No. 3

To.

38

B. No. 259
From the Collector
of Cuddapah
Revenue Depart.

B. Cunliffe Esquire
Acting Secretary to the
Board of Revenue
Fort St. George

Sir,

Para 1 I have the honor to submit the following report, together with the usual statements, relative to the settlement of land revenue, in the district of Cuddapah, for Fusly 1263 / 1853-54.—

2 In the Principal division, the settlement was commenced on the 30th November 1853, and terminated on the 9th July 1854, and in the Subdivision, it was begun on the 1st December 1853, and completed on the 1st March 1854.— The names of the different officers by whom, and the stations and periods at which, the settlement of each talook was made, are particularized in the accompanying statement No. 4.—

3 .. The number of villages comprised in

Fort St. George 11th June 1856

in this District is 1990 with 8,653 hamlets, and the tenure under which they are held are shown below.—

Mode in which the settlement was formed	Number of villages	Number of hamlets
1 Ryotwar Settlement		
Circar	1,566	7,861
Anna Shotrium	208	74
Total	1,774	7,935
2 Shotrium		
Held for three generations	2	2
Ditto paying a fixed Jody	144	47
Total	146	49
3 Pongamoor paying a fixed Peshkush	68	669
4 Maturfa villages	2	0
Grand Total	1990	8653

4 Statement No. 1 will exhibit the number of villages and hamlets constituting each talook.— The

Fort St. George 11th June 1856

5 The following statement shews the description and number of the several works of irrigation, the talookwar particulars of which are given in the quinquennial statement.—

No.	Description of works	Number of works
1	Tanks	5,447
2	River channels	457
3	Spring channels	877
4	Anicuts	23
5	Wells	
	Old wells	22,441
	New do - dug at the expence of the Ryotts 16,274	38,715
	Grand Total	45519

6 The annexed statement exhibits the number of Ploughs, Cattle &c. used in agriculture, also the number of ryots and puttahs, as well as the extent of population, the talookwar details of which will appear

Fort St. George 11th June 1855.

*herewith forwarded appear in the return number 2 and its enclosures A and B.

No.		Number	Total
1.	Ploughs	0	87262½
2	Cattle used in agriculture		
	Cows	225075	
	She Buffaloes	157913	
		116579	
3	Ryots		499567
4	Puttahs		153004
5	Population		1342075
	Adults	936777	
	Children	515144	
			1451921

7 From the quinquennial Statement No 5 which shews the amount of rent paid individually, it will be seen that the holdings of the cultivating ryots vary from Rupees 10 to upwards of Rupees 1,000, and the number of individuals holding puttahs 120674.—

Partial

Fort St. George 11th June 1855.

8 Partial showers of rain fell in various parts of the district during the months of June and July, by which the Ryots were enabled to till and sow their red and misced lands to some extent, but subsequently a failure of seasonable rain was experienced, notwithstanding the cloudy appearance of the weather - On the whole the rain which fell being very insufficient, the supplies of water which the several works of irrigation had received were inadequate, to admit of the usual extent of wet cultivation being undertaken.—

9 The state of the tanks in respect to supplies of water received in Fuslies $\frac{1262}{1852\text{-}53}$ and $\frac{1263}{1853\text{-}54}$ respectively is shewn in the following statement:—

9180

10 The ryots, from the unfavorable nature of the season, were prevented from cultivating the usual quantity of dry and wet lands, but availed themselves of the opportunity afforded of bringing under cultivation, as much land as the circumstances of the season would permit.—

11 The lands dependent on tanks were brought under cultivation in proportion to the quantity of water stored in the several reservoirs last year, and to the esctent of supplies received during the current fusly, as well as by the means of irrigation available from wells sunk, for the purpose of aiding the cultivation of lands under tanks when necessary — a decrease is apparent in the esctent of land sown during the present Fusly, when compared with the past.—

12 The dry crops in red and mixed lands perished in some places from the failure of seasonable rains, tho' in others they may be reckoned about a half the usual return.—

The

13 The rain, which was esprrienced on the 13th and 14th November, proved beneficial to the cholum crop sown in black land; in many places the yield may be considered to be equivalent to pr more than an ordinary one, whilst in others, the produce was not only deficient, but in some particular localities, it turned out a complete failare.—

14 The product of cotton and Indigo may be estimated at somewhat below an ordinary yield - that of the different kinds of pulse were very deficient.—

15 Lands dependent on channels and wells yielded in general an abundant return, but in some localities, owing to the deficiency in the means of irrigation, the putturn was not sufficiently remuneration.—

Paddy and Raggy 16 The result of the harvest under tanks may, in some places, be averaged at an ordinary yield, at one half in others, whilst in some less favored spots, from the deficeency of the usual supplies of water, the stalks never came into ear, those that did produced no return — The esctent of sugar-cane cultivation during the year under review, is shown not to be less than that of former years.—

The

17 The Cholera having made its appearance in October, raged with great virulence generally throughout the district and continued until after the close of the Fusly - The mortality that has been occasioned by this epidemic, is computed at not less than 8,000 - Fever and small pox also prevailed to some extent.—

18 The loss of cattle and sheep by diseases incedental to them, as well as from want of fodder, which the unfavorable character of the season rendered deficient, was comparatively greater during the Fusly under review, though by no means equal to that in the neighbouring district - In the western talooks, where the large heavy cattle for the black land are required, the mortality was comparatively small on account of the supply of cholum stalks, which provided them with fodder, but in the southern talooks, where the cattle are very small and comparatively valueless, a considerable number perished.—

Under

19 Under these circumstances, the year may be set down as an unhealthy one both as regards human life and cattle - but the relief liberally afforded by Government to the distressed indigent poor, by providing them with employments on road-making, in various parts of the district, was of very great assistance to that class of persons, who having no cultivation of their own, are entirely dependent upon their labour for subsistence.—

20 Vaccinators were employed in the different talooks for the purposes of vaccination; they met with considerable opposition in many places, on account of the prevalence of cholera - the villagers refused to allow strangers to enter the limits of their respective villages, dreading that they would introduce the cholera which was then very prevalent in many of the villages around them - The people are now becoming more favorably inclined towards vaccination, seing the good effects that result from it - The most determined opponents that I can find against it are the Comatees and I think it would be very advisable that vaccination in general should be made compulsory, which might be easily done by a threat of imposing a tax upon

Fort St. George 11th June 1855

upon all children, who were found not to have
been vaccinated; when it could be shown
that an opportunity had been afforded
them of having this effected. During my
circuit, I have taken the opportunity, when
the ryots were assembled to receive their
puttahs, to explain to them the nature
and purposes of vaccination, and have
held up to them examples of children
who have irrecoverably lost their eye sight,
and been severely marked by small pox-
at the same time impressing upon them,
that the only wish of Government was to
relieve them from the effects of this loath-
some and disfiguring complaint— The
number of children vaccinated amounted
to 29,869 during the Fusly.—

21 According to the instructions of
Government, the 2nd dresser attached to the
Collectors Establishment has made himself
very useful in affording medical aid
to those ryots who required it; and
his treatment turned out very effective—

The

Fort St. George 11th June 1855

22. The following statement
exhibits the prices of the principal
kinds of grain during the last e
10 years, with a comparison
between the Fuslies $\frac{1262}{1852-53}$ and
$\frac{1263}{1853-54}$ and between the latter
and the average of 5 years,
as also the extent of land
on which these crops e
were produced.—

									16.01.169

23 From the foregoing statement it will be seen that, owing to the unfavorable character of the season, there has been a considerable rise in the prices of all descriptions of grain, as also of Cotton and Indigo in the Fusly under review, when compared with those of the preceding year, and with the average of the five previous, more particularly in the different Kinds of pulse, which in this district is employed as a condiment in the food by all classes of people, being boiled and mixed with the rice prepared for their daily food.—

24 These high prices have turned out to the advantage of the merchants and Ryots who had stored grain, though they have caused great inconvenience to the community at large - and in some cases actual distress - this distress was however partially alleviated by the very

very large quantity of fruit produced on the Mango and other trees, which, with the assistance of a smaller quantity of grain, enabled the poorer classes to subsist.—

25 The subjoined statement exhibits the extent and descriptions of land, which the Ryots have taken up, and also the assessment thereon, with a comparison between the past and the previous Fusly.—

As per Cultivation of the Current Fusly. —

As per Cyanum

9191.

Fort St. George 11th June 1856

26 Agreeably to the instructions of Government, contained in the Extract from the Minutes of Consultation under date the 28th September 1852, forwarded with the Extract from the Proceedings of the Board of Revenue dated the 18th October of the same year, circular orders were sent to all the Tahsildars enjoining them to render every facility to the ryots in their dittum settlements by excluding from the Fasliawary or dittum, lands which had been left waste for a series of years, those held by ryots who are in reduced circumstances and not able to carry on their cultivation, from the want of agricultural stock, that portion of the land which has been usually included in the dittum as liable to Fasulgasty but never realised and the extent of land which, it was anticipated, would not be liable to Jeerayasty and Fasulgasty, owing to the deficiency in the means of irrigation in the Fusly under review - This will account for the deficiency in every species of land taken up in the current Fusly, in comparison with the preceding one, amounting in the aggregate to 7,112 acres assessed at Rupees 19,709 -

27 Annexed is a statement, which shows the extent of land left waste in whole numbers, and the assessment thereof, for which remission was granted -

Statement

				Net Increase		41,644	57,632		

Fort St. George 11th June 1865

28 From the above statement, it will be observed that there has been an increase in the extent of land under cultivation to the extent of 118322 acres and a decrease in the assessment to the extent of Rupees 244283 as compared with the preceding one.

29 The Collector states that the failure of the South West rains, which fell over the Carnatic from September to December, and the general paucity of land, and in some instances even Kharif sowing is attributable to the above causes.

(Signed) [illegible]
Secretary

Fort St. George 11th June 1865

											Net decrease	118614	2,38,592

30 There has been a decrease in the assessment of all descriptions of land actually cultivated excepting that dependent on wells, under which head an increase of Rupees 5,691 is observable - This decrease has chiefly arisen from the deficiency in the means of irrigation consequent on the failure of seasonable rains, as already explained in the preceding *paras of this Report.

*from 8 to 16

31 The following abstract statement shows the particulars of remissions withheld from the ryots, during the current and the preceding Fusly, on account of their having left their lands fallow without cause viz. - the talookwar details of which will be seen in the accompanying Statement No. 11.

					Net decrease Rupees	68904

34 The decrease in the remission granted under the head "Shamilaut bunjer" has been occasioned from a smaller quantity of land out of the whole numbers having been left uncultivated in the current Fusly than in the preceding; from certain lands, for which considerable remissions had been granted in Fusly 1262, consequent on the fields having been, from excessive rain, washed away or covered with water and the crops injured inconsequence, not requiring the same indulgence this year, and from the period allowed for Cowle having expired, and that under the items Nos 7-8-9-11-12-13-14-15-16-17-18-21-22 and 23 arises from the fields having been left uncultivated on accounts of the failure of rain The decrease in the items Nos 19 and 20 is ascribed to the salaries of the village pettahdahies having been paid from the Hoozoor treasury during the Fusly under review, pursuant to the orders contained in the Extract from the Proceedings of the Board of Revenue under date the 15th November 1852, and to the discontinuance of a portion of the allowance granted

granted from the Kistbundy heriz for the support of a Hindu Pagoda.—

35 The increase in the remission granted under the head "loss of corps" has been occasioned from a greater portion of wet and a small portion of dry corps having perished inconsequence of the failure of seasonable rains, and that in the item "one third remissions" is owing to lands dependent on wells, which had been cultivated in Fusly $\frac{1262}{1852\text{-}53}$ by means of irrigation from tanks and channels, rendering the same liable to one fourth remission, having, during the present Fusly, been irrigated from wells, which renders them only subject to one third, instead of one fourth remission and that in the items Nos 10 and 15 being small, does not require any particular explanation.—

36 The increase under the general head "remissions" is shewn to be Rupees 22359 and the decrease Rupees 9,1263, exhibiting the result of a nett decrease of Rupees 6890.—

37 The following statement exhibits the extent of Indigo, Cotton, and Sugar cultivation during the Fusslies $\frac{1262}{1852\text{-}53}$ and $\frac{7263}{1853\text{-}54}$

38 The failure of rains at the respective seasons when Indigo and Cotton are usually sown chiefly accounts for the deficiency in the extent of cultivation of these descriptions of products.—

39 Though there has been no general deficiency in the means of irrigation during the Fusly under review, the supplies which the several tanks received from the rain which fell in March Fusly 1262, were in some degree available for the sugar cane cultivation, and the great demand for Rawpoo Sugar in the previous Fusly, induced many parties to cultivate this description of produce, which will account for the increase in the number of acres occupied in the production of sugar cane.—

The

40 The following statement exhibits the quantity of American Cotton seeds distributed to the ryots, in the villages of the several talooks, the extent of land sown, and the quantity of Cotton produced in Fusly 1263 — 1853-54.—

Names

Fort St. George 11th June 1855

41 From the above State=
=ment it will be seen that american
Cotton seed was distributed to the
ryots in 122 villages in 10 talooks, but
in only 100 villages was it sown - Of
these, with the exception of Dorasamy=
=pully in the Doovoor talook, the
crops turned out a complete failure,
owing to the deficiency of rain, blight,
and other causes - In Dorasawmy pully
3 seers of Cotton seeds were sown on
half an acre of land assessed at
Rupees 5-13-8, which yielded a
return of 18 seers of seed and 6 of
cleaned Cotton - this however is
not sufficiently remunerative to en=
=courage the ryots in the extension
of the culture of this description of
produce - and from the re=
=peated failures they have ex=
perienced in the growth of this
commodity

Fort St. George 11th June 1855

commodity during past years they
have come to conclusion that the
climate of this district is unfavor=
=able to the production of this
particle. -

42 The accompanying
return No. 23 exhibits the details
of each item of Demand Collection
and Balances under the head
"Sewoy Jumah" or extra revenue,
as also the particulars of recover=
=able and irrecoverable balances,
which have reference to the entries
in the Statements referred to in

43 The Subjoined
Statement exhibits the net brizy
for Fusly $\frac{1263}{1853\text{-}54}$ in comparison
with the preceding. -

Statement

9208 Fort St. George 11 June 1856

Sir

The explanation previously given, in respect to the nature of the season, is equally applicable to the falling off of the Levy, as shewn in the fore-going statement.—

2nd Annexed is a State-ment which shows the particulars of collections from the outstanding balances in Fusly 1263, in comparison with the preceding ones.—

11th June 1856 Fort St. George

Net decrease Rupees 24,958

Fort St. George 11th June 1856.

56. The increase in the amount of Collections under the head "Abkarry", and "Sundry Small Farms and Licences", is ascribable partly to the increase of rents derivable from these sources in this Fusly- than in the past, and partly to the recovered portion of the Abkarry Rents appertaining to Fusly 1262 / 1852-53 having been included in the collections of the Fusly under review - these together with the item No. 12 make a total increase of Rupees 10,785-

57. The decrease in the amount of collections Viz.t, Rupees 2,49,298 under the head "Land Revenue" is owing to the Rarey in this item being smaller by Rupees 2,15,591, and to the collections having fallen short by Rupees 33,707 in the current Fusly when compared with the past, consequent on the unfavorable nature of the season, that under the head "Maturpha" No. 5, amounting to Rupees 3,743, is attributed to the reasons above assigned; that in the item of "Stamps" No. 6 Viz.t, Rupees 2,547 has been occasioned from a smaller quantity of Stamps having been disposed of in the current Fusly as explained

Fort St. George 11th June 1856.

explained in the report of the Extra Sources of revenue - that in the "Tanaby Jasty" or remitted cultivation to the amount of Rupees 1,467, is ascribed to the Rarey under this head being comparatively smaller in the Fusly 1263 / 1853-54 that under the head "Maramut tufferic" No. 8, amounting to Rupees 989 has arisen from a smaller balance remaining outstanding in the arrears of the previous Fusly 1262 - that in the item of "Fines" No. 9, Viz.t, Rupees 2,059, is owing to smaller sums having been levied from the village officers - and that under the heads Nos. 10 and 13 amounting to Rupees 738, is owing to the collections of the value of Abkarry Moochilkas, and the amount of Stamp duty refunded having been carried to the head "Refund of sundry Sevoy Jumah."-

58. The several items above referred to, together with the sum of Rupees 2, being the decrease in the collections of the item No. 11, make a total of Rupees 2,60,743 - Of which Rupees 10,785, the amount of increase in the collections alluded to in the preceding para being deducted, a net decrease of Rupees 2,49,958 will be apparent -

59. The following Statement exhibits the settlement of all items in the Fusly under review in comparison with the preceding one: -

				Net Decrease	211,24

50 The cause of the decrease in the land revenue No. 2 has already been explained in paras 8 & 16 of this report, and the reasons for the increase and decrease in the items Nos. 3-4-5 and 6 will be seen in my report on the Extra sources of Revenue for the current fusly, transmitted to the Board of Revenue on the 8th November last.—

51 The decrease in the item No. 7 has arisen from such portion of Zuftee enam lands as appeared indisputable, and the proceeds of which had hitherto been carried to account under the head "Sayer jumah" having this year been incorporated with circar lands, and from a smaller sum having been collected on the enams of village servants, who were suspended for offences committed by them - which forms a portion of the "Tanakyee jasty" - that in No. 9 is attributed to only a fewer number of the village servants being convicted of such offences, whereby the amount of fine leviable was inconsiderable - that in the items No. 10 and 13 has been occasioned from the value of the Abkarry Moochilkas and the amount of the "refunds of stamp duty" having been excluded from the demand under the general head "Sayer jumah" - Extra Revenue for reasons stated in para 47 of this report.—

52 There has been an increase under the head "maramut tufferic" No. 8, which is ascribed

ascribed to a certain sum belonging to Fusly $\frac{1262}{1852-53}$ which was not included in the demand of that year on account of the non-receipt in time of the accounts showing the extent of work performed to tanks and channels in the several talooks, having been brought to the account in Fusly $\frac{1263}{1853-54}$ — The small increase in the items Nos. 11 and 12 calls for no remark — There has been however a net decrease of Rupees 2,11,245.—

53. As the statement referred to in para 19 of this report merely exhibits the comparison of the revenue, between the past and the preceding Fusly, and the transmission of the tetuge Statement containing the particulars of the talookwar and villagewar details of revenue having been dispensed with, in consequence of the recent orders from the Board of Revenue, the talookwar statement, usually entered in the reports of the previous years, which exhibits the different items of increase and decrease compared with the previous Fusly, and the centage of the same, is subjoined below.—

55 Notwithstanding the unfavorable nature of the season, the ryots having used every exertion to bring, as much as they could, under cultivation, several description of punam lands as also new well lands and the putturn of the dry, wet and garden crops being in general remunerative, a greater portion of the revenue has been realised without the necessity of resorting to coercive measures, such as the distraint of property &c.a - The balance however outstanding at the end of the Fusly will appear to have been somewhat larger in comparison with the preceding year - a considerable portion of it has since been realised - The large outstanding arrears is ascribed to the prevalence of cholera in many places before the close of the Fusly and to the demise of many ryots which prevented the realisation of the circar revenue :—

Of

56 Of the balance outstanding as shewn in column 7 of the above statement, that portion which is recoverable will hereafter be collected - with regard to the irrecoverable balances due by persons dead, emigrated and impoverished, as well as by those whose crops perished, and by the poody enaindars whose lands were left fallow, the particulars of the several items shall be carefully scrutinized during the annual settlement of Fusly $\frac{1264}{1854-55}$ and only such sums as are found to be irrecoverable shall be recommended to be struck out of the accounts.—

57 The following statement exhibits the details of arrears outstanding in the district from Fusly $\frac{1258}{1848-49}$ to $\frac{1262}{1852-53}$:—

Fort St. George

11th June 1855

58 From the foregoing statement it will be seen that Rupees 1,701-1-10 under the head land revenue and Rupees 324-15-8 in that of Savay Jumah or extra revenue, total Rupees 2,026-1-6 belonging to Fusly 1262 (1852-53) is irrecoverable as particularised in the enclosed statements Nos. 23 and 24. I request the Board of Revenue will procure the sanction of Government to have the same written off the accounts.—

59 In the Fusly under review no coercive process, such as the distraint of private property, puttah lands &c. of the ryots was employed in connection with the realisation of Government revenue.

60 Out of the amount of "Tuccavi" or advance made to Ryots in the past Fusly, no outstanding balance remained. In the current Fusly a sum of Rupees

Rupees 250 having been advanced, Rupees 200 have been realised within the close of the year, and the remaining Rupees 50 is the amount of advance made to the Ryots of Midooloor in the Cumalapoor taluk, to enable them to have a well repaired, which will eventually be collected during Fuslies 1264 and 65 (1854-55).—

61 The annexed Statement shows the charges of the management and collections, on account of the revenue charitable and religious allowances &c., chargeable against the revenue, and the proportion they bear respectively to the gross collections. The necessary explanation for the increase and decreases of each item is given in numerical order.—

Items	Fusly 1262	Fusly 1263	Comparison Increase	Comparison Decrease
1 Land Revenue	2,19,412	1,93,599	"	25,813
2 A. & Karry	11,117	12,407	920	"
3 Sundry small farms and Licences	16,156	17,202	1,046	"
4 Moturpha	15,071	14,840	"	231
5 Stamps	27,499	24,749	"	2,750
	2,50,255	2,52,797	10,336	2,60,294

Net decrease 2,499 68

Land irrigated by the tanks Wallahs and wells.—

" 1263	1,20,941	90,718

9992

Parish of Yarrow 11 June 1845

1 The increase in the charges for "Collectors Salary" arose from this allowance having been charged for the whole year in the Current Fusly, whilst in the previous one, the Salary of the late Collector Mr. Forbes for May and June not having been charged to this Collectorate within the Fusly, but brought to account in the Fusly under review — a sum of Rupees 2,600 out of Mr. Forbes' Salary had been carried to account under the head "refund of revenue charges" during the period of his absence on leave in the previous Fusly.—

2 The decrease in the "deputation allowance" is attributable to the officials who were acting for the Collector Subaud Head Assistant Collectors having been confirmed in their respective offices from the 1st of September 1853.

3 The fixed tent allowance of the Head Assistant Collector, Mr. Blair, was charged to another Collectorate in the preceding

preceding Fusly on account of his holding an acting Appointment, whilst in the Fusly under review, this as well as the Tent allowance of Mr. Forbes for May and June of the previous Fusly, which remained unadjusted upto the close of that year have been charged to this Collectorate.—

5 The decrease in the charges of the "Salaries of the Native Establishments" of the Hoozoor taloolks &c. arose from the present Head Shristadar drawing a lower rate of Salary, from no arrears of Salary of the Tahsildars belonging to the previous Fusly having been disbursed in this as was done in Fusly $\frac{1262}{1852\text{-}53}$ and from a portion of the Salaries of certain Servants, whose places had become vacant, not having been charged in the accounts for the period they were vacant.—

6 The increase in the "sundry=ward charges" may be ascribed to the augmented rate in the sale of lamp oil.—

7 The Salaries of certain village Cutcherries

Cuttoobadies had, upto Fusly 1262, been paid by deduction from the Kistbundy beriz, but the Board of Revenue, in the Extract from their Proceedings under date the 15th November 1852, directed that this payment should be charged to public accounts, an additional charge is therefore apparent in the Fusly under review.—

8 The decrease in the item "Extra revenue charges" is owing to the Salaries of the Extra Carkoons and Goomastahs appertaining to Fusly $\frac{1261}{1851-52}$ having been charged in Fusly $\frac{1262}{1852-53}$ and to a portion of their Salaries for Fusly $\frac{1263}{1853-54}$ not having been disbursed to them within that year — to all unnecessary expences having been avoided in the remittance of treasure and to certain of the charges which are of an uncertain nature having fallen short.—

9 The decrease in the "repairs of tanks and watercourses" has arisen from a smaller sum being required for putting the above in repair.—

The

10 The increase in the item "Pagoda and Masque allowances in lieu of resumed lands and privileges" has been occasioned from a portion of this allowance for Fusly $\frac{1262}{1852-53}$ having been charged in the current Fusly.—

11 The increase under the head "Pagoda and Masque allowances" has arisen from a portion of this sum which was not disbursed in Fusly $\frac{1262}{1852-53}$ for certain causes having been charged in the present Fusly.—

12 The decrease in the item "pensation in lieu of resumed lands, offices and privileges" may be attributed to the demise of certain pensioned Poligars — and to the allowances of some others for a few months not having been charged consequent on their absence from the District.—

13 Tho' there has been an increased expenditure under this head,[7] amounting to Rupees 163 consequent on the orders of Government No. 689 under date the 24th

[7] Pensions and charitable allowances chargeable on the revenue.—

Fort St. George 11th June 1855

2d. June 1853, annexed to the Extract from the Proceedings of the Board of Revenue dated 4th July 1853, to continue as life grants or jeemiahs to certain parties as a means of subsistence in lieu of the allowances granted for the celebration of the Hindu and Mahamedan festivals, but subsequently discontinued, yet the allowance amounting to Rupees 1,330 granted to Syed Mahammed Khan, was not disbursed in consequence of his demise; a decrease will therefore be apparent.—

15 The decrease in this item is owing to the absence of certain pensioners during the Fusly.—

16 There has been an increase under the head "Pensions revenue & superannuation" which may be ascribed to a greater number of pensioners in the present than in the past Fusly.

20 The decrease in the item "Repairs of revenue buildings" is owing to no

* Pensions to the families of the deceased Servants &c.

Fort St. George 11th June 1855

repairs being effected for buildings of this description in the present Fusly.—

23 It has been hitherto customary to make the refund of Maturpha to the Surva Enam Jagheerdars of one Fusly in another, but this mode of proceeding was considered objectionable, and arrangements made for the disbursement of the sum refundable for Fusly 1263 (1853-54) within the close of that year; this will account for an increase in this item.—

24 The decrease under the head "commission to the Darogah and Vendors" is owing to the revenue in this item being smaller and to the amount of Commission for the month of June Fusly 1263 (1853-54) not having been charged in the accounts within that Fusly.—

62 The remaining items Nos. 1 — 17 — 18 — 19 — 21 — 22 and 25 do not call for any particular remark.—

63 The annexed Statement drawn up for a series of years affords a comparative view of the circar and enam cultivation.—

65 The present Head Sheristadar thro whose instrumentality, the system of Keeping the accounts relative to the revenue which is in force in the Bombay Presidency, & which has reference to the report made by Mr. Stokes Collector of Guntoor dated 12th February 1847, and to the Extract from the Proceedings of the Board of Revenue under date 14th June 1847, was introduced into Guntoor; as best adapted and highly deserving of notice, for checking the frauds exercised by the village officers and other public Servants, was transferred to Cuddapah in November 1852 - Subsequently the system of accounts Keeping by the village Servants in this District, such as the accounts of Collections, and the receipts granted to the ryots in acknowledgement of the several Kists paid by them, having appeared very objectionable and irregular, it was dispensed with, and in conformity with the form introduced in the Bombay Presidency, the Books enoted in the margen numbered consecutively

x 1 Kerdy or account showing the demand collection and balance
2 Ratha or account showing do - do - of each village.

each

each page stamped in the corner, with the Collectors official seal and the last page signed and sealed by that Officer, have been distributed to all the Talook or Thasildars with instructions to Keep in their talook Cutcherries "Kirdy book" which exhibits the annual demand and the daily collections and charges, as also another book named "Kattah," shewing the particulars of demand collections and balance &c. of each village - Similar books were also forwarded to be distributed amongst the purrums of each village, with a view to having the same particulars as regards each individual ryot entered in them - Independent of this, receipt books, which might serve for three years, have been distributed to all the ryots of the several villages in three talooks; those for the remainder not having been in readiness, this book will show the arrears and current demand, collection and balance of each ryot, at the close of the Fusly, as well as the amount of remission granted to him

The

66 The introduction of the system of furnishing receipt books to the ryots has, for some time past, appeared to me to be imperative, as upon enquiry into complaints of Curnums and Reddies receiving and embezzling money, it was found that receipts could easily be fabricated after the complaint had been preferred - those granted were in such small scraps of dirty paper, it was difficult for the Ryots to preserves them - The present book being stamped with the Collectors seal will show the amount and the time at which each ryot paid his sist, whether by assignment or ready money - I propose that no receipt ought to be accepted except it be entered in this receipt book, signed by the Reddies and Curnums, who ought to do so on the Collection of each sist. -

by. With a view to explain to

the

9234 to 40 Fort St. George 11th June 1855.

the Board of Revenue the mode in which these accounts are kept. Copies of "Kirdy" Katha" and receipt books prepared for the village of Toorkapully in the Camalapoor taluk, have been embodied in the village accounts & usually forwarded with the report.—

68 The report received from the Sub Collector relative to the annual settlement of revenue of the talooks forming the Sub division for Fusly 1263 / 1853-54 is herewith forwarded which requires no particular remark.—

69 I have the pleasure to report that I have received the greatest assistance from the Sub Collector Mr. Wedderburn, and from the Head Assistant Mr. Blair, who have been very zealous in their respective duties.—

T.M.J.

The

9241 Fort St. George 11th June 1855.

70. The Head Sheristadar, Shreenevasarow, continues to perform his duties with the same zeal and assiduity for which he has been noted and obtained testimonials, is unwearied in the examination of Accounts, and bringing to notice any abuse or neglect he discovers— he fully bears out the high character given him by the several officers under whom he has served.—

	Total	339	12	30	6	3782	2669	6451.

There is a great decrease of Cultivation owing to the want of rain. the average total yearly fall in the 3 + Talooks was 36 measures or 18 inches. whereas in the preceding July it was 83 measures or 41½ inches. Hardly any rain fell between July and October. in which latter month it was by no means generally plentiful. Some small Tanks received a full. & others a partial supply. The number of Tanks which received no water whatever in the previous July is doubled in that under report. The rain in November was slight. and soon ceased. On this account a greater extent of Dry and wet lands were left waste than in the preceding July. and Town lands did not yield a full produce while in some places the wet crops withered.—

Grand Total — 190 / 25,127

9289

Fort St. George 11th June 1855.

Of the total number of puttahs about 2/3 or are within 10 Rupees.

VII The season in the Sub Division having been unfavorable the produce of all descriptions of grain in the Sub Division was 9/15 of a full crop as particularized below, but as the prices of all agricultural produce were higher than in the preceding Fasly, the ryots were able to pay their Kists without difficulty.—

Dry produce

In some places Dry lands were not ploughed for want of rain in some places rain fell after the expiration of the Sowing season. but in some places jowar in black soil which does not require much water, yielded a full crop. Blight and want of sufficient rain greatly injured the other Dry crops during their growth the produce of which may be estimated from 12/15 to 2/15 — In a few places the crops

crops withered. Crops of Cumpil, and gingely oil seeds were entirely destroyed by blight. Horse and bengal gram and wheat were not sown in several places for want of rain in the month of November which is the favorable season for their cultivation. The Dry crops on the whole are 4/4/10 of a full crop.

Produce under wells.

Jonna and turmerick &c. in cartie Kunnoo 1st crop produced well. Some Sujja, raggy, and chillies &c. were injured by blight. Corra (a small Dry grain) & gingely oil seeds, jonna and tobacco &c. in the vyaakh or 2d crop did not yield fully from want of sufficient water in the well the produce under wells on the whole is 13/15 of a full crop.—

Produce under Nullahs.

In some places paddy under Nullahs in cartie Kunnoo or 1st crop gave full produce, in some it was injured by blight. in some lands were left uncultivated in vyaakh for want of water in the spring channels, and

and some lands yielded a small produce the average produce under Nullahs is 9/14/15 of a full crop.

Produce under Tanks.

Paddy and Sugar cane &c. of 2 crops under the large tank of Cumbum, and of the 1st crop assisted by well: under the large tanks of Bunderail and Poroomanillah, and under some of Doopaud, which had a portion of the water of the preceding Fasly gave a full produce &c. There being insufficient water in several Tanks for the first crop the produce varied from 12/15 to 1/15, and some of it withered, and in several tanks there being no water at all for the 2d crop, consequently land was not cultivated the whole produce under the Tanks is 10/12/15 of a full crop.

Sanitary State.

Of diseases Cholera prevailed most extensively from June 1853 to June 1854, 4385 persons were reported as having been attacked with cholera and 2915 died of it. and 1558 persons of other diseases. Medical assistance was afforded by the Sub Collr. Dresser who also assisted the vaccinator taken on Circuit in successfully vaccinating 882 persons. The great heat obtaining from March to June and the scarcity of forage & water caused a greater mortality among the Cattle than in the preceding years.—

9292 | Fort St. George 11th June 1855.

Price of grain

Cotton	538	138	172	34	"
Indigo	45	53	57	4	"

9293 | Fort St. George 11th June 1855.

The increase in the price of all grains, is ascribable both to their deficient production, and to a large exportation by the Merchants of Kurnool and other Districts.

Rice is used by the higher classes as food and is sometime exported when a scarcity prevails elsewhere. Samay, Raggy, Sujja, areca, and cocoa form the food of the labouring population - wheat Bengal gram and cotton are cultivated according to the local demands which is not great. Indigo is chiefly exported.—

Dittum IX The subjoined Statement shews the Dittum or land in occupation as compared with the preceding Fasly.—

Same

Some poonaca land which was not agreed for was afterwards cultivated with Fusly sixty and entered under that head. hence an increase of assessment and decrease of lands.—

There is a great decrease of the Dittum caused by the operation of the new rules admitting of ryots throwing up what lands they cannot cultivate without consideration of the former rule of relinquishments of equal shares of good and bad, which obtained in the Bookoonnanah of the District Entire holdings or entire fields left waste be the prior & subsequent to

to Fusly 1259 by parties who have no other resources (such as new well lands, or enamlands or who cultivate the enams of others or slightly assessed lands) and lands left waste by the death removal & poverty of other parties, have been removed from the Dittum Lands lying waste, owing to the death and removal of the cultivators, and which no one else would take have, as usual been also written off, consequently 8437 acres of land assessed at Rupees 15621 were taken off the accounts of Dittum. It appears that the ryots did not agree to take up lands subject to Teemajaisty & Fusly to the amount of Rupees 9321 for want of pain.—

Calculating waste &c.

X The following statement shews the Dittum cultivation & waste.

Fusly

9297

Fort St. George.

	Total	494659	450344	44315	469717	401875	67842	24066	539

Fort St. George 11th June 1855.

There is an increase of Rupees 24,066 of Cabooliaty waste in whole numbers of fields above the preceding Fusly, caused by want of rain & Some dry and Poonaah lands liable to Seerwajasty and under cabooliaty in the preceding Fusly were remitted, whereas in the Fusly under review they were entirely written off the Dittum. Therefore a decrease of Rupees 539 appears.

Actual Cultivation.

XI The undermentioned Statement shews the comparative view of the Cultivation for the Current and preceding Fusles.

Total		233757	

The decrease of cultivation is attributable to the reasons assigned in para 4 & 7, and to the death in some families of 2 3 or 4 persons of Cholera, and to the loss of their cattle for want of forage, owing to which calamities they were unable to purchase new cattle or cultivate their lands.—

Calculated waste charged to Ryots.

XII The undermentioned statement shews the waste lands charged to Ryots.

1	Poreas 2	After Jamabandy ment 3	Collection after deducting remissions. 4
Land left waste by Ryots through neglect.	17187	11,804	8,885
Land retained for grazing Cattle	331	253	180

	Grand Total	1,30,061	119114	4818	15765

Shamelat Bunjer

There appears a less remission under the head of Shamelat Bunjer or portions of fields left waste, as the lands of deceased, removed, or indigent ryots were wholly excepted from the Dittum and the ryots who threw up bad land took good in its place, shamelat of preceding Fasly was totally left waste in this Fasly and written under "whole numbers left waste"—

Shavy or withered crops.

Notwithstanding the unfavorable appearance of the season much wet land was sown in the hope of rain subsequently falling. This not having proved the case the sown crops withered & unavoidable remissions were granted after due enquiry to the amount of Rupees 528 in Cumbum, Rupee 402 in Dornapand & Rupees 4539 in Bidwail Talooks

Lands flooded.—

There is less remission for lands sown & flooded in the beds of Tanks in this than in the preceding Fasly from water of last Fasly having remained in the large Tanks, & from the Tanks not filling in the Fasly under review.—

The

Lands destroyed by inundation

The lands to the value of Rupees 345, which were inundated in the preceding Fasly by the breach of Tanks were after the repair of the Tanks cultivated in this Fasly-hence remission under this head therefore appears.

Cayeda Kanoot, Seerwa and Pymaysh Cummies and Shrotriemdars share.

The decrease under the heads of 5.6.8 9.10 is ascribable to the less cultivation, to the writing off from Dittum, & to the remission of the whole assessment, in some cases, of the shavy or withered crops.

Allowance for Reddies Cuttoobadies & Davastanum

The decrease under the head Unowing to the salaries (Rs 9) of the peddy of Ravoolapully, (Rs 22) of the shroff of China Lumbum in Lumbum Talook, & (Rs 15) of a cuttoobady of Canyalarcad in Bindwail Talook being paid from the Treasury by Circular Order of Board of Revenue dated 15 November 1852. and under 12 to a recommendation having been made by the Collr to the Board of Revenue for the payment of Rs 70 the money allowance of Davastanum of Mullaswara swamy, from the Treasury instead of it's being remitted from the Beriz of the Village of Kundanavarum, the remission was not granted pending the reference.

Sugar cane Cotton & Indigo

XIV The following Statement shews the extent of land occupied for sugar cane, cotton, & Indigo.

Talook

9305 Hartfield George 11 June 1853.

Sugar cane

Sugar cane is often cultivated by means of small holes made in little water in the Land.—

The decrease in the cultivation of cotton of 3 Saints is attributed to the want of rain at the time of its cultivation.—

Cotton

The increase in the cultivation of Indigo in Cumbum Talook, is owing to the increased facility of water in Cumbum large Tanks and the profitableness of its culture: to the diminution, & the decrease in other articles, is owing to the want of rain.

Talook is owing to the want of rain.

Indigo

Ready money collections.

The ryotwar collections.

Fee

9307 Fort St. George 11th June 1855.

Sodee on Enam lands.

The decrease under the head of Sodee or quitrent is owing to land charged with kumgany or temporary sodee being uncultivated & therefore not charged, and again to some Khayam or fixed sodee land relinquished from non payment of sodee, & from death removal, and poverty of Enamdars without heirs) which had been long ago resumed, and held under Amany (and as such, if its produce when cultivated by ryots on behalf of Government exceeded the sodee it was formerly entered as Sevoy - jummah) having been in the Fasly under review, during the Settlement, entered in the Government Ayacut.—

Enamaty Teerwajaty heerarghy & Enamaty Jaffricks.

The decrease of Rupees 668 in Enamaty Teerwajaty (Extra tax on enam lands for circar water) and heerarghy, and Rupees 831. in enamaty Jaffricks (tax imposed on Ryots cultivating enam & lands) is owing to the less cultivation of lands of those discriptions.—

General result.

XVI The abstract statement shews the general result in Comparison with the preceding year.—

Fort St. George 11th June 1855

Rupees 147 1 8 in Budwail Talook on account of destroyed indigo seeds & sown in 2d crop, and Rupees 133 12 9 in Cumbum Talook on account of the deficient produce of Darun lands of poor ryots who paid up as far as their produce went, total amounting to Rupees 280 14 5 are under consideration.

With regard to the remaining amount orders have been issued to recover the undisputed amount. An enquiry will be made into the disputed balance, and exhibited in the next settlement report.—

Coercive process.

XIX No coercive process was employed in collecting the arrears of Revenue except that orders were issued to destrain the property of absent & defaulting ryots, who however, previous to the execution of the Orders paid up their balance.—

Balance of previous years recommended to be struck off.

XX The following Statement exhibits the arrears of Balance of the former Fasleis.—

Fasleis

9313

Fort St. George 11th June 1853

The amount of Rupees 1188-4 of Fusly 1261 under the head of Irrecoverable was recommended to be written off the accounts in the settlement report of the preceding year but no sanction having been received it is still entered in the ca balance. The amount of Rupees 129-12 1 ascribed to the death, desertion and poverty of the ryots; Rupees 169. 11-9 of those whose indigo seed was destroyed under Cumlum Purge Tanks; Rupees 55-1-0 of the quit-rent of the Enamdars who relinquish-ed their enams; and Rupees 11-15-9 on account of the Sown lands destroyed &c. total amounting to Rupees 369-11-½ being considered irrecoverable, after personal enquiry at the time of Settlement

38.39 Order thereon

Ordered to lie over. H.

No 41.

To B. Cunliffe Esqr Secretary to the Board of Revenue, Fort St George

40

Bd No 1200. From the Collector of Cuddapah

Sir,

I have the honor to forward the four enclosures of Petition No 200 of 1855, as required in the Board's Official Memorandum of the 23rd Instant.

Cuddapah Collrs Office, on circuit at Royachooty, 3rd April 1855. [Signed] M. Murray Collector

Order thereon

Ordered to be recorded.

Read again letter from the Collector of Chingleput dated 27th November and entered in Consultation 17th December 1854.

42

Bd No 1474.

Proceedings thereon. As the permanent results of the settlement will be shewn in the "General Report" submitted to Government the Board consider it only necessary here to make a few observations on various parts of the Collectors report

2- The Board observe that the Collector has omitted to state the places where the Summabundy of the several Talooks was made and that this information should invariably be given in Conformity with their orders of the 22nd November 1849.

Ju-

	Meerassi	Poyacarri	Total
Fusly 1262 - - - - -	2,778	3,270	6048
Deduct Number - - - -	1582	Add 1582	"
Remainder -	1,196	4,852	6048
Fusly 1263 - - - - - -	1,296	5,021	6,317
Increase - - -	100.	169.	269.

3- In Statement No 2. B. it is stated that 1582 Poyacarries who were erroneously entered last fusly under the head of Meerasidars have been transferred to their proper head, but it does not appear in what Talooks the Transfer has been made, this omission should be explained. The proportion of Poyacarries to Meerasidars holding Puttahs in the Nayer Talook seems to be very great and the Board request explanation on this point.

4- Statement A is headed "prices of grain" instead of "prices of paddy". It should have shewn whether the price is that of 1st Sort or the average rate of the 1st and 2d sort of Paddy.

	Fusly 1262			Fusly 1263		
As per Statement A Paddy per Grace	5	7	3	2	101	14	4
B. Paddy 1st Sort per Grace	6	6	5	11	108	14	8
do — 2d — do —	5	9	12	2	101	15	4

The Marginal figures shew the entries in statement A as compared with those in statement B. The entries in the latter agree with those in the Monthly price list, but it does not, as it should, give the price from the 1st to 11th July 1854, and without which the Statement cannot be regarded as correctly representing the price of Fusly 1263.

5- The amount of Caboolaty Bunjer entered in Statement A No 9 includes only the sum remitted, whereas the Amount Charged* should also have been included.

The

† Rs 1576 as in para 12 of report.
* Vide statement No 11.

Para 13- Rs 88,202 / 47718 / Total 1,35,920.

6- The Board sanction the remissions granted in Fusly 1263, amounting to Rupees 1,93,4 82-12-2-

7 In Statement No 18 the assessment on lands subject to Shavy and Palamistum are entered at Rs 88,202 and Rupees 47,718 respectively, but the remissions for both are given in the gross at Rupees 1,98,4 instead of being exhibited separately.

8- The Board concur with Mr Smollett in the opinion expressed in para 22 of his letter that there exists no good reason why the Chingleput balances should always be so large, and Mr Shubrick's attention is requested to this point.

	Rs a P
	3,25,626-14-6
Deduct	2,176-9-2
	3,23,450-5-4
As per 11th July Return	3,23,561-12-3
Difference	111-6-11

9 The sum Collected within the Fusly on account of arrears of former Fuslies would seem to include Rs 2,176- granted as remissions- Deducting this however the remainder differs from a similar entry in the 11th July Returns by Rupees 111, Referring to Statement No 24, it is observed that the first figures entered under this head have been erased and replaced by others. It is therefore inferred that the entry was first made according to the 11th July Returns, and afterwards found wrong. If this supposition be right the entries in the D.C. and B. Statement

Fort St. George 11th June 1855.

Statement of Fusly 1264, must have been corrected, but up to November they contain the same Amount as that entered in the 11th July Returns. The Board therefore request explanation respecting the Discrepancy.—

10— The Collector is also requested to inform the Board in his next settlement Report what enquiries he has made concerning the old balances referred to in para 28 of Mr. Smollett's letter, and what he proposes doing.—

Para 28. 11— Under the explanation afforded, the Board will be prepared to recommend the writing off the sum of Rs. 4,381 being a portion of the irrecoverable balances of a date prior to Fusly 1262.

12 It is stated that no advances were

Para 30. made for Cultivation in Fusly 1263, but in Statement No. 25 the sum of Rs. 3,436-8- is entered on that account. Referring however to the statement of Collections and Charges it is observed, that the sum in question constitutes the amount advanced for excavating new and repairing

Infn 12th October 1854. old Wells under the sanction of Government dated 30th April 1854. This item should not have been entered under the head of advances for cultivation, but should have been

Fort St. George 11th June 1855

been separately exhibited by opening a new Column for it in the Tuscany statement.

13 The Board observe that the payments of Pensions,

Para 31. Charitable, Pagoda and Mosque allowances should not have been included in the calculation of the centage of the cost of the management and collection of the land Revenue, but should have been debited to their proper head of charges upon the Revenue.—

Br. No. 1470

From the Collector of Chingleput —

Sir,

In the Copies of correspondence which accompanied Extract from the Proceedings of the Board of Revenue under date the 23d April relative to the extent of the property of the Roman Catholic church at St Thomas' Mount certain correspondence which passed on the subject in 1813 between the Collector of Madras, the Board of Revenue and Government has been altogether lost sight of. Copies of this correspondence formerly produced by the Vicar at St Thomas' Mount are now withheld by him and in reference to them it was decided by my predecessor Mr Cochrane that the church property never extended beyond the base of the Mount.—

2 The Acting Collector of Madras has been able to furnish me with only a portion of the correspondence above referred to. I have the honor therefore to request that a copy of the communication marginally noted may be forwarded to me from the records of the Board's Office to enable me to dispose of the case.—

From the Collector of Salem ---

Replies to the Board's Circular of the 15th Ultimo on the Subject of Enams now liable to report on lapse both above and below 2 Cawnies.

Received 8th February 1855.

Sir

With reference to the Board's Circular dated the 15th Ultimo. calling for certain information in the 2 forms enclosed, on the Subject of Enams now liable to report on lapse, both above and below two Cawnies; I have the honor to submit two Statements prepared in accordance with the forms, and to explain, as follows.

2. The Board's form. No. 1 contains two general items Viz. "unrestricted", and "specially restricted to one or more lives". As there are no Inams of the latter description, the 2d item has been omitted. The Column 7 of Statement. No. 1 has been left blank as the accounts now available in my Cutcherry do not furnish the particulars required. These particulars will be obtained from the Talooks. The details for each of the items in Statement. No. 1 were extracted from the Statement of "Enams under two Cawnies." which accompanied my letter of the 24th. March last. The Enams included in the 3d item of Statement No. 1. Consist of those known under the several names of "Vadavarthy", "Pooranum", "Zemindary" &c., bearing numbers from 2 to 25 inclusive in the same Statement. There is -

X Hyrattee - Bhutvurty - Shotrietum &c.

is no such Enam as "Shotrium" in the Salem District.

3. The latest accounts in my Office on furnishing the entire Ayacut, both for the "Jaury" and the "Amany" portions of the District, belong to Fusly 1247. The details given in Columns No. 1 and No. 2 of Statement No. 2 appertain to that year. The Ayacut accounts prepared in some of the subsequent years, inclusive of the [+] one for Fusly 1263. apply to the "Amany" portion only. Columns 3 and 4 in the aforesaid Statement No. 2 exhibit the average cultivation of five years in the amany portion of the district, and to this is added the total beriz of the Permanent portion, as the average extent of cultivation in the latter portion cannot be ascertained. The details given in columns 6 to 9, general heading "aggregate Enam Ayacut", for each of the items in "Enams now subject to report on lapse", exhibit in the gross the details contained under the two headings "Enams of two Cawnies and under", and "Enams above two Cawnies" in Statement No. 1. In this account the details for each item include the Enams belonging to the same class in Villages known as "Surva Enam", "Kayfm Jodigy" "Jaghears given for Service rendered to the Company", and "Enam Village given for Pagodas in

[+] Summabundy Statement No. 4.

in Poliputs". The details belonging to the two last items given in statement No. 2 Viz. "Village and other Service Enams" and "Endowments on Pagodas, Mosques, Chuttrums &c." do not include the particulars of the same items in the "Surva Enam," and the other Enam Villages above alluded to. The particulars now given correspond with the particulars given in statement No. 8 which accompanied my Summabundy Report for Fusly 1263. As the Surva Enam Villages and the other Enam Villages referred to are wholly alienated, the Service Enams and Endowments on Pagodas &c. in each of those Villages, are included in the gross extent and assessment of the same Villages in the same Statement No. 8.

4. The last point which I would notice in both the Statements is the Jodigy or Quit rent. In some cases the tree tax was added to that of the land and the quit rent determined on the entire assessment. The amount of Jodigy therefore entered in the statements is in such instances not solely on the land itself, but owing to a want of the necessary data this defect cannot be remedied.

B.d No. 595.

From the Collector of Salem.....

Replies to Board's Proceedings of 21st September 1854. relative to the information required by the Honorable Court of Directors on Cultivated waste, Enam and barren lands in the Salem District.

Received October 4th

I have the honor to acknowledge the receipt of your letter* adverting to an Extract from the Proceedings of the Board of Revenue, dated the 21st September last, calling upon Collectors to furnish any further particulars in regard to their Districts which may tend to make the information required by the Honorable the Court of Directors, as shown in the papers which accompanied the Proceedings, more complete; I have the honor to state that the particulars given by the Board in the letter to Government so far as

* Honorable Courts letter 30th May 1854 with enclosures. Board's letter to Government 24th August 1854 with enclosures A. B. and C.

Fort St. George 11th June 1855.

as this District is concerned, appear to be nearly all that can be furnished. In enclosure B the information required in the Courts return as to the relative proportions of Cultivated, Waste, Enam, and barren lands, is shewn for the ten Districts noted in the Margin but not for Salem. I therefore submit herewith a statement prepared in the same form for this District.

The Board observe that columns 7 of enclosure B does not include the total of Ayacut in Mootahs, Pollipats, Jagheers, Zemindaries &c. In the Statement now forwarded I have supplied that information. The particulars shewn therein have been extracted from the Ayacut accounts for Fusly 1214, which are the latest returns in my Office exhibiting the information

* Columns 8-9- and 10-

† 1- Nellore. 2- Bellary. 3- Cuddapah. 4- Kurnool. 5- Chingleput. 6- South Arcot. 7- Trichinopoly. 8- Madura. 9- Tinnevelly. 10- Coimbatore.

Fort St. George 11th June 1855.

information both for the "Saury" and the "Amany" portions of the District.

2. The printed return accompanying the Court's letter has been compared with the accounts for Fusly 1260 in my Office and found to be correct, with the exception of Column 11, in which the total area cultivated and uncultivated of the Salem District is given at acres 52,48,000, which is far too high.

3. The area and the population of the Salem District as given in the Trignometrical Survey (India) circulated with the Proceedings under reply, has been likewise compared with the quinquennial returns prepared in Fusly 1260, and transmitted with the Summabundy report for that year. In these returns the number of square miles is stated to be 8,100 instead of 8,200, and the population to be 1190264 instead

Fort St. George 11th June 1855.

instead of 946181. The Statement of the population in my returns must be the more Correct of the two as it is derived from the latest Census.

4th. The Trigonometrical Survey was probably the source from which the gross area in the Quinquennial return was obtained notwithstanding the difference of 100 square miles which now appears. The area assigned in my returns to each Talook is no doubt incorrect. My Office has no means of ascertaining those particulars. The relative incorrectness of some of the areas is apparent on reference to the small skeleton map which was submitted to the Board with my road Report for 1853 dated 31st March 1854. I believe that the boundaries of each Talook are correctly delineated in that map, which was copied from a Map given to me by Mr Pharoah.

From the Collector of South Arcot

Sir,

With reference to Extract from the Proceedings of the Board of Revenue dated 19th Ultimo, relative to the enforcement of the terms of Moochilikas taken from resident Ryots to pay for land made over to them in preference to non-resident applicants, whether they cultivate the same or not, I have the honor to state that of late years there have been but few Darkast made by non-residents, from a belief that the land is always given to the residents rather than to them.- I find however by the records that such agreements, as those in question have been enforced on several occasions.

Rd. No. 1174.

From the Collector of South-Arcot

Sir,

In returning the Petition State that the lands in question were given up on Durkhast to the first applicant - Vide para 2d of his letter

With reference to the Endorsement of the Board dated 26th. April last on Petition. No. 1150 of 1855 calling upon me to report why the land alluded to was given to one individual when several are said to have applied for it collectively, I have the honor to state that the land in question forms part of a large tract of immemorial waste in the Village of Govarapet in the Chellumbrum Talook and that Iyaswamy Pillay, the person referred to by the Petitioners, who is a resident landholder, made an application for about 98 Cawnies of it in a Square.

The

9337

Fort St. George 11th June 1855.

2. The Petitioners also subsequently gave Durkasts for the same land and the matter was referred to Mr. Bamburg the Head Assistant Collector in charge of the Talook, who gave his decision in favour of the first application by Iyaswamy Pillay.

3. 25 Cawnies were immediately made over to him upon his written agreement to pay the teerwah for the Current Fusly whether he cultivated or not. An order was also issued to hand over to him the remaining 73 Cawnies for next Fusly.

4. The unsuccessful parties appealed to me but I saw no reason to disturb the decision of the Head Assistant Collector, which I accordingly confirmed.

5. There was nothing to prevent the Petitioners from applying for any portion of the remainder of the waste tract they might like to have if they were really desirous of adding to their respective holdings but it seemed to me that it would have been inexpedient as well as unfair to give them what had been asked for by Iyaswamy Pillay previous to their own applications.

B. No. 1221

From the Collector

of Madura —

Forwarding Copy of a letter from Mr. Clarke, late Sub Collector, relative to the future taxation and entertainment of establishment on the Pulney Hills

I. B. 23 March 54
B. Pro 22d May
B. Pro 13th July

13th April 1855

With Reference to the Proceedings of the Board dated the 13 July 1854, I have the honor to submit the accompanying Copy of a Letter from Mr. Clarke, late sub Collector, stating his sentiments on the several amendments proposed by the Board and Government of the propositions for future taxation and Establishments on the Pulney Hills contained in the letters noted in the Margin.

2 The distinction between Poonjah and Garden has been abolished in the lower Range, and the Board require explanation why it should continue in the upper. It will be seen that the Garden Lands in the two differ widely, those in the lower Range being strictly Poonjah, while that on the upper is irrigated Land of a very superior description. I had pointed this out in my Settlement Report for

Fasly

Lastly 1260 quoted by Mr. Clarke. It is perhaps a misnomer to call the latter Garden Double Crop Punjah would be truer description, though it is not Cultivated with Paddy a Crop perhaps unsuited to the altitude, but with Garlic, Barley &c. The same water which irrigates two Crops of such products in these lands, after a descent of from one to two thousand feet, brings to maturity in 10 months 1 Crop of Coarse Rice in the lands classed as Punjah. It is obvious therefore, that the assessment on the former should be higher than that on the latter. It will be well perhaps to change the name to double Crop Punjah, the lower being distinguished as single Crop Punjah. Under the present System there is no reason why the term Punjah should be confined to lands Cultivated with Paddy.

3 Mr. Clarke does not state very distinctly what in his opinion should be the Rate on this upper Range Totum, or double Crop Punjah, but says that if it is determined to reduce the Rate thereon to 3 Fanams, it is just that the Punjah lands (or single Crop Punjah) should be reduced to 2 Fanams per Gooly. In that Case

* Note
This Punjah attached to the Villages of the upper range must not be confounded with that of the lower range; tho' it sits far below the elevation of the Village, it may be necessary in distinguishing it from the lower to term it the lower Punjah.

case the Rate on single Crop Punjah and on the Poonjah will be the same. It will be a sufficient indulgence, I think, to charge 3 Fs. per Gooly for the single Crop Punjah (now Punjah) and 4½ Fs. for the double Crop Punjah (now Totum), but if the Board is disposed to be more liberal, I should be sorry to be an obstacle.

4 & 9 Regards Plantains on the lower range, Mr. Clarke proposes experimentally that all existing Gardens be taxed as Punjah, and any raised in future on cleared ground the same, but that where any clearing may take place they shall be charged 10-15 Fs. I beg to support this Recommendation, and would name 15 Fs. in the second case, as the object is prohibition.

5 The Cardamom Gardens, Mr. Clarke thinks, may be charged with the only Poonjah Rate, in which opinion I Concur, it being understood, as stated in the Government Proceedings of the 30th June 1854, that the permission to raise this product in woods on the above Tax confers no right to the Trees, and that the Revenue authorities may grant

grant a short Cowle if they deem it necessary. Hitherto Cardamoms have not succeeded well at this elevation, and a Cowle therefore may foster an unsuitable product, but if the Revenue Authorities are allowed the latitude they will use it with discretion -

6 I agree with Mr. Clarke in thinking

10th May 1853 the number of Curnums proposed in his former Report to be indispensable, and with reference to his Remarks I would beg to recommend two Curnums with Revenue and Police powers, but with salaries reduced to 25 Rupees a month each, the one for the lower range being also a District Moonsiff, and aided by a Boyaroo on 7 Rupees per Mensem - I would also appoint 4 Peons to preserve the Rivals from indiscriminate felling -

7 The Board will observe that no aid in education for the Hills is to be expected from the American Board or any other Missionary body - I beg therefore to propose 4 Tamul School Masters on 10 Rupees a Month 2 to be employed on the upper and 2 on the Lower Range -

The

Madura 5th May 1855

(Signed) R. D. Parker
Collector

No. 27

To R. D. Parker Esqre
Collector of Madura -

Sir,

I have the honor to acknowledge the receipt of your letter of 30 May 1854, forwarding an Extract from the Proceedings of the Board of Revenue on the Report on the Pulney Hills, and also the receipt of the Extract from the Minutes of Consultation dated the 30th June 1854, having reference to the Proceedings of the Board of Revenue above quoted -

2 In your letter, you request I will Consider the propositions contained in Para 5 of the Board's Proceedings that the Garden tax on the upper range and the distinctive

tax

tase on Cardamoms and Plaintains should be abolished-

3 The Board in para 5 of their Proceedings express their inability to understand why Garden should not be abolished in the Upper Range as in the Lower, unless there is a difference in the soil with other advantages supposing such not to exist, they are of opinion that the distinction of product including Tobacco should be abandoned on the upper Range, and in this view the Government are disposed to concur-

4 On the Lower Hills there is nothing whatever which conveys the idea of garden, the same land which pays a Poonjah one year may in the second year, when tase exactly in the same condition without any sort of change, simply because it is cultivated with a particular kind of produce pay Garden tase, and in the 3d years may revert again to Poonjah because it is cultivated with what is termed Poonjah produce- The tase was made to depend so entirely on the product

Vacid

raised and usually the product did not require either a larger outlay of Capital or greater labor on the part of the Cultivator than the more favorably tased Poonjah-

5 It appeared to me the distinctive tase was acting prejudicially to the development of the resources of the Hills and cramping the energies of the Cultivators and often forcing him to raise an inferior product when he might with much greater advantage have applied his labor and Capital in producing a more valuable and Remunerative articles- On this ground I suggested the abandonment of the distinction of the tase-

6 On the upper Hills on the contrary the Gardens are very differently situated They are, as I have attempted to shew in the 62 and 63 Paras of the Report, watered by ever running streams, Conducted it is true with much Skill and labor at the expense of the Cultivator, and maintained and Kept in order also at his expense, but always well supplied These Gardens are close to the villages and therefore admit of being easily manured, weeded and watched, they produce two Crops of very Remunerative products and are saleable properly-

7 Except in the product reared in these and

and their very superior positions they very much resemble the Nunjai lands which are usually from 2 to 4 miles distant from the village down in deep valleys, accessible only by bad and steep roads and are from their distance not so easily tended as the Gardens, and are usually in generish localities, while the Gardens are on the high open flats above Fever range - The Nunjah lands produce only one Crop which is 9 months in coming to perfection, and the rice grain is of so coarse a kind that it can command no market and is only raised for home Consumption, the Nunjah lands are more affected by droughts and more exposed to the ravages of wild beasts than the Totum -

8 Both the Nunjah and Totum lands receive their value from the labor, Capital and skill bestowed on them by the Ryot who must have at one time or another expended much of these on the works of irrigation and the preparation of the fields, and if it be the desire of the Government to extend to them the principle now acted on of leaning to the Ryot the full benefit of his improvements and thus enable him to render his land a valuable product, I doubt not such a concession would in its time be productive of much benefit though it would at first lead to a large falling off in the Revenue of Hills as shown in the accompanying statement -

"The Gardens being situated close to the villages can be conveniently tilled and manured and they produce 2 or more Crops -

9 In para 51 of your Report on the Settlement of Guely 1260 and which is extracted as to facilitate reference, you have stated your reasons why the Garden as lands

a year while Paddy lands lie down steep descents from 1 to 2 thousand feet below the Villages, and owing to the Climate produce but one Crop per year of Coarse rice - From the distance the latter must be cultivated with far greater toil than the former and their produce is much smaller."

lands on the upper range should pay a higher rate than the Nunjahs. There can be no doubt that in their normal state and from their position the Totum lands are more valuable than the Nunjah and that they should therefore pay a higher rate of assessment - If therefore it is determined to reduce the rate in the Totum to 3 fanams, (a measure of liberality which I doubt not will in the end prove of benefit) it becomes necessary and just that a similar rate of Reduction should be made in the rate on Nunjah lands, that is that they should be assessed at 2 instead of 4 fanams - Every Argument which can be advanced to support a reduction in the rate of Totum tello with accumulated force in favor of a reduction of the Nunjah rates.

10 It does not appear to me that, because a reduction is made in the rate of Nunjah on the upper Hills that a similar reduction is necessary in the Nunjah rates on the Lower Hills, nor is there any reason why these rates should be the same - Nor in like manner is there any reason when remissions are made in the Garden rates on the Lower Hills that a similar Concession

should

should be made to the Ryots of the upper range. The lands used for Nunjahs in the Lower Hills are some of the best, with numerous natural springs in them, affording an easy and ready supply of water. They are situated not far from the homesteads and are on the table land easily accessible by roads and are easily marked up. The rice growing on them is also of a superior kind to that raised on the upper hills and the grain Commands a superior market to which it can be more easily carried than is the paddy from the rice fields of the Villages on the Western range.

11 The accompanying table giving the average quantity of lands cultivated as Nunjahs and Totums from the period the Wells have been brought under the immediate management of the Government, shews the Revenue derived under the existing rules and the Revenue which the Government would be called on to relinquish on the Totum and Nunjah lands from the proposed reductions in the rates of taxation.

12 With regard to the abandonment of the distinctive tase on the Plantain, the only objection I have to urge against so liberal a measure is, that I apprehend the extension of the Gardens would lead to the wholesale destruction of all the Remaining Forests. None that Plantain fibres are so much in

requisition, it may appear desirable to offer every facility for the cultivation of the plant, and this may perhaps be attempted as an experiment by laying on the standing gardens the Poonjah tase, and declaring that Gardens Cultivated on cleared ground will only be chargeable with a similar tase, but that where any clearing may take place a tase of 10 or 15 fanams will be levied. I am aware that it may be objected to this proposal, that it involves the principle of interference, but while we have so extensive a tract of country to be looked after by a few Cummums and Ratangars only, I know of no other means by which the interests of Government in the protection of the Country can be guarded, though I am free to confess that the means suggested are by no means adequate to the end in view, and may, I fear, open a wide door to Corruption and oppression in placing in the hands of these subordinate officers large uncontrollable powers.

13 With Regard to the Cardamoms, I did not think the same kind of objections existed to reducing the tase on the ground occupied by this class of product that can be urged to lowering the tase on Plantain, and if any reduction is made in the Plantain gardens, I think a similar reduction should be made in the Cardamom Gardens. A statement shewing the decrease from the proposed reduction in the tase of Plantain and Cardamom is subjoined.

Village

14 In regard to the additional Establish-
=ment, I am aware that the expenditure under
this head bears very heavily on the revenue
derived from the Hills, but this result appears
to me to be unavoidable where so much waste
land exists, where the Villages are so far
apart, so extensive and so very difficult of
access and where the tax is necessarily so small
as in these Hill Villages.—

15 The Villages in which additional
Curnums seem required are so extensive — the
Cultivation so scattered and distant that it
is utterly impossible one man can render true
and correct accounts.—

16 In regard to the Ameens, it seems to
me necessary that there should be some
superior and efficient controlling Officer to see
that the subordinate Officers do their duty and to
bring out and improve the resources of this
remarkable and very improvable country where
almost every description of produce may
be raised.—

17 I am afraid by imposing too much
on one man he would, from finding it imprac-
=ticable and difficult to discharge his duty,
efficiently neglect it altogether. The Hills,
as has been shewn, are very extensive and it would
take

" " 70 " " " " 10 "

take a Native probably, in fine weather, 5 days simply to travel from one end of them to the other, and the difficulty of travelling will be greatly enchanced in the Winter Season. To be of use, the Ameen should, it appears to me, have a circumscribed and easily accessible sphere of operation. This would be the case, supposing one man stationed at Poombaray for the Upper Hills, and another man at Pereyoor for the Lower Hills. At Poombaray he would be 16 Miles from the most distant Village of his sphere of operation and 18 Miles from the most distant Cultivation. At Pereyoor, the Ameens Station, would be 14 Miles from his most distant Villages and 17 Miles from the most distant Cultivation.

18. In regard to his salary it is to be observed that the expenses of living on the Hills are much greater than on the plains - all the articles of food and clothing used by a Native are usually brought up from the plains, and it seems advisable that the Ameen should Keep a horse to enable him to travel about. The necessity of pointing out that only men of superior qualifications and high character should

be appointed is hardly called for, and to secure the services of a man of the required qualifications in these uncongenial regions a high salary must be given, say from 20 to 25 Rupees per Mensem.

19. Such a person might be vested with the powers of a Police Ameen, and it would be adding greatly to the boon conferred on the Hills, if he were also empowered to try and determine suits of a certain Amount.

20 Perhaps it would be sufficient for the present that one only of these Officers should be vested with judicial authority. A large establishment would not be necessary, one Peyson would be all that he would require. The suits arising among these people are of a simple nature and might easily be disposed of after oral investigation made on the spot. The simple and rude habits of the people have happily hitherto preserved them from the chicanery and intricate frands of their brethern on the plains.

21 An Establishment of 3 or 4 Peons to guard the forests is also absolutely necessary.

Orders

22. Orders of the Strictest Kind have been issued and repeated, prohibiting clearings being made, but hitherto they have proved ineffectual, and parties trespassing have been proceeded against under the Regulations.—

23. The only effectual method of preserving the forests appears to me to be by maintaining a strict supervision under responsible and well paid agents and heavy taxation on that Kind of product which calls for the clearings.—

24 Up to the present time from the want of an efficient Establishment all that could be done has been to issue orders to the Village Officers and to endeavour to enforce them as much as possible by meeting the infraction of them by punishment. The difficulties in the way of any thing effectual, under the present System, are great. It is difficult to obtain information of clearings and of the nature of those clearings, whether of forests or of brushwood. I have lately desired a list of the forests to be made and have required that they shall be visited at least once a year by some of the

the Talook officers - such an order, I am aware can be easily evaded under one pretext or another and I would therefore strongly urge my being empowered to employ either Peons or rangers to guard and look after the remaining woods.

25 In regard to the introduction of a small educational establishment on the Hills I have the honor to inform you that from communications held with the Reverend Mr Webb - I learn it is not the wish of the American Board that their Missionaries should take a part in any educational institutions except in such as have been established for the use of Xtian congregations attached to the Mission and where the number of Xtian Scholars shall at least be ten.

26 Neither does it appear that Mr Coyle on the Lower Hills can guarantee any thing further than occasional inspection of Schools located near his station.—

27 The importance of educating the rising generation which is very numerous among these Hill people cannot be over estimated especially at an early period before they become impregnated with the bigotry and subtilty of the people on the plains, but at present no prospect of so desirable an object being attained presents itself to view I hope shortly some Missionary Society may be prevailed on, to take up the cause of these people.—

Proceedings thereon-

(63)

Fort St. George 11th June 1855.

For the reasons stated by the Sub Collector, the Board think that as proposed by the Collector, the garden tase on the higher range of Hills should be Continued and fixed at the rate of 4½ fanams per Gooly-

2 It is proposed by the Collector in accordance with the Board's suggestion (Para 6 Proceedings 22d May 1854) to tase exciting Plantain gardens as Poonjah i.e. 3 fanams the Gooly, but all future such gardens, involving a clearing of forest at 15 fanams the Gooly-

3 The Board on reconsideration of the subject are of opinion that as a special, and is to be kept in view in fixing this Cultivation, viz. the preservation of the forest, the ordinary objection to a distinctive tase on produce does not apply- They think therefore that the rate first proposed 10 fanams the Gooly should be retained for exciting Plantain Cultivation and 15 fanams be fixed on all future clearings for this purpose, Cardamums might be Charged as Poonjah- The loss of revenue under these measures will be about

To B. Lewin Cliffe Esqre
Secretary to the
Board of Revenue
Fort St. George

Sir,

I have the honor to Request the

B. No. 1302
From the Collector
of Madura - - -

Fort St. George 11th June 1855

the instructions of the Board of Revenue in the following case of Boundary dispute between Boundary in this District and Saptoor attached to that Zemindary in Tinnevelly -

2 The extent of land under dispute at the Survey in Shenam in the Aloongoo and Summabundy accounts of Fusly 1212 of the Government Village on my Record at 1,395 - 6 3/4 - this was increased by Goolies and entered at 4,057 - 15 3/4 in the accounts of Fusly 1218 with the following particulars -

Entered in the Petition -

Extent disputed during Inspn Hurdiss survey — } 1,392 - 7 1/4

" gradually encroached upon by the Poligar — } 2,607 - 8 3/4

4,000 — "

" Extent not entered in the Petition, but disputed during measurement in the present year" } 57 - 15 3/4

4,057 - 15 3/4

3 The meaning of the headings "entered and not entered in the Petition" is not now clearly understood, but it is

Fort St. George 11th June 1855-

supposed that a Petition had been presented on the subject at that time-

4 The extent shown was reduced to 4,012-6½ in Fusly 1242, 3,794-9¼ in 1243, 3,777-11½ in 1244, & to 3,773-33/4 in 1845- as exhibited by the accounts of those fusly, the difference being included with Sirr lands- since 1845 the last mentioned extent is continued to be entered as that under dispute.

5 In Consequence of a Complaint preferred to me by the Government Pleader directed the disputed spot to be measured with reference to the Aboongoo of Bhundary, as I learned from the Collector of Tinnevelly that no similar or any other survey account was forthcoming for Saptoor- But the mother of the present Minor, in whose possession the Estate is placed objected to my wish being carried into execution, on the grounds that the dispute had already been decided by the Tinnevelly authorities in her favor and that the survey Aboogoo of Bhundary village is not genuine

6 The decision I find is none other than an Endorsement referred to

Fort St. George 11th June 1855-

to in the accompanying Copy of a letter from a former Collector of Tinnevelly dated 4th September 1827 which Endorsement is not on the Madura records-

7 If the Board acquiesce in the opinion expressed in the letter, I beg to know to what extent of the land at present under dispute they consider the Zemindar entitled- I should think his right Confined to the extent entered as disputed in the survey account, because the cultivation by the Bhundary Ryots of a portion of the land subsequently added in Fusly 1218 has never been objected to- At any rate the sanction of the Board is required for the Correction of the Ayacut accounts of Bhundary- I enclose Copy of a letter from the Collector of Tinnevelly stating that the mother of the present Zemindar of Saptoor will not enter into Compromise-

Proceedings thereon- The Board concurs with Mr. Parker in thinking it very desirable that the boundary of the village of Bundary in this District should be defined- They therefore authorize him to

encasure

measure its lands according to the Cloongo accounts for the purpose of ascertaining what portions of the disputed spot belong to it and the Sapstoor Zemindary in Tin=nevelly. But they wish this examination to be made under the superintendence of one of the European officers of the District and Mr. Parker is instructed to notify the time he fixes for the examination to the Collector of Tinnevelly in order that Mr. Bird and the Zemindar may be able, should they see fit to send a Ser=vant, to be present at the measurements.

2 It is however to be under=stood that any servants who are so sent are not to interfere with the proceedings which will be limited in the first in=stance at least to a measurement of the lands entered in the Boundary of Cloongoo; they are to be only spectators, recording for the information of their superiors any observations regarding the points under dispute which the measurement of the Boundary lands makes them consider of importance.

The

3 The Board have sanctioned this scrutiny of the Boundary Village in consequence of their being at present no sufficient data upon which to adjust the boundary, and they concur with Mr. Parker that very clear and Convincing proof ought to be obtained before a larger portion of the disputed land than that which was apparently claimed at the survey in Fusly 1212, Viz. 6 Godies 1,395 – 6 3/4 is made over to the Sapstoor Zemindar.

4 A copy of these proceedings will be sent to the Collector of Tinne=velly for his information.

Bd No. 1386

From the Collector of Tinnevelly... Furnishing a report called for by the Board in their Proceedings of 4th January last on the Subject of the memorial from Ramaprasad Devary and Brijalal Devary to the address of the Honorable Court of Directors-

In reply to Extract from the Proceedings of the Board of Revenue dated 4th January last, giving cover to one copy of a Memorial from Ramapresad Devary and Brijalal Devary to the address of the Honorable Court of Directors, and request=ing me to furnish a report thereon, I have the honor to state as follows-

2. The Statement contained in the Memorial that an Enam consisting of 25 Cottahs of land and a garden was granted to Ichram Dewary by the Nabob Wallajah under a Purwanah dated the 7th Safr of 1190 / 28th March 1776 Hejaree for subsistence, and on his death conti=nued to Pokaraz Devary / marked C in the accompanying Genealogical Table / under a Sunnud dated 20th Rabbisanie of 1201 Hejaree / 15th February 1787 is true, but the allegation therein that the land was granted in Coonnatoor Village is unsubstantiated

Fort St. George 11th June 1855

unsubstantiated, as no mention to that effect is found either in the Purwanah or the Summud produced in support of the grant or in the Ayacut accounts of the Village in question.-

3 The grant being only for subsistence, and not conveyed in hereditary terms as stated by the Petitioners, it ought to have been resumed on the death of C which occurred long ago, but as the garden forming part of the grant was entered against No. 853 of Mr. Cotton's Hindoovy and English Registers under date 15th November 1816, in favor of the present Petitioners, under the head of "Subsistence" with the following remark in the latter "The Dittum of the Purwannah is 25 Cottahs of Nunjah land and one garden and the proprietor has been in the enjoyment of a Garden or Tope only at Coorookootory near Punevelly" it / the garden / has been continued for the life of the Petitioners and the limitation explained to them in my Endorsement on Board Petition No. 1545

of

Fort St. George 11th June 1855

of 1850; Copy of which forms the enclosure marked E. to the Memorial under reply.

4.- No documents whatever are forthcoming from the records of this Office nor have Petitioners produced any to shew that the Enam of 25 Cottahs of land now claimed by them was resumed on the assumption of the Country by the Honorable Company as alleged by them in their Memorial.-

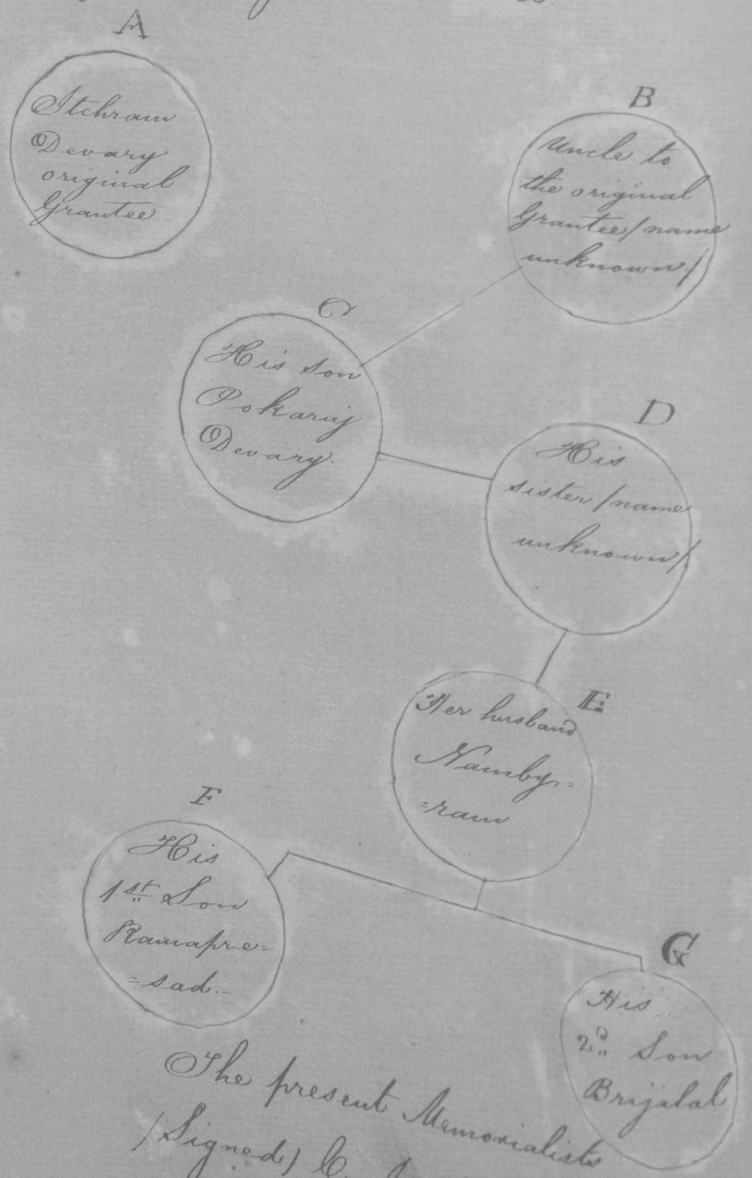

5. Under these circumstances and as neither the Purwanah, the Summud, nor the early accounts of the District shew where or in what Village the land now claimed by the Petitioners is situated, and as the Petitioners themselves admit that the land in question has never been in the enjoyment of their ancestors or themselves since the commencement of the British Government, I see no reason for complying at this distance of time with

with the request of the Petitioners

Tinnevelly,
Sandoor,

Ordered to be submitted to Government with the following letters.

70.71

Bd. No. 1437.
To the Secretary to Government
Submitting the report from the Collector of Tinnevelly on the claims of Rama-presad Devary and Bryalal Devary to certain Enam land in that District and agreeing with the Collector that the claims of Petitioners should be reject-ed.-

4th Consn. 11th June 1855.

To,
The Secretary to
Government.

Sir,

With reference to Extract Mi-nutes Consultation dated 15th December 1854 I am directed by the Board of Revenue to submit for the information of the Right Honorable the Governor in Council, a letter from the Collector of Tinnevelly dated 18th May 1855 reporting on the claim of Ramaprasad Devary and Brijalal De-vary to certain Enam land in that District.

2. In 1776 the Nabob Wallajah-granted an Enam consisting of 25 Cottahs of land and a Garden to one Ichraw-Devary for subsistence and on his death in 1787 continued the same to Lokaraj Devary his uncle's son. This Enam the Petitioners now claim as the descendants of the original grantee and assert that the land was granted in the Coonnatoor Village. It does not however appear either from the Purwanah or Sunnud produced by the Petitioners or

From

from the early accounts of the district in what Village the land is situated. The records of the Collector's office do not show, nor have the Petitioners produced any documents to prove that the Enam was resumed on the assumption of the country by the Honorable Company as alleged by them.—

3. The Garden in the Coorookoo-ry Village near Tinnevelly, at present in the possession of Petitioners formed part of the Grant in question and should have been resumed on the death of Pokaraz Devary, but as it was entered in their names in Mr. Cotton's Hindovy and English Registers, dated 15th November 1818 under the head of "subsistence" it has been continued to them for life, under these circumstances the Board agree with the Collector that the claim of Petitioners should be rejected, as the land has never been in the enjoyment of their ancestors or themselves since the commencement of the British Government.

(75)

B. No. 1250

From the Collector of Malabar. Submitting for Sanction a revised Moyan Establish for the District Establishment generally.

Of 3 Mds each

Sir,

In Consequence of the abolition of the Tobacco Monopoly the pay of the Tahsildars of Malabar has sunk from 132 Rupees per Mensem to 107.

2. The Tahsildars, it is true have not to perform the duty for which the 25 Rupees was granted but the duty was so very light merely that of retailing large bundles from a Store room in their Cutcheries. that its cessation is hardly felt, while the loss of a sum which the usage of 28 years had made to appear as a permanent source of income, is of Course severely felt.-

3. I do not think that 130 Rupees per Mensem was at all too much pay for a Man who has to perform the duties of a

9380

Fort St. George 11th June 1855.

a Tahsildar in Malabar. —

The duties are in some respects more heavy than those of Tahsildars in other districts and entail more personal charge. The area over which they preside is, in many instances, very large. They have to go therefore long distances, especially on police duty and as the Country is not suited for bandies or even horses, they have to keep bearers which in itself is a considerable expense.

4 I beg to recommend that an increase be made to the Tahsildars' salaries, but in view to all possible economy I do not ask for the indiscriminate return of the 25 Rupees the Tahsildars have all lost. I propose to

9381

Fort St. George 11th June 1855.

to have two classes. to the former class who have the charge of the largest & most laborious Talooks I would give 130. to the latter class whose Talooks are smaller and less onerous I would give but their present pay. —

5. I take this opportunity of submitting for sanction a revised Moyen = Zabitah for my district establishment generally. —

The increase I have asked for is, I consider, very necessary. I have noted the cause for each item of increase in the adjoining Margin. —

E. E. F. (Signed) H. V. Conolly
Collector.

9386. Fort St. George 11th June 1855.

(75.76.)

After No. 1498. To the Secretary of Government — Submitting a letter from the Collector of Malabar forwarding a Tabular Statement for certain alterations and additions to his District Establishment and recommending that Sanction may be obtained for maintaining them at an aggregate charge of Rupees 4775-4-0 per mensem — Jud. Con. 11th June 1855.

To

The Secretary to Government.

Sir,

I am directed by the Board of Revenue to submit, for the orders of the Right Honorable the Governor in Council, a letter from the Collector of Malabar, dated 5th May 1855, forwarding a Tabular Statement, in the prescribed form, for certain alterations and additions to this district Establishment.

2. The Tahsildars in Malabar receive in addition to their pay Rupees 25 per mensem for transacting the duties of the Tobacco Monopoly, which however consisted mainly in retailing large bundles of Tobacco from a Store room in their Cutcherries, but on the abolition of the Monopoly, the allowance was discontinued. This reduction, the Collector states, is severely felt by the Tahsildars, who have been accustomed from the long period they have enjoyed the allowance to consider it as a part of their fixed

9387. Fort St. George 11th June 1855.

fixed salary. Mr. Conolly therefore proposes, in consideration of the arduous duties of Tahsildars in Malabar, the extent of their range, and the necessity there is, from the nature of the country of keeping Bearers, that the Salaries of those of the largest & most laborious Talooks, be increased from 107 to 130 Rupees per mensem, the remaining Tahsildars retaining their present pay.—

3. In the Column of remarks in the enclosure, it is stated, that a separate Establishment for the special Assistant Collector, who resides at Malli: apooram, and who has Revenue and Police charge of three Talooks is much required, to obviate the inconvenience and delay which have been experienced in the despatch of business by deputing servants from the Hoozzoor to do duty under that Officer.—

Increase.	Monthly pay.
1. Revenue Head Goomastah	25
1. Ditto 2d Do	14
4. Ditto Peons 5/4	21
1. Mussaljee and Sweeper	3-8
1. Police Head Moonshee	20.
1. Ditto Assistant Do	12.
2. Ditto Peons at 5	10.
	105-8.

4. The Government and the Foujdaree Adalut having ordered that copies of the Proceedings in all cases committed by Head of Police should be prepared and sent to the Magistrate's Office

* Cotiote Calicut Ernad Betutnad Kootnad Nedunga: nad Wallowa: nad and Palghaut.

Office at the same time the originals are forwarded to the Courts, the Collector considers that the employment of a Police Moonshee in the several Talooks is indispensably necessary to carry out those instructions.

15 Moonshees at Rs. 7 = Rs. 105.

From Malabar 19th Dec. 1853 in Cons. 3rd Jany. 1854. Pro: 19th Jany. 1854.
From Malabar 13th Feby. in Cons. 6th March 1854. Pro: 6th March 1854.

5. From the correspondence noted in the margin, it will be perceived, that the Board on the recommendation of the Collector, authorized the entertainment for 6 Months of the Establishment now proposed to be permanently employed for the Subordinate Custom House at Beypoor. The addition of a Goomastah to the Custom House at Calicut is required to prevent the business of the Department from falling into arrears, which has been the case since the reduction of the Establishment.

1 Sub Manager	15
3 Peons at 4	12
	27
1 Goomastah	7.

6. The increase proposed to the Customs Establishment at Cochin, is represented to be necessary in consequence of the growing importance of the Port, the collections during the last fusly having risen from 28,000 to 50,000 Rupees. The value of the general trade may, the

	Rs
1 Goomastah	12
Do.	8
1 Weigher	7
	27

the Collector states, be taken at 28 lacs.

7. As the Maramut Establishment of the several districts, it is presumed, will undergo revision when the Department of the new Board of Public Works has been organized, the Board decline to recommend the employment of an additional Writer for the Maramut Establishment of the Hoozzoor.

8. In the above paras, the Board have noticed the causes assigned by the Collector for the principal additions proposed to his Establishment. The necessity for the other charges is briefly explained in the Column of remarks of the Tabular Statement. As the various additions and alterations appear to be essentially required, the Board recommend that sanction may be obtained for making them at an aggregate charge of Rupees 475-4. per Mensem, or Rupees 5,703 per annum.

Sir,

I have not received any final answer from the Gentlemen who forwarded the letter to Government dated 26th March last, but apprehend that Government will require an answer from me, I therefore have thought it advisable not to wait for a definite answer from the Trade—

2 Some time having passed from the commencement of the discussion it may facilitate the investigation to give a succinct account of this subject.—

3 The Chamber of commerce in a letter to Government represented the inadequate accommodation afforded by the Government premises appertaining to the Custom House, they referred to the voluminous correspondence which had passed on this subject, the admitted necessity for increasing the accommodation and erecting new buildings consequent upon the delapidated character

81

Bd No 1436
From the Collector of Sea Customs Madras—
Para 1.

Submitting observations on the question respecting the additional accommodations required by the Chamber of Commerce for the safe storing of goods in the Custom House and on the "bond-pass system" as in Bengal, and that Government will decide upon the question of providing additional Buildings or sanctioning an Establishment to carry out the system contemplated.

Minutes Consulting of Government 12 & 19 October 1855

character and insufficiency of the sheds in the yard and the consequent inadequate protection to property, and in Para 5 laid stress upon the act of Government in taking from the Mercantile community buildings well suited to the purposes to which they were applied and appropriating them for the purpose of a Petty Court and a Magistrates' Office and lastly in Para 8 they commit themselves to a proposition to be permitted "to pass up their goods as landed direct from "the Beach without the necessity of having them "carried into the Custom House yard and left "there, pending the usual forms being gone through "for being certified for duty."

† No. 1611 dated 12th December/54

4. The Minutes of Consultation of Government gave a prominence to this suggestion the Mercantile community had not calculated upon. His Lordship in Council observed he could not conceive on what grounds Government are called on to provide sheds for stowing goods either under Import or Export, such would appear more properly to be the business of the Merchants. I would here however respectfully observe

observe, that it never was contemplated by any party that Government should provide accommodations for "storing" goods "free of charge on the contrary all goods "stored "are warehoused and charged with rent. Under the existing practice the Government do not provide stores for goods but detain them to suit their own purposes. Viz^t to collect the revenue derivable thereon. The question for decision is whether consequent upon such forcible detention by Government that authority shall not as heretofore afford reasonable protection to goods, or whether they can equitably leave them at the mercy of the weather and at the risk of the Importer during this period. The Right Honorable the Governor in Council resolved with a view to save the expense of buildings to consider whether arrangements might not be made for carrying into effect the plan proposed by the Chamber of Commerce Viz^t to dispense with buildings and pass all goods direct from the Beach. The Board of Revenue forwarded the letter and Minutes of consultation to this Department and directed the Collector of Sea Customs in communication with the Chamber of Commerce to report upon the

the proposition -

5 On the 5th January 1855 I transmitted copies of the papers to the Chamber of Commerce and observed "The arrangement proposed is an "entire change of System - The Custom House is "no longer to be appropriated for the Commander "of a Vessel to deliver her Cargo, and as there "are at present no Wharfs at which the landing "account can be taken no establishment apper- "taining to this Department to take the account "on board Ships, no power of control over coolies "vested in any party to ensure packages being re- "moved and carried to the proper consignees as soon as "landed - No place where goods landed can be "stored for the day but the landing account must "be taken and the Boxes carried away daily altho "one may be landed a mile from another and "others in intermediate spaces - These are Matters "for consideration as also respecting the tasting "of Beer and Porter for Government and exe- "amination of Goods for abatement of duty "for damage, some prevision should be made "for packages to private consignment and com- "munication held with tradesmen who import their "own goods before any definite plan is determined -

I.

"I shall be very happy to place myself "in communication with the Chamber of Com- "merce and afford every Member of the Mercantile "community all the information in my power to "assist them in coming to some arrangement re- "respecting the proposition made by Government "There are no doubt difficulties in the way of "its adoption, but if carried out it will afford "great facilities and I see no reason to doubt "that taking the System in force in Calcutta "as a guide we shall be able to introduce the "mode of landing and passing goods in force "there, if Government will incur the Monthly "outlay required in lieu of providing expensive Buildings -

6 In reply the Chamber referred to three subjects - First the introduction of the System desired by Government provided a space be marked off on the beach / and properly secured / within which goods that are to be dealt with shall be landed involving at once a full preventive establishment in addition to new buildings in the Beach -

Damaged goods and liquids

7 to be carried into the Custom House to be tasted

Note It must be remembered these remarks have reference to the proposal of the Chamber to remove all goods as landed to the Beach Stores not applicable to the case as it now stands from which it appears to be necessary to judge in full to pass on the Beach all goods as landed.

Letter to Collector dated 5th Jan 1855 Para 5

+ all consignments to the Trade 6000 Hogsheads of Beer were exported for Madras in the month of March last.

tasted - This would involve the expense of new buildings in addition to those which now form the Custom House yard.-

8- Thirdly the extension of the Bonding system provided the rent is reduced. This is a subject separate from the rest - I apprehend it would be advisable for Govern=ment at once to reduce the rates for bonded goods to such an amount as may be agreed upon by the Merchants and the Collector of Sea Customs & disunite this question from others -

9- In reply to this communication I observed "The System you propose will require "a Law to be enacted that Goods landed without "an "outpass" at the place appropriated for the "landing of these goods, shall be liable to con "fiscation - It will further be requisite to "pass such goods, that a preventive Officer "should be located on board each Vessel "as in the Ports of Calcutta and Bombay - "In Calcutta the Customs Officer on board "gives effect to this part of the System and "its introduction here involves the appointi=ment of these officers and their Superintendents this

"this is provided for in act VI of 1844 -
"Para 3 of your letter affords no information
"as to the extent to which the System of
"the "outpass" has been carried through, it
"is stated to work well this I do not
"doubt, such as I have received is to
"the effect that 99/100 of the goods
"imported into Calcutta whether passed
"eventually to the Merchants Custody, or
"placed in Bond are carried to the
"Custom House yards, and that compara=tively a very few packages are
"cleared by an "Outpass" these are
"generally private packages which a
"party is desirous of obtaining at
"the earliest practicable period or certain

"certain goods for which there is a
"ready market or some emergent
"cause induces a Merchant to clear
"under an "outpass" - It is an essential
"part of the System that the "Outpass"
"should be delivered to the Customs
"officer on board the Ship and the
"Bills of Lading to the Officer of the
"Ship - I therefore apprehend that con-
=signments which occupy several days
"in the delivery are not passed in
"Calcutta under an "outpass" nor can they
"be as the delivery of the Bill of
Ladings is a sine qua non before
the packages leave the Ships side under such a

System

"System I apprehend the bulk of the Cargo must be
"deliverable at the Custom House -

"The System you propose will require
"that the space now allotted for landing Goods
"in the Custom House yard should not only continue
"available but be enlarged - The dilapidated
"Condition of the Buildings requires that with
"the exception of one shed, all should be pulled
"down" -

"I apprehend that an extensive variety
"of Goods other than those contemplated by you
"in Para 5 will be landed at, and placed in
"the Custom House - A cursory examination of
"those imported as given in the Monthly Statements
"of Trade, will, I doubt not lead you to the
"same Conclusion, Goods imported by the Trade,
"whether residents of Madras or the interior, private
"packages, all packages from the Bi Monthly
"Steamers, the greater proportion of Goods imported
"by Natives, if not the whole, would probably be
"Carried to the Custom House; and I much doubt
"whether it would suit the Convenience of any party to carry

the

"the more bulky descriptions of metals direct
"to their Godowns even if the Captain would
"deliver them on board. They are landed piece
"meal on every occasion there are doubts as to
"which metals belong to the Several claimants,
"and in all cases antagonistic claims arise, these
"and other facts and the necessity of delivering the
"Bill of lading on Board will require, that
"delivery of 99/100 of the Cargo shall take place
"at the Custom House. There is therefore reasonable
"probability that under the outpass System proposed,
"Considering the extended and extending State of Trade
"as before stated, an extent of Building greater
"than the area of the present yard will be required
"in addition to the expense to be incurred by the outpass
"System itself and the Shed proposed to be built
"on the Beach."

10. On the 28th the Chamber proposed a Conference which was agreed to. The substance of what passed was reported to the Chamber and its result, their final letter of the 25th Ultimo. They observe "that an outpass system has been in force to enable parties to clear packages of one mark or one Invoice provided they are landed in one day." This is the

the case in Calcutta and as before observed the outpass System of the Custom House must correspond with mercantile usage in all parts of the world which is that no package is delivered by a Commander until the receipted bill of lading is placed in his hands, therefore all packages must leave the Ship together, whether in one Boat or 20. They cannot go piecemeal and the outpass system in Calcutta is and every where else must be based on this System, experience past and present proves that it will be seldom availed of here and not one case has occurred since the correspondence Commenced with Government. The nesct proposition is that a Shed be erected in the yard. I sent a rough Sketch of my idea and an estimate, the correctness of which I do not vouch for. It is composed of two tiled Sheds connected by a Terrace, has no pillars in the centre as our present buildings have and is 168 feet long by 65 feet broad. That a Terraced Shed be run out in front of the Custom House for storing goods, for Shipment and at one end a room for

examining

X Enclosure No 2

X Letter from Chamber of Commerce to Collector dated 25th April 1855

escancining goods.—

11. On the 16th April last, Ireceived a communication from Government directing me to communicate with the Gentlemen in the Trade- I did so immediately and they met me at a conference on the 7th Instant at their Suggestion. They promised to communicate with the other Gentlemen composing the association and then send me a reply— I have not heard from them. The members composing the deputation attended to me to concur in the views entertained by the Chamber of Commerce, provided the buildings proposed were commenced forthwith and that when built Government would at once proceed to provide the other Sheds required without delay.—

12. The suitability of the premises to the commerce of the Port has been brought to a practical test by their being filled— I had no alternative but to hire thirteen Godowns at a rent of Rupees 12½ per mensem to receive the rest of the goods being landed— All are filled:

13. It appears to be inevitable that Government must at one time or other incur a large outlay, the present buildings must come down and if some

× Enclosure returned.

Some are not removed they will fall of themselves- I am satisfied the premises are too confined and that while the Port is merely an open road stead, Some buildings whether the property of Government or private parties must be erected to receive the Goods imported, as the practice of the Port has, and I apprehend must continue to appropriate buildings— to the Commanders of Vessels in which to deliver their cargoes and not on board. I am aware that objections will be made to this course and that they may be of a character which will make an impression and probably outweigh any argument I can offer; notwithstanding this apprehension I do not hesitate to state it is my deliberate conviction, and I have had some experience that the true interests of all parties will best be secured by these means- I have stated I shall find no difficulty in adopting the proposition of Government to pass all Goods from the Beach- I require no more than a set of Officers who can be trusted to put on board ship which would involve an outlay of

of at least Rupees 1,050 per mensem, for they must be competent men and under an organized Superintendence as in Calcutta and Bombay- I am prepared to carry out the views of Government if directed to do so- I should however be guilty of a dereliction of duty did I not express the opinion I entertain that this course would be unsatisfactory and expensive. Once introduced it could not be with-drawn- I have no doubt that buildings must be furnished in which to stow the cargoes of Vessels, that this expense must be incurred at some time, and that is more expedient to do at once what must be done than eventually be saddled with this charge and the expense of the experiment to change a practice 100 years old.—

11. I believe it will be found that no course will be so satisfactory, so economical, or so suited to the interests of all as to provide c— Suitable buildings- The Government are as interested in the prosperity of the trade of the Port as the merchants themselves. For more than 70 years

x Vide Merchants Petn. Para 2 and 3 of the Resolution

years they have undertaken to provide accommodation and so long as they continue to detain goods for their own purposes, I do not see that in equity they can at this time adopt a different course when the commerce of the port is increasing so rapidly- Impediments to trade I respectfully submit would be as injurious to Government as to the merchant- On the other hand I am of opinion that the merchant now receives accommodation in the Custom House premises beyond what he is entitled to claim, his goods are permitted to lie in the Custom House free of charge for 14 days after the last landing of each Consignment thus packages of each mark may therefore be there a month- I am of opinion that a rent should be charged at 4 packages for an Anna on all which are placed under Cover and the penalty Godown rent leviable 14 days after last landing considerably reduced- I see no

no course before me but to recommend that a Shed be built in the yard and another terraced building be provided at once on emergency the estimate to be Sanctioned by the Board of Revenue or in the Department of Public Works. That means be taken immediately irrespective of these buildings to obtain more ground, and a plan submitted to place thereon Suitable buildings with a tramway for the egress and ingress of goods and tramways between the Sheds.—

15 The whole question is now before Government, and I am prepared to adopt either alternative and organize an Establishment to pass all goods from the Beach if adequate Buildings be not provided. I guard myself however with the respectful expression of an opinion that to make so radical a change in the System of landing and shipping goods is not desirable, and if it were, I doubt, whether the usage and practice of so long a series of years can be set a side. Government cannot force parties to

to clear their Goods from the Beach as landed, paying the duty beforehand. The Collector is bound by Law to detain them till it is paid and if reasonable attention is not paid to their Security I cannot comprehend in what way a Demand preferred against Government calling on that authority to make good the loss in merchandize destroyed by exposure to rain can be successfully resisted in a Court of Law.—

Sea Custom House. Madras 28th May 1855.

(Signed) W. E. Underwood.— Collector of Sea Customs

Encre 1
No 3

To The Chairman of the Chamber of Commerce Madras.—

Sir,

I have the honor to forward Copy of Paras 3 & 4 of Extract Minutes of Consultation of Government No 1611 Dated 12th December 1851 and of the Proceedings of the Board of Revenue Dated 18th December 1851.—

2. The arrangement proposed is an entire change

change of System. The Custom House is no longer to be appropriated for the Commander of a Vessel to deliver her Cargo and there are at present no warfs at which the landing account can be taken— no Establishment appertaining to this Department to take the account on Board Ships— no power of Control over coolies vested in any party to ensure packages being re: moved and carried to the proper Consignees as soon as landed— No place where goods landed can be Stored for the day but the landing account must be taken and the Boxes carried away daily, altho' one may be landed a mile from another and others in intermediate Spaces. These are matters for consideration as also respecting the testing of Beer and Porter for Government and examination of Goods for abatement of duty for damage. Some provision should be made for packages to private consignment and Communication held with tradesmen who import their own goods before any Definite

definite plan is determined.—

3. I shall be very happy to place myself in Communication with the Chamber of Commerce and afford every member of the mercantile Community all the information in my power to assist them in Coming to some arrangement respecting the proposition made by Government— There are no doubt difficulties in the way of its adoption, but if carried out it will afford great facilities, and I see no reason to doubt that taking the System in force in Calcutta as a guide, we shall be able to introduce the mode of landing and passing goods in force there if Government will incur the monthly outlay required in lieu of providing expensive Buildings.—

4. I would with much deference and earnestness press upon the Consideration of the Chamber the great expediency of extending the Bonding System, both for goods imported

9414 Fort St. George 11th June 1855.

imported and to be exported. A very moderate rent would cover all charges and the materials of the present buildings probably be sufficient for building Warehouses.

5. I believe the great bulk of the goods in Calcutta are on landing, placed in Bond, and Considering the manner in which the trade of Madras is increasing and that this Port may become an entrepôt for Goods Consigned to Burmah this is a Subject which the Chamber may perhaps Consider worthy of much attention.

Sea Custom House
Madras

/ Signed / W. E. Underwood
Collector of Sea Customs

W

17

9415 Fort St. George 11th June 1855

W. E. Tenderwood Esqre
Collector of Sea Customs
Madras

Sir,

I have the honor by desire of the Chamber of Commerce to acknowledge receipt of your letter dated 5th Ultimo, enclosing Copy of Paras 3 and 4 of Esctract Minutes of Consultation of Government No 1611 of 12th December last and of the Proceedings of the Board of Revenue dated 18th idem, on the subject of the insufficient accommodation for Goods in the Import yard of the Custom House which was brought to the notice of Government by the Chamber under date of the 21st October last.

2 It would appear from the above Esctract from the Minutes of Consultation that Government are not disposed to incur the expense of providing further accommodation in the Custom House yards, but that they are willing as an experimental measure to grant the indulgence sought for in paras 8 & 9 of the Chamber's letter of 21st October last

last, Viz. the option of passing p/p Goods as landed direct from the beach without being taken into the Custom House under a proper system of checks.

3 In order to ascertain the exact practice that prevails in Calcutta, a reference has been made to the Chamber of Commerce there, and the reply is as follows:-

"About ten years ago the system now in general operation, and known here as the "out pass system," was officially sanctioned. In all cases where the Collector is satisfied from the respectability of the importers that he can reconcile the protection of Revenue and the facility in question of Conveyance of imported articles direct from the ships to the Merchants' Godowns the necessity of bringing Goods to the Custom House is dispensed with, and the tedious delay and inconvenience arising therefrom are obviated. Duty in such cases is levied according to the ad valorem valuation of the Goods as enumerated in the invoices exhibited to

to the Covenanted authorities, and after payment is made an out pass is at once issued protecting the Goods from the ships direct to the Merchants' Godowns. The system of out pass now described may be very well at this Port, and I doubt not it would at Madras without loss to the Government Revenue and much to the convenience of importers."

4 The Chamber is of opinion that the adoption of this system at Madras will be attended with little difficulty either to Government or to such of the Importers as may be disposed to avail themselves of it, provided a space be marked off on the Beach and properly secured within which Goods that are to be so dealt with, shall be landed, and where the Custom House Peons and the Importer's Coolies shall attend, the former to satisfy themselves that none but the packages specified in the out pass are so introduced, and the latter to take charge of the same and forward them to their employer's Godowns.

Should

Fort St. George 11th June 1855

5 Should any of the packages appear to be damaged, they can be carried into the Custom House with the view to the examination of their Contents, and the same should be done with Liquids in Wood that require to be guaged, and in the case of Beers and Porter to be tasted./

6 The Chamber having suggested the proposed measure, are anxious to see it fairly tried, but they will be happy to receive any observations which may occur to you in Regard to the difficulties which may present themselves in the practical working of the System, and to Confer with you as to the arrangements which will be necessary in bringing it into force - They are also prepared to entertain your Recommendation of the Bonding System, if the rent of the Government Warehouse is reduced to a low scale, and proper arrangements are made for extending it to the Merchants' Godowns, and they will be glad to learn from you the details of the measures which you would propose

Fort St. George 11th June 1855

propose to meet these objects -

Chamber of Commerce, Madras. February 1855 } (Signed) R. A. Campbell Chairman

Rd 1.1

To R. A. Campbell Esqre
Chairman of the Chamber of Commerce
Madras -

Sir,

I have the honor to acknowledge the receipt of your letter - I will with much pleasure Confer with the Chamber on the various matters you refer to, and meet the Members either at their own Office or place at their disposal for the purpose such accommodation as the Custom House affords -

The System you propose will require a Law to be enacted that Goods landed without an authorized Pass at the place appropriated for the landing of these Goods shall be liable to Confiscation.

It will further be requisite to pass such Goods that a preventive officer should be located on board each Vessel as in the Ports of Calcutta and Bombay -

In Calcutta the Custom officer on Board

St dated 5 Feby 1855
Rec. 27th " - "

guies

genie effect to this part of the system, and its introduction here involves the appointment of these officers and their Superintendents. This is provided for in Sect VI. of 1814. Para 3 of your letter affords no information as to the extent to which the system of the "out pass" has been carried, though it is stated to work well. This I do not doubt, such as I have received is to the effect that 99/100 of the Goods imported into Calcutta, whether passed eventually to the Merchants Custody or placed in Bond, are carried to the Custom House yard and that Comparatively a very few Packages are cleared by an "outpass" these are generally Private Packages which a party is desirous of obtaining at the earliest practicable period, or certain Goods for which there is a ready Market, or some emergent cause induces a Merchant to clear under an outpass. It is an essential part of the system that the "outpass" should be delivered to the Custom officer on board the ship's and the Bills of Lading to

to the officer of the ship. I therefore apprehend that Consignments which occupy several days in the delivery are not passed in Calcutta under an outpass, nor can they be, as the delivery of the Bill of Lading is a sine quâ non before the Packages leave the ships' sides. Under such a system I apprehend the Bulk of the Cargo must be delivered at the Custom House.

The system now proposed will require that the space now allotted for landing goods in the Custom House yard should not only continue available but be enlarged. The dilapidated condition of the Buildings require that with the exception of one shed, all should be pulled down.

Referring to the Bonding system you propose, I have no doubt that the Government Warehouses will be thrown open by Government at a moderate charge. I doubt the practicability of making every Merchants Godown a Bonding Warehouse, but

if

if feasible they must be restricted to the same charges for Rent as is charged by Government -

This extension of the system would involve the necessity of the appointment of superintendents, who could be trusted to deliver Goods in Bond from each, and a portion of the Rent should be appropriated to the payment of the salary of such officers. The Warehousing act contemplates that the number of Warehouses should be restricted, it will be impracticable to include those of every Merchant. It is therefore matter for your Consideration whether the system proposed should be authorized in favor of certain parties and denied to others - To Concede the privilege to all involves a principle I imagine Government are not disposed to sanction, especially as it involves a charge which neither the State or the Mercantile Community will probably be disposed to incur.

At a Conference of Officers affecting the

the expansion of the Bonding system may, I trust, be overcome. And so fully persuaded of the value of a liberal bonding system to Trade that it will afford here the substantial benefit derived from it in other places that I recommend it to your deliberate consideration. I believe it would cause Madras to become an entrepôt for Goods, effect a change in the character of our Market, give it the buoyancy it requires, and which prevails in Calcutta and Bombay. It would be a work of supererogation for me to enlarge upon a subject, the advantages of which are more apparent to yourselves than to me. I notice it, to avail myself of the opportunity of assuring you not only that every facility will be afforded by this Department in carrying out any scheme you may mature, but to tender my cordial and hearty co-operation.

The Charge of 1/8 of the duty now levied should be remitted on exportation of Goods -

J.

Fort St. George 11th June 1855

I apprehend that an extensive variety of Goods other than those contemplated by you in Para 5 will be landed at and placed in the Custom House - A cursory examination of those imported, as given in the monthly Statements of Trade, will, I doubt not, lead you to the same Conclusion - Goods imported by the Trade, whether residents of Madras or the interior, private Packages all Packages from the By-Monthly steamer, the greater proportion of Goods imported by natives if not the whole would probably be carried to the Custom House, and I much doubt whether it would suit the Convenience of any party to carry the more bulky descriptions of Metals direct to their Godowns, even if the Captain would deliver them on board - They are landed piecemeal, on every occasion there are doubts as to which metals belong to the several claimants, and in all cases antagonistic claims arise - These and other facts and the necessity of delivering the Bill of Lading on Board will require that delivery of 99/100 of the

Fort St. George 11th June 1855

the Cargo shall take place at the Custom House - There is therefore reasonable probability that under the out Pass system proposed, Considering the extended and extending state of Trade as before stated, and extent of Building greater than the area of the present yard will be required in addition to the expense to be incurred by the out Pass system itself, and the shed proposed to be built on the Beach -

After much deliberation, I Conceive it to be a matter of duty to lay before you a Conclusion which I have arrived at, which each recurring change proposed in this Department has strengthened - Viz^t, That until the Customs at Madras are placed upon the system which prevails in Calcutta and Bombay, we shall be hampered by insuperable difficulties in effecting any change Consequent upon the expense, inconsistent / as our small Revenue and high Charges offer an

an insurmountable obstacle - However desir-
=able it may be in itself, however esclen-
=sive its utility, however necessary to meet
the requirements of our extended Trade,
when the Government its officers, and the
Mercantile Community are all agreed not
only as to the beneficial results to be
anticipated from any measure, but as to
its absolute necessity, even when the
Governor by personal inspection, &
assisted by Public officers in attend-
=ance, and after a Conference with a
deputation from the Mercantile body
impressed with the necessity of a measure
promulgates those views by an order
of Council to carry them into effect - the
charges to the State so fetter its execu-
=tion, that one project after another
being rejected on account of the expense,
Dustlers remain where they are - I see
no reason to doubt the same Cause
will produce the same effect, Sheets
of Foolscap covered with arguments and
orders, parcels beautiful plans &
of building, all indicative of the best

intentions have produced no practical
results - The Buildings remain as
they were, the only difference being
that they are become more leaky
and dilapidated, meanwhile the
necessity of the measure becomes more
apparent, yet with all this proof to
demonstration, so long as the Sea-
Customs Revenue is applied to diini-
=sish Commissariat Charges and
increase the Revenue of the Collectors
of Land Customs, beneficial Changes
may occur in those Departments where
money is available but not here -

The Government have been
informed that the Charge on the Revenue on the
Calcutta Customs is 8 per Cent, and restrict
as to this amount, whereas deducting the
Revenue from Salt it is 17½ per
Cent - In Madras the Salt Revenue
is

9428 Fort St. George 14th June 1855

is carried to the credit of Land Customs, the Revenue derivable from spirits to the Commissariat to diminish its Charges and the Land Customs to increase its receipts, and altho' the Abkarry Revenue realized by the Commissariat in the Provinces is carried to that Head in the Civil Department, Madras is still made the exception to the Rule, the Custom duty is not levied and the spirits sold at a profit to the soldier is carried to the credit of Government without being debited with this Charge.

We are thus hampered with the Cost of Departments and substantial

DG

benefits

9429. Fort St. George 11 June 1855

benefits derived on account of the expence which would not form matter of objection were the legitimate receipts of the Customs carried to its credit as at the Presidencies. I have stated that the Import duty on Salt as charged to the Customs in Calcutta and is directed to be done at Madras. In all cases hitherto it has been credited to the Land Customs, we are at Madras Exporters, seldom importers of Salt and it is the duty on Salt, whether imported or exported which the Sea Customs should receive. In Calcutta and Bombay Contractors pay the regulated duty on all goods to the Sea Customs because the Commissariat is treated at each of the other Presidencies as a Mercantile firm or individual Merchant would be, it is at Madras alone that this branch has credited to its charges from the year 1844/45 to 1853/54 of Sea Custom Revenue Rupees Nineteen Lacs sixty seven thousand four hundred and ninety two which would have been debited to it at the other Presidencies.

+ Minutes Consultation Letter 3rd October 1854 No 1290

+ Letter from Collector of Customs Calcutta 10th September 1854

Fort St George 17th June 1855

I am led to understand that the Board of Revenue have lately recommended the continuance of the Land Customs Collectorate the principal ground being the difficulty of otherwise dealing with questions in which the Supreme Court might interfere — I cannot imagine what difference it would make whether the Land or Sea Customs Collectors were summoned especially as this Department has shewn itself equal to the exigency where it has had to deal with this Court you are aware of the change effected consequent upon the difficulty experienced in shipping Spirits what is there advanced equally applies to all articles imported or exported if included in the Sea borne commerce of the country — The Salt Department was formerly under this Department and experience has demonstrated it is detrimental to commerce that products should pass through more Departments than one especially where

Fort St George 11th June 1855

where the heads of each have independent authority and are located at a distance from one another — I offer no observation to prove this though our Records are full of matter on this head I feel assured it would be far more advantageous to the state, and certainly to the benefit of our trade if all duties which affect the trading Community were vested in this Department, not a day passes that the necessity is urged upon our consideration —

-nity generally—

Chamber of Commerce
Madras
25th April 1855 } Signed R. O. Campbell
Chairman.

Report of the Sub Committee appointed by the Chamber of Commerce to confer with the Collector of Sea Customs, and those Members of the Mercantile Community who do not belong to the Chamber on the subject of the recent correspondence with Government regarding the Sea Custom Department.

On the appointment of the Committee notice was given to the Gentleman who had acted as Secretary at the Meeting of Merchants and Traders—not Members of the Chamber, called together for the purpose of addressing to Government a remonstrance against the Proceedings and recommendations of the Chamber in reference to the Custom House, and they were invited to enter into communication with the Committee with the view of coming to some resolution

which

which should meet the wishes of all parties.
The answer was as follows.—

To
The Secretary to the
Sir, Chamber of Commerce.

I have the honor to acknowledge the receipt of your letter of this date.

The copies of the Proceedings of the Meeting referred to and of the letter to Government would have been sent to you long since but for the pressure of business which has rendered it inconvenient to detach office clerks from their regular duties for the performance of this extra work. I hope in a few days to forward you the papers.

With reference to the concluding remark of the Second Para of your letter I beg to observe that the work of the Committee appointed on the 9th Ultimo is accomplished it does not seem necessary, therefore to adopt any further steps in the matter until the result of our letter to Government becomes known.

Madras
April 3d 1855

(Signed) I. I. Garrett.

The

The Committee then placed themselves in communication with the Collector of Sea Customs and met him by appointment at the Custom House on the 13th Instant, when they proceeded to discuss with him the question at large as to the measures to be taken to render the Custom House building suitable and sufficiently commodious for the wants of the increasing trade.—

The result of a good deal of Secretary conversation was that Mr. Underwood admitted that the wishes of the Chamber as regards the passing of Goods direct from the beach, at the option of the Importers or consignees, could always be complied with to a certain extent, without any change of the existing system, provided all the packages of one Mark or one Invoice are landed in the course of one day.—That with regard to the accommodation afforded for goods in the Import yard, he was of opinion that it might be considerably extended and improved by covering in the space between the sheds with terraces, and by removing every alternate pillar supporting

supporting the roofs of the Sheds, so as to afford more room for the moving of Packages.

That a large shed should be erected immediately in front of the Custom House extending along the whole front of the building and connected with its present Verandah, in which Goods may be stored over night ready for shipment early in the morning.

The Sub Committee after inspecting with the Collector the present sheds in the Custom House Yard, and after due consideration of his propositions resolve to recommend their adoption by the Chamber of Commerce as most likely to meet the views and wishes of the mercantile community generally without entailing upon Government any very great expense or involving the necessity of any considerable delay in carrying them into execution.

3d No. 1344.

From the Chairman to the Chamber of Commerce Madras.

Sir I have the honor on behalf of the Chamber of Commerce to acknowledge receipt of your letter of the 18th December last on the subject of the insufficient accommodation afforded by the Custom House.

In that communication you adverted to a request made by the Chamber in their Chairmans letter of the 21st October last addressed to Government that "under existing circumstances if not as a general privilege which might be determined by its practical working, the Mercantile Community might be permitted to pass up their goods from the Beach as landed without the necessity of having them carried into the Custom House yard and left there pending the usual forms being gone through for being certified for Duty, the necessary security being in all cases given for the due payment of the Duty to which they may be liable, and you requested that the Chamber would confer with the

the Collector of Sea Customs on the subject of this proposition with the view to the introduction of the practice recommended, and you expressed the hope that information on this subject might reach the Board at an early date in order to steps being taken for the removal of the co inconvenience complained of. Shortly afterwards I received a communication from the Collector of Sea Customs, handing Copy of Extracts of Minutes of Consultation of Government No. 1611 of 12th December and of the Proceedings of the Board of Revenue with reference thereto and co inviting the Chamber to enter into communication with him on the subject.—

Accordingly after some correspondence co with the Collector of Sea customs and others a co Committee of the Chamber was appointed to collect information and to communicate with the Collector

That Committee having now given in their report, I shall proceed to state the result of their labors, but before doing so I beg on behalf of the Chamber very respectfully to express their dissent from the views enunciated by the Right Honorable the Governor in Council in the 3d para of the Minute

of Consultation above referred to and to demur to the doctrine that Government is not bound to provide sheds for stowing goods either under Import or Export while detained for the payment of the Government Dues. The Chamber hope they may look forward to the time as not far distant when all Export Duties shall be abolished and when therefore no such accommodation shall be required for goods under Export, but while these Duties are levied and while no imported goods can be removed from the control of the Custom House authorities till Duty has been paid, the very nature of the case seems to point to the obligation and all precedent confirms the recognition of the principle that the Government levying these Dues is bound to provide either directly or indirectly through the intervention of Dock and Warehouse Companies on whom co certain powers and privileges are conferred for the protection of the goods so detained.—

The Chamber commenced their enquiries with an earnest wish to test the practicability of assimilating the practice here to that followed in Calcutta of allowing Goods to be passed direct from the Beach to the Warehouse of the Importers and of modifying the present rules of the Custom House to meet this object, but at the very outset they were met by a strongly expressed feeling of repugnance to this measure on the part of the majority of the trading community

community who are not Members of the chamber
but whose interest in the question, and whose
Knowledge of the requirements of that large part
of the trade of the port which they represent entitles
their opinion to every respect and consideration. They
had also to encounter a number of administrative
difficulties pointed out by the Collector of Sea Cus-
toms. difficulties arising from the very peculiar
circumstances of this port, so widely different from
that of Calcutta as to demand entirely new and
peculiar arrangements. and finally among their
own body it appeared that some Members
entertained apprehensions that the proposed
change would lead to a variety of embarrassing
questions and disputes as to where and how
delivery of goods was to be made by the
Captains of ships to consignees and where
the responsibility of the former ended.—

But the greatest obstacle of all to the
carrying out of this measure was a very general
feeling that what was suggested by the cham-
ber as a temporary expedient for the relief
of the over crowded and unsafe Custom House
yard, till better accomodation could be
obtained would if once adopted be treated
by Government as a permanent measure
either as a convenient and inexpensive
alternative to the obligation which the
Government were supposed to disavow
of providing efficient Custom House
accommodation

accommodation, or as a means of indefinitely
postponing that measure, which is considered
alike by the Collector of Customs and all
parties connected with the trade of this
place as absolutely and indispensably
necessary and which as such has been prefsed
upon the attention of Government from time to
time for a number of years back but with-
out any progress being made towards its accom-
plishment. under these circumstances the
Chamber felt obliged to abandon the proposal
as practically inapplicable to the circumstan-
ces of the port. Viewed as a system, and as
still leaving the original grievance, of
the inadequacy and incommodiousness
of the Custom House accommodation, where
it was.—

The Committee of this Chamber
therefore, anxious to propound some measure
which tho not a final one, such as could
be considered adequate to all the require-
ments of the case, might at least effect a
very considerable improvement on the pre-
sent condition of the Custom House and
which while reconciling the views of the
Mercantile and trading community might
be

be capable of being carried out at so moderate an outlay as to deprive the Government of any ground of objection on the score of Expence - resolved to make the following suggestions in which they are assured of the concurrence and support of the Collector of Sea Customs.—

Looking at the probability of the early abolition of all Export duties, when the present Export yard would become available for enlarging the area of the Import yard, and when the entire re-arrangement of the space would be rendered necessary, the Committee refrain at present from preferring upon Government the necessity insisted on hitherto, of more ground being taken in. They recommend first that the detached sheds running parallel to each other and extending East and West across the Import yard, and which are at present in a very dilapidated condition, be unroofed, that each alternate pillar at present supporting the roof be removed and that those that remain be raised several feet and roofed again, that the roofs of the different sheds so raised be connected by

by terraces with each other; that is, that the vacant space between each shed at present exposed to the Sun and Rain be covered in by terraces so as to connect the whole together. That this be done gradually so as to cause as little inconvenience as possible and that the floor of the whole be slightly raised and well paved. This would effect a great economy of the space actually available and afford not only more cover but much more room for the moving of packages and would render possible an approximation to the provision of the British Warehousing Act that "all goods Warehoused shall be stowed in such manner as that easy access may be had to every package and parcel of the same".—

Secondly. That a large and commodious shed be erected immediately in front (East) and extending entirely along the whole length of the Custom House Buildings, and connected with the present Verandah, in which goods may be stowed overnight and be ready and accessible for shipment early in the morning, and that the present dilapidated shed contiguous to the Beach be removed.—

That

9446 Fort St George 11th June 1855.

Thirdly. That without adopting any alteration of system the Collector should be instructed as far as possible to accommodate his practice in regard to the immediate out passing of goods, to the wishes of Consignees, and that where no reasonable objection can be shewn, Consignees who have satisfied the Collector as to the payment of duty should be allowed as a matter of privilege, if not as a right, to have their goods or such particular portions of them as may be previously indicated transferred at once from the Beach to their own premises.

I have the honor to request that these recommendations may be submitted to the Right Honorable the Governor in Council for his consideration, and I trust that as should they commend themselves to the Board as likely to meet the objects in view, the Board will do the Chamber of commerce the favor to support them by such remarks as they may think proper to make in confirmation of the views which they embody and to urge the immediate commencement of the required alterations.—

I beg to apologize for the delay which has taken place in making this communication, but it has been in some

respects

9447 Fort St George 11th June 1855

respects unavoidable.—

Proceedings thereon.— Ordered that the above letter be forwarded for the information of Government.—

In Cons 10th Dec 1864

2. On the 12th December last the Government forwarded to the Board a Communication /21st October 1854/ from the Chamber of Commerce, requesting the attention of Government to the insufficient accommodation afforded by the present Custom House premises the inadequate protection provided for the goods in the Import and Export yards and suggesting that under existing circumstances the Mercantile Community might be permitted as is the Custom in Calcutta to pass up their goods direct from the Beach without passing them through the Custom House the necessary Security being in all cases given for due payment of the duty

The

Fort St. George 11th June 1855

3 The Government in forwarding this letter to the Board remarked that it was not in their opinion incumbent upon the Government to provide sheds for storing goods either under Export or Import and that such would appear more properly the business of the Merchants while it is for Government only to secure by a System of checks the payment of the proper duties and the Board were directed to Consider whether such a plan might not be carried into effect. They were also directed to report upon the proposition of the Chamber as to the passing up of goods direct from the Beach without going through the Custom House according to the existing practice.

4 The Board then addressed the Chamber 18th December 1854 to which the letter at the head of these Proceedings is the reply.

5 It is necessary however to advert to the receipt by the Board of Extract Minutes of Consultation under date 16th April 1855 forwarding for communication to the Collector of Sea Customs a letter from the Trading Community of Cuddalore submitting the proceedings of a Meeting of that body

In Cons 19th April 1855

Fort St. George 11th June 1855

body held to take into consideration the alterations proposed by the Chamber of Commerce in their letter to Government of the 30th October 1854. The Government directed that the Collector of Sea Customs should be instructed to report upon the representations thus made & how replying to the Extract Minutes of Consultation of the 12th December 1854.

The original Enclosures were forwarded 19th April 1855 to the Collector and he was directed to report upon them as required That Officer replied on the 27th April that he should submit his sentiments direct to Government and his letter was forwarded to Government with Board's Proceedings 3rd May

In Cons 3rd May 1855

7. As no report may be expected from the Collector the Board will at once take into Consideration the letter of the Chamber noted at the head of these Proceedings.

8 It is observed that this body "in consequence of stated difficulties which presented themselves has abandoned their proposition that goods should be permitted to pass direct from the Beach to the Godowns of the Importers tho they request that the Collector should be instructed as far as possible to accommodate his practice in regard to the immediate

Fort St. George 11th June 1855.

immediately on passing of the goods to the wishes of the Importers as signified in their proposition above mentioned.-

9. The Chamber express their dissent from the principle enunciated by Government as to providing sheds for the storing of goods while detained for the payment of the Government dues and contend that as long as these duties are levied the Government is bound to provide either directly or indirectly through the intervention of Dock and ware house Companies for the protection of the goods so detained.-

10. as the best means of affording this protection at a moderate outlay, and under the expectation of the early abolition of Export duties when the present Export yard would become available for enlarging the area of the Import yard they do not press as hitherto the necessity of more ground being taken in and recommend First, that the detached sheds in the Import yard at present in a delapidated Condition be improved that each alternate pillar be removed and the remaining ones raised several feet and roofed again and that the Vacant space between the sheds be Covered with a terraced roof so as to

Connect

Fort St. George 11th June 1855.

Connect the whole together that this be done gradually and so as to cause the least inconvenience and that the flooring be slightly raised and well pitched- Secondly that a large and Commodious shed, the present delapidated one being removed, be erected in front along the whole length of the Custom house building- the 3rd proposition has been already alluded to in Para 8.-

11. The Board Concur in the abstract Justice of the view taken by the Government as to their not being strictly called upon to provide accommodation for the goods brought for duty- Private ware houses should meet this point here as elsewhere, but as the trade of the Port has grown up, under a system embracing such accommodation hitherto the denial of it would lead to serious embarrassment, and as all the space round the Custom house is occupied, they would submit for favorable Consideration the Continuance of the accommodation- The plan proposed by the chamber for enabling the present yards to receive and shelter a large quantity of goods appears to the Board Judicious, and prompted by a desire to avoid a large outlay- The Board would accordingly recommend that the alterations be commenced

without

Fort St. George 11th June 1855

Fort St. George 11th June 1855

in that delay.—

12. With regard to the Chambers 3rd proposition in the absence of any Communication from the Collector of Sea Customs who as remarked above has signified his intention of addressing Government direct on the Subject, the Board are unable to say how far "administrative requirements" may permit the carrying out of the wishes of the Chamber, they will only therefore express their Conviction that the Government will be ready to afford every facility for the passing of goods Consistent with the security of their own interests.—

P. S. Since the above was written the Board have received the Collectors reply to Extract Minutes Consultation 12th December 1854 and it is forwarded herewith.—

From Collector 28th May in Con 11th June 1855 No. 36.

2 On the question of the Government providing room for storing goods, the Collector remarks that goods brought for this purpose "are warehoused and charged with rent" (Para 4) but that as the goods are detained at the Custom House for the purpose of levying the duties of Government this Council is ready to afford reasonable protection" to them while so detained.—

This being the Custom of the Port—the Board have already recommended that good and safe accommodation may continue to be provided but it is scarcely necessary to observe that elsewhere goods are deposited in the warehouses of private Companies to which the Government Officer has access for levy of duty and in that case it is not necessary that Buildings should be specially provided by the State.—

Enc in letter from Coll. S. Cus. dated 28th May in Cons 11th June 1855

3. The Collector then proceeds to argue against the impracticability of the Chambers Scheme regarding the passing up of goods, but as that body have as before remarked, receded from that proposition further notice of this point is uncalled for.—

4 In the letter from the Chamber dated 25th April mention is indeed made that the Collector had admitted their proposition could be applied to "all the packages of one mark or invoice landed in one day" Mr. Underwood alludes to this in Para 10 but further than declaring that the plan "will be seldom availed of here" "does not expressly state whether he is prepared to Carry it out even to this extent.—

He

Encm to Govt
12th inst No 18 Dated
1864

Fort St. George 11th June

6. He alludes Para 11 to his interview with the Gentlemen of the Trading Community in Connection with their address to Government of the 26th March 1855 and who as far as he could gather Concurred in the Views entertained by the Chamber "provided the buildings proposed were Commenced forthwith and that when "both Government would at once proceed "to provide the other sheds required without delay"

6 Mr Underwood recommends Para 14 that the alterations proposed by the Chamber be put in hand at once and that "irrespective of these buildings means to take "to obtain more ground and a plan Submitted "to place thereon suitable buildings with "a tramway for the egress and ingress of "goods and tramways between the Sheds"

7. He is of opinion also that the accommodation at present afforded by goods being permitted to lie on the Custom House premises for 14 days after the last landing of each Consignment should be curtailed and that in future a rent should be charged at the rate of one Anna for 4 packages for all goods placed under Cover.

8 He has not apparently disagreed this.

Fort St. George 11th June 1855

this change with the Chamber of Commerce and the Trading Community and without being in possession of their views on the subject the Board are unwilling to give an opinion as to the expediency of the proposed alteration in existing practice.-

The Board would confine

9

their recommendation to the Commencement of the improvements in the Export and Import yards and the Construction of a new shed in front of the Custom House as soon as an Estimate can be prepared in D. O. M. On their Completion, it will be seen how far the requirements of the Port are met, and if still provided for inadequately the more Comprehensive plan of the Collector of obtaining more ground and Constructing suitable buildings thereon can then be considered It embraces an Expenditure on which the question will then come for discussion whether if more ground is to be taken up the Government shall provide the accommodation or the mercantile Community be left to Construct their own warehouses to which goods may be conveyed pending the levy of duty.

Bd. No. 1451.
From the Chief Engineer D.P.W.
Intimating that the computations for determining the areas of the Collectorates in the Madras Presidency have been made from the Sheets of the Indian Atlas herewith forwarded transmitting the mensuration frame devised by Lieutenant O'Connell of the Engineers and requesting to return it carefully with remarks upon its fitness for its object.—

Gentlemen,

It was not without self reproach that I received the instructions of Government to officially place before you the details of the process that I had had recourse to in order to determine approximately the areas of the Collectorates in the Madras Presidency; for the matter is readily susceptible of viva voce explanation, and it must have been my own fault that personally with your third Member I did not fully describe the method by which the "results nearly" were ascertained as I wished to, and thought I had done.—

2. I have now the greatest pleasure in complying with your requisition, and do myself the honor to acquaint you that without exception the computations have been made from the printed sheets of the Indian Atlas. These, as you are well aware, are all on a scale of 4 Miles to an inch or what is the same thing Sixteen Square Miles to a Square inch. By placing these sheets open on a drawing table, and laying on the flat surface an accurately constructed Square of ten inches, equal to 1600 Square Miles, with fine brass wires

Fort St. George 11th June 1855.

wires 1/4 of an inch apart in the length and breadth (each fourth wire being a little less thin than the intermediates for a greater convenience) it is evident that we have a simple and accurate means of guessing the area by inspection, since each space included between the fine intersecting wires represents exactly one Square Mile. It is only necessary to see how much of the ten inch Square is filled underneath by the District under measurement and to read off for the number of the less thin wires for inches of 10 Miles and of the finer wires for Miles respectively in the length and breadth of the frame, in order to obtain the superficies which must be as correct as each printed sheet itself is. The application can be repeated with exactitude as often as may be necessary; and care rather than skill or dexterity is all that is required to arrive at what seem to be quite satisfactory results.—

3. It was in this way that the areas of Chinglepute and of N. & S. Arcot were ascertained. Maps of the boundaries of those Districts having been supplied to me by the Collectors.—

But

Fort St. George 11th June 1855.

4. But you will have observed in the remarks placed opposite the areas of Ganjam and Vizagapatam, that the computation of the superficies had only been carried to the extent that had been surveyed when the sheets of the Atlas were published, and you will not therefore be surprised at such difference as 4,690 S.M. for Vizagapatam instead of 7,808 S.M. as lately reported by Major Birdwood and perhaps an even greater discrepancy in Ganjam.—In these cases even approximate correctness was expressly disclaimed.—

5. The areas of the Zemindaries given in Column 2 of my Statement Form portions of the same areas as are shewn in Column 1.

6. The sheets of the Indian Atlas from which these areas were computed are forwarded herewith; and under the impression that you will like to inspect the mensuration frame devised by Lieutenant Connell of the Engineers, I beg leave to send it for your examination, and request that it may be carefully returned when no longer required, with such remarks upon its fitness for its object as you may be pleased to favor me with.—

Madras
1st June
1855.

(Signed) J. C. Taber Lt. Col. of Engrs.
Chief Engr. in the D. of Gjt.

Fort St. George 11th June 1855.

P.S. I have forwarded a copy of the Extract Minutes Consultation to Lieutenant O'Connell, with a request that he also will draw up a report, which, if or when received, I shall duly lay before you. —

No. 1.

Memo descriptive of the method employed in measuring the Areas of the different Collectorates of the Madras Presidency. —

All the Collectorate areas were measured off the Atlas sheets which are on a scale of 4 Miles to an inch. —

2. If these sheets be inspected, it will be seen that a Collectorate is seldom contained in any one Sheet, it was therefore necessary to measure the portion of Collectorate contained in each sheet separately and to add together the different fractional portions in order to find the area of a whole Collectorate.

3. The measurement was made by means of an instrument constructed for the purpose as follows. —

A frame 10 inches in interior width and 10 inches in interior length was crossed longitudenally and transversely by thin brass wires 39 in each direction so that the greater Square contained within the

Fort St. George 11th June 1855.

frame was divided into (40 x 40) 1600 minor Squares, each of which was equivalent to a Space in the printed Atlas sheet which represented in that Map one Square mile.

4. The Atlas sheet being divided longitudinally and transversely by pencil lines placed 10 inches apart so as inclose Squares each 10 inches by 10 inches the instrument above described was placed successively on each of the last mentioned Squares, the number of minor Squares and fractions of the same contained within that portion of Collectorate which was included in each successive position taken up by the Major Square being noted and the numbers thus obtained being added up for each Collectorate separately gave the total area of each Collectorate. —

5. The measurement was in this manner made by Veerasawmy Estimate maker and by Mr. Jordan and the average of the results obtained by these two persons was entered in the list forwarded to Government. —

6. The instrument is with Mr. Jordan, who is able to explain its use. —

To.

9464. Fort St. George 11th June 1855.

To

The Secretary to the Board of Revenue

With reference to the Chief Engineer's letter dated 1st June 1855 No. 137.

Chief Engineer's Office,
Fort St. George,
4th June 1855.

Ordered that the following letter be sent to apply.

To

Lieutenant Colonel Faber
Chief Engineer.

(88.89)

Bd. No. 1463.
To the Chief Engineer offering the Board's opinion on the Computing Frame for determining the areas of the different Districts in this Presidency.

Sir,

I have the honor by desire of the Board to acknowledge your letter of the 1st June, with the Sheet Maps and Computing frame. The Board are much indebted to you for explaining to them the mode which you have adopted to determine the areas of the different Districts.

2. They do not feel themselves competent to offer an opinion as to the method of computation where your Professional experience must of course be decisive of the question. The only doubt that arose in their minds was whether in the Sheet maps the boundaries have been correctly marked out, as changes, they believe have

9465. Fort St. George 11th June 1855.

have been made in the areas of some Districts since the time of the Trigonometrical Survey. They also wished to ascertain if all the Zemindaries were distinctly shewn. They have not of course been able personally to inspect each of the sheets with a view to determine this point but they do not find, that Vizianagrum, Jeypoor Calasty, Carvetnugger, Banganapully, Bobely &c. are separately noted.-

3. The Chief differences between your results and those stated in Appendix C of the Board's letter to Government of 24th August 1854 are in Vizagapatam and Rajahmundry. The former by the Printed Table contains 15,300 Square Miles by the Plotting in the Board's Office 7,808 - by weight 7,262 but in your Return only 4,690. Rajahmundry in the Printed Table contains 6,050 Square Miles, by the Plotting in the Board's Office 5,504, by weight 7,120, and by your Return 4,501.

North Arcot by the Trigonometrical Survey is 5,790 Square Miles, and by your return it is 6,580 - the Board are inclined to believe that one Estimate includes Congoondy, and the other does not.

You-

4. You inform the Board that "in this way" that is by the Computing Frame, the Area of Chingleput, and of North and South Arcot were ascertained, but they do not know how the areas of the other Districts have been determined.-

5. They think that it would be advisable to send to each District the Sheet Maps and desire the Collectors to mark off the Boundaries, as in the case of Chingleput and North and South Arcot. The aid of the Civil Engineers who are so well acquainted with the Country might be useful in this matter. It would also be of great service if the boundary of each Taloot and each Zemindary were distinctly shewn.-

6. If the Board might be permitted to add a word as to your Computing Frame they would suggest that thick tracing paper divided into squares would be more convenient, as the boundary lines might then be laid down in pencil, and the paper might be examined by more than one person. The frame is apt to slip. The pencil marks in the Tracing paper might be erased, and the paper used

used several times. A frame divided into inches, and tenths would, they think be very useful in Computing all kinds of irregular areas.

Rev. Bd. Office, Fort St. George, 11th June 1855.

To

Major J.H. Bell
Secretary to the Board of Revenue in the D.P.W.

From the Acting Civil Engineer 5th Division D.P.W.

Sir,

With reference to Circular order of the Board under date 12th Instant, I have the honor to forward you a Statement of the number of square miles in each Taloot of the District of South Arcot.-

I do not conceive that the dimensions are very accurate, but are as near as it is possible to find them, there being no maps of the district with the different Taloots marked on it.

The return for Salem shall be sent as soon as the needful information is received from the Collector.-

Civil Engr's Office, 5th Division, Veeravandy, 26th February 1855.

B

Presidency under the provisions of Regulation IX of 1822, and the manner in which the charges have been disposed of, together with a Statement of the number of appeals preferred to, and disposed of by the Board under Regulation VII of 1828, during the 2nd half of the year 1854.—

2. The following abstract will shew the number of charges and acquittals as compared with the previous half year.—

Collectors.

	Collectors Establishment		Village officers		Not in Collectors Establishment		Total	
	Charged	Acquitted	charged	Acquitted	Charged	Acquitted	charged	Acquitted
1st half 1854	9	..	67	4	-	-	76	4
2nd half 1854	5	3	80	4	-	-	85	7

One offender has been forwarded to the Criminal Courts, in default of payment of fine.—

3 The greatest number of charges during the half year under review occurred in the Districts noted in the Margin, and the majority of persons implicated were Village Officers, the offences being chiefly embezzling public money and making false entries in the public accounts.—

4 During the period under review no trials took place in the Districts of Coimbatore, Malabar and Kurnool.—

5 Of the Total number of cases above recorded, four were brought in appeal before the Board during the period under

*Cuddapah 26
South Arcot 12

under consideration and the sentences passed in three of them were confirmed and in one was reversed in part.—

6 These returns are exclusive of the five Districts under the Commissioner in the Northern Circars.—

Mr. No. 1151. and Statements.—
From the Acting Coll. of Nellore. Return of
Sheristadar and of the Tahsildars
(128) as they stood on the 1st May 1855.
Mr. No. 1153.
From the Acting Collector of Nellore. Statement of
Salt available for exportation to Cal-
cutta on Government Indent and
private Trade on 14 May 1855.— No.

23 From the foregoing statement it will be seen that, owing to the unfavorable character of the season, there has been a considerable rise in the prices of all descriptions of grain, as also of Cotton and Indigo in the Fusly under review, when compared with those of the preceding year, and with the average of the five previous, more particularly in the different Kinds of pulse, which in this district is employed as a condiment in the food by all classes of people, being boiled and mixed with the rice prepared for their daily food.—

24 These high prices have turned out to the advantage of the merchants and Ryots who had stored grain, though they have caused great inconvenience to the community at large - and in some cases actual distress - this distress was however partially alleviated by the very

very large quantity of fruit produced on the Mango and other trees, which, with the assistance of a smaller quantity of grain, enabled the poorer classes to subsist.—

25 The subjoined statement exhibits the extent and descriptions of land, which the Ryots have taken up, and also the assessment thereon, with a comparison between the past and the previous Fusly.—

9191.

Fort St. George 11th June 1856

26 Agreeably to the instructions of Government, contained in the Extract from the Minutes of Consultation under date the 28th September 1852, forwarded with the Extract from the Proceedings of the Board of Revenue dated the 18th October of the same year, circular orders were sent to all the Tahsildars enjoining them to render every facility to the ryots in their dittum settlements by excluding from the Fasliawary or dittum, lands which had been left waste for a series of years, those held by ryots who are in reduced circumstances and not able to carry on their cultivation, from the want of agricultural stock, that portion of the land which has been usually included in the dittum as liable to Fasulgasty but never realised and the extent of land which, it was anticipated, would not be liable to Jeerayasty and Fasulgasty, owing to the deficiency in the means of irrigation in the Fusly under review - This will account for the deficiency in every species of land taken up in the current Fusly, in comparison with the preceding one, amounting in the aggregate to 7,112 acres assessed at Rupees 19,709 -

27 Annexed is a statement, which shows the extent of land left waste in whole numbers, and the assessment thereof, for which remission was granted -

Fort St. George 11th June 1865

28 From the above statement it will be observed that there has been an increase in the extent of land under cultivation as compared with the preceding year.

29 The Collector states that the deficiency in the extent of land actually cultivated and the assessment thereon for Fasly 1262 amounting to Rupees 1,85,344 remains to be collected from the ryots from neglecting the annual guantity of land & annul increase and instances even throughout the district.

30 The Collector states that the deficiency in the extent of land actually cultivated this season is owing to the failure of seasonable rains, which prevented the Ryots from cultivating the usual guantity of land & annul increase and instances even throughout the district.

								Net decrease		118,614	238,592

30 There has been a decrease in the assessment of all descriptions of land actually cultivated excepting that dependent on wells, under which head an increase of Rupees 5,691 is observable - This decrease has chiefly arisen from the deficiency in the means of irrigation consequent on the failure of seasonable rains, as already explained in the preceding *paras of this Report.

*from 8 to 16

31 The following abstract statement shows the particulars of remissions withheld from the ryots, during the current and the preceding Fusly, on account of their having left their lands fallow without cause viz. - the talookwar details of which will be seen in the accompanying Statement No. 11.

	Fusly 1262		Fusly 1263	
	Extent	Assessment	Extent	Assessment
