improvement he will [until he makes up his third party] draw little more than the Officer who has recently been appointed his assistant, or than he himself would draw if serving with

Memo

with his Regiment at Jackatalla on the Neilgherry Hills.

It appears to the Honorable the President in Council that the view taken by the Government of For. St. George on the question above stated is correct, and that the Civil allowances of Captain Priestly as Superintendent of the South Arcot Survey have no connexion with the circumstance of his being entitled either to half or full pay as a Military Officer.

Order. Ordered that a Copy of the foregoing Resolution be forwarded to the Home Department in reply to the endorsement above mentioned, and that the original papers on the subject received from the Home Department be returned thereto, copies being kept for record.—

No. 369

Extract from the Minutes of Consultation under date the 28th March 1855.

(From Board 12th March 1855)

The yeomiah was granted in 1763 to Mahomed Hossain for the performance of religious service at a Mosque in South Arcot. The late incumbent Mohomed Cosman, Nephew to the original grantee, has left no nearer relative than his cousin Shaik Mahedeen, the present applicant, in whose name the yeomiah is recommended to be continued.

2. Shaik Mohedeen has for a length of time performed the prescribed services on behalf of the deceased, who was incapacitated by mental infirmity; and the Right Honorable the Governor in Council grants authority for the yeomiah of Rupees 44-3-10 (Forty four, annas three and pice ten per annum, being continued to the said Shaick Mohedeen in arrear from the 16th August 1854, the date of the late incumbent's death.

Memorandum

Fort St. George 2d April 1855.

No. 8.

Memorandum.

In acknowledgeing receipt of the Acting Collectors Memorandum of the 10th Instant, enclosing copy of Extract from a letter from the Board of Revenue, requesting information on the price of Cattle per head for introduction into other Districts, the Acting Sub-Collector would remark that it is not explicitly stated for what purpose it is proposed to introduce the Cattle of this District into others where the breed is inferior-

If the subject intended is the improvement of the breed, by the introduction of Government Bulls for breeding purposes, such can be obtained in the Northern Talooks of the Division well suited for the purpose, at Rupees 50 or 60 a head, tho' it would not be easy to obtain them beyond the age of 3 or 4 years old, after which time they are either castrated, or cast loose into a Village as a sacred object, which no price would induce the Villagers to part with-

If the cattle are required for ploughing

ploughing, their price in the District at the age of 3 or 4 years ranges on an average of Rupees 30 per head, and great numbers have been sold this season to traders at about that price.-

From the Actg. Collector of Nellore,

Sir,

With reference to the Board's Circular No. 115 dated 15th Januarry last, I have the honor to forward herewith 2 Cnam Statements No. 1 and 2 prepared according to the forms therewith received.-

2. There being a difference between the Statement No. 8 forwarded with the Jummabundy Report of Fusly 1262 and two now submitted, I have thought it advisable to append a third explanatory of the same.-

3. I beg to add that the Cnams in the Choondy Zemindary are neither included in these Statements or in that bearing No. 8 of Fusly 1262. In as much however as they do not seem to have formed part of the assets upon which the permanent Peishcush was calculated, I shall submit a separate Statement of the same at an early date.-

From the Acting Collector of Chingleput. — 8
Forwarding a Statement of Moturpha Tax levied on houses and shops in the principal towns of the District.-

Sir,

Agreeably with the orders conveyed in the Board's Proceedings of the 26th October last, I have the honor to forward a Statement shewing the amount of Moturpha levied on houses and shops in the principal towns of this District. These Taxes cannot be strictly regarded as quit Rent, as they are not regulated by the extent of Ground occupied by the Houses, and Shops, or the value of the Propirty, but by the nature and extent of trades carried on in them.

Should they be devoted to municipal purposes, they would probably be objected to as the payers would complain of being alone obliged to contribute to a tax which benefitted all the inhabitants alike, and the Board will perceive that in some of the Towns the sums would be too small to effect any improvements whatever.-

From the Collector of North Arcot

Para 1

With reference to para 2 of an Extract from the Minutes of Consultation dated 1st April 1854, communicated with the Board's Order dated 3d Idem, I have the honor to report for the information of Government the Completion of the restoration of the Nagapuitta ruined Tank in this District, so far as is estimated for and sanctioned.—

Reporting the completion of the restoration of the Nagapuitta Tank & forwards Statement of the lands proposed to be given in lieu of the Inam and Cuttady under the Tank.

2 The Board are aware that a great portion of the lands under that tank is Enam and Cuttady and that Mr. Bourdillon proposed to submit an application for granting other lands in lieu thereof to the holders. I have now the honor to forward such an application, and to request that the Board will be pleased to obtain the sanction of Government for the same.—

3. The total extent of the Enam and Cuttady lands under the tank is Cawnies 208-14-8.- bearing an assessment of Pagodas 349-7-12, and that of the proposed land to be granted in lieu is Cawnies 391-0-4 bearing the same assessment or Rupees 1223-3-1.—

20 A/c February, 1855.

/ Signed / C. Whittingham

Collector

36·27
B.P.W. 1859

Proceedings thereon

Fort St. George 2d April 1853

Resolved that the letter above recorded be submitted for the consideration and orders of the Right Honorable the Governor in Council.—

2 In Extract Minutes Consultation dated 1st April 1851 in the Public Works Department, Government sanctioned an estimate of Rupees 6,066–6–10 for the repair of this tank, and desired the Board to report the completion of the work, and require the Collector to submit an annual Statement showing, with exactness the increase of Revenue which has resulted from it.—

3 In the report now submitted the Collector points out that he is unable to furnish the Statement called for until the land commanded by the Tank becomes wholly Circar property.—

4 It was shown in Mr. Bourdillon's letter to the Civil Engineer of the 4th Division dated 5th February 1851, that there were 610 Cawnies

From Civil Engineers 7th Division 17th Feby 1851 D.P.W.

Fort St. George 2d April 1853

Cawnies of land susceptible of irrigation by the Tank in eight villages; of which 341 Cawnies only were Circar—The remaining 269 Cawnies consist of Enam and Cuttuddy; but Mr. Bourdillon pointed out that the holders were willing to cultivate them as Circar land, paying the full Terwah on an equivalent quantity of waste Poonjah land being given them instead.—

5 The Statement forwarded with the Collector's letter under consideration, contains the particulars of the land proposed to be thus given in exchange; and although, its extent exceeds the land on which

which is to revert to the —

Circars by 12 Cannies, the —

Assessment is the same, viz.t, —

Rupees 1,223 — 3 — 1. — —

6. The Board therefore

recommend that sanction may

be granted for the proposed —

exchange being carried into

effect. —

From the Collector of South Arcot—

Sir,

With reference to Extract from the Proceedings of the Board of Revenue dated 5th Instant, Containing the Rule to be followed in regard to Charging the assessment on uncultivated portion of fields, I have the honor to Request that you will be so kind as to obtain instructions how I am to act in cases where in fields alone one Cawney in extent the waste portion

is greater than one fourth of the cultivated part but less than one Cawney-

2 In such instances I am in doubt whether it is intended that the Teerwah on the waste equalling one fourth of the extent Cultivated should only be levied or whether the whole should be Charged-

3 It seems to me that it will be best to make the Ryot pay for all that he leaves waste, even when it is more than one fourth of the portion Cultivated, but does not exceed one Cawney-

Reporting upon the Number of Talooks and Hoozoor Officers acquainted with English figures-

Fort St. George

Sir,

I have had the honor to receive an Ecstract from the Board's proceedings dated the 5th instant, Remarking with reference to my letter of the 8th Ultimo Reporting to the Board the number of public Servants acquainted and unacquainted with English figures, that Village Curnums are not required to know or to use English, and directing me to report the number of Talooks and Hoozoor officers respectively acquainted with English figures-

Jw

2. In my letter to which the Board refer, I informed them that village Curnums were not included in the number of public servants on whose acquirements in English I then reported - In Tanjore the village Curnums alone number more than 1,150, which I mentioned that the total number of public servants regarding whom I reported was 812 - In this number were however included the Nat and Statut Nat Curnums, and as their duties required that they should write only on Cadjans, they may be perhaps excluded from the number of those required to acquaint themselves with English - If these servants be deducted, there will remain 68 servants in the Huzzoor, of whom 37 are well, and 25 imperfectly acquainted with English notation, 6 not having been examined in consequence of their absence on leave in the Talooks - There will be 10 well acquainted with English figures,

178

178 imperfectly so, and 99 wholly unacquainted - 15 persons being absent at the time of examination -

Tanjore 15th March 1855 } (Signed) H. Forbes Collector -

3d No. 816 - 46.47

Proceedings thereon - The Board are glad to learn that precise of the Nat and Statut Nat Curnums, 349 Hoozoor and Talook servants out of the 469 in Tanjore have a knowledge, greater or less

lesson of English Numerals,
and they have no doubt that
the Remainder will soon learn
the use of them, if they are
informed that their promo-
tion will depend upon
such acquirement - The Board
agree with the Collector
that the Nat and Malut
Nat Curnums need not be
required at present to acquaint
themselves with English figures,
though they should be encouraged to do

B.R. No 768
From the Collector of Tanjore -- Recommending the introduction of fine Bulls for the improvement of the breed of Cattle

Sir
Para 1. I have had the honor to receive your letter of the 6th instant.
2 There does not appear to me to be any room to doubt that very beneficial results would follow the introduction of fine bulls for the improvement of the breed of Cattle in Tanjore If the Board can obtain sanction for the arrangement, I would recommend that one bull and one male buffalo should be provided for each of the 16 Talooks in the District, and I should very much prefer that they were kept at the public expence for general use, to their being sold to any individual
3. There would be probably no difficulty in obtaining the required number of buffaloes from Canara, but I believe that bulls of Nellore breed are not always to be had in that District In case this supposition should be correct, I take leave to suggest to the Board that enquiry should be made in Cuddapah, in the Northern Talooks

of

Fort St. George 2nd April 1855

of which Province the cattle are remarkably fine breed being, I believe the same as in Nellore, and where, as far south as Cuddapah itself I have frequently seen very handsome bulls ordinarily used for the plough.—

4. With respect to the Board's suggestion that I should write to the Collector of Coimbatore, I do not gather from your letter the terms on which I am authorized to address him, if the Board should allow me to procure a certain number of bulls for breeding purposes, I should probably seek for them in Nellore, Guntoor, Cuddapah, Bellary and Salem, from which latter District, it is within my recollection, that good Cattle were always formerly obtained in Coimbatore, but at present my opinion on the general question only has been asked, and I have received no permission to make any definite arrangement.—

5. The Board may rely on the greatest personal interest being taken in the matter by me, if the present proposal should ever be carried into effect.

Signed H. Forbes
Collector

Order to be submitted to Government

Tanjore — Vellum — 16th March 1855.

Fort St. George 2nd April 1855.

Government with the following letter

To, The Chief Secretary to Government

48-49

Br. No. 808.

To the Chief Secretary to Government

Submitting a letter from the Collector of Tanjore regarding the improvement of the breed of Cattle in that District and recommending that he may be authorized to incur an expenditure of 2,500 rupees in carrying out the design.

Dated 16th March 1855 No. 168 in Cons 2nd April 1855.

Dated 14th March 1855. in Cons 2nd April 1855 No. 734.

Sir,

1. With reference to para 10 of my letter of the 4th January last, I am directed by the Board of Revenue to submit for the consideration and orders of Government the accompanying letter from the Collector of Tanjore regarding the improvement of the breed of Cattle in that District

2. It will be seen that Mr. Forbes anticipates very beneficial results from the introduction of Superior Cattle from other Districts, and recommends that one Bull and one Male Buffalo should be provided for each of the 16 Talooks in the District, and kept at the public expense.—

3. The Board are unable to state what the precise expense of this measure would be; but they learn from the Acting Collector of Nellore that

4999

Fort St. George 2nd April 1855

that bulls of a superior description can be obtained in the Sub Collectorate of that District for 50 or 60 Rupees each at the latter rate 16 Bulls would cost (exclusive of travelling expense) Rupees 960 Judging from this, the experiment would involve little outlay and considering the great importance of the object the Board would strongly recommend that the Collector may be authorized to incur an expenditure not exceeding Rupees 2,500 in carrying out the design; the actual charges being entered under a separate head in his statement of Extra charges incurred without Estimate.-

	Rs.	Rs.
16 Bulls at 60 =	960	
16 Buffaloes at 20 =	960	
		1920
For all other expense		580
		2,500

4. The Board intend that the above sum should cover the purchase and travelling expenses of the Cattle The Collector will be requested to state what will be the monthly charge for their maintenance, and the expenditure also they suggest should be included in the same Statement

5000

Fort St. George 2nd April 1855

5. Some desired to explain that the Board have thought it preferable to solicit sanction at once for the sum which will probably be required for this object, rather than to apply to it any portion of the amount placed at their disposal for the general purposes of the Provincial exhibitions.-

Submits Specimens of work done by the pupils under the instruction of the assistant Collector with Extract from Field books.-

Sir,

1. As contemplated in your Board's letter to Government No. 478 of the 12th October 1854 furnished with Extract from Proceedings dated the 29th January 1855 No. 216, I have the honor to submit Specimens of the work done by the youths who were under instruction in surveying with Mr. H.E. Sullivan, with Extract from the Field

field book of each of the Pupils

2. Beg to inclose for your Boards perusal a letter addressed me by Mr. Sullivan before he left the District, and in which he detailed the number of youths he had entertained, and the amount of instruction he had been able to afford them, as well as the instruments made use of.—

3. I think the progress made is most creditable, and the plotting of their Surveys very neat.—

4 I regret deeply that these youths will not be able to obtain further instructions now, for Mr. Sullivan is transferred as Acting Head Assistant Collector of Malabar and I am at this moment left without any Assistant at all, and have not time to instruct even had I the knowledge to do so, which I do not possess.—

Trichinopoly
Collector's Office
2nd March 1855.

Signed J. Bird
Collector

Enclosure 1 to 14 plans
No. 15.

To, J. Bird Esqre
Sir
1. Collector of Trichinopoly
With reference to the
letter

letter from the Board of Revenue to Government dated 12th October 1854 and Extract Minutes of Consultation under date the 24th idem, I do myself the honor to submit herewith a statement for the pay of four surveying pupils named in the margin at the rate of six Rupees (6-0-) per mensem and for the pay of three at the rate of four Rupees per mensem for the month of February 1855.—

* Appavoo Pillay	
Ramasawmy	
Iyengar	
N. Poomoosawmy	
Veerasawmy Pillay	

In compliance with the instructions contained in Para 2 of the Boards letter to Government, I have the honor to submit specimens of the work done by the surveying pupils under me during the past month. An Extract from the field book, accompanies each plan. These sketches were executed by the pupils without any assistance from me. The instrument employed for taking the angles was the Circumferenter, the use of which as well as of the protractor in plotting the survey afterwards, they seem perfectly to understand.

* Nrugiah	
Madar Singh	
Barn Naidoo	

3. I had intended this month to instruct the pupils in field measurement and by triangulation but owing to

my

Fort St. George 2nd April 1855.

my appointment to the district of Malabar am precluded from doing so.-

4. I have much pleasure in bearing testimony to the aptitude and perseverance of Appavoo Pillay Ramasawmy Syngar, and Ramasawmy Varasawmy only joined the class about a week ago and consequently is not so far advanced as the others. He is however very quick and intelligent and will therefor I doubt not soon equal his Comrades.-

5. The three pupils entertained at the rate of four Rupees a month are employed as staff and chain bearers.-

6. The instruments supplied by the Board have been very little used I consider them too good to be placed in the hands of Ryots and supplied the pupils therefore with some old instruments which I had by me.-

/Signed/ H.C. Sullivan

Trichinopoly
26th February 1855

Para. 1st 818 (50.51)
Proceedings thereon. 1. The Board request that the Collector will place himself in Communication with Captain Priestly Superintendent of the South Arcot Survey who is in want of hands and who may therefore be able to find employment for the youths instructed in Survey.-

2 The must observe however that the plans submitted are merely rude sketches of the most elementary character that they are all of the same two localities- that the field books are not so clear as they ought to be and that their perfect agreement with each other as well as of the plans leads to the suspicion that they have been copied from one another.-

3 As the instruments recently forwarded to Trichinopoly will not be of much use in the absence of an instructor for the pupils and as they are required in Combatore the Board desire that they may be forwarded with the least possible delay to the Collector of Combatore A fresh set will be sent to Trichinopoly.-

To

Fort St. George 2d April 1855.

No. 223.

To,
H. Cunliffe Esqre
Acting Secretary to the
Board of Revenue.
Fort St. George.

(52)
B. No. 97.

From the Collector of Madura-

Reports on the Settlement of Land Revenue for Fusly 1263 in the Districts of Madura and Dindigul.-

Sir,

Para 1. I have the honor to report the result of the Settlement of Land Revenue for Fusly 1263. 1853/54. and to forward accounts in the Forms prescribed by the Board's letter of the 13th June 1853, together with the Report of Mr. T. Clarke, the Sub Collector, on the Settlement of his Division.-

2. In consequence of the Circular order of the 3d October 1853, requiring the Collector to make the Settlement of the Sub Collector's Talooks once in 5 years.- I this year exchanged with Mr. Clarke Meylone, for Nellacottah and the Jummabundy of the remaining Talooks of the Principal Division, Madacolum Teroomur-galum and Thenkurray was also made by me.- The Villages in which the operation was conducted and the Puttahs distributed being

succinctly

succinctly and clearly shewn by Statement No. 4
I do not embody them in this Report.

3. I was accompanied by my Dresser who exerted himself to my satisfac-tion in vaccinating and affording Medicial afsistance to the sick. When at Madura, he vaccinated a considerable number of Children every week besides having charge of the Sepoys of the Detachment.

4. I subjoin a comparative Abstract of Villages and Hamlets in the Principal Division, shewing an increase in the latter of 10, Viz: 9 in the Govern-ment Villages and 1 in the Zemindaries. Of the former 6 were in the Talook of Theroonmygalum; 1 in the Meylore, and 2 in Thenkurray. Four were formed in consequence of want of space in the Villages for the increased Population, Four for convenience of cultivation; and

one was created by Ryots emigrating from the Tavarum Zemindary in consequence of disagreement with the Proprietor.

Fort St. George 2d April 1855.

5. With reference to the Quinquennial Statement No. 3, forwarded with my Report on the Settlement of Fusly 1262, I annexe an Abstract of the nature and extent of the sources of irrigation.—

	Repaired by Government.	Repaired by Ryots.
Tanks	2846	5325.
River Channels	523	512.
Spring Channels	21	2.
Anicuts	191	182.
Wells	23	19438.

6 The Tanks repaired by the Ryots are generally very small Ponds, called yendels and Oorneys, either used for drinking water only, or irrigating an insignificant extent of Cultivation.—

7. Garden Cultivation does not prevail to any considerable extent in the Principal Division, nevertheless the late exemption of land under new wells from extra tax appears to have given a considerable

Fort St. George 2d April 1855.

stimulus to their construction, as in the Principal Division 73 were dug in the Fusly under Report to 18 in Fusly 1262.— In the Sub Division, where there is largest Cultivation under wells the Numbers were 60 in Fusly 1262 and no less than 240 in Fusly 1263.—

8. The general statistics of the District are exhibited in enclosures A and B. in Statement No. 2, and I note marginally the Increase and Decrease in the chief Items. The Decrease in Ryots is consequent on some of the holdings being left waste from the adversity of the season.

Items.	Net Increase.	Net Decrease.
Roughs	195 1/2	"
Resident Ryots	"	610
Non resident Ryots	"	406.

9. I make no remark on the Rent Roll as it is a Quinquennial Statement.—

10. I gather from general report that the season in Madura was more favorable than in many other Districts, but it was far from being a great one absolutely. It was a season of great vicissitudes. In April and May 1853, when it commenced, an adequate supply of rain for

for the time of year fell in the Sub Division and somewhat less in that under the Collector, but in June and July, when an abundant supply was due from the S. W. Monsoon, there was scarcely a single shower - In August the year mended in the majority of the Talook, and both September and October were favorable, but the falls in November were unusually small and the last shower in the year occurred on the 17th November - The draught continued with very little interruption till all the Crops were removed from the ground. It was by great exertion on the part of the Ryots and care on that of the public servants in the distribution of water that the wet crops were for the most part saved -

11. Under these circumstances, it was a matter of surprize to me that the outturn to the Ryots and the Government proved so good as it was - The breadth of Punjah land sown during the year was greater than in the year preceding, but a smaller extent yielded a second

second crop and there was a Decrease in Poonjah cultivation owing to want of rain in the proper season - The crops were generally below the average; but owing to the great demand from other Districts and the high price consequent thereon, I have reason to suppose that it was a gainful year to the generality of the Ryots in the Talooks settled by myself - In those in which the Summabundy was conducted by the Sub Collector the season seems to have been more adverse, and he considers that the Ryots suffered loss - The Government Revenue rose above 19 Lacs, being the highest on record with the exception of that of the Fasly preceding of which it fell short by Rupees 36,411-6-6 and it was collected with unusual punctuality - The export of rice and grain to other Districts partly derived from old stores, particularly to Tinnevelly, was exceedingly great - During the Summabundy I heard no complaints of distress - On the contrary, a general feeling of contentment seemed to possess the Ryots, which was

materially

Fort St. George 2d. April 1855.

materially increased by the intelligence I had to give them of the liberal concessions made as regards new Wells and Vampyre - The long drought produced a good deal of fever - In the Hill Villages of the lower ranges and the lower part of the Cumbum Valley it prevailed so much that I was prevented from carrying my Cutcherry there - There was also some Cholera and considerable sickness among Cattle which also suffered much from want of forage -

12 - The Prices of Rice and grain were, as before remarked, very high - I subjoin an Abstract of those which prevailed at Madura Town - They are the wholesale prices at which the Merchants purchased from the Ryots -

14 In the Dittum there was a De-
:crease of land bearing an assessment of
55,709-4-6 consequent on the failure of rain
in the early part of the season. The Dittum
can scarcely be said to have been intro-
:duced before Fusly 1257, and the Ryots still
regard it with suspicion, notwithstand-
:ing the very liberal remission they
receive for Caboolyet waste, on proof
of any real cause for non-cultivation.
Their engagements therefore vary much
according to the appearance of the
season. They know well that if any
favorable change should enable them
to cultivate more, the land will not
be wanting. Any of their usual fields
for which in any particular year they may omit
to engage, would rarely be taken by other Ryots,
so strong a feeling of private property exists
in this District and so much uncertainty
as to the respect which the Civil Courts
might pay to the Hookoomnamah.

15 Of 416,447-13¾ Cawnies at entered in the
Dittum the extent left uncultivated was
22,348-14½ Cawns as bearing an assessment of
56,973--11- This is very considerably below
the Cabooleaty Bunjer of Fusly 1262
which

which was 34,120 Cawns assessed at 91,317 Rs the cause
being the great Decrease in the Dittum.
The remission for Cabooleaty waste was
55,503-15-9 or 29,814-15-10 less than in Fusly
1262.-

16 The actual cultivation amounted to
394,098 Cawns being only 5,482 Cawns below Fusly 1262+
which was 399,580- If the Board will com-
:pare the state of the season in Fusly 1262
with that of the year under Report, they
will be satisfied, I think, that the result
exhibits a willingness and ability on the
part of the Ryots to avail themselves to the
utmost of the opportunities of Cultivation.
They must necessarily apportion their
lands for different crops, and if rain fails
at the particular time, for putting in that
crop the land must often lie waste
notwithstanding a large supply in other
portions of the year, for example, in Fusly
1263 Grain Cultivation was almost
precluded by want of rain in the
latter half of November and December,
and I have already remarked that while
there was increase in land cultivated
with one Crop Nunjah, the extent
which bore 2 Crops was much di-
:minished.

17 Under the above circum-
:stances, we felt justified in remit-
:ting all the Bunjer except an extent
assessed

State No. 11

assessed at Rupees 1,361-11-7 of which Rupees 975-14-8 belonged to Ponjah and Garden and Rupees 385-12-4 to Nunjah.

18 I proceed to notice the remissions on the Cultivation.

No. 3
Increase 1,300-6-8
Pot Div. 5,085-7-9
Sub Div. 5293-12-5

The remission on account of unthered crops amounted to 19,359-4-2 and the Talookwar detail will be found in Statement No. 18. It will be seen, that as might be expected from the circumstance of the cessation of rain in the middle of November, it was required in every Talook. Contrary to what usually happens the Talooks near the Palney Hills received least rain, and the freshes in the Vigay River were very deficient. The rules regarding the examination of Wet crops were carefully observed.

No. 4
Pauny Bordity
Increase 215-14-6

19 The Increase under this Head occurred in the Meyfore Talook, where owing to want of rain previous to October cultivation was carried on to a greater extent than usual in many Tank beds which was inundated in consequence of the heavy rain in October and November.

No. 5
Decrease 26-14-1

20. This trifling decrease calls for no remarks.

As

No. 6
Rhoganusty
Decrease 1328-7-11

21. As the entry of Double Crop Nunjah in the Accounts of this District was discontinued in the present year under the authority given in Board's Proceedings of the 11th May 1854 there is no remission under this head.

No. 9.
Nautungal
Decrease 5-15-7

22 Under the Board's instructions of the 3d March 1853 the lands used as seed beds were not carried to account in the year under review and consequently there was no occasion for remission on that account.

No. 11
Remission of Teerwah on Cotton grown on last year's Stubble.
Increase 80-1-9.

23 The Increase was caused by the exaction of a smaller proportion of the full tax on this Stubble than in the preceding year in consideration of the general bad outturn of the crop.

No. 14
Remission of Tax on Garden Cultivated with one Crop
Increase 53-11-10

24 This increase is explained in Para 47 of the report of the Sub Collector in whose Division the remission was granted.

No. 15
Remission of tax for Ponjah Crops unthered
Increase 31-7-6

25 This remission was granted by the Sub-Collector to the Hill Ryots and sanctioned by the Board in their Proceedings of the 7th September 1854.

No. 25.
Damustanum Remission

26. The Report called for in Para 28 of the Board's Proceedings of the 4th August 1853 will be forwarded separately.

The

No 26
Teerwah Cammee
Decrease 1595-0-1

27 The decrease arises from the smaller extent of cultivation of inferior description of produce or high classed lands as compared with last year.

No 27
Difference between former and present assessment of land cultivated with Sugar Cane.

28 The practice adverted to in Para 25 of my Report on the Settlement of Fusly 1262, of entering Fyzul Sugar Cane Teerwah for 80 classed lands and Teerwah Jastee at 80 per Cent for Nunjah lands in the Dindigul Division in the Caboolliat and of afterwards deducting the difference between the Sugar Cane and Nunjah tax, has been abandoned in the year under report. The Board is aware that Sugar Cane cultivation is almost entirely confined to the Dindigul Division.

No 28
Pay of Sibbendies and Puliney Hill Village Servants
Decrease 31-11-8

29 In consequence of the scanty harvest in the Sittanaindel &c^{a} Villages, settled under Amanee, no extra Sibbendies were employed to Superintend it as in last year.

30 Subjoined is a Statement of the Sugar Cane, Cotton and Indigo cultivations in Fusly 1263, compared with the year preceding.

Permanently settled
Total
Fusly 1262
Increase
Decrease

31 The Decrease in Cotton occurred chiefly in Ramnad and Shevagungah, and is not great considering the circumstances of the season. The falls of rain were very partial; for while in Ramnad there was a failure of Cultivation and disease in the pod from want of rain, the Cotton sown in Tiroonmungalum suffered from excess. In fact it was a year in which rain was very unequally distributed both as to time and place. The crop was not a good one either as regards quantity or quality.

32 In the Principal Division it was estimated as 1/4th and from the remarks of the Sub Collector it would seem that in Iyempully the Talook in which the greater part of the Cotton of this Division was produced the Estimate was not higher; but I agree with him in opinion that the failure was exaggerated. The Price was nearly the same as in Fusly 1262. In Theroomungalum, the chief Cotton producing Government Talook, the demand was not great and a stock remains in hand, but in Ramnad the whole

whole Crop was sold.

Sewoy Jummah

33 The Demand, arrears and current on account of Sewoy Jumma is shewn by Statement No 24 to have been Rupees 7,327-9-3, of which the total Collections up to the end of November last amounted to Rs 6890-7-9 leaving a Balance of 437-1-6. Of this sum 58-2-6 has been remitted by the order of Government dated the 6th November last, received subsequently to the preparation of the Statement and 233-8-3 appear to be recoverable. The Balance 145-6-9 I beg to recommend for remission. The particulars are given in the column of Remarks in the Statement.

Ready Money Collections

34 These Collections will be found in the abstract Statement appended to Para 13.

35 The Board's Form contains a Heading for the Revenue of Hill Villages, but in this District, their extent being large and their settlement conducted on the same principles as that of the Villages on the Plains they are included with them in the Jyen Revenue.

I Sorts of Enam Land Inde 14-13-4
Dy of Dumastumum Enam Land Decrease 222-14-1
Cauelly Cundayem Increase 3-14-4
Tofadayem Decrease 284-5-8.

36 These Revenues depend on the exclent cultivated.

37. This net Decrease arises from lower biddings in the auction for the Topes in the

Pasture land
Decrease 3991. 2. 2

the Sub Division

38 This Item is explained in the Sub Collectors Report Paras 61 and 62. The exaction of 5 per cent indiscriminately on the Puttah of each Ryot was directly opposed to the orders of Government and the Rules laid down by me for carrying them out and appears to have arisen from the circumstance of 1/4 of the Tax on land equal to 1/5th of a Puttah which is authorized being 5 per Cent on the aggregate of the Puttah and to the adoption of the 5 per Cent. therefore as a compendious mode of calculation without proper care in its application. Two years ago I perceived that the Tax was not properly applied, and therefore, as the Taluk is too remote from Madura to be taken under the immediate charge of the Collector whose duties lie so much at the head station, I requested and obtained the sanction of the Board to place it under the care of the Sub Collector. This was explained in my report of last year. Mr. Clarke, it will be observed, promises an early report.

Honey & Bee wax Rent
Decrease 275-11-5

39 The Collection of this rent was discontinued in the year under report under the orders of the Board dated the 25th July 1853.

Malavary.

40. On the 29th September 1854, I recommended that this Tax which exists only in Settanaindel Vca in Ramnad should be abolished. Its amount varied with the cultivation.

41 I annex an abstract Statement shewing the general result in comparison with the preceding year.

	1,86,374 5 5	1,85,103 15 8	1,270 13 11
			652 1 10

Allowances deducted by the Collector in Remands — 2,13 4 4 — 794 10 2 — 1,319 4 2 — - - -

Total — 1,31,118 3 9 — 1,25,898 9 10 — 1,193 7 1 — 652 1 10

Remainder — 33,99,133 15 7 — 33,14,999 15 6 — 7,715 6 5 — - - -

Grand total — 1,91,488 3 6 — 1,78,898 13 2 — 8,557 4 6 — 652 1 10

44 I make no recommendation for remission of the Current Balance but I beg to explain that of the sum at Standing against Mudacolum Rupees 58.0.6 have been since collected, Rupees 171-7-2 due by one Village the recovery of which I suspended temporarily in consideration of bad Crops will be realized according to agreement by the end of January as well as 20-8-3 in other villages. For the remainder 18-11-4 I have sequestered property because the Puttadars, tho' they have made over the land to other Ryots will not relinquish their Puttahs without which the cultivating Ryots decline payment direct to Government. Sequency in this case would obviously be misplaced.

45 The Meylore Balance 87-8-1 consists of 2 Items one of 39-2-11 due by one individual of in a respectable Station of life whose property has been attached and the remainder by Ryots who allege mis-entry by the Curnum a matter which is under enquiry.

46 The Balance in the Sub Division

Division is explained by the Sub Collector.

47 I annex a Statement of Balances for Fuslies previous to the one under review.

Fusly	Recoverable		Doubtful		Irrecoverable	
	Rs	a p	Rs	a p	Rs	a p
Zemindary						
1237	3,948	7 9	"	" "	"	" "
Ayen						
1259	4	5 9	"	" "	1	1 4
1260	55	9 3	"	" "	7	13 2
1261	191	15 7	29	11 6	11	10 11
1262	285	11 7	20	7 6	92	13 1
Total	667	13 2	70	6 "	116	9 6

48 The only Zemindary Balance will be collected at 1,500 Rupees per annum according to the Sanction conveyed in the Board's Proceedings of the 2d September 1850.

49 The Ayen Balance to the end of October 1853 was Rupees 506-8-1 Of this if the sum of Rs a p 21-11-10 Sanctioned

sanctioned to be written off by Government under date the 6th November 1854, and Rupees 179-13-9 the subsequent collections to the end of November 1854 be deducted the Balance for Fushes previous to 1262 will be reduced to Rs 305-9-6

To this the Balance of Fusly 1262 being added the total amounts to Rs 854-12-8 as above particularized.

50 Coercive process was exercised in the realization of the Government Revenue in the Fusly under review to the following extent in the Principal Division, Rupees 2-14-10 were collected by the sale of a Bullock of a dismissed Natamgar in part payment of the Revenue embezzled by him in Fusly 1260. Grain belonging to one individual was sold in liquidation of a Balance as follows.

	Rs	a	p
Fusly 1262	172	9	8
" 1263	20	15	9
	193	8	9

51 This defaulter was in a respectable station of life, but notorious for bad conduct and extravagance and is now in Jail for debt.

Personal property

52 was also sold for realization of a Balance, of Rs 19-"-6 due by a man who refused to relinquish land which he was unable to cultivate but entered into a written engagement to pay for whether tilled or otherwise.

The Revenue was

53 collected in the Sale Division without sale of property.

I beg to solicit

54 sanction for writing off Rs 110-9-6 classed above as Irrecoverable and here-under particularly explained.

The Balance remaining	"	"	"	8	13	3	13	2	5	21	15	8	

is irrecoverable being the amount of over charges on Lands occupied by two classes leaving 15 Fs on Lands entirely Lands found deficient in measurement, Lands found cultivated in measurement below 10 per Cent but erroneously charged and no Trees in the Lands Ryots Chuttrum.

The

56 The Doubtful Balance is due on account of lands connected with Boundary disputes, chiefly with Tin-nevelly which are in point of being disposed of.

57 Out of the Balances, classed as Recoverable Rs 107-3-3. outstands against the Village of Ungadymungalam in the Mey-=lore Talook.

58 The Puttadars being either deserted, dead or very poor; and the Crops in Fusley 1262 paid 1263 having turned out unfavorably. I should under general cir-=cumstances have recommended it for remission, but on enquiry I find that the land is in the hands of mortgagees. The effect therefore of excusing the arrear would be to keep in an indigent or even a non-existent Ryot as Puttadar screened by whom the actual cultivator, the mortgagee would have an opportunity or at least a chance of enjoying the produce and allowing the Gover-=ment tax to fall into arrear. To obviate such evasions it is my constant endeavour to keep Puttahs in the names of the parties who really have the usufruct of the land, that is who are either the actual cultivators or Landlords of the cul-=tivators, and with the same view I would

would propose to sell the lands in question for the arrear, when it may be expected that they will pass from the hands of men of Straw to those able to pay the Government dues and do justice to them.

59 Of the remainder the greater portion is due by Ryots whose property is under Sequestration by the Civil Courts who will pay the Government when they sell. No difficulty is apprehended in the speedy collection of the remainder.

60 It will appear from Statement N-25 in the packet that the Balance of Rupees 346-10-8- being advance on account of fire will be recovered in Fusly 1264- No advance was made in the year under reference.

61 Appended is a Statement of charges with explanation of Increase and Decrease in the Column of Remarks- with reference to the remarks in Para 15 of the minutes of Consultation of Government dated 6th November last, I beg to explain that the Board in stating the Extra charges of 1262 have entered the Sibbendy &c charges of Sayer, Sea Custom, Salt and Stamp Com-=mission, amounting to Rs 16,792-13-11 twice over and included the price paid to the Manu-=facturers for Salt amounting to Rs 24667-14-7- Particulars

5039

Fort St George 2d April 1855

62 On the subject of the balance against a Ryot for land on which an assessment higher than that levied for several years past was entered in account on the report of the Moozoomdar, which is adverted to in Para 9 of the Board's Proceedings of the 11th December 1851, I beg to refer them to Para 69 of the Sub Collector's report now forwarded, from which it will be perceived that the Sub Collector has fully enquired into their case and has ascertained that a fraud has been committed and that the proper assessment of the land was that stated by the Moozoomdar which he had accordingly ordered to be collected. No new Tope therefore has been supposed but the old one restored, and I am not aware that in any instance any arbitrary alteration of the Demand has taken place on the report of a Moozoomdar in the Madura District.

63 In explanation of the difference in the name of the Zemindar of Cunnewady as shewn in the accounts of Fusley 1261 & 1262 I have to state that Cumara Narrasumma appeah Naick / not Cumara Singh appeah Naick / died in the course of Fusly 1261 and was succeeded by his son Bungaroo appeah Naick.

To B.O. 3d Dec.r/51
From Do. 15th Do.

64 As the Board's list of Subjects for report dated 14th September 1854 does not contain the Item of new Topes, I have abstained from stating the number of those planted in the present year but I may here mention that it was very considerable.

65 Annexed is a Statement of Loans acquired by Public Servants. Names

5040

Fort St. George

2d April 1855

Names of Revenue Servants	Office	Land acquired: Extent	Land acquired: assessment	When acquired and whether prior or subsequent to Employment in the Public Service	By what means acquired	Nature of Interest possessed by such Servant in such landed property	Remarks
		Cawnes	Rs a P				
Venkatasawmy Naick	Hurgoor Moneshee	9 3/4	111	Subsequent to Employment in the Public Service	Purchase	Coodywaram or Cultivators Share	Purchased on the 5th January 1854 for planting a Tope agreeably to the Rules in the Rawtapollam Village in Madacolum Talook.
Soobiah	Talukdar of Madacolum Talook	2 3/2	1945	Do	Do	Do.	Purchased on the 28th September 1853 in the name of Datta Gopaliah Son and his Brother Narasiah in the Heelamungalum Village in Shenkurray Talook.
Rama Row	Do. of Tirumungalum Do.	42 2/4	298 "	Do	Do	Coodywaram & Mailwarium	Purchased on the 5th September 1825 being half of the Kolcryen Dhurmasanam Village of areed in the Amaravaty Talook in Shevagungah. The lands have been under attachment since the Estate came under the Court of Wards and Ram Row in Explanation of his not having reported the Purchase in 1852 when a General return was made to the Board states that in consequence of this circumstance and of the Deeds being with his Father then Head Seristadar at Trichinopoly the property escaped his memory on assertion which the Collector believes as his Father must be the real owner.

I do hereby certify that the Rules prohibiting the acquisition of landed property by revenue and Police Servants without permission have been duly enforced.

(Signed) R. D. Parker

Collector

66 As regards the sub collector Mr Clarke I have to express as usual my conviction that his administration of the Sub Division is every thing that can be desired for the advancement of the interest both of Government and the Ryots His merits are beyond any praise of mine, and have been fully recognized by the Board and Government.

67 I have also the pleasure to report most favorably of my junior Assistant Mr Norman who since he has been in this District has continued without intermission the studies in which he distinguished himself so greatly in college; and at the same time rendered me most effectual assistance in the Police of the Ayen

Ayen Talooks under the collector I may say without hesitation that in zeal and industry he cannot be surpassed while the profession by him of considerable ability is satisfactorily evidenced by his superior acquaintance with the Tamil language and the extensive knowledge he has acquired of his duty in a short time Of his judgment it is too early to form an opinion.

68 Mr Cockerell was absent on sick certificate during the greater part of the Fasly

My head Serista.

69 has continues to merit my approbation by the same integrity which I have remarked in

Fort St. George 2d April 1855

in former reports but I do not claim for him superior ability or power of despatch.

70 The Board will observe with regret that the Sub Collector is compelled to withhold the praise he formerly bestowed on his Sheristadar I have endeavored to persuade this old and once able servant that he will best consult his own reputation and comfort as well as the public good by applying for a Pension, and I would submit to the Board the great injury which Districts suffer, and the hardship imposed on the responsible European Officers by native servants remaining on the active Establishment

Fort St. George 2d April 1855.

Establishment when disabled for efficient service - If it is imperatively necessary to prevent the grant of superannuation pensions on insufficient grounds, it is equally essential to the public interest that men should not hold Office after they have ceased to possess the strength to fulfil its duties.

I Signed I R. D. Parker

Madura, 30th December 1854

Particulars of Gross Increase (Contd)
Increase of assessment

Items	Land		Cowries	as
	1	2		
1 One Crop land cultivated with 2 Crop			"	"
2 Joonjah cultivated with	Nunjah		"	"
	Garden		"	"
3 Cowle land transferred to the Head	Land paying full assessment		"	"
4 Increase of assessment on Lands	taken on progressive Cowles		"	"
5 Joonjah Cultivation irrigated			"	"
6 Land improperly reduced	Raised to its proper class		"	"
7 Co-day Garden cultivated with Tobacco			"	"
8 Do Do cultivated with wet			"	"
9 Do Do cultivated with Betel			"	"
10 One crop wet cultivated as such for the 1st with tender Plantain for 2nd Crop			"	"
11 Do Do Do cultivated with Nunjah Garden			"	"
12 Do Do Do cultivated with Nunjah mail Joonjah			"	"
13 One Crop Nunjah mail Joonjah cultivated with wet		two Crops	"	"
14 Do Do Do cultivated with tender plantain			"	"
15 Do Do Do cultivated with Nunjah Garden or Chillies			"	"
16 Do Do Do cultivated with tender betel Garden			"	"
17 Tender plantain Garden growing into mature plantain		Garden	"	"
18 Plantain Garden cultivated with Betel Garden			"	"
19 Tender Betel Garden growing into mature Betel Garden			"	"
20 Do Do Do cultivated with 2 Crop wet			"	"
21 Dill and wheat raised on land cultivated with ragy		in Fusly 1262	"	"
22 Paddy raised on Dry land without Government water			"	"
23 Decrease in Remissions			"	"
Total increase of assessment			"	"
Total Gross Increase			47981	2½

No 149 ::

To R D Parker Esqr

Collector of Madura

Sir,

I have the honor, in for-
-warding the annual Settlement accounts
drawn up according to the new forms enclo-
-sed with the Board's letter of 13th June 1853,
to submit the Customary report in the order re-
-quired by the Board's Circular of the 14th
September 1854, on the 4 Talooks forming the
Sub Division.-

2 In the present year, in ac-
-cordance with the Circular order of the 3rd
October 1853, you were pleased to undertake
the Settlement of the Talooks of Nellacottai
in lieu of the Talooks of Malloor assigned
to me, but feeling doubtful whether it was
intended that I should report on a Talook
in the Principal Division, I have confined
myself to the Talooks forming the Sub Collectors
charge.-

Paras 3 and 4 Villages at which the Settlement was made.

3 The subjoined Statement shews
the Villages at which the settlement of the Sub
Division was made, the number of Villages present
at each halting place, and the dates on which
their Settlements were concluded.-

care

5118

Fort St George 2nd April 1855

4 Care was taken in vaccinating the Villagers at which to match the settlement to avoid those in whose water and the necessaries of life were scarce, where any epidemic was prevailing, no where ample accommodation could be found for the numbers assembled. - Three cautions were rendered necessary by the Season of the year from the state of the market and from the general dearness of some parts of provisions. -

5 The Vaccinators Cutcherry attended the Sub Collectors Cutcherry at on every except where it might be detained for any length of period no one failed. The number of cases vaccinated in my presence by the Vaccinators and the Sub Collectors Brefter are given below. - Under addition to the vaccination, the 2nd Brefter has afforded much valuable assistance in attending the sick, who are always in writed, and who come in large numbers to seek Medical advice from him. -

of

Fort St George 2nd April 1855

7 Of these, 302 Villages and 1616 hamlets are under the immediate control of Government Officers, and 180 Villages and 738 hamlets are under Zemindars. Of the Circar villages, 1 Village and 3 hamlets are held in Shrotriem tenure and 22 Villages and 40 hamlets are under the charge of the Pagoda Fee Trustees. In all the 506 Villages and their dependencies the Ryotwary System prevails.

8 One Village omitted last year in the list of the Mittah of Rettiembady has this year been brought to account.

9 The 12 new hamlets have been made by 107 families occupying 117 houses. 6 of these have been erected in Jadi-combo. 3 in Iyempully, 1 in Nellacottah and 2 in Ramgherry. 3 of the hamlets in Jadecombo have been raised by emigrants from a Village subjected to frequent visits of a deadly fever. the rest by parties wishing to be near their cultivation or by emigrants from other parts of the country and new Cultivators. These hamlets may be generally received as an index of increasing prosperity among the peoples.

10 The nature and extent of the principal sources of irrigation are shewn in the following Statement.

Para 10 to 12 nature and extent of the principal sources of irrigation.

Artificial Sources of Irrigation

× Out of order - - - - - - - - - 2554

11 Of the 11 Tanks entered in the Column of increase, 4 are new ones and 2 were small ponds enlarged into Tanks. The expense incurred in forming these Tanks is given at Rupees 193, and the area of land brought by them into Nunjah cultivation this year is 2 11/16 Cawnies assessed at Rupees 13-4-2. It is expected that next year a large quantity of land will be cultivated by the means of these reservoirs. The other 5 were made in former years, but had been omitted from the accounts. The small ponds which shew an increase of 12 in the year are the fruits of charity, and are used for cattle and supplying drinking water.

12 Pains have been taken to obtain

obtain correct returns of all the wells in the Sub Division, and of the purposes for which they are used. The result is shewn in the subjoined Statement. It is satisfactory to see that the cultivators are not backward in taking advantage of the benefits held out to them under the Circular of 25th November 1852 - already 300 new wells have been dug, of which 240 have been excavated this year. The alleged cost of these 240 wells and the quantity of land cultivated by them with Tottam this year are shewn below.

Fort St. George 2d April 1855

Paras 13 to 15 General state of the agricultural & pastoral stock & Plantations number of Ryots & Farmers

14 The increase in agricultural stock notwithstanding the unfavorable character of the latter part of the season for rearing Cattle is satisfactory as affording an additional instance of the growing prosperity and well doing of the people in the Sub-Division - The marked increase in ploughing Cattle is found in Ayempully, while the largest number of trading Cattle is found in Rangerry and Ayempully -

Ploughs 6691 - Cattle 56454 -

15 I was led to enquire into the Reasons of so many Cattle being

Fort St. George 2d April 1855

being reared in Rangerry and was informed that the land was generally so poor and stony that unless it received high manuring it scarcely secures any return to the Cultivator, and that therefore it becomes necessary for every great Cultivator to maintain large herds of Cattle - It is however known that numbers are annually being driven to the great Chittirai feasts in Madura, where these animals are sought after by the Trimungalam and Trinevelly Ryots on account of their hardy enduring powers - and strong hoofs - some are also exported to Ceylon -

From

Paras 16-18 Rent Roll

17 From the Abstract of the Rent Roll it will be seen that though there has been an increase of 595 Puttahs over the number issued last year there has been a smaller quantity of Rent Received - The increase of small holdings paid for pie per great measure from the division of property there are too speculators who take advantage of favorable seasons (such as the Commencement of the one under review happened to be in parts of the District) to cultivate small patches of land either entirely or partly with the aid of those Ryots, who in Return for labor, allow them the use of their ploughs and Cattle. It is more than doubtful whether such speculation adds any thing to the wealth of a Country, while it may tend to hamper and depreciate the labor of the more wealthy Ryots, but it is too extensive and delicate a subject here to treat, of the best means of turning the labor of such persons to the most profitable account to the rest of the Community - Much honour,

of

Remainder —				848	12	7

of the decrease in the holding of the Ryots this year is only accidental, arising from the remissions on account of withered produce. The decrease in the largest Puttah held by Coolanas Raiets of Nelliarpatty was owing to the last cause as shewn in the Margin -

18 In the Sub-Division the Puttahs below 100 Rupees bear to those above that amount the proportion of 124 to 1, while those under 10 Rupees are more than ½ half of the whole amount - From the result of the enquiries I have made, I do not think a Ryots Puttah is a safe criterion of the wealth he may possess, though the very disproportionate number of small holdings viewed in connexion with the large extent of waste land may indicate the want of some revision in the assessment in order to render land a more valuable and desirable property -

Paras 19-22 Season and general state of the Crops

19 The season promised fairly at its Commencement both for Poonjai and Nunjai Cultivation - Towards the close of April and in May an unusual quantity of rain fell, especially in Tadicomboo and Nellacottah

Pallacottah Taloork, which induced the Ryots to cultivate Punjai Hardy Crops and to prepare a great breadth of land for Poonjai the entire failure of rain in June and July greatly affected the early Punjai which was in many places parched for want of water, and the general outturn was below average. Towards the end of August, the latter end of the Season for Poonjai Sowing the S. W. Monsoon set in very favorably and we experienced thro' this Month and September seasonable, though partial falls of rain. From the Middle of October to the early part of November the rains of the Northern East Monsoon were abundant, and the tanks and Channels generally very well supplied. This led to large quantities of Punjai land being Cultivated, but the Consequence of an almost entire failure of the Monsoon from that date till April was, that the pulse Crops were greatly injured and the wet Crops

Suffered

suffered very much, in many places where the sowing took place late they were quite destroyed and Many re-sowings became necessary. In april 1845 there were good falls of rain in Ayen-pully and Pallacottah and the Cultivators were encouraged to sow largely of oil Seeds and Cholum, but very much of this Crop also failed for want of subsequent Rains.

20 The annexed Table gives the Return of the Rain Gauges in the 4 Taloorks during the harvest years of 1262. The very small quantity of rain which fell in Ayempully, Compared with the other 3 Taloorks cannot fail to strike attention, and it will be seen from the Tabular Returns given hereafter that the loss in the Taloork both to the Government and the Ryots has been proportionally larger than in the other 3 Taloorks.

21 The season has been far from healthy, fevers of a dangerous and severe type have depopulated parts of the Division and the people have also been sorely visited with small pox and cholera. The cattle have been generally healthy, though they have lately suffered much from want of pasture.

22. The natural effect of the season on the markets has been a great and increasing rise in the price of grain especially during the latter part of the season, but I fear this has hardly compensated many of the ryots for the heavy losses they have sustained in produce and where the quantity of grain reaped has not sufficed for the consumption of their families – the enhanced price has only aggravated the evils they have been suffering under.

Prices of Grain.

23. The price of paddy during the year, compared with the commutation rates, is shewn in the Statement A, and the average selling price of all grains compared with their selling prices during the last 5 years is given in Statement B.

Bittum and Rabbodally waste.

24 As was to be expected from the State of the season at its commencement, the extent of land taken up for cultivation was large— The engagements of the year embraced cawnies 165— 685— 15/4 assessed at Rupees 4,38,380— 6— 4 being Cawnies 6,311 9/4 assessed at 11,633—7— 6 more than in the preceding year, when the engagements only amounted to Cawnies 159,374— 6 assessed at 4,26,746— 14— 10— The extent of lands so taken up was however more than the

the nature of the season permitted the Ryot to bring under cultivation and consequently we have 164.24— 7 Cawnies assessed at Rupees 34,213— 13— 5 left waste as shewn in detail below, being Cawnies 4,016— 13 assessed at Rupees 3,668— 12— 10 in excess of the quantity left waste during Fusly 1262.—

5142 Fort St. George 2nd April 1855

But, if there was an increase in Dittum waste there was likewise an increase in the total breadth of land brought under cultivation.

26. The cultivated land this year amounted to Cawnies 149.611 – 5 – " assessed at a tax of Rupees 4.04.830 – 10 – 9 being Cawnies 17.33 – 3/4 assessed at Rupees 6892 – 5 – 11 more than last year. In Tadicomboo Talook there was an increase of Cawnies 1282 – 3/4 and of Rupees 7179 – 5 – 1 and in Ramagherry an increase of Cawnies 585 – 3/4 and of Rupees 2,936 – 1 – 4.

In Ayempully there was a decrease of Cawnies 41 – 1 and of Rupees 2,562 – 10 – 1 and in Nellacottah a decrease of Cawnies 92 – 13¼ and of Rupees 666 – 6 – 5.

Para 27-31 Actual cultivation.

27. The whole amount of land in the Sub Division, the quantity that is fit for cultivation, with the area brought under cultivation during the last year, the average rate of assessment per cawny on the different classes of cultivated land, together with the proportion the cultivated land bears to the waste, and the average net assessment on the lands remaining waste are given below.

576,832 1 6	1 12 6¾	30,110	4 15½	13 7 1	31 10½

28. This Table shews that only about 38 1/4 per Cent of the cultivated land in the Taloork of Tadicomboo is cultivated, while 61 3/4 per Cent is waste; in Ayempully 26 1/4 is Cultivated and 73 3/4 is waste, in Nellacottah nearly 32 is waste.

29. Comparing the cultivation with the number of Ryots it gives Cawnies 4-10 3/4 assessed at Rupees 12-10-10 to each ryot in Tadicomboo, Cawnies 5-6 3/4 assessed at Rupees 17-1-5 to each ryot in Ayempully, Cawnies 3-6 3/4 assessed at Rupees 11-5-5 to each ryot in Nellacottah and Cawnies 6-6 1/2 assessed at Rupees 12-9-10 in Ramgherry.

30. This however includes all the lands highly as well as those lightly assessed from Betel and saffron &c. lands paying on an average Rs. 13-5-. per cawny. It is found that the highly assessed lands or those that pay more than Rupees 4-12-. per Cawny or

Rupees 2-2-. per Sooly are about Cawnies 15-9 1/2 per cent of the whole cultivated area.

31. These averages will be considerably reduced next year when the order of the Board of the 25th November

Paras 32 & 33 Kaboolatty waste charged to the Ryots.

33. Of this Cawnies 18–13 3/4 assessed at Rupees 37–9– was added in Tadicomboo; 7 1/2 Cawnies assessed at 47–13–5 in Ayempully; 6 1/16 Cawnies assessed at 34–1–5 Nullacottah; and Cawnies 307–6 assessed at 544–10–– in Ramgherry. The amount brought to account this years fell short of the Amount brought to account last year by Cawnies 561–8 1/4 assessed at Rx. 1072–4–9 and was only added where satisfactory reason was not shown by the ryot for leaving the land waste or where Manium land had been cultivated to the prejudice of Government claims.

Paras 34–50 Remissions on the Cultivation.

34. The deductions from the full survey settlement allowed at the settlement of Fusly 1263 on the cultivation amounted in the aggregate

aggregate to Rupees 62,208–3–10 of which Rupees 28,612–1–4 were remitted in Tadicomboo; Rupees 11,092–2–10 in Ayempully; Rupees 2,077–4–9 in Nellacottah and Rupees 1,426–10–11 in Ramgherry or Rupees 4,593–4–5 more throughout the whole Sub Division than were similarly granted in the preceding Fusly: the remissions amount to Rupees 15–5–11 per Cent on the whole Beriz.–

35. The Remission on account of Shavy was Rupees 5,293–12–5. No such remission obtained last year. The reaped shavy and Gair Hazer were granted in Nellacottah: The subjoined Statement will shew the items for which shavy was granted–

The

The Ayempully and Tadicomboo Talooks suffered the most this year, for the want of rain as shewn above; but much of the pro= =duce was saved by wells. The tanks are co generally large and were well supplied at the commencement. In Ayempully there are also several mountain streams following though a great portion of the year. In Ramgerry, though they had in the early part of the season a co more abundant supply of rain, yet the tanks are smaller and rain fed and the wells are not so abundant as in Ayempully and co Tadicomboo, hence, though the actual amount co granted for Shavy in Ayempully and Tadicom= =boo is larger than in the other 2 Talooks; the percentage the remission bears to the Cultiva= =tion is in Ramgerry much higher, being co nearly 4 times as much as it is in Ayem= =pully and a little more than 3 times as much as it is in Tadicomboo.—

37. By the annexed Statement it will be seen that shavy occurred in 62 Villages in the Sub Division. In Ayempully it was very

large;

large. the amount reported by the Village Officers was Rupees 4,815–4–1; out of this amount Rs. 389–6–2 was struck out as unfit for remissions in the Report of the Talook Officers deputed to examine the crops.—

38. In Tadicomboo the amount reported by the Village authorities was Rupees 2,099–7–11,½ which Rupees 172–14–11. was rejected as unfit. co In Ramgherry, the amount originally sent in was Rupees 1,494–11–5; this on examination was co reduced to Rupees 57–7–9. In Nellacottah the sum claimed was Rupees 211–9–3, the Talook servants disallowed Rupees 47–4–6. The total amount co rejected by the Talook authorities out of Rupees 8,620–5–8 was Rupees 670–1–4, leaving the sum of Rupees 7,950–4–4. which they recommended should be remitted.—

39. The accounts submitted were fully scrutinized in the Huzoor, and where there appeared any reason to doubt the propriety of the rejection or admission of the Talook authorities, the higher Huzoor servants or I myself examined both the lands and the accounts. The time of sowing, the kind of grain sown, the quantity of water in the co

tanks

tanks at the time of sowing, formed subjects of strict examination both from the accounts and the people and eventually shavy was granted where it was shown to have existed, on a consideration of the produce reaped by the ryot in the Village in which the shavy occurred and the price which they received for the produce-

40- The Remission of Rupees 31-7-6 granted for Poonjah lands on the Virupatchy Hills on which the produce was destroyed by the drought has already been reported on and received the sanction of the Board- It was granted on Cawnies 33.1/4 of land and to 24 individuals, upon whom it would have pressed most heavily to have paid the amount remitted, and who would have been obliged to dispose of some of their stock to meet the balance-

41- The Remissions for Hooloor Manf amount to Rupees 19,667-8-4 being Rupees 337-2-5 less than in the preceding fusly in consequence of less lands assessed with this remission having been this year brought under Cultivation. This remission will be found to be a little more than 4 3/4 per Cent on the whole Fyzul Assessment of the land cultivated this year--

42- The Remission for Moonasib Cummee is

is Rupees 397-15-9 more than it was last year- since more land on which such remission is granted was cultivated than the last year- this remission amounts to a little more than 8 1/4 per Cent on the Hooloor tax.-

43- The Aligal Manf this year in Ayempully Talook is large, and there is a net increase under this head of remission over a similar remission last year to the extent of Rupees 285-3-8-

44. The increase in Ayempully was owing to the very large number of Betel Gardens and Sugar Cane fields destroyed by the drought, notwithstanding the efforts made by the people to save them by sinking numerous Wells and bringing water from great depths by a succession of picottahs- I visited several of these gardens and was struck with the great labor and endurance of the ryots in their endeavors to save their Crops.-

45- Under the head of Kunjai lands Cultivated with Poonjah there is a decrease in the present fusly of Rupees 147-13-4 beyond the decrease of last year.-

46. The Cowle and Mahajanum Manfs are usual and customary- they amount in this year

year to Rupees 272-14-2, being Rupees 64-11-10 less than last year.-

47. A small remission of Rupees 61-13-10 was granted this year for gardens which usually produce two Crops, but were, from the state of the season, only this year Cultivated with one Crop.- This remission was made in accordance with the permission conveyed in the Board's Proceedings of 17th. September 1835.-

48. Rupees 32-14-11 was remitted this year on Cotton fields which came into bearing the second year.- This is a usual remission and seems to need no explanation.-

49. A trifling sum of Rupees 1-3-11 was granted on Cucumbers grown in the bed of a tank, the water spread of which was formerly Cultivated with Poonjai.- The difference between the original Poonjai tax and the tax of 2 fanams per Gooly sanctioned for Cucumbers grown in the bed of a tank by para 71 of the District Hoocummanah is the amount of this remission.-

50. The whole remissions granted this year amount to Rupees 6208-3-10, being Rupees 4593-4-5 more than was granted last year, and are a little more than 15¼ per Cent on the Hooloor tax, whilst last year the per centage amounted to a little less than 11½.-

Paras 51-54 Sugar Cane.-

51. Cawnies 157-7¼ of land were grown with

with Sugar Cane in 25 Villages in the Fusly under review, being Cawnies 32-13 more than were Cultivated last year.- The assessment however on the lands so grown exceeded the assessment of the previous year only by Rupees 115-11-3, the smallness of the increase is owing to a large quantity of lightly assessed lands being Cultivated with this product this year.- The whole of this produce was raised on Nunjai lands.-

52. The amount of Sugar produced in the Sub-Division, and which is of a very inferior kind, being the coarse jaggery of the Country, does not meet the consumption.- Large quantities of jaggery and Sugar are imported from Salem, Bangalore, Mysore and Tinnevelly.-

53. An effort has been made by an enterprising and wealthy Cultivator at the Cost of 500 Rs. to improve the manufacturing of Sugar by introducing the European method of boiling, curing and purifying the cane juice, but it has failed for the present from ignorance in the Superintendent of the factory.- Coolapa Naik hopes to be able to supply the place of his late Superintendent by one better instructed in the art.-

54. The subjoined Statement shews the quantity of land planted with Sugar during the past and 5 previous years.-

Cotton

Fort St George 2nd April 1855

55

In the land cultivated with cotton there has been a net increase of Cawnies to the extent of 303 - 2 3/4 - The increase this year is chiefly perceivable in the Government lands which show an increase of Cawnies 670-7-- given up to this decrease of land cultivated with cotton in this below last year of Cawnies 367 - 4 1/4 - The decrease in the amount of produce is very marked, it is given at Sodees 14 34 - 3 1/2 - The year has not been a good one for cotton, its produce is about 1/2 of an average year - However the average return per Cawny is as shewn in the Statement about 6/16 of a Sodee or bale of about 280 lbs with seed or 4 1/2/16 of a cleaned bale, which shews a loss of 75 per Cent on an average crop - In several Villages it is true the crops are set down at 1/2 - 1/4 - 1/8 and 1/16 of a bale, especially in Coyampully, where the early rains greatly failed and where the season was by no means so good as in the other Talooks - The large quantity of land which was unproductive has also materially affected the average and increased the loss - I am however of opinion from the enquiries I have made that the loss is exaggerated and the outturn was generally not below 1/2 an average crop.—

Indigo.

Fort St. George 2nd April 1855

56. The Indigo plant of Indigofera Tinctoria is not grown in the Sub Division, and therefore no returns are submitted; but a small quantity is manufactured from the leaves of the Salix Marum or Mimusops hexandra. It is considered inferior to the Indigo usually manufactured and is chiefly used by the washermen for coloring cloths and by a few cloth merchants.

57. The subjoined Statements shew the state of cultivation during the year on the Hill Villages in the Sub Division. The Jaudigoody Hills are now attached to the Principal Division. There has been a slight increase over the cultivation of 1262 which occurred chiefly in Vrapatchy from the increase in plantain cultivation. In Vilpitty and Poombary from the inability of the ryots to cultivate Poonjah from the unfavorable state of the season, there is a slight decrease discoverable in the cultivation of these Villages.

Sevoy Jummah.

58 Under the head of Sevoy Jummah there remains uncollected the sum of Rupees 162-10-4 of this amount Rs 152-2-4 can be realized. The remainder Rs 10-8- has been recommended to be written off as unrealizable. The defaulter being altogether without assets and having left this part of the country. The fine was imposed on Vecrabadra Pillaya Curnum in the Nellacottah Talook ½ Rupee in 1850 and 10 Rupees on 3rd April 1852 for fraudulent entries in his accounts and general neglect of duty of the realizable amount, the collection of Rupees 142 is suspended pending the disposal of the appeal made by the defendant against the decision of the Sub Collector, the small balance of 10-2- will be shortly realized.-

Paras 59-62 Ready Money Collections composing the trees Topes and Grafs.-

59 The subjoined Statement shews the amount realized from trees during the past year. There is a decrease of Rs 349-8-8. This has been chiefly occasioned by the decrease in the bidding at the auction at which the Topes are rented annually to the highest bidders.-

* The Topes which now pay tax are 6 and the tax levied on them is Rupees 9—10—4.

The Topes to be taxed after 20 years are 16 and the tax on these is Rupees 61—"—9.

61 In regard to Grass, it will be seen that the amount realized from this source has fallen Rupees 3,991-2-2 below the amount realized in Fusly 1262.- This loss is chiefly observable in the Taloob of Rangery in which alone there is a deficiency under this head of Rupees 3,888-4-1 This decrease, tho' in some degree attributable to the state of the season, has chiefly arisen from the orders which I found it necessary to issue, on receiving charge of the Taloob from the late Acting Sub Collector, to the effect that the Tax should not be compulsorily collected, but that parties were to be at liberty to take up or relinquish grass lands as freely as they relinquished lands for cultivation- The Taloob of Rangiry is composed of 4 resumed Pollems, and I found that it had been the practice to collect a tax of 5 per Cent indiscriminiately on the Puttah of each ryot whether he held or not grass lands. In the resumed Pollems of Rangiry grass lands are very valuable and are much sought after and contended for by the Ryots, who hedge

hedge in and protect their holdings with much care. In the other Pollems but little grass and that of an inferior kind grows, and the lands are held in common by all the ryots the grass lands are not enclosed nor do the ryots generally take any precautions to preserve them for grazing- Under these circumstances, I considered the practice hitherto observed, of collecting a tax of 5 per Cent per puttah from each ryot to be at variance with the wishes of Government, the rules issued by you and the principles of the Ryotwary System- Those who held enclosed lands were required to pay for them or give them up, and they were permitted to have ¼ of their holdings on a quarter tax. Many threw up the lands which were taken up by others on durkasts for the year and only a few retained them at ¼ tax- The state of the season led perhaps to more land being thrown up than would have been the case in a more favorable season, but the decrease in the Pollems of Rangiry amounts only to Rupees 933-10-7- In the other 3 Pollems no grass lands were contracted for.

62 As it is my hope shortly to submit a separate report on the subject of the grazing lands in this Sub-Division, further remarks on the nature of this tax seems inappropriate in this place.-

Fort St. George 2d. April 1855

65 The above statement No. XXII shews a net increase of Rupees 1,142 5 6 in the Extra Sources of Revenue. The chief item of increase is in the sale of Stamp paper arising from the recent establishment of a Moonsiffs Court in Dindigul. There is also an increase of Rupees 840 in the Abkary rents from greater competition at the auction sales and Rupees 719 — 0 6 in Fish rent arising from a greater number of the large tanks being dry during the year.

by The Statement of Demand Collection & Balance shews that out of the 4 Talooks the amount due in Ramgerry & Nellacottah for fusly 1263 was collected within the fusly without an arrear. A small arrear of Rupees 185-4-11 remained uncollected in Tadicombo but this has since been realized. In Ayempully there remained a balance of Rs. 4911-10-5 at the close of the fusly year of which 4675-5-3 has been Collected & the small balance of Rupees 266-5-2 remains to be Collected. Of this amount it is presumed that the greater part may be collected without resorting to any coercive process Rupees 16-4 is due from certain Ryots on the Aygoody Hills for lands which have been improperly included in the village of Vilputty. The lands most clearly belong to the Ayagoody Zemindar & I request authority for writing off this balance Rupees 16-9-8 are due by men whose property has been attached by the Court & whose means are very circumscribed & I fear it will be found difficult to realize this amount. Regarding the sum of 75-12-3 due by 5 persons it is apprehended it will be eventually necessary to bring their lands to sale in order to realize this balance. The remaining Rs. 57-12-9 will be Collected in the present fusly as soon as the new Crops come in.

There

There also remains a balance of Rupees
68 157-13-11 of former fusslies yet unrealized. The greater part on Rupees 149-5-11 is due in Ayempully of this balance Mr. Walhouse the acting Sub Collector in his Report on the settlement of Fusly 1262 recommended the remission of Rupees 50-10-0 outstanding against Palany Goodoomben an active & enterprising Cultivator who has been much reduced in circumstances & I beg leave to support his recommendation. The land of Perrana Gounden by whom the remainder of the arrears of Fusly 1262 is due has been attached by the Civil Court, to whom application has been made for the amount due no answer has yet been received from the Court.

The balance of Rupees 42-4-5 due for
69 fusly 1260 has been ordered to be Collected as the accounts clearly shew that the higher rate imposed by the Moozoomdar was correct notwithstanding the parties had enjoyed their lands for 20 years on a lower rate this lower rate had never been sanctioned & was fraudulently introduced by a long deceased Curnam.

The small balance of Rupees 2-8-0
70 for fusly 1261 in Ramgerry is due on lands regarding which there exists a boundary dispute between the District of Coimbatore & this Division. Orders have been issued which it is hoped will lead to an early settlement of the dispute.

No coercive process has been employed
71 during the year in the Collection of the Revenue.

No coercive process used.

The following statement shews the
72 charges on the Revenue in the Dindigul Division for Fusly 1263.—

Salaries and other charges

Yearly

Miscellaneous

75. No lands have been entered in the Register by any of the Public servants during the present year.—

76. The subjoined Memo shews the dates on which the Sub Collector was absent from the Sub Division during the Fusly year.

Memo shewing the days on which the Sub Collector was absent from the Sub Division during the fusly 1263 prepared under orders of the Board dated 6th July 1854.—

The Sub Collector resided in the Principal Division while doing duty as Acting Collector from 13th July to 7th October 1853 being ——— 2 months 20 days

He passed through it while on leave from 31st January to 4th February 1854 . 5

and while executing Sanabundy of the Merjlore Talook from 12th to 30th of May 1854 - 19

Total — 3 14

During the remaining portion of the fusly the Sub Collector has resided within the limits of the Sub Division, excepting the 21 days he was at Madras under the leave of absence granted him in the official Gazette of the 27th January 1854.—

75. The Sub Collector regrets it is not in his power to speak as favorably as usual of the aid derived from his Sheristadar Vencata Row during the past year. His increasing infirmities of age & an impaired constitution appear to render him unable to undergo the fatigue and application necessary for the efficient performance of his duties.—

From the Collr of Madura

Sir,

With reference to the correspondence noted in the margin, I have the honor to forward Translation of 2 Plaints brought against the Sub Collector in O.S. Nos 63 & 64 of 1854 on the file of the Sub Court of Madura with copies of his proposed answers. The latter appear to me to be full and satisfactory and I therefore request sanction for carrying on the Suits at the Public Expense.

No. 1

Translation of a Plaint presented by Soobramanya Iyen Vakeel on behalf of Plaintiffs under date the 11th October 1854, in O.S. No. 63 of 1854 on the file of the Sub Court of Madura.

Plaintiffs	Vers.	Defendants
1 Narasimma Sastry Manium Cultivator at Dindigul		1 R D. Parker Esqre Collector of Madura
		2. J Clarke Esqre Sub Collector

and

2 Venkatasawarien the son of Venketachien the uncle of 1st Plaintiff of Dindigul.

and

3 Venkatrow Sheristadar of the Sub Collector's Office.

This is an action praying for the recovery to the Plaintiffs of the sum of Rupees 1380 being the proceeds of the Produce of Manieum lands collected by the Circar and kept in deposit and for the restoration of 1065 3/16 Goolies / or quit rent / Manieum lands yielding an annual revenue of Rupees 157-6-9 making in all a total of Rupees 1537-6-9.-

1st The Poonjah Goolies 1061 15/16 of Keeriappapuntty village of Tadicombo Talook lying within the boundaries as follows, west of Kodaganaur, east of the avenue in the limits of Ediacottah, and of Olagumpuntty South of the limits of Vittanaikumpuntty and North of Akarum Village as also the 3/4 Goolies of Garden land in Chettinaikenpuntty, lying North of Packeri Tottam or Garden east of the habitation of Malagarees / or Tomtom beaters /, west of the site of Aberamee Kovil, and South of the Odey (or Channel) running down to Tyencolum, making in all a total of 1065 3/16 Goolies paying a quit rent to the Circar of Rupees 42-6-9 or 20 Poons from the litigated lands.-

One

2 One Kolay Naraniem, who was endowed with power by the authorities of Shirengapatam purchased the lands then lying waste first set forth above situated in the limits of Tadicomboo, as also the garden forming part of the lands in dispute, and gave them in donation to one Ramalingavadany Plaintiffs, great grand father who was waiting on him. afterwards the latter creating a settlement there, called it Keeriappyenputty after the name of the father of the said donor and enjoyed the lands aforesaid which were cultivated by the Ryots continuing to feed the Brahmins that come on pilgrimage - and afterwards, the same enjoyment was held by the Plaintiff's fathers and their grand fathers.-

3. After the assumption of this Country by the Company Mr. Hurdis who was then the Collector directed the imposition of the Poroopoo above said, and granted in fusly 1212 in the name of the father of 1st Plaintiff, a Shrotriem Izarah Puttah stipulating that the lands may be enjoyed on payment of the Poroopoo to the Circar and in accordance thereto, while the enjoyment was held indisputable, by the said incumbent and after his life by Plaintiff, in 1836, the 3d Defendant in

in consequence of the ill-will he bore towards the Plaintiffs, having somehow misrepresented the matter to the then Sub Collector caused the said Manieu to be attached. On an appeal by the Plaintiffs to the Principal Collector, an order was issued by that Gentleman under date the 22d October 1836. directing the release of the attachment alluded to, in reference to which the Tahsildar of Padicombo sent on the 7th November following a Takeed to Plaintiffs releasing the Inafted lands - and ever since that time Plaintiff continued to hold enjoyment thereof.-

4. While the matter stood thus, again - in the year 1842 the lands were attached and on a complaint being preferred to the then Sub Collector praying for their release, an endorsement was passed by that authority on the 26th November 1843 purporting "that the lands had been "endowed for the charity of the Chuttrum - "and as no such charity was attended to, the "lands in question are brought under attach- "ment and in consequence the request of the "Plaintiffs cannot be complied with." Subsequently

appeals

appeals were made both to the Revenue Board and Government but no justice was rendered. The Plaintiffs however continued to request the 1st and 2d Defendants who succeeded their predecessors for the release of the Inafts. They promised to issue orders after consideration of the matter. On the 20th March 1852 however the 1st Defendant granted an endorsement to the effect that there was no possibility of issuing another order on the subject.-

5. The lands had been originally endowed for the support of our own family and food is given in our house to the Brahmins on pilgrimage and also mention to the same end is made in the Fifth account of Manieu for Fusly 1212 and in the orders issued both by the Collector and Tahsildar in the year 1836. as also in the Kararnamah entered into by us, and the same course is followed up to the present time - The Manieu in question was not endowed for the support of any Chuttrum - without taking

all

all this into consideration, an attachment was effected, contrary to the usage and the Orders issued by the former authorities.- Hence this action arose.-

6. The particulars of the demand of Plaintiffs are as follows. Out of the sum that results from the lands yearly, Viz. Rupees 157—6—9 Rupees 115 have to be enjoyed by Plaintiffs after deducting Rupees 42—6—9, the Poroopoo due to Circar. Under this calculation Rupees 1,380 become due Plaintiffs for 12 years from fusly 1252 to the end of 1263. It is therefore requested that the said sum together with the lands in dispute may be restored to Plaintiffs.-

(True Translation)

(Signed) R. D. Parker

Collector.

WW

No. 2.

Proposed Answer to O. S. No. 63 of 1854 on the file of the Sub Court of Madura.-

This suit is brought to obtain an order to place the Plaintiffs in possession of certain Poroopoo lands forming the Endowment of a Chuttrum known as Carli Narana Iyer's and to recover the mesne profits of those lands Rupees 1380 accruing in 12 years from fusly 1252 to 1263.-

2. The Plaintiffs ground their suit on the allegation that these lands were granted by one Carli Narana Iyer to their great grand father for his support and that they do not form any part of an Endowment.-

3. The 2d Defendant wholly denies the premises and challenges the Plaintiffs on whom the onus rests to prove this gift and its validity, that it was made with the concurrence of the ruling powers whose consent would be necessary to give validity to any alienation if such were genuine.-

4. So far from the allegation of the Plaintiffs being sustainable the 2d Defendant is prepared to shew from the records of the Collector's Office that the lands in question are entered in the accounts as Endowments of a Chuttrum, a circumstance collaterally

collaterally affirmed by the site of the original Chuttrum, said to have stood in the town of Dindigul on the spot where there is an oilpress near the house of Monttooca-rupen Chetty on the south side of the road No. 1.

5 The 2d Defendant is also prepared to shew that the Plaintiffs and their ancestors were in the habit of providing accommo-dation and food for the use of travellers.

6. On the 15th March 1836 the endowment was placed under attachment by the Sub Collector Acting under the provisions of Regulation VII of 1817 on the ground that the object of the Endow-ment had been wholly lost sight of. This attach-ment was withdrawn under orders from the Prin-cipal Collector on the 22d October of the same year after taking from the Plaintiffs an agreement by which they bound themselves to feed the Bramins coming to their house during the day.

7. The Plaintiffs having failed to observe the conditions of the agreement were, as Managers of the Choultry on the 8th May 1842 served with a notice to the effect that if they did not build a Choultry within the 12th July following, the Mannium would be placed under

under sequestration in order that the Government might discharge itself of the duty imposed on it by Regula-tion VII of 1817 in seeing that the Choultry was restored and the Endowment applied to its proper use.

This notice having been disregarded the lands were on the 23d July 1842 attached, a proceeding which met the approval and sanction of Government.

9. The proceeds accruing from the Mannium lands have been held in deposit and plans and estimates ~~have been received~~ for building a Choultry at Dindigul out of the united funds of this Endowment and of that referred to in O. S. No. 64. a Subscrip-tion list was also opened and funds in aid of this object to the amount of Rupees 690-12-- collected. The whole amount in deposit does not however equal the sum which the Civil Engineer has estimated will be required to complete the buildings when the necessary amount has been collected the buildings will be proceeded with and after its erection it will remain with Government to determine with whom the future Endowment of the building shall rest.

10. From what has been said above it will be seen that the sequestration is valid, that it has been made under the orders

of

of Government who have under the provisions of Regulation VII of 1817, not only authority to direct it but are also called on public grounds to require it and that all necessary forms have been observed in the sequestration and every consideration shewn towards the Plaintiffs

11. No words can be more general, extensive and complete than those which are employed in Regulation VII of 1817 to vest the Government with power to provide for the due appropriation and superintendence of all endowments

Indeed it is not disputed that process was issued against the Plaintiffs, that they bound themselves to carry out faithfully the object of the trust imposed on them, that failing in this agreement they were after a long interval warned of the consequences of their disobedience and time given them to repair their fault - that on their pertinaciously refusing to do so their lands were attached by the Sub Collector under an order from the Collector that the case was reported to the Board of Revenue and the Government, that the Government approved and confirmed the proceedings of their local agent. But it is contended that the alienated lands were a free and unfettered

grant

grant conferred on the great grand father of the Plaintiffs for his support and maintenance. This grant, it is presumed, the Plaintiffs will be called on to establish, not by vague rumour or equally unsatisfactory and easily fabricated Copper deeds, but by clear indisputable and sustained evidence sufficiently strong to rebut and overthrow the facts appearing against them in the records of the Collector's Office in a series of accounts and in the admissions to be found in the depositions given by the Plaintiffs.

Translate of a Plaint on the file of the Sub Court in Original Suit No. 64 of 1854.

Plaintiffs	Vers	Defendants
Shevaramavadanj Son of Naraiaavadany residing at Authoor and Dindigul.	R. D Parker Esqr. Collector of Madura / S. Clarke Esqr. Sub Collector of Do. — 2. and Vencat Row the Sheristadar of the Sub Collector's Office 3.	

This action is brought by Soobramany

Fort St. George, 2d April 1855

Soobramanay Iyen Vakeel on behalf of the Plaintiff praying for a decision to recover to his client 666—12—0 being the income of the Manium lands held in deposit by the Circar together with 259 1/16 Goolies of Poonjah garden Vgn Porroppoo lands yielding a revenue of 100 Rupees per annum.

1. Of the abovementioned extent of land, in dispute, 192 14/16 Goolies of Poonjah, garden Vgn are bounded on the west by the limits of Keriappoyenputty a hamlet of chetraputty attached to Todicombo, on the east by the Manium lands of Condasamoodraputty; on the north by the limits of Vologhaputty, and on the South by those of the above Keriappoyenputty, and the remainder Viz. 66 3/16 Goolies of Poonjah land including a Tamarind Tope, are situated north to Roodrappa Naicker's Mundapum, South to the

Fort St. George, 2d April 1855

Ayen limits east to a Garden, and west to the Swashanum or burying ground of Chellanaikenputty. The amount of Porroppoo on the said lands is Company's Rupees 21 or 44 8a 7d 0p.

2. One Burky Vencut Row an Officer in the time of the Carnatic authority purchased the lands and granted them in donation to Shevaramavadany his dependent and the Grandfather of the Plaintiff, who, and after him the Plaintiff's father, continued to enjoy them feeding the Travellers.

3. After the assumption of this Country by the Honorable Company Mr. Wardis, the then Collector, fixed the said Porroppoo and issued a Shotrium ejarah Puttah in Fusly 1212 in the name of Ramasawmyavadany the issueless and divided uncle of the Plaintiff,

Ayen

Fort St. George 2nd April 1855

Plaintiff, accordingly he and after him the Plaintiff, enjoyed them but owing to some disagreement between the Plaintiff and the 3d Defendant, the latter got the lands attached in 1836, prevailing upon the then Sub Collector by certain misrepresentations. On an appeal to the Principal Collector he ordered the restoration thereof on 22nd October 1836 and the Tahsildar of Vadicombo Taluk put the Plaintiff in possession of the lands and granted at the same time a Summad to that effect.

While

Fort St. George 2nd April 1855.

4. While so the above Lands were again attached in 1842 and in consequence thereof Plaintiff presented a Petition to the then Sub Collector for their restoration to him, but that Gentleman passed an endorsement under date the 26th November 1843 purporting as if the Lands were allotted for the performance of Chuttrum Charity, that they were resumed owing to the negligence of the same on the part of the Plaintiff and that the request of the Plaintiff would not therefore be complied with. Thereupon the Plaintiff complained to the Board and Government of the same but to no effect. He afterwards presented Petitions to the 1st and 2d Defendants and they were in the habit of saying that they would pass orders on consideration of his case but at last the 1st Defendant passed an endorsement on the 20th March 1852 that he saw no reason to alter the former order complained of by the Plaintiff.

6. The Lands in question were originally granted merely for the maintenance of the family of the Plaintiff but not for the support of any Chuttrum, who enjoyed them accordingly feeding the Travellers. This Statement will be supported by the Maniem Kistigeth of Sholy 1212 and the

orders

orders of the Collector and Tasildar issued in 1836 as well as the Hararennamah given by the Plaintiff such being the case the Lands have been Gifted in contradiction with the long custom and orders abovementioned.

6 The particulars of the income due to the Plaintiff are as follows.—

The income of the Lands per annum is ..... Rs. As. P.
Deduct 1/3rd proportion thereon to the Circar per Dº 44-7-0
Balance due to the Plaintiff per Dº 55-9-0

At this rate the income due to the Plaintiff for 12 years from Faslies 1252 to 1263 Rs. As. P. comes to 666-12-0. This the Vakeel says, may be recovered together with the Lands to his client

No. 4

Proposed answer to Original Suit No. 66 of 1854 on the file of the Sub Court of Madura.

This Suit is brought to obtain an order to place the Plaintiff in possession of certain Poroipoo Lands forming the Endowment of a Chuttrum known as Barker Vencat Row's and to recover the mesne profits of those Lands Rupees 666-12-0 accruing in 12 years from Faslie 1252 to 1263.—

2 The Plaintiff grounds his suit on the allegation

allegation that these Lands were granted by one Barker Vencat Row to the Plaintiffs grandfather for his support and that they do not form any part of an Endowment.

3. The 2nd Defendant wholly denies the premises and challenges the Plaintiff on whom the onus rests to prove the gift and its validity that it was made with the concurrence of the ruling powers whose consent would be necessary to give validity to any alienation of the revenue and consequently to any deed of alienation if such were genuine.—

4 So far from the allegation of the Plaintiff being sustainable the 2nd Defendant is prepared to shew from the records of the Collectors Office that the Lands in question are entered in the accounts as Endowments of a Chuttrum a Circumstance Collaterally affirmed by the Inamis of the Original Chuttrum situated near Poroipoo adjoining Coil on the eastern side of the road leading from Dindegal to Tondicombo and by the fact of the Plaintiff having in 1836 entered into an agreement binding himself to observe the Charity. It is also alleged that the brass Vessels used in carrying out the objects of the Endowment were some years back in charge of the manager the Plaintiff.—

The—

5. The 2nd Defendant is also prepared to shew that the Plaintiff and his ancestors were in the habit of providing accommodation and food for the use of travellers.—

6. On the 16th March 1836 the said was placed under attachment by the Sub Collector acting under the provisions of Regulation VII of 1817 on the ground that the object of the Endowment had been wholly lost sight of. This attachment was withdrawn under orders from the Principal Collector on the 22nd October of the same year after taking from the Plaintiff an agreement by which he bound himself to feed the Brahmins coming to his house during the day

7 The Plaintiff having failed to observe the Conditions of this agreement was as Manager of the Choultry on the 8th May 1842 served with a notice to the effect that if he did not build a Choultry within the 12th July following the maniam would be placed under Segnestration in order that the Government might discharge itself of the duty imposed on it by Regulation VII of 1817 in seeing that their Choultry was restored and the Endowment applied to its proper use.—

8 This notice having been disregarded the Lands were on the 23rd July 1842 attached a proceeding which met the approval and sanction of Government.—

9 The proceeds accruing from the maniam lands have been held in deposit and plans and estimates have

been received for building a Choultry at Broadfeet out of the united funds of the Endowment and of that referred to in O.S. No. 63 a Subscription list was also opened and funds in aid of this object to the amount of Rupees 690-12-0 Collected the whole amount in deposit does not however equal the sum which the Civil Engineer has estimated will be required to Complete the building when the necessary amount has been collected the building will be proceeded with and after its erection it will remain with Government to determine with whom the future Endowment of the building shall rest.

10 From what has been said above it will be seen that the Segnestration is valid that it has been made under the orders of Govern-ment who have under the provisions of Regulation VII of 1817 not only authority to direct it but are also called on public grounds to Segnester and that all necessary forms have been observed in the Segnestration and every Consideration shewn towards the Plaintiff—

11. No words can be more general in extension or Complete than those which are employed in Regulation VII of 1817 to vest the Government with power to provide for the due appropriation and superintendence of all Endowments. Indeed it is not disputed that process was issued against the Plaintiff that he

5208 Fort St. George 2nd April 1855

he bound himself to carry out faithfully the object of the trust imposed on him that failing in this agreement he was after a long interval warned of the Consequences of his disobedience and time given him to prepare his fourth that on his pertinaciously refusing to do so his lands were attached by the Sub Collector under an Order from the Collector, that the case was reported to the Board of Revenue and the Government that the Government approved and confirmed the Proceedings of their local agent But it is contended that the alienated lands were a free and unfettered grant conferred on the Grandfather of the Plaintiff for his support and maintenance. This grant it is presumed the Plaintiff will be called on to establish not by vague rumour or equally unsatisfactory and easily fabricated Copper deeds but by clear indisputable and sustained evidence sufficiently strong to rebut and overthrow the facts appearing against him in the records of the Collector's Office in a series of accounts and in the admissions to be found in the deposition given by the Plaintiff.—

Proceedings thereon.

Fort St. George 2nd April 1855.

Resolved that the letter above recorded together with its enclosures be submitted for the Consideration and orders of the Right Honorable the Governor in Council.—

2. The subject matter of both the suits reported in the foregoing letter is the same viz: the recovery of certain Poroopoo lands forming the endowments of two Chuttrums which have been sequestered in consequence of their proceeds having been misappropriated by the Plaintiffs who on their part allege that the lands were granted to their ancestors for subsistence and deny that they formed part of any endowment.—

3. In the draft answer of the 2nd Defendant (the Sub Collector) he states that he is prepared to show that the lands in dispute are entered in the Collector's accounts as endowments of two Chuttrums and that after the lands had once been attached they were restored in 1836 on the Plaintiffs binding themselves by an agreement to observe the Charity and provide accommodation and food for the use of travellers. This they did not do and the lands were again attached and the proceeds of the Manieums are held in deposit for the purpose of erecting Chuttrums in place of those gone to ruin by the neglect of the Plaintiffs.—

4. These Arguments Constitute in the opinion of the Board a good and valid defence they would therefore recommend that the Collector may be authorized to file the draft answers proposed by him and conduct the defence of the suits at the public cost.—

Explanations to be entered in Col 11 of the List of Oils procurable in Tinnevelly.—

Gingely Oil

No. 1 There are two Kinds of Seeds one black and the other a little white, Oil is extracted from both by pressure. The seed is generally put into the press in its raw State but when it is necessary that the oil should be very clear the seed is first washed and the husk removed by beating it with a pestle and then adding to it a quantity of Sugar not exceeding 1 or 1¼ Palams per Measure the Machine is kept in work for about 6 hours during which time water is being Continually sprinkled. After 4 hour's operation the oil will commence to make its appearance when it is removed from the Press by a small iron vessel.

Castor or Lamp oil

No. 2 There are 3 different processes for extracting this oil.—

1st By pressing the raw seeds in a Press and Sprinkling little water over them.—

2d By boiling the seed first in water and then pounding it with or without the shells, as the oil is required to be clear or otherwise and then boiling the powder mixed with 4 times the quantity of water till the oil rises over the

the surface of the water when it is taken up a vessel and the pot is removed from the hearth and put down. Afterwards some water is poured into the pot and the contents well stirred and the pot left aside for a while, during which time some quantity of oil collects over the surface of the water which is also taken and added to the oil first taken, when the pot was over the hearth and the whole oil boiled a little to free it from the water.—

This is called ☞ 2 ☞ 3 ☞ 4 ☞ 5 ☞ 6 ☞ 7 ☞ 8 ☞ 9 ☞ 10 ☞.

3d By frying the seed instead of boiling it in water and then pursuing the same course as mentioned above.—

Castor oil

No. 3 For extracting this oil from the seed called Spethamana Koovide process No. 2 in the remark to Item No. 2.—

Safflower oil

No. 4. This oil is extracted as follows.— The seed is fried and powdered and then mixed with one and half times as much water and boiled till the oil rises to the surface of the water, when it is taken out by a small vessel.—

Margosa oil

No. 5. This oil is extracted by pressure of the Seeds either in a Press or in a mortar. The seeds are before being taken

to

to the press first dried in the sun and the shells removed by rubbing a piece of plank over the Seeds.

Purnacoy oil — No. 6. The seeds are first put to dry and after removing the shells the Kernel is cut into pieces and exposed to the Sun, and then mixed with syrup of Jaggery at 25 Palams for 6 Mercals of Kernel - as soon as they are well crushed the Palmirah stalks are well beaten, and about 15 Palams of the same are thrown into the Press and the Machine kept at work till oil is produced.

Poonga oil — No. 7. The seeds yielding the oil called Poongemmary are first exposed to the Sun and then the shells are broken afterwards the Kernels put to dry and pounded, and then made into large balls by mixing with water - The first day they are left in the same state, in order that they may acquire acidity - The next day they are reduced to the Size of Gooseberries and exposed to the Sun for a while. Afterwards they are put into a Mortar and pounded with a pestle till oil is produced.

Elloopa oil — No. 8. The seeds producing this Oil are first put to dry and after removing the shells, the Kernel is put into the Press with a quantity of Coarse bran at the rate of 1/10 measure per Measure of the Kernel, and when the Machine is at work, water is sprinkled

and

and a quantity of shells thrown into the press at 1/4 measure per Mercal of the Kernel and the Machine kept at work till the oil is produced.

Wood oil — No. 9. There are two modes of Extract this oil Viz.

1st. A pit to the depth of a yard is dug under the ground and a pitcher placed therein over which is kept a pan with a hole in the Middle - This pan is covered with the Mouth of a large pot inverted, contains 7 mercals of Chips of Semmanathy wood & dung & plaster is then applied over that part where the 2 Vessels above mentioned join together - Afterwards pieces of dried Cowdung are piled over each other round the large pot in question and some Straw is strewn over them and a coat of mud plaster is applied to the whole - Then a fire is kindled. By this process about 1/2 Measure of Oil is slowly distilled.

2d. The Semmanathy wood is cut into pieces and thrown into a large pot which is placed over a high hearth made for the purpose. For 6 holes are made in the lower part of the said Vessel, below which and facing the holes is kept a Pitcher in the hearth and a fire is kindled inside the pot the Mouth of which is covered with a pan to prevent the vapours escaping.

The

The pot is then covered with some straw and plastered over with Mud and by keeping the fire alive inside, oil is distilled into the Pitcher through the holes in the pot.—

Coorookoo Oil No. 10. The oil called Coorookoo Ennei is extracted as follows.— 4 measures of Coorookoo Seed mixed with 1/4 measure of Paddy are boiled in 4 Measures of water till the paddy is well boiled when the pot is taken from the hearth and the seed exposed to the Sun, and when well dried is pounded and boiled again, and afterwards mixed with 6 Measures of Cold and acid water and kept aside for one day.— As the water subsides, the oil makes its appearance which is taken and the pot removed from the hearth. Afterwards some water is poured into this pot and kept for a while. The some oil collects over the surface of the water which is taken and added to the quantity already obtained.— The oil thus taken is boiled to free it from water.—

Auttalay oil No. 11. The oil called Auttalay Ennei is extracted in the following Manner Viz.t. The seed yielding that oil is fried and pounded and then Mixed with water at 1 Measure of seed for 1 1/2 measure of water

water, the latter being composed of 2/3 of pure and 1/3 of acid water and then boiled till oil is extracted.—

Poovana oil No. 12. The seed yielding the oil called Poovana Yennei is dried and the shells removed. The Kernels are then fried and reduced to powder, and boiled mixed with twice as much water till the oil is seen on the surface of the water, when it is taken in a vessel.— Then taking the oil that appeared, the pot is removed from the hearth and some water poured into it and the contents stirred and when more oil appears over the water, it is taken and added to the other quantity which is again boiled to free it of any water that may be found in it.—

No. 21

To B. Cunliffe Esquire
Secretary to the
Board of Revenue

60 B No. 857 From the Collector of Coimbatore

Sir, In consequence of a boundary dispute between this District and Cochin, it is desirable that

in Council is of opinion that the principle for the Commutation of small pensions acted on by the Government of Agra might with advantage be adopted in this Presidency. Effect has indeed already been given to it as regards Pensions in the Political Department. The inconvenience complained of by the Board of Revenue at Agra is no less experienced here. These petty payments, the correspondence, accounts and references connected with them, occupy much of the time both of the Collectors, Revenue Board, Civil Auditor, and, it may be added of the Government itself, which might be much more profitably employed. Many of the allowances or the shares into which they are split up are so small, only a few rupees a year, as to be wholly insufficient for the subsistence of the recipient who would probably be in many cases glad to commute them on favorable terms. The relief which would thus be occasioned, especially to the Audit Office, would be great.

7. The Governor in Council resolves to forward the Circular, with these remarks, to the Board of Revenue, and to request them, in Communication

Extract Minutes Cons. Public Department 14th November 1855 & 19th December

communication with the Civil Auditor, to submit a draft of rules based as those of the Circular adopted to the Circumstances of this Presidency.

/A. True Extract/
/Signed/ T. Pycroft
Secretary to Government

Ordered that the following letter be sent in consequence.—

7.8
B. No. 812

To the Acting Civil Auditor

To
The Acting Civil Auditor
Sir,

With reference to para 7 of Extract Minutes of Consultation dated 17th February 1855, I am directed by the Board of Revenue to forward to you the accompanying draft of a proposed Circular based on that of the Board of Revenue in the North Western provinces; and to request that you will be pleased to favour them with any suggestions you may have to offer on the subject.

Revenue Board Office
Fort St. George
2d. April 1855.

/Signed/ B. Cuthbert
Secretary

No. 1
Circular Order.

The Government being of opinion that the principle

principle laid down in the Circular of the Sudr Board of Revenue, North West Provinces, dated 15th December 1855 No. 18, on which certain pensions payable from the Public Treasuries may be commuted should be introduced into this Presidency, the following rules are, with the sanction of Government, published for the guidance of the Revenue authorities and for the information of pensioners generally.—

2 The Board are authorized to sanction on the reports of the local authorities, and with the consent of the recipients, the commutation of all hereditary pensions and Malikanas to dispossessed Polygars or pensioned Rajahs, of the value of Rupees 100 and less per annum, at the rate of 20 years purchase, or Rupees 200 for every 10 Rupees of annual pension. Allowances granted for the benefit of Institutions of a permanent character, as Masques, and Pagodas, and which have usually been regarded as perpetual, will also be commuted at the same rate, but with the previous sanction of Government.—

3 The Board may also authorize in the same manner and at the same rate, the commutation of all personal pensions of Rupees 100 per annum and less, which may have been declared hereditary by Government on distinct references

4. With regard to grants for the support of Durgahs Tombs, Tuckeyas, or Makans, which are not considered hereditary, but are liable to resumption or reduction on a lapse, the Board will be prepared to recommend to Government the commutation of the same at a rate depending on the ages of the incumbents and the prospect of the continuance of the allowances beyond their lives, but not exceeding in any case, the maximum of 15 years purchase.—

5 The Board are also authorized to commute on the reports of the local officers, and with the consent of the recipients, all life pensions of twelve Rupees per annum and less, at the rates entered in the Subjoined schedule.—

Age of pensioner—	No. of years purchase
Under 10 years	13
10 to 20	12½
20 to 25	12
25 to 30	11½
30 to 35	11
35 to 40	10½
40 to 45	10
45 to 50	9½
50 to 55	9
55 to 60	8
60 to 65	7
65 to 70	6
above 70	5

With

6 With the view of preventing the fraudulent or erroneous re-issue of pensions commuted in whole or in part under the foregoing rules, the Collectors are required to keep a separate Register in their offices of all pensions so commuted. This Register should be kept in the form subjoined and must be referred to on every application for a Commutation, and in every case submitted for the orders of the Board, it should be distinctly stated that the Register has been examined.—

Number	Number of District Register	Name of Pensioner	Monthly	Yearly	Amount of pension.— Nature of the Grant	Date of sanction	Date and amount of Commutation paid	Remarks

7 By the term recipient of any pension is to be understood the person or persons whose names are registered in the District lists without reference to other Members of the same family who may participate therein. The consent of the head of the family or, of the registered recipients shall alone be deemed sufficient for the purposes of the commutation authorized by these rules;

rules, but the Collector may, if he see cause, order the distribution of the purchase money among the Members of the family in the proportion in which they may have been accustomed to participate in the pension.—

8 These orders are to be made known to all pensioners, and Collectors are instructed to endeavour to pay up all pensions of trifling amount at present. These petty payments, the correspondence, accounts, references connected with them, occupy much of the time of the Collectors, Revenue Board, Civil Auditor, and of Government, which may be much more profitably employed, and many of the pensions or the shares into which they are divided are so small as to be wholly insufficient for the subsistence of the recipients; and would therefore be gladly commuted, in many cases, on the favorable terms authorized by these rules; while the relief which would ensue thus be occasioned to this and other offices, would be great.—
